2. Operational management of federal agencies or officials
3. To carry out statutory presidential responsibilities

- - *In 1970, President Nixon used this 398 word Executive Order establishing NOAA*.

How Executive Orders May be Vacated
The President can retract an EO at any time. The President may also issue an EO that supersedes an existing one. New incoming Presidents may choose to follow the EOs of their predecessors, replace them with new ones of their own, or revoke the old ones completely. In extreme cases, Congress may pass a law that alters an EO, and the Supreme Court can declare them unconstitutional.

Executive Orders vs. Proclamations
Presidential Proclamations differ from EOs in that they are either ceremonial in nature or deal with issues of trade and may or may not carry legal effect. All EOs become law.

Constitutional Authority for Executive Orders
Article II, section 1 of the Constitution reads, in part, *"The executive power shall be vested in a president of the United States of America."* And, Article II, section 3 asserts that, *"The President shall take care that the laws be faithfully executed..."* Since the Constitution does not specifically define executive power, critics of Executive Orders argue that these two passages do not imply Constitutional authority. But, Presidents of the United States since George Washington have argued that they do.

Modern Use of Executive Orders
Until World War I, the Executive Order was used for relatively minor, usually unnoticed acts of state. A trend that changed drastically with passage of the War Powers Act of 1917. This act passed during WWI granted the President temporary powers to immediately enact laws regulating trade, economy, and other aspects of policy as they pertained to enemies of America. A key section of the War Powers act also contained language specifically excluding American citizens from its effects.

The War Powers Act remained in effect and unchanged until 1933 when a freshly elected President Franklin D. Roosevelt found America in the panic stage of the Great Depression. The first thing FDR did was to convene a special session of Congress where he introduced a bill amending the War Powers Act to remove the clause excluding American citizens from being bound by its effects. This would allow the President to declare "national emergencies" and unilaterally intact laws to deal with them. This massive amendment was approved by both houses of Congress in under 40 minutes without debate.

Hours later, FDR officially declared the depression a "national emergency" and stared issuing a string of Executive Orders that effectively were the "New Deal."

While some of FDR's actions were, perhaps, constitutionally questionable, history recognizes them as averting the growing panic and starting our economy on its way to recovery.

All Those Opposed
Many people strongly oppose the Executive Order as being an unconstitutional, even potentially dictatorial application of power. While the purpose of this article is not to state an opinion, or editorialize either way, I feel it only fair that this alternative point of view be represented.

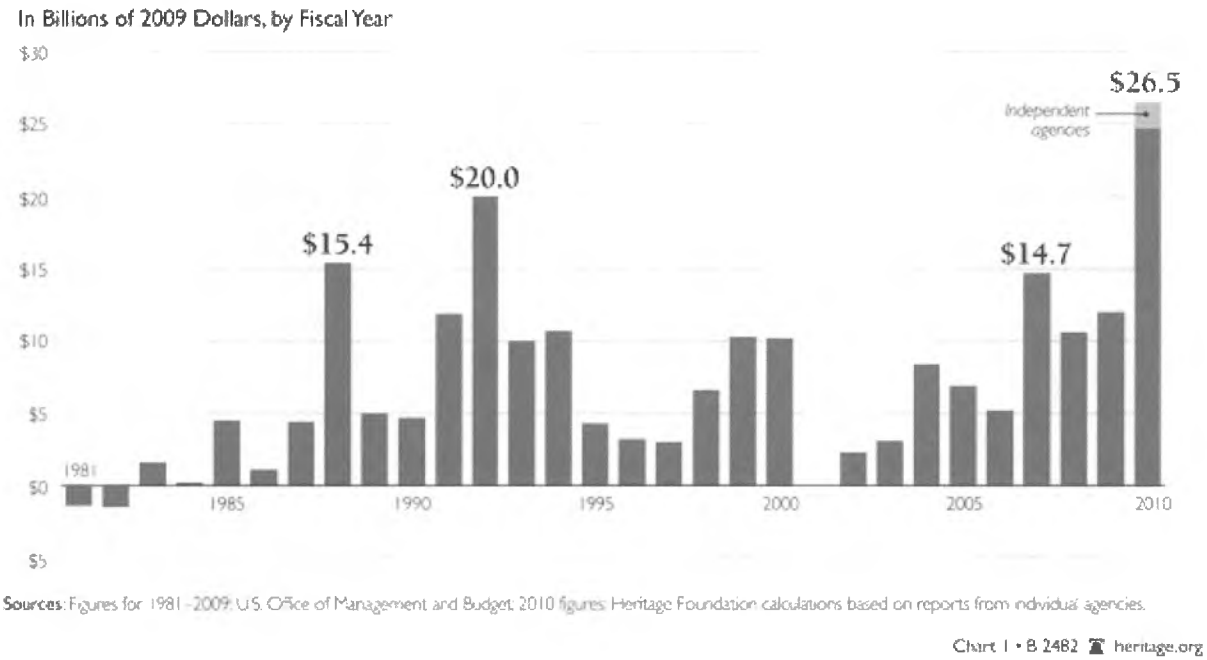
Cost of Major New Regulations



Sources: Figures for 1981–2009: U.S. Office of Management and Budget; 2010 figures: Heritage Foundation calculations based on reports from individual agencies.

Chart 1 • B 2482 heritage.org

Among the most costly of the FY 2010 crop are:

- Fuel economy and emission standards[6] for passenger cars, light-duty trucks, and medium-duty passenger vehicles imposed jointly by the EPA and NHTSA. Annual cost: $10.8 billion (for model years 2012 to 2016). For automakers to recover these increased outlays, NHTSA estimates the standards will lead to increases in average new vehicle prices ranging from $457 per vehicle in FY 2012 to $985 per vehicle in FY 2016.[7]
- Mandated quotas for renewable fuels. Annual cost: $7.8 billion (for 15 years). Utilizing farmland to grow corn and other crops used in renewable fuels will displace food crops, leading food costs to increase by $10 per person per year—or $40 for a family of four, according to the EPA.[8]
- Efficiency standards for residential water heaters, heating equipment, and pool heaters. Annual cost: $1.3 billion. The appliance upgrades necessary to comply with the new standards will raise the price of a typical gas storage water heater by $120.[9]
- Limits on "effluent" discharges from construction sites imposed by the EPA. Annual cost: $810.8 million. The cost of the requirements will force the closure of 147 construction firms and the loss of 7,257 jobs, according to the EPA. Homebuyers also will bear some of the costs, with an increase in mortgage costs of about $1,953.

Regulatory Reductions Missing in Action

Measures to reduce regulatory burdens, by contrast, were few and far between in FY 2010. Only five significant rulemakings adopted last year reduced burdens. Of these, cost reductions were quantified for only two, for reported savings of $1.5 billion. This leaves a net increase in the regulatory burden of $26.5 billion.

Moreover, one of the five measures—though technically deregulatory in nature—relates to an unparalleled *expansion* of EPA powers. Due to its determination last year that greenhouse gases are pollutants, the agency is moving to set emissions limits for such gases. To follow the standards in the Clean Air Act would corral millions of currently unregulated "facilities," including offices and apartment buildings, shopping malls, restaurants, hotels, hospitals, schools, houses of worship, theaters, and sports arenas into the EPA regulatory regime. In hopes of quieting political outrage over so sweeping a dictate, the EPA's "Tailoring Rule"[10] set a minimum threshold level for regulation. Therefore, fewer facilities would be subject to permit requirements, making imposition of the emissions limits more feasible. Rather than reduce overall burdens, this action actually facilitated increased burdens.[11]

Actual Costs Likely Higher

The actual cost of regulations adopted in FY 2010 is almost certainly much higher than $26.5 billion. As a first matter, the cost of non-economically significant rules—rules deemed not likely to have an annual impact of $100 million or more—is not calculated (although such rules are believed to constitute only a small portion of total regulatory costs). Moreover, costs were not quantified for 12 of the economically significant rules adopted in FY 2010.

Many of the rules lacking quantified costs involve financial regulation. The Federal Reserve Board, for instance, did not quantify any costs for its new "Truth in Lending"[12] regulations—which impose fee and disclosure requirements for credit card accounts—although the new rules are generally expected to be costly. Similarly, costs were not calculated for new Federal Reserve Board regulations on prepaid electronic gift cards.[13]

It should also be noted that reported costs are likely minimized by allowing agencies to make the initial calculations, thereby casting their proposals in the best light. This could have a substantial impact: Overall, there is evidence that agencies systematically understate regulatory costs. In its 2005 report to Congress, the OMB's Office of Information and Regulatory Affairs conducted *ex ante* analyses of regulations to test the accuracy of cost-benefit estimates. The study determined that regulators overestimated benefits 40 percent of the time and underestimated costs 34 percent of the time.[14]

Even a finding that costs exceed benefits does not necessarily stop a new rule from going into effect. For instance, in evaluating new regulations for train-control systems, the Department of Transportation identified costs of $477.4 million, and benefits of a mere $22 million. Nevertheless, due to a statutory mandate, the regulations were adopted.

The EPA is prohibited by law from considering costs in devising regulations under the Clean Air Act and other major environmental statutes. Thus, the agency recently set new, more stringent standards on emissions of nitrogen dioxide without formally considering the economic or technical feasibility of compliance.[15] While the EPA did prepare a cost-benefit analysis—concluding that the costs exceed the benefits—agency officials conceded they had no way of determining the number of localities that would be out of compliance under the new rule.

Lastly, it should be noted that annual compliance costs constitute only part of the economic burden of regulation. New rules also entail start-up costs for new equipment, conversions of industrial processes, and devising data collection and reporting procedures. These "first-year" costs exceed $3.1 billion for the 43 new FY 2010 regulations. For example, new restrictions on "short sales"[16] imposed by the Securities and Exchange Commission will require initial costs of more than $1 billion[17] for modifications to computer systems and surveillance mechanisms, and for information-gathering, management, and recordkeeping systems. Likewise, the EPA estimates one-time implementation costs of nearly $745 million for new limits on emissions from diesel engines used in energy production.[18]

More Rules on the Way

Many, many more regulations are in the pipeline. According to one estimate, financial regulation legislation recently adopted by Congress, known as the Dodd–Frank bill, will require 243 new formal rule-makings by 11 different federal agencies.[19] So wide-ranging are regulators' new powers, in fact, that the Department of Health and Human Services has failed to meet one-third of the deadlines mandated by the new federal health care law, according to a report by the Congressional Research Service.[20]

Meanwhile, the new Consumer Financial Protection Bureau created under the Dodd–Frank measure will wield vaguely defined powers to regulate financial products and services, including mortgages, credit cards, even student loans. And, the Federal Communications Commission is mulling new regulations to limit how Internet service providers manage their networks. Such "net neutrality" rules, if enacted, would undermine investment incentives, thereby robbing the nation of much-needed broadband upgrades.[21]

Taken together, these initiatives embody a stunningly full regulatory agenda—indicating that this year's record for regulatory increases will not stand for long.

Conclusion

The regulatory burden increased at an unprecedented rate during FY 2010, as measured by both the number of new major rules as well as their reported costs. Even more are on the way in 2011.

A number of steps have been proposed to stem this growth, ranging from automatic sunsetting of rules[22] to requiring congressional approval of all new major rules.[23]

Mere procedural reforms will not be enough to stem this regulatory tide. Regulatory costs will rise until policymakers appreciate the burdens that regulations are imposing on Americans and the economy, and exercise the political will necessary to limit—and reduce—those burdens.

486 U.S. 57

108 S.Ct. 1637

100 L.Ed.2d 48

CITY OF NEW YORK, City of Miami, City of Wheaton and National League of Cities, Petitioners
v.
FEDERAL COMMUNICATIONS COMMISSION et al.

No. 87-339.

Argued March 29, 1988.

Decided May 16, 1988.

Syllabus

In 1974, after two years of unsatisfactory experience with conflicting federal and local technical standards governing the transmission of cable television broadcast signals, the Federal Communications Commission (FCC or Commission) promulgated regulations pre-empting the field of signal-quality regulation. In 1984, this Court broadly approved the pre-emptive authority that the FCC had asserted over cable system regulation. *Capital Cities Cable, Inc. v. Crisp,* 467 U.S. 691, 104 S.Ct. 2694, 81 L.Ed.2d 580. A few months later, Congress enacted the Cable Communications Policy Act of 1984 (Cable Act or Act), which empowers state or local authorities to enfranchise cable systems and to specify the facilities and equipment that franchisees could use, but which also authorizes the FCC to establish technical standards for such facilities and equipment. Pursuant to the latter provision, the FCC adopted regulations establishing technical standards governing the quality of cable signals and forbidding local authorities to impose more stringent technical standards. Petitioners sought review of the regulations in the Court of Appeals, contesting the scope of the FCC's claimed pre-emptive authority and asserting that franchising authorities could impose stricter technical standards than the Commission's. The court upheld the regulations.

Held: The FCC did not exceed its statutory authority by forbidding local authorities to impose technical cable signal quality standards more stringent than those set forth in the Commission's regulations. Pp. 63-70.

(a) Whether a federal agency has properly determined that its authority in a given area is exclusive and pre-empts any state regulatory efforts does not depend on the existence of express congressional authorization to displace state law. Rather, the correct focus is on the agency itself and on the proper bounds of its lawful authority to undertake such action. If the agency's decision to pre-empt represents a reasonable accommodation of conflicting policies committed to the agency's care by statute, the accommodation should not be disturbed unless it appears from the statute or its legislative history that the accommodation "is not one that Congress would have

sanctioned." *United States v. Shimer,* 367 U.S. 374, 383, 81 S.Ct. 1554, 1560, 6 L.Ed.2d 908. Pp. 63-64.

(b) In adopting the regulations at issue, the FCC explicitly stated its intent to continue its prior policy of exercising exclusive authority and of pre-empting state and local regulation, in order to address the potentially serious adaptability and cost problems created for cable system operators and consumers by technical standards that vary from community to community. Thus, this case does not turn on whether there is an actual conflict between federal and state law, or whether compliance with both federal and state standards would be physically impossible. Pp. 65-66.

(c) The FCC acted within its authority under the Cable Act when it pre-empted state and local regulation. In adopting the statute, Congress acted against a 10-year background of federal pre-emption on this particular issue and at a time shortly after *Crisp* approved FCC pre-emption in very similar respects. Nevertheless, Congress sanctioned in relevant respects the regulatory scheme that the Commission had already been following, without indicating explicit disapproval of the Commission's pre-emption of local technical standards. Given the difficulties the FCC had experienced with inconsistent local standards, it is doubtful that Congress would have meant to overturn pre-emption without discussion or even any suggestion that it was doing so. To the contrary, the legislative history makes clear that the Cable Act was not intended to work any significant change. Thus, nothing in the Act compels the conclusion that the decision to pre-empt "is not one that Congress would have sanctioned." Pp. 66-70.

259 U.S.App.D.C. 191, 814 F.2d 720 (1987), affirmed.

WHITE, J., delivered the opinion for a unanimous Court.

Stephen J. McGrath, New York City, for petitioners.

Lawrence G. Wallace, Washington, D.C., for federal respondent, F.C.C.

H. Bartow Farr, III, Washington, D.C., for respondent, National Cable Television.

Justice WHITE delivered the opinion of the Court.

1

The Federal Communications Commission has adopted regulations that establish technical standards to govern the quality of cable television signals and that prohibit local authorities from imposing more stringent technical standards. The issue is whether in doing so the Commission has exceeded its statutory authority.

2

* This case deals with yet another development in the ongoing efforts of federal, state, and local authorities to regulate different aspects of cable television over the past three decades. See *Capital Cities Cable, Inc. v. Crisp,* 467 U.S. 691, 700-705, 104 S.Ct. 2694, 2700-2703, 81

L.Ed.2d 580 (1984); *United States v. Southwestern Cable Co.,* 392 U.S. 157, 161-178, 88 S.Ct. 1994, 1996-2005, 20 L.Ed.2d 1001 (1968). With the incipient development of cable television in the 1950's and 1960's from what had been more generally known as community antenna television systems, the Federal Communications Commission began to assert regulatory authority in this area. See *CATV Second Report and Order,* 2 F.C.C.2d 725 (1966). In 1972, the Commission first asserted authority over technical aspects of cable television and devised technical standards to govern the transmission of broadcast signals by cable, though without pre-empting regulation of similar matters by state or local franchising authorities. *Cable Television Report and Order,* 36 F.C.C.2d 143, on reconsideration, 36 F.C.C.2d 326 (1972), aff'd *sub nom. American Civil Liberties Union v. FCC,* 523 F.2d 1344 (CA9 1975).1 Within two years, however, the Commission became convinced from its experience with conflicting federal and local technical standards that there is "a compelling need for national uniformity in cable television technical standards" which would require it to pre-empt the field of signal-quality regulation in order to meet the "necessity to rationalize, interrelate, and bring into uniformity the myriad standards now being developed by numerous jurisdictions." *Cable Television Report and Order,* 49 F.C.C.2d 470, 477, 480 (1974). The Commission explained that a multiplicity of mandatory and nonuniform technical requirements undermined "the ultimate workability of the over-all system," could have "a deleterious effect on the development of new cable services," and could "seriously imped[e]" the "development and marketing of signal source, transmission, and terminal equipment." *Id.* at 478-479.2

3

In 1984, the Court approved the pre-emptive authority that the Commission had asserted over the regulation of cable television systems. We held that in the Communications Act of 1934, Congress authorized the Commission "to regulate all aspects of interstate communication by wire or radio," including the subsequently developed medium of cable television, and that the Commission's authority "extends to all regulatory actions 'necessary to ensure the achievement of the Commission's statutory responsibilities.' " *Crisp, supra,* 467 U.S. at 700, 104 S.Ct. at 2701, quoting *FCC v. Midwest Video Corp.,* 440 U.S. 689, 706, 99 S.Ct. 1435, 1444, 59 L.Ed.2d 692 (1979). Although the state law that was invalidated in *Crisp* regulated commercial advertising on cable television, rather than the technical quality of cable television signals, the Court recognized that for 10 years the Commission had "retained exclusive jurisdiction over all operational aspects of cable communication, including signal carriage and technical standards." *Crisp, supra,* 467 U.S. at 702, 104 S.Ct. at 2702.

4

A few months after the Court's decision in *Crisp,* Congress enacted the Cable Communications Policy Act of 1984 (Cable Act or Act), 98 Stat. 2780, 47 U.S.C. §§ 521-559 (1982 ed., Supp. IV). Among its objectives in passing the Cable Act, Congress purported to "establish a national policy concerning cable communications" and to "minimize unnecessary regulation that would impose an undue economic burden on cable systems." 47 U.S.C. §§ 521(1), (6) (1982 ed., Supp. IV). The Act was also intended to "establish guidelines for the exercise of Federal, State, and local authority with respect to the regulation of cable systems" through procedures and standards that "encourage the growth and development of cable systems and which assure that cable

systems are responsive to the needs and interests of the local community." §§ 521(3), (2) (1982 ed., Supp. IV).

5

The Cable Act left franchising to state or local authorities; those authorities were also empowered to specify the facilities and equipment that franchisees were to use, provided such requirements were "consistent with this title." Cable Act, §§ 624(a), (b), 47 U.S.C. §§ 544(a), (b) (1982 ed., Supp. IV). Section 624(e) of the Cable Act provided that "[t]he Commission may establish technical standards relating to the facilities and equipment of cable systems which a franchising authority may require in the franchise." 47 U.S.C. § 544(e) (1982 ed., Supp. IV).

6

In 1985, the Commission promulgated regulations that would establish technical standards governing signal quality for one of four different classes of cable television channels and that would forbid local cable franchising authorities to impose their own standards on any of the four classes of channels. 50 Fed.Reg. 7801, 7802 (1985), 47 CFR pt. 76 (1986). The Commission eventually adopted a modified version of these regulations, which reaffirmed the Commission's established policy of pre-empting local regulation of technical signal quality standards for cable television. 50 Fed.Reg., at 52462, 52464-52465. The Commission found its statutory authority to adopt the regulations in § 624(e) of the Cable Act, 47 U.S.C. § 544(e) (1982 ed., Supp. IV), and in 47 U.S.C. §§ 154(i) and 303(r). 50 Fed.Reg., at 52466. Petitioners (the cities of New York, Miami, and Wheaton, and the National League of Cities) sought review of the regulations in federal court, where they contested the scope of the pre-emptive authority claimed by the Commission and insisted that franchising authorities could impose stricter technical standards than those specified by the Commission.

7

The Court of Appeals granted partial relief to petitioners. 259 U.S.App.D.C. 191, 814 F.2d 720 (1987). It noted that the Commission had adopted technical standards applicable to one class of cable television channels, but had left the other three classes of channels completely unregulated. It agreed with petitioners that the Commission had acted arbitrarily and capriciously when it did not adopt technical standards for the latter three classes of channels, yet prohibited local authorities from adopting such standards and ignored the apparent conflict between these actions and the language of the Cable Act. It therefore vacated this part of the rule and remanded to the Commission for further proceedings. The court's holding was unanimous on this point, and that part of its decision is not at issue here.3

8

The Court of Appeals divided, however, over the propriety of the Commission's technical standards that apply to the first class of cable channels and that pre-empt more stringent local regulations. The majority of the panel upheld pre-emption, ruling that Congress intended federal regulations like these to supersede local law and that the Commission acted within the broad

confines of the pre-emptive authority delegated to it by Congress when it adopted the regulations with respect to this one class of channels. One judge dissented, contending that the majority had sanctioned pre-emption without a clear manifestation of congressional intent, contrary to this Court's decisions. We granted certiorari, 484 U.S. 962, 108 S.Ct. 449, 98 L.Ed.2d 389 (1987), and we now affirm.

II

9

When the Federal Government acts within the authority it possesses under the Constitution, it is empowered to pre-empt state laws to the extent it is believed that such action is necessary to achieve its purposes. The Supremacy Clause of the Constitution gives force to federal action of this kind by stating that "the Laws of the United States which shall be made in Pursuance" of the Constitution "shall be the supreme Law of the Land." U.S. Const., Art. VI, cl. 2. The phrase "Laws of the United States" encompasses both federal statutes themselves and federal regulations that are properly adopted in accordance with statutory authorization. For this reason, at the same time that our decisions have established a number of ways in which Congress can be understood to have pre-empted state law, see *Louisiana Public Service Comm'n v. FCC,* 476 U.S. 355, 368-369, 106 S.Ct. 1890, 1898-1899, 90 L.Ed.2d 369 (1986), we have also recognized that "a federal agency acting within the scope of its congressionally delegated authority may pre-empt state regulation" and hence render unenforceable state or local laws that are otherwise not inconsistent with federal law. *Id.,* at 369, 106 S.Ct. at 1898-1999.

10

This case involves the latter kind of pre-emption, and here the inquiry becomes whether the federal agency has properly exercised its own delegated authority rather than simply whether Congress has properly exercised the legislative power. Thus we have emphasized that in a situation where state law is claimed to be pre-empted by federal regulation, a "narrow focus on Congress' intent to supersede state law [is] misdirected," for "[a] pre-emptive regulation's force does not depend on express congressional authorization to displace state law." *Fidelity Federal Savings & Loan Assn. v. De la Cuesta,* 458 U.S. 141, 154, 102 S.Ct. 3014, 3023, 73 L.Ed.2d 664 (1982). Instead, the correct focus is on the federal agency that seeks to displace state law and on the proper bounds of its lawful authority to undertake such action. The statutorily authorized regulations of an agency will pre-empt any state or local law that conflicts with such regulations or frustrates the purposes thereof. Beyond that, however, in proper circumstances the agency may determine that its authority is exclusive and pre-empts any state efforts to regulate in the forbidden area. *Crisp,* 467 U.S., at 700, 104 S.Ct. at 2700; *De la Cuesta, supra,* 458 U.S., at 152-154, 102 S.Ct., at 3022-3023. It has long been recognized that many of the responsibilities conferred on federal agencies involve a broad grant of authority to reconcile conflicting policies. Where this is true, the Court has cautioned that even in the area of pre-emption, if the agency's choice to pre-empt "represents a reasonable accommodation of conflicting policies that were committed to the agency's care by the statute, we should not disturb it unless it appears from the statute or its legislative history that the accommodation is not one that Congress would have

sanctioned." *United States v. Shimer,* 367 U.S. 374, 383, 81 S.Ct. 1554, 1560, 6 L.Ed.2d 908 (1961); see also *Crisp, supra,* 467 U.S., at 700, 104 S.Ct., at 2700.

III

A.

11

In this case, there is no room for doubting that the Commission intended to pre-empt state technical standards governing the quality of cable television signals. In adopting the regulations at issue here, the Commission said:

12

"Technical standards that vary from community to community create potentially serious negative consequences for cable system operators and cable consumers in terms of the cost of service and the ability of the industry to respond to technological changes. To address this problem, we proposed in the *Notice* to retain technical standards guidelines at the federal level which could be used, but could not be exceeded, in state and local technical quality regulations.

13

* * * * *

14

"After a review of the record in this proceeding, we continue to believe that the policy adopted in 1974 was effective, should remain in force, and is entirely consistent with both the specific provisions and the general policy objectives underlying the 1984 Cable Act. This pre-emption policy has constrained state and local regulation of cable technical performance to Class I channels and has prohibited performance standards more restrictive than those contained in the Commission's rules. The reasons that caused the adoption of this policy appear to be as valid today as they were when the policy was first adopted." 50 Fed.Reg., at 52464.

15

As noted above, the policy adopted by the Commission in 1974, which was continued in effect by the 1985 regulations, was a pre-emptive policy applying in the area of technical standards governing signal quality. 49 F.C.C.2d, at 477-481. Since the Commission has explicitly stated its intent to exercise exclusive authority in this area and to pre-empt state and local regulation, this case does not turn on whether there is an actual conflict between federal and state law here, or whether compliance with both federal and state standards would be physically impossible. *De la Cuesta, supra,* 458 U.S., at 153, 102 S.Ct., at 3022.

B

16

The second part of the inquiry is whether the Commission is legally authorized to pre-empt state and local regulation that would establish complementary or additional technical standards, where it clearly is possible for a cable operator to comply with these standards in addition to the federal standards. We have identified at least two reasons why this part of the inquiry is crucial to our determination of the pre-emption issue. "First, an agency literally has no power to act, let alone pre-empt the validly enacted legislation of a sovereign State, unless and until Congress confers power upon it. Second, the best way of determining whether Congress intended the regulations of an administrative agency to displace state law is to examine the nature and scope of the authority granted by Congress to the agency." *Louisiana Public Service Comm'n,* 476 U.S., at 374, 106 S.Ct., at 1901. The second reason was particularly relevant in *Louisiana Public Service Comm'n* because there we were obliged to assess the import of a statutory section in which Congress appeared to have explicitly limited the Commission's jurisdiction, so as to prohibit it from pre-empting state laws concerning the manner in which telephone companies could depreciate certain plant and equipment. *Id.,* 476 U.S., at 369-376, 379, 106 S.Ct., at 1899-1902, 1904, construing 47 U.S.C. § 152(b).

17

We conclude here that the Commission acted within the statutory authority conferred by Congress when it pre-empted state and local technical standards governing the quality of cable television signals. When Congress enacted the Cable Act in 1984, it acted against a background of federal pre-emption on this particular issue. For the preceding 10 years, the Commission had pre-empted such state and local technical standards under its broad delegation of authority to "[m]ake such rules and regulations and prescribe such restrictions and conditions, not inconsistent with law, as may be necessary to carry out the provisions of this chapter [the communications laws, Title 47 of the U.S. Code, Chapter 5]," as a means of implementing its legitimate discretionary power to determine what the "public convenience, interest, or necessity requires" in this field. 47 U.S.C. §§ 303 and 303(r); see also 49 F.C.C.2d, at 481; 47 U.S.C. § 154(i). The Court's decision in *Crisp,* which was handed down during the time Congress was considering the legislation that within a few months became the Cable Act, broadly upheld the Commission's pre-emptive authority in very similar respects. 467 U.S., at 701-705, 104 S.Ct., at 2701-2703.

18

In the Cable Act, Congress sanctioned in relevant respects the regulatory scheme that the Commission had been following since 1974. In § 624 of the Cable Act, Congress specified that the local franchising authority could regulate "services, facilities, and equipment" in certain respects, and could enforce those requirements, but § 624(e) of the Act grants the Commission the power to "establish technical standards relating to the facilities and equipment of cable systems which a franchising authority may require in the franchise." 47 U.S.C. §§ 544(a)-(e) (1982 ed., Supp. IV). This mirrors the state of the regulatory law before the Cable Act was passed, which permitted the local franchising authorities to regulate many aspects of cable

services, facilities, and equipment but not to impose technical standards governing cable signal quality, since the Commission had explicitly reserved this power to the Federal Government.

19

It is also quite significant that nothing in the Cable Act or its legislative history indicates that Congress explicitly disapproved of the Commission's pre-emption of local technical standards.4 Given the difficulties the Commission had experienced in this area, which had caused it to reverse its ground in 1974 after two years of unhappy experience with the practical consequences of inconsistent technical standards imposed by various localities, we doubt that Congress intended to overturn the Commission's decade-old policy without discussion or even any suggestion that it was doing so. To the contrary, the House Report which discusses this section of the Act portrays it as nothing more than a straightforward endorsement of current law:

20

"Subsection (e) allows the Commission to set technical standards related to facilities and equipment required by a franchising authority pursuant to a franchising agreement. This provision does not affect the authority of a franchising authority to establish standards regarding facilities and equipment in the franchise pursuant to section 624(b) which are not inconsistent with standards established by the FCC under this subsection." H.R.Rep. No. 98-934, p. 70 (1984), U.S.Code Cong. & Admin.News, 1984, pp. 4655, 4707.

21

This passage from the House Report makes clear that the Act was not intended to work any significant change in the law in the respects relevant to this case. By noting that § 624(e) authorizes "the Commission to set technical standards related to facilities and equipment" and that it "does not affect the authority of a franchising authority to establish standards regarding facilities and equipment" that are not inconsistent with Commission standards, the House Report indicates both that Congress did not intend to remove from the Commission its longstanding power to establish pre-emptive technical standards, and that Congress did not intend to "affect the authority of a franchising authority" to set standards in these and similar matters regarding cable facilities and equipment. In particular, Congress did not manifest any intent to "affect the authority" of local franchising authorities by giving them the power to supplement the technical standards set by the Commission with respect to the quality of cable signals, a power which they generally had not been permitted to exercise for the last 10 years and which, according to the Commission's consistent view, disserves the public interest.5 Petitioners insist that under § 624, as evidenced by the passage from the House Report quoted above, a franchising authority may specify any technical standards that do not conflict with Commission standards and hence may set stricter standards for signal quality. But this disregards the Commission's own power to pre-empt, an authority that we do not believe Congress intended to take away in the Cable Act. And it also disregards the Commission's explicit findings, based on considerable experience in this area, that complementary or additional technical standards set by state and local authorities do conflict with the basic objectives of federal policy with respect to cable television—findings that

the Commission first articulated in 1974 and then reiterated in 1986. See 49 F.C.C.2d, at 478-479; 50 Fed.Reg., at 52464-52465.

22

In sum, we find nothing in the Cable Act which leads us to believe that the Commission's decision to pre-empt local technical standards governing the quality of cable signals "is not one that Congress would have sanctioned." *Shimer,* 367 U.S., at 383, 81 S.Ct. at 1560.6 We therefore affirm the judgment of the Court of Appeals.

23

It is so ordered.

1

The "technical standards" established by the Commission describe, in quantitative terms, various electrical characteristics of the audio and video components of the signals delivered by the cable system to its subscribers, including such specific items as visual carrier frequency, aural center frequency, visual signal level, terminal isolation, and radiation and signal leakage. See 47 CFR §§ 76.601, 76.605 (1987).

2

Although the Commission recognized that "[t]he broad pre-emptive policy we are adopting today will ultimately affect all cable systems," 49 F.C.C.2d, at 480, it fashioned this policy to have a more gradual effect. Because "many of the pre-existing technical standards adopted by cities and states cannot be shown to adversely affect our stated goals," the Commission decided to extend a "grandfather" approval to those technical standards that were already operational or certified to the Commission by January 1, 1975. *Ibid.* In addition, a mechanism was established (and remains in effect) that allows state and local authorities to impose "different or additional technical standards" if they obtain a specific waiver from the Commission. *Id.,* at 480-481; see n. 5, *infra.*

3

At argument, petitioners contended that the question of the Commission's statutory authority to regulate these other three classes of cable channels is properly presented to the Court in this case. Tr. of Oral Arg. 5-7, 9-10. We disagree. The Court of Appeals explicitly failed to resolve this question because it agreed "with petitioner's alternative argument that the FCC's . . . rulemaking was arbitrary and capricious." 259 U.S.App.D.C. 191, 197-198, 814 F.2d 720, 726-727 (1987). The Court of Appeals' disposition with respect to these three classes of cable channels was to vacate those portions of the rule and to remand to the Commission for further proceedings. In their brief, moreover, petitioners refer specifically to "a vote of 2-1 [in] the Court of Appeals" in stating the questions presented, which was the disposition below only with respect to the one class of cable channels. Brief for Petitioners i.

4

Petitioners argue that by empowering local franchising authorities to take into account whether "the quality of the operator's service, including signal quality . . . has been reasonable in light of community needs," 47 U.S.C. § 546(c)(1)(B) (1982 ed., Supp. IV), Congress implicitly recognized that local franchising authorities would need a comprehensive set of additional technical standards in order to carry out this task. Yet this argument simply ignores the fact that local authorities are able to assess signal quality against the technical standards set by the Commission, which it has found are adequate to ensure "an acceptable quality of service at the worst subscriber location and thus a better quality of service to the average subscriber." 50 Fed.Reg. 52462, 52463, n. 2 (1985).

5

Petitioners and other state and local authorities remain free, of course, to petition the Commission for an individualized waiver that would permit them to "impose additional or different requirements," which they may seek to obtain by demonstrating that particular local conditions create special problems that make the federal technical standards inadequate. See 47 CFR § 76.7 (1987).

6

Since we conclude that the Commission is authorized under § 624(e) of the Cable Act to pre-empt technical standards imposed by state and local authorities, we need not also consider whether the Commission retains the same broad pre-emptive authority in the area of cable television under §§ 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154(i) and 303, that it had exercised before the Cable Act was enacted in 1984. In adopting the regulations at issue here, the Commission claimed to possess statutory authority under those two sections of the Communications Act as well as under the new Cable Act. 50 Fed.Reg., at 52466. Petitioners claim that the Cable Act withdrew such authority from the Commission, and their claim draws some support from new language in 47 U.S.C. § 152(a) (1982 ed., Supp. IV), which states that "[t]he provisions of [the Communications Act] shall apply with respect to cable service . . . as provided in [the Cable Act]." On the other hand, the House Report suggests that this language is merely a more explicit grant of "exclusive jurisdiction" to the Commission over specified aspects of cable service, see H.R.Rep. No. 98-934, pp. 95-96 (1984), U.S.Code Cong. & Admin.News 1984, pp. 4732, 4733, which settles matters that had occasionally been in dispute. In addition, § 303 of the Communications Act continues to give the Commission broad rulemaking power "as may be necessary to carry out the provisions of this chapter," 47 U.S.C. § 303(r), which includes the body of the Cable Act as one of its subchapters. But since in any event the Commission possesses statutory authority to adopt the regulations at issue in this case under § 624(e) of the Cable Act, we do not decide whether the Commission's actions are authorized on this alternative basis as well.

Utah Gov. OKs eminent domain use on federal land

Posted: Mar 28, 2010 11:35 AM Updated: Mar 28, 2010 12:36 PM
By BROCK VERGAKIS
Associated Press Writer

SALT LAKE CITY (AP) - Fed up with federal ownership of more than half the land in Utah, Republican Gov. Gary Herbert on Saturday authorized the use of eminent domain to take some of the U.S. government's most valuable parcels.

Herbert signed a pair of bills into law that supporters hope will trigger a flood of similar legislation throughout the West, where lawmakers contend that federal ownership restricts economic development in an energy-rich part of the country.

Governments use eminent domain to take private property for public use.

The goal is to spark a U.S. Supreme Court battle that legislators' own attorneys acknowledge has little chance of success.

But Utah Attorney General Mark Shurtleff and other Republicans say the case is still worth fighting, since the state could reap millions of dollars for state schools each year if it wins.

More than 60 percent of Utah is owned by the U.S. government, and policy makers here have long complained that federal ownership hinders their ability to generate tax revenue and adequately fund public schools.

Utah spends less per student than any other state and has the nation's largest class sizes. Under the measure Herbert has approved, the state will set aside $3 million to defend the law.

Lawmakers recently slashed education funding by $10 million and raised taxes on cigarettes by $1 a pack. Democrats have decried the eminent domain measure as a waste of money, and Democratic gubernatorial hopeful Peter Corroon is making it an issue in this year's special election.

But if the law is as bad as Democrats say it is, a court will quickly overturn it and the state won't have to spend much money defending it, Herbert said.

Initially, the state would target three areas for the use of eminent domain, including the Kaiparowits plateau in Grand Staircase-Escalante National Monument, which is home to large coal reserves.

Many people in Utah are still angry that then-President Bill Clinton's designated the area as a national monument in 1996, a move that stopped development on the land and greatly pleased environmentalists as he ran for re-election.

Utah lawmakers contend the federal government should have long ago sold the land it owns in the state. Because it hasn't, the federal government has violated a contract made with Utah when statehood was granted, they say.

Eminent domain would also be used on parcels of land where Interior Secretary Ken Salazar last year scrapped 77 oil and gas leases around national parks and wild areas.

The perversion of the U.S. Constitution

Posted: July 08, 1998
1:00 am Eastern

By Joseph Farah
© 2011 WorldNetDaily.com

"Stroke of the pen. Law of the land. Kinda cool."
--Clinton presidential aide Paul Begala, July 1998

"All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives."
--Article 1, U.S. Constitution, 1789

The greatest fear of the Founding Fathers was the establishment of a strong central government and an ambitious, power-hungry political leader at the center of that government. They had had their fill of kings and dictators. They believed the best assurance against centralized authority was a loose association of sovereign states, which maintained most governmental power at the local level.

President Clinton's glib announcement that he will issue a barrage of executive orders to further his legislative agenda while bypassing Congress is the ultimate fulfillment of those fears. More chilling yet is the timing of the ominous announcement. It comes less than two months after Clinton issued, while on foreign soil, Executive Order 13083, which annihilates the principles of federalism that have guided the nation for the last 200 years.

The 10th Amendment states: "The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people." Under EO 13083, Clinton has effectively tacked on to that clear, forthright, inspired, unambiguous statement a list of exceptions. He has done it single-handedly, with the stroke of a pen. And, no Mr. Begala, there is nothing cool about totalitarianism.

Say what you will about him, Bill Clinton is a bright and educated man. His actions and his words are carefully considered. He knows what he is doing. That's what makes this trend so frightening. Where does he want to take the nation? How far from its founding principles are we to stray? Is America about to transform itself from a nation governed by laws to a nation ruled by men?

How far we've come from the days of statesmen like James Madison, who believed "That all power is originally vested in, and consequently derived from, the people. That government is instituted and ought to be exercised for the benefit of the people; which consists in the enjoyment of life and liberty and the right of acquiring property, and generally of pursuing and obtaining happiness and safety. That the people have an indubitable, unalienable, and indefeasible right to reform or change their government whenever it be found adverse or inadequate to the purpose of its institution."

Note that Madison said "the people" -- not the government -- have a right to change their government. Bill Clinton has taken on this mission as his own God-given responsibility. He is acting like a strongman, an ayatollah, a czar, a potentate, a Fuhrer.

Even before Clinton abused his office so egregiously, the United States was in grave danger of concentrating too much power in Washington and too much power in the Oval Office. Clinton, ever the opportunist, has taken full advantage of Americans' ignorance of their constitutional heritage and usurped much of the remaining congressional legislative authority.

Potentially, the worst abuse of all is the executive order. For 30 years, Americans have lived under the shadow of executive orders that could -- as Mr. Begala inelegantly stated it -- with "the stroke of a pen," turn America into just another fascist dictatorship. Fortunately, America has been blessed with leaders -- some good, some bad -- who have restrained themselves from signing away our freedoms.

Without congressional approval, the president has the power to relocate whole populations of Americans, the power to shut down the free press, to force a national registration of all people. There doesn't need to be a war to justify such an action -- just a crisis, be it domestic or foreign, violent or merely economic.

I count at least a dozen executive orders, today standing as the law of the land, which would suspend the Constitution and the Bill of Rights in their entirety with such a stroke of the pen. Such power should not be in the hands of any one man -- particularly one as ambitious, driven and morally contemptible as Bill Clinton.

Oh, what a delicate thread from which our liberty is suspended.

HOUSE RESOLUTION NO. 9

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY REPRESENTATIVES KELLY, Johnson, Keller, Harris, Gatto, Johansen, Dahlstrom, Wilson

Introduced: 2/25/09
Referred: Rules

A RESOLUTION

Relating to sovereign powers of the state.

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS the Tenth Amendment to the Constitution of the United States reads, "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people"; and

WHEREAS the Tenth Amendment defines the total scope of federal power as being that specifically granted by the Constitution of the United States and no more; and

WHEREAS the scope of power defined by the Tenth Amendment means that the federal government was created by the states specifically to be an agent of the states; and

WHEREAS some federal actions weaken states' rights protected by the Tenth Amendment to the Constitution of the United States; and

WHEREAS the Tenth Amendment assures that we, the people of the United States of America and each sovereign state in the Union of States, now have, and have always had, rights the federal government may not usurp; and

WHEREAS art. IV, sec. 4, Constitution of the United States, reads, "The United States shall guarantee to every State in this Union a Republican Form of Government," and

the Ninth Amendment to the Constitution of the United States reads, "The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people"; and

WHEREAS the United States Supreme Court has ruled in New York v. United States, 112 S.Ct. 2408 (1992), that the United States Congress may not simply commandeer the legislative and regulatory processes of the states; and

WHEREAS all states, including Alaska, find themselves regularly facing proposals from the United States Congress that weaken states' rights protected by the Tenth Amendment;

BE IT RESOLVED that the House of Representatives hereby claims sovereignty for the state under the Tenth Amendment to the Constitution of the United States over all powers not otherwise enumerated and granted to the federal government by the Constitution of the United States; and be it

FURTHER RESOLVED that this resolution serves as Notice and Demand to the federal government, as our agent, to cease and desist, effective immediately, mandates that are beyond the scope of these constitutionally delegated powers; and be it

FURTHER RESOLVED that all compulsory federal legislation that directs states to comply under threat of civil or criminal penalties or sanctions or requires states to pass legislation or lose federal funding be prohibited or repealed.

COPIES of this resolution shall be sent to the Honorable Barack Obama, President of the United States; the Honorable Joseph R. Biden, Jr., Vice-President of the United States and President of the U.S. Senate; the Honorable Nancy Pelosi, Speaker of the U.S. House of Representatives; the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress; and all other members of the 111th United States Congress.

Null. Void. Of No Effect.

Michael Boldin Tenth Amendment Center
January 21, 2011

When Washington D.C. violates the constitution – as it does every single day – the essential question is –"what do we do about it?"

For countless decades, Americans have been responding through protests, lawsuits, and "voting the bums out." Yet, year in and year out, federal power always grows. And it doesn't matter which political party is in power, or what person occupies the white house either.

THE RIGHTFUL REMEDY
In 1798, Thomas Jefferson wrote that

"whensoever the general government assumes undelegated powers….a nullification of the act is the rightful remedy."[emphasis added]

Notice that TJ didn't advise us to use nullification as a remedy "once in a while." And he certainly didn't tell us that a nullification is the rightful remedy after "we vote some bums out" or "we sue the federal government in federal court" or after anything else for that matter. Jefferson was pretty straightforward and recommended that every single time the federal government exercises powers not delegated to it in the constitution (there's about 30 powers and nothing more), that we're to reject and nullify those acts on a state level as they happen.

HAPPENING NOW
Already, more than two dozen states have virtually stopped the 2005 Real ID act dead in its tracks. How? By refusing to implement it. Fifteen states – most recently Arizona – are using the principles of the 10th Amendment to actively defy federal laws (and a supreme court ruling, too!) on marijuana. Eight states have passed Firearms Freedom Acts in an attempt to reject some federal gun laws and regulations. And seven states have passed Health Care Freedom Acts to block health care mandates from being enforced.

NULL. VOID. OF NO EFFECT.
Get used to reading these words, because the political climate is starting to swing a new direction. There is a growing number of people in America that are recognizing a simple truth – Asking, demanding, or suing to get the federal government to fix problems caused by the federal government just doesn't work.

Take, for example, the Federal Health Care Nullification Act, first introduced in Texas as HB297, and now also introduced in Montana (SB161), Wyoming (HB0035), Oregon (SB498) and Maine (LD58). Here's an excerpt:

"the federal law known as the "Patient Protection and Affordable Care Act," signed by President Barack Obama on March 23, 2010, is not authorized by the Constitution of the United States and

violates its true meaning and intent as given by the Founders and Ratifiers, and is hereby declared to be invalid, shall not be recognized, is specifically rejected, and shall be considered null and void and of no effect."

But these bills, as introduced in Texas, Maine, Montana, Oregon, and Wyoming are far more than mere declarations or position statements

ENFORCEMENT

Implied in any nullification legislation is enforcement of the state law. In the Virginia Resolution of 1798, James Madison wrote of the principle of interposition:
That this Assembly doth explicitly and peremptorily declare, that it views the powers of the federal government, as resulting from the compact, to which the states are parties; as limited by the plain sense and intention of the instrument constituting the compact; as no further valid that they are authorized by the grants enumerated in that compact; and that in case of a deliberate, palpable, and dangerous exercise of other powers, not granted by the said compact, the states who are parties thereto, have the right, and are in duty bound, to interpose for arresting the progress of the evil, and for maintaining within their respective limits, the authorities, rights and liberties appertaining to them.

In his famous speech during the war of 1812, Daniel Webster said:

"The operation of measures thus unconstitutional and illegal ought to be prevented by a resort to other measures which are both constitutional and legal. It will be the solemn duty of the State governments to protect their own authority over their own militia, and to interpose between their citizens and arbitrary power. These are among the objects for which the State governments exist"

Here Madison and Webster assert what is required of nullification laws to be successful – that state governments not only have the right to resist unconstitutional federal acts, but that, in order to protect liberty, they are "duty bound to interpose" or stand between the federal government and the people of the state.

All five bills explicitly include this principle, and if passed, would impose penalties on federal agents for attempting to enforce National Health Care mandates in their state. For example, from Wyoming's HB35:

Any official, agent, employee or public servant of the state of Wyoming as defined in W.S. 6-5-101, who enforces or attempts to enforce an act, order, law, statute, rule or regulation of the government of the United States in violation of this article shall be guilty of a felony punishable by a fine of not more than five thousand dollars ($5,000.00), imprisonment in the county jail for not more than two (2) years, or both.

Sources close to the Tenth Amendment Center tell us to expect approximately ten states to introduce such bills in the 2011 legislative session.

Sponsor Statement

CS House Bill 18

"An Act establishing Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year."

House Bill 18 establishes Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year. This recognition would commemorate the state's public gardens and the role gardens play in promoting environmental stewardship, education, plant conservation, recreation and research.

Alaska has three American Public Garden Association member gardens: the Alaska Botanical Garden in Anchorage; the University of Alaska Fairbanks Georgeson Botanical Garden in Fairbanks; and the Jenson-Olson Arboretum in Juneau. Each plays an important role in their community and in helping to preserve northern latitude plants.

Our gardens serve the public in many ways. They are tourism designations and have vast local recreation value. They also serve as important practical educational facilities for children and adults to learn about gardening, ecology, and science as well as partnering with other organizations to provide school-based education programs, public health education programs and community and school gardens. They provide workforce training sites for youth and adults in transition and work on habitat restoration. In addition, they provide information on the how to choose regionally appropriate plants that are native to the area for landscaping purposes.

These public gardens have a measurable impact on the quality of life in our communities and it is important to set aside a day each year to celebrate their role in keeping Alaskans and visitors connected to our natural world.

Thank you for your support of House Bill 18.

February 15, 2011

Honorable Beth Kerttula
Alaska State Representative
State Capitol, Room 404
Juneau, AK 99801

Re: Support of Alaska HB 18

Dear Representative Kerttula:

I am writing to encourage your full support of Alaska HB 18, "An Act establishing Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year". At last year's Alaska Public Gardens Day celebration approximately 600 Juneau citizens and visitors attended, affirming increasing popular support for Juneau's public garden. We would like to make Alaska Public Gardens Day an annual event.

Nationally, the United States celebrates Public Gardens Day in early May and several states and cities in the lower 48 have, through formal legislative action, recognized the day in their own context. This is a day set aside by the American Public Gardens Association (APGA) to promote awareness of public gardens and their value to local communities.

Alaska enjoys the benefits of three APGA-member gardens as well as several unaffiliated gardens. The Alaska Botanical Garden in Anchorage, the University of Alaska Fairbanks Georgeson Botanical Garden in Fairbanks, and the Jensen-Olson Arboretum in Juneau are special places that provide opportunities for education, plant conservation, recreation, and research. The Alaskan gardening season doesn't correspond with the lower 48, so the late May date is an appropriate choice for our climate.

Public gardens have a measurable impact on the quality of life in a community and in Alaska, this is magnified. While Alaska boasts unparalleled scenic vistas, there are few opportunities for wandering in a cultivated garden setting. Throughout history, public garden settings have provided teaching space as well as space for contemplation and respite. And, public gardens help define a community's sense of longevity as well as its culture.

Thank you for your support of HB 18 and your continued support of Parks & Recreation and the Jensen-Olson Arboretum.

Sincerely,

Bruce Botelho
Mayor

Rep. Beth Kerttula
State Capitol Room 404
Juneau, AK 99801

Jan. 10, 2011

Re HB 18

Dear Representative Kerttula;

Alaska's gardens bring visitors from around the world to see their bounty — whether native Alpine species, exotics coaxed and pampered to survive in this climate, or hearty vegetables. But sometimes, we fail to appreciate what is in our own backyards.

The proposed HB 18 Alaska Public Gardens Day, the Saturday before Memorial Day each year, will draw attention to efforts in local communities to beautify and to nourish through gardening. Gardens, like those here in Palmer at the Palmer Visitor Center and the Alaska State Fairgrounds, give visitors a chance to see many of the plant species that will grow here in Alaska. And at the Alaska Plant Materials Center, the new Alaska garden there tells stories of history, culture, sustainability and variety.

These gardens, and others around the state, deserve the spotlight shone upon them on their own special day, and I urge you to help designate the last Saturday in May as that day.

While, as my experience with Alaska Agriculture Day has shone, it can take some time to raise awareness using a special day, it can be the catalyst for a range of activities and media coverage. For those of us who operate programs with a very limited budget, it is one more tool in the educational arsenal. I urge you to support the efforts of Alaska Botanical Garden, the Georgeson Botanical Gardens and others to make this a reality.

Thank you for supporting any efforts that help students understand the sources of their food, fabric and flowers, and my thanks for your ongoing interest and support of Alaska Agriculture in the Classroom.

Sincerely,

Victoria Naegele

EXECUTIVE DIRECTOR

Julianne McGuinness

Dear Representative Kerttula: January 11, 2011

I am to support, and thank you for sponsoring, House Bill No. 18, "An Act establishing Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year".

As the Executive Director of the Alaska Botanical Garden, each day I witness the tremendous educational, recreational, and inspirational value the public gardens of our State have for our communities and visitors alike. They are important cultural / scientific institutions as well as true community treasures.

Our Gardens serve the public on many levels: as tourism destinations, as important educational facilities for children and adults to learn about gardening, ecology, and science, as workforce-training sites for youth and adults in transition, and as places where families and school groups "get outdoors" for wellness-enhancing exercise. (In fact, gardening is one of the top national and Alaskan pass-times, and garden tourism is one of the fastest-growing segments of the tourism industry.)

Alaska has three APGA-member gardens, and many unaffiliated gardens also open to the public. The Alaska Botanical Garden in Anchorage, the University of Alaska Fairbanks Georgeson Botanical Garden in Fairbanks, and the Jensen-Olson Arboretum in Juneau are special places that provide opportunities for education, plant conservation, recreation, and research. They have an increasingly vital role to play in northern-latitude plant preservation. These public gardens have a measurable impact on the quality of life in our communities and in Alaska.

The United States celebrates National Public Gardens Day in early May, and the American Public Gardens Association (APGA) actively uses this special day to promote awareness of public gardens and their value to local communities. However, since the Alaskan gardening season doesn't correspond with rest of the nation, a later date in May is a more appropriate choice for our climate.

I respectfully request that the legislature pass this bill as a means to proclaim the vital role public gardens play in a sustainable and healthy Alaska.

Sincerely,

Julianne McGuinness

Julianne McGuinness

Dear Representative Kerttula:

I am writing to give my full support to House Bill No. 18, "An Act establishing Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year".

The Alaska Botanical Garden in Anchorage is my place of employment so I have a year round appreciation for its importance to the community. The Garden is utilized by children, families, and individuals as a place to relax in nature, do research, preserve plant material and educate. As a small non-profit with a fixed budget, we are unable to reach out to as many people and organizations as we would like. By allowing Alaska to have its own specific Public Gardens Day, we could greatly increase our reach, especially since we would offer it as a FREE day so all could partake. We are experiencing an ever growing demand for outdoor education and this would be a great opportunity to provide! We have hundreds of volunteers that keep the garden growing. Why not share this amazing resource with the entire community?

Nationally, the United States celebrates Public Gardens Day in early May and several states and cities in the lower 48 have, through formal legislative action, recognized the day in their own context. This is a day set aside by the American Public Gardens Association (APGA) to promote awareness of public gardens and their value to local communities.

Alaska enjoys the benefits of three APGA-member gardens as well as several unaffiliated gardens. The Alaska Botanical Garden in Anchorage, the University of Alaska Fairbanks Georgeson Botanical Garden in Fairbanks, and the Jensen-Olson Arboretum in Juneau are special places that provide opportunities for education, plant conservation, recreation, and research. The Alaskan gardening season doesn't correspond with the lower 48, so the late May date is an appropriate choice for our climate.

Public gardens have a measurable impact on the quality of life in a community and in Alaska, this is magnified. While Alaska boasts unparalleled scenic vistas, there are few opportunities for wandering in a cultivated garden setting. Throughout history, public garden settings have provided teaching space as well as space for contemplation and respite. And, public gardens help define a community's sense of longevity as well as its culture.

Please vote for this bill and in so doing, proclaim the vital role public gardens play in a sustainable and healthy Alaska.

Subject: letter of support

Dear Representative Kerttula:

I am writing to give my full support to House Bill No. 18, An Act establishing Alaska Public Gardens Day on the Saturday immediately preceding Memorial Day each year.

I am the president of the Georgeson Botanical Garden Society, an organization formed to promote and support the Georgeson Botanical Garden at UAF. This garden, besides being a beautiful place to visit, provides valuable research essential to the growth of home gardens and the gardening industry.

Alaska is unique and has special needs. Gardening is a challenge in the north but the industry is growing and your support is necessary. "Sustainability" and "locavore" are buzz words used in today's media. Alaska's public gardens make these words a reality. Alaska's public gardens provide opportunities for education, plant conservation, recreation, and most important research.

Public gardens have an impact of the quality of life in the far north. After months of snow and a white landscape, a colorful flower gardens helps give us respite and peace of mind. Tourists are always amazed at the color, the beautiful flowers and the variety of vegetables grown in our gardens. Here in Fairbanks we can actually sit peacefully and watch the plants grow. The community values this special place.

Please vote for this bill and in so doing, proclaim the vital role public gardens play in a sustainable and healthy Alaska.

Sincerely,

Donna Dinsmore

National Public Gardens Day is an annual celebration of the nation's public gardens to raise awareness of the important role botanical gardens and arboreta play in promoting environmental stewardship, plant and water conservation, green spaces, and education in communities nationwide.

May 6, 2011, National Public Gardens Day is a national day of celebration to raise awareness of America's public gardens and their important role in promoting environmental stewardship and awareness, plant and water conservation, and education in communities nationwide.

The Mission

Presented by the non-profit American Public Garden's Association (APGA) in partnership with Rain Bird, both are committed to celebrating the environmental stewardship of North America's public gardens and their local, regional and national leadership in resourcing the nation's conservation and environmental education needs.

Activities

National Public Gardens Day celebrates all public gardens, botanical gardens, educational gardens, specialty gardens, entertainment gardens, arboreta, farm gardens, historical landscapes, and zoos and each institution participates in their own unique way.

Many of the nation's public gardens will mark the day with special events and activities for schools, families and thousands of visitors to explore and discover their local public garden, while learning about each garden's commitment to education, research and environmental stewardship.

Timing

National Public Gardens Day takes place annually on the Friday before Mother's Day, an unofficial start of spring and a time when the environment is top of mind for most of the public.

Benefit

Public gardens are a fun activity for families, couples, and enthusiasts, providing a low-cost, entertaining, and beautiful community outing while providing important resources, education and research on environmental stewardship and conservation.

Third Annual National Public Gardens Day To Celebrate The Importance Of America's Public Gardens, May 6, 2011

Posted on January 28, 2011 by National Public Gardens Day

American Public Gardens Association Partners With Rain Bird To Pay Tribute To The Important Role of Public Gardens In Promoting Environmental Stewardship, Education, Plant And Water Conservation In Communities Nationwide

AZUSA, CA (February 1, 2011) – Scheduled for May 6th, 2011, the Friday preceding Mother's Day weekend, **National Public Gardens Day** is a national day of awareness in which communities nationwide are invited to visit and learn about the important role their public gardens play in promoting environmental stewardship and awareness, plant and water conservation, and education. Now in its third year celebrating America's public gardens, National Public Gardens Day was created in partnership between the American Public Gardens Association (APGA) and irrigation product and service provider, Rain Bird. The 2011 National Public Gardens Day will showcase the contributions of public gardens with special events at many of the more than 500 North American public gardens.

"National Public Gardens Day is not only a great time for families and enthusiasts to enjoy the gardens, but the public also witnesses the achievements and expertise provided by public gardens, especially in the area of environmental stewardship," said Dan Stark, executive director of the APGA. "Regardless of their size, all public gardens share a common commitment to providing outreach programs aimed at engaging their communities and educating future generations on the irreplaceable value of plants."

National Public Gardens Day will be supported by a local, regional and national awareness and education campaign that includes broadcast public service announcements, media partnerships, local and national spokespeople, online contests, and media tours all focused on communicating the importance of building sustainable environments through improved plant management and water conservation.

"As the event's founding partner, Rain Bird seeks to create awareness of the role that public gardens play in promoting plant and water conservation in their communities," said Dave Johnson, Rain Bird's director of corporate marketing. "Our support of National Public Garden's Day goes hand in hand with our company's Intelligent Use of Water philosophy. We encourage the public to recognize that gardens are not just beautiful places and great sources of inspiration, but they are demonstrations of how green spaces can entertain, educate and inspire us all while positively contributing to the surrounding eco-system."

In celebration of botanical gardens, arboreta, conservatories, educational gardens and historical landscapes, many of the APGA's 500 member institutions will mark the day with special events and activities for schools, families and thousands of visitors. Many of the activities will continue through Mother's Day weekend, offering visitors time to enjoy the beauty of the gardens while learning about each garden's commitment to education, research and environmental stewardship.

For more information on National Public Gardens Day, visit www.NationalPublicGardensDay.org, "LIKE" the National Public Gardens Day **Facebook** page and follow the National Public Gardens Day Twitter feed, **@NPGD.**

ABOUT RAIN BIRD

Based in Azusa, Calif., Rain Bird Corporation is the leading manufacturer and provider of irrigation products and services. Since its beginnings in 1933, Rain Bird has offered the industry's broadest range of irrigation products for farms, **golf** courses, sports arenas, commercial developments and homes in more than 130 countries around the world. Rain Bird has been awarded more than 130 patents, including the first in 1935 for the impact **sprinkler**. Rain Bird and ***The Intelligent Use of Water*** is about using water wisely. Its commitment extends beyond products to education, training and services for the industry and the community. Rain Bird maintains state-of-the-art manufacturing assembly facilities in the United States, France, Sweden and Mexico. www.rainbird.com

ABOUT APGA

Founded in 1940, Pennsylvania-based American Public Gardens Association is an organization devoted to strengthening the public gardens throughout North America. With over 70 years of work increasing cooperation and awareness among the gardens, APGA has built a membership of more than 500 public gardens located in all 50 states, the District of Columbia, Canada and seven other countries. Their members include public gardens as well as arboreta and zoos. APGA has also built up an international network of individual members in the U.S., Canada and 24 other countries. The APGA is committed to increasing public awareness for public gardens and supplying resources to the industry. Through their leadership and advocacy, public gardens have become vital to public appreciation and understanding of the irreplaceable value of plants. www.publicgardens.org

Senator Durbin on the Senate Floor

Posted on December 21, 2010 by National Public Gardens Day

On Senate Record, May 6, 2010:

RECOGNIZING NATIONAL PUBLIC GARDENS DAY

Mr. DURBIN. Mr. President, this May 7 is National Public Gardens Day, a day for us to celebrate the important role public gardens play in our communities and throughout our Nation. Across this great country, more than 500 public gardens are keeping our Nation connected to our natural world, our history, and our culture. These public gardens include arboreta, botanical gardens, zoos, historic landscapes, college campuses, and children's gardens.

Together they form a web that preserves the beauty and complexity of plants and animals and humanity's interaction with them. There is a great thirst for the knowledge and experiences public gardens can provide. Gardening is the most popular hobby in the United States, and more than 70 million people visit public gardens annually. People from all backgrounds, age groups, and geographic regions regularly share in the beauty and serenity of natural spaces such as our public gardens.

Here in Washington, DC, just across the street from the Capitol, is the U.S. Botanic Garden. Called "America's Garden," it is a gateway for people to enjoy the beauty of plants while learning about the role plants play in commerce, culture, and kinship. The United States Botanic Garden is also responsible for helping to preserve and maintain the Capitol Grounds, which are enjoyed by over 3 million people who visit the Capitol every year.

In my own home State of Illinois, our 32 public gardens include wonderful and varied institutions, such as the Morton Arboretum and the Quad City Botanical Center, places such as the Cantigny Foundation and the Skokie Northshore Sculpture Park. Among Illinois' valued public gardens is the Chicago Botanic Garden, which serves nearly 1 million visitors annually.

Its classes are attended by 57,000 visitors, well over half of them schoolage children. Millions of schoolchildren have been educated by public gardens about the wonders of nature and the important role of plants in our everyday lives, from the food we eat, to the clothes we wear, to the homes we live in. The Chicago Botanic Garden has hosted 22,000 children on field trips in the past year, providing opportunities for them to interact with nature—a special opportunity for some who may never otherwise get to see a real meadow or visit a lake.

Public gardens are not only committed to growing plants; they are committed to growing minds. As a result, public gardens everywhere are partnering extensively with local schools, colleges and universities, nonprofit organizations, and civic associations.

Together they have worked on projects ranging from habitat restoration to landscape beautification, as well as on school-based education programs, public health education programs, and community and school gardens.

The Chicago Botanic Garden is a wonderful example of the partnerships occurring between our public gardens and our colleges. Its Windy City Harvest program partners with City Colleges of Chicago to provide summer jobs and hands-on training for teenagers at sustainable agriculture sites within Chicago. Through this partnership, participants

are trained in producing high-value organic produce, which is sold at retail outlets and is made available to local residents. Program participants not only gain important entrepreneurial skills, they learn where their food comes from and the value in nurturing plant life.

We can rely on public gardens to deliver timely and critical resources for plant and water conservation, ecosystem management, green space preservation, and environmental stewardship.

Visitors to public gardens have the opportunity to view regionally appropriate landscapes that preserve our precious natural resources—and give them ideas for creating their own. Public gardens also serve as repositories for rare and endangered plant species. The research conducted by public gardens on these endangered plant species can be crucial to their survival.

Through their conservation and propagation efforts, many plants that would have been lost to us forever through extinction have been saved.

Therefore, this May 7 we should celebrate our public gardens and the many contributions they make to our communities.

What Can I Learn From A Public Garden?

Denver Botanic Gardens

Water Conservation

Public gardens utilize efficient watering practices and have industry insight on responsible irrigation systems. Homeowners can learn how to irrigate their own gardens by exploring and consulting with their local public garden.

Native and Adaptable Plants

Choosing native plants or plants that have adapted to a local environment can ensure a garden will be healthy and require less water. Public gardens have huge collections of native and adaptable plants that homeowners can be assured will work in their own gardens.

Landscape Design

Homeowners can find sources of inspiration in botanic gardens from the design of gardens, the types of plants used in particular environments, the selection of plants that do well in particular geographical locations, and the way gardens are displayed, coordinated, and arranged. Landscaping at public gardens can demonstrate what plants bloom at similar times, what arrangements look well together, and how gardens can be beautifully displayed.

Geographical Considerations

Different plants are healthier in different geographical regions and it is difficult to know before purchasing at a nursery, what plants will do well in a homeowner's garden. Public gardens put on display a broad selection of plants that succeed in a homeowner's region. Knowing that a plant, tree, or flower grows well in a public garden can assist consumers on knowing what will grow well in their own gardens.

Seasonal Considerations

Public gardens have a selection of plants that are perfect for a variety of seasons. Many plants can still thrive in colder and drier seasons. Additionally, blooms can happen year round if the appropriate types of plants or trees are selected. Keeping a homeowner's garden beautiful all year can be accomplished by seeing how public gardens arrange their own collection.

Gardening Methods

Descanso Gardens

Public gardens have staff dedicated to botany and are also home to specialists that understand a particular geographical region very well. Homeowners can access these industry experts at their local public garden and receive advise on gardening techniques for plants they have in their own gardens.

Publications

Public gardens have publications available to visitors and members that provide ample resources on gardening and botany. The average consumer can find a wealth of knowledge in member publications and, in addition, often have access to libraries and bookstores within the public gardens as well.

Plants and Supplies

Public gardens will often sell plants, flowers and trees to garden members during annual festivals, providing top quality additions to homeowner's gardens. With the sale comes professional experience and advice of the sort that cannot be found in nurseries or hardware stores.

The Office of The Mayor
City & Borough of Juneau, Alaska

PROCLAMATION

WHEREAS, the Jensen-Olson Arboretum, is holding a celebration in honor of the inspiration and beauty public gardens bring to every community; and

WHEREAS, May 29, 2010 will be a day of celebration to raise awareness of public gardens and the role they play in promoting environmental stewardship, education, plant conservation, recreation, and research; and

WHEREAS, public gardens are special places that both teach and inspire life-long learning in the natural sciences for thousands of visitors and also preserve the beauty of the landscape for pure aesthetic enjoyment; and

WHEREAS, gardening promotes a healthy lifestyle that lasts a lifetime, helps reduce stress, and teaches that bountiful rewards come from diligent efforts.

NOW, THEREFORE, I, Bruce Botelho, Mayor of the City and Borough of Juneau, Alaska, on behalf of the City and Borough Assembly, do hereby proclaim Saturday, May 29, 2010, as:

Public Gardens Day in Juneau

and call upon the citizens of Juneau to promote stewardship of our bountiful plant and garden resources.

IN WITNESS WHEREOF, I have hereto set my hand and caused the seal of the City and Borough of Juneau, Alaska, to be affixed this 29th day of May, 2010.

JUNEAU - ALASKA'S CAPITAL
THE UNIFIED GOVERNMENT OF ALASKA

Bruce Botelho, Mayor

STATE OF ALASKA

Executive Proclamation
by
Governor Sean Parnell

WHEREAS, Alaska's public gardens teach and inspire interest in the natural sciences, appreciation for the bounty of the earth, and are a place of beauty for the thousands of visitors each year; and

WHEREAS, public gardens promote environmental stewardship, education, outdoor recreation, and research in plant conservation; and

WHEREAS, the exquisite beauty of Alaska's public gardens is the result of the efforts of dedicated caretakers who maintain and care for our gardens, and whose efforts create beautiful public spaces for the enjoyment of all; and

WHEREAS, public gardens provide a unique insight into the cultural and historical significance of Alaska's indigenous plants, serving as a reminder of the landscape that surrounded and sustained our ancestors, and a valuable education tool; and

WHEREAS, by fostering a love of nature in younger generations, we encourage them to grow into responsible, aware citizens; and

WHEREAS, public gardens are an invaluable place of learning, and should be appreciated for their educational value and the beauty they bring to our great state.

NOW, THEREFORE, I, Sean Parnell, Governor of the State of Alaska, do hereby proclaim May 29, 2010 as:

Alaska Public Gardens Day

in Alaska, and encourage citizens to visit the public gardens in their communities, and enjoy the educational and recreational opportunities they offer.

Dated: May 28, 2010

Sean Parnell

Sean Parnell, Governor
who has also authorized the
seal of the State of Alaska to
be affixed to this proclamation.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES LYNN, KELLER, AND GATTO, Peggy Wilson, Johnson, Stoltze

A BILL

FOR AN ACT ENTITLED

"An Act relating to special request registration plates; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.10.181 is amended by adding new subsections to read:

(bb) Special request United States flag "In God We Trust" plates. Upon application by the owner of a motor vehicle, the department may issue registration plates with a design incorporating the flag of the United States and the motto "In God We Trust" on the plate. The commissioner shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(cc) Special request Lao veteran plates. Upon application by the owner of a motor vehicle, the department may issue registration plates commemorating the owner's service in military operations in support of the United States in the Kingdom of Laos between February 28, 1961, and May 15, 1975. The commissioner shall

determine the design and color of the Lao veteran plates in consultation with veterans' and Southeast Asian community organizations in the state. To be issued a registration plate under this subsection, the owner must present evidence satisfactory to the department that the owner served in military operations as required by this subsection. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplicate of an existing registration.

(dd) Special request plates commemorating the National Rifle Association. Upon application by the owner of a motor vehicle, the department may issue registration plates commemorating the National Rifle Association. The commissioner, after consulting with representatives of the National Rifle Association in Alaska, shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(ee) Special request breast cancer awareness plates. Upon application by the owner of a motor vehicle, the department may issue breast cancer awareness registration plates. The commissioner, after consulting with the Alaska office of the American Cancer Society, shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(ff) Special request specialty organization plates. The department shall adopt regulations to allow for the issuance of special request specialty organization registration plates sponsored by an organization that is based in this state and is tax exempt under 26 U.S.C. 501(c), is an Alaska chapter of a national organization that is tax exempt under 26 U.S.C. 501(c), is a department of the state, or is a municipality of the state. The department shall determine a common design and color for the plates and provide for the placement of the artwork of the organization and a short piece of descriptive text on the plate. The department may disapprove the issuance of registration plates under this subsection when the requested plates duplicate an existing registration. The regulations

(1) must provide that the entity requesting the issuance of the plates

(A) submit an application on a form provided by the

department;

(B) pay an application fee set by the department for issuance of the new registration plates;

(C) submit registration fees for at least 50 motor vehicles before specialty registration plates will be issued;

(D) may not be offensive in purpose, nature, activity, or name;

(E) may charge a fee for issuance of a specialty registration plate in addition to any registration fees set by statute or regulation;

(2) must provide for a minimum number of registrations and renewals of the specialty plate and for cancellation of specialty plates that do not meet that minimum; the regulations must provide that before a specialty plate may be cancelled the entity sponsoring the plate be given notice at least six months before the proposed cancellation;

(3) must establish procedures for owners of vehicles to purchase specialty registration plates under this subsection.

*** Sec. 2.** AS 28.10.421(d)(2) is amended to read:

(2) special request plates for

(A) Alaska National Guard personnel $30;

(B) veterans, [OR] retired veterans**, or Lao veterans** $30;

(C) recipients of the Purple Heart ..... none;

(D) owners of custom collector vehicles $50;

(E) Iditarod race finishers $50;

(F) other special request plates $30;

plus the fee required for that vehicle under (b) of this section; the fee required by this paragraph shall be collected only on the first issuance and on the replacement of special request plates;

*** Sec. 3.** AS 28.10.421(d) is amended by adding new paragraphs to read:

(20) special request United States flag "In God We Trust" plates.. $30

plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected biennially in the same manner as the fee required under (b), (c), (h), or (i) of this section;

(21) special request National Rifle Association plates ..... $50 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the $50 fee required by this paragraph shall be collected only on the first issuance and the replacement of the special request plates; a $30 fee shall be collected biennially thereafter in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner shall separately account for the fees received under this paragraph that the department deposits into the general fund; notwithstanding (g) of this section, the annual estimated balance in the account that is in excess of the cost of issuing special request plates may be appropriated by the legislature to establish and maintain a scholastic clay target program and for other youth shooting programs;

(22) special request breast cancer awareness plates..... $50 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the $50 fee required by this paragraph shall be collected only on the first issuance and the replacement of the special request plates; the commissioner shall separately account for the fees received under this paragraph that the department deposits into the general fund; notwithstanding (g) of this section, the annual estimated balance in the account that is in excess of the cost of issuing special request plates may be appropriated by the legislature to programs that provide screening for breast and cervical cancer;

(23) special request specialty organization plates under AS 28.10.181(ff) ..... $30 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the $30 fee required by this paragraph shall be collected only on the first issuance of and the replacement of the plates; in addition, an entity sponsoring a special request specialty organization plate may charge a fee on first issuance and renewal of the plates.

Sponsor Statement
HB 19
"An Act relating to special request registration plates;"

HB 19 authorizes the Department of Administration-Division of Motor Vehicles to create a special request license plate incorporating the American flag and the phrase "In God We Trust." The specific design is left to DMV's discretion. These special request plates would cost $30 plus the normal fees required to register the vehicle in question. The Act would take effect on January 1, 2012.

Re: Court Opinions on use of "In God We Trust" in Government Documentation

---

"There is an unbroken history of official acknowledgment by all three branches of government of the role of religion in American life from at least 1789."

-Chief Justice Warren Burger, *Lynch v. Donnelly, 465 U.S. 668 (1984)*

"...government declaration of Thanksgiving as a public holiday, **printing of 'In God We Trust' on coins**, and opening court sessions with 'God save the United States and this honorable court.' Those government acknowledgments of religion serve... the legitimate secular purposes of solemnizing public occasions, expressing confidence in the future, and encouraging the recognition of what is worthy of appreciation in society. For that reason, and because of their history and ubiquity, **those practices are not understood as conveying government approval of particular religious beliefs.**"

-Justice Sandra Day O'Connor, *Lynch v. Donnelly, 465 U.S. 668 (concurring)* [emphasis added]

"The government violates [the Establishment Clause] if it **endorses or disapproves** of religion."

-Justice Sandra Day O'Connor, *County of Allegheny v. ACLU, 492 U.S. 573* [emphasis added]

"['In God We Trust'] symbolizes the historical role of religion in our society...formalizes our medium of exchange...fosters patriotism...and expresses confidence in the future.

The motto's primary effect is not to advance religion; instead, it is a form of 'ceremonial deism' which through historical usage and ubiquity cannot be reasonably understood to convey government approval of religious belief...We conclude, therefore, that the statutes establishing 'In God We Trust' as our national motto and providing for its reproduction on United States currency do not violate the Establishment Clause."

-Senior Circuit Judge Deanell Reece Tacha, *Gaylor v. United States, 74 F.3d 214, U.S. Circuit Court of Appeals for the Tenth Circuit*

These opinions highlight the federal courts' history of upholding the constitutionality of our national motto. While none of these cases relates directly to the use of "In God We Trust" on license plates, it seems implausible that the courts would apply a stricter constitutional standard to license plates than to the currency. Citizens wishing to participate in our economy have no choice but to utilize the national currency, but drivers would only receive this license plate if they requested and paid for it. In addition, public funds are utilized to operate the Treasury and print currency containing the national motto, but these license plates will be paid for through user fees.

For more information on the constitutionality of the phrase "In God We Trust" or for copies of the cases cited in this memo, please contact Thomas Reiker at 465-4965 or thomas_reiker@legis.state.ak.us .

Sponsor Statement for CSHB 28
An Act Relating to Temporary Licenses for Certain Nonresident Professionals and to a Temporary Exemption from Fees and other Licensing Requirements for Active Duty Members of the Armed Forces

HB 28 allows the spouses of service members on active duty to obtain a temporary license if they practice in an area that is regulated by the Division of Corporations, Business, and Professional Licensing.

The lives of military families are dominated by frequent deployments, relocations, and extended periods of single parenthood. Military spouses are some of the most mobile populations in our country, making the maintenance of professional licenses a large obstacle. When deciding whether or not to stay in the armed forces, service members often take into account the well being of their spouses and families. Being able to practice in their field of expertise goes a long way towards fulfilling the needs of our military spouses and their families.

CSHB 28 allows a military spouse to obtain a temporary license in their field of practice as long as they meet the professional standards which are already required by law or regulation. The temporary license will be valid for six months at which time the military spouse has the option of obtaining an Alaska license or asking for a renewal of the temporary license.

Military spouses are just like their civilian counterparts. They depend on two incomes and want to achieve their goals and aspirations. CSHB 28 helps to alleviate the hardships that they face due to their highly transient lifestyle. I strongly urge your support of CSHB 28.

Challenges of Military Spouse Employment

RESEARCH BRIEF RAND NATIONAL DEFENSE RESEARCH INSTITUTE

View the print-friendly version: PDF (0.1 MB)
Visit the National Defense Research Institute

Key findings

Military wives are employed at lower rates and earn less than civilian wives, on average.

Civilian wives with the same characteristics as military wives actually have better employment outcomes than the average civilian wife.

The majority of military spouses believe that the military lifestyle — including frequent moves, deployments and long hours that keep service members from assisting with parenting, and living in areas with poor local labor market conditions — has negatively affected their employment opportunities. Almost half believe that their educational opportunities have suffered.

Military spouses work for different reasons, based on their own education level, their service member's pay grade, and their financial situation.

Successful recruiting and retention of the active duty force depends in large part on the extent to which service members and their spouses are satisfied with the military lifestyle. Prior research suggests both that the most satisfied military families are those with an employed spouse and that the influence of military spouses on service member retention decisions has increased with the proportion of military spouses working outside the home.

The majority of military spouses are employed. Nonetheless, the RAND Corporation finds that they are less likely to be employed, are more likely to be seeking work, and earn less than comparable civilian spouses.

Common explanations for their different employment outcomes are that military spouses tend to be younger, which influences their earnings and employability; that they may choose not to work; or that there may be aspects of the military lifestyle that preclude their employment or affect the types of jobs they accept (and thus their earnings).

To parse these varied explanations and gain a more detailed picture of military spouse employment, RAND researchers characterized military spouse employment based on the analysis of available Census and other data, including the personal perceptions and experiences of military spouses gained from interviews with more than 1,100 military spouses. The goal was to consider the demographics of military spouses, such as age, education level, or number and age of children, as well as less observable factors, such as spouse's interest in work, employer biases against military spouses, or the impact of the military lifestyle on the service member's family.

Who Are Military Spouses?

Military spouses differ from their civilian counterparts in ways that could explain workforce participation levels. For instance, as befits popular conceptions, military spouses are more likely to experience frequent long-distance relocations, and are on average younger and thus more likely to have young children at home. Conventional wisdom also tends to envision these spouses in rural locales that limit their employment options and wages. In reality, however, military wives[1] are more likely than civilian wives to live in metropolitan areas. Moreover, they are more likely to have graduated from high school and to have some college education, which ostensibly would increase their employability. But to what extent, then, are their employment outcomes the result of their age, their frequent moves, or other observable attributes?

To answer that question, researchers compared military spouses with civilian "look-alikes" who share the same age, education level, ethnicity, and even frequency of moves. The comparison revealed that the *look-alikes generally fared both better than the military spouses and better than the civilian average*. In other words, the demographics of military spouses suggest that they should have better employment outcomes and higher wages than the average civilian spouse. Instead, however, they are employed at much lower rates and earn less than both the average civilian spouse and those who exhibit the same characteristics. Moreover, RAND compared military spouses specifically with civilian spouses residing in the same metropolitan areas and found that military spouses earn less than their civilian neighbors.

A View from the Inside: What the Spouses Themselves Say

By eliciting spouses' views about their reasons for working or staying at home, their experiences in or out of the labor market, and what they believe about the impact of military life on their employment and educational opportunities, the interviews done as part of this research paint a richer portrait of the relationship between employment status and the conditions of a military lifestyle.

One size won't fit all. Reasons for working differ among groups of spouses

To formulate policies to improve employment, it is important to understand spouse motivations for working. About three-quarters of interviewed spouses who were either employed or seeking work mentioned financial reasons for working, with working *to pay bills and cover basic expenses* as the most widely cited primary reason. The majority of spouses also discussed nonmonetary motives such as working *to avoid boredom and keep busy*, working for *personal fulfillment or independence*, or working *to maintain skills and career status*. Spouses' motivation for working varied based on the pay grade of the service member, the family's financial situation, and the education and occupation of the military spouse. For example, personal fulfillment or independence was a nonfinancial primary reason for working that was widely cited by better-educated spouses and those married to officers. Spouses with less education, married to more-junior enlisted service members, and in more challenging financial circumstances tended to cite financial necessity as their primary reason for working.

Many spouses opt out of the workforce because of conditions unique to the military lifestyle

Just as revealing are the reasons offered by those spouses who are neither employed nor seeking employment. The vast majority (approximately three-quarters) of spouses out of the labor force mentioned full-time parenting responsibilities as their reason for not working. While some of these spouses prefer to remain out of the labor force, not all stay-at-home spouses lack a "taste" for work. A sizable number of spouses neither working nor seeking work mentioned barriers, including day care

problems, local labor market conditions, or demands of the military lifestyle, that hinder their employment. Although day care and local labor market conditions are issues that large numbers of civilian spouses also face, many military spouses viewed these conditions as the result of their military lifestyle, either because they were removed from extended family that could help with the parenting responsibilities, because they would not have self-selected the location to which the military sent them, or because military demands such as deployments and long hours precluded their service member from assisting them.

A majority believe that military life negatively affected their employment and education
The clearest indicator of the challenges of military spouse employment is the fact that almost two-thirds of those interviewed felt that being a military spouse had a negative impact on their work opportunities. The most frequently cited cause was *frequent and disruptive moves*. Other causes cited were *service member absence and the related heavy parenting responsibilities* as well as *child care difficulties*. These spouses also referred to the inflexibility of the military workplace to accommodate the needs of military parents. Finally, some spouses cited an *employer bias* against or stigmatization of military spouses, often driven by the employer's concern that the spouse will be forced to leave abruptly. As with frequent moves and service member absence, this perceived cause is uniquely military. Many spouses also reported a negative impact on their education. Almost half the spouses believed that their educational opportunities had suffered negatively, once again citing frequent moves and service member absence.

Steps to Improve Employment and Educational Opportunities and Thus Enhance Quality of Life

When asked what the military might do to improve their employment and educational opportunities, the spouses' most common recommendation was that the Department of Defense (DoD) increase the affordability and accessibility of both education and military child care programs.

Given these and other spouse suggestions and this study's findings, RAND researchers generated the following recommendations for DoD to consider in addressing and improving military spouse employment:

- Design employment programs or policies that recognize that different groups of spouses work for different reasons.
- Continue to address military child care availability and affordability, including extended-hours and part-time child care.
- Pursue relationships with local employers and large, nationally prevalent employers to improve hiring conditions for military spouses.
- Consider incentives or requirements for military contractors to prioritize hiring military spouses.
- Reexamine the priority system for civil service jobs, including whether military spouses should receive higher priority than non-retiree veterans.
- **Address licensing and certification hurdles to help relocating spouses continue their careers.**
- Raise awareness about existing spouse employment programs.

- Become a more family-friendly employer, including better informing families about their service member's schedule and creating more ways for service members to help their spouses with the "crises" of parenthood.

Moreover, the researchers recommended that DoD determine its official position on military spouse education and develop a policy statement to reflect this position. The policy statement should be the basis of how, and establish the extent to which, DoD should encourage, support, or even invest in military spouse education. Depending on the extent of DoD support for military spouse education, the department could address spouse education through such means as

- encouraging education providers to maximize the number of classes offered on military bases and ease the administrative difficulty of transferring courses
- pursuing in-state tuition rates for military spouses
- creating online or distance-learning opportunities.

These findings provide an expansive portrait of military spouse living and working conditions. The quantitative data available confirm the perceptions and experiences of many of the military spouses interviewed and demonstrate that many military spouses make personal employment or academic sacrifices to support their service member spouse's career demands. The strains posed by frequent moves, long spouse absences, and related child care dilemmas are products of the military life. And these strains can play a role in service members' leaving the military to pursue what they perceive to be more family-friendly professions. But by taking some or all of these steps, DoD could reap rewards both in terms of concrete quality-of-life improvements and in general perceptions among service members and spouses that the military is listening to, and acting on, their concerns.

---

[1] Due to the small numbers of male spouses, the quantitative analysis of Census and other data included only female spouses of male service members.

February 10, 2011

Members of the 27th Alaska Legislature

The Alaska Dental Society urges your support of HB 28 An Act relating to temporary licenses for certain nonresident professionals sponsored by Representatives Thomas and Herron.

HB28 will allow spouses of active duty military personnel transferred to Alaska to utilize their professional skills in the private sector while they complete the process for a regular professional Alaska license. Under HB28 they are eligible for a courtesy license while they are completing the paperwork required to obtain a permanent license. The courtesy license, which requires they have an equivalent license in good standing in another state, will allow these professionals to work in their professional field without delay. Under HB28 the licensees will be required to obtain a permanent license within a year of being issued a courtesy license.

The Alaska Dental society believes professionals who have spouses serving in the armed forces in Alaska should not be needlessly prevented from pursuing their professional careers.

David Logan, DDS
Legislative Chair, Alaska Dental Society

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 28(L&C)

Analysis

The legislation would require the Department to implement regulations to establish criteria for issuing a temporary courtesy license to a nonresident so they may lawfully practice their occupation. The agency does not predict a significant fiscal impact as a result of the proposed statute. Accordingly, the agency submits a zero fiscal note.

§ 112. Certain combat zone compensation of members of the Armed Forces

(a) Enlisted personnel

Gross income does not include compensation received for active service as a member below the grade of commissioned officer in the Armed Forces of the United States for any month during any part of which such member—

(1) served in a combat zone, or

(2) was hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone; but this paragraph shall not apply for any month beginning more than 2 years after the date of the termination of combatant activities in such zone.

With respect to service in the combat zone designated for purposes of the Vietnam conflict, paragraph (2) shall not apply to any month after January 1978.

(b) Commissioned officers

Gross income does not include so much of the compensation as does not exceed the maximum enlisted amount received for active service as a commissioned officer in the Armed Forces of the United States for any month during any part of which such officer—

(1) served in a combat zone, or

(2) was hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone; but this paragraph shall not apply for any month beginning more than 2 years after the date of the termination of combatant activities in such zone.

With respect to service in the combat zone designated for purposes of the Vietnam conflict, paragraph (2) shall not apply to any month after January 1978.

(c) Definitions

For purposes of this section—

(1) The term "commissioned officer" does not include a commissioned warrant officer.

(2) The term "combat zone" means any area which the President of the United States by Executive Order designates, for purposes of this section or corresponding provisions of prior income tax laws, as an area in which Armed Forces of the United States are or have (after June 24, 1950) engaged in combat.

(3) Service is performed in a combat zone only if performed on or after the date designated by the President by Executive Order as the date of the commencing of combatant activities in such zone, and on or before the date designated by the President by Executive Order as the date of the termination of combatant activities in such zone; except that June 25, 1950, shall be considered the date of the commencing of combatant activities in the combat zone designated in Executive Order 10195.

(4) The term "compensation" does not include pensions and retirement pay.

(5) The term "maximum enlisted amount" means, for any month, the sum of—

(A) the highest rate of basic pay payable for such month to any enlisted member of the Armed Forces of the United States at the highest pay grade applicable to enlisted members, and

(B) in the case of an officer entitled to special pay under section 310 of title 37, United States Code, for such month, the amount of such special pay payable to such officer for such month.

(d) Prisoners of war, etc.

(1) Members of the Armed Forces

Gross income does not include compensation received for active service as a member of the Armed Forces of the United States for any month during any part of which such member is in a missing status (as defined in section 551 (2) of title 37, United States Code) during the Vietnam conflict as a result of such conflict, other than a period with respect to which it is officially determined under section 552(c) of such title 37 that he is officially absent from his post of duty without authority.

(2) Civilian employees

Gross income does not include compensation received for active service as an employee for any month during any part of which such employee is in a missing status during the Vietnam conflict as a result of such conflict. For purposes of this paragraph, the terms

"active service", "employee", and "missing status" have the respective meanings given to such terms by section 5561 of title 5 of the United States Code.

(3) Period of conflict

For purposes of this subsection, the Vietnam conflict began February 28, 1961, and ends on the date designated by the President by Executive order as the date of the termination of combatant activities in Vietnam. For purposes of this subsection, an individual is in a missing status as a result of the Vietnam conflict if immediately before such status began he was performing service in Vietnam or was performing service in Southeast Asia in direct support of military operations in Vietnam.

§ 5928. Danger pay allowance

An employee serving in a foreign area may be granted a danger pay allowance on the basis of civil insurrection, civil war, terrorism, or wartime conditions which threaten physical harm or imminent danger to the health or well-being of the employee. A danger pay allowance may not exceed 35 percent of the basic pay of the employee, except that if an employee is granted an additional differential under section 5925 (b) of this title with respect to an assignment, the sum of that additional differential and any danger pay allowance granted to the employee with respect to that assignment may not exceed 35 percent of the basic pay of the employee. The presence of nonessential personnel or dependents shall not preclude payment of an allowance under this section. In each instance where an allowance under this section is initiated or terminated, the Secretary of State shall inform the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate of the action taken and the circumstances justifying it.

Combat Zones and Hazardous Duty Designations

Posted: December 8, 2009

Combat zones are designated by an Executive Order from the President as areas in which the U.S. Armed Forces are engaging or have engaged in combat.

There are currently three such combat zones (including the airspace above each):

1. Arabian Peninsula Areas, beginning Jan. 17, 1991 -- the Persian Gulf, Red Sea, Gulf of Oman, the part of the Arabian Sea north of 10° North latitude and west of 68° East longitude, the Gulf of Aden, and the countries of Bahrain, Iraq, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates.

2. Kosovo area, beginning Mar. 24, 1999 -- Federal Republic of Yugoslavia (Serbia and Montenegro), Albania, the Adriatic Sea and the Ionian Sea north of the 39th Parallel.

3. Afghanistan, beginning Sept. 19, 2001.

HAZARDOUS DUTY

Public Law 104-117 designates three parts of the former Yugoslavia as a Qualified Hazardous Duty Area, to be treated as if it were a combat zone, beginning Nov. 21, 1995: Bosnia and Herzegovina, Croatia, and Macedonia.

In addition, the Department of Defense has certified these locations for hazardous duty/combat zone tax benefits due to their direct support of military operations, beginning on the listed dates:

In support of Operation Enduring Freedom (Afghanistan combat zone):

-- Pakistan, Tajikistan and Jordan - Sept. 19, 2001

-- Kyrgyzstan and Uzbekistan - Oct. 1, 2001

-- Philippines (only troops with orders referencing Operation Enduring Freedom) - Jan. 9, 2002

-- Yemen - Apr. 10, 2002

-- Djibouti - July 1, 2002

-- Somalia - Jan. 1, 2004

Sponsor Statement
CS HB 64 (FIN)

"An Act relating to permanent motor vehicle registration; and providing for an effective date."

The purpose of CS HB64 (FIN) is to offer the choice of permanent registration for personal-use, non-commercial trailers and certain motor vehicles when applied for at the Division of Motor Vehicles.

Permanent Motor Vehicle Registration

- Would be available to motor vehicles that are eight years or older
- Would cost $25, in addition to the regular biennial registration fee
- Provide the owner with the option of selecting the regular two-year, biennial, registration
- Is not transferable when ownership of the vehicle changes

Permanent Trailer Registration

- Would allow the owners of non-commercial trailers the same access to permanent registration that the 20th Legislature (HB404) extended to the owners of commercial trailers in 1998
- Provide the owner with the option of selecting the regular two-year, biennial, registration
- Would cost $25, in addition to the regular biennial registration fee
- Is not transferable when ownership of the vehicle changes

If passed, CS House Bill 64 (FIN) will result in a savings of nearly $19 million annually for Alaskan consumers.

Please join me in supporting this important legislation.

CS FOR HOUSE BILL NO. 64(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES STOLTZE AND KELLER, Costello, Neuman, Lynn

A BILL

FOR AN ACT ENTITLED

"An Act relating to permanent motor vehicle registration; relating to the registration fee for noncommercial trailers and to the motor vehicle tax for trailers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 28.10.108(a) is amended to read:

(a) Except for a vehicle registered under AS 28.10.152 **or 28.10.155**, a vehicle required to be registered under this chapter shall be registered under the procedures set out in this section.

* **Sec. 2.** AS 28.10 is amended by adding a new section to read:

Sec. 28.10.155. Permanent motor vehicle registration. (a) The owner of a motor vehicle, other than a commercial motor vehicle, that is required to be registered under this chapter may elect to permanently register the motor vehicle in lieu of registration under AS 28.10.108 if the vehicle is at least eight years old. The permanent registration expires when the owner transfers or assigns the owner's title or

interest in the vehicle. A permanent registration may not be renewed. On receiving the proper application and fees, the department shall issue to the registered owner registration plates, tabs, and a permanent registration form.

(b) The fees for permanent registration must equal the fees that would be applicable if the motor vehicle were registered under AS 28.10.108, plus a permanent registration fee of $25. The motor vehicle registration tax for a permanently registered vehicle is the rate established for permanent motor vehicle registration under AS 28.10.431(j)(2). If a municipality has not established a tax for a permanently registered motor vehicle, the biennial rate established in AS 28.10.431(b) or (j)(1), if any, is levied upon the vehicle and is payable only once at the time a motor vehicle is permanently registered. Except as provided in AS 28.10.423(b), the owner of a permanently registered motor vehicle is not required to pay other registration fees or taxes under this chapter.

*** Sec. 3.** AS 28.10.411(f) is amended to read:

(f) A resident 65 years of age or older on January 1 of the year the vehicle is registered or a resident with a disability that limits or impairs the ability to walk and who provides proof of that disability as provided in 23 C.F.R. 1235.2 is entitled to an exemption from the registration fee required under this section for one vehicle subject to registration under AS 28.10.421(b)(1), (2), **or** (5), or **(i)** [(6)]. An exemption may not be granted except upon written application for the exemption on a form prescribed by the department.

*** Sec. 4.** AS 28.10.421 is amended by adding a new subsection to read:

(j) When a person registers a trailer not used or maintained for the transportation of persons or property for hire or for other commercial use, including a boat trailer, baggage trailer, box trailer, utility trailer, house trailer, travel trailer, or trailer rented or offered for rent, the person may choose to pay a biennial registration fee of $30 or to permanently register the trailer. If the person permanently registers the trailer, the person shall pay the biennial registration fee plus a permanent registration fee of $25. If the person permanently registers the trailer, no additional registration fees are required if the same person who initially registered the trailer continues to own the trailer. A new owner of a trailer previously registered under this subsection

shall register and pay the biennial registration fee or the permanent registration fee as provided in this subsection. The motor vehicle registration tax for a permanently registered trailer is the rate established for permanent trailer registration under AS 28.10.431(j)(3). If a municipality has not established a tax for a permanently registered trailer, the biennial rate established in AS 28.10.431(b) or (j)(1), if any, is levied upon the trailer and is payable only once at the time a trailer is permanently registered. If the person pays the registration tax as required by this subsection and AS 28.10.431, no additional registration taxes are required if the same person who initially registered the trailer continues to own the trailer.

* **Sec. 5.** AS 28.10.423 is amended by adding a new subsection to read:

(b) In addition to the permanent registration fee established in AS 28.10.155, a $2 fee is imposed on the owner of each permanently registered motor vehicle required to be inspected under an emission control program established in AS 46.14.400 or 46.14.510. That fee shall be collected biennially.

* **Sec. 6.** AS 28.10.431(b) is amended to read:

(b) The biennial tax is levied upon motor vehicles subject to the registration fee under AS 28.10.411 and 28.10.421 and is based upon the age of vehicles as determined by model year in the first year of the biennial period, according to the following schedule:

	Tax According to Age of Vehicle Since Model Year:							
	1st	2nd	3rd	4th	5th	6th	7th	8th or over
Motor Vehicle								
(1) motorcycle	$ 17	$ 15	$ 13	$ 10	$ 7	$ 5	$ 4	$ 4
(2) vehicles specified in AS 28.10.421(b)(1)	21	99	77	55	39	28	19	16
(3) vehicles specified in AS 28.10.421(b)(3)	121	99	77	55	39	28	19	16
(4) vehicles specified								

in AS 28.10.421(c)(1)-(4)								
5,000 pounds or less	121	99	77	55	39	28	19	16
5,001-12,000 pounds	198	154	121	99	77	55	33	22
12,001-18,000 pounds	447	392	348	304	260	227	205	194
18,001 pounds or over	546	469	403	348	304	260	216	194
(5) vehicles specified in AS 28.10.421(b)(4)	198	154	121	99	77	55	33	22
(6) vehicles specified in **AS 28.10.421(i)** [AS 28.10.421(b)(6)]	17	15	13	10	7	5	4	4
(7) vehicles specified in AS 28.10.421(d)(8)	121	99	77	55	39	28	19	16
(8) vehicles specified in AS 28.10.421(b)(2)	121	99	77	55	39	28	19	16
(9) vehicles eligible for dealer plates under AS 28.10.421(d)(9).	88							

* **Sec. 7.** AS 28.10.431(c) is amended to read:

(c) **Except as provided in (m) of this section, the** [THE] registration tax shall be levied, collected, enforced and otherwise administered in the same manner as provided for the registration fee in this chapter. Only one registration tax may be collected with respect to the same motor vehicle in the year for which the tax is paid.

* **Sec. 8.** AS 28.10.431(j) is amended to read:

(j) A municipality that imposes a motor vehicle registration tax as described under (a) of this section may also**, by passage of an appropriate ordinance, (1)** increase the scheduled amount of tax described under (b) or (*l*) of this section**, (2) establish a tax for a motor vehicle that is permanently registered under AS 28.10.155, or (3) establish a tax for a trailer that is permanently registered under AS 28.10.421(i)** [BY PASSAGE OF AN APPROPRIATE ORDINANCE]. A municipality that chooses to change the tax imposed under (b) or (*l*) of this section **or**

establishes a tax for permanently registered motor vehicles or trailers shall file a written notice of the change with the department by January 1 of the year preceding the year in which the change in tax is to take effect. A municipality may not change the amount of the tax imposed under this section more than once every two years. The department may charge a municipality a one-time fee to cover the cost to the department of implementing a change under this subsection.

* **Sec. 9.** AS 28.10.431 is amended by adding a new subsection to read:

(m) The department may not collect a registration tax established by a municipality under (j)(2) or (3) of this section for a permanently registered motor vehicle or trailer if the amount of the tax is greater than $100 unless the tax is for a motor vehicle subject to registration under AS 28.10.421(c)(3) and (4).

* **Sec. 10.** AS 28.10.421(b)(6) is repealed.

* **Sec. 11.** This Act takes effect January 1, 2015.

FISCAL NOTE

STATE OF ALASKA

(Revised 11/18/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB064
2012 LEGISLATIVE SESSION

Analysis

The effective date for this bill is January 1, 2014.

Expenditures
The database for Division of Motor Vehicles (DMV) will need programming to allow for permanent registration of non-commercial vehicles.
Estimated hours: 400
Cost per hour: $143
Total programming cost: 400 x $143 = $57,200.

Revenues
Motor Vehicle Registration Tax (MVRT): The DMV collects MVRT for 16 communities: Anchorage, Bethel, Bristol Bay Borough, Cordova, Dillingham, Juneau, Kenai Peninsula Borough, Ketchikan Gateway Borough, Kodiak Island Borough, Matanuska Susitna Borough, Nenana, Nome, Petersburg, Sitka, Unalaksa, and Whittier.

Eight percent of the MVRT collected is retained by the state as collection costs. Although the increase or decrease in revenues from the collection costs are indeterminate, the revenues will change proportionately with the registration fees.

Registration Fees:
Assumptions:
1) 369,500 vehicles will be eligible for permanent registration in 2014 (based on currently-registered vehicles). Half (184.7) will renew in 2014 and half will renew in 2015.

2) Approximately 24,800 vehicles will become eligible each year. This is an average of the number of currently registered vehicles with model years 2007-2011.

3) Only 10% of owners will elect for permanent registration, based on the following:
a) The biennial registration fee established in AS 28.10.421 is $100 for most of the vehicles eligible for permanent registration, making the fee for permanent registration $300.
b) The largest quantity of vehicles in the state are in areas with the highest MVRT. Three times the MVRT for vehicles in Municipality of Anchorage or the Matanuska Susitna Borough would be $210.
c) An owner of an eligible vehicle would have to decide whether a vehicle that's already at least 8 years old will last another 6+ years to justify the additional payment for permanent registration, which would be as high as $340: permanent ($300 reg + $210 MVRT = $510) versus biennial ($100 reg + $70 MVRT = $170).
d) Many owners of older vehicles are likely in the middle to lower income brackets; these owners are less likely to have the extra funds available to opt for permanent registration.
e) It's very likely that a vehicle that is at least 8 years old will have a major component fail within the next six years. An owner who has the financial resources to pay the additional $340 for permanent registration would likely opt to replace the vehicle rather than repair it; consequently, DMV assumes few of those owners would opt for permanent registration.
f) The owners of eligible vehicles who do not opt for permanent registration the first year it's available won't opt for it in subsequent years.

4) All permanently registered vehicles will stay in service for the next 6 years and will not change ownership. Although some vehicles may go out of service, the assumption is that an owner won't opt to pay the extra fees for permanent registration if their vehicle is not in good mechanical shape.

Analysis Continued

Calculations

	2014	2015	2016	2017	2018
2014: 184.7 current vehicles eligible for perm reg					
18.47 opt for perm reg (184.7 x 10%)					
Increase from perm reg (18.47 x $300)	5,541.0				
Loss in biennial fees (18.47 x $100)	(1,847.0)		(1,847.0)		(1,847.0)
2015: 209.5 vehicles eligible for perm reg					
including 24.8 newly eligible					
20.95 opt for perm reg (209.5 x 10%)					
Increase from perm reg (20.95 x $300)		6,285.0			
Loss in biennial fees (20.95 x $100)		(2,095.0)		(2,095.0)	
2016: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (24.8 x 10%)					
Increase from perm reg (2.48 x $300)			744.0		
Loss in biennial fees (2.48 x $100)			(248.0)		(248.0)
2017: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (28.4 x 10%)					
Increase from perm reg (28.4 x $300)				744.0	
Loss in biennial fees (2.48 x $100)				(248.0)	
2018: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (24.8 x 10%)					
Increase from perm reg (2.48 x $300)					744.0
Loss in biennial fees (2.48 x $100)					(248.0)
Total Estimated Revenue Increase/(Decrease)	3,694.0	4,190.0	(1,351.0)	(1,599.0)	(1,599.0)

Performance Measures

The DMV expects this bill will have very little impact on its performance measures.

1) Only about 11% of registration renewals are processed at a DMV office.
2) DMV estimates a maximum of 2,480 newly-eligible vehicles will be placed under permanent registration each year. This would result in a work load reduction of approximately one-tenth of one percent.

Economic Impact

Once the initial vehicles with permanent registration go out of service, there would be an annual increase of revenues of approximately $496 .0 ($744.0 - $248.0), assuming that 10% of owners opt for permanent registration. Since this won't happen until some time after 2018, this can't be reflected on the fiscal note.

Why this fiscal note differs from previous version (if initial version, please note as such)

This fiscal note differs because the new committee substitute of the bill changed the effective date.

(Revised 1/27/2011 OMB)

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 64

Analysis

Currently, the local vehicle inspection and maintenance (I/M) programs rely on the vehicle registraion process to notify vehicle owners of I/M testing requirements and to make sure those requirements are met. Elimination of that registration process will require the department to develop a stand-alone system to replace what is being done now as part of the vehicle registration system. Additionally, the department will need to update the State's air quality plan to reflect this change to how the I/M programs operate.

The first-year costs are for contractual services to develop the stand-alone computer programs to generate notifications and to track compliance, and to amend the state air quality plan. This effort is funded with General Funds. FY13 is the latest date these activities can occur and be ready for a January 2014 effective date for permanent vehicle registration. The $8.0 in contractual expenses in FY14 and FY15 will cover off-cycle registration renewals.

Starting in FY16, one new administrative position, and associated one-time start-up costs, is added to implement the revised I/M notification system for permanently registered vehicles. This position will be responsible for notifying over 4,000 vehicle owners monthly of their inspection requirements, checking to see inspections are done and referring violations to the local government and will be funded with General Fund Program Receipts generated through this fee program.

Summary of version
CSHB64 – 27-LS0327\S

Section 2 – Establishes a new fee for Permanent Motor Vehicle Registration
– Establishes that permanent registration is available for non-commercial motor vehicles for vehicles eight years old or older and that transfer of permanent registration is not allowed.
– Sets the fee for permanent registration for eligible vehicles at the biennial fee (currently $100) plus $25 for permanent registration.

- Also establishes that the Motor Vehicle Registration Tax established by municipalities, boroughs or cities is only payable at the time of registration.

Section 3 – Makes reference to the addition of a Motor Vehicle Registration Tax for vehicles permanently registered (Section 8 of the legislation)

Section 4 - Establishes a new fee for Permanent Motor Vehicle Registration
– Establishes that permanent registration is available for non-commercial trailers and that transfer of permanent registration is not allowed.
– Sets the fee for permanent registration for eligible trailers at the biennial fee (currently $30) plus $25 for permanent registration.

- Also establishes that the Motor Vehicle Registration Tax established by municipalities, boroughs or cities is only payable at the time of registration.

Section 5 – Adds permanently registered vehicles and trailers to the list of vehicles required to pay a $2 if they are under an emission control inspection program. (Currently there is nowhere in the state with an I/M program.)

Section 6 – References Section 8 of the legislation (Page 4, line 9) with regards to the base rate for Motor Vehicle Registration Tax set by the state.

Section 7 – References Section 9 of the legislation as it relates to the collection of the Motor Vehicle Registration Tax.

Section 8 – Allows municipalities, boroughs and cities to set a Motor Vehicle Registration Tax rate for vehicles and Trailers that are registered permanently.

- This must be done by the passage of an ordinance by the local governing body and can only be done once every two years.
- The state (Division of Motor Vehicles must be notified of such changes by January 1 of the previous year in which the change takes effect.

Section 9 – Establishes that the State (DMV) may not collect a motor vehicle registration tax, for permanently registered vehicles or trailers, if the rate established by a municipality, borough or city is greater than $100.

House Finance Committee
Juneau, Alaska

RE: HB 64 and HB 10

Dear Committee Members,

The Alaska Municipal League originally came out strongly against HB64 and HB10, as they both repealed the authority of municipalities to levy vehicle registration taxes. AML and the municipalities addressed those concerns during hearings in House Transportation committee meetings.

Thanks to the work of the bill's sponsor, this issue has been corrected. Our main issue has been alleviated to a large degree, in that municipalities, under the new CS, would be allowed to adjust rates to compensate for potential losses due to permanent registration. We have received a spread sheet from Mr. Breese, in Rep. Stoltze's office that enables each municipality to get a fairly accurate idea of what that loss might be.

We are not in disagreement that the reduction of time spent in line with DMV could better be spent elsewhere.

While individual municipalities may still have some concerns, AML will attempt to make this legislation work.

Thank you,

Kathie Wasserman

Representative Peggy Wilson
House Transportation Committee
Juneau, Alaska 99811

RE: HB64: An Act relating to Permanent Motor Vehicle Registration and providing for an Effective Date.

Dear Representative Wilson,

The Alaska Municipal League would like to go on record as opposing HB64. While the intent of the bill may be a positive one, the implementation will negatively affect both the State and the municipalities of the State of Alaska that currently realize a tax revenue from vehicle registration fees.

The main purpose stated in the Sponsor Statement is to make the "DMV re-registration process more user-friendly to the owners of qualifying vehicles and lighten the work load for DMV employees."

This fee of $100 (or 5 times the regular registration fee, whichever is less) MAY realize increased revenues during the first year of implementation. However, each year after that, the State of Alaska and the participating municipalities will see revenue losses. It seems amazing to us that legislation would be introduced that would purposely decrease revenue to the State to improve a more "user-friendly process." To stand in line every two years or send in re-registration papers by mail is hardly one of those things that come up on most people's list of "things-most-dreaded." However, to continue to erode the tax base of municipalities, resulting in decreases in basic services, can negatively impact health and safety. This legislation affects approximately 63% of the cars currently on Alaska's roads. It is nearly impossible, however, to estimate the decrease, as each municipality does not necessarily have records that can easily be compiled.

One of the suggestions from the sponsor of the bill is that municipalities could bill for annual taxes. This would add an entirely new database and increased employees to municipal offices.

As supporters of HB 30 and SB37, we also feel that this loss of revenue to the State will severely impact the ability of the proposed Transportation Infrastructure Fund, as registration fees will be used as a potential funding source.

Again, we would request that HB64 not move beyond this committee due to the decreased revenues that will be realized by the State of Alaska and 16 of Alaska's largest communities.

Sincerely,

Kathie Wasserman

Kathie Wasserman
Executive Director

Montana Code pertaining to permanent motor vehicle registration

61-3-562. Permanent registration -- transfer of light vehicle ownership -- rules. (1) (a) The owner of a light vehicle 11 years old or older subject to the registration fee, as provided in 61-3-321(2), may permanently register the light vehicle upon payment of a $87.50 registration fee, the applicable registration and license fees under 61-3-412, if applicable, the administrative fee and the annual one-time-only donation fee for a generic specialty license plate under 61-3-480, and an amount equal to five times the local option motor vehicle tax or flat fee on vehicles under 61-3-537 and, as applicable, either:

(i) (A) the original fee and four times the renewal fee for personalized plates; or

(B) five times the renewal fees for personalized plates; or

(ii) if a new set of license plates is not being issued, an insurance verification fee of $5, which must be deposited in the account established under 61-6-158.

(b) The following series of license plates may not be used for purposes of permanent registration of a light vehicle:

(i) Montana national guard license plates issued under 61-3-458(2)(b);

(ii) reserve armed forces license plates issued under 61-3-458(2)(c);

(iii) amateur radio operator license plates issued under 61-3-422; and

(iv) collegiate license plates issued under 61-3-465.

(2) In addition to the fees described in subsection (1), an owner of a truck with a manufacturer's rated capacity of 1 ton or less that is permanently registered shall pay five times the applicable fees imposed under 61-10-201.

(3) The owner of a motor vehicle that is permanently registered under this section is not subject to additional registration fees or to other motor vehicle registration fees described in this section for as long as the owner owns the vehicle.

(4) The county treasurer shall once each month remit to the state the amounts collected under this section, other than the local option motor vehicle tax or flat fee, for the purposes of 61-3-321(2) and 61-10-201. The county treasurer shall retain the local option motor vehicle tax or flat fee.

(5) (a) The permanent registration of a light vehicle allowed by this section may not be transferred to a new owner. If the light vehicle is transferred to a new owner, the department shall cancel the light vehicle's permanent registration.

(b) Upon transfer of a light vehicle registered under this section to a new owner, the new owner shall apply for a certificate of title under 61-3-201 and 61-3-216 and register the light vehicle under 61-3-303.

HB 64 Change in Registration Fee for Old Cars

Currently Registered Old Cars in Anchorage

Total passenger cars in Anchorage of all ages	190768	Total Number of registered passenger cars in 2010 from DMV website
Percent of passenger cars in Anchorage older than 8 years	63%	Percent older than 8 years from Feb 14 email from Alaska Municipal League (Leslie Peters)
Number of cars in Anchorage older than 8 years	120,184	Number of Vehicles in Anchorage currently older than 8 years = percentage over eight years * total number of registered passenger cars.. Half of these currently registered cars would renew their registration in 2012 and half in 2013.
Percent electing permanent registration	40%	Assumed. Change as necessary to investigate alternative scenarios
Percent of old cars that leave state or no longer register each year	10%	Assumed. Change as necessary to investigate alternative scenarios. Percent of current registered old cars that would no longer pay any type of registration fee each year either because they break down or leave the state.

Cars that age to more than 8 years each year in Anchorage

Number of cars that age from seven years old to eight years old each year.	8,823	This is the number of currently registered cars that become eligible for permanent registration each year because they age from seven years to eight years old = (Total number of registered passenger cars minus number of passenger cars more than eight years old) / 8. This assumes that the total cars that are less than eight years old are distributed evenly across each age class. In other words, 1/8 of the cars less than eight years old are one year old, 1/8 are two years old, 1/8 are three years old, and so on.
Percent electing permanent registration	40%	Assumed, Change as necessary for alternative scenarios.
Percent of old cars that leave state or no longer register each year	10%	Percent of current registered old cars that would no longer pay any type of registration fee each year either because they break down or leave the state.
Biennial fee for cars older than 8 years	70	Biennial registration fee effective in Anchorage starting in 2012 from Section 16 of AO 2010-81(S)
Permanent registration fee	100	Optional new permanent fee specified by HB 64. The permanent fee would be the minimum of either $100 or 5 times the biennial fee. Since $100 is less than $350 (=5*$70), the old cars would have the option of paying $100 as the permanent fee in Anchorage.

		2012	2013	2014	2015	2016	2017	
Current: Passenger Cars older than 8 years								
Number of cars that are currently 8 years or older and opt for permanent registration and change each year	24,037							Number of cars opting for permanent registration each year = number of cars older than eight years / 2 * percentage electing permanent registration
Revenues received from permanent registration		2,403,677	2,163,309					Gain of Permanent fees = number that opting for permanent registration * permanent registration fee.
Revenues lost from old cars that no longer pay biennial fee.		(1,682,574)	(1,514,316)	(1,362,885)	(1,226,596)	(1,103,937)	(993,543)	Loss of Biennial Fees = number of cars opting for permanent registration * biennial registration fee.
Additional Passenger Cars that age to more than 8 years								
Number of cars that are currently 8 years or less and age each year to over 8 years and opt for permanent registration	3,529							Number of additional cars that age to more than eight years and opt for permanent registration each year = number of cars that age to more than eight years * percentage electing permanent registration
Revenues received from permanent registration		352,921	317,629	285,866	257,279	231,551	208,396	Gain of Permanent fees = number of cars that age to more than eight years and opt for permanent registration * permanent registration fee.
Revenues lost from old cars that no longer pay biennial fee.		(247,045)	(222,340)	(200,106)	(180,095)	(162,086)	(145,877)	Loss of Biennial Fees = number of cars that age to eight years and opt for permanent registration * biennial registration fee.

Memorandum

TO: Senator Bill Wielechowski
Senate State Affair Committee Chair

FROM: Rep. Bill Stoltze

DATE: April 6, 2012

RE: Calendar Request for CS HB64 (FIN) "An Act relating to permanent motor vehicle registration; and providing for an effective date."

Mr. Chair,

I request that CS HB64(FIN) be calendared for a hearing before the Senate State Affairs Committee at the earliest possible time. My staff member Darrell Breese will be carrying the bill.

Attached is a sponsor statement, supporting material and a copy of the legislation for consideration.

MEMORANDUM

TO: SEN. BILL WIELECHOWSKI, CHAIR
SENATE STATE AFFAIRS COMMITTEE

FROM: REP. CRAIG JOHNSON, CHAIR
HOUSE RULES COMMITTEE

DATE: FEBRUARY 25, 2011

SUBJECT: REQUEST FOR HEARING

I respectfully request that HB 98, relating to display, folding, presentation, and retirement of the state flag be scheduled for a hearing in the Senate State Affairs Committee.

We will need to be teleconferenced. The number of testifiers will most likely be two and a five-minute DVD presentation will be introduced by one of the testifiers.

Please feel free to contact me, or my aide, Jeanne Ostnes, with questions or thoughts at 465-6871.

Sponsor Statement
HB 98

House Bill 98 adds two sub-sections to AS 44 Chapter 09.030 and two new sections, .032 and .034. This legislation will standardize procedures for the display, folding and an additional method for the retirement of our state flag. It is designed to ensure consistent, respectful and appropriate procedures for the handling of our state flag.

As part of Junior Reserve Officers Training Corps (JROTC) curriculum, "Service Learning Project", the cadets of the A. J. Dimond High School JROTC Program realized there were several issues concerning the handling of Alaska's state flag, including statutory omissions. Based on their research, the following three issues were identified and are recommended for inclusion in statute:

1). Proper display of the flag against a wall: Currently there is no specified proper method stipulated for displaying the flag against a wall. This has caused a great deal of confusion and non-uniformity in how institutions are displaying the flag. This lack of guidance has resulted in a random and inconsistent manner of display that shows no respect to our state flag. This legislation would address that by amending AS 44.09.030 with new subsections (d) and (e).

2) Proper folding of the state flag: Currently there is not a method stipulated for folding the flag, so Dimond JROTC opted to fold our state flag in a rectangle. Their motivation for establishing consistency is a passionate belief in the uniqueness of Alaska and a desire to reflect that distinctiveness in the manner we fold our flag. After much trial and error, they developed a technique that is neither complicated nor cumbersome and yet, when done properly, results with the North Star – the defining emblem of our state – being displayed on top of the flag when it is presented to another. The effect is both striking and symbolic. This legislation would address that by adding the new section 44.09.032.

3) Flag Retirement Ceremony: Dimond ROTC also recommended the manner of retirement also needed more ceremony when practicable. They recommended an additional statutory section that encourages that retirement of our state flag be a public ceremony under the direction of uniformed personnel representing a state or national military service or a patriotic society. However, the state flag may still be retired in a private ceremony. Under this legislation the current statute, AS 44.09.030 is amended with a new section .032.

HOUSE BILL NO. 98

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY REPRESENTATIVES JOHNSON, Hawker

Introduced: 1/18/11
Referred: State Affairs

Would this prohibit using a flag bandana? No penalties for not doing this way.

in a public place

A BILL

FOR AN ACT ENTITLED

"An Act relating to display, folding, presentment, and retirement of the state flag."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 44.09.030 is amended by adding new subsections to read:

(d) When displayed horizontally, the flag shall be positioned with the hoist on the left and the North Star in the upper right corner.

(e) When displayed vertically, the flag shall be positioned with the hoist at the top and the North Star in the lower right corner.

* **Sec. 2.** AS 44.09 is amended by adding new sections to read:

Sec. 44.09.032. Folding and presenting the state flag. (a) When folding the state flag, the following procedure shall be followed, whenever possible:

(1) hold the flag waist-high with another person, so that the flag is parallel to the ground and the hoist is on the left;

(2) fold the flag lengthwise, with the open edge up;

(3) holding the edges securely, rotate the flag so that five stars are facing up;

(4) fold the flag lengthwise a second time, with the open edge up;

(5) holding the edges securely, rotate the flag so that two stars are facing up;

(6) fold the flag widthwise, with the North Star facing down and the hoist on the right;

(7) holding the edges securely, fold the flag widthwise a second time, with the North Star facing down and the hoist on the right;

(8) fold the flag widthwise a third time, with the North Star facing up.

(b) When presenting the folded flag to another person, the folded flag should be turned so that the North Star is nearest the receiver.

Sec. 44.09.034. Retirement of the state flag. An official flag of the state that is no longer a fitting emblem for display because it is worn, tattered, or otherwise damaged may be respectfully retired by fire in a ceremony or other dignified manner honoring the flag as a fitting emblem for the state. When practicable, retirement of the state flag should occur in a public ceremony under the direction of uniformed personnel representing a state or federal military service or a patriotic society. If a formal ceremony is not practicable, a private ceremony is acceptable.

* **Sec. 3.** AS 44.09.030(c) is repealed.

NOTES TO DECISIONS

Applied in Alaskans for Efficient Gov't, Inc. v. Knowles, 91 P.3d 273 (Alaska 2004).

Sec. 44.06.060. Commission. The legislature shall establish a commission composed of nine members, including a chairperson and two persons from each judicial district, appointed by the governor and confirmed by the legislature, to determine the costs required by initiatives or legislative enactments authorizing relocation of any of the present functions of state government. (§ 3 1994 Ballot Measure No. 5)

NOTES TO DECISIONS

Constitutionality. — This section does not violate Alaska Const., art. XI, § 7, because it does not specify procedural requirements that could be placed upon the initiative process; further, Alaska Const., art. XI, § 6 provides that additional procedures for the initiative and referendum can be prescribed by law. Alaskans for Efficient Gov't, Inc. v. Knowles, 91 P.3d 273 (Alaska 2004).

Appointment of commission. — The governor is required to appoint a FRANK Commission only if voters first pass the relocation initiative. Alaskans for Efficient Gov't, Inc. v. Knowles, 91 P.3d 273 (Alaska 2004).

Secs. 44.06.100 — 44.06.299. Capital relocation, expenditures, planning. [Repealed, § 1 ch 54 SLA 1981.]

Chapter 07. Alaska Capital City Development Corporation.

Revisor's notes. — Section 1, ch. 143, SLA 1978 added a new chapter, designated AS 44.63 and renumbered in 1978 as AS 44.07. Chapter 143, however, had a conditional effective date and that condition has never been met. Section 7, ch. 143, SLA 1978 provided that the Act would take "effect 30 days after certification that a bond issue for costs of relocation of the capital has been adopted by the voters of the state." In November 1978, the voters rejected a bond issue for costs of relocation of the capital. Chapter 54, SLA 1981, placed a ballot question before the voters related to the relocation of the capital. At the November 1982 general election that ballot measure failed, and by the conditions of ch. 54, SLA 1981 all other provisions related to capital relocation were repealed. The failure to include the repeal of ch. 143, SLA 1978 may have been intentional, because the law had not gone into effect and, therefore, did not need to be repealed. All other provisions of the Alaska Statutes that would have been affected by ch. 143, SLA 1978 have subsequently been repealed or amended by the legislature. For the text of the law enacted by ch. 143, SLA 1978, see either the 1980 or 1984 pamphlets for this title, or the 1978 Session Laws of Alaska.

Chapter 08. Relocation Indemnification.

[Repealed, § 1 ch 54 SLA 1981.]

Chapter 09. State Seal, Flag, and Emblems.

Section		Section	
10.	State seal	75.	State marine mammal
15.	Use of seal without permission prohibited	78.	State land mammal
17.	Commemorative gold and silver medallions	80.	State fish
20.	State flag	85.	State sport
30.	Display and retirement of flags	90.	State medal for heroism
40.	State song	100.	State gem
45.	State motto	110.	State mineral
50.	State flower	120.	State fossil
60.	State bird	130.	State insect
70.	State tree	140.	State dog

Sec. 44.09.010. State seal. The official seal of the State of Alaska is comprised of two concentric circles between which appear the words "The Seal of the State of Alaska" and within the inner circle is the design of the seal corresponding to the representation in this section.

(§ 2 ch 141 SLA 1960)

Collateral references. — 68 Am. Jur. 2d, Seals, § 10.

79 C.J.S., Seals, § 1 et seq.

Sec. 44.09.015. Use of seal without permission prohibited. (a) A person may not use or make a die or impression of the state seal for any advertising or commercial purpose, unless written permission has first been obtained from the lieutenant governor.

(b) Violation of this section is a misdemeanor, and upon conviction is punishable by a fine of not more than $500, or by imprisonment for not more than six months, or by both. (§ 1 ch 90 SLA 1968)

Revisor's notes. — Formerly AS 11.60.225. Renumbered in 1978.

NOTES TO DECISIONS

Constitutionality. — Since a statute forbidding the use of the official state seal "for any advertising or commercial purpose" does not impact any non-commercial use of the seal, and since the state has a legitimate governmental interest in regulating the commercial use of that seal, there was no constitutional bar to the prosecution of the defendant for marketing commemorative coins bearing the seal. State v. Robart, 988 P.2d 1114 (Alaska Ct. App. 1999).

No preemption by federal copyright law. — Federal copyright law did not preempt this section, as it was clear that states had the power to protect symbols of their sovereignty, state seals appeared to be more akin to trademarks or service marks than they were to the type of work Congress intended copyrights to cover, and it seemed evident that Congress, by protecting specific important federal seals that were left unprotected by copyright law and by federal trademark law, did not intend to prohibit states from protecting seals that represented state sovereignty. Robart v. State, 82 P.3d 787 (Alaska Ct. App. 2004), cert. denied, 543 U.S. 940, 125 S. Ct. 310, 160 L. Ed. 2d 249 (2004).

Jury instructions. — Instructions given by the judge adequately informed the jury as to what constituted a "writing" under the statute, and as to what "acting reasonably" meant, and from this, defendant was allowed to argue that a letter from the governor, despite its lack of relevant language, was a "writing." Robart v. State, 82 P.3d 787 (Alaska Ct. App. 2004), cert. denied, 543 U.S. 940, 125 S. Ct. 310, 160 L. Ed. 2d 249 (2004).

Sec. 44.09.017. Commemorative gold and silver medallions. (a) The Department of Administration shall contract or otherwise arrange for the minting and sale of Alaska commemorative medallions minted only from .999 fine gold and silver in weights determined by the commissioner of administration. Gold and silver mined in Alaska shall be used in the production of the medallions. The state shall receive a royalty from the sale of the medallions. The amount of the royalty shall be determined by the commissioner of administration.

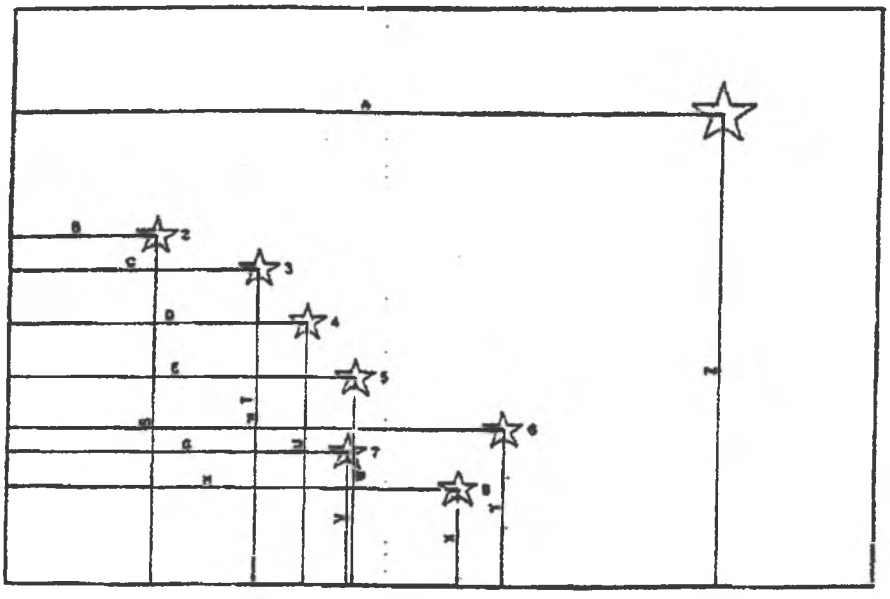
(b) One side of the commemorative medallions minted under this section shall contain the state seal. The design for the other side shall be determined in an annual contest conducted by the contractor under the supervision of the Department of Administration. Only designs using an Alaska theme and submitted by an Alaska resident may be considered in the contest. Payment for the winning design may not exceed $1,000.

(c) *[Repealed, § 35 ch 126 SLA 1994.]* (§ 1 ch 2 SLA 1988; am § 35 ch 126 SLA 1994)

Sec. 44.09.020. State flag. The design of the official flag is eight gold stars in a field of blue, so selected for its simplicity, its originality, and its symbolism. The blue, one of the national colors, typifies the evening sky, the blue of the sea and of mountain lakes, and of wild flowers that grow in Alaskan soil, the gold being significant of the wealth that lies hidden in Alaska's hills and streams.

The stars, seven of which form the constellation Ursa Major, the Great Bear, the most conspicuous constellation in the northern sky, contains the stars which form the "Dipper," including the "Pointers" which point toward the eighth star in the flag, Polaris, the North Star, the ever constant star for the mariner, the explorer, hunter, trapper, prospector, woodsman, and the surveyor. For Alaska the northernmost star in the galaxy of stars represents Alaska, the forty-ninth star in the national emblem.

The flag of the Territory of Alaska is the official flag of the state. The standard proportions and size graphically delineated herein shall be used in the manufacture of the official flag of Alaska. The stars shall be the color of natural yellow gold and the field of blue shall be of the same shade of blue used in the official manufacture of the national emblem of the United States. The design, standard proportions, and size are as follows:



STATE PROPORTIONS AND SIZE

HOIST (WIDTH VERT.)	1.000
FLY (LENGTH HORZ.)	1.416
DIAM. LARGE STAR	.104
DIAM. SMALL STARS	.062

1		2		3		4		5		6		7		8	
A	Z	B	S	C	T	D	U	E	W	F	Y	G	V	H	X
1.158	.818	.229	.504	.396	.542	.479	.463	.563	.360	.813	.271	.552	.229	.740	.167

(§ 1-1-4 ACLA 1949; am § 1 ch 29 SLA 1959; am § 1 ch 3 SLA 2007)

Revisor's notes. — The official flag described in this section was the winning design of the flag contest held in 1927 by the American Legion, Department of Alaska, in the public, private, and Native schools of the territory.

Effect of amendments. — The 2007 amendment, effective June 13, 2007, substituted "represents Alaska" for "and which at some future time will take its place as" in the last sentence of the second paragraph.

Sec. 44.09.030. Display and retirement of flags. (a) The official flag of the state shall be displayed with the flag of the United States only from sunrise to sunset, or between the hours designated by proper authority. However, the flag may be displayed after sunset upon special occasions when it is desired to produce a patriotic effect.

(b) The flag of the United States and the flag of the State of Alaska shall be displayed daily, weather permitting, in the following places:

(1) on or near the main administration building of every institution under the authority or control of the state government;

(2) in or near every schoolhouse during school days.

(c) An official flag of the state that is no longer a fitting emblem for display because it is worn, tattered, or otherwise damaged may be respectfully retired by fire. (§ 1-1-3 ACLA 1949; am § 1 ch 26 SLA 1955; am § 2 ch 3 SLA 2007)

Effect of amendments. — The 2007 amendment, effective June 13, 2007, added subsection (c).

Sec. 44.09.040. State song. The song "Alaska's Flag," with music composed by Elinor Dusenbury and words by Marie Drake, is the official song of the state. The words of the official song are as follows:

Alaska's Flag

Eight stars of gold on a field of blue —
Alaska's flag. May it mean to you
The blue of the sea, the evening sky,
The mountain lakes, and the flow'rs nearby;
The gold of the early sourdough's dreams,
The precious gold of the hills and streams;
The brilliant stars in the northern sky,
The "Bear" — the "Dipper" — and, shining high,
The great North Star with its steady light,
Over land and sea a beacon bright.
Alaska's flag — to Alaskans dear,
The simple flag of a last frontier.

(§ 1 ch 6 SLA 1955)

Sec. 44.09.045. State motto. The official motto of the State of Alaska is: North to the Future. (§ 1 ch 36 SLA 1967)

Sec. 44.09.050. State flower. The wild native forget-me-not is the state flower and floral emblem. (§ 1-1-5 ACLA 1949)

Sec. 44.09.060. State bird. The Alaska Willow Ptarmigan (Lagopus lagopus alascensis Swarth) is the official bird of the state. (§ 1 ch 1 SLA 1955)

Sec. 44.09.070. State tree. The Sitka spruce (picea sitchenensis), which is recognized as the most valuable tree species in Alaska and which is found in both national forests of the state, is the official tree of the state. (§ 1 ch 12 SLA 1962)

Sec. 44.09.075. State marine mammal. The bowhead whale is the state marine mammal. (§ 2 ch 88 SLA 1983)

Sec. 44.09.078. State land mammal. The moose (Alces alces) is the state land mammal. (§ 1 ch 17 SLA 1998)

Sec. 44.09.080. State fish. The king salmon (Oncorhynchus tshawytscha) is the official fish of the state. (§ 1 ch 20 SLA 1963)

Sec. 44.09.085. State sport. Dog mushing is the official sport of Alaska. (§ 1 ch 38 SLA 1972)

Sec. 44.09.090. State medal for heroism. (a) The governor is authorized to award a state medal for heroism directly or posthumously to any citizen of the state in recognition of a valorous and heroic deed performed in the saving of a life or for injury or death or threat of injury or death incurred in the service of the state or the citizen's community or on behalf of the health, welfare, or safety of other persons. The medal shall be awarded by the governor with an appropriate ceremony.

(b) The governor shall make arrangements for the designing of the medal for heroism through a statewide design competition participated in by the school children of the state. (§ 1 ch 12 SLA 1965)

Sec. 44.09.100. State gem. Jade is the official state gem. (§ 1 ch 51 SLA 1968)

Sec. 44.09.110. State mineral. Gold is the official state mineral. (§ 1 ch 50 SLA 1968)

Sec. 44.09.120. State fossil. The woolly mammoth (Mammuthus primigenius) is the official state fossil. (§ 2 ch 31 SLA 1986)

Cross references. — For legislative intent, see § 1, ch. 31, SLA 1986, in the Temporary and Special Acts.

Sec. 44.09.130. State insect. The four spot skimmer dragonfly is the official state insect. (§ 1 ch 49 SLA 1995)

Sec. 44.09.140. State dog. The Alaskan Malamute is the official state dog. (§ 1 ch 17 SLA 2010)

Effective dates. — Section 1, ch. 17, SLA 2010, which enacted this section, is effective August 10, 2010.

A.J. DIMOND JUNIOR RESERVE OFFICERS TRAINING CORPS

Concept of the Briefing

While doing research last school year for a flag retirement ceremony, our JROTC program became aware of two glaring omissions from the state statutes which govern our flag:

- There is no proper method stipulated for displaying the flag against a wall
- There is no proper method stipulated for folding the flag

The purpose of this briefing is to discuss these two omissions and to recommend solutions to improve our statutes.

The format used will be the military Problem-Discussion-Recommendation format.

Problem – How to display the flag

The Alaska Statutes – which are listed on the following slide- do not give an explanation for displaying the State Flag against a wall. This has caused a great deal of confusion and non-uniformity in how institutions are displaying the flag. It seems that each facility is basically left to its own devices to determine how to display the flag.

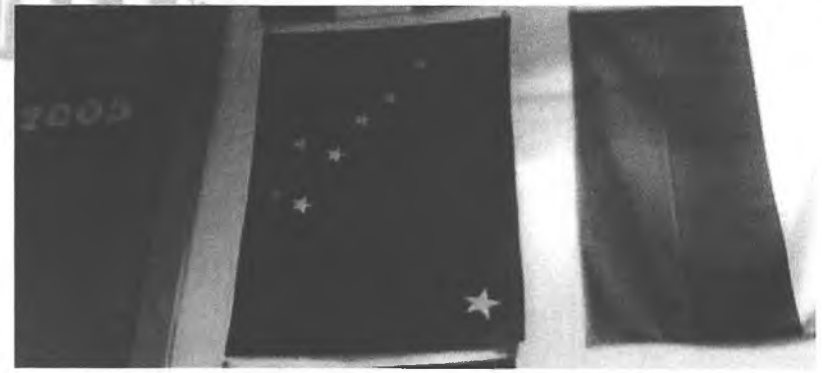
Problem – How to display the flag

- **AS 44.09.030. Display and Retirement of Flags.**
- **(a)** The official flag of the state shall be displayed with the flag of the United States only from sunrise to sunset, or between the hours designated by proper authority. However, the flag may be displayed after sunset upon special occasions when it is desired to produce a patriotic effect.
- **(b)** The flag of the United States and the flag of the State of Alaska shall be displayed daily, weather permitting, in the following places:
- **(1)** on or near the main administration building of every institution under the authority or control of the state government;
- **(2)** in or near every schoolhouse during school days.
- **(c)** An official flag of the state that is no longer a fitting emblem for display because it is worn, tattered, or otherwise damaged may be respectfully retired by fire.

Problem – How to display the flag

Schools with the North Star displayed to the observers' right

Dimond High School



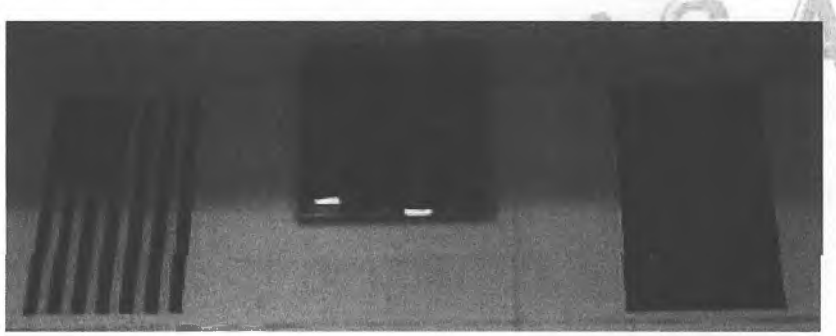
Grace Christian School

Chugiak High School

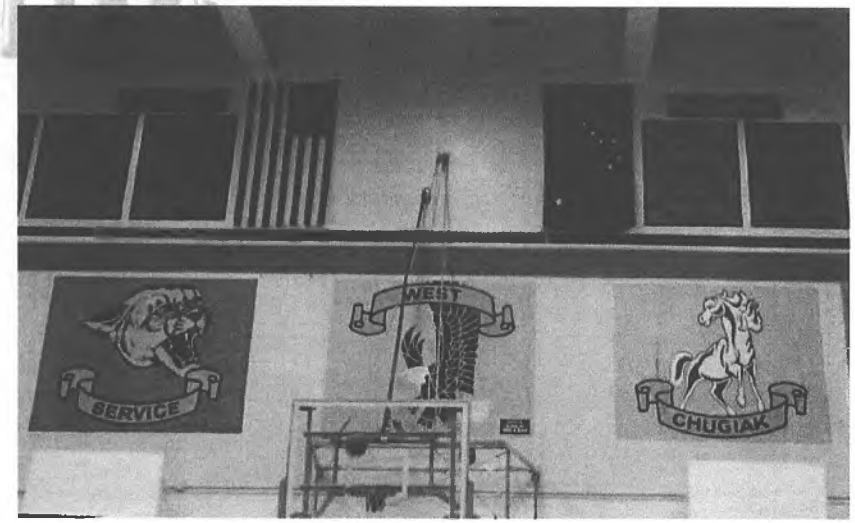
Bartlett High School

Problem – How to display the flag

Schools with the North Star displayed to the observers' left



East High School



Service High School

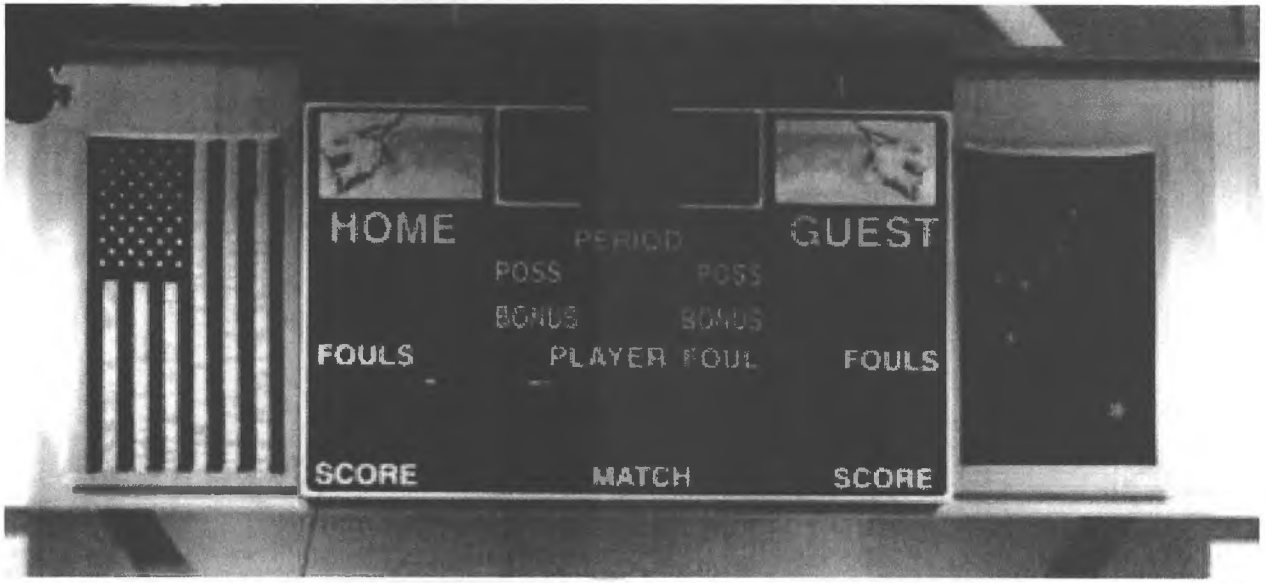
Discussion

It should be noted that in the photos above none of the schools are incorrect in how they displayed the flag. As the state has not mandated the correct way for it to be hung, there is by logical extension no incorrect way.

This lack of guidance has resulted in a random and inconsistent manner of display that renders our state flag no respect. For the sake of being consistent in our method of display, it is essential that our state legislature establish a statue that will result in a uniform method of displaying the flag.

Recommendation

While neither method of display seems to have significant advantages over the other, the cadets of Dimond JROTC would like to recommend that the statute be worded to mandate that when hung vertically from a wall, that the North Star be displayed to the observer's right (a.k.a. "the flag's own left") as in the photo below.



Problem – How to fold the flag

The Alaska Statutes (listed above) also do not give an explanation for how to properly fold the state flag. Generally, there are two common options.

•Fold the flag in a triangle utilizing the same techniques used to fold our national colors

•Fold the flag in a rectangle

As was the case with displaying the flag, This has caused confusion and non-uniformity in how institutions are folding the flag. It seems that each facility is basically left to its own devices to do what it thinks is best.

Discussion

As was the case with the display of the flag, neither options seems to have significant advantages over the other. Certainly it seems a logical extension to use the same method of folding the national colors when folding our state flag. But also, it seems fitting to keep that method "sacred" and reserve it for our national colors only, and to use a "lessor" technique for our state flag.

Recommendation

After much thought and deliberation, the cadets of Dimond JROTC would like to recommend that the triangle technique used for our national colors be reserved for it alone, and we opt to fold our state flag in a rectangle.

Part of our motivation in this recommendation is respect for our national flag, and part is a passionate belief in the uniqueness of Alaska and a desire to reflect that in how we fold our flag. After much trial and error, we have developed a technique that is neither complicated or cumbersome, and yet when done properly, results with the North Star – the defining emblem of our state – being displayed on top of the flag. The slides that follow describe how this is done.

Recommendation

With the flag held horizontally and with the north star in the upper right corner from the camera's perspective…

Recommendation

Fold the flag width-wise.

Recommendation

When done, the open edge is away from and the folded edge is toward the camera.

Recommendation

Fold the flag width-wise a second time.

Recommendation

As before, when done, the open edge is away from and the folded edge is toward the camera.

Recommendation

Fold the flag length-wise.

Recommendation

When done, the open edge is to the right and the folded edge is to the left as viewed by the camera.

Recommendation

Fold the flag length-wise a second time.

Recommendation

(Continued)

Recommendation

As before, when done, the open edge is to the right and the folded edge is to the left as viewed by the camera.

Recommendation

Fold the flag length-wise a third time.

Recommendation

As before, when done, the open edge is to the right and the folded edge is to the left as viewed by the camera.

Recommendations

When properly folded, the North Star will be visible on the top of the flag.

Summary

Through our research and experience, we have seen that the Alaskan flag has no proper method of display or folding. This can be seen in many schools and other public institutions regulated by the government.

Just as the United States has a thorough flag code, we would like to propose putting in a more valid and descriptive flag code for the state of Alaska.

This in turn would remedy the confusion of how to display and fold the flag create and create uniformity throughout our public and governmental institutions.

We firmly believe that this project would provide for the betterment of our school, community, and state. We urge you to consider our proposal and help guide us in this matter.

Alaska Association of Secondary School Principals P.O. Box 83530 Fairbanks, AK 99708

AASSP Resolution in Support of the Dimond HS JROTC Flag Project

Whereas Alaska statutes that govern the state flag currently contain no instruction on how to fold the flag, and

Whereas Dimond HS ROTC cadets have identified a lack of uniformity in how schools hang the flag against a wall (some hang with the North Star to the right, and some to the left), and

Whereas the cadets have identified a need for uniformity and procedures for handling and hanging the flag as part of their "service learning project" that is part of the JROTC curriculum, and

Whereas the cadets are prepared to research this issue, produce recommendations and seek a sponsor to introduce legislation to correct the current omissions in Alaska law by proposing legislation to amend the statutes,

Now therefore be it resolved that the Board of Directors of the Alaska Association of Secondary School Principals expresses its interest in and support for this project of the Dimond HS JROTC.

Alaska's Flag

Words by Marie Drake and music by Elinor Dusenbury

Eight stars of gold on a field of blue–
Alaska's flag. May it mean to you
The blue of the sea, the evening sky,
The mountain lakes, and the flow'rs nearby;
The gold of the early sourdough's dreams,
The precious gold of the hills and streams;
The brilliant stars in the northern sky,
The "Bear" –the "Dipper"– and, shining high,
The great North Star with its steady light,
O'er land and sea a beacon bright.
Alaska's flag–to Alaskans dear,
The simple flag of a last frontier.

Booklet edited by Jeanne Ostnes

HOISTING AND LOWERING; PASSING IN PARADE OR REVIEW

(a) The state flag should be hoisted briskly and lowered ceremoniously.

(b) During the ceremony of hoisting or lowering the state flag or if the flag is passing in a parade or in review:

(1) each citizen of this state who is present and not in uniform should:

(a) face the state flag and stand at attention with the person's right hand over the heart ; and

(b) if wearing a head covering that is easy to remove, remove the head covering with the right hand and hold it at the person's left shoulder, with the person's hand over the heart;

(2) each person who is present and in uniform should make a military salute; and

(3) each person who is present but not a citizen of this state should stand at attention.

(c) The salute to the state flag in a moving column shall be made at the moment the state flag passes that person.

RETIREMENT OF STATE FLAG MANNER OF RETIREMENT

(a) If a state flag is no longer useful due to fading, damage or wear and tear it should be destroyed by burning, in a ceremony or dignified way that emphasizes its honor as a fitting symbol for this state.

(b) It is recommended that retirement of the state flag be a public ceremony under the direction of uniformed personnel representing a state or national military service or a patriotic society, but the state flag may be retired in a private ceremony.

DISPLAY LIMITATIONS

(a) The state flag should not:

(1) touch anything beneath it, including the ground or floor;

(2) be dipped to any person or thing, except as a mark of honor for the United States flag;

(3) trail in water;

(4) have placed on any part of it, or attached to it, any mark, word, figure, design, picture, device or drawing;

(5) be used or stored in a manner in which it can easily be soiled or damaged;

(6) be used as a receptacle for receiving, holding, carrying, or delivering anything;

(7) be displayed on a float in a parade, except from a staff or in the manner provided by horizontal or vertical section of this statute

(8) be draped over the hood, top, side, or back of any motor vehicle, train, boat, or aircraft;

(9) be used as bedding, clothing, drapery or used as bunting;

(10) be festooned or drawn back or up in folds, but instead allowed to fall free; or

(11) be used as a covering for a ceiling.

(b) Advertising should not be fastened to a flagpole, flagstaff, or halyard on which the state flag is displayed.

STATE FLAG AS FEATURE OF UNVEILING CEREMONY

(a) The state flag should form a distinctive feature of the ceremony of unveiling a statue or monument.

(b) The state flag should not be used as the covering for the statue or monument.

History of the Alaska Flag Project

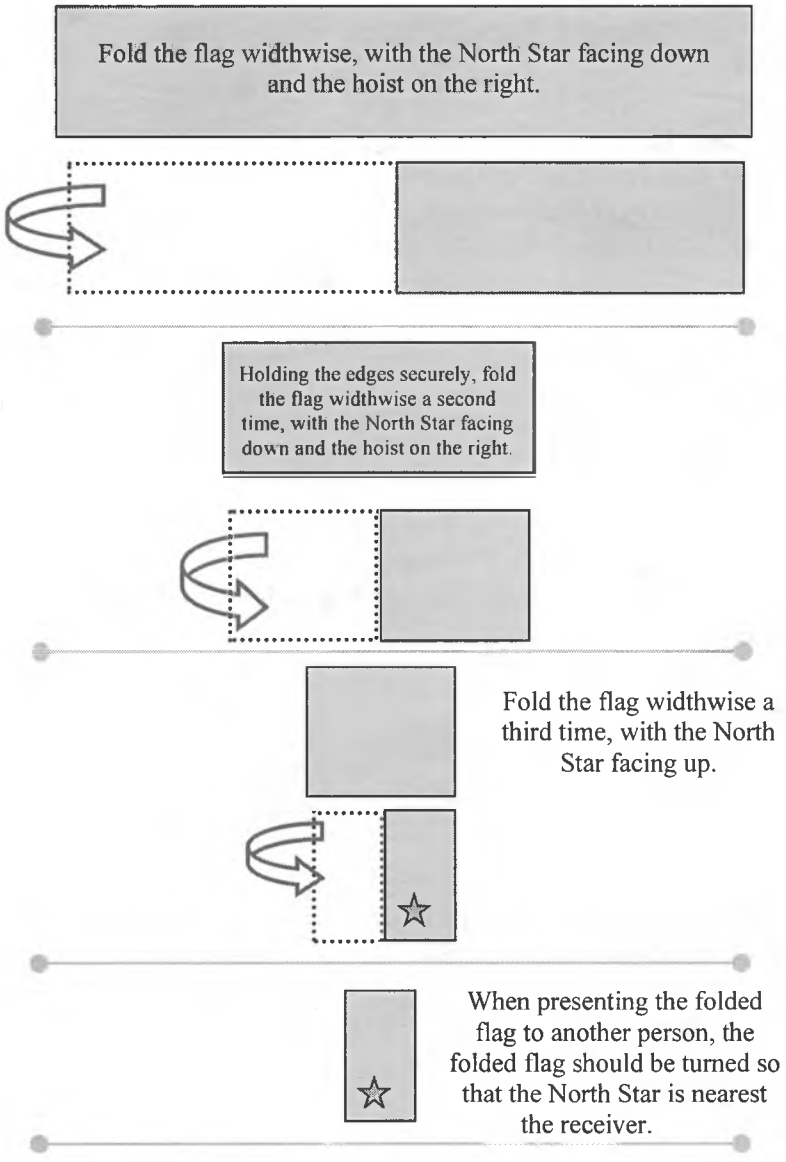
As part of JROTC curriculum, "Service Learning Project", the cadets of the A. J. Dimond High School Junior Reserve Officers Training Corps (JROTC) Program realized there were several issues concerning the handling of Alaska's state flag. While doing research during the 2009 school year for a flag retirement ceremony JROTC became aware of omissions from state statutes governing Alaska's flag. The following three items are recommended for inclusion in statute:

1. There is no proper method stipulated for displaying the flag against a wall. This has caused a great deal of confusion and non-uniformity in how institutions are displaying the flag. This lack of guidance has resulted in a random and inconsistent manner of display that shows no respect to our state flag.

2. Since there is no proper method stipulated for folding the flag, they opted to fold our state flag in a rectangle. Part of the motivation is a passionate belief in the uniqueness of Alaska and a desire to reflect that distinctiveness in how we fold our flag. After much trial and error, they developed a technique that is neither complicated or cumbersome and yet, when done properly, results with the North Star – the defining emblem of our state – being displayed on top of the flag when it is presented to another.

3. The manner of retirement needed more ceremony. They felt that it should be encouraged that retirement of the state flag be a public ceremony under the direction of uniformed personnel representing a state or national military service or a patriotic society. However, as in the current statute, the state flag may be retired in a private ceremony.

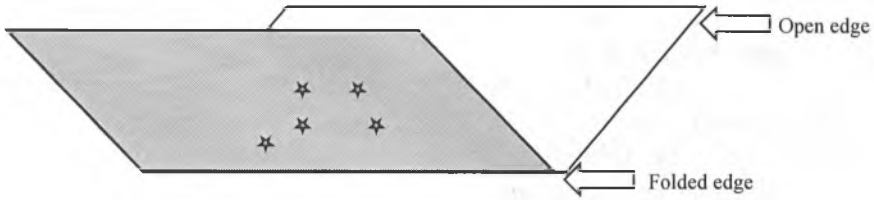
Steps 4, 5, 6 and 7



Step 1

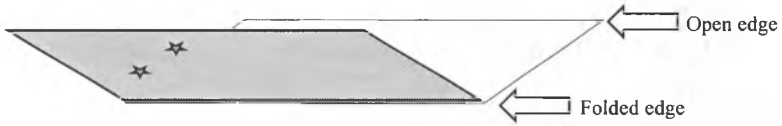
To properly fold the flag, begin holding the flag waist-high with another person, so that the flag is parallel to the ground and the hoist is on the left; the North Star is in the upper right corner from the observer's frontal view.

Step 2



Fold the flag lengthwise with the open edge up. Holding edges securely, rotate the flag so that five stars are facing up.

Step 3



Fold the flag lengthwise a second time, with the open edge up. Holding the edges securely, rotate the flag so that two stars a facing up.

Just as the United States has a thorough flag code, this booklet proposes putting in a more valid and descriptive flag etiquette code for the State of Alaska.

This in turn would remedy the confusion of how to display the state flag in numerous situations, fold the flag and dispose of a flag to create uniformity throughout our public and governmental institutions.

Eight Stars of Gold: The Story of Alaska's Flag

"The story of Alaska's flag is a unique and important part of 20th century Americana. What began in 1927 as a flag design contest resulted in the remarkable story of 13-year old Benny Benson and how his winning entry provided a flag for Alaska and a symbol of independence during the statehood campaign. Benny's design was simple yet elegant: eight stars of gold in the shape of the Ursa Major constellation (the Big Dipper) set against a deep blue backdrop representing Alaska's sky and forget-me-not flower. Benny's creation helped designate the forget-me-not as the Alaska state flower. This inspired Marie Drake to write a poem and, later, Elinor Dusenbury to set it to music and create Alaska's official song: Alaska's Flag."

India Spartz, Guest Curator
Alaska State Museums

DISPLAY STATE FLAG MOUNTED ON FLAGSTAFF

(a) If the state flag is mounted on a flagstaff:

(1) the flag should be attached at the peak of the staff;

(2) the staff should be at least 2-1/2 times as long as the flag's hoist; and

(3) if the staff has a finial, the finial should be a spear-head or a spade.

(b) If the state flag is permanently mounted on a flagstaff:

(1) the flag may be decorated with gold fringe.

DISPLAY OUTDOORS

(a) The state flag should not normally be displayed outdoors before sunrise or after sunset.

(b) For patriotic effect, the state flag may be displayed outdoors:

(1) 24 hours a day, if properly illuminated during darkness; or

(2) in the same circumstances that the flag of the United States may be displayed.

(c) The flag of the United States and the flag of the State of Alaska shall be displayed daily, weather permitting, in the following places:

(1) on or near the main administration building of every institution under the authority or control of the state government;

(2) in or near every schoolhouse during school days.

DISPLAY ON FLAGPOLE OR FLAGSTAFF WITH OTHER FLAG: IN GENERAL

(a) A flag or pennant, other than the flag of the United States, displayed with the state flag:

(1) should not be above the state flag; or

(2) if the other flag or pennant is at the same height as the state flag, it should not be, from the perspective of an observer, to the left of the state flag.

CARRYING OF STATE FLAG: IN GENERAL

(a) The state flag should, when practicable, be carried aloft and free, not flat or horizontally.

FOLDING THE STATE FLAG FOR PRESENTATION:

(a) When folding the state flag, the following procedure shall be followed, whenever possible:

(1) hold flag waist-high with an assistant, so that the flag is parallel to the ground and the hoist is on the left; the North Star in the upper right corner from an observer's view;

(2) fold the flag lengthwise with the open edge up;

(3) folding edges securely, rotate the flag so that five stars are facing up;

(4) fold the flag lengthwise a second time, with the open edge up;

(5) folding the edges securely, rotate the flag so that two stars are facing up;

(6) fold the flag widthwise, with the North Star facing down and the hoist on the right;

(7) holding the edges securely, fold the flag widthwise a second time, with the North Star facing down and the hoist on the right;

(8) fold the flag widthwise a third time, with the North Star facing up.

(b) When presenting the folded flag to another person, the folded flag should be turned so that the North Star is nearest the receiver.

(See Illustrations, pages 12 and 13)

DISPLAY OVER A STREET

(a) If the state flag is displayed over a street, the flag should be suspended vertically with the hoist on top. If the street is an east-west street the North Star should be south. If the street is a north-south street the North Star should be east.

DISPLAY ON SPEAKER'S PLATFORM

(a) If the state flag is displayed flat on a speaker's platform, the flag should be displayed above and behind the speaker.

(b) If the state flag and the flag of the United States are displayed on a speaker's platform, the state flag should be, from the perspective of an observer, to the right of the United States flag.

DISPLAY ON A CASKET

(a) If the state flag is used to cover a casket, the flag should be placed so that:

(1) the hoist is at the head of the casket; and

(2) the North Star is over the left side of the casket looking head to toe.

(b) The state flag should not be lowered in the grave or allowed to touch the ground.

CARRYING IN PROCESSION WITH OTHER FLAGS.

(a) If the state flag is carried in a procession with another flag, other than the flag of the United States, the state flag should be on the marching right. If there is a line of other flags in the procession, the state flag should be in front of the center of that line.

(b) If the flag of the United States is carried in a procession with the state flag, the flag of the United States should be on the marching right.

DISPLAY ON FLAGPOLE OR FLAGSTAFF WITH FLAG OF UNITED STATES

(a) If it is necessary for the state flag and the flag of the United States to be displayed on the same flagpole or flagstaff, the United States flag should be above the state flag.

(b) If the state flag and the flag of the United States are displayed on flagpoles or flagstaffs at the same location:

(1) the flags should be displayed on flagpoles or flagstaffs of the same height;

(2) the flags should be of approximately equal size;

(3) the flag of the United States should be, from the perspective of an observer, to the left of the state flag;

(4) the flag of the United States should be hoisted before the state flag is hoisted; and

(5) the state flag should be lowered before the flag of the United States is lowered.

DISPLAY ON FLAGPOLE OR FLAGSTAFF WITH FLAGS OF MUNICIPALITIES, OR LOCALITIES, OR ORGANIZATIONS

(a) If the state flag is displayed on a flagpole or flagstaff with a group of flags or pennants of municipalities, localities, or organizations that are displayed on flagpoles or flagstaffs, the state flag should be at the center and at the highest point of the group.

(b) If the state flag is displayed on the same halyard as a flag or pennant of a municipality, locality, or organization, the state flag should be at the peak.

(c) If the state flag and the flag or pennant of a municipality, locality, or organization are displayed on adjacent flagpoles or flagstaffs:

(1) the state flag should be to the left of the flag or pennant of the municipality, locality, or organization;

(2) the state flag should be hoisted before the flag or pennant of the municipality, locality, or organization is hoisted; and

(3) the flag or pennant of the municipality, locality, or organization should be lowered before the state flag is lowered.

DISPLAY ON FLAGPOLE OR FLAGSTAFF WITH FLAGS OF OTHER NATIONS, OR INTERNATIONAL ORGANIZATIONS.

(a) If the state flag is displayed with the flag of another nation other than the United States, or of an international organization:

(1) the nation's or international organization's flag should be to the left of the state flag;

(2) the state flag should not be above the other flag on the same flagpole or flagstaff or on a taller flagpole or flagstaff than the flagpole or flagstaff on which the other flag is displayed.

(b) This section does not apply to the United States, including the armed services, if federal custom or practice requires another manner of display.

DISPLAY WITH OTHER FLAG ON CROSSED FLAGSTAFFS

(a) If the state flag is displayed with another flag, other than the flag of the United States, against a wall on crossed flagstaffs, the state flag should:

(l) be, from the perspective of an observer, to the left of the other flag; and

(2) have its flagstaff in front of the flagstaff of the other flag.

(b) If the state flag and the flag of the United States are displayed against a wall on crossed flagstaffs, the state flag should:

(l) be, from the perspective of an observer, to the right of the flag of the United States; and

(2) have its flagstaff behind the flagstaff of the United States flag.

DISPLAY ON FLAGPOLE OR FLAGSTAFF WITH FLAGS OF OTHER STATES

(a) If the state flag is displayed with the flag of another state of the United States, the state flag:

(1) should be, from the perspective of an observer, to the left of the other flag on a separate flagpole or flagstaff.

DISPLAY HORIZONTAL AND VERTICAL

(a) Horizontal display of the flag shows the North Star in the upper right corner

(b) Vertical display of the flag shows the hoist to the top and the North Star to the right of the observer's frontal view.

DISPLAY FROM OR IN A BUILDING

(a) If the state flag is displayed from a flagstaff that projects horizontally or at an angle from a building, the top of the flag should be placed at the peak of the staff unless the flag is at half staff.

(b) If the state flag is suspended over a sidewalk from a rope that extends from a building to a pole at the edge of a sidewalk, the flag should be hoisted from the building so the North Star is nearest to the pole.

(c) If the state flag is suspended across a corridor or lobby in a building that has only one main entrance, the flag should be suspended vertically with the hoist at the top and the North Star to the right of the observer entering the building. If the building has more than one main entrance, the state flag should be suspended vertically near the center of the corridor or lobby. If the entrances are on the east and west faces of the building, the North Star should be to the east. If the entrances are on the north and south faces of the building the North Star should be to the east. If the entrances on more than two faces of the building the North Star should be to the east.

(d) If the state flag is displayed in a window, the North Star should be on the right side from the perspective of an observer who is outside the window.

MEMORANDUM

TO: Senator Bill Wielechowski, Chair
Senate State Affairs Committee

FROM: Representative Craig Johnson, Chair
House Rules Committee

DATE: March 29, 2011

SUBJECT: Scheduling Request for CSHB 101 (STA) Pending Referral

---

On behalf of House Rules, I respectfully request that CSHB 101 (STA) "An Act establishing Ted Stevens Day," be considered for scheduling in your committee at your earliest convenience.

At the Stevens family's request, the date has been changed from the late Senator's birthday to the fourth Saturday of July, which is reflected in the CS for HB 101 (STA).

Attached is the CSHB 101 (STA), a copy of the original bill, the sponsor statement and backup documentation.

If you have any questions or need additional information, feel free to contact me or my staff, Erin Shine, at 465-4993.

Thank you for your consideration of this request.

Sponsor Statement for Committee Substitute for House Bill 101(STA)

Ted Stevens Day

On August 9, 2010 Alaska lost Senator Theodore "Ted" Fulton Stevens, a man who dedicated his life to Alaska. He continually fought to build a better future for Alaskans during his six decades of public service, including 40 years in the United States Senate.

CSHB 101 (STA) establishes the fourth Saturday of every July as "Ted Stevens Day." In 2010 Governor Parnell proclaimed Senator Stevens' birthday, November 18th as "Senator Ted Stevens Day." While Senator Ted Stevens' loved ones consider this a great way of remembering him, they have asked that we observe "Ted Stevens Day" in the summer where Alaskans can spend the day honoring his memory in the outdoors. The date change has been approved by House State Affairs Committee.

It seems only right and fitting that we should honor Senator Ted Stevens with a day of remembrance and celebration when Alaska's great outdoors is in full bloom. Amidst unparalleled beauty from majestic fjords and mountain peaks to salmon streams and fish camps, Alaskans will pause and remember this Great Alaskan – who was as grand as any who have come before, or any who will ever come again.

Alaskans will be eternally indebted to "Uncle Ted" for always putting Alaska first. By doing so with unwavering dedication and tremendous skill and energy, Senator Ted Stevens transformed Alaska into the great place it is today. His accomplishments are as legendary as he was – and made possible opportunities for future generations of Alaskans.

(Revised 12/29/2010 OMB)

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 101(STA)

Analysis

This fiscal note has zero impact on the Legislative Affairs Agency.

STATE OF ALASKA

Executive Proclamation by Governor Sean Parnell

WHEREAS, motivated by a desire to serve and a passion for the state he called home, United States Senator Theodore "Ted" Fulton Stevens dedicated his life to building a better future for Alaskans; and

WHEREAS, following the call to duty, a young Ted Stevens joined the Army Air Corps during World War II. His passion and respect for the United States Armed Services shaped his later career in the United States Senate, where he established a reputation as a staunch supporter for America's military, and an advocate for our men and women in uniform; and

WHEREAS, from his position in the United States Department of the Interior in President Eisenhower's administration, Senator Stevens advanced Alaska's bid for statehood, and his efforts helped to secure Alaska's place as the 49th star on the United States flag; and

WHEREAS, the Senator's efforts to strengthen Alaska's economy, including the timber, oil and gas, fishing, and telecommunications industries brought prosperity, jobs, and opportunities to the state, and his dedication to the passage of such landmark legislation as the Trans Alaska Pipeline Authorization Act ensured the development of Alaska's natural resources; and

WHEREAS, in addition to building Alaska's economy, Senator Stevens was committed to protecting the rights of Alaska's indigenous peoples, and worked hard to gain passage of the Alaska Native Claims Settlement Act of 1971 just three years after he joined the Senate; and

WHEREAS, a dedicated husband, father, grandfather, and friend, Senator Stevens treated all Alaskans as though they were his family, protecting and fighting for our futures, jobs, and rights. Known as "Uncle Ted," all Alaskans are indebted to the man who put his state first and built a better future for all.

NOW, THEREFORE, I, Sean Parnell, Governor of the State of Alaska, do hereby proclaim November 18, 2010 as:

Senator Ted Stevens Day

in Alaska, and encourage all citizens to honor the memory of Alaska's former Senator by gathering to remember the spirit and vigor with which he served Alaskans for six decades, and to give thanks for his service and the future he forged for Alaskans.

Dated: August 18, 2010

Sean Parnell, Governor
who has also authorized the seal of the State of Alaska to be affixed to this proclamation.

THE ALASKA LEGISLATURE

* HONORING *

* SENATOR TED STEVENS *

The Twenty-sixth Alaska State Legislature recognizes United States Senator Ted Stevens for over 40 years of distinguished service to the state of Alaska and the United States of America.

Senator Stevens dedicated his life to public service. In World War II he flew planes in support of the legendary Flying Tigers and in recognition of his bravery received the Distinguished Flying Cross and an Air Medal. He served as U.S. Attorney in Fairbanks, after being nominated by President Eisenhower. He later transferred to the Department of the Interior where he served as Legal Counsel and Solicitor General. He was elected twice to the Alaska House of Representatives and served a term as Majority Leader. In 1968, he was appointed to the United States Senate by Governor Hickel to finish the term of Senator Bob Bartlett, and was re-elected six times.

"Uncle Ted" played key roles in legislation that shaped Alaska's development, including the Alaska Native Claims Settlement Act, the Trans-Alaska Pipeline Authorization Act, and the Alaska National Interest Lands Conservation Act. His contributions didn't end there.

Recognizing the importance of a military presence in Alaska, he has educated the national public on the geographic importance our state plays on the world stage and secured funding and support for the military in Alaska, including National Guard operations.

Always at the forefront of safe and conscientious resource development, Senator Stevens led the fight for Congressional authorization of the Trans-Alaska oil pipeline and has helped secure federal permits and a federal loan guarantee for the Alaska natural gas pipeline. In addition to these efforts, Senator Stevens promoted safer oil transport through laws requiring double hulled tankers, got funding for an extensive Department of Defense environmental restoration program and promoted sound fishing practices through the Magnuson-Stevens Act, which extended U.S. fishery jurisdiction to 200 miles offshore and established the regional fishery management system.

Whether people remember him for his continued work on the opening of ANWR to responsible development or championing issues such as Title IX which secured equal access for women to education and sports, everyone can be sure that when he dons his Hulk tie, he will aggressively and tenaciously work for what's right for Alaskans. As his motto, "To hell with politics, do what's right for Alaska," can attest.

Senator Stevens' longtime friend Democratic Senator Daniel Inouye, Hawaii, refers to Senator Stevens as "brother." We should only be so lucky. It is with highest respect and admiration that the Twenty-sixth Alaska State legislature salutes Senator Ted Stevens for his 40 plus years of continued service and dedication to the great state of Alaska and the United States of America.

MEMORANDUM

TO: Senator Bill Wielechowski, Chair
Senate State Affairs Committee

FROM: Representative Max Gruenberg

DATE: April 13, 2011

RE: HB 129 – Deceased Veteran Death Certificate

****

Please consider this memo as a request for House Bill 129 to be heard in the Senate State Affairs Committee. Accompanying this memo are the following documents:

- CSHB 129(FIN) (27-LS0450\I)
- CSHB 129(MLV) (27-LS0450\B)
- HB 129 (27-LS0450\A)
- Sponsor Statement
- Explanation of Changes
- Example Death Certificate
- Fiscal Note

Thank you for considering my request for a hearing on HB 129. Please contact my legislative aide, Gretchen Staft, at 465-4940 with any questions.

House Bill 129:
Deceased Veteran Death Certificate

Explanation of Changes
CS for HB 129 (FIN) (27-LS0450\I) to SCS for CS for HB 129( ) (27-LS0450\D)

There were three changes from the House Finance Committee version introduced before the committee to the most recent blank Senate Committee Substitute.

1. The title (page 1, line 1) was changed to reflect that more than one death certificate would be produced free of charge.

2. Language on page 2, lines 22-25 of both versions was clarified to show that there would be only four free death certificates given out per deceased veteran. The previous language was unclear as to whether four free death certificates were to be given per deceased veteran or whether four free death certificates were to be given per claimant (i.e. whether for the same decedent, a wife, a mother, a son, etc. could each get four). The CS makes it clear that only a total of four free death certificates can be given out for each deceased veteran.

3. Language was added (page 2, line 26-page 3, line 2 of the "D" version) to clarify that only certain individuals could claim the deceased veteran's free death certificates. These individuals are:

    - A personal representative of the veteran's estate;
    - A trustee of a revocable trust of which the veteran was the settlor; or
    - A person who needs a copy of the veteran's death certificate to claim a benefit related to the death of the veteran.

    These claimants are not prioritized; the first in time will prevail.

HB 129
DEATH CERTIFICATES FOR DECEASED VETERANS

Sponsor Statement

House Bill 129 provides a death certificate, without cost, to a surviving spouse, next of kin, or other relative of a deceased veteran. The bill is modeled after an Arizona statute and will provide one copy to the eligible recipient. HB 129 demonstrates the state's respect for Alaska's veterans and their families and will provide a valuable service to military families in their time of bereavement.

If you have any questions about the bill, please contact my legislative aide, Gretchen Staft, at 465-4940.

Thank you for your consideration of House Bill 129.

HB 129
DEATH CERTIFICATES FOR DECEASED VETERANS

Explanation of Changes

Changes between HB 129 (27-LS0450\A) and CSHB 129(MLV) (27-LS0450\B):

Paragraph (i) on page 3, lines 4-10 of HB 129 was restructured, incorporating the following changes:

1) References to the Coast Guard and Coast Guard Reserves were omitted in the CS because they are a branch of the "armed services," which is already included in the paragraph.

2) References in HB 129 to "Alaska Army National Guard" and "Alaska Air National Guard" were eliminated in the CS, and "National Guard" was substituted as an umbrella term.

These are stylistic changes and are in no way intended to exclude any service members covered in the original bill.

Changes between CSHB 129(MLV) (27-LS0450\B) and CSHB 129(FIN) (27-LS0450\I):

Page 2, lines 22-25: Instead of issuing one free death certificate to each eligible recipient, the Bureau of Vital Statistics is authorized to issue up to four free certified copies of a death certificate for a deceased veteran, regardless of who makes the request.

The definition of "eligible recipient" was deleted (page 2, line 26 to page 3, line 2 of CSHB 129 (MLV)).

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 129(MLV)

Analysis:

Under this bill family members or representatives (executors, etc.) of deceased veterans may each request one free certified copy of the veteran's death certificate. This bill would allow many members or representatives of the veteran's family to separately request a free death certificate.

This bill will reduce the Bureau of Vital Statistics (BVS) program receipts/fees by an estimated $75.0 in the first year, increasing each year to a projected loss of $100.0 by Year 5. Because BVS relies substantially on fees to support its operating costs, any loss of these program receipts will have an immediate impact on staffing and quality of service to the public if not replaced by general funds. About 3% of the FY11 budget for BVS is GF ($91.1). In contrast, 80% of the BVS budget for FY11 comes from program receipts (GF/Pgm).

The Bureau estimates that initially 75% of veteran's families will be aware of the bill, increasing to nearly 100% over five years. About 30 percent (approximately 1000 deaths) of total deaths in Alaska per year indicate the decedent was a veteran. It is estimated that between three to five family members (or executors) will qualify for a death certificate at no charge (families have been known to request as many as 40 copies of a death certificate). Assuming 3 to 4 certificates per death, the impact to the Bureau is projected to be between 3,000 to 4,000 certificates issued at no charge annually. The fee for a death certificate is $25. It is anticipated the impact would be comparatively less for the first few years and then increase as more families become aware of the new law.

The fiscal impact will be approximately $75.0 for the first year the legislation is in effect ($25 x 3,000 certified copies, assuming just 750 families will request on average four certificates each in the first year), increasing to $100.0 by Year 5 ($25 x 4,000 certified copies) as more people become aware of the new benefit provided by this law. The Bureau will experience a greater loss of revenue if this bill generates more than four requests per death, or if the number of decedents who are veterans exceeds 1000 in a year. If the current level of staffing and service to the public is to be maintained, these lost program receipts will have to be replaced with GF.

RE: Request for a hearing of HB 169

Enclosed is the committee packet for HB 169, "*an Act relating to the review of proposed regulations by the Legislative Affairs Agency; and providing for an effective date*" also called "LAA Review of Proposed Regulations." I have included a sponsor statement, the original version of the bill, and a memo from Legal Services.

I would appreciate a hearing before the State Affairs Committee at your earliest convenience. I appreciate your time and look forward to your reply.

Please contact my staff member, Melanie Lesh at 465-4990, with any questions or comments regarding this request.

Thank you for your consideration.

Sponsor Statement
HB 169

"An Act relating to the review of proposed regulations by the Legislative Affairs Agency; and providing for an effective date."

HB 169 closes gaps in the regulation review statutes. The Legislative Affairs Agency (LAA) attorneys review proposed regulations, including those from newly enacted legislation and at the request of a standing committee, the Administrative Regulations Review Committee, and the Legislative Council. However, if the attorney finds that the proposed regulations fail to meet statutory standards, the only legislative entities they are allowed to notify are the Administrative Regulation Review Committee, the Speaker of the House, and the President of the Senate. Additionally, LAA cannot currently notify anyone if the regulation meets statutory standards.

HB 169 allows LAA to notify the committee or council that requested the review that the regulations do not meet statutory standards. In addition, if the proposed regulation implements newly passed legislation, LAA would be able to consult with and notify the prime sponsor of that legislation, if the prime sponsor is still a sitting legislator. Finally, HB 169 allows LAA to notify the requester of the review if the attorney determines that the regulations meet statutory standards.

HB 169 is a simple fix to two minor problems in an otherwise functioning review system. It will give the benefits of the review process to those who need it most.

MEMORANDUM February 18, 2011

SUBJECT: Review of Proposed Regulations by the Legislative Affairs Agency (Work Order No. 27-LS0559\A)

TO: Representative Carl Gatto
Chair of the House Judiciary Committee

FROM: Terri Lauterbach
Legislative Counsel

Enclosed is a draft of a bill you requested to "fix some flaws" in AS 24.20.105, as we discussed after the meeting of the Administrative Regulation Review Committee (ARRC) on Tuesday.[1]

Section 1. This section of the bill accomplishes several things:

(1) The new language on page 1 allows the reviewing attorney in LAA to consult with the prime sponsor of the relevant bill if the attorney is reviewing proposed regulations that implement newly enacted legislation. You only asked specifically for the prime sponsor to get copies of memos denoting possible legal flaws determined in these kinds of reviews, but I thought it was probably in keeping with your goal to also add this consultation aspect as well. Let me know if I erred in this regard and I can remove the language. Also, please note that I have limited this consultation requirement to situations when the prime sponsor is still a member of the legislature. In addition to the logistics that may be difficult when the prime sponsor is no longer a member, it seems to me in keeping with the confidential nature of these reviews that only sitting legislators be included in the review process under AS 24.20.105.

(2) The first two lines on page 2 allow LAA review memos to be sent to a standing committee or to the Legislative Council if they have requested a review of some proposed regulations because of their "major policy implications." Under current law,

---

[1] Although I drafted the enclosed bill, Lisa Kirsch's name appears in the upper right-hand corner of page 1. This has been done so that, if you introduce the bill, legislators and staff will have a full-time attorney to call with questions or amendments related to the bill. As I mentioned at the ARRC meeting, I am only half-time. Lisa Kirsch reviewed proposed regulations under AS 24.20.105 for most of the past three years, and is knowledgeable about the issues addressed in this bill draft. Feel free to call either one of us about the draft.

these entities can request a review and that request is given priority status under AS 24.20.105(b)(2), but the law, through an oversight in the original legislation, does not allow them to get the memo that could result from the review. Current law allows these memos to go only to the Department of Law, the state agency proposing the regulations, the ARRC, the senate president, and the speaker of the house. (See AS 24.20.105(e) and the restriction on LAA's disclosure under AS 24.20.105(g).)

(3) Lines 3 - 7 on page 2 allow LAA review memos to be sent to the prime sponsor of the relevant legislation if a review of proposed regulations that implement newly enacted legislation shows legal problems of the type described in AS 24.20.105(d). As with the consultation requirement for prime sponsors described above in (1), I have limited this memo-sharing requirement to prime sponsors who are still sitting legislators.

(4) Lines 7 - 10 on page 2 require LAA to communicate to a standing committee or the Legislative Council the results of a review that was requested by either of them in situations where the reviewer has not found legal flaws. Currently, AS 24.20.105 only allows LAA to communicate with respect to reviews where legal flaws are perceived, and that makes sense with respect to the vast number of reviews, as the relevant entities would normally be interested only if the reviewing attorney sees problems. However, with respect to a review requested under AS 24.20.105(b)(2), it seems to me that it would make sense for LAA to be able to respond that a review has been completed but that no problems were found. I have deliberately not required this communication to be in writing so that a phone call could suffice; the requester, of course, could always request that the "no problems" response be in writing.

Sec. 2. This section clarifies that the new provisions of section 1 apply to any reviews ongoing in LAA at the time the bill takes effect even if the notice of proposed regulations was issued before the effective date of the bill.

Sec. 3. This section gives the bill an immediate effective date. There are no impediments I can think of that would keep LAA from immediately being able to implement any of the new provisions of section 1.

TML:LMK:ljw

Enclosure

Sec. 24.20.105. Review of proposed regulations.

(a) The Legislative Affairs Agency may review each proposed regulation that is subject to AS 44.62.010 - 44.62.300 (Administrative Procedure Act). A review of proposed regulations under this section must be conducted by an attorney employed by that agency.

(b) Reviews shall be conducted under (a) of this section in the following order of priority:

(1) proposed regulations that would implement newly enacted legislation;

(2) proposed regulations requested in writing to be reviewed by a standing committee, the Administrative Regulation Review Committee, or the legislative council as implicating major policy development.

(c) Under AS 44.62.190(a)(7), the notice of proposed action, along with a copy of the proposed regulation, shall be furnished electronically by the state agency to the

(1) Legislative Affairs Agency;

(2) chairs of the standing committees with jurisdiction over the subject of the proposed regulation;

(3) Administrative Regulation Review Committee;

(4) legislative council.

(d) Within available staff resources and priorities set by the legislative council, the Legislative Affairs Agency shall assign one or more attorneys to conduct a review of proposed regulations. The review shall evaluate

(1) the legality and constitutionality of the proposed regulation;

(2) whether the state agency has statutory authority to adopt the proposed regulation to implement, interpret, make specific, or otherwise carry out a statute; and

(3) whether the proposed regulation is consistent with the applicable statutes.

(e) In conducting its review under this section, the assigned attorney may consult with the Department of Law, the committee or council that requests the review under (b)(2) of this section, and the state agency proposing the regulation change. If the assigned attorney determines that the proposed action fails to meet the standards set out in (d) of this section, the assigned attorney shall notify, in writing, the Department of Law, the state agency, the Administrative Regulation Review Committee, the president of the senate, and the speaker of the house of representatives.

(f) In addition to the review specified in (d) of this section, the assigned attorney shall notify the Administrative Regulation Review Committee, the president of the senate, and the speaker of the house of representatives of any provision of the proposed regulation that may be inconsistent with legislative intent and appropriate for additional legislative oversight as a result.

(g) Except as provided in this section, the Legislative Affairs Agency may not release any information regarding its review of a proposed regulation under this section.

(h) The process of review of a proposed regulation under this section does not affect a state agency's authority to complete its proposed action regarding the regulation. Suggestions for changes to a proposed regulation made by the Legislative Affairs Agency are not binding on a state agency.

(i) No action may be brought for the failure of the Legislative Affairs Agency to conduct a legal review under this section.

(j) The provisions of (b) - (i) of this section do not apply to proposed regulations of the Board of Game or the Board of Fisheries.

(k) In this section, "proposed regulation" means a proposed adoption, amendment, or repeal of a regulation.

History -

SENATE CS FOR CS FOR HOUSE BILL NO. 180( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES SADDLER, Feige, Herron, Fairclough, Lynn, Petersen, Gara, Gruenberg, Gardner, Muñoz, Costello, Guttenberg, Tammie Wilson, Stoltze, Thomas, Kerttula, Miller, Holmes, Tuck, Johnson, Millett, Pruitt, Kawasaki

A BILL

FOR AN ACT ENTITLED

"An Act authorizing the Department of Administration to note a person's status as a retired veteran or a veteran discharged under honorable conditions on the person's driver's license or identification card, to provide certain information to the Department of Military and Veterans' Affairs, and to charge a fee for replacing a valid driver's license or identification card with a new license or card that includes the veteran designation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.65.310 is amended by adding a new subsection to read:

(*l*) At the request of the person, the department shall provide a veteran designation and United States flag replica on an identification card identifying the person as a retired veteran or a veteran of the armed forces of the United States discharged under honorable conditions. The department may not charge a fee solely for the designation. To receive a veteran designation, the person shall provide proof of

veteran status that shows the person is retired or discharged under honorable conditions. With the approval of the person, the department shall make available to the Department of Military and Veterans' Affairs the name and address of a person receiving a veteran designation under this subsection. Notwithstanding (a) of this section, the department may charge a fee of $5 for replacement of a valid identification card with a new identification card with a veteran designation.

* **Sec. 2.** AS 28.15.111 is amended by adding a new subsection to read:

(c) At the request of an applicant, the department shall provide a veteran designation and United States flag replica on a license identifying the driver as a retired veteran or a veteran of the armed forces of the United States discharged under honorable conditions. The department may not charge a fee solely for the designation. To receive a veteran designation, the driver shall make available proof of veteran status that shows that the person is retired or discharged under honorable conditions. With the approval of the applicant, the department shall make available to the Department of Military and Veterans' Affairs the name and address of a driver receiving a veteran designation under this subsection. The department may charge a fee of $5 for replacement of a valid driver's license with a new license with a veteran designation. A replacement license with a veteran designation issued for $5 under this subsection shall retain the expiration date of the license it replaces.

* **Sec. 3.** This Act takes effect March 1, 2013.

Sponsor Statement CSHB 180 (FIN)

House Bill 180 seeks to help Alaska veterans receive more of the benefits they have earned through their sacrifice and service in uniform, and to which they are entitled by law and custom. With the approval of the person/applicant, this bill would allow the Division of Motor Vehicles (DMV) to add the United States Flag background to state drivers' licenses or identification cards signifying the holder's status as a veteran, and would allow DMV (with permission of person/applicant) to share that information with the state's veterans benefit office.

Alaska is among the most veteran-friendly states in the Union. Many businesses and organizations demonstrate their appreciation by offering various discounts, preferences and other benefits to *bona fide* veterans. However, veterans must usually prove they qualify by presenting certified copies of their discharge documents – the DD-214, DD-215, or NGB-22 forms, exposing these critical documents to wear, damage or loss.

By giving veterans a way to carry reliable and convenient proof of their status on state-issued cards, this bill would help them more easily enjoy the full range of personal, business and social benefits offered to them by a grateful state.

HB 180 could also help relieve the situation in which tens of thousands of Alaska veterans may be missing out on significant government benefits, because they have no contact with the state's Office of Veterans Affairs. Should a an applicant express interest and permission, HB 180 would allow DMV to provide the names and addresses of those who are issued veteran-designated driver's licenses or ID cards to the state veterans' office. That office could then reach out to make more veterans aware of programs available to them, and to help them receive any benefits owed to them.

I respectfully request your support for House Bill 180.

Thank you.

REPRESENTATIVE DAN SADDLER

Explanation of Changes in CSHB 180(FIN)

"An Act authorizing the Department of Administration to note a person's status as a retired veteran or a veteran discharged under honorable conditions on the person's driver's license or identification card, to provide certain information to the Department of Military and Veterans' Affairs, and to charge a fee for replacing a valid driver's license or identification card with a new license or card that includes the veteran designation; and providing for an effective date."

CS for HB 180 adopted the following changes from the State Affairs Version:

- In both sections we added provisions that the applicant or person must give *permission* to the DMV to

  (a) receive the designation on their license or ID card

  (b) forward their names/addresses to Veterans Affairs to assist in their efforts to disseminate information to all known veterans in Alaska

- In this version the Finance Committee added that it be a United States Flag designation on the card that signifies their veteran status

- CSHB 180 also allows DMV to charge $5 for the card upon renewal, a reduction from the standard $15 replacement fee

- The effective date was changed to March 2013, giving the Department of Motor Vehicles ample time to implement the technology necessary to redesign the cards and data programs for the new designation

CS FOR HOUSE BILL NO. 180(MLV)

(Revised 8/17/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSHB180
2012 LEGISLATIVE SESSION

Analysis

The effective date of this bill is March 1, 2012. For purposes of this fiscal note, the Division of Motor Vehicles (DMV) assumes the bill will be amended to take effect March 1, 2013.

Expenditures

1) The DMV's antiquated database is almost 30 years old; the way it was programmed makes it difficult to effect even minor changes.
   a) Add a 'veteran' field to DMV's database - **160 contract hours**
   The field must be added to 40-50 programs within the database; each program will have to be tested prior to deployment. Since DMV shares data with Dept of Public Safety, a field will also need to be added to the shared program, then tested and deployed.
   b) Redesign the driver's licenses and ID cards to accommodate the designation - **160 contract hours**
   With the current license/ID design, there is no space to add a designation. Either the font will need to be reduced and/or items rearranged to accommodate the veteran designation. DMV issues 40 different types of licenses and IDs. Each type will have to be modified, tested, and deployed.
   c) Create a reporting feature for notification to DMVA - **80 contract hours**
   The bill does not specify exactly what would be required. The 80 hour estimate is based on producing a scheduled weekly mainframe report showing additions only.

Total estimated contract hours: 400
Cost per hour: $143 (this is the contract rate per the State's task order system for IT professional services
Total programming cost: 400 x $143 = $57,200

2) Cost to produce duplicate licenses/IDs for existing population of Alaska veterans. DMV anticipates that 50% of qualified veterans will opt for the designator within the first year. Of those who opt for the designation in the first 12 months after the March 1, 2013, effective date, approximately one-fifth will have licenses/IDs that expire within those first 12 months; DMV will be required to issue duplicate licenses/IDs to the remaining four-fifths of veterans opting for the designator within the first 12 months.

77,000	Quantity of veterans in Alaska as of 09/30/10 per U.S. Dept. of Veterans Affairs
x 50%	Estimated percentage of veterans opting for the designator in the first 12 months
38,500	Quantity of veterans opting for the designation
-7,700	20% of veterans whose license/IDs expire within the 12 month period; DMV assumes they will NOT come in for a duplicate, but will have the desigator added at the time of renewal.
30,800	Quantity of veterans obtaining replament licenses/IDs in the first 12 months
x $.85	Cost per license/ID for printer ribbon, laminate, and card
$ 26,180	Total cost to produce replacement driver's licenses /IDs in the first 12 months (03/01/13-02/28/13)
$ 8,727	$26,180/12 x 4 months - Cost to produce replacement cards in **FY13** (03/01/13-06/30/13)
$ 17,453	$26,180/12 x 8 months - Cost to produce replacement cards in **FY14** (07/01/14-02/28/14)

Revenue

30,800	Quantity of veterans obtaining replacement licenses in the first 12 months
x $15	Duplice License fee
$ 462,000	Estimated additional revenue collected in the first 12 months (03/01/13-02/28/14)
$ 154,000	$462,000/12 x 4 months Estimated additional revenue collected in **FY13** (03/01/13-06/30/13)
$ 308,000	$462,000/12 x 8 months Estimated additional revenue collected in **FY14** (07/01/14-02/28/14)

Performance Measures

DMV currently produces about 270,000 driver's licenses and identification cards each year. The anticipated additional 30,800 customers in the twelve months following implementation may impact DMV's ability to meet the performance measure of serving customers in an average of 20 minutes or less.

Military Discounts

15 February 2011

Here are 199 stores and services doing their part to make life easier by offering discounts to active, reserve, and retired members of the US Military and their immediate family members. Two important caveats for this list. First, some stores offer discounts only at the owner's discretion and other discounts vary by state. Second, many stores that give a military discount don't advertise it. It is always worth asking a store whether they have one or not and to have your military ID on you.

A&W – Discount varies, simply ask and have a valid military ID with you.
Advance Auto – 10% off with military ID
Agentsource.com – Up to 40% off standard real estate closing costs for Active duty men and women moving in the United States or Canada
All State – Allstate Funding proudly offers all U.S. Military personnel a $250 credit towards the appraisal of a residential property. Ends 12/31/2010

RESOLUTION NUMBER 12-01

RESOLUTION TO ENDORSE LEGISLATION ADDING VETERAN DESIGNATION TO ALASKA DRIVERS LICENSES AND IDENTIFICATION CARDS

WHEREAS, the Alaska Veterans Advisory Council consists of members from veterans organizations, state agencies, and the general public who are familiar with veterans issues;

WHEREAS, it is the responsibility of the Alaska Veterans Advisory Council to advise the Department of Military and Veterans Affairs, and through the Governor, other departments and agencies of the state on matters concerning veterans, their dependents, and their survivors;

WHEREAS, the Alaska Veterans Advisory Council has noted the difficulties many Alaska veterans have in affirming their veteran status;

WHEREAS, the Alaska Veterans Advisory Council recognizes the need for veterans to have multiple avenues in distinguishing this status;

WHEREAS, the Alaska Veterans Advisory Council concludes adding a veteran designation on Alaska Drivers Licenses and Identification Cards will be beneficial to the veteran in their communities and statewide and aid in providing better service to our veterans;

NOW THEREFORE BE IT RESOLVED that the Alaska Veterans Advisory Council supports legislation to add veteran designation to Alaska Drivers Licenses and Identification Cards.

CERTIFICATION
The Alaska Veterans Advisory Council unanimously adopted this resolution at its meeting held 31 January 2012.

Signed this 21st day of February 2012.

Joseph N. Fields III, Chair
Alaska Veterans Advisory Council

RESOLUTION NUMBER 12-02

RESOLUTION TO SUPPORT A STUDY TO DETERMINE THE NEED FOR SPECIALIZED HOUSING OPPORTUNITIES FOR YOUNGER VETERANS

WHEREAS, the Alaska Veterans Advisory Council consists of members from veterans organizations, state agencies, and the general public who are familiar with veterans issues;

WHEREAS, it is the responsibility of the Alaska Veterans Advisory Council to advise the Department of Military and Veterans Affairs, and through the Governor, other departments and agencies of the state on matters concerning veterans, their dependents, and their survivors;

WHEREAS, the Alaska Veterans Advisory Council has noted a possible lack of specialized housing opportunities in the state for younger veterans;

WHEREAS, the Alaska Veterans Advisory Council notes that Alaska's official Veteran Home is designated for an older population;

WHEREAS, the Alaska Veterans Advisory Council notes there is only one state-approved home for the older veteran population;

WHEREAS, the Alaska Veterans Advisory Council acknowledges the population of younger veterans needing specialized housing opportunities may be increasing with those returning home from current conflicts with serious physical and emotional injuries;

NOW THEREFORE BE IT RESOLVED that the Alaska Veterans Advisory Council supports the Department of Military and Veterans Affairs in conducting a study to quantify the need for specialized housing for younger veterans.

CERTIFICATION
The Alaska Veterans Advisory Council unanimously adopted this resolution at its meeting held 31 January 2012.

Signed this 21st day of February 2012.

Joseph N. Fields III, Chair
Alaska Veterans Advisory Council

RESOLUTION NUMBER 12-03

RESOLUTION IN SUPPORT OF VETERANS FIRST PRIORITY
FOR JOBS, HOUSING AND EDUCATION

WHEREAS, the Alaska Veterans Advisory Council consists of members from veterans organizations, state agencies, and the general public who are familiar with veterans issues;

WHEREAS, it is the responsibility of the Alaska Veterans Advisory Council to advise the Department of Military and Veterans Affairs, and through the Governor, other departments and agencies of the state on matters concerning veterans, their dependents, and their survivors;

WHEREAS, the Alaska Veterans Advisory Council acknowledges the service and sacrifice made by veterans and their families for our great nation;

WHEREAS, the Alaska Veterans Advisory Council believes this service warrants veteran priority in the job market, housing and education, and believes those that raise their hand to serve our country should be first in line for such opportunities;

WHEREAS, the Alaska Veterans Advisory Council recognizes the significant positive statewide economic impact incurred through Veteran Retirements, Medical Entitlements, Employment, Housing and Education.

WHEREAS, the Alaska Veterans Advisory Council recognizes there are challenges for veterans securing employment, housing and educational opportunities;

WHEREAS, the Alaska Veterans Advisory Council believes employers, landlords and educators need to be engaged on this issue and participate in creating solutions;

NOW THEREFORE BE IT RESOLVED that the Alaska Veterans Advisory Council supports efforts to give veterans first priority in employment, housing and educational opportunities.

CERTIFICATION
The Alaska Veterans Advisory Council unanimously adopted this resolution at its meeting held 1 February 2012.

Signed this 21st day of February 2012.

Joseph N. Fields III, Chair
Alaska Veterans Advisory Council

(discuss reasons and fund source(s) in analysis section)

Estimated CAPITAL (FY13) costs _____ *(separate capital appropriation required)*
(discuss reasons and fund source(s) in analysis section)

Why this fiscal note differs from previous version (if initial version, please note as such)

1) Eliminated cost of redesigning the cards.
2) Reduced the estimated revenue to reflect the change in the fee from $15 to $5 to obtain a replacement card.

Prepared by	Whitney Brewster, Director	Phone	907-269-5559
Division	Motor Vehicles	Date/Time	2/8/12 8:30 AM
Approved by	John Cramer, Deputy Commissioner	Date	2/8/2012
	Department of Administration		

(Revised 1/17/2012 OMB)

FISCAL NOTE #3 **CORRECTED**

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 180(FIN)

Analysis

The effective date of this CS is March 1, 2013.

Expenditures

1) The Division of Motor Vehicles' (DMV) antiquated database is almost 30 years old; the way it was programmed makes it difficult to effect even minor changes.
   a) Add a 'veteran' field to DMV's database - **109 contract hours**
      The field must be added to 40-50 programs within the database; each program will have to be tested prior to deployment. Since DMV shares data with Department of Public Safety, a field will also need to be added to the shared program, then tested and deployed.
   b) Create a reporting feature for notification to Department of Military & Veterans Affairs - **60 contract hours**
      The bill does not specify exactly what would be required. The 60 hour estimate is based on producing a scheduled weekly mainframe report showing additions only.

Total estimated contract hours: 169
Cost per hour: $143 (contract rate per the State's task order system for IT professional services)
Total programming cost: 169 x $143 = $24,167

2) Cost to produce replacement licenses/IDs for existing population of Alaska veterans. DMV anticipates that 50% of qualified veterans will opt for the designator within the first year. Of those who opt for the designator in the first 12 months after the March 1, 2013, effective date, approximately one-fifth will have licenses/IDs that expire within those first 12 months; DMV will be required to issue replacement licenses/IDs to the remaining four-fifths of veterans opting for the designator within the first 12 months.

77,000	Quantity of veterans in Alaska as of 09/30/10 per U.S. Dept. of Veterans Affairs
x 50%	Estimated percentage of veterans opting for the designator in the first 12 months
38,500	Quantity of veterans opting for the designation
-7,700	20% of veterans whose license/IDs expire within the 12 month period; DMV assumes they will NOT come in for a replacement, but will have the designator added at the time of renewal.
30,800	Quantity of veterans obtaining replacement licenses/IDs in the first 12 months
x $.85	Cost per license/ID for printer ribbon, laminate, and card
$ 26,180	Total cost to produce replacement driver's licenses /IDs in the first 12 months (03/01/13-02/28/13)
$ 8,727	$26,180/12 x 4 months - Cost to produce replacement cards in **FY13** (03/01/13-06/30/13)
$ 17,453	$26,180/12 x 8 months - Cost to produce replacement cards in **FY14** (07/01/14-02/28/14)

Revenue

30,800	Quantity of veterans obtaining replacement licenses in the first 12 months
x $5	Replacement fee
$ 154,000	Estimated additional revenue collected in the first 12 months (03/01/13-02/28/14)
$ 51,300	$154,000/12 x 4 months Estimated additional revenue collected in **FY13** (03/01/13-06/30/13)
$ 102,700	$154,000/12 x 8 months Estimated additional revenue collected in **FY14** (07/01/14-02/28/14)

Performance Measures

DMV currently produces about 270,000 driver's licenses and identification cards each year. The anticipated additional 30,800 customers in the twelve months following implementation may impact DMV's ability to meet the performance measure of serving customers in an average of 20 minutes or less.

Why this fiscal note differs from previous version (if initial version, please note as such)

1) Provided additional information on programming costs.
2) Reduced the estimated percentage of qualifying veterans who opt for the designation from 75% to 50%, based on comments made in the House Military & Veterans' Affairs committee meeting. This reduces both the cost for duplicate cards and the revenue from providing duplicates.
3) Allocation of costs and revenue between FY12 and FY13 resulting from the change in effective date.

FISCAL NOTE #2

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 180(STA)

Analysis

Expenditures

1) The Division of Motor Vehicles' (DMV) antiquated database is almost 30 years old; the way it was programmed makes it difficult to effect even minor changes.
   a) Add a 'veteran' field to DMV's database - 160 contract hours
      The field must be added to 40-50 programs within the database; each program will have to be tested prior to deployment. Since DMV shares data with Dept of Public Safety, a field will also need to be added to the shared program, then tested and deployed.
   b) Redesign the driver's licenses and ID cards to accommodate the designation - 160 contract hours
      With the current license/ID design, there is no space to add a designation. Either the font will need to be reduced and/or items rearranged to accommodate the veteran designation. DMV issues 40 different types of licenses and IDs. Each type will have to be modified, tested, and deployed.
   c) Create a reporting feature for notification to DMVA - 80 contract hours
      The bill does not specify exactly what would be required. The 80 hour estimate is based on producing a scheduled weekly mainframe report showing additions only.

   Estimated hours: 400
   Cost per hour: $143 (this is the contract rate per the State's task order system for IT professional services)
   Total programming cost: 400 x $143 = $57,200

2) Cost to produce duplicate licenses/IDs for existing population of Alaska veterans. DMV anticipates that 50% of qualified veterans will opt for the designator within the first year. Of those who opt for the designation in the first 12 months after the March 1, 2012 effective date, approximately one-fifth will have licenses/IDs that expire within those first 12 months; DMV will be required to issue duplicate licenses/IDs to the remaining four-fifths of veterans opting for the disignator within the first 12 months.

77,000	Quantity of veterans in Alaska as of 09/30/10 per U.S. Dept. of Veterans Affairs
x 50%	Estimated percentage of veterans opting for the designator in the first 12 months
38,500	Quantity of veterans opting for the designation
x 80%	Percentage of veterans who will obtain duplicate licenses/IDs (the designation will be added on the license/ID of 20% when the veteran comes in for renewal during the first 12 months)
30,800	Quantity of veterans obtaining duplicate licenses/IDs in the first 12 months
x $.85	Cost per license/ID for printer ribbon, laminate, and card
$ 26,180	Total cost to produce duplicate driver's licenses /IDs in the first 12 months (03/01/12-02/28/13)
$ 8,268	Cost to produce duplicate cards in **FY12** (03/01/12-06/30/12)
$ 17,912	Cost to produce duplicate cards in **FY13** (07/01/12-02/28/13)

Revenue

30,800	Quantity of veterans obtaining duplicate licenses in the first 12 months
x $15	Duplicate license fee
$ 462,000	Estimated additional revenue collected in the first 12 months (03/01/12-02/28/13)
$ 154,000	Estimated additional revenue collected in **FY12** (03/01/12-06/30/12)
$ 308,000	Estimated additional revenue collected in **FY13** (07/01/12-02/28/13)

Performance Measures

DMV currently produces about 270,000 driver's licenses and identification cards each year. The anticipated additional 30,800 customers in the twelve months following implementation will impact DMV's ability to meet the performance measure of serving customers in an average of 20 minutes or less.

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 180(MLV)

Analysis

This bill would require the Division of Motor Vehicles (DMV) to print a designator on a driver's license identifying the driver as a veteran. This bill would also require DMV to provide the name and address of the license holder to the Department of Military and Veterans' Affairs (DMVA).

Expenditures

1) Programming will be required to:
   a) add a 'veteran' field to DMV's database;
   b) redesign the driver's license to accommodate a designation; and
   c) produce a reporting feature for notification to DMVA.

   Estimated hours: 400
   Cost per hour: $143
   Total programming cost: 400 x $143 = $57,200

2) Cost to produce duplicate licenses for existing population of Alaska veterans. If the designator will provide benefits to the veteran, such as store discounts, DMV anticipates that 75% of qualified drivers will opt for the designator within the first year. Of those, approximately one-fifth will have licenses that expire in FY12.

77,000	Quantity of veterans in Alaska as of 09/30/10 per U.S. Dept. of Veterans Affairs
x 75%	Estimated percentage of veterans opting for the designator
57,750	Quantity of veterans opting for the designation
x 80%	Percentage of veterans who will obtain duplicate licenses (the designation will be added on the license of 20% when the veteran comes in for renewal during FY12)
46,200	Quantity of veterans obtaining duplicate licenses in FY12
x $.85	Cost for license (printer ribbon, laminate, and card)
$39,270	Total Estimated cost to produce duplicate driver's licenses in FY12

Revenue

The bill states, "The department may not charge a fee for the designation." It is unclear from this statement whether or not DMV may collect the standard fee for a driver's license per AS 28.15.271. DMV is making the assumption that the standard fees do apply.

46,200	Quantity of veterans obtaining duplicate licenses in FY12
x $15	Cost of a duplicate license
$ 693,000	Estimate additional revenue collected in FY12

Performance Measures

DMV currently produces about 270,000 driver's licenses and identification cards each year. The anticipated additional 46,200 customers in FY12 will impact DMV's ability to meet the performance measure of serving customers in an average of 20 minutes or less.

House Bill 182 Sponsor Statement

HB 182 - "An Act relating to distribution of annual reports by state agencies."

This bill changes the publication requirements for all departments and state agencies, from a printed document to an electronic format that is posted on the agency's website and is easily accessible to the public. HB 182 also grants municipalities the authority to pass an ordinance that will allow electronic foreclosure notice to taxpayers on the municipality's public Internet website instead of newspaper publication.

Most of the statutes that provide for a printed document were written long before the advent of the modern technology that makes the reports accessible online today. The printed publishing of reports costs Alaska taxpayers over $1.6 million annually. These reports cost up to $25 per copy and are automatically delivered to all 60 legislative offices and many other offices in the government system. The vast majority of these reports go unused as the information is readily accessible in an online format.

To ensure proper distribution to all Alaskans, each commissioner is able to make a determination for physical creation and distribution of reports. Additionally, there is language in the bill that protects the State Library's Data Distribution Center, ensuring that it still receives 4 copies of every publication. These copies are sent to the statewide Data Distribution Centers and can be mailed to any library or household in the state.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 182(FIN)

Analysis

This legislation requires that reports required by statute for all state agencies of the executive branch be made available electronically. An agency may not produce printed copies of reports except as required under AS 14.56.120, by agreement, or by federal law, or as approved by the commissioner of the department. A person may obtain a print copy of a report from the State Library Distribution and Data Access Center.

In preparing this fiscal note, the following types of documents were not included since they are not commonly statutorily required: brochures, handouts, flyers, advertisements, action plans, manuals (e.g. student manuals, driver manuals), and newsletters.

This legislation will, overall, result in a cost savings to the state, but the extent of the savings is inconclusive. The annual cost for printing state agency reports is estimated at $220,000 statewide. Some departments currently distribute reports only electronically and do not realize contracted printing costs, such as DMVA, and other agencies already post reports as PDF documents on their websites.

This note is indeterminate because it is unknown how many reports will still be printed and distributed under section (a) of the bill.

Also, under section (a), AS 14.56.120(a) requires each state agency to provide at least four copies of each of its "state publications" to the State Library Distribution and Data Access Center, and additional copies of each publication may be requested by the center for deposit in quantities necessary to meet the needs of the depository library system and to provide inter-library service to those libraries not having depository status. This requirement will continue to be a cost to agencies.

Finally, if persons want a printed copy of a report, they can obtain a copy from the State Library Distribution and Data Access Center. The additional requests that libraries may receive for printed reports and the cost to libraries of fulfilling those requests is unknown.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 182

Analysis

This legislation requires that annual reports of all state agencies may only be made available electronically. An agency may not produce printed copies of annual reports unless specifically requested by an individual or if conflicts exist with provisions of law.

The cost for this note is indeterminate. The estimated cost for printing state agency annual reports is $133.5. This includes over 28,000 copies from agencies that currently print and distribute annual reports. Several Departments currently distribute annual reports only electronically and do not realize printing costs. These include the Department of Law, the Alaska Judicial Council, the Department of Corrections and the Alaska Court System. Most Departments post annual reports as PDF documents on their websites. Other agencies, such as the Alaska Commission on Judicial Conduct, send notifications informing people that their reports can be downloaded from their website and that a report will only be sent to them if requested.

This fiscal note is indeterminate because the cost for producing annual reports is not linear. The fewer reports that are produced, the greater the cost per report. The cost is attributed to the required setup by the printer, not so much the actual printing. If the number of copies is reduced from 1,000 to 100, there will most likely be a reduction in the overall cost, but the amount saved is inconclusive since the cost per copy will be greater.

Representative Kyle Johansen
House District 1

Sectional for HB 182 - "An Act relating to distribution of annual reports by state agencies."

Section 1. Grants municipalities the authority to pass an ordinance that will allow electronic notice to taxpayers on the municipality's public Internet website instead of newspaper publication of the amount of state aid a municipality receives and the millage equivalent.

Section 2. Allows a municipality to meet notice requirements by posting its foreclosure list for delinquent taxes on the municipality's public Internet website.

Section 3. Allows a municipality to electronically post notice that the redemption period following foreclosure will expire in 30 days on its public Internet website.

Section 4. Creates a new article requiring electronic production and distribution of agency reports if the agency has the technological capability to do so. Requires that reports must be posted for one year or until superseded. Creates exceptions where printing is required by other law, agreement or requested. Allows electronic distribution to fulfill any agency obligation to publish, prepare, present, or submit a report. Clarifies that print copies of reports may be requested from a library distribution and data access center. Defines "report" and "state agency".

LEGISLATIVE RESEARCH REPORT

NOVEMBER 3, 2005

REPORT NUMBER 06.032

ANNUAL REPORT DISTRIBUTION REQUIREMENTS

PREPARED FOR REPRESENTATIVE MAX GRUENBERG

BY BECKY TAYLOR, LEGISLATIVE ANALYST

You asked about annual report distribution by state agencies and departments. Specifically, you wished to know what the distribution requirements are for these reports, whether the law requires reports to be printed, and if distributing reports electronically would be more cost effective.

DISTRIBUTION REQUIREMENTS FOR ANNUAL REPORTS

As you know, Alaska laws require certain state agencies to produce annual reports. These laws often establish what information the report must contain, and to whom it must be distributed. Distribution requirements vary; however, often agencies must distribute reports to the Legislature, the Governor, and the public. The majority of statutes on the subject do not specify what form an annual report must take, and we were unable to identify any general requirement that all agencies produce a printed report. AS 44.99.200 authorizes the Department of Administration to establish standards for the production of state publications, which are outlined in the publication section of the Alaska Administrative Manual (AAM 83). These standards are focused on printing methods and do not address distribution requirements or methods. AS 44.99.200 does state that the standards "shall be designed to promote simplicity, low cost, and consistency." Many of the statutes and regulations regarding annual reports may have been written before electronic distribution was a possibility.[1]

We identified a number of specific instances in which an organization is required by law or regulation to produce an annual report in a certain format. For example, AS 41.08.030 requires the Division of Geological and Geophysical Surveys to print and publish their annual report. Pursuant to 23 AAC 40.010, the Office of Victim's Rights must post an annual report on their web

[1] Personal Communication from Vern Jones, chief procurement officer, Division of General Services, Department of Administration. Mr. Jones can be reached at (907) 465-5684.

site. Many statutes contain language that is not specific about the format of the report, such as the following section of AS 37.13.170, relating to the Permanent Fund Corporation:

> By September 30 of each year, the board shall publish a report of the fund for distribution to the governor and the public. The board shall notify the legislature that the report is available. The report shall be written in easily understandable language.[2]

The only statute that we identified that applies generally to the distribution of annual reports is the requirement under AS 14.56.120 that state agencies submit several copies of any publication they produce to the Alaska State Library (ASL) for the State Publication Program. The State Library then distributes these documents to Alaska Depository Libraries in Juneau, Anchorage, Fairbanks, and Washington, D.C. One of the goals of the program is to ensure that state publications are accessible to all Alaskans. Alaskans can request to have materials sent to their local library through inter-library loan. The Publication Program also maintains older state documents that an agency may no longer be able to provide. [3]

According to ASL personnel, the library distribution requirement can be satisfied with electronic documents. One librarian, nevertheless, expressed concern that digital materials may be more difficult to preserve, and that some constituents who request materials through inter-library loan may have difficulty with the format.[4]

THE IMPACT OF TECHNOLOGY

Many organizations that are mandated by Alaska law to produce annual reports already post the documents on-line. Agencies that post their annual reports on-line may also produce a printed copy, but some agencies appear to be cutting back on the number of printed copies they generate. According to Michael Matthews, with the Alaska Bureau of Vital Statistics, his agency has reduced the number of printed copies they produce as more people have started using the Internet.[5] The Regulatory Commission of Alaska (RCA) has cut the number of annual reports that it prints in half in recent years. The RCA still mails printed copies of their annual report to all Alaska Legislators, although AS 42.05.211 and AS 42.06.220 appear to require that the agency only, "notify" the legislature that the report is available.[6]

---

[2] The word "publish" is frequently included in similar statutes. While "publish" may imply print, the relevant definition in *Black's Law Dictionary* is simply, to "distribute" copies of a work to the public. Bryan A. Garner, ed., *Black's Law Dictionary*, 8th ed., St. Paul, MN, West, 2004, p. 1268.

[3] For more information about the Alaska State Publications Program, see the Alaska State Library website at *http://www.library.state.ak.us/asp/*.

[4] Personal communication from Daniel Cornwall, government publications librarian, Alaska State Library. Mr. Cornwall can be reached at (907) 465-2927.

[5] Personal communication from Michael Matthews, research analyst, Bureau of Vital Statistics, Alaska Department of Health and Social Services. Mr. Matthews can be reached at (907) 465-8602.

[6] Personal communication from Grace Salazar, chief of Consumer Protection & Information, Regulatory Commission of Alaska. Ms. Salazar can be reached at (907) 263-2134.

A number of agencies are saving money by reducing the number of printed copies they produce. For example, printing costs for the RCA annual report are as follows:

Regulatory Commission of Alaska Annual Report Printing Costs			
Fiscal Year	Reports Printed	Cost per Copy	Total Cost
2003	400	$11.09	$4,436
2004	200	$6.62	$1,324
		Cost Reduction	$3,112

Source: Cost per copy is included in the FY2003 and FY2004 annual reports available at http://www.state.ak.us/rca/AnnualReport/. The number of copies produced was provided by Grace Salazar.

Similarly, we show printing costs for the Alaska Permanent Fund Corporation (APFC) below:

Alaska Permanent Fund Corporation Annual Report Printing Costs			
Fiscal Year	Reports Printed	Cost per Copy	Total Cost
2004	2,500	$7.85	$19,625
2005	1,500	$7.24	$10,860
		Cost Reduction	$8,765

Source: Cost per copy is included in the FY2004 and FY 2005 annual reports available at http://www.apfc.org/publications/AnRptArch.cfm. The number of copies produced was provided in a personal communication from Laura Achee, director of communications, Alaska Permanent Fund Corporation. Ms. Achee can be reached at (907) 465-2047.
Note: Costs for printing the APFC annual report are paid with Permanent Fund earnings, and do not come out of the general fund.

The Alaska Housing Finance Corporation (AHFC) posts the annual report on-line, and distributes the document on compact discs (CDs) which are easy to circulate, and can also be used as a marketing tool. The AHFC estimates that switching from printed reports to CDs has saved $10,000 to $15,000 a year. A printed annual report costs $8 to $12 to produce, while producing a CD and cover costs only $1.70. Corporate communications officer, Sherrie Simmonds, notes that because of the large file size, sending the extensive report by email would not be feasible. The AHFC will print a hard copy of the annual report in-house for anyone who requests one; however, they only receive one or two requests a year for paper copies.[7] The Alaska Division of Oil & Gas also mails copies of its annual report on CD to individuals who are not able to download the large files from the division's website.[8]

In addition to reducing printing costs, increased use of technology may be helping to reduce postage costs as well. Some agencies are shortening their mailing lists in response to the increased use of on-line documents. For example, The RCA stopped routinely mailing annual reports to regulated utilities several years ago; now they only mail reports to utilities that

[7] Personal communication from Sherrie Simmonds, corporate communications officer, Alaska Housing Finance Corporation. Ms. Simmonds can be reached at (907) 330-8447.

[8] Personal communication from Brian Havelock, natural resources specialist, Division of Oil & Gas, Alaska Department of Natural Resources. Mr. Havelock can be reached at (907) 269-8807.

specifically request a printed copy.[9] According to personnel in several agencies we contacted, while the use of electronic distribution can help reduce printing and postage costs, the majority of the cost of generating an annual report is the amount of staff time needed to gather and arrange all of the information.

CHALLENGES TO ELECTRONIC DISTRIBUTION

Electronic distribution could be more cost effective than printing and mailing documents for state agencies that already possess the technological resources necessary to send files by email or post them on their website. Indeed, it seems that several state agencies have recognized the opportunity to cut costs by relying more heavily on technology in their distribution of reports. Electronic distribution, however, could potentially be more costly for recipients of the documents, particularly in rural areas that may rely on slow, long distance dial up services. Distributing annual reports on CD provides a way around the challenge of opening large documents with a slow Internet service, but still requires recipients to have computer access. The consumer would also bear any printing cost.

Some agencies expressed concern that switching to electronic distribution exclusively would prevent certain constituents from having access to the reports, or make the reports difficult to read. For example, the Bureau of Vital Statistics sends copies of its annual report to rural health care facilities, many of which may have slow, unreliable Internet connections.[10] Laura Achee, the director of communications for the APFC, commented as follows:

> State law directs us to "publish the report for distribution to . . . the public." Not every Alaskan has easy access to a computer and printer, so we will always have to have print copies available for those who request one. State law also directs us to write the report in "easily understood language." I think following the spirit of that means we should also be able to provide the report in an easily accessible format for each Alaskan, which for many may be print. The size and complexity of the document can make it difficult to review online.

A number of agencies already use electronic distribution to reduce printing costs. It appears that state agencies could distribute reports solely in electronic form; however, this could transfer printing and access costs from the agency to the recipient, and may adversely impact residents who lack the necessary technology.

I hope you find this information to be useful. Please do not hesitate to contact us if you have questions or need additional information.

Subject: HB 182

ear Senator:

House Bill 182 apparently eliminates the requirement for publication of foreclosure lists in newspapers.

This certainly does not serve the public, nor does it serve the state or municipality.

As a businessperson I would want to know who is in foreclosure.

This is not a good piece of legislation and needs to be stopped.

SENATE CS FOR CS FOR SS FOR HOUSE BILL NO. 190(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES FEIGE, Chenault, Herron, Peggy Wilson, Johnson, Muñoz, Lynn

A BILL

FOR AN ACT ENTITLED

"An Act relating to allowable absences from the state for purposes of eligibility for permanent fund dividends; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 43.23.008(a) is amended to read:

(a) Subject to (b)**,** [AND] (c)**, and (e)** of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent

(1) receiving secondary or postsecondary education on a full-time basis;

(2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;

(3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or

disabled dependent, an individual who is

(A) serving on active duty as a member of the armed forces of the United States; and

(B) eligible for a current year dividend;

(4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;

(5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;

(6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

(7) providing care for the individual's terminally ill family member;

(8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;

(9) serving as a member of the United States Congress;

(10) serving on the staff of a member from this state of the United States Congress;

(11) serving as an employee of the state in a field office or other location;

(12) accompanying a minor who is absent under (5) of this subsection;

(13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

(14) serving as a volunteer in the federal peace corps program;

(15) because of training or competing as a member of the United States Olympic Team;

(16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

(17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed

(A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;

(B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or

(C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

*** Sec. 2.** AS 43.23.008(c) is amended to read:

(c) An otherwise eligible individual who has been eligible for the immediately preceding 10 dividends despite being absent from the state for more than 180 days in each of the related 10 qualifying years is only eligible for the current year dividend if the individual was absent 180 days or less during the qualifying year. This subsection does not apply to an absence under (a)(9) or (10) of this section or to an absence under (a)(13) of this section if the absence is to accompany an individual who is absent under (a)(9) or (10) of this section. **This subsection does not apply to an absence under (a)(3) of this section.**

*** Sec. 3.** AS 43.23.008 is amended by adding new subsections to read:

(e) After an individual has been absent from the state for more than 180 days in each of the five preceding qualifying years, the department shall presume that the individual is no longer a state resident. Subject to the limitation in (c) of this section, the individual may rebut this presumption by providing proof to the department that establishes, by clear and convincing evidence, that

(1) the individual was physically present in the state for at least 30 cumulative days during the past five years; and

(2) the individual is a state resident as defined in AS 43.23.095(7).

(f) To determine whether an individual intends to return and remain in the

state indefinitely, the factors the department shall consider include

(1) the length of time the individual was absent from the state compared to the length of time the individual was physically present in the state;

(2) the frequency and duration of voluntary return trips to the state during the past five years;

(3) whether the individual's intent to return to and remain in the state is conditioned on future events beyond the individual's control, such as the financial circumstances of the individual or the ability of the individual to find employment in the state;

(4) the ties the individual has established with the state or another jurisdiction, as demonstrated by

(A) maintenance of a home;

(B) payment of resident taxes;

(C) registration of a vehicle;

(D) registration to vote and voting history;

(E) acquisition of a driver's license, business license, or professional license; and

(F) receipt of benefits under a claim of residency in the state or another jurisdiction;

(5) the priority that the individual gave the state on an employment assignment preference list, including a list used by military personnel;

(6) whether the individual made a career choice or chose a career path that does not allow the individual to reside in or return to the state.

* **Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETROACTIVITY. Sections 1 - 3 of this Act are retroactive to January 1, 2012.

* **Sec. 5.** This Act takes effect immediately under AS 01.10.070(c).

SPONSOR STATEMENT HB 190

An Act relating to the allowable absence for active duty service members of the armed forces for purposes of permanent fund dividend eligibility.

With great dismay, on February 13, 2011, I, along with other members of the legislature, received an e-mail from Lt. Cmdr. Tiko Crofoot about the denial of his Permanent Fund Dividend. An Alaskan, who joined the U.S. Navy, Lt. Cmdr. Crofoot has been stationed outside of Alaska for more than ten years. Military service is an allowable absence for continuation of eligibility of a Permanent Fund Dividend. The justification for the denial occurs only because Lt. Cmdr. Crofoot and others have sacrificed not just three, five, or seven years serving our country, but have made a career serving our country in the armed forces.

According to current statute, anyone on an approved absence from the state, except members of Congress, congressional staff, and their families, is denied a permanent fund dividend after ten years of absence from the state.

Although these individuals choose to serve in the Armed Forces of the United States, once they are sworn into service, they do not have the option to choose to be physically present in Alaska.

It is time to correct this injustice and allow Alaska residents who decide to join the military the opportunity to continue to receive their deserved Permanent Fund Dividend.

We sleep soundly in our beds because rough men stand ready in the night to visit violence on those who would do us harm.

Sectional Analysis

HB 190 – 27-LS0564\L

Sec. 1 – Contains conforming language changing the reference in AS 43.23.008(a) pertaining to allowable absences from (c), which is appealed in Sec. 3 of this bill, to (e), which is established in Sec. 2 of this bill.

Sec. 2 – Establishes in law a presumption that someone who is absent from the state for more than 180 days in each of the previous five years does not plan to return to the state and thus, not eligible to receive a Permanent Fund Dividend. This section also provides a method for an individual who is denied a Permanent Fund Dividend because of this presumption to rebut the presumption.

Sec. 3 – Repeals AS 43.23.008(c) that eliminates allowable absences after ten years except for members of Congress, congressional staff, and family members.

Sec. 4 – Allows someone who was previously denied a dividend under the ten year bright line rule to apply for a 2012 dividend during the 90 days following the enactment of this bill into law.

Sec. 5 – Makes the new law retroactive to Jan. 1, 2012.

Sec. 6 – Makes the bill effective immediately.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 190

Analysis

House Bill 190 changes the allowable absence rules for certain members of the armed forces for the purpose of determining eligiblity for permanent fund dividends. It exempts those who received three dividends prior to entering the armed forces from the rule that would disqualify them automatically after absence from Alaska of 10 years. It is estimated that 100 hours of programmer time will be necessary to make these changes.

The Information & Instruction books must be changed in order to reflect changes to eligibility rules. The cost of printing and distributing new Information & Instruction books to the more than 280 distribution sites around Alaska is a direct increased cost to the division.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SSHB 190

Analysis

Repeal of the 10 year rule reduces the number of cases that require eligibility determinations each year.

Additionally, moving the 5 year presumption * in 15 AAC 23.163(f) to statute makes clear the requirements needed to overcome it and makes determining eligibility less subjective.

*The 5 year presumption of 15 AAC 23.163(f) presumes that an individual who has been absent from Alaska for more than 180 days in the preceding 5 years does not intend to return.

Programming is not required since a similar 5 year presumption is already being applied. Minimal changes are anticipated to division publications.

MEMORANDUM March 18, 2011

SUBJECT: Equal Protection Concerns -- HB 190
(Work Order No. 27-LS0564\M)

TO: Representative Eric Feige
Attn: Michael Paschall

FROM: Lisa Moritz Kirsch
Legislative Counsel

I spoke to Michael Paschall on the phone about equal protection concerns for this bill. After I spoke with him about the possible problems I did additional research. Equal protection is an area where judges often disagree (I have noted an unusually high number of concurring and dissenting opinions), which makes it difficult to predict the outcome in specific cases. However, I believe the requirement that service members receive dividends for three years in order to get the benefit of the exception to the ten-year rule may create problems.

Under the state equal protection clause, a statute is evaluated on a sliding scale under which the goal of the legislation and the importance of the individual rights affected are considered.[1] As the importance of the individual rights affected increases, then the burden increases on the state to show that the state's goal justifies the intrusion on the individual's interests in equal treatment and that the state's goal is substantially related to the means chosen to achieve the goal. An individual's interest in receiving a permanent fund dividend is accorded a low level of protection under the state equal protection clause, because only an economic interest is implicated and that interest is not based on the need of the applicant.[2] At the low end of the scale, the state must show the enactment is fairly and substantially related to a legitimate state interest.

The primary state concern in granting PFDs is that the recipient of a PFD is a bona fide resident of the state. To be an Alaska resident a person must have the intent to remain in Alaska indefinitely. The state has a legitimate interest in preventing temporary residents motivated by the financial benefit from making false claims of residency. To separate these two groups, the state currently uses various indicia of residency including a

[2] *Underwood v. State*, 881 P.2d 322 (Alaska 1994).

durational residency requirement of one year to determine whether an applicant has the intent to remain.[3]

The statutory change in HB 190 creates two applicant classes who are treated differently: (1) applicants who qualify for allowable absences, but are subject to the ten-year limit, (2) active duty service members who received three dividends in Alaska before being inducted into the military, who are not subject to the ten-year limit, and continue to receive PFDs based on allowable absences. The question here is whether the state's interest in granting PFDs only to residents with a genuine intent to remain in the state is fairly and substantially related to a limitation of ten years for allowable absences unless you are on active duty or in Congress, or the spouse, dependent, or staff of someone in Congress or on active duty.

Arguably, members of Congress and active duty military are somewhat unique in that their career choices put them in the position of serving government in a place other than their chosen state of residence. Also, Congressional and military service are more likely to span a term longer than a decade when compared with education or illness related absences. This particular question of differential treatment for members of Congress has not been addressed by the courts, and although the result of a court's equal protection analysis is particularly difficult to predict, at this low level of scrutiny it seems likely that the nexus between the state's purpose of excluding long absent residents who no longer intend to return and the means of providing the exception to members of the military and Congress is sufficiently close to be found constitutional.

However, there is also an equal protection issue raised by the requirement that military members were residents long enough to receive three PFDs before they were inducted. The issue of durational residency has been addressed by the courts. In *Zobel v. Williams*, the United States Supreme Court invalidated a prior scheme of PFD distribution rewarding residents incrementally higher dividends based on the length of their residency in Alaska.[4] That Court held that the state could not distinguish between old and new residents in this way without violating the federal equal protection clause.[5]

In *Zobel,* the Court did not invalidate a threshold waiting period like the one proposed in this bill or under existing AS 43.23.005(3), and the concurring opinions in *Zobel* acknowledge that some durational residency requirements may be constitutional.[6] In other cases, residency requirements appear to be generally disfavored, but have been upheld where the individual interest is less significant and the state interest bears a

[6] *Zobel* at 2318 and 2322, n. 8.

substantial relationship to the requirement.[7] Although I have not done exhaustive research, there appears to be a general trend to limit durational requirements to one year. For example, in an unreported opinion Judge Dana Fabe (now an Alaska Supreme Court Justice) disallowed a two-year residency requirement, but upheld a one-year requirement.[8] In this opinion she found that:

> The problematic provision of this statute is the two-year residency requirement. One-year residency requirements have been found to be rationally related to a state's purpose to establish bona fide residency. The United States Supreme Court has affirmed a one-year residency or waiting requirement for in-state tuition, upholding lower court findings that it is reasonable to presume that a person who has not resided within a state for a year is a non-resident[.][9]

Although the majority rejected the argument, an alternative constitutional argument addressed in the concurring opinions in *Zobel* was that durational residency requirements ran afoul of the privileges and immunities clause, or "the right to travel." It seems unlikely that the right to travel could be applied here because both classes affected by the exception to the ten-year rule are residents, and the impairment of rights can be cured whereas the invalidated distinctions between residents in *Zobel* were permanent.[10]

Here it could be argued that a three-year durational requirement is substantially related to the state's legitimate interest in establishing that a service member who has been out of the state for half of the year for ten years still has the intention to return. A service member who was well established in Alaska through several years of residency before joining the military may have lasting contacts that will induce permanent residency. The state has a legitimate interest in preventing fraudulent claims of residency, but whether three years of dividend eligibility to establish intent to return after ten years of long

20110

2011 Extended Absence Questionnaire

For individuals who were absent from Alaska more than 180 days for five or more consecutive years.

First Name	M.I	Last Name	Social Security Number	Date of Birth

Address	Daytime phone number	Message phone number

City	State	Zip Code	E-mail Address

Your Permanent Fund Dividend application has been selected for an eligibility determination because you have not lived in Alaska for at least 6 months in over five years. In accordance with 15 AAC 23.163(f) an individual with an absence totaling more than five years is presumed not to have the intent to return to Alaska and remain indefinitely in Alaska. You are not eligible for the 2011 dividend unless you provide documentation that demonstrates, to the department's satisfaction an intent at all times during your absence to return to Alaska and remain indefinitely.

The department will give greater weight to the claim of an individual who makes frequent return trips to Alaska for noncompulsory reasons than that of an individual who did not. An individual who has not been present in Alaska for 30 cumulative days in the past five years has generally not demonstrated the continuous intention to return to Alaska and remain indefinitely.

If you could not return to Alaska due to unavoidable circumstances, attach an explanation and supporting documentation.

1. **List the longest period of time you physically lived in Alaska before departing on your absence.**

   I lived in Alaska **From:** ____/____/____/ **To:** ____/____/____

2. **List the dates below when you physically returned to Alaska during your absence. Begin with the most recent dates you were here and proceed backward to your departure.**

If you completed this form last year and reported absences last year, include only returns in 2010.

Returned to Alaska			Left Alaska			Returned to Alaska			Left Alaska		
Month	Day	Year	Month	Day	Year	Month	Day	Year	Month	Day	Year

3. **Is your ultimate return to Alaska to remain indefinitely conditioned upon future events such as securing employment in Alaska or receiving an assignment to Alaska by your employer?** ☐ Yes ☐ No

4. **Have you sought employment in Alaska?** ☐ Yes ☐ No

Complete both sides

Confidential

If yes, list the specific employer(s) who you contacted in Alaska and when you contacted them.

Name	
Address	Date Contacted
Telephone	____/____/____
Name	
Address	Date Contacted
Telephone	____/____/____

5. Have you sought employment outside of Alaska? ☐ Yes ☐ No

If yes, explain how your seeking employment outside of Alaska is consistent with your statement that you intend to return to Alaska to remain indefinitely.

6. Have you maintained a home outside of Alaska since your departure? ☐ Yes ☐ No

If yes, do you own this home? ☐ Yes ☐ No

7. Have you maintained a home in Alaska since your departure? ☐ Yes ☐ No

If yes, do you own this home? ☐ Yes ☐ No

If you own this home, do you lease or rent it to someone? ☐ Yes ☐ No

If you do not own this home, explain who owns this home and why you consider it your home.

8. If you are employed by the State of Alaska or the U.S. Armed Forces outside of Alaska, have you requested to be returned to Alaska by your employer? ☐ Yes ☐ No

If yes, attach a copy of your request.

If no, explain why you have not submitted a request even though you have stated that you intend to return to Alaska to remain indefinitely.

9. Is your choice of careers one which does not allow you to reside or return to Alaska until retirement or until you make a personal choice to change careers in order to return to Alaska? ☐ Yes ☐ No

10. Explain below why your absence should be considered allowable, and how you have demonstrated that your intent, at all times during your absence, has been to return to Alaska to remain indefinitely.

Attach additional pages if necessary.

I certify under penalty of law that to the best of my knowledge and belief, all the information on this questionnaire, including any attachments, are true and complete.

Signature	Date

Sec. 43.23.008. Allowable absences.

(a) Subject to (b) and (c) of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent

(1) receiving secondary or postsecondary education on a full-time basis;

(2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;

(3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or disabled dependent, an individual who is

(A) serving on active duty as a member of the armed forces of the United States; and

(B) eligible for a current year dividend;

(4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;

(5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;

(6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

(7) providing care for the individual's terminally ill family member;

(8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;

(9) serving as a member of the United States Congress;

(10) serving on the staff of a member from this state of the United States Congress;

(11) serving as an employee of the state in a field office or other location;

(12) accompanying a minor who is absent under (5) of this subsection;

(13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

(14) serving as a volunteer in the federal peace corps program;

(15) because of training or competing as a member of the United States Olympic Team;

(16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

(17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed

(A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;

(B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or

(C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

(b) An individual may not claim an allowable absence under (a)(1) - (16) of this section unless the individual was a resident of the state for at least six consecutive months immediately before leaving the state.

(c) An otherwise eligible individual who has been eligible for the immediately preceding 10 dividends despite being absent from the state for more than 180 days in each of the related 10 qualifying years is only eligible for the current year dividend if the individual was absent 180 days or less during the qualifying year. This subsection does not apply to an absence under (a)(9) or (10) of this section or to an absence under (a)(13) of this section if the absence is to accompany an individual who is absent under (a)(9) or (10) of this section.

(d) For purposes of (a)(7) of this section, "family member" means a person who is

(1) legally related to the individual through marriage or guardianship; or

(2) the individual's sibling, parent, grandparent, son, daughter, grandson, granddaughter, uncle, aunt, niece, nephew, or first cousin.

(Sec. 5 ch 44 SLA 1998; am Sec. 1 ch 71 SLA 1999; am Sec. 1 ch 69 SLA 2003; am Sec. 1, 2 ch 116 SLA 2003; am Sec. 20, 21 ch 42 SLA 2006; am Sec. 1, 2 ch 36 SLA 2008)

Cross References -

For provisions extending to September 15, 2008, the date by which individuals who may qualify for a permanent fund dividend for 2006, 2007, and 2008 because of the 2008 addition of (a)(16) of this section may apply for the dividend, see Sec. 3, ch. 36, SLA 2008 in the 2008 Temporary and Special Acts.

Amendment Notes -

The 1999 amendment, effective January 1, 2000, added present paragraph (4), redesignated subsequent paragraphs accordingly, inserted internal references in paragraph (13), and made internal reference substitutions throughout.

The first 2003 amendment, effective June 12, 2003, in paragraph (a)(3) added the language beginning "or accompanying" to the end of the introductory language and added subparagraphs (A) and (B); updated paragraph references in paragraph (a)(13); and rewrote subparagraphs (a)(14)(A) and (B).

The second 2003 amendment, effective January 1, 2004, substituted "family member" for "parent, spouse, sibling, child, or stepchild" in paragraph (a)(7) and added subsection (d).

The 2006 amendment, effective May 26, 2006, added paragraphs (a)(14) and (a)(15), and made related changes.

The 2008 amendment, effective May 23, 2008, substituted "(16), or (17)" for "or (16)" in paragraph (a)(13), inserted paragraph (a)(16), and changed references to former paragraph (a)(15) to present paragraph (a)(16) four times in paragraph (a)(17) and once in subsection (b).

Editors Notes -

Section 35, ch. 42, SLA 2006, makes the 2006 amendments to subsections (a) and (b) of this section retroactive to January 1, 2006.

Section 4, ch. 36, SLA 2008 makes the 2008 amendments of (a) and (b) of this section retroactive to January 1, 2005.

Decisions -

Cited in State v. Andrade, 23 P.3d 58 (Alaska 2001).

Construction with Federal Soldiers' and Sailors' Civil Relief Act. - Servicemember, who had been discharged from the Navy, was not eligible to claim a Permanent Fund Dividend (PFD) for a certain year where he failed to overcome presumption that he had not been a resident of Alaska for the last five years; servicemember's argument that the Federal Soldiers' and Sailors' Civil Relief Act preempted state law in that area was not persuasive, as that act applied to only two areas, taxation and voting, and PFD was not a tax but a benefit. Eagle v. Dep't of Revenue, 153 P.3d 976 (Alaska 2007).

15 AAC 23.143. Establishing and maintaining Alaska residency

Statute text

(a) An individual's intent to establish residency, remain indefinitely in Alaska, or to return to Alaska and remain indefinitely is demonstrated through the establishment and maintenance of customary ties indicative of Alaska residency and the absence of those ties elsewhere. Acts that are required by law or contract or are routinely performed by temporary residents of Alaska are not by themselves evidence of residency. In evaluating whether an individual claiming Alaska residency has demonstrated an intent to remain indefinitely in Alaska, the department will consider whether or not an individual has:

(1) taken steps to establish Alaska residency and sever residency in a previous state or country;

(2) ties to another state or country that indicate continued residency in the other state or country; and

(3) taken other action during the qualifying year, through the date of application, that is inconsistent with an intent to remain in Alaska indefinitely.

(b) An individual may not become a resident while absent from Alaska.

(c) Physical presence in Alaska is not, by itself, sufficient to establish residency. Before January 1 of the qualifying year, an individual must have taken at least one step beyond physical presence in Alaska to establish residency. The department will not consider external indicators, including those listed in 15 AAC 23.173(g), established less than six months before December 31 of the qualifying year as evidence of the establishment of Alaska residency in time to qualify for the current year dividend.

(d) An individual is not eligible for a dividend if, at any time from January 1 of the qualifying year through the date of application, the individual has

(1) maintained the individual's principal home in another state or country, regardless of whether the individual spent a majority of time at that home, except while absent for a reason listed

(A) in AS 43.23.008(a)(1) - (3), (9) - (11), or (16); or

(B) in AS 43.23.008(a)(13), if the eligible resident whom the individual accompanies is absent for a reason listed in (A) of this paragraph;

(2) claimed or maintained a claim of residency in another state or country in the individual's employment personnel records; if the individual claims an error or a delay was made in processing by the personnel office, the individual must submit

(A) from the personnel office, a certified copy of the individual's request to change the individual's state of legal residence; or

(B) a sworn statement from the personnel officer who has specific knowledge that the personnel office made an error, or caused a delay, in processing the individual's personnel

records; the personnel officer must state the exact date the records show the original request was received and why the request was not processed timely;

(3) claimed a non-resident motor vehicle tax exemption in Alaska;

(4) accepted full-time, permanent employment in another state or country except while on an absence listed

(A) in AS 43.23.008(a)(1) - (3), (9) - (11), or (16); or

(B) in AS 43.23.008(a)(13), if the eligible resident whom the individual accompanies is absent for a reason listed in (A) of this paragraph;

(5) filed a resident or part-year resident income, excise, or personal property tax return in another state or country and the claim of residency on the return is for any period of time beginning January 1 of the qualifying year through the date of application, unless the individual

(A) was required by the other state or country to file a return claiming resident tax status in that state or country even though the individual was a state resident as defined in AS 43.23.095; or

(B) files in the other state or country an amended return claiming nonresident tax status and provides proof to the department that the amended return was actually filed in the other state or country;

(6) claimed or maintained a claim of a homestead or homeowner's property tax exemption in another state or country, that required the individual to be a resident of that state or country, unless the individual

(A) files an amended homestead or homeowner's property tax exemption claim deleting the claim of residency; and

(B) provides evidence from the other state or country that the individual filed an amended homestead or homeowner's property tax exemption claim deleting the claim of residency;

(7) applied for or received an education loan from another state or country that required an individual to be a resident of that state or country;

(8) disclosed in a court proceeding or affidavit that the individual is a resident of another state or country;

(9) executed a will that described residency in another state or country;

(10) moved from Alaska,

(A) for a reason other than one listed

(i) in AS 43.23.008(a)(1) - (3), (9) - (11), or (16); or

(ii) in AS 43.23.008(a)(13), if the eligible resident whom the individual accompanies is absent for a reason listed in (i) of this subparagraph; and

(B) claiming moving expenses as a deduction on the individual's federal income tax return, unless the individual

(i) files an amended federal income tax return deleting the claimed moving expenses as a deduction; and

(ii) provides proof from the Internal Revenue Service that the individual filed an amended return;

(11) accepted admission under resident tuition provisions to a college or university in another state or country, unless

(A) there was no difference between resident and nonresident tuition;

(B) nonresident tuition was waived as part of an interstate exchange agreement such as the Western Interstate Commission for Higher Education (WICHE) student exchange program or the Washington Wyoming Alaska Montana Idaho (WWAMI) medical education program; or

(C) the individual was granted admission under resident tuition provisions for any other reason that did not require the individual to be a resident of the state or country in which the college or university is located;

(12) registered to vote in another state or country, except if the individual

(A) registered to vote in another state no more than 60 days before a presidential election solely for the purpose of voting in that election and did not vote in any other election in another state other than for president of the United States; or

(B) registered to vote in another country for which the individual was not required to claim residency of the country in order to register to vote;

(13) voted in another state's or country's state, country, or local election, except if the individual voted in an election described in this paragraph and the individual was not required to claim residency in order to vote;

(14) obtained a resident hunting, fishing, or trapping license from another state or country;

(15) filed for divorce, dissolution, or legal separation in another state or country that required the individual to be a resident of that state or country in order to file the action;

(16) repealed 1/1/2010;

(17) obtained any other benefit or benefits as a result of establishing or maintaining any claim of residency in another state or country or by disclaiming Alaska residency, except that the department will not deny a dividend to an individual solely because the individual received Medicaid benefits from another state if the individual's application for Medicaid was consistent with the intent to maintain residency in Alaska.

(e) Regardless of alienage, a child born outside Alaska to an eligible resident on an allowable absence, adopted by an eligible resident, or whose adoption by an eligible resident is pending during the qualifying year, establishes Alaska residency in the child's own right immediately upon the child's arrival in Alaska if the child's custodial parent or guardian is an eligible resident at the time of the child's arrival in Alaska.

(f) An individual absent from Alaska as a dependent of an eligible resident who as soon as reasonably possible, as determined by the department, after emancipation does not return to Alaska and establish Alaska residency as an adult is not eligible for a dividend. A newly emancipated individual who was absent from Alaska as a dependent of an eligible resident who returns to Alaska as soon as reasonably possible, as determined by the department, after emancipation and who establishes external indicators of Alaska residency as an individual is not subject to the six month physical presence requirements of 15 AAC 23.163(b).

(g) A resident who marries a nonresident while physically present in Alaska is considered to have the intent to remain indefinitely in Alaska until the resident takes steps or actions to depart Alaska.

(h) An individual who on the date of application knows the individual will be moving from Alaska at a specific time to a specific destination for a reason other than one allowed by AS 43.23.008(a) does not have the intent to remain indefinitely in Alaska and is not eligible for a dividend.

(i) The eligibility of a resident who marries a nonresident while absent from Alaska is not changed by the marriage, so long as the resident is absent for the resident's own allowable reason.

(j) The fact that an individual's spouse has not declared Alaska residency does not establish a presumption that an individual is not a resident.

(k) Repealed 1/1/2000.

15 AAC 23.163. Allowable absences

(a) Except as provided in AS 43.23.005(c), an individual who has never been physically present in Alaska may not claim an allowable absence under AS 43.23.008.

(b) An individual who was absent from Alaska for more than 180 days is not eligible for a dividend if the individual

(1) was not a state resident for at least 180 days immediately before departure from Alaska;

(2) repealed 1/1/2000.

(c) For purposes of

(1) AS 43.23.008(a)(1), receiving secondary or postsecondary education on a full-time basis means enrollment and attendance in good standing as a full-time student where participation requires absence from this state

(A) at an academic institution for any of the 7th - 12th grades consistent with (d) of this section;

(B) for the purpose of pursuing a vocational certificate, associate, baccalaureate, or graduate degree, as a full-time student at a college, university, junior or community college, or postsecondary vocational institution accredited by an accrediting agency that the United States Secretary of Education recognizes under 34 C.F.R. Part 602, or full-time participation in an internship program if the internship is required by the college or university as part of the student's academic program; for the purposes of this subparagraph, an individual in the last academic year before graduation who was carrying enough credits to graduate, but fewer than full-time credits for any one term, semester, or quarter, is considered to have been a full-time student at that time; or

(C) for the purpose of pursuing a vocational certificate, associate, baccalaureate, or graduate degree, as a full-time student

(i) at a Title IV institution recognized under 20 U.S.C. 1001 - 1155 (The Higher Education Act of 1965) and 34 C.F.R., Part 600; or

(ii) at a non-accredited college or university if students attending the college or university may qualify as eligible to receive a student loan from Nellie Mae, or if the college or university's credits or degrees are accepted by at least three Title IV institutions recognized under 20 U.S.C. 1001 - 1155 (the Higher Education Act of 1965) and 34 C.F.R., Part 600;

(D) for the purposes of completing an internship or residency program at a hospital or medical clinic;

(2) AS 43.23.008(a)(2), receiving vocational, professional, or other specific education on a full-time basis means attending a program for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state at an educational institution eligible to participate in financial aid programs administered by the Alaska Commission on Postsecondary Education.

(d) An individual clearly demonstrates that the primary reason for the individual's absence is to obtain a secondary education by living at a boarding school while attending grades 7 - 12 at an out-of-state institution. An individual who lives with an ineligible parent or ineligible permanent legal guardian while attending an out-of-state institution has not demonstrated that the primary reason for the individual's absence is to obtain a secondary education.

(e) Repealed 10/8/94.

(f) An individual whose absence or combination of absences, under a provision of AS 43.23.008 other than AS 43.23.008(a)(9) - (10) and (13), if the eligible resident whom the individual accompanies is absent for a reason specified in AS 43.23.008(9) or (10), totals more than five consecutive years is presumed not to have the intent to return to Alaska and remain indefinitely in Alaska. In such a case, the individual is not eligible for a dividend payment unless the individual provides, with the individual's application or in a timely response to a request by the department, documentation that demonstrates to the department's satisfaction an intent at all times during the absence or absences to return to Alaska and remain indefinitely in Alaska.

(g) When considering whether an individual who has been absent for more than five years has rebutted the presumption that the individual does not have the intent to return to Alaska and remain indefinitely in Alaska, the department will consider one or more of the following factors, as applicable:

(1) the length of the individual's absence compared to the time the individual spent in Alaska before departing on the absence;

(2) the frequency and duration of return trips to Alaska during the absence; the fact that the individual has returned to Alaska in order to meet the physical presence requirement of AS 43.23.005(a)(4) is not sufficient in itself to rebut the presumption of ineligibility;

(3) whether the individual's intent to return or remain is conditioned upon future events beyond the individual's control, such as economics or finding a job in Alaska;

(4) any ties the individual has established outside Alaska, such as maintenance of homes, payment of resident taxes, vehicle registrations, voter registration, driver's licenses, or receipt of benefits under a claim of residency in another state;

(5) the priority the individual gave Alaska on an employment assignment preference list, such as those used by military personnel;

(6) whether the individual made a career choice or chose a career path that does not allow the individual to reside in Alaska or return to Alaska; and

(7) any ties the individual has maintained in Alaska, such as ownership of real and personal property, voter registration, professional and business licenses, and any other factors demonstrating the individual's intent.

(h) When considering whether an individual who has been absent for more than five years has rebutted the presumption that the individual does not have the intent to return to Alaska and remain indefinitely in Alaska,

(1) the department will give greater weight to the claim of an individual who makes frequent voluntary return trips to Alaska during the period of the individual's absence than to the claim of an individual who does not;

(2) the department will generally consider that an individual who has not been physically present in Alaska for at least 30 cumulative days during the past five years has not rebutted the presumption; however, this consideration does not apply if the individual shows to the department's satisfaction that unavoidable circumstances prevented that individual from returning for at least 30 cumulative days during the past five years.

(i) Repealed 1/1/2000.

(j) The department will count whole days when determining the number of days an individual was absent from Alaska. The department will count the day an individual arrives or returns to Alaska as a day absent unless the individual previously left Alaska that same day. The department will count the day an individual leaves Alaska as a day an individual was in Alaska, unless the individual previously arrived or returned to Alaska that same day.

(k) For the purposes of AS 43.23.008(c), an individual is not considered otherwise eligible if the individual was absent from the state for more than 180 days in each of the preceding 10 qualifying years.

SENATE CS FOR CS FOR SS FOR HOUSE BILL NO. 190( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES FEIGE, Chenault, Herron, Peggy Wilson, Johnson, Muñoz, Lynn

A BILL

FOR AN ACT ENTITLED

"An Act relating to allowable absences from the state for purposes of eligibility for permanent fund dividends; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 43.23.005(a) is amended to read:

(a) An individual is eligible**, or conditionally eligible under AS 43.23.009,** to receive one permanent fund dividend **for** each year in an amount to be determined under AS 43.23.025 if the individual

(1) applies to the department;

(2) is a state resident on the date of application;

(3) was a state resident during the entire qualifying year;

(4) has been physically present in the state for at least 72 consecutive hours at some time during the prior two years before the current dividend year;

(5) is

(A) a citizen of the United States;

(B) an alien lawfully admitted for permanent residence in the United States;

(C) an alien with refugee status under federal law; or

(D) an alien that has been granted asylum under federal law;

(6) was, at all times during the qualifying year, physically present in the state or, if absent, was absent only as allowed in AS 43.23.008 **and met the requirements of AS 43.23.009**; and

(7) was in compliance during the qualifying year with the military selective service registration requirements imposed under 50 U.S.C. App. 453 (Military Selective Service Act), if those requirements were applicable to the individual, or has come into compliance after being notified of the lack of compliance.

*** Sec. 2.** AS 43.23.008(a) is amended to read:

(a) Subject to (b)**,** [AND] (c)**, and (e)** of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent

(1) receiving secondary or postsecondary education on a full-time basis;

(2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;

(3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or disabled dependent, an individual who is

(A) serving on active duty as a member of the armed forces of the United States; and

(B) eligible for a current year dividend;

(4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;

(5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;

(6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

(7) providing care for the individual's terminally ill family member;

(8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;

(9) serving as a member of the United States Congress;

(10) serving on the staff of a member from this state of the United States Congress;

(11) serving as an employee of the state in a field office or other location;

(12) accompanying a minor who is absent under (5) of this subsection;

(13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

(14) serving as a volunteer in the federal peace corps program;

(15) because of training or competing as a member of the United States Olympic Team;

(16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

(17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed

(A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;

(B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or

(C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

* **Sec. 3.** AS 43.23.008(a), as amended by sec. 2 of this Act, is amended to read:

(a) Subject to (b), (c), and (e) of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible**, or conditionally eligible under AS 43.23.009,** for a current year permanent fund dividend if the individual was absent

(1) receiving secondary or postsecondary education on a full-time basis;

(2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;

(3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or disabled dependent, an individual who is

(A) serving on active duty as a member of the armed forces of the United States; and

(B) eligible for a current year dividend;

(4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;

(5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;

(6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

(7) providing care for the individual's terminally ill family member;

(8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;

(9) serving as a member of the United States Congress;

(10) serving on the staff of a member from this state of the United States Congress;

(11) serving as an employee of the state in a field office or other location;

(12) accompanying a minor who is absent under (5) of this subsection;

(13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

(14) serving as a volunteer in the federal peace corps program;

(15) because of training or competing as a member of the United States Olympic Team;

(16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

(17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed

(A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;

(B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or

(C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

*** Sec. 4.** AS 43.23.008(c) is amended to read:

(c) An otherwise eligible individual who has been eligible for the immediately preceding 10 dividends despite being absent from the state for more than 180 days in each of the related 10 qualifying years is only eligible for the current year dividend if

the individual was absent 180 days or less during the qualifying year. This subsection does not apply to an absence under (a)(9) or (10) of this section or to an absence under (a)(13) of this section if the absence is to accompany an individual who is absent under (a)(9) or (10) of this section. **This subsection does not apply to an absence under (a)(3) of this section.**

*** Sec. 5.** AS 43.23.008 is amended by adding new subsections to read:

(e) After an individual has been absent from the state for more than 180 days in each of the five preceding qualifying years, the department shall presume that the individual is no longer a state resident. Subject to the limitation in (c) of this section, the individual may rebut this presumption by providing proof to the department that establishes, by clear and convincing evidence, that

(1) the individual was physically present in the state for at least 30 cumulative days during the past five years; and

(2) the individual is a state resident as defined in AS 43.23.095.

(f) To determine whether an individual intends to return and remain in the state indefinitely, the factors the department shall consider include

(1) the length of time the individual was absent from the state compared to the length of time the individual was physically present in the state;

(2) the frequency and duration of voluntary return trips to the state during the past five years;

(3) whether the individual's intent to return to and remain in the state is conditioned on future events beyond the individual's control, such as the financial circumstances of the individual or the ability of the individual to find employment in the state;

(4) the ties the individual has established with the state or another jurisdiction, as demonstrated by

(A) maintenance of a home;

(B) payment of resident taxes;

(C) registration of a vehicle;

(D) registration to vote and voting history;

(E) acquisition of a driver's license, business license, or

professional license; and

(F) receipt of benefits under a claim of residency in the state or another jurisdiction;

(5) the priority that the individual gave the state on an employment assignment preference list, including a list used by military personnel;

(6) whether the individual made a career choice or chose a career path that does not allow the individual to reside in or return to the state.

*** Sec. 6.** AS 43.23 is amended by adding a new section to read:

Sec. 43.23.009. Dividends of individuals with allowable absences. (a) Notwithstanding other provisions regarding eligibility for and payment of dividends, the dividend of an individual who was absent from the state during six or more qualifying years, as allowed in AS 43.23.008(a)(1) - (16), shall be paid to that individual on the first subsequent year that the individual is eligible for a dividend without claiming an allowable absence under AS 43.23.008(a)(1) - (16).

(b) If an individual who is conditionally eligible for a dividend that has not become payable under (a) of this section fails to be eligible for a subsequent year dividend, the individual's conditional eligibility for the dividend that has not become payable under (a) of this section is terminated, and that dividend may not be paid.

(c) If an individual who is conditionally eligible for a dividend that has not become payable under (a) of this section dies before conditional eligibility for the dividend is terminated under (b) of this section, the department shall pay the dividend to a personal representative of the estate.

(d) Notwithstanding other provisions, a dividend that has not become payable to an individual under (a) of this section is not subject to levy, execution, garnishment, attachment, or any other remedy for the collection of debt until that dividend becomes payable or is paid to the individual.

(e) If an individual who is conditionally eligible for a dividend under (a) of this section has an allowable absence from the state under AS 43.23.008(a) for 20 or more years, the individual's conditional eligibility is terminated.

*** Sec. 7.** AS 43.23.025(a) is amended to read:

(a) By October 1 of each year, the commissioner shall determine the value of

each permanent fund dividend for that year by

(1) determining the total amount available for dividend payments, which equals

(A) the amount of income of the Alaska permanent fund transferred to the dividend fund under AS 37.13.145(b) during the current year;

(B) plus the unexpended and unobligated balances of prior fiscal year appropriations that lapse into the dividend fund under AS 43.23.045(d);

(C) less the amount necessary to pay prior year dividends from the dividend fund in the current year under AS 43.23.005(h), **43.23.009,** 43.23.021, and 43.23.055(3) and (7);

(D) less the amount necessary to pay dividends from the dividend fund due to eligible applicants who, as determined by the department, filed for a previous year's dividend by the filing deadline but who were not included in a previous year's dividend computation;

(E) less appropriations from the dividend fund during the current year, including amounts to pay costs of administering the dividend program and the hold harmless provisions of AS 43.23.075;

(2) determining the number of individuals eligible to receive a dividend payment for the current year and the number of estates and successors eligible to receive a dividend payment for the current year under AS 43.23.005(h); and

(3) dividing the amount determined under (1) of this subsection by the amount determined under (2) of this subsection.

*** Sec. 8.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETROACTIVITY. Sections 2, 4, and 5 of this Act are retroactive to January 1, 2012.

*** Sec. 9.** Sections 1, 3, 6, and 7 of this Act take effect January 1, 2014.

*** Sec. 10.** Except as provided in sec. 9 of this Act, this Act takes effect immediately under AS 01.10.070(c).

David M. Talerico, Mayor

March 14, 2011

Representative Eric Feige
State Capitol Room 126
Juneau, Alaska 99801

Dear Representative Feige,

It is my privilege to write this letter of support for House Bill 190. I have personal knowledge of someone who was recently denied his Permanent Fund Dividend although he is a 1997 graduate of Tri-Valley High School in Healy, Alaska, and has dedicated over a decade of his life serving our country as a NAVY SEAL.

After graduation, this fine young man went on to college and has since committed his life to defend our freedom, but Alaska is still his home.

I can think of very few who deserve the courtesy of receiving a PFD more than this fine individual. If HB190 can accomplish this task, I encourage everyone's wholehearted support.

Thank you for sponsoring this bill.

Sincerely,

David M Talerico, Mayor
Denali Borough

Permanent Fund Dividend
Allowable Absences

Allowable Absence 1982

- Sec. 43.23.095. DEFINITIONS.
- (7) "state resident" means an individual who is physically present in the state with the intent to remain permanently in the state or, if the individual is not physically present in the state, intends to return to the state and is absent only for any of the following reasons:
- (A) vocational, professional, or other specific education for which a comparable program was not reasonably available in the state;
- (B) secondary or postsecondary education;
- (C) military service;
- (D) medical treatment;
- (E) service in Congress; or
- (F) other reasons which the commissioner may establish by regulation;

Allowable Absence 1997

- Sec. 43.23.095. Definitions.
- (8) "state resident" means an individual who is physically present in the state with the intent to remain permanently in the state under the requirements of AS 01.10.055 or, if the individual is not physically present in the state, intends to return to the state and remain permanently in the state under the requirements of AS 01.10.055, and is absent only for any of the following reasons:
    - (A) vocational, professional, or other specific education for which a comparable program was not reasonably available in the state;
    - (B) secondary or postsecondary education;
    - (C) military service;
    - (D) medical treatment;
    - (E) service in Congress;
    - (F) other reasons which the commissioner may establish by regulation;
    - (G) service in the Peace Corps;
    - (H) to care for the individual's terminally ill parent, spouse, sibling, child, or stepchild;
    - (I) for up to 220 days to settle the estate of the individual's deceased parent, spouse, sibling, child, or stepchild; or
    - (J) to care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

Allowable Absence 1997

- Sec. 01.10.055. Residency.
- (a) A person establishes residency in the state by being physically present in the state with the intent to remain in the state indefinitely and to make a home in the state.
- (b) A person demonstrates the intent required under (a) of this section
- (1) by maintaining a principal place of abode in the state for at least 30 days or for a longer period if a longer period is required by law or regulation; and
- (2) by providing other proof of intent as may be required by law or regulation, which may include proof that the person is not claiming residency outside the state or obtaining benefits under a claim of residency outside the state.
- (c) A person who establishes residency in the state remains a resident during an absence from the state unless during the absence the person establishes or claims residency in another state, territory or country, or performs other acts or is absent under circumstances that are inconsistent with the intent required under (a) of this section to remain a resident of this state.

Allowable Absence 1998

- Sec. 43.23.095. Definitions.
- (7) "state resident" means an individual who is physically present in the state with the intent to remain indefinitely in the state under the requirements of AS 01.10.055 or, if the individual is not physically present in the state, intends to return to the state and remain indefinitely in the state under the requirements of AS 01.10.055;

Allowable Absence 1998

Sec. 43.23.008. Allowable absences.

- (a) Subject to (b) and (c) of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent
- (1) receiving secondary or postsecondary education on a full-time basis;
- (2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;
- (3) serving on active duty as a member of the armed forces of the United States;

Allowable Absence 1998

Sec. 43.23.008. Allowable absences. *(continued)*

- (4) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician that treated the illness if the treatment or convalescence is not based on a need for climatic change;
- (5) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;
- (6) providing care for the individual's terminally ill parent, spouse, sibling, child, or stepchild;
- (7) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;

Allowable Absence 1998

- Sec. 43.23.008. Allowable absences. *(continued)*
- (8) serving as a member of the United States Congress;
- (9) serving on the staff of a member from this state of the United States Congress;
- (10) serving as an employee of the state in a field office or other location;
- (11) accompanying a minor who is absent under (4) of this subsection;
- (12) accompanying another eligible resident who is absent for a reason permitted under this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

Allowable Absence 1998

Sec. 43.23.008. Allowable absences. *(continued)*

- (13) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed
  - (A) 180 days if the individual is not claiming an absence under (1) - (12) of this subsection;
  - (B) 120 days in addition to any absence or cumulative absences claimed under (1) or (2) of this subsection if the individual is not claiming an absence under (3) - (12) of this subsection; or
  - (C) 45 days in addition to any absence or cumulative absences claimed under (1) - (12) of this subsection.

Allowable Absence 1998

Sec. 43.23.008. Allowable absences. *(continued)*

- (b) An individual may not claim an allowable absence under (a)(1) - (12) of this section unless the individual was a resident of the state for at least six consecutive months immediately before leaving the state.
- (c) An otherwise eligible individual who has been eligible for the immediately preceding 10 dividends despite being absent from the state for more than 180 days in each of the related 10 qualifying years is only eligible for the current year dividend if the individual was absent 180 days or less during the qualifying year. This subsection does not apply to an absence under (a)(8) or (9) of this section or to an absence under (a)(12) of this section if the absence is to accompany an individual who is absent under (a)(8) or (9) of this section.

Allowable Absence 2011

- Sec. 43.23.008. Allowable absences.
- (a) Subject to (b) and (c) of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent
- (1) receiving secondary or postsecondary education on a full-time basis;
- (2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;
- (3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or disabled dependent, an individual who is
- (A) serving on active duty as a member of the armed forces of the United States; and
- (B) eligible for a current year dividend;

Allowable Absence 2011

Sec. 43.23.008. Allowable absences. *(continued)*

- (4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;
- (5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;
- (6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

Allowable Absence 2011

- Sec. 43.23.008. Allowable absences. *(continued)*
- (7) providing care for the individual's terminally ill family member;
- (8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;
- (9) serving as a member of the United States Congress;
- (10) serving on the staff of a member from this state of the United States Congress;
- (11) serving as an employee of the state in a field office or other location;
- (12) accompanying a minor who is absent under (5) of this subsection;

Allowable Absence 2011

- Sec. 43.23.008. Allowable absences. *(continued)*
- (13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;
- (14) serving as a volunteer in the federal peace corps program;
- (15) because of training or competing as a member of the United States Olympic Team;
- (16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

Allowable Absence 2011

- Sec. 43.23.008. Allowable absences. *(continued)*
- (17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed
- (A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;
- (B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or
- (C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

Allowable Absence 2011

- Sec. 43.23.008. Allowable absences. *(continued)*
- (b) An individual may not claim an allowable absence under (a)(1) - (16) of this section unless the individual was a resident of the state for at least six consecutive months immediately before leaving the state.
- (c) An otherwise eligible individual who has been eligible for the immediately preceding 10 dividends despite being absent from the state for more than 180 days in each of the related 10 qualifying years is only eligible for the current year dividend if the individual was absent 180 days or less during the qualifying year. This subsection does not apply to an absence under (a)(9) or (10) of this section or to an absence under (a)(13) of this section if the absence is to accompany an individual who is absent under (a)(9) or (10) of this section.
- (d) For purposes of (a)(7) of this section, "family member" means a person who is
- (1) legally related to the individual through marriage or guardianship; or
- (2) the individual's sibling, parent, grandparent, son, daughter, grandson, granddaughter, uncle, aunt, niece, nephew, or first cousin.

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences.
- (a) Subject to (b) and (e) of this section, an otherwise eligible individual who is absent from the state during the qualifying year remains eligible for a current year permanent fund dividend if the individual was absent
- (1) receiving secondary or postsecondary education on a full-time basis;
- (2) receiving vocational, professional, or other specific education on a full-time basis for which, as determined by the Alaska Commission on Postsecondary Education, a comparable program is not reasonably available in the state;
- (3) serving on active duty as a member of the armed forces of the United States or accompanying, as that individual's spouse, minor dependent, or disabled dependent, an individual who is
- (A) serving on active duty as a member of the armed forces of the United States; and
- (B) eligible for a current year dividend;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (4) serving under foreign or coastal articles of employment aboard an oceangoing vessel of the United States merchant marine;
- (5) receiving continuous medical treatment recommended by a licensed physician or convalescing as recommended by the physician who treated the illness if the treatment or convalescence is not based on a need for climatic change;
- (6) providing care for a parent, spouse, sibling, child, or stepchild with a critical life-threatening illness whose treatment plan, as recommended by the attending physician, requires travel outside the state for treatment at a medical specialty complex;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (7) providing care for the individual's terminally ill family member;
- (8) settling the estate of the individual's deceased parent, spouse, sibling, child, or stepchild, provided the absence does not exceed 220 cumulative days;
- (9) serving as a member of the United States Congress;
- (10) serving on the staff of a member from this state of the United States Congress;
- (11) serving as an employee of the state in a field office or other location;
- (12) accompanying a minor who is absent under (5) of this subsection;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (13) accompanying another eligible resident who is absent for a reason permitted under (1), (2), (5) - (12), (16), or (17) of this subsection as the spouse, minor dependent, or disabled dependent of the eligible resident;

- (15) because of training or competing as a member of the United States Olympic Team;
- (16) participating for educational purposes in a student fellowship sponsored by the United States Department of Education or by the United States Department of State;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (17) for any reason consistent with the individual's intent to remain a state resident, provided the absence or cumulative absences do not exceed
- (A) 180 days in addition to any absence or cumulative absences claimed under (3) of this subsection if the individual is not claiming an absence under (1), (2), or (4) - (16) of this subsection;
- (B) 120 days in addition to any absence or cumulative absences claimed under (1) - (3) of this subsection if the individual is not claiming an absence under (4) - (16) of this subsection but is claiming an absence under (1) or (2) of this subsection; or
- (C) 45 days in addition to any absence or cumulative absences claimed under (1) - (16) of this subsection if the individual is claiming an absence under (4) - (16) of this subsection.

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (b) An individual may not claim an allowable absence under (a)(1) - (16) of this section unless the individual was a resident of the state for at least six consecutive months immediately before leaving the state.
- (d) For purposes of (a)(7) of this section, "family member" means a person who is
- (1) legally related to the individual through marriage or guardianship; or
- (2) the individual's sibling, parent, grandparent, son, daughter, grandson, granddaughter, uncle, aunt, niece, nephew, or first cousin.

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (e) After an individual has been absent from the state for more than 180 days in each of the five preceding qualifying years, the department shall presume that the individual is no longer a state resident. The individual may rebut this presumption by providing documentation to the department that establishes, by clear and convincing evidence, that
- (1) the individual was physically present in the state for at least 30 cumulative days during the past fie years; and
- (2) the individual is a state resident as defined in AS 43.23.095(7).

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (f) To determine whether an individual intends to return and remain in the state indefinitely, the department shall consider
- (1) the length of time the individual was absent from the state compared to the length of time the individual was physically present in the state;
- (2) the frequency and duration of voluntary return trips to the state during the past five years;
- (3) whether the individual's intent to return to and remain in the state is conditioned on future events beyond the individual's control, such as the financial circumstances of the individual or the ability of the individual to find employment in the state;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (4) the ties the individual has established with the state or another jurisdiction, as demonstrated by
- (A) maintenance of a home;
- (B) payment of resident taxes;
- (C) registration of a vehicle;
- (D) registration to vote and voting history;
- (E) acquisition of a driver's license, business license, or professional license; and
- (F) receipt of benefits under a claim of residency in the state or another jurisdiction;

Allowable Absence After HB 190

- Sec. 43.23.008. Allowable absences. *(continued)*
- (5) the priority that the individual gave the state on an employment assignment preference list, including a list used by military personnel;
- (6) whether the individual made a career choice or chose a career path that does not allow the individual to reside in or return to the state.

RE: HB 204 & 205 Hearing Request

I am requesting a hearing for two bills I introduced this legislative session. I would like both bills to move along in the process together; therefore I am requesting the bills to be scheduled for the same committee hearing.

HB 204- "An act relating to the State Procurement Code, including the use of small procurement provisions for certain amounts of leased space, the requirement of Alaska business license proof for Alaska bidder and other procurement preferences, the registration of construction contract bidders and offerors, the establishment and maintenance of lists of person who want to provide supplies or services to the state, state agencies, and state instrumentalities, electronic bids and proposals, small procurements, and writings; and providing for an effective date."

HB 205- "An act relating to state and public entity procurement, including the State Procurement Code, procurement preferences and contract awards; relating to the meaning of 'Alaska bidder'; and providing for an effective date."

Thank you for your consideration and attention to my legislation. Should you have any questions please contact Kim Skipper or Laura Pierre in my office.

Sponsor Statement

House Bill 204

"An Act relating to the State Procurement Code, including the use of small procurement provisions for certain amounts of leased space, the requirement of Alaska business license proof for Alaska bidder and other procurement preferences, the registration of construction contract bidders and offerors, the establishment and maintenance of lists of persons who want to provide supplies or services to the state, state agencies, and state instrumentalities, electronic bids and proposals, small procurements, signatures, and writings; and providing for an effective date."

House Bill 204 makes changes to the state's procurement code. Collectively, these changes streamline the procurement code to ensure consistent application of the law, and results in a more understandable, efficient procurement process. These changes are needed to prevent failed procurements and provide modern procurement tools and techniques to the State's workforce.

This legislation would clarify Alaska business license requirements for competitive sealed bids and proposals and qualification for the Alaska bidder preference, which should reduce the number of bids and proposals the state currently disqualifies on technical grounds.

The dollar threshold for informal or small procurements is increased, which will simplify many purchases that are now procured via time consuming and more complex formal procurement rules.

HB 204 updates our Procurement Code and provides tools and techniques to our employees. The bill allows for electronic receipt of bids and signatures. The bill also eliminates the requirement to maintain outdated vendor lists in a time when commerce is moving online.

It has been many years since our procurement code has been modernized. These changes will position us to become more efficient and effective in our purchasing and contracting.

I appreciate your support and consideration of this legislation.

Alaska State Legislature

Representative Anna Fairclough – House District 17

HB 204 Sectional Analysis

*** Section 1:** Amends AS 36.30.080(f)

Increases the threshold limit for small procurements of leased space from 3,000 square feet to 7,000 square feet, consistent with section 7.

*** Section 2:** Amends AS 36.30.110(b)

Clarifies Alaska business license requirements for competitive sealed bids and qualification for the Alaska bidder preference. Change would require bidders to show proof of their Alaska Business License prior to award, but would require the license at the time of bid submission in order to qualify for the Alaska bidder preference.

*** Section 3:** Amends AS 36.30.130(a)

Eliminates reference to a procurement officer's use of vendor lists, reflecting the repeal of the statute establishing the vendor lists, consistent with section 10.

*** Section 4:** Amends AS 36.30.210(b)

Clarifies construction contractor registration requirements, now explicitly requiring registration before award of a contract.

*** Section 5:** Amends AS 36.30.210(e)

Clarifies Alaska business license requirements for competitive sealed proposals and qualification for the Alaska bidder preference using language consistent with that used in section 2.

*** Section 6:** Amends AS 36.30 by adding a new section 36.30.290

Adds a new section allowing an agency to accept electronic bids and proposals.

Session: Alaska State Capitol • Juneau, AK 99801 • 907-465-3777 • Fax 907-465-2819
Interim: 10928 Eagle River Road, Suite 238 • Eagle River, AK 99577 • 907-694-8944 • Fax 907-694-8945
Representative_Anna_Fairclough@legis.state.ak.us

* **Section 7:** Amends AS 36.30.320(a)

Increases the threshold under which a state agency may use informal procurement process to $100,000 for goods and professional services, to $200,000 for construction, and 7,000 square feet for lease of space.

* **Section 8:** Amends AS 36.30.655

Eliminates reference to the removal of debarred or suspended persons from vendor lists, reflecting the repeal of a law establishing the vendor lists, consistent with section 10.

* **Section 9:** Amends AS 36.30.990

Adds new definitions for "in writing" and "written."

* **Section 10:** Repeals statute establishing the vendor list.

* **Section 11:** Amends the uncodified law of the State of Alaska

Clarifies the application of the procurement act to pending solicitations during transition period.

* **Section 12:** Effective Date

Language making the procurement act effective immediately.

Alaska State Legislature

Representative Anna Fairclough – House District 17

Sponsor Statement

House Bill 205

"An Act relating to state and public entity procurement, including the State Procurement Code, procurement preferences, and contract awards; relating to the meaning of 'Alaska bidder'; and providing for an effective date."

House Bill 205 makes changes to the state's procurement code. Collectively, these changes streamline the procurement code to ensure consistent application of the law, and results in a more understandable, efficient procurement process for the state's business partners as well as our employees who conduct procurements.

Streamlining is accomplished by simplifying the application of our many preferences, which is currently complex and confusing for employees and vendors requiring a certain level of expertise. The bill makes application of the preferences uniform – currently, preferences do not contain the same language so they must be applied differently. It also clarifies which preferences are cumulative and those that may not be combined.

House Bill 205 would add a new section to the procurement code consolidating the Alaska bidder preference, Alaska veterans' preference, and other preferences formerly at AS 36.30.170(b). This section also simplifies the qualification for the disability and employment program preferences and eliminates the seldom used employers of people with disabilities preference.

With the passage of this legislation, our procurement process will be simplified and more user friendly to Alaska business owners and our state workers.

I appreciate your support and consideration of this legislation.

Alaska State Legislature

Representative Anna Fairclough — House District 17

HB 205 Sectional Analysis

*** Section 1:** Amends AS 24.55.275

Updates a citation to reflect the renumbering of a preference.

*** Section 2:** Amends AS 36.15.050(a)

Amends the local agricultural preference to grant a seven percent cost preference to the qualifying bid rather than to the low bid, making this preference consistent with other procurement preferences.

*** Section 3:** Amends AS 36.15.050(b)

Amends the local fisheries preference to grant a seven percent cost preference to the qualifying bid rather than to the low bid, making this preference consistent with other procurement preferences.

*** Section 4:** Amends AS 36.15.050 by adding a new subsection (h)

Amends the local agricultural and fisheries preferences to disallow a bidder from being granted both a local agricultural/fisheries preference and an Alaska product preference under another statute.

*** Section 5:** Amends AS 36.30.015(e)

Updates a citation to reflect the renumbering of a preference.

*** Section 6:** Amends AS 36.30.015(f)

Updates a citation to reflect the renumbering of a preference.

*** Section 7:** Amends AS 36.30.015(h)

Updates a citation to reflect the renumbering of a preference.

Session: Alaska State Capitol • Juneau, AK 99801 • 907-465-3777 • Fax 907-465-2819
Interim: 10928 Eagle River Road, Suite 238 • Eagle River, AK 99577 • 907-694-8944 • Fax 907-694-8945
Representative_Anna_Fairclough@legis.state.ak.us

* **Section 8:** Amends AS 36.30.020

Updates a citation to reflect the renumbering of a preference.

* **Section 9:** Amends AS 36.30.030

Updates a citation to reflect the renumbering of a preference.

* **Section 10:** Amends AS 36.30.170

Updates a citation to reflect the renumbering of the Alaska bidder preference.

* **Section 11:** Amends AS 36.30 by adding a new section 36.30.321

Adds a new section consolidating the Alaska bidder preference, Alaska veterans' preference, and other preferences formerly at AS 36.30.170(b). This section also simplifies the qualification for the disability and employment program preferences, eliminates the seldom used employers of people with disabilities preference, and excludes real estate leases from application of procurement preferences.

* **Section 12:** Amends AS 36.30.322(a)

Modifies the use of local forest products statute to grant a seven percent cost preference to the qualifying bid rather than to the low bid, making this preference consistent with other preferences.

* **Section 13:** Amends AS 36.30.336 by repealing and reenacting

Clarifies which preferences are cumulative and which may not be combined. (example: bidders can not claim both an employment program preference and a disabled bidder preference)

* **Section 14:** Amends AS 36.30.990 by adding a new paragraph

Moves the definition for "Alaska bidder" (formerly contained in 36.30.170(b).

* **Section 15:** Amends AS 36.90.049(a)

Updates a citation to reflect the renumbering of a preference.

* **Section 16:** Amends AS 38.35.017(a)

Updates a citation to reflect the renumbering of a preference.

* **Section 17:** Repeals statute establishing the veteran preference because it has been relocated to AS 36.30.321(f). Also repeals employment program language (not the preference itself) and relationship to other preferences.

Session: Alaska State Capitol • Juneau, AK 99801 • 907-465-3777 • Fax 907-465-2819
Interim: 10928 Eagle River Road, Suite 238 • Eagle River, AK 99577 • 907-694-8944 • Fax 907-694-8945
Representative_Anna_Fairclough@legis.state.ak.us

* **Section 18:** Amends the uncodified law of the State of Alaska

Clarifies the application of the procurement act to pending solicitations during transition period.

* **Section 19:** Effective Date

Language making the procurement act effective immediately.

SENATE CS FOR CS FOR HOUSE BILL NO. 216(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES PEGGY WILSON, Lynn, Costello, Kawasaki, Kerttula, Johnson

A BILL

FOR AN ACT ENTITLED

"An Act relating to fiscal notes for bills directing or resulting in the adoption, amendment, or repeal of regulations, and to the notice required for the proposed adoption, amendment, or repeal of a regulation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 24.08.035 is amended by adding new subsections to read:

(f) In addition to the other requirements of this section, if a bill directs an agency in the executive branch of state government to adopt, amend, or repeal a regulation or will result in an agency's adopting, amending, or repealing a regulation, the department affected shall include in the fiscal note for the bill a specific time by which the agency shall adopt, amend, or repeal the regulation. If the agency is not able to meet the deadline set in the fiscal note, the agency shall

(1) set a new deadline; and

(2) report to the Administrative Regulation Review Committee the new deadline and the reasons for being unable to meet the deadline set in the fiscal

note.

(g) In (f) of this section, "agency" includes the Alaska Housing Finance Corporation, the Alaska Industrial Development and Export Authority, the Alaska Energy Authority, the Alaska Public Offices Commission, and the Alaska Oil and Gas Conservation Commission, but does not include other boards or commissions.

*** Sec. 2.** AS 44.62.200 is amended by adding a new subsection to read:

(d) When a state agency, other than the Regulatory Commission of Alaska, the Board of Fisheries, or the Board of Game, posts, furnishes, or otherwise provides a notice of the proposed adoption, amendment, or repeal of a regulation under AS 44.62.190, a brief description of the changes made by the proposed adoption, amendment, or repeal must accompany the notice. However, if, under AS 44.62.190(a), the notice is published in a newspaper or trade or industry publication or is broadcast, this subsection does not require that the brief description otherwise required by this subsection accompany the publication or the broadcast. To the extent practicable, the brief description shall be written in clear, easily readable language that a person without a legal background is able to understand. Notwithstanding AS 44.62.300, an action may not be brought for failure of the brief description to comply with the requirements of this subsection relating to the description of the changes or its clarity and readability.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 24.08.035(f) and (g), enacted by sec. 1 of this Act, apply to bills that are filed on or after the effective date of this Act.

(b) AS 44.62.200(d), enacted by sec. 2 of this Act, applies to the proposed adoption, amendment, or repeal of a regulation on or after the effective date of this Act.

*** Sec. 4.** This Act takes effect July 1, 2012.

SPONSOR STATEMENT
House Bill 216

"An Act relating to fiscal notes for bills directing or resulting in the adoption, amendment, or repeal of regulations, and to the notice required for the proposed adoption, amendment, or repeal of a regulation; and providing for an effective date."

HB 216 will accomplish two goals relating to changes to state regulations; increasing the speed with which regulations are written, and describing in plain, easy-to-understand language all regulations that are adopted, amended or repealed.

Legislators and the public have often been frustrated by the fact that months, or even years, sometimes pass between the time that a bill is passed by the legislature and the time the regulation is implemented. The result is; Alaska residents, businesses and legislators are confused about what the change means. As an example: as we were looking at the governor's House Bill 110, on oil taxes, we didn't have proof of what regulations were currently being enforced because the ACES regulations hadn't even been written - three years after we passed the legislation. The same confusion can impact individuals who are unclear about when, or if, new regulations concerning their business or recreational activities take effect. HB 216 states that any bill requiring creation or modification of any regulation must include a regulation completion deadline.

The other problem addressed by this bill is the confusion and lack of understanding of many proposed regulation changes or new additions. This confusion is caused by the legalese used to describe proposed regulations. This language, while accurately and legally describing proposed regulations, is difficult to understand by the average individual. HB 216 will require that all proposed regulation changes include descriptions, in plain English, of what the original regulation does and what the proposed change will do.

Passage of this legislation will encourage public participation in the regulation review process, as people find it easier to understand what the regulations mean to them. It will also help speed passed legislation to implementation when regulations are completed in a set, scheduled timeframe.

Based on input from committee members and the Department of Law, several amendments were passed in the State Affairs and Judiciary committees that help to clarify the language used in the bill. No substantive changes have been made to the original intent of the bill.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 216

Analysis

"An Act relating to deadlines in bills directing the adoption of regulations and to the informative summary required for the proposed adoption, amendment, or repeal of a regulation."

If a proposed bill will require regulations or result in a change to existing regulations, Section 1 would require agencies to state in the fiscal note for the bill a time by which the agency is to adopt, amend, or repeal the regulation. If the agency does not meet the deadline, it would set a new deadline and report to the Administrative Regulation Review Committee the new deadline and the reasons for not meeting the deadline that was established in the fiscal note.

Section 2 would require for a notice, posted on the Online Public Notice site or furnished electronically by a state agency, proposing adoption, amendment, or repeal of existing regulations, that a brief description accompany the notice and be written in clear, easily readable language that a person without a legal background is able to understand. The Regulatory Commission of Alaska, the Board of Fisheries, and the Board of Game would be exempt from Section 2.

No fiscal impact is expected as a result of Section 1. The fiscal impact resulting from Section 2 for future legislation is expected to be minimal. If the cost cannot be absorbed within an agency's budget, agencies will reflect this in the note for future legislation.

ALASKA MUNICIPAL LEAGUE
Alaska Conference of Mayors

217 Second Street, Suite 200 • Juneau, Alaska 99801
Tel (907) 586-1325 • Fax (907) 463-5480 • www.akml.org

January 30, 2012

Representative Peggy Wilson
State Capitol
Room 408
Juneau, Alaska 99801

Dear Representative Wilson,

I am writing to express the Alaska Municipal League's support for HB216, particularly the amendments to Section 2, Chapter 3 of AS 44.62.045.

It makes perfect sense to require the agencies to provide an informative summary of proposed regulations which describe how the amendments will change existing regulation "in clear, easily readable language that a person without a legal background is able to understand."

AML was forced to hire legal counsel (at a cost of over $8,000) to analyze sections of the new regulations proposed by APOC dealing with comprehensive revisions to Public Official and Legislative Finance Disclosure and Campaign Disclosure. It is AML's job to keep local elected officials and their municipal employees current on legislation, regulations and statutes that affect their local governments. When the agencies are unwilling to help us understand these regulations, we must do what we can to obtain the information.

In late 2010, the Alaska Public Offices Commission (APOC) published proposed revisions for public review and comment. AML requested from APOC, some explanation of what changes were encompassed in the new proposed regulations, as the document was approximately 125 pages long. APOC refused to provide any detailed explanation of the changes; in fact, the staff told us they had been instructed not to answer any questions about the proposed regulations. Without clarification of the new regulations, it makes it much more difficult to comment. We then hired legal counsel to perform a side-by-side examination of the old regulations and the new regulations. Only after enlisting the support from the Governor's office and many legislators were we able to secure additional information from APOC.

Most municipalities have numerous boards and commissions made up of community volunteers who are subject to APOC financial disclosure regulations. These private citizens are not equipped by training, nor do they have the time to understand and translate new regulations without the help from APOC. A plain, clear, easily readable explanation of the changes would have helped local officials understand and comment

on the new regulations. It appears to me that APOC, while drafting changes, could have done computerized "track" changes as the drafting process was taking place.

The opportunity for public comment on new regulations will not result in any substantive input if the adopting agency does not assist the public in understanding new regulatory changes. It also is quite ironic that the agency tasked with keeping government more transparent refuses to help the public understand proposed regulations.

It should not be difficult for an agency to comply with HB216, as they presumably understand what changes they are proposing and how they will affect the public. It is unreasonable to expect members of the public to read, translate, cross-reference and understand new regulation without some explanation from the authors.

Again, AML supports the adoption of HB216, as it will assist elected and volunteer municipal officials better understand how they are regulated by state agencies.

Thank you for the opportunity to comment.

Sincerely,

Kathie Wasserman

To: Representative Bill Stoltze, Co-Chair, Finance Committee
Representative Bill Thomas, Co-Chair, Finance Committee

From: Representative Peggy Wilson

RE: **CHANGES to HB 216 "Regulations: Informative Summary/Bills"**

Since the original version of HB 216 was drafted, it has had several amendments and language changes, but the basic premise of the bill has not changed.

The State Affairs committee passed two amendments that clarified the informative summary language.

The Judicial committee met several times and finessed additional changes that helped to make this bill very clear. We also worked with the Department of Law to incorporate some of their suggestions.

A summary of the changes made since the bill was introduced include:

- The deadline for adopting changes will now be stated in the fiscal note, rather than in the bill itself. This change necessitated a change in the title.
- Language stating that the agency, and not the legislature, sets the deadline - is clarified.
- The AHFC, AIDEA, AEA, APOC, and AOGCC are expected to comply with the requirements of Section 1, but all other state boards and commissions are exempted.
- Agencies must now report to the Legislative Regulatory Review committee if a deadline is not met; and set a new deadline for adoption of the regulation.
- The brief descriptive summaries will accompany **new** regulations, as well as changes and repeals of regulations.
- Changes in Section 2 clarify that the 'posted notice' should not be confused with the formal 'notice'.
- Language was changed to target the brief descriptive summaries to online and email notification, rather than to print media.
- Protection from legal action is provided to agencies, should the clarity or readability of the brief descriptive summary be misinterpreted or questioned.
- An effective date was added.

The contact for HB 216 is Sheila Finkenbinder, 465-6887.

SENATOR Menard

A BILL

FOR AN ACT ENTITLED

"An Act relating to picketing at a funeral."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS AND LEGISLATIVE INTENT. (a) The legislature finds that families have a legitimate and legally cognizable interest in organizing and attending funerals for deceased relatives, and that the rights of families to mourn the deaths of relatives peacefully and privately are violated when funerals are targeted for picketing. The legislature also finds that family members attending a funeral service are a captive audience, and that it is very difficult for grieving family members to avoid picketing within 150 feet of the boundary of a cemetery, mortuary, church, or other facility where a funeral is being held up to an hour before the beginning of a funeral and until an hour after the conclusion of a funeral.

(b) The legislature also recognizes that individuals have a constitutional right to free speech, and that, in the context of funeral ceremonies, the competing interests of picketers and grieving family members must be balanced. Therefore, the legislature finds and intends that

the purpose of AS 11.61.110(a)(8), as enacted by sec. 2 of this Act, is to protect the privacy of grieving families and to preserve the peaceful character of a cemetery, mortuary, church, or other facility designated as the scheduled location for the funeral of a deceased family member, while still providing picketers the opportunity to communicate their message at a time and place that minimizes interference with the rights of grieving family members of the deceased.

* **Sec. 2.** AS 11.61.110(a) is amended to read:

(a) A person commits the crime of disorderly conduct if,

(1) with intent to disturb the peace and privacy of another not physically on the same premises or with reckless disregard that the conduct is having that effect after being informed that it is having that effect, the person makes unreasonably loud noise;

(2) in a public place or in a private place of another without consent, and with intent to disturb the peace and privacy of another or with reckless disregard that the conduct is having that effect after being informed that it is having that effect, the person makes unreasonably loud noise;

(3) in a public place, when a crime has occurred, the person refuses to comply with a lawful order of a peace officer to disperse;

(4) in a private place, the person refuses to comply with an order of a peace officer to leave premises in which the person has neither a right of possession nor the express invitation to remain of a person having a right of possession;

(5) in a public or private place, the person challenges another to fight or engages in fighting other than in self-defense;

(6) the person recklessly creates a hazardous condition for others by an act which has no legal justification or excuse; [OR]

(7) the offender intentionally exposes the offender's buttock or anus to another with reckless disregard for the offensive or insulting effect the act may have on that person**; or**

(8) the person knowingly engages in picketing with reckless disregard that the picketing occurs

(A) inside of a cemetery, mortuary, church, or other facility

or within 150 feet of that facility's outer boundary; and

(B) while a funeral is occurring at the cemetery, mortuary, church, or other facility or during the 60-minute period

(i) before the start of the funeral; or

(ii) after the conclusion of the funeral.

*** Sec. 3.** AS 11.61.110(b) is amended to read:

(b) **In** [AS USED IN] this section,

(1) "funeral" means a ceremony or memorial service held in connection with the burial, death, or cremation of a deceased person, but does not include a funeral procession on a public street or highway;

(2) "noise" is "unreasonably loud" if, considering the nature and purpose of the defendant's conduct and the circumstances known to the defendant, including the nature of the location and the time of day or night, the conduct involves a gross deviation from the standard of conduct that a reasonable person would follow in the same situation**; "noise"** [. "NOISE"] does not include speech that is constitutionally protected**;**

(3) "picketing" means an act directed toward a funeral that disrupts or disturbs that funeral.

MEMORANDUM

Date: March 13, 2012

To: Senator Bill Wielechowski, Senate State Affairs Chair

From: Representative Thomas

Re: HB 232 "An Act relating to picketing or protests at a funeral."

I respectfully request that the Senate State Affairs Committee hear HB 234, at its earliest convenience.

HB 234 establishes a buffer zone around the boundary of a cemetery, church or other facility where a funeral service is occurring.

If you have any questions about this bill please contact Aaron Schroeder, in my office, at 465-3732.

Thank you.

Sponsor Statement HB 234
"An Act relating to picketing or protests at a funeral."

The death of a loved one is one of life's most tragic events. More than 46 states across the country have enacted laws protecting families at funerals during their time of grief. These laws establish standards of conduct which respect the family's need for respect and privacy during this difficult time while also allowing others to express their viewpoints.

HB 234 brings Alaska in line with the majority of states and adopts the guidelines which govern conduct during a funeral. HB 234 is modeled after the guidelines used by our national cemeteries and requires that:

- Picketing not take place within 150 feet of the boundary of the cemetery, church, or other facility where the funeral services are occurring, and
- Picketing not take place one hour before or one hour after the service.

This bill asks anyone within the area of a funeral service to conduct themselves in a respectful manner for the duration of the service. HB 234 looks out for the interests of the grieving families while preserving the rights of others to voice their opinions.

I strongly urge your support of HB 234.

MEMORANDUM March 10, 2011

SUBJECT: Amendment to AS 11.61.110 (disorderly conduct) adding picketing or protesting at a funeral as an offense
(Work Order No. 27-LS0627\A)

TO: Representative Bob Herron
Attn: Rob Earl
Representative Bill Thomas
Attn: Kaci Schroeder

FROM: Doug Gardner
Director

You asked for a bill that would limit picketing and protests at a funeral, and requested a criminal law solution as a way to achieve this limitation. I chose to amend AS 11.61.110, to add picketing or protesting at a funeral to the offense of Disorderly Conduct. Enclosed is a draft that I believe accomplishes your request. Given the extensive constitutional issues presented by this bill, I have briefly outlined the issues that may come up if this bill is introduced. If you would like more detail, please advise, and I can provide it.

Overview

At present, in excess of 45 states have passed laws that in one way or another, are very similar to the attached draft bill. Much of the litigation involving various state funeral protest laws has been concentrated in the states that comprise the Sixth Circuit (KY., MI., OH., and TN.), and the Eighth Circuit (AR., IA., MN., MO., NE., S.D.) federal courts. An observation about this trend is that the Westboro Baptist Church, which is a party to or involved in virtually all of these cases is based in Topeka, Kansas, and engages in protest activities with more frequency in areas near the church's home town. Given the volume of litigation in the Sixth and Eighth Circuit courts, and eventually at the appellate level, I chose to draft this bill based on lessons learned in litigation in these circuits, and to base this bill on state statutes that have passed constitutional muster. However, it is important to observe, that the U. S. Supreme Court has yet to address a criminal law involving funeral picketing or protests. The recent high profile decision in *Snyder v. Phelps*, 2011 WL 709517 (U.S.), was a decision that involved civil litigation for money damages, and not a criminal law, so the decision, while instructive, does not resolve some of the issues that are unique to criminal law in the context of free speech.

Snyder v. Phelps

With that backdrop, I want to briefly address and summarize the recent decision in *Snyder v. Phelps* issued by the Supreme Court last week. Mr. Snyder sued Westboro Church leader Albert Phelps in a civil action based on the theory that picketing, and the content of that picketing by Westboro Church at his son's funeral (Snyder's son was a Lance Corporal in the United States Marine Corps, and died as a result of injuries sustained in Iraq in the line of duty), was done in a way that intentionally caused him emotional distress. Some of the slogans on the pickets that Mr. Snyder acknowledged in court proceedings that he could briefly see the tops of from his position in the motorcade to the funeral, included "Thank God for Dead Soldiers," "Fags Doom Nations," "America is Doomed," "Priests Rape Boys," and "You're Going to Hell."

The first question for the *Snyder* Court was whether the highest protection afforded speech by the First Amendment of the U. S. Constitution applied to Westboro's speech. The Court concluded, that while offensive to many, the issues raised by Westboro's picket signs were public speech entitled to the "highest rung" of protection in the hierarchy of First Amendment protections. As a consequence, the Court decided that the jury verdict for over $10 million returned at trial in the lower district court had to be set aside because the public speech of Westboro was protected by the First Amendment, and as a consequence was not actionable in a claim for money damages by Mr. Snyder.

In *Snyder*, Chief Justice Roberts, writing for the majority of the Court, observed that after the protest in 2006 by Westboro church at Mr. Snyder's son's funeral, the Maryland Legislature passed a law that prohibits picketing within 100 feet of a funeral service or procession, and noted that Westboro's picketing would have complied with that law. The Court clearly wanted to point out that its decision in *Snyder* did not address Maryland's picketing law, and that "to the extent [law's like Maryland's] are content neutral, they raise very different questions from the tort verdict at issue in [*Snyder*]." However, Chief Justice Roberts noted that the Supreme Court has, in past cases where a law was content neutral, allowed time, place, and manner restrictions and regulation of public speech. These situations were noted by the Chief Justice as picketing around a home and a buffer zone between protesters and an abortion clinic entrance. *Snyder v. Phelps*, 2011 WL 709517 p.17-18 (U.S.), *citing Frisby v. Schultz*, 487 U.S. 474, 479 (1988) (holding that a state has a significant interest in banning targeted picketing in front of private residences where individuals are captive audiences); *Madsen v. Women's Health Center, Inc.*, 512 U.S. 753, 768 (1994) (court rejected a 300 foot buffer zone around an abortion clinic as overly broad restriction, but court approved a 36 foot buffer zone around clinic entrance).

Eighth Circuit Cases

The Eighth Circuit Court of Appeals, in *Olmer v. Lincoln*, 192 F.3d 1176 (8th Cir. 1999), decided in the context of an ordinance that restricted picketing of churches and other religious premises 30 minutes before during and after a funeral service, that while the state has a significant interest in banning targeted speech in front of a person's home

where individuals are captive audiences, that churches are distinguishable, and that the state's interest regarding a church is not as great. As a consequence, the Eighth Circuit cases where funeral protest ordinances or statutes have been litigated have been found unconstitutional, because the state interest in regulating public speech has not been significant enough to justify the state-imposed time, place, and manner restrictions. So, when addressing a content neutral restriction on speech, the Eighth Circuit Court of Appeals has not found funeral protest statutes constitutional, based on the state's failure to meet the first of the three-part test that the court applied in *Olmer*: (1) does the statute regulating speech serve a significant state interest; (2) is the statute narrowly tailored; and (3) does it leave open ample alternative channels of communication.

Despite the *Olmer* decision, a recent decision by a trial court in the Eighth Circuit regarding a Nebraska state criminal statute banning funeral protests within 300 feet of a cemetery, etc., and one hour before until one hour after a funeral, was upheld as constitutional. *Phelps-Roper v. Heineman*, 720 F.Supp.2d 1090 (D. Nebraska 2010). In *Heineman*, the trial court distinguished the *Olmer* decision, finding that the Nebraska statute, which included findings articulating the state's interest in protecting families of the deceased, demonstrated a significant state interest. The trial court also held, that despite the *Olmer*, decision, that it considered grieving family members a captive audience at a funeral, who may be under stress and may suffer emotional harm under circumstances at a funeral where they are unable to avoid pickets and protests. The *Heineman* case is on appeal to the Eighth Circuit Court of Appeals. In summary, the *Heineman* court found that in the case of the content neutral Nebraska statute: (1) the state demonstrated a significant state interest in protecting family members; (2) the statute was narrowly tailored both in time restrictions (hour before until an hour after the funeral with a 300 foot buffer); and that (3) alternate means of speech to communicate Westboro's messages exist (buffer zone is limited to an hour before until an hour after funeral and protesting outside the buffer zone is not restricted in any way at any time).

Sixth Circuit Cases

For purposes of this brief summary, it is not necessary to go into too much detail regarding funeral protests case law in the Sixth Circuit. In *Phelps-Roper v. Bob Taft*, 523 F.Supp.2d 612 (N.D. Ohio 2007), the trial court judge considered an Ohio statute essentially the same as the Nebraska statute in *Heineman*, which created a "fixed" buffer zone of 300 feet[1] around a church or other place where a funeral was being held. The

---

[1] Most of the state funeral protest statutes I reviewed provided for a 300 foot buffer zone between protesters and funeral attendees. I would note, that while the *Heineman* court and the *Taft* court found 300 foot buffer zones narrowly tailored and allowing alternative channels for speech, other courts have found 300 foot buffer zones overly broad, burdening substantially more speech than necessary to further the government's interest. See *Phelps-Roper v. County of St. Charles*, 2011 WL 227561 (E.D. MO.). I drafted this bill consistent with a 200 foot buffer, which is more conservative than the buffer found in

Ohio statute also imposed a "floating" buffer zone of 300 feet around a funeral procession. The court found the floating buffer unconstitutional, as has every court that I am aware of that has considered the "floating" buffer zone. I would note that on appeal, the Ohio attorney general's office made the decision not to cross-appeal or litigate the part of the trial court's decision involving the floating buffer zone, so I will not address that issue further. With regard to the "fixed" buffer zone, both the trial court and the Sixth Circuit Court of Appeals found the Ohio funeral protest statute content neutral, and constitutional for essentially the same reasons that the *Heineman* trial court did in Nebraska. *Phelps-Roper v. Strickland*, 539 F.3d 356 (6th Cir. 2008).

Alaska Law and Summary of Drafting Issues

In drafting the enclosed bill amending AS 11.61.110, to add a funeral picketing and protest provision to the offenses comprising disorderly conduct in Alaska, I tried to track both the legislative finding language in Revised Statute of Nebraska § 28-1320.01 to 28-1320.03 (2008), and the language of the statute itself. By tracking the Nebraska language and legislative findings and intent, the draft bill focuses on: (1) a statute that has already been found to be content-neutral; (2) a judicial finding of a strong state interest in protecting family members of the deceased, as opposed to a broader group of funeral attendees; (3) statutory language that only restricts picketing focused on a funeral, similar to the language of the ordinance in *Frisby*, 487 U.S. at 482; and (4) a statute that has been held to allow alternative channels for communication.

In Alaska, if the proposed amendments to AS 11.61.110 are scrutinized by the courts as time, place, and manner, content neutral restrictions on speech, the state will have to demonstrate that these restrictions are narrowly tailored, supported by a significant state interest, and leave open ample alternative channels for expression. *Prentzel v. State*, 1988 WL 1511365 (Alaska App.), *quoting Clark v. Community for Creative Non-Violence*, 468 U.S. 288 (1984). As with any constitutional challenge, the outcome of litigation is always difficult to predict, based on the facts and circumstances of each case, and based on the different outcomes observed in the analysis by the Sixth and Eighth Circuit Courts of Appeal. Please review the enclosed draft, and let me know how you would like to proceed. As you requested, I am also sending a copy of this draft to Representative Thomas's office.

most state statutes, but you may wish to narrow this buffer zone, perhaps to 150 feet as was done by Congress in 18 U.S.C.S 1388 (prohibition on disruption of funerals at Arlington National Cemetery) or to 100 feet as adopted by the State of Maryland in MD. Code Ann., Criminal Law, § 10-205 (West. 2010).

Representative Bill Thomas, Jr.
House of Representatives
State Capitol
Juneau AK 99801-1182

Dear Representative Thomas:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing HB 234 an act relating to picketing or protests at a funeral.

The APOA Executive Board's Legislative Committee recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

John Lucking, Jr.

LEGISLATIVE RESEARCH REPORT

DECEMBER 9, 2011

REPORT NUMBER 12.113

FUNERAL PROTEST LAWS IN OTHER STATES

PREPARED FOR REPRESENTATIVE BILL THOMAS, JR.

BY ROGER WITHINGTON, LEGISLATIVE ANALYST

SUMMARY 1

STATE LAWS PERTAINING TO FUNERAL PROTESTS 2

Table 1: Summary of State Funeral Protest Laws, May 2011 3

CHALLENGED AND UNCONSTITUTIONAL STATE FUNERAL PROTEST LAWS 3

LIST OF ATTACHMENTS 5

You asked for information on funeral protest laws. Specifically, you wished to know how many states currently have a law regulating funeral protests and what each state law stipulates. You also wanted to know for each state that currently has a funeral protest law if violating the restriction is considered a felony or misdemeanor offense. In addition, you asked if any of the state laws have been challenged and if any have been found unconstitutional.

SUMMARY

As you may know, for a number of years the Westboro Baptist Church of Topeka, Kansas has been protesting, among other events, military funerals. These protests have garnered the Church a great deal of national attention.[1] The Church's primary message at these protests is that God hates the United

[1] Summary information was extracted from Kathleen Ann Ruane, *Funeral Protests: Selected Federal Laws and Constitutional Issues*, Congressional Research Service, March 22, 2011, and the Westboro Baptist Church's website.

State Capitol
Juneau, AK 99801

States for its tolerance of homosexuality. As punishment for its tolerance, God is killing soldiers "in righteous judgment against an evil nation."

As a result of these protests, state and local governments have adopted measures that create "buffer zones" that ban protests of funerals within a certain distance of the services and that establish time restrictions as to when protests can occur in relation to a funeral service. Additionally, the federal government has passed similar bans on protests at military funerals in federally controlled cemeteries.

STATE LAWS PERTAINING TO FUNERAL PROTESTS

According to the National Conference of State Legislatures (NCSL), 46 states currently have some form of a funeral protest law. In Table 1, we provide a summary of these state laws; we include a more detailed summary of each state's law in Attachment A.

Of the 31 states identified in Table 1 that impose a restriction on the time in which a protest may take place in relation to the funeral service, 22 specify that a protest may not occur any time one hour prior to, during, or one hour after the conclusion of the funeral or memorial service. The remaining nine states specify a time restriction range from 30 minutes to 120 minutes before and after the service.

As you can see from Table 1, 39 states create a "buffer zone" that restricts protests of funerals within a certain distance of the service. These buffer zones range from 150 feet to 1,500 feet. The most typical distance, used by 15 states, is 500 feet.

Seven states—California, Florida, Idaho, Louisiana, Maine, Rhode Island, and Virginia—chose not to create time or distance buffer zones but instead appear to have amended their disorderly conduct or disturbing the peace statues to include protests at funeral or memorial services.

Thirty-six states classify the first violation of these funeral protest laws as misdemeanors. Although several states classify the second offense as a felony, two states—Indiana and Michigan—classify the first offense as a felony.

TABLE 1: SUMMARY OF STATE FUNERAL PROTEST LAWS, MAY 2011

Regulation	States
Time Requirement	Alabama, Arizona, Arkansas, Connecticut, Delaware, Georgia, Illinois, Iowa, Kansas, Kentucky, Michigan[1], Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Vermont, West Virginia, Wisconsin, Wyoming
Distance Requirement	Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, West Virginia, Wisconsin, Wyoming
First Offense Classified as a Misdemeanor	Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Iowa, Kansas, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming

Source: *Funeral Protest Regulation Statutory Provisions*, National Conference of State Legislatures, May 18, 2011, Jon Griffin, Policy Associate, Fiscal Affairs Program, National Conference of State Legislatures, 303-364-7700 ext. 1529.

Notes: (1) Michigan law authorizes local governments to create laws that restrict funeral protests from one hour immediately before, or during, or two hours immediately following a service.

In Attachment B, we provide a sample of funeral protest laws from ten states—Alabama, Colorado, Connecticut, Idaho, Minnesota, Montana, New Mexico, Oklahoma, Rhode Island, and Washington.

According to the NCSL, all four of the states that do not currently have a funeral protest law—Alaska, Hawaii, Nevada, and Oregon—considered such a measure during the last legislative session. Measures in Alaska and Hawaii are still active, while the measures in Nevada and Oregon have failed. Additionally, many states sought to amend their existing laws. We include, as Attachment C, a NCSL summary of all state legislation considered during the last legislative session that pertains to funeral protests.

High Court Rules For Anti-Gay Protesters At Funerals

by NINA TOTENBERG

Nicholas Kamm/AFP/Getty Images

Members of the Westboro Baptist Church of Topeka, Kan., staged a protest across the street from a high school in Hyattsville, Md., a day before the Supreme Court ruling.

March 2, 2011

text size A A A

The U.S. Supreme Court has ruled that protesters at military funerals cannot be sued for inflicting emotional distress on the family of a dead soldier. The vote was 8 to 1.

When Marine Lance Cpl. Matthew Snyder was killed in Iraq, his funeral in Westminster, Md., drew thousands to pay their respects. But it also drew a protest from the Rev. Fred Phelps and six other members of the Westboro Baptist Church, based in Topeka, Kan.

Phelps and other church members have traveled the country for years, picketing hundreds of military funerals to communicate their belief that "God hates the USA" for its tolerance of homosexuality, particularly in the military.

The picketers did not contend that Snyder was gay. Rather, their message, as Phelps puts it, was that "the whole country is given over to sodomy and to sodomite enablers."

The picketers followed their usual practice at the Snyder funeral. They alerted police in advance and followed instructions to set up their protest on public property, at a site 1,000 feet away from the church, near the vehicle entrance.

Speech is powerful. It can stir people to action, move them to tears of both joy and sorrow, and ... inflict great pain. On the facts before us, we cannot react to that pain by punishing the speaker.

Though the protest was peaceful and ended before the funeral began, the picketers carried signs with messages offensive to many, including "Thank God for Dead Soldiers," "Fags Doom Nations" and "America Is Doomed."

- Chief Justice John Roberts, in the majority opinion

Albert Snyder, the father of the dead Marine, did not see the signs until later when he viewed TV coverage. He says the picketers turned his son's funeral into a circus, taking away his "last moment" with his son.

"This was a funeral. This wasn't a parade going down the street. I shouldn't have to look away from anything at my own child's funeral," Snyder says. "That's absurd."

Snyder sued Phelps and his church for intentional infliction of emotional distress.

"These people targeted me and my family, and they have done this to over 200 other military men and women's families," Snyder says, his voice rising. "I want to know how you would feel if somebody stood 30 feet away from the main vehicle entrance of a church where you're trying to bury your mother, with a sign that says, 'Thank God for dead sluts.' You tell me that shouldn't be illegal. Is 'fag' any worse than 'slut'?"

A jury agreed with Snyder and awarded him $5 million in damages. But the Supreme Court set aside that verdict Wednesday.

Writing for the court majority, Chief Justice John Roberts said that as repugnant as many of the signs were, they were still plainly related to public, rather than private, matters. They focused on "the political and moral conduct of the United States and its citizens," he said, and speech of such public concern is protected by the First Amendment.

Although Westboro may have chosen to protest the funeral to gain publicity for its views, said the chief justice, and although those views may be particularly hurtful to the dead soldier's father, that does not mean the church members' right of free speech can be curtailed or punished. And a jury award amounts to punishment, Roberts contended, by imposing a penalty for expressing an unpopular viewpoint.

Our profound national commitment to free and open debate is not a license for the vicious verbal assault that occurred in this case.

- Justice Samuel Alito, who cast the lone dissenting vote

"Speech is powerful," Roberts said in conclusion. "It can stir people to action, move them to tears of both joy and sorrow, and — as it did here — inflict great pain. On the facts before us, we cannot react to that pain by punishing the speaker. As a nation we have chosen a different course — to protect even hurtful speech on public issues to ensure that we do not stifle public debate."

Reaction to the decision was markedly muted, given the outrage voiced by veterans groups and politicians at the time the case was argued in the Supreme Court.

The Democratic and Republican leaders of the Senate, along with 40 other members of Congress, filed a brief on Snyder's side. But on Wednesday, reaction on Capitol Hill was nowhere to be found, except in a couple of written statements.

Lawyer Gene Schaerr, who filed a brief in the case for the American Legion, said he was heartened by the fact that the court specifically mentioned that 43 states have enacted laws that put a buffer zone of 100 feet or more around funeral sites. Such laws would not have affected the protest in this case, since protesters were 1,000 feet away.

Nonetheless, says Schaerr, the decision "sends a clear signal to the lower courts that they should not interpret anything in this opinion as casting any doubt about those statutes." The court, however, specifically left open that question, noting that restrictions on the time, place and manner of protests are appropriate in some circumstances.

Wednesday's 8-to-1 ruling came as no surprise to First Amendment scholars, both right and left. They note that the decision is in line with many court decisions protecting the rights of fringe groups — from Nazis marching in Skokie, Ill., to flag burners at a Republican convention in Texas.

University of Chicago law professor Geoffrey Stone notes that Wednesday's ruling fits neatly into that tradition, calling it a "classic case." The only surprise, maintained Stone, was that anyone dissented.

Justice Samuel Alito was the lone dissenter. He viewed the protesters' speech as targeting a private person — the father of the dead soldier — and said that the First Amendment does not give license to such outrageous conduct.

"In order to have a society in which public issues can be openly and vigorously debated," wrote Alito, "it is not necessary to allow the brutalization of innocent victims."

Re: HB 234: Funeral Picketing and Protests
ACLU Review of Constitutional Issues

Dear Co-Chairs Saddler & Thompson:

Thank you for the opportunity to provide written testimony with respect to House Bill 234.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout Alaska who seek to preserve and expand the individual freedoms and civil liberties guaranteed by the United States and Alaska Constitutions. From that perspective, we wish to advise the Committee of our concern that the proposed bill, if enacted, would violate the rights of free speech and free assembly under the Alaska Constitution and the United States Constitution.

Bill Overview

The current draft of HB 234 proposes to amend the existing disorderly conduct statute, to criminalize the act of "knowingly engag[ing] in picketing with reckless disregard" that the picketing occurs within 150 feet of the boundaries of a "cemetery, mortuary, church, or other facility" and either during a funeral at that location or within an hour of the start or end of the funeral.

The bill goes on to define the term "funeral," excluding a funeral procession from that definition. The bill also defines "picketing" as "protest activities . . . that disrupt or are undertaken to disturb a funeral."

Freedom of Speech

Under the First Amendment to the United States Constitution, people have the freedom to speak without government interference. The freedom of speech is not absolute, ***but government regulation of speech imposes a heavy burden on the government to justify the nature of its regulation and to show that alternative means of vindicating the government interests were inadequate.***

A. The Bill Would Regulate Speech on Sidewalks, a Traditional Public Forum

The present bill directly regulates speech on its face. "[P]rotest activities" are expressive activity, by the very basic meaning of the word "protest." "Picketing" has long been recognized as expressive activity. *See, e.g., Carey v. Brown*, 447 U.S. 455 (1980).

Based on the broad scope of the bill and the real world context of the activities regulated, the bill would criminalize certain expressive activity both on one's own private property – assuming the private property lay within 150 feet of a cemetery or church – as well as on a sidewalk or public park, which are recognized as "traditional public forums" for public speech. *Hill v. Colorado*, 530 U.S. 703, 716 (2000).

Given that the bill directly regulates speech **on one's own property and in traditional public forums**, the bill will be subject to the most careful scrutiny by a court, demanding that the restriction be "necessary to serve a compelling state interest and that it is narrowly drawn to achieve that end." *Frisby v. Schultz*, 487 U.S. 474, 481 (1988) (citation omitted).

B. The Bill is Not Content-Neutral, But Only Regulates Protest Activities

"The right to free speech . . . may not be curtailed simply because the speaker's message may be offensive to his audience." *Hill*, 530 U.S. at 716. For that reason, most restrictions on speech must be content-neutral, meaning that the regulation of speech may not refer to the content of the speech. *Madsen v. Women's Health Center, Inc.*, 512 U.S. 753, 763 (1994). By contrast, content-neutral restrictions on speech in a public forum describe the time, place, and manner in which speech may be made, and must be narrowly tailored to serve a substantial government interest. *Ward v. Rock Against Racism*, 491 U.S. 781, 799 (1989). Examples of a content-neutral regulation would include an ordinance against using a loudspeaker over a particular volume or after a certain hour.

In the recent funeral picketing case, the United States Supreme Court did admit that some state laws establishing a buffer zone would be analyzed differently (which does not necessarily mean that they would be *constitutional*), but only to "the extent [such state] laws are content neutral." *Snyder v. Phelps*, 131 S. Ct. 1207, 1218 (2011).

HB 234 appears to refer to the content of speech, and is thus not content-neutral. The term "protest activities" suggests that only the speech of those presenting a negative viewpoint would be affected by the regulation. Under the bill, a person loudly stating that the US military is contributing to the decline of moral values would presumably be engaged in "protest activities," while a person loudly stating that we must honor our veterans would not be engaged in "protest activities."[1] *Frisby*, 487 U.S. at 482. Therefore, the conduct prohibited is not merely traditional picketing, but protesting, oppositional speech. *Snyder*, 131 S. Ct. at 1219 (noting that the claims of the offended plaintiffs "turned on the content and viewpoint of the message conveyed, rather than any interference with the funeral itself").

Heightening the inference that the bill is intended to discriminate between those presenting supporting views and those presenting opposing views at a funeral, the bill also prohibits activities that "disrupt or are undertaken to disturb a funeral." But in the context of the bill's language, activities that "disrupt" or "disturb" would likely be viewed in light of their content, rather than a neutral standard. "Disrupting" or "disturbing" entails that the activities run contrary to the purpose or plan of the funeral. Loud noises, such as amplified speech or, as has become more common at funerals, the loud revving of motorcycle engines may be viewed as non-disruptive when the expressive conduct accords with the purpose of the funeral, but disruptive when it is not. **Favoring certain expressive activity over another in regulating picketing violates the First Amendment.** *Carey*, 447 U.S. at 470. Notably, in one of the only cases upholding such a law, the parties *stipulated* that the law was content-neutral, rather than contesting the law's neutrality. *Phelps-Roper v. Strickland*, 539 F.3d 356, 361 (6th Cir. 2008).

C. The Legislative History Suggests Lack of Content-Neutrality

Finally, the legislative history suggests that the bill was not intended to be content-neutral. The Sponsor Statement indicates that the bill "asks anyone within the area of a funeral service to conduct themselves in a respectful manner." Sponsor Statement, HB 234. While most – if not indeed nearly all – of us, can agree that permitting funerals to proceed in a peaceful, quiet environment is a laudable goal, nonetheless the state may not legislate "respectful" behavior on the streets and sidewalks of Alaska, nor in the front yards of its citizens. *Olmer v. City of Lincoln*, 192 F.3d 1176, 1180-81 (8th Cir. 1999) (holding that an ordinance prohibiting sign-holding outside churches was unconstitutional because it went "beyond the church building and

---

1. A protest is defined by the Merriam-Webster dictionary as an "act of objecting or a gesture of disapproval." By contrast, the general definition of "picketing" is merely "posting at a particular place."

church property, and seeks to forbid peaceful communication on property belonging to the public, even though the communication may be completely truthful, and even though there is absolutely no physical interference with access to the church"). If "protest activities" that "disrupt" or "disturb" are any activities that are "disrespectful," the law clearly discriminates based on the content of the speech and cannot stand.

D. No Compelling Governmental Interest in Restricting Speech at Funerals

Given that the bill is not content-neutral, the question is then whether "protecting families at funerals during their time of grief" is a compelling state interest justifying a restriction on free speech. **The Constitution requires that "to shut off discourse solely to protect others from hearing it is . . . dependent upon a showing that substantial privacy interests are being invaded in an *essentially intolerable manner*."** *Snyder*, 131 S. Ct. at 1220 (emphasis added). The only cases in which the U.S. Supreme Court has upheld such laws have been content-neutral laws relating to the privacy of one's home. *Frisby*, 487 U.S. at 487-88 (upholding content-neutral ordinance banning picketing of a single home which made the resident a "prisoner" in his own home); *Rowan v. Post Office Dept.*, 397 U.S. 728, 738 (1970) (upholding statute permitting mail recipient to halt offensive mailings to his residence).

We emphasize that a funeral is a solemn occasion and that families in grief should be accorded the respect that such an occasion deserves. However, funerals are also traditionally public events, frequently held in places of worship or funeral homes that are open to the public. In Anchorage, for instance, numerous cathedrals and churches occupy the downtown area, as does a large cemetery. In Juneau, a Catholic cathedral and a Russian Orthodox church sit three blocks from the State Capitol. Expecting that one will neither see nor hear anything offensive in a heavily-trafficked public space is not reasonably comparable to an expectation that one can retire to one's private home without running a gantlet of protestors.

While the members of the Westboro Baptist Church espouse an abhorrent ideology and express it in the most repulsive terms, this bill would affect all funerals and all protestors. Protesting a funeral, especially that of a public figure, may express an important view opposing an ideology or history of bad acts committed by the person being buried. Funerals are frequently centered around a eulogy, an opportunity to say complimentary things about the deceased. A protest outside a funeral may be an opportunity to present an alternative viewpoint about the deceased and to communicate it to passers-by.

Alternatively, when the death of an individual occurs under circumstances giving rise to matters of public concern, the funeral may be the locus of public debate. Famously, the lynching death of Emmett Till resulted in a dramatic funeral in Chicago which thousands of people attended; a dramatic moment that galvanized the civil rights movement. **A municipality could use the bill, for instance, to characterize angry or upset attendees at a funeral for a victim of a police shooting as "protestors" and arrest the attendees for disorderly conduct. A bill that restricts the freedom of speech on the basis of content is available for all kinds of mischief.**

E. The Bill Is Not Narrowly Tailored and Does Not Leave Adequate Avenues for Expression

Because the bill extends to 150 feet in every direction from a church, mortuary, funeral home, or cemetery where a funeral may take place, and extends from an hour before to an hour after a funeral, HB 234 unconstitutionally restricts speech in that it is neither narrowly tailored nor does it leave adequate avenues for expression. The only recognized constitutional interest at stake is the right of a listener in a private place to avoid being a captive audience to a message the listener has no desire to hear. *Phelps-Roper v. Strickland*, 539 F.3d at 364.

Funeral attendees are not a captive audience to a quiet protest, provided the protest does not enter the church or block the entrance to the church. *Olmer*, 192 F.3d at 1180-81. Funeral attendees may have to walk or drive past protestors holding signs that offend them, and might wish to avert their eyes for the period they would otherwise be exposed to the offensive messages. Clearly, protestors can be excluded from the funeral home, mortuary, cemetery, or church where the service takes place. **Thus, the statute is not narrowly tailored to the government interest in avoiding making funeral attendees a captive audience to the protest.**

Further, a primary function of a mortuary or funeral home is to serve as a space for funeral services. *Some funeral homes may hold more than one funeral in a day.* Given the length of services and the one hour window before and after the service when a protest may not take place, **HB 234 – as currently drafted – could prohibit even unrelated protests near a funeral home, for potentially many hours out of any given day.**

Since some important public buildings – likely sites for protests – are close to funeral homes, this would impose a serious burden. For instance, there is a funeral home across the street from the Atwood Building in Anchorage. An Episcopal church lies across the street from the Dena'ina Convention Center. A labor demonstration against a particular employer lacks the same efficacy if performed offsite. Employees at a business located next door to church, mortuary, funeral home, or cemetery would be unable to mount an effective protest about labor conditions if their protests had to start and stop every time a funeral was taking place. As an example, the Sheraton Hotel in Anchorage lies across the street from the municipal cemetery in the middle of downtown. Employees at similarly situated businesses could be seriously chilled from engaging in meaningful protests and could conduct regular, continuing protests only at the risk that someone would define their protests as "disrupt[ing]" the funeral service.

Last, the bill leaves open little alternative for those who actually wish to protest the church, funeral home, or cemetery in question, by mandating that the protestors stay at least 150 feet away from the property within an hour before or after funerals. Someone may seek to picket a church, such as to bring attention to victims of sexual assault. Someone may seek to picket a funeral home or a cemetery, such as in a labor dispute or a dispute about the policies of the business. While such protests may incidentally impact funeral attendees, the alternative would thwart the free expression of employees or those with legitimate concerns about the church, funeral home, or cemetery. Taken as a whole, the law would leave few alternatives open to those

who seek to protest outside public or private buildings that happen to be located near a church, funeral home, or cemetery, as well as those who seek to picket the church, funeral home, or cemetery itself.

The bill is not narrowly tailored to the legitimate state interests because the protestor must engage in picketing with "reckless disregard," rather than knowledge, that the picketing takes place within 150 feet of the site of a funeral and within one hour before or one hour after the funeral. "Recklessness" refers to a criminal law standard that a person consciously disregards a substantial risk of a certain condition being present. AS 11.81.900(a)(3). Presumably, there is a substantial "risk" that a funeral will take place at a church, funeral home, mortuary, or cemetery at any time. This standard unreasonably imposes on a protestor the duty of discovering whether or not a funeral is ongoing, recently took place, or will take place within an hour of a protest. Employees protesting labor conditions at the Sheraton will thus be required to find out if any funerals are taking place in the municipal cemetery on a day when they decide to protest. **Protesters should not be burdened with such a duty to discover whether a funeral is taking place at any given time.** Imposing the burden on protesters to discover when and whether a nearby church, cemetery, or funeral home is conducting a funeral leaves the law unreasonably ill-tailored to legitimate state interests and imposes an unconstitutional "protest at your own risk" policy.

Drafting Considerations

We suggest the Committee may wish to consider:

The protests staged by the Westboro Baptist Church express abhorrent views, for which the ACLU has no sympathy. Further, the manner in which they protest is deeply offensive. **The great maxim of free speech is that for all evil speech, "the remedy to be applied is *more speech*, not enforced silence."** *Whitney v. California*, 274 U.S. 357, 378 (1927).

Rather than seeking to prohibit fools from saying foolish and hurtful words, we as a community should come together to show our appreciation for our service members and others in our community whose funerals may be subject to these protests. If the protests of a handful of people inspire a thousand people to come out to show their support and respect at a funeral, does that tribute not outweigh the ill words of a few? The true voice of Alaska should come out when a misguided minority threatens their protests, so we may show why their words are folly.

Second, the members of the Westboro Baptist Church thrive on the controversy and attention generated by their activity. They also thrive on the attorneys' fees generated when legislatures and municipal assemblies act hastily to prevent them from protesting. As truly painful as it is to watch such a protest unfold, it will surely be more galling to pay from the state treasury to facilitate more protests and more litigation by a tiny group of hateful individuals whose message has already received too much attention.

Conclusion

We hope that the Military and Veterans' Affairs Special Committee will recognize that these are just some of the constitutional infirmities in House Bill 234.

Thank you again for letting us share our concerns. Please feel free to contact the undersigned if you have any questions or wish additional information.

Sincerely,

Jeffrey Mittman

Freedom of Speech

As the Committee is aware, under the First Amendment to the United States Constitution, people have the freedom to speak without government interference. The freedom of speech is not absolute, ***but government regulation of speech imposes a heavy burden on the government to justify the nature of its regulation and to show that alternative means of vindicating the government interests were inadequate.***

A. The Original Model for This Bill Has Already Been Declared Likely Unconstitutional

The letter from Legislative Affairs associated with this bill indicates that the drafter "tried to track" both the statement of intent and the substance of a Nebraska statute which a district court held constitutional. Memorandum from Doug Gardner, Legal Services, Legislative Affairs, March 11, 2011, at 4. At the time the letter was drafted a year ago, this was more or less a true statement. However, since the legislation was drafted, the federal appeals court for the Eighth Circuit declared that the challenge to the Nebraska statute was "likely to succeed" and ordered the lower court to issue an injunction halting enforcement of the Nebraska statute. *Phelps-Roper v. Troutman*, 662 F.3d 485, 490 (8th Cir. 2011) *overruling Phelps-Roper v. Heineman,* 720 F.Supp.2d 1090 (D. Neb. 2010). The Eighth Circuit panel said that the trial court was wrong to ignore the principle that "the government has no significant interest in protecting unwilling listeners outside the context of a home." *Id.* at 489. The fact that the law providing the template for HB 234 has already been enjoined and the opinion cited by the drafter has been overruled should give the legislature pause in following Nebraska's lead.

B. The Bill Would Regulate Speech on Sidewalks, a Traditional Public Forum

The present bill directly regulates speech on its face. "[P]rotest activities" are expressive activity, by the very basic meaning of the word "protest." "Picketing" has long been recognized as expressive activity. *See, e.g., Carey v. Brown*, 447 U.S. 455 (1980).

Based on the broad scope of the bill and the real world context of the activities regulated, the bill would criminalize certain expressive activity both on one's own private property – assuming the private property lay within 150 feet of a cemetery or church – as well as on a sidewalk or public park, which are recognized as "traditional public forums" for public speech. *Hill v. Colorado*, 530 U.S. 703, 716 (2000).

Given that the bill directly regulates speech **on one's own property and in traditional public forums**, the bill will be subject to the most careful scrutiny by a court, demanding that the restriction be "necessary to serve a compelling state interest and that it is narrowly drawn to achieve that end." *Frisby v. Schultz*, 487 U.S. 474, 481 (1988) (citation omitted).

C. The Bill is Not Content-Neutral, But Only Regulates Protest Activities

"The right to free speech . . . may not be curtailed simply because the speaker's message may be offensive to his audience." *Hill*, 530 U.S. at 716. For that reason, most restrictions on speech must be content-neutral, meaning that the regulation of speech may not refer to the content of the speech. *Madsen v. Women's Health Center, Inc.*, 512 U.S. 753, 763 (1994). By contrast, content-neutral restrictions on speech in a public forum describe the time, place, and manner in which speech may be made, and must be narrowly tailored to serve a substantial government interest. *Ward v. Rock Against Racism*, 491 U.S. 781, 799 (1989). Examples of a content-neutral regulation would include an ordinance against using a loudspeaker over a particular volume or after a certain hour.

In the recent funeral picketing case, the United States Supreme Court did admit that some state laws establishing a buffer zone would be analyzed differently (which does not necessarily mean that they would be *constitutional*), but only to "the extent [such state] laws are content neutral." *Snyder v. Phelps*, 131 S. Ct. 1207, 1218 (2011).

HB 234 appears to refer to the content of speech, and is thus not content-neutral. The term "protest activities" suggests that only the speech of those presenting a negative viewpoint would be affected by the regulation. Under the bill, a person loudly stating that the US military is contributing to the decline of moral values would presumably be engaged in "protest activities," while a person loudly stating that we must honor our veterans would not be engaged in "protest activities."[1] *Frisby*, 487 U.S. at 482. Therefore, the conduct prohibited is not merely traditional picketing, but protesting, oppositional speech. *Snyder*, 131 S. Ct. at 1219 (noting that the claims of the offended plaintiffs "turned on the content and viewpoint of the message conveyed, rather than any interference with the funeral itself").

Heightening the inference that the bill is intended to discriminate between those presenting supporting views and those presenting opposing views at a funeral, the bill also prohibits activities that "disrupt or are undertaken to disturb a funeral." But in the context of the bill's language, activities that "disrupt" or "disturb" would likely be viewed in light of their content, rather than a neutral standard. "Disrupting" or "disturbing" entails that the activities run contrary to the purpose or plan of the funeral. Loud noises, such as amplified speech or, as has become more common at funerals, the loud revving of motorcycle engines may be viewed as non-disruptive when the expressive conduct accords with the purpose of the funeral, but disruptive when it is not. **Favoring certain expressive activity over another in regulating picketing violates the First Amendment.** *Carey*, 447 U.S. at 470. Notably, in one of the only cases

---

1. A protest is defined by the Merriam-Webster dictionary as an "act of objecting or a gesture of disapproval." By contrast, the general definition of "picketing" is merely "posting at a particular place."

upholding such a law, the parties *stipulated* that the law was content-neutral, rather than contesting the law's neutrality. *Phelps-Roper v. Strickland*, 539 F.3d 356, 361 (6th Cir. 2008).

D. The Legislative History Suggests Lack of Content-Neutrality

Finally, the legislative history suggests that the bill was not intended to be content-neutral. The Sponsor Statement indicates that the bill "asks anyone within the area of a funeral service to conduct themselves in a respectful manner." Sponsor Statement, HB 234. While most – if not indeed nearly all – of us, can agree that permitting funerals to proceed in a peaceful, quiet environment is a laudable goal, nonetheless the state may not legislate "respectful" behavior on the streets and sidewalks of Alaska, nor in the front yards of its citizens. *Olmer v. City of Lincoln*, 192 F.3d 1176, 1180-81 (8th Cir. 1999) (holding that an ordinance prohibiting sign-holding outside churches was unconstitutional because it went "beyond the church building and church property, and seeks to forbid peaceful communication on property belonging to the public, even though the communication may be completely truthful, and even though there is absolutely no physical interference with access to the church"). If "protest activities" that "disrupt" or "disturb" are any activities that are "disrespectful," the law clearly discriminates based on the content of the speech and cannot stand.

E. No Compelling Governmental Interest in Restricting Speech at Funerals

Given that the bill is not content-neutral, the question is then whether "protecting families at funerals during their time of grief" is a compelling state interest justifying a restriction on free speech. **The Constitution requires that "to shut off discourse solely to protect others from hearing it is . . . dependent upon a showing that substantial privacy interests are being invaded in an *essentially intolerable manner*."** *Snyder*, 131 S. Ct. at 1220 (emphasis added). The only cases in which the U.S. Supreme Court has upheld such laws have been content-neutral laws relating to the privacy of one's home. *Frisby*, 487 U.S. at 487-88 (upholding content-neutral ordinance banning picketing of a single home which made the resident a "prisoner" in his own home); *Rowan v. Post Office Dept.*, 397 U.S. 728, 738 (1970) (upholding statute permitting mail recipient to halt offensive mailings to his residence).

We emphasize that a funeral is a solemn occasion and that families in grief should be accorded the respect that such an occasion deserves. However, funerals are also traditionally public events, frequently held in places of worship or funeral homes that are open to the public. In Anchorage, for instance, numerous cathedrals and churches occupy the downtown area, as does a large cemetery. In Juneau, a Catholic cathedral and a Russian Orthodox church sit three blocks from the State Capitol. Expecting that one will neither see nor hear anything offensive in a heavily-trafficked public space is not reasonably comparable to an expectation that one can retire to one's private home without running a gantlet of protestors.

While the members of the Westboro Baptist Church espouse an abhorrent ideology and express it in the most repulsive terms, this bill would affect all funerals and all protestors. Protesting a funeral, especially that of a public figure, may express an important view opposing an ideology or history of bad acts committed by the person being buried. Funerals are frequently centered around a eulogy, an opportunity to say complimentary things about the deceased. A protest outside a funeral may be an opportunity to present an alternative viewpoint about the deceased and to communicate it to passers-by.

Alternatively, when the death of an individual occurs under circumstances giving rise to matters of public concern, the funeral may be the locus of public debate. Famously, the lynching death of Emmett Till resulted in a dramatic funeral in Chicago which thousands of people attended; a dramatic moment that galvanized the civil rights movement. **A municipality could use the bill, for instance, to characterize angry or upset attendees at a funeral for a victim of a police shooting as "protestors" and arrest the attendees for disorderly conduct. A bill that restricts the freedom of speech on the basis of content is amenable to an array of mischief.**

F. The Bill Is Not Narrowly Tailored and Does Not Leave Adequate Avenues for Expression

Because the bill extends to 150 feet in every direction from a church, mortuary, funeral home, or cemetery where a funeral may take place, and extends from an hour before to an hour after a funeral, HB 234 unconstitutionally restricts speech in that it is neither narrowly tailored nor does it leave adequate avenues for expression. The only recognized constitutional interest at stake is the right of a listener in a private place to avoid being a captive audience to a message the listener has no desire to hear. *Phelps-Roper v. Strickland*, 539 F.3d at 364.

Funeral attendees are not a captive audience to a quiet protest, provided the protest does not enter the church or block the entrance to the church. *Olmer*, 192 F.3d at 1180-81. Funeral attendees may have to walk or drive past protestors holding signs that offend them, and might wish to avert their eyes for the period they would otherwise be exposed to the offensive messages. Clearly, protestors can be excluded from the funeral home, mortuary, cemetery, or church where the service takes place. **Thus, the statute is not narrowly tailored to the government interest in avoiding making funeral attendees a captive audience to the protest.**

Further, a primary function of a mortuary or funeral home is to serve as a space for funeral services. *Some funeral homes may hold more than one funeral in a day.* Given the length of services and the one hour window before and after the service when a protest may not take place, **HB 234 – as currently drafted – could prohibit even unrelated protests near a funeral home, for potentially many hours out of any given day.**

Since some important public buildings – likely sites for protests – are close to funeral homes, this would impose a serious burden. For instance, there is a funeral home across the street from the

Atwood Building in Anchorage. An Episcopal church lies across the street from the Dena'ina Convention Center. A labor demonstration against a particular employer lacks the same efficacy if performed offsite. Employees at a business located next door to church, mortuary, funeral home, or cemetery would be unable to mount an effective protest about labor conditions if their protests had to start and stop every time a funeral was taking place. As an example, the Sheraton Hotel in Anchorage lies across the street from the municipal cemetery in the middle of downtown. Employees at similarly situated businesses could be seriously chilled from engaging in meaningful protests and could conduct regular, continuing protests only at the risk that someone would define their protests as "disrupt[ing]" the funeral service.

Last, the bill leaves open little alternative for those who actually wish to protest the church, funeral home, or cemetery in question, by mandating that the protestors stay at least 150 feet away from the property within an hour before or after funerals. Someone may seek to picket a church, such as to bring attention to victims of sexual assault. Someone may seek to picket a funeral home or a cemetery, such as in a labor dispute or a dispute about the policies of the business. While such protests may incidentally impact funeral attendees, the alternative would thwart the free expression of employees or those with legitimate concerns about the church, funeral home, or cemetery. Taken as a whole, the law would leave few alternatives open to those who seek to protest outside public or private buildings that happen to be located near a church, funeral home, or cemetery, as well as those who seek to picket the church, funeral home, or cemetery itself.

The bill is not narrowly tailored to the legitimate state interests because the protestor must engage in picketing with "reckless disregard," rather than knowledge, that the picketing takes place within 150 feet of the site of a funeral and within one hour before or one hour after the funeral. "Recklessness" refers to a criminal law standard that a person consciously disregards a substantial risk of a certain condition being present. AS 11.81.900(a)(3). Presumably, there is a substantial "risk" that a funeral will take place at a church, funeral home, mortuary, or cemetery at any time. This standard unreasonably imposes on a protestor the duty of discovering whether or not a funeral is ongoing, recently took place, or will take place within an hour of a protest. Employees protesting labor conditions at the Sheraton will thus be required to find out if any funerals are taking place in the municipal cemetery on a day when they decide to protest. **Protesters should not be burdened with such a duty to discover whether a funeral is taking place at any given time.** Imposing the burden on protesters to discover when and whether a nearby church, cemetery, or funeral home is conducting a funeral leaves the law unreasonably ill-tailored to legitimate state interests and imposes an unconstitutional "protest at your own risk" policy.

Vagueness & Overbreadth

No law may so broadly criminalize conduct in such a way that speakers wishing to engage in protected speech would be chilled in doing so. *Marks v. City of Anchorage*, 500 P.2d 644, 647

(Alaska 1972). Criminalizing speech based on its effect on others, especially based on whether it annoys or excites passions in others, is clearly prohibited by the First Amendment. *Id.* at 647-48. Further, criminalizing speech in ways "not susceptible of exact definition" will necessarily require speakers to refrain from speech rather than providing a clear, constitutional standard for conduct. *Id.* The bill, by focusing on "protest activities" that "disrupt" or "disturb" others, is unclear in its scope and would thus be overbroad in prohibiting certain protected speech.

The terms "disrupt" and "disturb" are in this context so vague in their meaning that people "of common intelligence must necessarily guess at its meaning and differ as to its application. . . ." *Connally v. General Const. Co.*, 269 U.S. 385, 391 (1926). Clearly, at least some picketing will be prohibited by the law. However, what kind of behavior is adequate to "disturb" or "disrupt" a funeral is unclear, especially where the effect of that behavior on others is at issue. Some people might believe that a quiet sign-holding protest would not disturb a funeral at all. Others may differ.

The problem of assigning meaning to these terms is not simply a theoretical problem for constitutional lawyers. Using such terms has real-life impacts on innocent bystanders. In a Michigan case, a Michigan statute prohibiting activity that would "disturb, disrupt, or adversely affect" a funeral was invoked to justify the arrest of Lewis and Jean Lowden. *Lowden v. County of Clare*, 709 F.Supp.2d 569, 571 (E.D. Mich. 2010). Mr. and Mrs. Lowden were members of the funeral procession of a deceased service member. *Id.* Mrs. Lowden had home-schooled the deceased. *Lowden, slip op.*, 1:09-cv-11209-TLL-CEB, at *6 (E.D. Mich. Sept. 8, 2011). Mr. Lowden was himself a veteran. *Id.* While riding in the funeral procession, the Lowdens were stopped, arrested, and held in jail for 24 hours because they had signs on their van critical of the president and his policies. *Id.* at *7.

Like the Michigan law, the present HB 234 runs a serious risk of inadvertently criminalizing conduct by supportive, respectful attendees who wish to express a peaceful opinion. Whatever insult to the memory of a service member may occur when a half-dozen bigots appear to protest is surely far outstripped by the spectacle of the government arresting friends and family members of the deceased.

Drafting Considerations

We suggest the Committee may wish to consider:

The protests staged by the Westboro Baptist Church express abhorrent views, for which the ACLU has no sympathy. Further, the manner in which they protest is deeply offensive. **The great maxim of free speech is that for all evil speech, "the remedy to be applied is *more speech*, not enforced silence."** *Whitney v. California*, 274 U.S. 357, 378 (1927).

Rather than seeking to prohibit fools from saying foolish and hurtful words, we as a community should come together to show our appreciation for our service members and others in our

community whose funerals may be subject to these protests. If the protests of a handful of people inspire a thousand people to come out to show their support and respect at a funeral, does that tribute not outweigh the ill words of a few? The true voice of Alaska should come out when a misguided minority threatens their protests, so we may show why their words are folly.

The wisdom of this course is shown by the experience this year in Harrisburg, Illinois. After the recent tornados, members of the Westboro Baptist Church announced that they would appear at funerals to demonstrate and celebrate the deaths of the six people. The people of Harrisburg appeared in the thousands to line the streets outside the funeral site in support of the deceased. According to witnesses, the church members arrived, saw the counter-demonstrators, and "didn't even get out of the car." CNN iReport, Harrisburg Banding Together to Stop the WBC, *at* http://ireport.cnn.com/docs/DOC-757127?hpt=us_bn2.

Second, the members of the Westboro Baptist Church thrive on the controversy and attention generated by their activity. They also thrive on the attorneys' fees generated when legislatures and municipal assemblies act hastily to prevent them from protesting. As truly painful as it is to watch such a protest unfold, it will surely be more galling to pay from the state treasury to facilitate more protests and more litigation by a tiny group of hateful individuals whose message has already received too much attention.

Conclusion

We hope that the Senate State Affairs Committee will recognize that these are just some of the constitutional infirmities in House Bill 234.

Thank you again for letting us share our concerns. Please feel free to contact the undersigned if you have any questions or wish additional information.

Sincerely,

Jeffrey Mittman

House Bill 247 "Alaska National Guard Day"

"An Act establishing July 30 each year as Alaska National Guard Day"

House Bill 247 establishes Alaska National Guard Day on July 30 each year to honor the men and women of our Alaska National Guard for their tremendous bravery, sacrifice, and commitment to our communities, to our state, and to our nation.

Since its authorization on July 30, 1948, the Alaska National Guard has grown, changed and modernized to help in its role of protecting life and property both at home and abroad.

The Alaska National Guard (AKNG or The Guard) has a unique dual mission with both federal and state responsibilities and is the military arm of the Governor. In times of emergency, the guard stands ready to immediately respond when the Governor calls for help with local or state-wide emergencies. In addition, the President of the United States can activate the Alaska National Guard to participate in Federal missions. For example many of our Alaska Guard units have deployed to support operations in Iraq, Afghanistan and other places. Sadly, many have given their lives as well.

The Alaska National Guard soldiers and airmen always stand ready to protect the citizens of this state and have earned a well-deserved reputation for excellence. It's important to set aside a day each year to honor them.

Thank you for your support of House Bill 247, an appropriate bill number that reflects the Guard's 24-7 service to Alaska.

HB 247 TESTIMONY

To: Alaska House Military and Veterans Affairs Special Committee

January 24, 2012

Comments by: Lt Gen (AKNG retired) Craig E. Campbell

I would like to start by thanking Representatives Lynn, Thompson, Saddler, Fairclough, and Costello for co-sponsoring this legislation.

The National Guard is the oldest component of the Armed Forces of the United States and one of the nation's longest-enduring institutions. Recognition of the National Guard by the Alaska Legislature, with a specific date to honor the Alaska National Guard, acknowledges the unique characteristic of the National Guard as being both a federal and state organization, primarily established to be under the control of a State's Governor. Please let me explain.

The National Guard traces its history back to the earliest English colonies in North America. First organized by decree of the Massachusetts Bay Colony General Court on Dec 13, 1636, the militias were responsible for their own defense. The militia, now National Guard, has been in continuous operation since that date, celebrating our 375th anniversary last year.

The National Guard is the only military service in the United States with both a federal and state dual role. Following independence, the authors of the Constitution empowered Congress to "provide for organizing, arming, and disciplining the militia." However, recognizing the militia's state role, the Founding Fathers reserved the appointment of officers and training of the militia to the states, with the Governor being the civilian leader of the militia, except when mobilized by the President for federal service. Today's National Guard remains that dual State-Federal force.

In 1947, Congress formally established the National Guard Bureau and the "National Guard" was recognized in lieu of state militia's formally in 1948.

Today all 54 states, territories, and the District of Columbia have National Guard organizations, divided into both Army and Air National Guard units. The total number of personnel serving in the National Guard of the United States currently exceeds 500,000.

In Alaska, Governor Gruening initiated the formal actions to establish a National Guard for the Territory of Alaska in 1939. By September 1941, with the advent of World War II and the invasion of United States territory in Hawaii and Alaska, the federal government established the 297th Infantry Battalion, Alaska National Guard. Governor Gruening had achieved his goal.

However, in response to the threat of invasion during World War II, Governor Gruening further authorized the establishment of the Alaska Territorial Guard (ATG). Nearly 6,600 individuals, mostly men and mostly Alaska natives, volunteered for the ATG. It is noteworthy to mention that the ATG served without pay or benefits, and in 1947, when the ATG was disbanded, the members were discharged without formal military recognition. In 2000, Senator Ted Stevens introduced a bill recognizing the service of the ATG to the United States and directing federal "Honorable Discharge Certificates" be issued to all who honorably served. In October 2004, the first Honorable Discharge Certificate was issued to former ATG member Sam Herman.

Following World War II, and the establishment of the United States Air Force as a separate branch of the service, replacing the Army Air Corps, the Air National Guard was formed. In 1952, the first Air National Guard unit was formed in Alaska, marking this year as the 60th anniversary for the Alaska Air National Guard.

Today, there are over 4,000 proud men and women serving in the Alaska Army and Air National Guard. These citizen-warriors are predominantly part-time warriors, who also are civilian members of

our communities. They are all volunteers. Since 2003, members of the Alaska National Guard have deployed numerous times in support of Operation Iraqi Freedom and Operation Enduring Freedom to Iraq, Afghanistan, Kuwait, Qatar, Bahrain and many other countries in the Middle East. Additionally, the Alaska National Guard has deployed to Kosovo, the Horn of Africa, Pakistan, Kyrgystan, as well as conducting humanitarian missions to Haiti, Indonesia, Vietnam, Japan, and other countries throughout the world. Most notably, was the 2005 response of the Alaska National Guard to the southeast states in response to Hurricane Katrina, were Alaska Guardsman and women were on the ground within hours after the storms destruction. They saved lives and provided essential services to a devastated people.

And here in Alaska, your Alaska National Guard has routinely responded to floods, earthquakes, volcanic eruptions, forest fires, and village freeze-ups, saving lives and preserving property. They conduct Operations Santa Claus, bringing holiday cheer to the children of rural villages, and they conduct Arctic Care missions to villages, offering essential dental care and treatment to Alaskans in need. Serving our state and serving our nation, the core value of the Alaska National Guard.

I will conclude by again thanking members who have co-sponsored this legislation to recognize our valiant hero's serving, both present and past, in the Alaska National Guard. Our state and our nation could not do the wonderful things we do to protect and preserve our states and nation without the unselfish service of our National Guard. Thank you for taking the time to recognize their service by establishing July 30 of each year as "Alaska National Guard Day." Please pass this bill, HB 247.

Press Release

OFFICE OF PUBLIC AFFAIRS

FOR IMMEDIATE RELEASE
August 1, 2011
By: Lt. Bernie Kale

Alaska Air National Guardsmen Deploy to Iraq

CAMP DENALI, Alaska – More than 30 Guardsmen from the Alaska Air National Guard's 168th Air Refueling Wing, based out of Eielson Air Force Base, will depart the United States today to begin a six-month deployment in Iraq.

The Guard members from the 168th Security Forces Squadron are finishing their pre-deployment training on air bases in Florida and Nevada to prepare them for situations they may face while at Camp Victory in Baghdad, Iraq.

"You always want more training," said Lt. Col. Jeff Elliot, 168th Security Forces Squadron commander. "While it's been strenuous, we are as prepared as can be and are ready to get our boots on the ground."

The primary mission of the deploying members will be to provide air base defense and entry control-point security.

"The security they are providing is vital to the accomplishment of the mission," said Col. Timothy O'Brien, 168th Air Refueling Wing commander, Alaska Air National Guard. "They have been training for this type of environment, and I am confident they will succeed."

The members left Alaska in early July to begin their training at Cheech Air Force Base, Nev., and Eglin Air Force Base, Fla.

Some of the pre-deployment training included battle drills, entry control-point training, weapons systems, land navigation and terrain reading.

"We are extremely proud of our Airmen," O'Brien said. "They are serving our country and representing the state of Alaska with honor."

Alaska National Guard responding to Alaska community buried in snow

CAMP DENALI, Alaska— The Alaska National Guard is responding to personnel and equipment requests for support in Cordova after weeks of record snowfall have left the city covered in more than 18 feet of snow.

Personnel in the Alaska National Guard's Joint Operation Center are responding to a resource request from the State Emergency Operation Center to send more than 50 Guard members, supplies and equipment to Cordova Sunday, weather permitting, to provide much needed support.

"We have called upon the Alaska National Guard to help the community with emergency snow removal that will protect public buildings and residences," said John Madden, director of the Division of Homeland Security and Emergency Management. "Their ability to rapidly deploy large numbers of Guardsmen anywhere in state is a great resource."

Isolated off the state highway system and having the sea and airport as the only means of transportation in or out of the small Alaskan community, Cordova residents have worked hard to clear snow, including 42 inches in the most recent storm, but conditions continue to worsen, posing a serious safety issue to the citizens.

"Cordova is continuing their outstanding job responding to several weeks of intense snowfall," Madden said. "Cordova utilized all of their snow management resources to maintain emergency access, but now face a new round of storms that will bring heavy snow and perhaps rain."

With more snow and rain expected, avalanche danger remains very high in Cordova and some buildings have collapsed due to heavy snow loads. This makes the Alaska National Guard the right resource to assist the citizens of Alaska during this emergency.

"Alaska has significant challenges and the National Guard has the manpower skill and equipment to meet those demands and quickly respond in support of civilian authorities when called upon," said Maj. Gen. Thomas H. Katkus, adjutant general of the Alaska National Guard. "Our Soldiers and Airmen will move forward and support the people of

Alaska Air National Guard to provide rescue support for Hurricane Irene

CAMP DENALI, Alaska- The Alaska Air National Guard is ramping up this afternoon to send crews and equipment to Charleston, W. Va. to provide search and rescue assets in response to Hurricane Irene.

A U.S. Air Force C-17 Globemaster III flown by members of the Alaska Air National Guard's 249th Airlift Squadron are currently scheduled to depart Joint Base Elmendorf-Richardson Saturday with approximately 45 personnel from the 176th Wing for a two week deployment.

"We are sending two Pave Hawk helicopters with four flight crews, eight 'Guardian Angels' and 20 maintenance and support personnel to support the mission," said Lt. Col. Blake Gettys, 176th Wing Operations Group commander, Alaska Air National Guard. "We'll also be working with Guardian Angels from Kentucky and special tactics squadron personnel from Portland."

The C-17 is expected to depart Joint Base Elmendorf-Richardson at 10 a.m. with the goal to be on the ground ready to support rescue operations by Sunday.

"We are prepared and committed to support our fellow Americans in their time of need," said Governor Sean Parnell. "Our Alaska National Guardsmen are unparalleled in their experience in saving lives and they are the perfect choice to assist civilian authorities during this potential national emergency. As Alaskans we understand what it's like to live through disasters, so when called upon, we will be ready to aid communities and Governors of states that need our support."

The Alaska Air National Guard supported relief efforts in 2008 following hurricanes Gustav, Hannah and Ike in the Gulf Coast region saving 16 lives, while flying 22 missions during a 16-day deployment.

Alaska National Guard brings Operation Santa Claus to Wales

WALES, Alaska – Santa, Mrs. Claus and 35 helpers brought Operation Santa Claus and holiday cheer on an Alaska National Guard C-130 to the small, remote Alaska village of Wales Dec. 9.

The Alaska Air National Guard C-130 landed on the village's airstrip and was warmly greeted by community members on snowmachines. The temperature, in the teens, was chilly but not cold by Wales' standards.

Operation Santa Claus volunteers and community members quickly off-loaded boxes from the aircraft and onto sleds tied to the snowmachines for the mile ride to the Wales school.

"It's a great time of year and unique way for us to get out and support Alaska citizens," said Col. Mike Bridges, director of logistics for the Alaska Army National Guard. "I've probably been on at least 20 Operation Santa Claus trips and each one is a special experience."

While boxes were unpacked in the school's gym, members of Alaska Brass, a brass and percussion ensemble from the U.S. Air Force Band of the Pacific, began to play festive holiday tunes while the gym filled with nearly everyone from the village.

Following the festive music, a prayer of thanks was given by Alaska Air National Guard Chaplain Brian Musselman before a warm meal, made and donated by Pentagon North, Inc. of Anchorage, was served.

To the delight of everyone, ice cream sundaes were also provided by Tastee Freez, while village youth performed a dance for the audience and their guests.

And then the moment everyone was waiting for, Santa and Mrs. Claus arrived.

"I enjoy visiting with the elders and veterans of the community, while they see their kids interact with Santa Claus," Bridges said. "It's a great time for everyone involved."

One by one, each child had a chance to visit Santa and receive a gift. They were also given a new backpack filled with a couple of pieces of fresh fruit, books, a toothbrush and other incidentals.

"This event was incredible," said Roxie Quick, the Wales School principal. "It was a great way to show the children a lesson in sharing and about the volunteer spirit."

Relevant Statutes

HB 247 Alaska National Guard Day

Article 02. DESIGNATED DAYS OF HONOR

Sec. 44.12.030. Wickersham Day.

August 24 is designated Wickersham Day in honor of James Wickersham, and is the occasion for school assemblies with appropriate programs, and other suitable observances and exercises by civic groups and the public in general.

Sec. 44.12.040. Anthony J. Dimond Day.

November 30 is designated Anthony J. Dimond Day in honor of "Tony" Dimond, and shall be observed by appropriate school assemblies and programs, and other suitable observances and exercises by civic groups and the public at large.

Sec. 44.12.045. Martin Luther King Day. [Repealed, Sec. 3 ch 109 SLA 1989].

Repealed or Renumbered

Sec. 44.12.050. Ernest Gruening Day.

Ernest Gruening Day is established on February 6 of each year to honor Ernest Gruening, doctor, editor, and statesman, for a lifetime of service to the territory and state of Alaska and the nation. Ernest Gruening Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.055. Bob Bartlett Day.

Bob Bartlett Day is established on April 20 of each year to honor E.L. "Bob" Bartlett, the "architect of Alaska statehood," for a lifetime of public service to Alaska and the nation. Bob Bartlett Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.060. William A. Egan Day.

William A. Egan Day is established on October 8 of each year to honor William "Bill" Egan, the first governor of the state of Alaska, for a lifetime of service to the territory and state of Alaska. William A. Egan Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.065. Elizabeth Peratrovich Day.

Elizabeth Peratrovich Day is established on February 16 of each year to honor Elizabeth Peratrovich, past Grand President of the Alaska Native Sisterhood, for her courageous, unceasing efforts to eliminate discrimination and bring about equal rights in Alaska. Elizabeth Peratrovich Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.066. Susan Butcher Day.

Susan Butcher Day is established on the first Saturday of March of each year, the traditional start date of the Iditarod Trail Sled Dog Race, to honor Susan Butcher, a loving mother, devoted wife, world-class athlete, determined competitor, true Alaskan, and four-time Iditarod Trail Sled Dog Race champion. Susan Butcher Day may be observed by school assemblies, sporting events, and other suitable observances and exercises by civic groups and the public to remember the life of Susan Butcher, an inspiration to Alaskans and to millions around the world.

Sec. 44.12.067. Ted Stevens Day.

Ted Stevens Day is established on the fourth Saturday of July each year to honor Theodore F. "Ted" Stevens, whose long record of public service includes 40 years as a United States senator from Alaska, for his service to the state and the nation. Ted Stevens Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.070. Alaska Flag Day.

Alaska Flag Day is established on July 9 of each year to honor the creation of the design of the official flag of the state by Benny Benson and its importance as a symbol of the state. Alaska Flag Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.072. Alaska Day of Prayer.

The Alaska Day of Prayer is established on the first Thursday in May each year as an opportunity for residents of all faiths to join in united prayer to give thanks for blessings received, to request healing for wounds endured, to ask divine guidance for our leaders, and to bring wholeness to the citizens of our state and our nation.

Sec. 44.12.075. Family day and family preservation month.

Family Day is established on May 1 of each year to celebrate the institution of the family. The month of May each year is established as Preservation of the

Family Month to encourage the preservation of the institution of the family. Family Day and Preservation of the Family Month may be observed by suitable observances by families, such as a family discussion of the role of families, the rights and responsibilities of children and parents, and appropriate methods for the resolution of violent feelings in family conflict, and by exercises by civic groups and the public. In observance of Family Preservation Month, the Department of Health and Social Services shall encourage the prevention of child abuse and neglect in Alaska families.

Sec. 44.12.076. Prisoners of War and Missing in Action Recognition Days.

(a) Former Prisoners of War Recognition Day is established on April 9 of each year to recognize and honor all former prisoners of war (POWs) from our nation's wars who have returned home. These POWs repeatedly demonstrated their devotion to duty, honor, and country, despite enduring captivity and sometimes brutal treatment by their captors. The governor shall issue a proclamation to commemorate the day, and the POW/MIA flag shall be flown that day at sites identified by the governor. Former POW Recognition Day may be observed by suitable observances and exercises by civic groups and the public.

(b) Prisoners of War and Missing in Action Recognition Day is established on the third Friday of September each year to honor all prisoners of war (POWs) and those missing in action (MIAs), unaccounted for from all our nation's wars or who died in captivity. These POWs and MIAs repeatedly demonstrated their devotion to duty, honor, and country, despite enduring captivity and sometimes brutal treatment by their captors. The fate of those unaccounted for and missing in action from our nation's wars causes considerable uncertainty for their families, friends, fellow soldiers, and veterans. This day is also an occasion for Alaskans to remember our country's enormous responsibility to do everything possible to account for those still missing in action. The governor shall issue a proclamation to commemorate the day, and the POW/MIA flag shall be flown that day at sites identified by the governor. POW and MIA Recognition Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.078. Women Veterans Day.

Women Veterans Day is established on November 9 of each year to acknowledge and commemorate the sacrifices endured and valor displayed by American women veterans and to recognize their increasing role in the military. The governor shall issue a proclamation to commemorate Women Veterans Day. The day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.080. Pearl Harbor Remembrance Day.

Pearl Harbor Remembrance Day is established on December 7 of each year to commemorate the attack on Pearl Harbor on December 7, 1941, and to honor the individuals who died as a result of the attack. The governor shall issue a proclamation to commemorate the day and shall direct that the Alaska flag be flown at half-mast on that day. Pearl Harbor Remembrance Day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.083. Alaska Territorial Guard Day.

Alaska Territorial Guard Day is established on October 18 of each year to acknowledge and commemorate the service of the members of the Alaska Territorial Guard in defense of Alaska and the United States during World War II. The governor shall issue a proclamation to commemorate Alaska Territorial Guard Day. The day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.085. Dutch Harbor Remembrance Day.

Dutch Harbor Remembrance Day is established on June 3 of each year to commemorate the attack on Dutch Harbor on June 3, 1942, and to honor the individuals who died as a result of the attack and those inhabitants of Attu and Kiska who fell into enemy hands three days later and were held captive in Japan until the end of World War II. On Dutch Harbor Remembrance Day the many servicemen who died in 1943 while recapturing Attu and Kiska from the Japanese are also honored for their diligent service to the United States and to the state. The governor shall issue a proclamation to commemorate Dutch Harbor Remembrance Day and shall direct that the Alaska flag be flown at half-mast on that day. The day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.090. Juneteenth Day.

Juneteenth Day is established on the third Saturday in June each year to commemorate the abolition of slavery throughout the United States and its territories in 1865. The governor shall issue a proclamation to commemorate the day. On Juneteenth Day, citizens of the state are urged to reflect on the suffering endured by early African-Americans and to appreciate the unique freedom and equality enjoyed by all state citizens today.

Sec. 44.12.092. Alaska History Week.

The first week of March of each year is established as Alaska History Week to celebrate the contributions and experiences that comprise the past development of The Great Land. Alaska History Week may be observed by

school assemblies, programs, and other suitable observances and exercises by civic groups and the public.

Sec. 44.12.095. Drunk Driving Victims Remembrance Day.

Drunk Driving Victims Remembrance Day is established on July 3 of each year to commemorate the victims of drunk driving. The governor shall issue a proclamation to commemorate the day. The day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.098. Avalanche Awareness Month.

The month of November each year is established as Avalanche Awareness Month. Avalanche Awareness Month may be observed by schools, community groups, and other public and private agencies and individuals with appropriate activities that increase the public's awareness of avalanche dangers, how to respond to avalanches, and the use of appropriate equipment in avalanche areas.

Sec. 44.12.100. Older Alaskans' Day.

The second Wednesday of September of each year is established as Older Alaskans' Day to honor residents of the state who are 60 years of age or older for the many contributions made by older Alaskans to the state. The day may be celebrated by public ceremonies and by quiet appreciation.

Sec. 44.12.105. Alaska Agriculture Day.

Alaska Agriculture Day is established on the first Tuesday in May each year in order to recognize the many contributions of the agricultural industry in Alaska. Alaska Agriculture Day may be observed by celebratory events, projects, and activities directed at or involving people of all ages to increase their awareness and appreciation of Alaska agriculture and agriculture in general.

Sec. 44.12.110. Marmot Day.

Marmot Day is established on February 2 of each year. The day may be observed by suitable observances and exercises by school programs, the Alaska Zoo, civic groups, and the public.

Sec. 44.12.115. Purple Heart Day.

Purple Heart Day is established on August 7 of each year to honor recipients of the Purple Heart. The day may be observed by suitable observances and exercises by civic groups and the public.

Sec. 44.12.118. Motorcycle and Motor Scooter Awareness Month.

The month of May each year is established as Motorcycle and Motor Scooter Awareness Month. Motorcycle and Motor Scooter Awareness Month may be observed by schools, community groups, and other public and private agencies and individuals with appropriate activities that increase the public's awareness of the presence of motorcycles and motor scooters on roads and highways in the state and that remind motor vehicle drivers to be aware of the presence of motorcycles and motor scooters when driving.

Sec. 44.12.120. Alaska Public Gardens Day.

Alaska Public Gardens Day is established on the Saturday immediately preceding Memorial Day each year to commemorate the state's public gardens and the role the gardens play in promoting environmental stewardship, the economy, a healthy food supply, education, plant conservation, recreation, and research.

REPRESENTATIVE WES KELLER
DISTRICT 14

HOUSE BILL 271
SPONSOR STATEMENT

"An Act relating to the state highway system and commercial motor vehicle requirements."

Alaska is always on the move. Be it across town or across the state, transportation is extremely important. For the small business owner nearly everything must be moved from somewhere and that is often done by truck. Today's truck laws were written years ago and have not kept up with technology. Today's roads and today's trucks are safer, more reliable and much easier to drive.

House Bill 271 is written to assist these small business owners who need a truck to move their inventory either from the import site, retailer, or wholesaler to their business or job site. These businesses are not in the trucking business but the state treats them that way.

Currently these smaller vehicles are classified as commercial and must have special license plates, which costs more. In some cases the driver must have a commercial driver's license (CDL) which costs more. In both cases these extra charges constitute a tax and do little to improve safety.

House Bill 271 changes the current statutory descriptions of commercial vehicles. Many newer modern trucks are designed for safety without the extra training required for a CDL. It is unnecessary and burdensome, for example, to require these drivers to have the same medical card as required for a semi driver hauling big loads to across the state. House Bill 271 gives the owners who use the trucks for work part time an opportunity to use them inside the State of Alaska without unnecessary government harassment.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 271(TRA)

Analysis

There is no specified effective date in this bill.

This legislation changes the definition of a commercial motor vehicle for enforcement purposes. It also inadvertently gives Department of Transportation (DOT) the ability to promulgate regulations when it comes to the Commercial Driver's Licensing (CDL) program, which is a function of the Division of Motor Vehicles (DMV) under AS 28.

As long as DOT does not promulgate regulations for the CDL program that are in conflict with DMV's ability to administer the CDL program in accordance with statutes and regulations, DMV does not anticipate this bill will have a fiscal impact on the DMV.

Classes

Light Duty

Class 1

The **Class 1** truck (GVWR) ranges from **0 to 6,000 pounds.** Examples of trucks in this class include the Ford Ranger, Dodge Dakota and GMC Canyon.

Class 2

The **Class 2** truck (GVWR) ranges from **6,001 to 10,000 pounds.** Examples of vehicles in this class include the Dodge Ram 1500 and the Ford F-150.

Class 2 is subdivided into Class 2a and Class 2b, with class 2a being **6,001 to 8,500 pounds**,

Class 2b being **8,501 to 10,000 pounds**.

Class 2a is commonly referred to as a light duty truck, with class 2b being the lowest heavy-duty class, also called the light heavy-duty class.

Class 3

The **Class 3** (GVWR) ranges from **10,001 to 14,000 pounds.** Examples of vehicles in this class include the Dodge Ram 3500, Ford F-350 and the GMC Sierra 3500, both dual rear wheel and single rear wheel.

The Hummer H1 is another example of a single rear wheel Class 3 truck, with a GVWR of 10,300 lbs.

Medium Duty

Class 4

The **Class 4** truck (GVWR) ranges from **14,001 to 16,000 pounds** Examples of vehicles in this class include select Ford F-450 trucks, Dodge Ram 4500, and the GMC 4500.

Class 5

The **Class 5** truck (GVWR) ranges from **16,001 to 19,500 pounds.** Examples of trucks in this class include the International MXT, GMC 5500.[9] Dodge Ram 5500, and the Ford F-550

Class 6

The **Class 6** truck (GVWR) ranges from **19,501 to 26,000 pounds**. Examples of trucks in this class include the International Durastar, GMC Topkick C6500. and the Ford F-650

Heavy Duty

Class 7

Vehicles in **Class 7** and above require a Class B license to operate in the United States. These include GMC C7500 Their GVWR ranges from **26,001 to 33,000**.

Class 8

The **Class 8** truck (GVWR) is anything above **33,000 pounds**. These include all tractor trailer trucks.

U.S. Department of Transportation

Federal Motor Carrier Safety Administration

Commercial Vehicle Information Systems and Networks (CVISN)

Commercial Motor Vehicle (CMV)

Any self-propelled or towed vehicle used on highways in intrastate or interstate commerce to transport passengers or property:

- if it has a gross vehicle weight rating of 26,001 or more pounds; or
- if it is designed to transport more than 16 passengers, including the driver; or
- if it is used to transport hazardous materials (as defined in 49 U.S.C. App. 1801 et seq.) in quantity requiring placarding under federal regulation [2]

Commercial Motor Vehicle Safety Act (CMVSA)
Requires all states to meet the same minimum standards for testing and licensing drivers of commercial motor vehicles. The act also mandates uniform penalties and a central reporting system.

Subject: Support of HB 271

I would like to urge support for this legislation. Our company employs approximately 40 temporary drivers for the summer construction season. Most of these temps must have the DOT medical exam & certificate to drive pickup-truck type vehicles. Passage of this legislation would clearly be beneficial to our company to simply our employee preparation processes. Although the actual dollar affect to our company would be relatively small by enacting HB271, any reduction in our operating expenses would, by tariff, reduce our chargeable expenses to our customers, which is everyone who uses natural gas.

Representative Wes Keller
State Capitol, Room 432
Juneau, AK 99801-1182

Re: HB 271

Dear Representative ~~Keller~~ Wes:

On behalf of the Associated General Contractors of Alaska, a construction trade association of over 650 business members, representing the majority of the construction industry in Alaska, thank you for sponsoring HB 271.

This proposed legislation would increase the weight threshold of commercial vehicle regulation and registration from the current 10,000 pounds Gross Vehicle Weight Rating (GVWR) to 14,000 pounds GVWR for inspection and safety regulation purposes. Pick-up trucks and small service vans are getting larger and heavier and are going over the current 10,000 GVWR and becoming a commercial vehicle by definition. When light trucks and service vans go over the 10,000 pound GVWR threshold, they become subject to a series of Federal regulations that have been adopted into the Alaska Administrative Code.

While these smaller vehicles have become larger and heavier over the past few years, industry advancements are also making them much safer than their lighter, smaller and older counterparts. These vehicles do not need the level of scrutiny of conventional "commercial vehicles" as typically they are operating in a limited geographical area and are not subject to the wear and tear that other larger commercial vehicles experience. This bill would help remove an unnecessary burden for small business owners and contractors.

Thank you for your sponsorship and support of HB 271.

Sincerely,

John MacKinnon
Executive Director
Associated General Contractors of Alaska

Monday, Feb 20, 2012 Via e-mail

Jim,
Just letting you know that I wholeheartedly support this bill, as does my husband. I work for Lynden, so I have a bit of knowledge about this. However, my husband is a plumber, and has had experience with the cumbersome & unnecessary additional regulation on vehicles he had as a previous owner, and now as an employee of another small plumbing business.
Thank you for this effort!

Jeanine & Al St. John

ALASKA

February 17, 2012

The Honorable Wes Keller
State Capitol Building
Juneau, Alaska 99801-1182

RE: House Bill 271

Dear Representative Keller:

On behalf of the National Federation of Independent Business/Alaska, I wish to respectfully share our support for House Bill 271. The National Federation of Independent Business is the largest small-business advocacy group in Alaska.

HB 271 raises the weight threshold on intra state commercial vehicles from 10,000 lbs to 14,000 pounds for inspection and safety regulation purposes. This will assist small contractors, i.e. lawn care, carpenters, plumbing & heating, small delivery vehicles and pilot cars. As you are aware, pick-up trucks and small step vans are getting larger and heavier and therefore bumping up over the current 10,000 pound limit and becoming by definition a commercial vehicle for inspection and regulation purposes.

Crossing the 10,000 pound threshold causes the driver to obtain a medical certification, complete daily vehicle inspection reports, perform or have performed annual inspections, and submit several other items on the vehicle to the state DOT to be in compliance. Currently, when over the 10,000 pound threshold, these vehicles are subject to Federal regulations that have been adopted into the Alaska Administrative Code. We feel that these vehicles do not need that level of scrutiny as typically they are operating in a limited geographical area and are not subject to the wear and tear that other larger commercial vehicles experience.

Increased regulation makes it more difficult for small businesses to survive. We appreciate your assistance in relieving small businesses from this potential of unnecessary regulation.

Sincerely yours,

Dennis L. DeWitt
Alaska State Director

Cc: Rep. Peggy Wilson
Aves Thompson

As vehicles have gotten larger and heavier, many vehicles now fall into the current definition of an intrastate commercial motor vehicle that have historically not been considered commercial vehicles such as pickup trucks, small step vans, small trailers, etc. One of the Alaska Trucking Associations legislative priorities is to change the definition of an intrastate commercial vehicle to reduce the regulatory burden on small businesses.

For purposes of commercial vehicle regulation and inspection, HB271 raises the weight threshold on intra state commercial vehicles from 10,000 pounds, Gross Vehicle Weight Rating (GVWR) to 14,000 pounds GVWR for inspection and safety regulation purposes. This is aimed at the small contractors, i.e. lawn care, carpenters, plumbing & heating, small delivery vehicles and pilot cars.

1. Pick-up trucks and small step vans are getting larger and heavier and are bumping up over the current 10,000 pounds GVWR becoming, by definition, a commercial vehicle for inspection and safety regulation purposes.

2. Pilot cars are those vehicles that accompany oversize loads to serve as an extension of the warning system for the oversize load and their work is almost always "intra state" and would fall under this legislation.

3. This bump causes the driver to obtain a medical certification, complete daily vehicle inspection reports, perform or have performed annual inspections, the vehicle must submit several other items to the state DOT to be in compliance.

4. When over the 10,000 pound GVWR threshold, these vehicles are subject to Federal regulations that have been adopted into the Alaska Administrative Code.

5. When passed, this bill will exclude these commercial vehicles that are no more than 14,000 pound GVWR from the unnecessary regulation.

6. This change does not change the commercial status of these intrastate vehicles for purposes of registration with the Division of Motor Vehicles and therefore there is no fiscal impact on the state.

7. These vehicles do not need that level of scrutiny as typically they are operating in a limited geographical area and are not subject to the wear and tear that other larger commercial vehicles experience.

3/15/2012

Representative Keller,

I wish to express my support for house bill 271.

As a small business owner I have been caught up in the enforcement of the 10,000 pound combined load limit while hauling job materials to a job site. While I had all of the safety equipment required by DOT I did received a citation. Just having the equipment does not meet the letter of the law as I found out the hard way. I find these requirements to be bit over reaching. My pick-up truck is under the 10,000 pound limit until I load it up or haul my tool trailer to the job site.

I believe the 14,000 pound limit is a fair adjustment given the quality of modern vehicles. Raising the limit will help reduce a paperwork burden for small business owners like myself.

Thank you for having the foresight to address this issue.

Sincerely,

Alan Wilson, President

Jim,
As Vice President of a large Alaskan construction company I fully support this bill. The excessive regulation in our industry has caused cost to increase while productivity decreases all with very little value to the public at large. Arbitrary and excessive regulation by government is killing the economy of the this state and the country as a whole, and any attempt to curb government intrusion should be embraced.
Following are a few key points to consider.
Thanks

Mr., Jim Pound

The Bill HB 271 is an excellent choice for Alaska as we use one ton trucks that are over the 10,000 lb. GVWR to pilot equipment to and from job sites. They are less wear and tear on the highway system than a normal pickup truck due to the duel rear wheels putting less PSI on the road way than single rear wheels.

FOR AN ACT ENTITLED

"An Act establishing March 29 of each year as Vietnam Veterans Day."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 44.12 is amended by adding a new section to read:

Sec. 44.12.068. Vietnam Veterans Day. Vietnam Veterans Day is established on March 29 of each year to acknowledge and commemorate the military service of American men and women in Vietnam. The day may be observed by suitable observances and exercises by civic groups and the public.

The White House

Office of the Press Secretary

For Immediate Release
March 29, 2012

Presidential Proclamation -- Vietnam Veterans Day

VIETNAM VETERANS DAY

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

On January 12, 1962, United States Army pilots lifted more than 1,000 South Vietnamese service members over jungle and underbrush to capture a National Liberation Front stronghold near Saigon. Operation Chopper marked America's first combat mission against the Viet Cong, and the beginning of one of our longest and most challenging wars. Through more than a decade of conflict that tested the fabric of our Nation, the service of our men and women in uniform stood true. Fifty years after that fateful mission, we honor the more than 3 million Americans who served, we pay tribute to those we have laid to rest, and we reaffirm our dedication to showing a generation of veterans the respect and support of a grateful Nation.

The Vietnam War is a story of service members of different backgrounds, colors, and creeds who came together to complete a daunting mission. It is a story of Americans from every corner of our Nation who left the warmth of family to serve the country they loved. It is a story of patriots who braved the line of fire, who cast themselves into harm's way to save a friend, who fought hour after hour, day after day to preserve the liberties we hold dear. From Ia Drang to Hue, they won every major battle of the war and upheld the highest traditions of our Armed Forces.

Eleven years of combat left their imprint on a generation. Thousands returned home bearing shrapnel and scars; still more were burdened by the invisible wounds of post-traumatic stress, of Agent Orange, of memories that would never fade. More than 58,000 laid down their lives in service to our Nation. Now and forever, their names are etched into two faces of black granite, a lasting memorial to those who bore conflict's greatest cost.

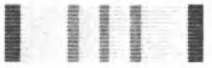
Our veterans answered our country's call and served with honor, and on March 29, 1973, the last of our troops left Vietnam. Yet, in one of the war's most profound tragedies, many of these men and women came home to be shunned or neglected -- to face treatment unbefitting their courage and a welcome unworthy of their example. We must never let this happen again. Today, we reaffirm one of our most fundamental obligations: to show all who have worn the uniform of the United States the respect and dignity they deserve, and to honor their sacrifice by serving them as well as they served us. Half a century after those helicopters swept off the ground and into the annals of history, we pay tribute to the fallen, the missing, the wounded, the millions who served, and the millions more who awaited their return. Our Nation stands stronger for their service, and on Vietnam Veterans Day, we honor their proud legacy with our deepest gratitude.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim March 29, 2012, as Vietnam Veterans Day. I call upon all Americans to observe this day with appropriate programs, ceremonies, and activities that commemorate the 50 year anniversary of the Vietnam War.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of March, in the year of our Lord two thousand twelve, and of the Independence of the United States of America the two hundred and thirty-sixth.

BARACK OBAMA

MARCH 29th
VIETNAM VETERANS DAY
USA



COALITION OF STATES COUNCIL

May 1, 2011

PETITION FOR LEGISLATION TO THE CONGRESS AND PRESIDENT OF THE UNITED STATES OF AMERICA

Dear Honorable Members of Congress and President Obama:

Whereas, thirty eight years ago, on March 29, 1973, the last 2,500 troops were withdrawn from South Vietnam thus ending military involvement in what is now the longest war in our country's history, and

Whereas, thirty seven years ago, March 29, 1974 was declared Vietnam Veterans Day by Presidential order with the support of Congress, and

Whereas, the 58,195 honorable and brave souls who fought and died during the Vietnam War, ones who are missing, and those who died since from the consequences of that war, deserve the eternal gratitude and respect of this nation to be expressed on the **29th of March** of every year in perpetuity and dedicated as **Vietnam Veterans Day**, the Official Day of Recognition and

Whereas, the men and women who served with dedication, honor, and pride during the Vietnam War, both in country and in support of those in harm's way as well as those protecting our freedoms at home and throughout other parts of the world at that time, deserve the eternal gratitude and respect of this nation, and

Whereas, the families whose loved ones gave their lives for our country during the Vietnam War, deserve the eternal gratitude and respect of this nation, and

Whereas, the families of those men and women who came home with the physical and emotional wounds of the Vietnam War and committed to a lifetime of care and support for their loved one, deserve the eternal gratitude and respect of this nation, and

Whereas, the fellow citizens who stood by and supported the families of the fallen as well as the Vietnam veterans who returned and their families, without reservation and with loving care and respect, deserve the eternal gratitude and respect of this nation, and

Whereas, those professionals and volunteers who committed themselves to the loving care and healing of the bodily and emotionally wounded from the Vietnam War at home and have already the utmost gratitude of those they cared for and of their families, deserve the eternal gratitude and respect of this nation, and

Whereas, the men and women of our Allies who served with dedication, honor, and pride alongside our Nation's defenders during the Vietnam War, both in country and in support of those in harm's way as well as those protecting our freedoms and throughout other parts of the world at that time, deserve the eternal gratitude and respect of this nation, and

Whereas, this expression of gratitude and respect to the Vietnam Veterans and their families will also give hope and assurance, to current and future generations of our Nation's Defenders and their respective families, that their sacrifice and service will not be forgotten and deserving of a distinct recognition of the eternal gratitude and respect of this nation, and

Whereas, this expression of gratitude and respect for the honorable sacrifice and service by the Vietnam Veteran, past as well as current and future generations of our nation's defenders and their respective families, needs to remain in the hearts and thoughts of our fellow citizens forever, passed on from generation to generation, and

Whereas numerous States have already chosen March 29th as Vietnam Veterans Day by Legislation and many more states have joined with individual events to honor and thank these brave Veterans and their families for their service to our Great Country,

We therefore, ask the United States House of Representatives to support this request by passage of a standalone Legislation declaring March 29th Vietnam Veterans Day in perpetuity and ask the United States Senate to join in the passage of this same standalone Legislation, incorporating the whereas recognitions that are part of this request. We ask the President of the United States to support this legislation. The proposed wording for the legislation follows.

And we ask the members of the United States Congress, with President Obama's concurrence, to deliver this long overdue tribute by our nation to those honored in this March 29th Vietnam Veterans Day legislation and to have it stand as a distinct symbol of our fellow citizens expression of gratitude, and be a beacon of hope for future defenders of our nation and their families.

We remain forever vigilant and in service to our country, the families who lost a loved one during our wars and since, our veterans and the defenders of our nation as well as their families, our fellow citizens and communities.

Sincerely,

MARCH 29th

* PROPOSED LEGISLATION *

On behalf of the citizens of our great nation, the United States of America, and on behalf of the 111th Congress and the President of United States, this legislation is enacted to be an expression of eternal gratitude and respect to those who served during the Vietnam War Era and to be commemorated as **Vietnam Veterans Day** on the **29th of March** of each year in perpetuity.

This Official Day of Recognition will serve as a vivid reminder that:

On March 29, 1973, the last 2,500 troops were withdrawn from South Vietnam thus ending military involvement in what is now the longest war in our country's history, and

March 29, 1974 was declared Vietnam Veterans Day by Presidential order with the support of Congress, and

58,195 honorable and brave souls who fought and died during the Vietnam War, ones who are missing, and those who died since from the consequences of that war, deserve the eternal gratitude and respect of this nation, and

The men and women who served with dedication, honor, and pride during the Vietnam War, both in country and in support of those in harm's way as well as those protecting our freedoms at home and throughout other parts of the world at that time, deserve the eternal gratitude and respect of this nation, and

The families whose loved ones gave their lives for our country during the Vietnam War, deserve the eternal gratitude and respect of this nation, and

Sponsor Statement HB 281
"An Act establishing March 30 of each year as Welcome Home Vietnam Veterans Day."

On March 30, 1973, all U.S. troops withdrew from Vietnam, marking an end of the 10 year United States military involvement. There were no parades honoring the veterans, no triumphant marches or speeches as there had been at the end of each of the World Wars. America's Vietnam veterans returned home to silence, and in some cases, to abuse for having served their country during a controversial war.

Last year the U.S. Senate designated March 30, 2011 as, Welcome Home Vietnam Veterans Day. It marked the 38th anniversary of the withdrawal of U.S. combat and combat-support unit from Vietnam.

HB 281 would dedicate March 30 of each year as, Welcome Home Vietnam Veterans Day in the State of Alaska to commemorate the military service of American men and women in Vietnam. The day may be observed by suitable observances and exercises by civic groups and the public.

I would appreciate your support for House Bill 281.

Sponsor Statement for House Bill 304
Alaska Fire Standards Council

"An Act relating to the membership of the Alaska Fire Standards Council."

House Bill 304 makes three changes to the membership of the Alaska Fire Standards Council (the Council): it designates an existing seat to a member of the Alaska Professional Fire Fighters Association; it adds a seat that must be filled by a member of the Alaska Fire Chiefs Association and it reclassifies the existing seat from a "Firefighter Administrative Officer" to a "member of" the Alaska State Firefighters Association.

The mission of the Council is to establish (1) professional standards for fire service personnel and (2) curriculum requirements for the certification of training programs. The 11-member Council must include:

- two chief administrative officers or fire chiefs of local governments;
- four representatives of fire fighters (including at least one fire fighter administrative officer from the Alaska State Fire Fighters Association);
- two volunteer fire fighters (one from a community of less than 2,500; one from a community of greater than 2,500);
- two members of the public at-large (one from a community of less than 2,500; one from a community of greater than 2,500);
- The State Fire Marshall or his/her designee.

The Alaska Professional Fire Firefighters Association (APFFA), which is the Alaska affiliate of the International Association of Fire Fighters, represents roughly 500 professional career fire fighters throughout the state.

The mission of the Alaska Fire Chiefs Association (AFCA) is to serve the people of the State of Alaska by influencing fire and emergency service programs and legislation; advancement of fire and emergency services professionals; and providing for the safety and well-being of fire fighters and their communities.

The mission of the Alaska State Firefighters Association (ASFA) is to serve our members through professionalism and leadership thereby enhancing the Fire/Rescue services of Alaska.

Under HB 304, the Governor appoints one member of the APFFA, one member of the AFCA, and one member of the ASFA to the Council from "a list of at least three nominees submitted by each association."

The intent of HB 304 is to ensure that the APFFA, the AFCA, and the ASFA are represented on the Alaska Fire Standards Council and to guarantee that the designees from these three important statewide firefighting groups can speak with the full confidence of their respective associations.

Sean Parnell, Governor
Joseph A. Masters, Commissioner

April 4, 2011

Alaska Fire Chief's Association
Chief Jeff Tucker- President
2358 Bradway Road
North Pole, AK 99705

Dear Chief Tucker,

On January 31, 2011 the Alaska Fire Chief's Association (AFCA) solicited support from the Alaska Fire Standards Council (AFSC) for a designated seat on the Council. The AFSC recently reconvened for consideration of this request and passed a motion to support the AFCA in establishing a designated seat. This support is specific to the proposal for the designation of an additional seat (under AS 18.70.330 [b] {1}) for a representative of the AFCA.

The mission of the AFSC is to provide fire service personnel within the state of Alaska realistic and attainable standards to safely and effectively serve Alaskan communities. As the AFSC continues to establish training and performance standards for Alaska's Fire Service, we have a vision that includes maintaining the highest level of professional standards and comprehensive certification program requirements. Overall, we strive to have the greatest positive impact toward the safety and welfare of fire service personnel and their communities

In review of your request we have concluded that the AFCA would augment our ability to fulfill our mission. This decision is based on the AFCA's continued efforts to enhance fire service leadership, its longstanding support of the AFSC, and its commitment for continued support of the mission of the AFSC. As such, the AFSC endorses the AFCA efforts for the addition of a seat on the Council that is designated for a representative of the AFCA.

Sincerely,

Gordon Descutner	Buddy Lane	Greg Coon
AFSC Executive Director	*AFSC Chairman*	*AFSC Vice Chairman*

Alaska Professional Fire Fighters Association
Thomas Wescott- President
PO Box 111222
Anchorage, AK 99511-1222

Dear Mr. Wescott,

On January 31, 2011 the Alaska Professional Fire Fighters Association (AKPFFA) solicited support from the Alaska Fire Standards Council (AFSC) for a designated seat on the Council. The AFSC recently reconvened for consideration of this request and passed a motion to support the AKPFFA in establishing a designated seat. This support is specific to the proposal for designation of an existing seat (AS 18.70.330 [b] {3}) for a representative of the AKPFFA.

The mission of the AFSC is to provide fire service personnel within the state of Alaska realistic and attainable standards to safely and effectively serve Alaskan communities. As the AFSC continues to establish training and performance standards for Alaska's Fire Service, we have a vision that includes maintaining the highest level of professional standards and comprehensive certification program requirements. Overall, we strive to have the greatest positive impact toward the safety and welfare of fire service personnel and their communities

In review of your request we have concluded that the AKPFFA would augment our ability to fulfill our mission. This decision is based on the AKPFFA's history of active participation in statewide fire service issues and its commitment to support the mission of the AFSC. As such, the AFSC endorses the AKPFFA effort to seek seat designation within an existing seat on the Council.

Sincerely,

Gordon Descutner	Buddy Lane	Greg Coon
AFSC Executive Director	*AFSC Chairman*	*AFSC Vice Chairman*

ALASKA PROFESSIONAL FIRE FIGHTERS ASSOCIATION

PO Box 111222 Anchorage, Alaska 99511-1222
www.alaskapffa.org
North Pole – Ketchikan – Fairbanks – Anchorage – Kotzebue – Juneau – Shemya

Honorable Craig Johnson
Alaska House of Representatives
State Capital Room
Juneau AK 99801

Representative Johnson:

My name is Tom Wescott and I'm the President of the Alaska Professional Firefighters Association. The AKPFFA represents roughly 500 firefighters from Kotzebue to Ketchikan and on behalf of these hard workingmen and women I'm writing you today to encourage our Alaska State legislators to support HB 304.

HB 304 will reassign a seat on the Alaska Fire Standards Council to the Alaska Professional Fire Fighters Association (AKPFFA). We feel the importance behind this reassignment is to better coordinate with the International Association of Fire Fighters (IAFF), the parent organization to the AKPFFA, to which the Council references training and certification standards for education here in Alaska. The IAFF has a vast well-respected library of training modules and proven standards that they have compiled for the fire service since 1918. This relationship will open up those paths making it easier for the Council to access this information along with education towards receiving grants that can assist smaller departments with training needs, an obvious benefit for our small town Alaska fire departments.

The seat that the AKPFFA is asking to reassign to their organization is a seat that is represented by a city consisting of a population greater than 2,500. This seat historically has been filled by a firefighter from either the city of Fairbanks or the city of Anchorage, both to which our organization represents.

The AKPFFA has had extensive meetings and discussions with the Standards Council on this legislation. The council is positive on this reassignment knowing it will bring a voice to the table not only representing roughly 500 Alaskan Fire Fighters from some of Alaska's largest cities, but also a valuable tool with international resources for training and standards education.

Thanks for your support on this legislation,

Thomas A. Wescott
President AKPFFA
PO Box 111222
Anchorage, AK 99511

ALASKA FIRE CHIEF'S ASSOCIATION

Phone: (907) 488-3400 FAX: (907) 488-6118

February 12, 2012

To: Representative Johnson

Reference: House Bill 304, "An Act relating to the membership of the Alaska Fire Standards Council."

Dear Rep. Johnson,

On behalf of the Alaska Fire Chief's Association I want to thank you for sponsoring House Bill 304. HB 304 will allow the Alaska Fire Chief's Association and the Alaska Professional Fire Fighters Association to join with the Alaska State Firefighters Association in contributing to the success of the Alaska Fire Standards Council.

The Alaska Fire Standards Council's mission is: "To establish professional standards for fire service personnel, and curriculum requirements for the certification of training programs." The mission of the Standards Council's compliments the mission of the Alaska Fire Chief's Association which is: "To serve the people of the State of Alaska by influencing fire and emergency service programs and legislation; advancement of fire and emergency services professionals; and providing for the safety and well-being of firefighters and their communities."

Each of our associations works to improve the fire service in Alaska. The Fire Standards Council has a direct impact on how we provide those services to our residents and visitors. By having a seat on the Council we each would have a representative who would speak for all of the members of our associations and would allow us to better work with the Fire Standards Council in order to accomplish its mission.

The Fire Standards Council and its members unanimously support the inclusion of the Alaska Fire Chief's and Alaska Professional Fire Fighters Associations on the Council and we encourage all legislators to support HB 304.

I would like to again thank you for your support.

Sincerely,

Jeff Tucker, Fire Chief
Chair, Alaska Fire Chief's Association Legislative Committee

February 23, 2012

Honorable Craig Johnson
Alaska House of Representatives
State Capitol Room 216
Juneau, Alaska 99801

Representative Johnson,

The Alaska State Firefighters Association supports the changes to the Fire Standards Council that is being presented by HB 304. As a member of the Fire Standards Council at the time the change was presented, I did have some input into these changes. As president of the ASFA I, believe that the change from Administrative Officer to ASFA Member will allow us to continue to have good representation filling on the Fire Standards Council. If you have any questions, please do not hesitate to contact me at 907-738-0601. Thank you.

Sincerely

Robert Dennard,
President
Alaska State Firefighters Association
209 Park Street
Sitka, AK 99835

Alaska Fire Standards Council

Mission:

To establish professional standards for fire service personnel, and curriculum requirements for the certification of training programs.

Vision:

- Maintain the highest level of professional standards for the safety and welfare for fire service personnel and their communities
- Maintain comprehensive certification program requirements
- Enhance the capability and capacity of fire service response personnel
- Preserve public confidence in fire service professionals
- Enhance interoperability within Alaska's emergency response system

Values:

- Firefighter safety
- Effective open communications
- Public service
- Continuing education and training
- Professional credibility and integrity
- Community support
- Transparent process

Term: Four years

Description: 11 members - 10 appointed by the Governor: 2 chief administrative officers or fire chiefs of local governments (only one of these may be from a local government where the fire department consists entirely of paid employees); 4 representatives of fire fighters, including at least one fire fighter administrative officer from the Alaska State Fire Fighters Association (these members may not, while serving on the council, be a fire chief); 2 volunteer fire fighters, one from a community with a population of 2,500 or less and one from a community with a population greater than 2,500; and 2 members of the public at large with at least one member from a community with a population of 2,500 or less. In addition, the state fire marshal or a designee of the state fire marshal shall serve on the council during his or her continuance in office.

Function: The council may adopt regulations for the administration of AS 18.70.320-18.70.369 including establishing minimum training and performance standards for certification of fire services personnel; establish minimum fire training curriculum requirements for certification of training programs that are designed to enable trainees to meet these standards; govern the procedure for certification of fire services training programs that meet the minimum curriculum requirements; govern the procedure for certification of individuals who satisfy the minimum training and performance standards; govern the procedure for revocation of the certificate of a person or program; consult and cooperate with municipalities, agencies of the state, other governmental agencies, universities, colleges, and other institutions concerning the development of fire services training schools and programs offered in the state; employ an administrator and other persons necessary to carry out its duties and charge and collect fees determined by the council to be necessary.

Chair: Buddy Lane

ALASKA PROFESSIONAL FIRE FIGHTERS ASSOCIATION

affiliated with the

International Association of Fire Fighters
AFL-CIO, CLC

Respecting Tradition . . .
. . . Embracing the Future

ALASKA PROFESSIONAL FIRE FIGHTERS ASSOCIATION

The Alaska Professional Fire Fighters Association was chartered by the International Association of Fire Fighters in 2004, bringing together nearly 500 professional, career fire fighters into a statewide organization.

Though our State Association is relatively new, our goals and objectives have been in place for many years with Anchorage Local 1264 and Fairbanks Local 1324 being chartered when Alaska was still a territory, 1957 and 1959 respectively. By uniting our efforts with Ketchikan Local 2761 , Juneau Local 4303, and recently North Pole Local 4505 we present a united voice for professional fire fighters throughout the state. Our members respond to 75% of fire and EMS 911 calls in Alaska.

By combining forces we have already had an impact on the legislature in Juneau. This led to the recent passage of Alaska's Presumptive Disability Law, providing the presumption of job related illness for certain cancers and heart and lung disease contracted by fire fighters. We will actively work for legislation that supports the needs of career fire fighters and will fiercely oppose any proposed legislation that negatively affects the safety or welfare of our members.

To be effective in Juneau we must be active in the election process. We identify candidates for the House, Senate and Governor offices that support the goals and objectives of career fire fighters. We reach across party line and support candidates solely on their positions on issues that affect career fire fighters and their families.

The AKPFFA works with other state and provincial associations through our membership in the Federation of State and Provincial Professional Fire Fighters and in May 2008 hosted a conference in Anchorage for the federation.

We work with our International Association to provide training for our affiliate locals and provide leadership assistance when requested. Our annual convention provides an opportunity for professional fire fighters from across Alaska to meet and share information important to our future.

The International Association of Fire Fighters

IAFF

The IAFF was established on Feb. 28, 1918, for the sole benefit of rank-and-file fire fighters in the United States and Canada. It was on this date that 36 fire fighter delegates attended the first IAFF Convention and adopted the IAFF Constitution and By-Laws. The objectives incorporated into that Constitution remain in its preamble to this day.

Throughout the last 90 years, the members and staff of the IAFF have worked tirelessly to fulfill each of these charges. As a result of their work, the IAFF was the driving force behind nearly every advance in the fire and emergency services in the twentieth century, from the introduction of shift schedules early in the century to the enactment of the 2-in/2-out safety regulation near its close. With extremely active political and legislative programs, and with recognized experts in the fields of occupational health and safety, fire-based emergency medical services and hazardous materials training, the IAFF has long occupied a special place in the North American fire service.

Today, the IAFF is the primary advocate for providing fire fighters and paramedics with the tools they need to perform their jobs. The union also provides a strong voice in the development and implementation of new training and equipment, and has worked hard to advance the proper staffing of fire and EMS departments.

At the founding meeting in 1918, the delegates decided to dedicate their union to the following objectives (modified only slightly over time):

- *To organize all fire fighters and emergency medical or rescue workers;*
- *To secure just compensation for their services and equitable settlement of their grievances;*
- *To promote as safe and healthy a working environment for fire fighters as is possible through modern technology;*
- *To promote the establishment of just and reasonable working conditions;*
- *To place the members of the Association on a higher plane of skill and efficiency;*
- *To promote harmonious relations between fire fighters and their employers;*
- *To encourage the formation of local unions, state and provincial associations and joint councils;*
- *To encourage the formation of sick and death benefit funds;*
- *To promote the research and treatment of burns and other related health problems common to fire fighters;*
- *To encourage the establishment of schools of instruction for imparting knowledge of modern and improved methods of fire fighting and prevention; and*
- *To cultivate friendship and fellowship among its members.*

From the Preamble of the Constitution and By-Laws of the International Association of Fire Fighters

About Us

What does the AFCA do?

Educate

We strongly support quality training for our firefighters. During the late 90's we were successful in getting the Fire Standards Council approved by the state legislature.

Our support of education does not stop with firefighters. We are also advocates of public education.

Train

Twice annually we have the opportunity to train together. We have the Alaska Fire Conference (fall) and Leadership Summit (spring) conference during which we offer a wide variety of training for chief level officers.

Network

We have numerous opportunities to discuss our problems and concerns with our peers. The Department of Veteran and Military Affairs has, for years now, graciously allowed us to use the First Class e-mail system. The majority of our members are taking advantage of this.

We also have monthly teleconferences where we make decisions on the direction of our organization. Frequently, neighboring departments will gather and share the expense of the teleconference.

Finally, we get to meet in person, twice a year, at our conferences. This is a great time to learn from and share with our fellow chief officers.

Lobby

Every spring we travel to Juneau for the Leadership Summit to take our concerns to the legislature. This is a great opportunity to get some of your community issues brought forth as well. We generally spend two afternoons "on the hill" talking with the legislators. The rest of the time is spent training.

Goals

In 1971 the State of Alaska had 1,081 actual fires that resulted in 33 fire fatalities, which was also the ten year average for fire fatalities in Alaska at that time. In that year, the Alaska Fire Chiefs Association was established. Now, just over a third of a century later, we find that there where 2,758 actual fires resulting in 12 fire fatalities. Our current ten year fire fatality average is 16.

The over 50% reduction in the 10 year fire fatality average rate has been the result of the combined efforts of the Alaska State Fire Marshal office, the Alaska State Firefighters Association, and the Alaska Fire Chiefs Association. In 2005 we welcomed the Alaska

The goals for our Alaska Fire Chiefs Association are:

Long term

1. Zero fire fatalities.
2. A sustainable funding source for the Alaska Fire Standards Council.

Short Term

3. Passage of a Fire Safe Self-Extinguishing Cigarette bill.
4. A statewide assistance program to assist registered fire departments with matching requirements for federal grants.
5. Assist registered fire departments with training and equipment needs.

About the Alaska State Firefighters Association

The Alaska State Firefighters Association(ASFA) is a 501(c)(3) non-profit organization. Representing Alaska's firefighters with chapters from Kotzebue to Ketchikan representing the interest of Alaskan firefighters, fire prevention specialists, Emergency Medical Technicians,dispatchers, and various other positions encompassed within the fire service today. The departments represented consist of paid, volunteer, and combination departments. The Alaska State Firefighters Association website will be a resource for both the safety minded Public and the members of the State Firefighters Association throughout the state.

Our Mission

To serve our members through professionalism and leadership thereby enhancing the Fire/Rescue services of Alaska.

Our Vision

The Alaska State Firefighters Association Seeks to:

- Provide a progressive voice for Alaska's firefighters
- Be a professional organization that provides the finest training and education opportunities to Alaskan firefighters
- Foster a fire safe Alaska

We Value

- The contribution of all members
- Providing an atmosphere of involvement and participation
- The dedication of all Fire Rescue personnel to provide life safety and the protection of property
- Public and firefighter safety/education
- Inter-agency cooperation and communication
- Open communications at all levels
- Family unity and support
- Camaraderie, trust and integrity of the Fire/Rescue service

SPONSOR STATEMENT HB 316

"An act relating to military facility zones in the state; relating to the development of housing in military facility zones; relating to the financing of projects in military facility zones; and providing for an effective date."

House Bill 316 gives statutory authority to the Department of Military and Veterans' Affairs to establish "military facility zones" within the State of Alaska. Military facility zones are designated areas in close proximity to a military base (facility) where industrial or economic development will directly enhance the base's ability to fulfill its mission.

Military facility zones are successfully employed in other states as vehicles to obtain and administer funds for business development specifically relating to military activities. Funding for such zones in Alaska may be available from the Alaska Industrial Development and Export Authority (AIDEA) and/or the Alaska Housing Finance Corporation (AHFC), or from federal New Market Tax Credits. Federal, state, or local public or private funding sources, credit, or guarantee programs can be made available directly to municipalities and boroughs that are working on specifically approved projects within a military facility zone.

Military facility zones create opportunities for significant benefits to Alaska and the nation. They will enhance economic activity near military installations and thereby facilitate economic growth and development in the state, especially where local governments are working in close partnership with their military counterparts. The zones promote expansion of infrastructure to benefit both military and civilian objectives, such as civil defense, homeland security and emergency response. They will enhance the nation's military capabilities by helping bases operate more effectively and efficiently.

Finally, military facility zones in Alaska will clearly demonstrate the state's continuing and substantive support for the armed services, and help defend against the negative impacts on Alaska's regional economies and military communities that might occur should Congress choose to implement the federal Base Realignment and Closure Act (BRAC).

House Bill 316 - Sectional Analysis

"An Act relating to military facility zones in the state; relating to the development of housing in military facility zones; relating to the financing of projects in military facility zones; and providing for an effective date."

Section 1. This adds a new chapter to AS 26, Chapter 30 Military Facility Zones.

26.30.005. Establishes Military Facility Zones

26.30.010. Establishes application for a Military Facility Zone

26.30.020. Establishes the criteria for designating Military Facility Zones.

26.30.030. Establishes the designation of Military Facility Zone

26.30.040. Establishes for expansion of a Military Facility Zone

26.30.050. Establishes Military Facility Zone authorities.

26.30.060. Establishes benefits in a Military Facility Zone.

26.30.070. Establishes that regulations may be adopted to carry out the provisions of this chapter.

26.30.900. Establishes definitions

Section 2. This amends AS 44.62.175(a) to add an online public notice system maintained on the State's internet site.

E-mail Representative_Steve_Thompson@legis.state.ak.us

Section 3. This amends AS 44.88.909(9) to define the word "project" as used in conjunction with this chapter

Section 4. This adds a new section to the uncodified law of the State of Alaska to include TRANSITION: REGULATIONS may immediately adopt regulations necessary to implement the changes made by this Act.

Section 5. States Section 4 of this Act takes effect immediately under AS 01.10.070(c).

Section 6. States that theAct takes effect July 1, 2012 except as provided in Section 5 of this Act.

MEMORANDUM

To: House State Affairs Committee

From: Representative Steve Thompson

Date: February 29, 2012

Re: Questions on House Bill 316

Please find the question and answers from the Committee hearing held on Tuesday, February 28, 2012.

1. **Does the Bill give advantage of one community over another in a Military Facility Zone?**
   a. No, the Bill does not delineate or distinguish between communities that are in a Military Facility Zone. The Bill is silent on this issue.

2. **Are National Guard and Reserve facilities included in this Bill?**
   a. Yes, all Military facilities are included. (See page 6 Section 26.30.900(3))

3. **What States have enacted legislation similar to HB 316?**
   a. Virginia, Alabama, Texas, Maryland, and Arizona.

4. **What states have included U.S. Coast Guard in similar Bills?**
   a. Alaska is the first State to include Coast Guard Assets in a military Bill of this nature.

5. **Is this Bill a proactive approach the offset BRAC?**
   a. The Bill was introduced prior to the latest BRAC talks. However, this bill is proactive in that vein.

E-Mail: Representative.Steve.Thompson@legis.state.ak.us
Website: www.akrepublicans.org/thompson/

6. **The Fiscal Note from Ted Leonard, AIDEA, states that there would be five (5) military effectiveness zones in rural Alaska. What are those five zones and do they preclude urban areas from the Bill?**
    a. The Fiscal Note provided by Mr. Leonard was drafted from the draft version of the bill. Mr. Leonard has since provided a zero Fiscal Note that reflects no limitation on the number of zones or their location within the State.

7. **Benefits of a Military Facility Zone: Does a municipality or business located in Military Facility Zone have priority over non-Military Facility Zone municipalities and businesses?**
    a. It may, The Department of Military and Veterans' Affairs or any other State program MAY give priority consideration for financial assistance to municipalities and businesses located in a Military Facility Zone. The prioritization would expedite the process for funding. AIDEA and AHFC do not give priority to one over the other. (See Page 5 Line 25 Section 26.30.060(b))

8. **Does this Bill mean that all municipalities and boroughs that apply to be a Military Facility Zone all be approved?**
    a. No, only those areas that meet the criteria in Section 26.30.020 may be approved the Adjutant General.

9. **Is the 60 day timeframe stated in Section 26.30.030, sufficient for the Adjutant General to make a decision determining if an areas application to be a Military Facility Zone meets the criteria in Section 26.30.020?**
    a. Yes, that timeframe was specifically approved by the Adjutant General and the Department of Military and Veteran's Affairs.

10. **Where does this provide that individual project must be approved by the Adjutant General instead of the city or military facility zone authority?**
    a. The Bill speaks to the Adjutant General designating, determining, and prioritizing areas as Military Facility Zones. The Bill does not address individual projects within a Military Facility Zone requiring the approval of the Adjutant General.

11. **Where does the Bill state that a municipality or business must be a direct contractor with DOD to be eligible for designation as a Military Facility Zone?**
    a. The Bill addresses the criteria for designation as a Military Facility Zone in Section 26.30.020. The Bill does not speak to having direct contracts; it does speak to directly supporting the military application of a facility. (section 26.20.020(a)(2)) MOST applications involving DOD are under contract to DOD; however not all applications that support the military facility are direct contractors to DOD. Page 7 Section 26.30.900, Section AS 44.62.175(a)(9) defines in broad terms the definition of a project, the Bill is silent on a requirement to be a direct contractor.

12. **Where does the Bill address that each Military Facility Zone will have a Liaison Committee? Where does it specifically say that?**
    a. The Bill calls for a Military Facility Zone Authority on page 5 Section 26.30.060. That is what was referred to when the term committee was inadvertently used.

E-Mail: Representative.Steve.Thompson@legis.state.ak.us
Website: www.akrepublicans.org/thompson/

13. Does the Bill require that a Military Facility Zone authority be established?

a. No, the Bill states that a municipality may create a Military Facility Zones Authority or if more than one municipality is included in a Military Facility Zone they may, by agreement, create a Military Facility Zone Authority. Page 5 Section 26.30.050(a)(b).

14. There is a fear that the Bill would be used to limit or exclude parties from gaining from this Bill. How does the Bill protect those interests?

a. Section 26.30.010(d)(1) – (5) has placed safeguards into the bill to avoid that from happening through the Public Notice System (AS 44.62.175)

15. Does AIDEA and AFHC need to have broadened or extended authority as it relates to this Bill?

a. No, during the final meeting in the course of the drafting of this Bill AIDEA and AFHC were present and stated that they had the ability to support this Bill as written.

It needs to be remembered that the Department of Military and Veterans' Affairs and the Adjutant General still have to draft the regulations to carry out the provisions of this Bill.

REPRESENTATIVE DAN SADDLER

To Co-Chair Thompson and Members of the MLV Committee:

Though I can't be there today, I wanted to put on record my strong support for HB 316, Military Facilities Zones. I was pleased to work on this legislation during the interim with Representatives Thompson and Feige, and to see it come before our committee. I see HB 316 as an important legislative tool to strengthen the position of military facilities in our state.

Alaska has 32 different military installations that are critical elements in our state economy. There are more than 24,000 active-duty, Guard and Reserve troops serving in Alaska, with an annual payroll of more than $1.5 billion. About 13 percent of the state economy depends on the military, with the impact being especially significant near the larger installations.

These bases are a significant part of our nation's defense structure. They defend the nation's airspace and outer space; rapidly deploy forces around the world in times of crisis; support global logistics and transportation functions; and provide training opportunities that are unmatched elsewhere in the world.

We've heard recent news that does not bode well for Alaska's military bases. We've heard news of nearly half-trillion dollars in defense budget cuts over the next 10 years. We've heard of the possible loss of F-16s from Eielson Air Force Base, and of HC-130s from Joint Base Elmendorf-Richardson. We've heard that nearly 270 civilian jobs are being cut from these two bases. And we've heard the Secretary of Defense raise the prospect of another round in the Base Realignment and Closure (BRAC) process that could mean the further diminution of the military's presence in Alaska.

HB 316 can provide a number of significant benefits to our state and nation:

- It will provide a mechanism for bringing new federal and state money to bear on the bases.
- It will help develop infrastructure that can improve living conditions and economic prospects for the communities surrounding military facilities.
- It will help Alaska's bases become more efficient and better able to effectively perform their missions, strengthening the case against their realignment or closure.
- It will provide a mechanism to fund expansion of existing facilities to embrace new missions.
- It will help protect private - and public-sector jobs.
- It will provide another positive demonstration of Alaska's support for the military.

I am proud to be a co-sponsor of this legislation; please join me in supporting its passage.

Dan Saddler

Rep. Dan Saddler, Co-Chair, Military and Veterans Affairs Committee

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 316

Analysis

This legislation allows Department of Military and Veterans Affairs (DMVA) to designate military effectiveness zones in the state. With respect to the Alaska Industrial Development and Export Authority (AIDEA) it permits the authority to provide financing in these areas which could be beneficial. AIDEA currently has the authority to invest in federal facilities, which can include military buildings. This legislation would create an incentive for such financing, but would not require the creation of new programs within AIDEA.

There is no foreseeable fiscal impact to AIDEA as a result of this legislation.

FISCAL NOTE #3

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 316

Analysis

The bill gives statutory authority to the Alaska Department of Military and Veterans' Affairs to establish "Military Facility Zones" (MFZ) within the State of Alaska which are designated areas in close proximity to a military base (facility) where industrial or economic development will directly enhance the base's ability to fulfill its mission. The MFZ includes zoning for residential use. A municipality in which a military facility zone is located or a military facility zone authority may receive financing for one or more projects from the Alaska Housing Finance Corporation.

The bill does not provide any additional advantage to AHFC's current ability to provide financing to municipalities or the military for housing development. It may prove advantageous to other entities. Zero fiscal note from AHFC for this bill.

REPRESENTATIVE STEVE THOMPSON
DISTRICT 10

MEMORANDUM

To: Senate State Affairs Committee

From: Representative Steve Thompson

Date: March 29, 2012

Re: Questions on House Bill 316

Please find the questions and answers from the Committee hearing held on Thursday, March 29, 2012.

1. In answer to the Committee's questions, on AHFCs role and the New Market Tax credit.

    a. The answer on AHFC's role is in privatized housing. The Military Facility Zone (MFZ) could use New Market Tax Credits to underwrite the subdivision infrastructure development (roads, utility extensions, etc), leaving just the house financing for AHFC. This would reduce the cost of the house, making it more affordable in a rural, high cost area for military members to purchase. By providing an off-base housing advantage, the government does not need to build government quarters, thereby lowering the cost of operating the base to the military. A win-win, and yes, AHFC is critical to providing the home loan, but the MFZ is critical to allow infrastructure development to make the cost of homes affordable.

    b. The New Markets Tax Credit (NMTC) Program was established in 2000 as part of the Community Renewal Tax Relief Act 2000. The goal of the program is to spur revitalization efforts of low-income and impoverished communities across the United States and Territories. The NMTC Program provides tax credit incentives to investors for equity investments in certified Community Development Entities, which invest in low-income communities. The credit

equals 39% of the investment paid out (5% in each of the first three years, then 6% in the final four years, for a total of 39%) over seven years (more accurately, six years and one day of the seventh year) . A Community Development Entity must have a primary mission of investing in low-income communities and persons. HB 316 furthers this concept and includes language on pages 2 thru 4 Section 26.30.020(a)(1-4), (c)(1-15) to address criteria for a Military Facility Zone that supplement the qualifying language in the Community Renewal Tax Relief Act 2000 for the New Market Tax Credit to be applied to a Military Facility Zone.

2. **Does AIDEA and AFHC need to have broadened or extended authority as it relates to this Bill?**

    a. No, during the final meeting in the course of the drafting of this bill AIDEA and AFHC were present and stated that they had the ability to support this bill as written.
    b. It should be noted that during the House hearings AIEDA and AHFC were present and had no objections or opposing comments on the bill.

get AIDEA to testify

SPONSOR STATEMENT HB 316

"An act relating to military facility zones in the state; relating to the development of housing in military facility zones; relating to the financing of projects in military facility zones; and providing for an effective date."

House Bill 316 gives statutory authority to the Department of Military and Veterans' Affairs to establish "military facility zones" within the State of Alaska. Military facility zones are designated areas in close proximity to a military base (facility) where industrial or economic development will directly enhance the base's ability to fulfill its mission.

Military facility zones are successfully employed in other states as vehicles to obtain and administer funds for business development specifically relating to military activities. Funding for such zones in Alaska may be available from the Alaska Industrial Development and Export Authority (AIDEA) and/or the Alaska Housing Finance Corporation (AHFC), or from federal New Market Tax Credits. Federal, state, or local public or private funding sources, credit, or guarantee programs can be made available directly to municipalities and boroughs that are working on specifically approved projects within a military facility zone.

targets commercial businesses.

Military facility zones create opportunities for significant benefits to Alaska and the nation. They will enhance economic activity near military installations and thereby facilitate economic growth and development in the state, especially where local governments are working in close partnership with their military counterparts. The zones promote expansion of infrastructure to benefit both military and civilian objectives, such as civil defense, homeland security and emergency response. They will enhance the nation's military capabilities by helping bases operate more effectively and efficiently.

Finally, military facility zones in Alaska will clearly demonstrate the state's continuing and substantive support for the armed services, and help defend against the negative impacts on Alaska's regional economies and military communities that might occur should Congress choose to implement the federal Base Realignment and Closure Act (BRAC).

HOUSE BILL NO. 316

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY REPRESENTATIVES THOMPSON, Saddler, Feige, Chenault, Herron, Tammie Wilson, Lynn

Introduced: 2/8/12
Referred: House Special Committee on Military and Veterans' Affairs, State Affairs

A BILL

FOR AN ACT ENTITLED

"An Act relating to military facility zones in the state; relating to the development of housing in military facility zones; relating to the financing of projects in military facility zones; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 26 is amended by adding a new chapter to read:

Chapter 30. Military Facility Zones.

Sec. 26.30.005. Military facility zones. The Department of Military and Veterans' Affairs may establish military facility zones in this state in accordance with this chapter.

Sec. 26.30.010. Application for a military facility zone. (a) The adjutant general may accept applications for designation of a military facility zone or expansion of a military facility zone. The adjutant general shall by regulation specify the content of, and submission requirements for, the application.

(b) The chief executive officer or governing body of a municipality may apply

for an area to be designated as a military facility zone or for expansion of an existing military facility zone as follows:

(1) a municipality may apply for an area within its boundaries;

(2) a borough may apply on behalf of a city located in the borough, for an area within the boundaries of the city only with the prior consent of the city;

(3) two or more municipalities may jointly apply for an area within the common boundaries of the municipalities.

(c) The application must contain the information and be submitted in the form and manner required by the adjutant general and must provide

(1) a statement that the applicant has examined the feasibility of creating industry, development, and educational or training opportunities for employers and employees of business entities located or to be located in the proposed military facility zone; and

(2) approval of the application by ordinance of the governing body of the applicant, except that, for an area in the unorganized borough that is not in a municipality, the approval must be by law.

(d) On receiving an application under this section or an application for expansion under AS 26.30.040, the adjutant general shall give notice of the application to the following:

(1) the legislature;

(2) the commissioner of commerce and economic development;

(3) the executive director of the Alaska Industrial Development and Export Authority;

(4) the executive director of the Alaska Housing Finance Corporation;

(5) the public; the notice under this paragraph shall be made by posting on the Alaska Online Public Notice System (AS 44.62.175).

(e) The adjutant general shall solicit comments on the application. Notice of the solicitation shall be placed on the Alaska Online Public Notice System (AS 44.62.175).

Sec. 26.30.020. Criteria for designation as a military facility zone; priority considerations. (a) The adjutant general may designate an area as a military facility

zone only if the area in the state

(1) is in close proximity to a facility;

(2) directly supports the military application of a facility;

(3) is zoned for industrial or economic development, residential use, and workforce training or education beneficial to the facility; and

(4) is in area with inadequate infrastructure to support the continued or expanded operations of the facility.

(b) The adjutant general may give priority consideration to an area for designation as a military facility zone if the area is of strategic importance to the economic development interests of the municipality.

(c) The adjutant general shall consider the following factors before designating an area as a military facility zone:

(1) whether the proposed military facility zone designation is consistent with the comprehensive plan of the municipality;

(2) whether it is feasible to develop sites within the proposed zone for purposes of industrial or economic development, residential use, and workforce training or education beneficial to the facility;

(3) whether the municipality has targeted the area for revitalization in a plan or ordinance;

(4) the relationship between the area and a military facility subject to realignment or closure under 10 U.S.C. 2687, as amended, or a successor statute or the effect of the realignment or closure on the area;

(5) the availability, cost, and condition of existing business and educational facilities to support the military facility or facility of a civilian agency;

(6) the difference between the median annual income of residents of the area and the median annual income of residents of the state and region, and the number of residents who receive public assistance;

(7) the number of residents of the area who receive unemployment, and the ability of the municipality to improve social and economic conditions of the area;

(8) the need for financing for small businesses that would improve

social and economic conditions in the area;

(9) any plans or financial commitments of municipalities to improve the area;

(10) any plans or financial commitments of private entities to improve the area;

(11) the municipality's participation in economic development activities, including proposals for public or private development;

(12) support from community or business organizations in the area;

(13) the availability of workforce readiness programs, including workforce recruiting and training support or educational research and curriculum support in the area;

(14) the availability or plans for the creation of workforce housing options for residents of the area; and

(15) the fiscal effect on the state if the area were to be designated a military facility zone.

Sec. 26.30.030. Designation of military facility zones. (a) Within 60 days after receiving an application under AS 26.30.010 submitted in compliance with this chapter, after considering comments under AS 26.30.010(e), the adjutant general may designate a military facility zone. The adjutant general shall specify the location and boundaries of the military facility zone.

(b) The designation of an area as a military facility zone is effective for 20 years, beginning on the date the adjutant general designates the area as a military facility zone.

(c) Unless the area of the municipality exceeds 500 square miles, only two military facility zones may be in effect in a municipality at one time.

(d) The decision of the adjutant general on an application to designate a military facility zone is a final administrative order subject to appeal to the superior court for review in the manner provided under AS 44.62.560.

no one appeals?

Sec. 26.30.040. Expansion of a military facility zone. (a) Within 60 days after receiving an application for expansion of a zone submitted by a municipality in compliance with AS 26.30.010, the adjutant general may expand the zone, if the

applicant demonstrates that the expanded area meets the requirements of AS 26.30.020.

(b) The adjutant general may grant up to two applications for expansion of a military facility zone in each calendar year for an area that

(1) meets the requirements of AS 26.30.020; and

(2) has strategic importance to the economic development of the municipality.

(c) The limit in AS 26.30.030(c) does not apply to an expansion of a military facility zone that does not exceed 50 percent of the area of the existing zone or to an expansion of a zone under (b) of this section.

Sec. 26.30.050. Military facility zone authorities. (a) If a military facility zone is within the boundaries of only one municipality, the municipality may create a military facility zone authority for the zone.

(b) If a military facility zone includes areas within the boundaries of more than one municipality, the municipalities may, by agreement, create a military facility zone authority for the zone.

Sec. 26.30.060. Benefits in military facility zones. (a) A municipality in which a military facility zone is located or a military facility zone authority for a military facility zone may receive

(1) financing for one or more projects in the military facility zone from the Alaska Industrial Development and Export Authority or the Alaska Housing Finance Corporation;

(2) funding for one or more projects from any other available source of federal, state, or local public or private funding, credit, or guarantee programs.

(b) A municipality in which a military facility zone is located, a military facility zone authority for a military facility zone, or a business entity located in a zone may receive priority consideration for financial assistance for projects or operations in the zone from the Department of Military and Veterans' Affairs and from any other appropriate state program, if available under the law establishing the program.

Sec. 26.30.070. Regulations. The adjutant general may adopt regulations under AS 44.62 to carry out the provisions of this chapter, including specifying criteria

and procedures for applications, approvals, and the monitoring of eligibility under this chapter.

Sec. 26.30.900. Definitions. In this chapter, unless the context otherwise requires,

(1) "adjutant general" means the principal executive officer of the Department of Military and Veterans' Affairs appointed under AS 26.05.160;

(2) "area" means a geographic area described by a closed perimeter boundary within one or more municipalities in the state;

(3) "facility" means a facility of

(A) an Alaska military or civilian agency serving a subdivision of the Alaska National Guard, the United States Army, the United States Navy, the United States Marine Corps, the United States Air Force, or the United States Coast Guard, including reserve units of those entities;

(B) the National Aeronautics and Space Administration; or

(C) a public corporation within the Department of Military and Veterans' Affairs;

(4) "military facility zone" means an area that

(A) meets the requirements of AS 26.30.020; and

(B) is designated as a military facility zone by the adjutant general under AS 26.30.030;

(5) "military facility zone authority" means a public corporation established by one or more municipalities to administer a military facility zone located in the municipalities in the state;

(6) "zone" means a military facility zone.

* **Sec. 2.** AS 44.62.175(a) is amended to read:

(a) The lieutenant governor shall develop and supervise the Alaska Online Public Notice System, to be maintained on the state's site on the Internet. The lieutenant governor shall prescribe the form of notices posted on the system by state agencies. The Alaska Online Public Notice System must include

(1) notices of proposed actions given under AS 44.62.190(a);

(2) notices of state agency meetings required under AS 44.62.310(e),

even if the meeting has been held;

(3) notices of solicitations to bid issued under AS 36.30.130;

(4) notices of state agency requests for proposals issued under AS 18.55.255, 18.55.320; AS 36.30.210; AS 37.05.316; AS 38.05.120; and AS 43.40.010;

(5) executive orders and administrative orders issued by the governor;

(6) written delegations of authority made by the governor or the head of a principal department under AS 44.17.010;

(7) the text or a summary of the text of a regulation or order of repeal of a regulation for which notice is given under AS 44.62.190(a), including an emergency regulation or repeal regardless of whether it has taken effect;

(8) notices required by AS 44.62.245(b) regarding an amended version of a document or other material incorporated by reference in a regulation;

(9) a summary of the text of recently issued formal opinions and memoranda of advice of the attorney general;

(10) a list of vacancies on boards, commissions, and other bodies whose members are appointed by the governor; [AND]

(11) in accordance with AS 39.52.240(h), advisory opinions of the attorney general**; and**

(12) notices required by AS 26.30.010(d) and (e) regarding applications for military facility zones.

*** Sec. 3.** AS 44.88.900(9) is amended to read:

(9) "project" means

(A) a plant or facility used or intended for use in connection with making, processing, preparing, transporting, or producing in any manner, goods, products, or substances of any kind or nature or in connection with developing or utilizing a natural resource, or extracting, smelting, transporting, converting, assembling, or producing in any manner, minerals, raw materials, chemicals, compounds, alloys, fibers, commodities and materials, products, or substances of any kind or nature;

(B) a plant or facility used or intended for use in connection

no As for AHFC.

with a business enterprise;

(C) commercial activity by a business enterprise;

(D) a plant or facility demonstrating technological advances of new methods and procedures and prototype commercial applications for the exploration, development, production, transportation, conversion, and use of energy resources;

(E) infrastructure for a new tourism destination facility or for the expansion of a tourism destination facility; in this subparagraph, "tourism destination facility" does not include a hotel or other overnight lodging facility;

(F) a plant or facility, other than a plant or facility described in (D) of this paragraph, for the generation, transmission, development, transportation, conversion, or use of energy resources;

(G) a plant or facility that enhances, provides for, or promotes economic development with respect to transportation, communications, community public purposes, technical innovations, prototype commercial applications of intellectual property, or research;

(H) a plant or facility used or intended for use as a federal facility, including a United States military, national guard, or coast guard facility;

(I) infrastructure for an area that is designated as a military facility zone under AS 26.30;

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Military and Veterans' Affairs may immediately adopt regulations necessary to implement the changes made by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2012.

*** Sec. 5.** Section 4 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 6.** Except as provided in sec. 5 of this Act, this Act takes effect July 1, 2012.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB 316
2012 LEGISLATIVE SESSION

Analysis

This legislation allows Department of Military and Veterans Affairs (DMVA) to designate military effectiveness zones in the state. With respect to the Alaska Industrial Development and Export Authority (AIDEA) it permits the authority to provide financing in these areas which could be beneficial. AIDEA currently has the authority to invest in federal facilities, which can include military buildings. This legislation would create an incentive for such financing, but would not require the creation of new programs within AIDEA.

There is no foreseeable fiscal impact to AIDEA as a result of this legislation.

House Bill 333
Sponsor Statement

"An Act relating to the disposition of certain unused campaign contributions; and relating to public office expense term accounts and public office expense term account reserves."

House Bill 333 eliminates the reserve account for a legislator's Public Office Expense Term (POET) account, streamlining recordkeeping and removing barriers to when POET funds may be spent. Statutory limitations on POET funds, themselves, are unchanged, including how much can be transferred from a campaign account, how the funds can be spent and how any unused funds are disposed at the end of a legislator's term of office. There would also be no change to the accounting or reporting requirements.

The process in current statute is cumbersome, requiring the legislator to transfer anything more than $5,000 as a lump sum from the campaign account to a *reserve* account, then annually transfer a limited amount to the POET account. Since expenditures from the POET account are restricted to office expenses and publicly reported each year, repealing the POET *reserve* removes an unnecessary hurdle and duplicate accounting without compromising accountability to the public for the legitimate use of those funds.

REPRESENTATIVE DAN SADDLER

Chairman, Chugiak-Eagle River Delegation

SPONSOR STATEMENT

House Bill 345

"An Act relating to regulations adopted by the Department of Administration waiving the commercial motor vehicle driving skills test for certain drivers with military commercial motor vehicle experience."

HB 345 allows the state of Alaska to waive the commercial driver's license road skills test for Alaska military personnel who earned their driving experience operating commercial-grade vehicles in the armed services.

The modern U.S. military is a highly mobile force, depending on skilled drivers operating a wide range of vehicles, under often harsh conditions. Impending budget cuts and troop reductions mean thousands of Alaska service members, including active duty, Guard and Reserve, will soon be hanging up their uniforms to seek civilian jobs.

In Alaska, where many trades and occupations involve transportation of goods and people across challenging landscapes, a commercial driver's license (CDL) is a valuable credential that can offer a significant boost to those seeking to enter the civilian work force, whether in tourism, commercial fishing, construction, oil field services or other industries.

HB 345 seeks to help returning Alaska military personnel find good jobs, and to help Alaska businesses find qualified and credentialed employees, by acknowledging that many military drivers already possess the skills they need to be safe, productive civilian drivers.

HB 345 directs the Department of Administration to adopt regulations in accordance with Federal Motor Carrier Safety Administration guidelines, allowing the Alaska Division of Motor Vehicles to waive the road test in accordance with federal law.

To be eligible for a waiver, a driver must have spent the last two years or more driving the kind of equipment he expects to use in a civilian job, must have worked in the past 90 days as a military driver and must meet federal exemption requirements outlined in CFR 383.77. He/she also cannot have ever had any license suspended or revoked, had more than one minor traffic violation, been convicted of any driving offense involving drugs or alcohol, or been convicted for any serious traffic violation involving an accident.

Alaskans who honed their driving skills while in service to our nation deserve to have that experience validated and honored in the civilian world. HB 345 is an important tool to help them get the credentials they need to land good civilian jobs, and to help Alaska employers hire skilled and motivated employees.

FISCAL NOTE #1

STATE OF ALASKA
12 LEGISLATIVE SESSION

BILL NO. HB 345

Analysis

This legislation will allow for the development of regulations by the Division of Motor Vehicles (DMV) to provide drivers with recent military commercial vehicle driving experience the opportunity to waive the driving skills test required in Alaska Statute 28.33.100(a)(3) and 49 CFR 383.113. This bill has no fiscal impact on the Division of Motor Vehicles (DMV) therefore a zero fiscal note is submitted.

Section 100. License to Drive Commercial Motor Vehicle.

previous: Section 33. Presumptions and Chemical Analysis of Breath or Blood.
next: Section 110. Notification Requirements For Drivers of Commercial Motor Vehicles.

AS 28.33.100. License to Drive Commercial Motor Vehicle.

(a) A person may not drive a commercial motor vehicle until the person applies for and is issued a license for that purpose under AS 28.15.041. The department may not issue a license to drive a commercial motor vehicle unless the applicant

(1) is at least 19 years of age, to operate in intrastate commerce, or at least 21 years of age, to operate in interstate commerce;

(2) has held a valid driver's license at least one year before the date of application or meets the experience qualifications established by the department;

(3) has successfully completed all required driving tests and written and physical examinations;

(4) either does not have a driver's license issued by another jurisdiction or surrenders all driver's licenses issued by other jurisdictions; and

(5) is domiciled in this state.

(b) In addition to the information required under AS 28.15.111 , a commercial driver's license shall

include information determined by the United States Secretary of Transportation to be appropriate to identify the licensee.

(c) A person who has been a state resident for 30 days or longer may not drive a commercial motor vehicle under the authority of a commercial driver's license issued by another jurisdiction.

(d) The licensing requirements of this section are in addition to the requirements imposed on a school bus driver under AS 28.15.046 .

(e) The department shall disqualify a person for a period of 60 consecutive days, and shall reevaluate the person's application or license to drive a commercial motor vehicle, if the department determines that the person knowingly provided false information required under

(1) this section or AS 28.15 in an application to the department for a commercial driver's license; or

(2) AS 28.33.110 (c) in an application for employment.

COMMERCIAL DRIVER LICENSE (CDL)

Endorsements | Medical / Vision | Transferring a CDL | Type

You must be domiciled in the State of Alaska in order to obtain or renew an Alaska CDL. (Domicile = ALASKA MUST be your true, fixed and permanent home, and principal residence to which you intend to return whenever you are absent.)

If you live in **RURAL** Alaska, please **CLICK HERE** for additional information.

Transportation Worker Identification Credentials (TWIC) are issued by the Department of Homeland Security and are not available through DMV.

- Commercial Driver Manual

ORIGINAL ALASKA COMMERCIAL DRIVER LICENSE (CDL)

A background check is required if you wish to obtain a hazardous materials endorsement or renew a CDL with a hazardous materials endorsement.

A commercial driver license (CDL) is required for a resident of Alaska who is driving a vehicle intrastate (19 & above) or interstate (21 & above) with a gross vehicle weight rating (GVWR) of 26,001 pounds or more. If you will be driving a vehicle designed to carry 16 or more passengers, or transporting hazardous materials, regardless of the GVWR, a CDL is required. A commercial driver may have only one license and that license must be issued by their home state. Those exempted from the commercial driver licensing requirements include drivers of recreational, military and emergency vehicles. Farm vehicles are exempt if controlled and operated by a farmer, used to transport agricultural products or machinery to and from a farm, not used in for-hire or contract carrier operations, and if driven no further than 150 miles from the farm.

Your social security number is required to obtain a CDL. The commercial driver license fee is $100.00. There is a $25.00 non-refundable fee for those requiring a road test. Road test appointments may be scheduled in any State DMV office or using our Online Services. In the Municipality of Anchorage, commercial tests are administered by the Center for Employment Education (CEE). Call 279-8451 for an appointment. Outside the Municipality of Anchorage, please contact your local DMV, schedule your road test online or click HERE for additional 3rd Party Testers.

An applicant must be at least twenty-one years of age at the time of application and must have held a valid driver license for at least one year. For an intrastate license, the applicant must be at least nineteen years of age. An applicant must pass the road, vision and written test prior to issuance of the CDL. For further information about obtaining a commercial driver license, please address your questions to: E-mail ALASKA DMV

TRANSFERRING A CDL FROM ANOTHER STATE

Welcome to Alaska! Please be sure to obtain an Alaska license within 30 days of your arrival if you intend to make Alaska your home. If you do not have any intention of becoming a resident of Alaska (Seasonal worker, etc.) you must have a valid CDL from your home state in order to drive a Commercial Motor Vehicle in Alaska.

To transfer a CDL from another state to Alaska, you must:

- Complete an **Application for Alaska Driver License, Permit or State Identification** (Form 413) and an **Application for Commercial Driver License** (Form 415).
- Provide proof of the following: Date of birth, legal name, social security number and your physical address IN ALASKA.
- Surrender your valid license from another state. (Cannot be expired for over 1 year.)
- Pass the written "Rules of the Road" test to convert to an Alaska license. (20 questions)
- Pass the "Hazardous Materials" test if you have that endorsement and wish to keep it.

  Effective January 31, 2005, you are required to pass a background check in order to obtain or retain a hazardous materials endorsement.
- Pass any knowledge tests for endorsements that you wish to add to your license and do not have on your current license. Some endorsements require a road test.
- Pass a vision test.
- Pay the $100.00 fee for an ALASKA CDL.

Note: If your CDL from another state has been expired **over <u>one</u> year**, you must pass ALL written tests that apply to the type of license you wish to obtain. A road test is required if the license has been expired over five years.

NEW CDL MEDICAL CARD & VISION REQUIRMENTS

Please see the following for information on CDL Medical Cards.

Medical Report: DOT FORMS

Vision requirements for a CDL are 20/40 or better. If you do not meet the requirements, you *may* be eligible for a waiver for INTRASTATE, ONLY. Vision Waiver Application

TYPES OF COMMERCIAL DRIVER LICENSE'S AND ENDORSEMENTS:

- **Class A/CDL** - May operate a combination of a motor vehicle and one or more other vehicles with a GCWR of greater than 26,000 pounds where the combined GVWR of the vehicle or vehicles being towed is greater than 10,000 pounds; a holder of a Class A/CDL license may also operate a Class B/CDL, Class C/CDL, or Class D vehicle. (Examples: 18 wheelers, log trucks)
- **Class B/CDL** - May operate a motor vehicle with a GVWR of greater than 26,000 pounds, or a motor vehicle with a GVWR of greater than 26,000 pounds that is towing a vehicle with a GVWR of 10,000 pounds or less; a holder of a Class B/CDL license may also operate a Class C/CDL or Class D vehicle. (Examples: dump trucks, cement mixer, box trucks, motor coaches)
- **Class C/CDL** - May operate any single motor vehicle, or a combination of a motor vehicle and one or more other vehicles not meeting the definitions of Class A/CDL or B/CDL, but is either designed to transport 16 or more passengers, including the driver, or is placarded under hazardous materials regulations in 49 C.F.R. Part 172, Subpart F, revised as of October 1, 2009; a holder of a Class C/CDL may also operate a Class D vehicle.

ENDORSEMENT CODE, TEST REQUIREMENTS & ENDORSEMENT TYPE

H - Knowledge & Background Check (Background check - Effective 1/31/05)
Hazardous material in placardable amounts.

N - Knowledge - Hauling liquids in bulk (Tank)

P - Knowledge & Skills (road test) - Transporting more than 15 passengers

S - Knowledge & Skills (road test) - School Bus

T - Knowledge - Double or Triple Trailers

X - Knowledge & Background Check (Background check - Effective 1/31/05)
Combination of N and H endorsements

49 CFR 383.113 - REQUIRED SKILLS.

There is 1 rule appearing in the Federal Register. Select the Currency tab below to view.

CFR Currency Authorities (U.S. Code) Rulemaking

prev | next

(a) Basic vehicle control skills. All applicants for a CDL must possess and demonstrate basic motor vehicle control skills for each vehicle group which the driver operates or expects to operate. These skills should include the ability to start, to stop, and to move the vehicle forward and backward in a safe manner.

(b) Safe driving skills. All applicants for a CDL must possess and demonstrate the safe driving skills for their vehicle group. These skills should include proper visual search methods, appropriate use of signals, speed control for weather and traffic conditions, and ability to position the motor vehicle correctly when changing lanes or turning.

(c) Air brake skills. Except as provided in § 393.95, all applicants shall demonstrate the following skills with respect to inspection and operation of air brakes:

(1) Pre-trip inspection skills. Applicants shall demonstrate the skills necessary to conduct a pre-trip inspection which includes the ability to:

(i) Locate and verbally identify air brake operating controls and monitoring devices;

(ii) Determine the motor vehicle's brake system condition for proper adjustments and that air system connections between motor vehicles have been properly made and secured;

(iii) Inspect the low pressure warning device(s) to ensure that they will activate in emergency situations;

(iv) Ascertain, with the engine running, that the system maintains an adequate supply of compressed air;

(v) Determine that required minimum air pressure build up time is within acceptable limits and that required alarms and emergency devices automatically deactivate at the proper pressure level; and

(vi) Operationally check the brake system for proper performance.

(2) Driving skills. Applicants shall successfully complete the skills tests contained in § 383.113 in a representative vehicle equipped with air brakes.

(d) Test area. Skills tests shall be conducted in on-street conditions or under a combination of on-street and off-street conditions.

(e) Simulation technology. A State may utilize simulators to perform skills testing, but under no circumstances as a substitute for the required testing in on-street conditions.

49 CFR 383.77 - SUBSTITUTE FOR DRIVING SKILLS TESTS.

There is 1 rule appearing in the Federal Register. Select the Currency tab below to view.

CFR Currency Authorities (U.S. Code) Rulemaking

prev | next

At the discretion of a State, the driving skill test as specified in § 383.113 may be waived for a CMV operator who is currently licensed at the time of his/her application for a CDL, and substituted with either an applicant's driving record and previous passage of an acceptable skills test, or an applicant's driving record in combination with certain driving experience. The State shall impose conditions and limitations to restrict the applicants from whom a State may accept alternative requirements for the skills test described in § 383.113. Such conditions must require at least the following:

(a) An applicant must certify that, during the two-year period immediately prior to applying for a CDL, he/she:

(1) Has not had more than one license (except in the instances specified in § 383.21 (b));

(2) Has not had any license suspended, revoked, or canceled;

(3) Has not had any convictions for any type of motor vehicle for the disqualifying offenses contained in § 383.51(b) ;

(4) Has not had more than one conviction for any type of motor vehicle for serious traffic violations; and

(5) Has not had any conviction for a violation of State or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident, and has no record of an accident in which he/she was at fault; and

(b) An applicant must provide evidence and certify that:

(1) He/she is regularly employed in a job requiring operation of a CMV, and that either:

(2) He/she has previously taken and passed a skills test given by a State with a classified licensing and testing system, and that the test was behind-the-wheel in a representative vehicle for that applicant's driver's license classification; or

(3) He/she has operated, for at least 2 years immediately preceding application for a CDL, a vehicle representative of the commercial motor vehicle the driver applicant operates or expects to operate.

How to Participate in HOS Listening Sessions
FMCSA Announces HOS Listening Sessions - News Release January 4, 2010
HOS News Release - November 18, 2008
HOS Regulations
Maximum Driving Time for Passenger-carrying Vehicles

The Hours-of-Service regulations (49 CFR Part 395) put limits in place for when and how long commercial motor vehicle (CMV) drivers may drive. These regulations are based on an exhaustive scientific review and are designed to ensure truck drivers get the necessary rest to perform safe operations. FMCSA also reviewed existing fatigue research and worked with organizations like the Transportation Research Board of the National Academies and the National Institute for Occupational Safety in setting these HOS rules.

The regulations are designed to continue the downward trend in truck fatalities and maintain motor carrier operational efficiencies. Although the HOS regulations are found in Part 395 of the Federal Motor Carrier Safety Regulations, many States have identical or similar regulations for intrastate traffic.

Who must comply with the Hours-of-Service Regulations?
Most drivers must follow the HOS Regulations if they drive a commercial motor vehicle, or CMV.

In general, a CMV is a vehicle that is used as part of a business and is involved in interstate commerce and fits *any* of these descriptions:

- Weighs 10,001 pounds or more
- Has a gross vehicle weight rating or gross combination weight rating of 10,001 pounds or more
- Is designed or used to transport 16 or more passengers (including the driver) not for compensation
- Is designed or used to transport 9 or more passengers (including the driver) for compensation
- A vehicle that is involved in Interstate *or* Intrastate commerce and is transporting hazardous materials in a quantity requiring placards is *also* considered a CMV.

Summary of the Hours-of-Service Regulations

The following table summarizes the HOS regulations for property-carrying and passenger-carrying CMV drivers.

HOURS-OF-SERVICE RULES	
Property-Carrying CMV Drivers	Passenger-Carrying CMV Drivers
11-Hour Driving Limit May drive a maximum of 11 hours after 10 consecutive hours off duty.	**10-Hour Driving Limit** May drive a maximum of 10 hours after 8 consecutive hours off duty.
14-Hour Limit May not drive beyond the 14th consecutive hour after coming on duty, following 10 consecutive hours off duty. Off-duty time does not extend the 14-hour period.	**15-Hour On-Duty Limit** May not drive after having been on duty for 15 hours, following 8 consecutive hours off duty. Off-duty time is not included in the 15 -hour period.
60/70-Hour On-Duty Limit May not drive after 60/70 hours on duty in 7/8 consecutive days. A driver may restart a 7/8 consecutive day period after taking 34 or more consecutive hours off duty.	**60/70-Hour On-Duty Limit** May not drive after 60/70 hours on duty in 7/8 consecutive days.
Sleeper Berth Provision Drivers using the sleeper berth provision must take at least 8 consecutive hours in the sleeper berth, plus a separate 2 consecutive hours either in the sleeper berth, off duty, or any combination of the two.	**Sleeper Berth Provision** Drivers using a sleeper berth must take at least 8 hours in the sleeper berth, and may split the sleeper-berth time into two periods provided neither is less than 2 hours.

Department of Motor Vehicles

CDL Skills Test Exemption for Military Applicants

Active duty, recently separated (within 90 days of application), or reservist military personnel may be allowed an exemption from the CDL driving skills test based on their holding of a military license, which authorizes operation of military vehicles that are representative of a commercial motor vehicle of a similar class.
Military personnel described above will be granted an exemption from the CDL skills test provided he or she meets all criteria required under Federal Motor Carrier Safety Regulations (FMCSR). This exemption applies only to the CDL skills test and does not include any testing requirements for public transportation, school bus, or hazardous material.
All applicants must pass the required knowledge test(s) based on the type of vehicle to be driven. Knowledge tests will be provided at no fee if the applicant is in active duty status, or meets the current military fee exemption criteria. Applicants must also provide information on all states where they were previously licensed during the past 10-years.
All applicants must present the following:

- Valid Connecticut operator's license
- Valid Form OF-346 (U.S. Government Motor Vehicle Operator Identification Card)
- Military Identification Card or DD-214 if recently separated
- Letter from commanding officer indicating which CMV class (A, B, or C) is representative of the military vehicle the applicant is licensed to operate
- Medical certification dated within 2 years (actual physical or medical certification card)
- Completed DMV Forms B-88 (fee waiver) and R-229A (application for CT license)
- Color Photograph (passport-size)
- Social Security card or proof of SSN
- Certification Form (will be issued at the branch office)

The US Government license must indicate the type of vehicle(s) and the vehicle capacity that the applicant is qualified to operate. In order to qualify for the exemption, the capacity must be at least 26,001 lbs. GVWR.
The applicant must certify the following:

- They have operated a vehicle representative of the commercial motor vehicle that they currently operate or expect to operate for at least two (2) years immediately preceding this application for the CDL. Evidence must be included such as: a letter from the applicant's employer; or test results from another state.

OR

- They are regularly employed in a job requiring operation of a CMV and have either previously taken and passed a skills test given by a State with a classified licensing and testing system and that the test was behind the wheel in a representative vehicle for the applicant's license classification.

AND

- They do not have more than one (1) license; have not had any license suspended, revoked, or cancelled; have not had a conviction in any type of motor vehicle for the **disqualifying offenses*** found in 383.51(b); have not had more than one (1) conviction for **serious traffic violations**** in any type of motor vehicle; have not had any conviction for a violation of State or local law relating to motor vehicle or traffic control (other than a parking violation) arising in connection with any traffic accident and have no record of an accident in which they were at fault.

*** 383.51 – Disqualifying Offenses- Conviction for:**

- being under the influence of alcohol while operating a CMV

- being under the influence of a controlled substance
- having a alcohol concentration of 0.04 or greater while operating a CMV
- refusing to take an alcohol test as required by a State or jurisdiction under its implied consent laws or regulations as defined in 383.72
- leaving the scene of an accident
- using the vehicle to commit a felony
- driving a CMV while the driver's CDL is revoked, suspended, or cancelled or the driver is disqualified from operating a CMV
- causing a fatality through negligent operating of a CMV, including, but not limited to the crimes of motor vehicle manslaughter, homicide by motor vehicle and negligent homicide
- using the vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance

****Serious Traffic Violations – Conviction for:**

- speeding in excess of fifteen miles per hour or moreover the posted speed limit
- reckless driving
- following too closely
- improper or erratic lane changes
- driving a CMV without a valid CDL
- failure to carry a CDL
- failure to have proper class of license or endorsement or violation of a license restriction
- in connection with an accident related to operation of a CMV and which resulted in a fatality
- failure to stop at a railroad crossing while operating a CMV

A certification form will be given to the applicant at the branch office for completion. The current CT license must be surrendered and the licensing fee paid, if applicable.

New York State Department of Motor Vehicles

CDL CERTIFICATION FOR MILITARY WAIVER OF SKILLS TEST

Waiver is available for ONLY up to ninety (90) days after discharge or for active military and active duty New York National Guard.

(bring copy of your DD-214 or NGB-22 military discharge or military ID card to DMV)

PART 1 - APPLICANT CERTIFICATION (please print)

Name: _____
Last First Middle

Social Security Number: _____ Date of Birth: _____ License ID Number: _____

I certify that during the 2-year period immediately preceding this date:

I have not had more than one driver's license in more than one jurisdiction at one time.

I have not had my license suspended, revoked, cancelled or denied.

I have not had any convictions for any of the disqualification offenses listed below:

- Any alcohol or drug related offenses
- Leaving the scene of an accident
- Commission of a felony involving the use of a motor vehicle
- Driving a commercial motor vehicle (CMV) when, as a result of prior violations committed operating a CMV, the driver's commercial driver license (CDL) is revoked, suspended, or canceled, or the driver is disqualified from operating a CMV
- Causing a fatality through the negligent operation of a CMV, including but not limited to the crimes of motor vehicle manslaughter, homicide by motor vehicle and negligent homicide
- Use of a motor vehicle in a felony involving the manufacturing, distribution or dispensing of a controlled substance
- Violations of state or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident and have no record of an accident in which I was at fault

I have not had more than one (1) conviction for any of the serious violations listed below:

- Following a vehicle ahead too closely
- Reckless driving
- Improper or erratic lane changes
- Excessive speeding (15 mph or more above the posted speed limit)
- Any violation for Railroad Highway Grade Crossing
- Driving a CMV without obtaining a CDL
- A violation arising in connection with a fatal accident
- Driving a CMV without the proper class of CDL and/or endorsements for the specific vehicle group being operated or for the passengers or type of cargo being transported
- Driving a CMV without a CDL in the driver's possession (Any individual who provides proof to the enforcement authority that issued the citation, by the date the individual must appear in court or pay any fine for such a violation, that the individual held a valid CDL on the date the citation was issued, shall not be guilty of this offense.)

I also certify that:

- I have not had my license or privilege to drive a motor vehicle suspended, revoked or cancelled during the immediately preceding 4 years.
- I have not been convicted of a violation of NRS 484.37955 (vehicular homicide).
- I have not been convicted during the immediately preceding 7 years of a violation of driving under the influence of alcohol or drugs.
- I have not had three (3) or more convictions of moving traffic violations during the immediately preceding 4 years.
- I have not been convicted of any of the offenses related to the use or operation of a motor vehicle which must be reported to the National Driver Register Problem Driver Pointer System during the immediately preceding 4 years (pursuant to the provisions of Parts 1327 et seq. of Title 23 of the Code of Federal Regulations).

I also certify that:

- I am regularly employed or was regularly employed within the last 90 days in a military position requiring operation of a commercial motor vehicle; and
- For at least two years immediately preceding this date if actively serving, or the date of my military discharge, I operated a vehicle of the same class and type as the one I want to be licensed to drive.

I certify I am qualified for the waiver of my driving skills under the conditions above, and that the information I have given is true. **IMPORTANT: Making a false statement in any license or non-driver ID card application, or in any proof or statement in connection with it, or deceiving or substituting, or causing another person to deceive or substitute in connection with application, may subject you to criminal prosecution for a misdemeanor or felony under the Vehicle and Traffic Law and/or the Penal Law.**

Signature: _____ Date: _____

PART 2 - COMMANDING OFFICER'S CERTIFICATION

Name of CO: _____

Address: _____

Telephone: (_____) _____

Applicant's Date of Qualification: from _____ to _____

Mark a "✓" in the box for the class(es) of vehicle(s) that the applicant operates and for the applicable endorsements:

Vehicle Class: ☐ A ☐ B ☐ C Endorsements: ☐ T ☐ P ☐ N ☐ H ☐ X

Experience Operating Commercial Motor Vehicles

Mark a "✓" in the box for the type(s) of vehicles the applicant has been driving:

☐ Tractor-trailer ..... Air brake equipped? ..... ☐ Yes ☐ No

☐ Truck-trailer (truck over 26,000 lbs.) ..... Air brake equipped? ..... ☐ Yes ☐ No

☐ Truck-trailer (truck does not exceed 26,000 lbs.) ..... Air brake equipped? ..... ☐ Yes ☐ No

☐ Single Vehicle ..... Air brake equipped? ..... ☐ Yes ☐ No

☐ Vehicle designed to transport 16 or more persons including the driver .... Air brake equipped? ..... ☐ Yes ☐ No

☐ Vehicle designed to transport 8 - 15 persons including the driver ..... Air brake equipped? ..... ☐ Yes ☐ No

Class A Vehicle - Any combination of vehicles with a GCWR of 26,001 pounds or more, provided the GVWR of the vehicle being towed is in excess of 10,000 pounds GVWR. This includes tractor-trailer and truck-trailer.

Class B Vehicle - Any single vehicle with a GVWR of 26,001 pounds or more, or any such vehicle towing a vehicle not in excess of 10,000 pounds GVWR.

Class C Vehicle - Any single vehicle or combination of vehicles that does not meet the definition of Class A or Class B, but that is designed to transport 16 or more people including the driver or is placarded for hazardous materials.

Endorsements: T - Doubles/Triples; P - Passengers; N - Tankers; H - Hazardous Materials; X - Hazardous Materials and Tankers

I certify that the applicant named in Part I is/was assigned in a job/assignment requiring operation of a commercial motor vehicle and that the information I have provided is correct. **IMPORTANT: Making a false statement in any license or non-driver ID card application, or in any proof or statement in connection with it, or deceiving or substituting, or causing another person to deceive or substitute in connection with such application, may subject you to criminal prosecution for a misdemeanor or felony under the Vehicle and Traffic Law and/or the Penal Law.**

Staff report

FILED UNDER

Local News
News

As part of Gov. Andrew Cuomo's "experience counts" campaign, the state will waive road tests for veterans applying for a commercial driver's license if they have military experience operating a similar vehicle.

Active duty military and New York National Guard members are eligible for the waiver for up to 90 days following their discharge.

The waiver would eliminate the CDL road test requirement and $40 fee, but applicants must still take the written test and pay that $10 fee.

To be eligible, a veteran must:

» Have a valid driver's license.

» Be regularly employed, or have been regularly employed within the last 90 days in a military position requiring operation of a commercial motor vehicle.

» Have operated a vehicle similar to a civilian commercial vehicle for at least two years immediately preceding discharge from the military.

"In this economy, many returning soldiers have had difficulty in finding work," said state Department of Motor Vehicles commissioner Barbara J. Fiala.

"We hope that this small way of thanking them for their service, and recognizing that the skills they learned in the military are transferable to civilian jobs, will make things just a little easier for our returning veterans."

Applicants must fill out a CDL Certification for Military Waiver of Skills Test form (CDL-102), available at any DMV office or online at www.dmv.ny.gov/forms/cdl102.pdf.

I certify that subject to the limitations and requirements of 49 CFR 383.77 (relating to the substitute for driving skills tests), I meet all certifications required for waiver under 49 CFR 383.77 and certify the following:

1. I certify that I am a member of the active or reserve components of any branch or unit of the armed forces of the United States or a veteran who received an honorable discharge from any branch or unit of the active or reserve components of the armed forces of the United States. . . . . ❑

2. I certify that I am or was regularly employed in a position in the armed forces of the United States requiring operation of a commercial motor vehicle. . . . . ❑

3. I certify that I legally operated, for at least two years immediately preceding application for a commercial driver's license, a vehicle representative of the commercial motor vehicle that I operate or expect to operate either under exemption from this Commonwealth's commercial driver's license requirement provided by the Pennsylvania Vehicle Code, Title 75 Section 1607(b)(2) (relating to requirement for commercial driver's license) or the equivalent exemption of another state or while on active duty in a foreign jurisdiction. . . . . ❑

C DRIVER QUALIFICATION REPORT (Authorized Military Personnel MUST complete if military license does not clearly define type(s) of vehicle authorized to drive; see reverse side for the required original documents to process DL-398 Military CDL Skills Test Waiver.)

I certify that _____ (Applicant Name) meets the Federal Motor Carrier Safety Regulations contained in 49 CFR 383.113(a,b,c)(1,2) relating to "Required Skills" and also meets the requirements contained in 49 CFR 383.135(b) relating to "Minimum Passing Scores" for a commercial driver's license. Your signature certifies that the above named applicant has successfully performed the required skills and has achieved the minimum passing score necessary to operate a commercial motor vehicle as prescribed in the Federal Motor Carrier Safety Regulations 49 CFR 383.113 and 49 CFR 383.135.

How to Obtain Your CDL Learner's Permit

You must be a Pennsylvania resident to apply for a Pennsylvania CDL Learner's Permit. To apply for a CDL Learner's Permit:

- Complete the DL-31CD Form (Application for CDL Learner's Permit), available on PennDOT's Driver and Vehicle Services Web site, www.dmv.state.pa.us.
- Mail your completed DL-31CD Form with appropriate fee to the Bureau of Driver Licensing, P.O. Box 68272, Harrisburg, PA 17106-8272.
- When you receive the Knowledge Test Authorization Letter, you may visit your nearest Driver License Center to take the applicable knowledge tests.
- After all required knowledge testing is complete, please refer to the **"Required Original Documents to Process DL-398 Military CDL Skills Test Waiver"** section below.

NOTE: If your Pennsylvania Driver's License expires within the next six months, you will be required to renew your Pennsylvania CDL or Non-CDL before your application for a CDL Learner's Permit can be processed.

Required Original Documents to Process DL-398 Military CDL Skills Test Waiver

You must submit a completed DL-398 Form (Application for Military CDL Skills Test Waiver), to upgrade to a CDL or upgrade your current CDL privilege. To obtain a DL-398 Form, visit PennDOT's Driver and Vehicle Services Web site, www.dmv.state.pa.us, and select the Forms and Publications link at the top of the home page. Once you've completed the DL-398 Form, you must visit your near Driver License Center with the following original documents.

Required Documents

a) Valid PA Non-CDL or CDL

b) Military Driver's License that clearly defines the types of vehicles you are/were authorized to drive. If not clearly defined, additional documentation is required such as:

1) Verification of Military Experience and Training Document (VMET) that clearly defines the types of vehicles you are/were authorized to drive, that lists the Gross Vehicle Weight Rating (GVWR), Gross Vehicle Weight (GVW), and if the vehicle(s) are equipped with air brakes that you are/were licensed to operate in the military (this form can be obtained by military personnel only by visiting www.dmdc.osd.mil), or:

2) Documentation of the types of vehicles you operated or are/were licensed to operate in the military, that lists the Gross Vehicle Weight Rating (GVWR), Gross Vehicle Weight (GVW), and if the vehicle(s) are equipped with air brakes that you are/were licensed to operate in the military. The explanations need to be on military letterhead, signed by your Provost Marshall, Company Commander, Department Head or OIC and section C on the DL-398 Form must be completed by your Provost Marshall, Company Commander, Department Head or OIC.

c) DD-2 (Active Duty Military ID Card) or DD-214 (within 2 years of Honorable Discharge)

d) DL-398 (Application for Military CDL Skills Test Waiver)

How to Transfer Your Out-of-State Driver's License to Pennsylvania

To qualify for the Military CDL Skills Test Waiver, you must be a Pennsylvania resident. Please visit the New Resident/Relocating Information Center on PennDOT's Driver and Vehicle Services Web site, www.dmv.state.pa.us, and select "Moving into Pennsylvania" link or contact PennDOT's Customer Call Center at; 1-800-932-4600, TDD 1-800-228-0676 (in state); or 1-717-412-5300, TDD 1-717-412-5380 (out-of-state). You will also need to complete the DL-180R Form for Non-CDL or DL-180RCD Form for CDL transfers. These forms are available on PennDOT's Driver and Vehicle Services Web site, or may be obtained by visiting your nearest Driver License Center. You must appear in person at a Driver License Center to transfer your out-of-state driver's license to Pennsylvania. Driver License Centers only accept check or money order for payment. If you have lost your out-of-state driver's license, you must contact your home state DMV to obtain an original Driver Abstract.

SECTION 3709 OF THE VEHICLE CODE

Section 3709 provides for a fine of up to $300 for dropping, throwing or depositing, upon any highway, or upon any other public or private property without the consent of the owner thereof or into or on the waters of this Commonwealth, from a vehicle, any waste paper, sweepings, ashes, household waste, glass, metal, refuse or rubbish or any dangerous or detrimental substance, or permitting any of the preceding without immediately removing such items or causing their removal.

For any violation of Section 3709, I may be subject to a fine of up to $300 upon conviction, including any violation resulting from the conduct of any other persons present within any vehicle of which I am the driver.

New military training certification to shorten state's CDL issuance

By Department of Veteran Affairs Comments (1)

Read Comments (1)
0 tweet

The Washington State Department of Veterans Affairs (WDVA) and Washington State Department of Licensing (DOL) have joined forces to help veterans.

Beginning November 1, getting a CDL just got easier for military personnel with specialized truck driver training, thanks to the new Military Training Certification Process.

Here's how it works: WDVA staff will assess the training a military member or veteran received in the military and verify whether it meets the required minimum commercial motor vehicle driver training requirements in Washington State. Once verification is made, a Commercial Drivers Military Training Certificate is provided.

Military member and veteran applicants must pass the applicable knowledge and skills test, pay all basic license and commercial drivers license fees, and present the Commercial Drivers Military Training Certificate to DOL in order to be issued a CDL.
Veterans have one year following their release from the military to take advantage of this new program.

"We often hear of the challenges our men and women in uniform face when they leave the military and try to find jobs that they qualify for," said WDVA program manager Ric Price. "This is a tremendous step forward in removing a financial barrier to a smoother transition from military to civilian employment."

In the past, veterans were required to attend additional and often expensive commercial drivers training programs to learn the skills they had used for years in the military. WDVA's Helmets to Hardhats liaison Todd Mitchell questioned why this training had to be repeated and worked with a number of organizations to develop this new process.

Thanks to the hard work of WDVA, DOL, Tacoma-Pierce County Chamber of Commerce, Army Reserve Employer Relations, Washington Trucking Association, Teamsters Union and the Washington Defense Partnership, the transition from a military job to a civilian one will require one less step.

This new program allows WDVA to verify an individual CDL applicant has the required minimum commercial motor vehicle driver training requirements provided and documented by a military service.

Arthur Hood said on May. 30, 2011 at 11:19am

Greetings ,my name is Arthur Hood I am a SGT with the United States Army Reserve .I've been a 88mike (truck driver) for 17 years . I was looking for a program from the Military that would help pay for CDL training .But if there is a smoother way to obtain my CDL I'm all ears . I will be contacting you on your program .I live in Mississippi if thats any help .Please give me any info you have on the subject .Thank you .

Sgt. Arthur M. Hood

FORM **5140** (REV. 8-2007)

APPLICATION FOR MILITARY CDL SKILLS TEST WAIVER

The Commercial Driver License (CDL) skills test waiver form may be used by qualified active duty or retired military applicants. This waiver allows a qualified military applicant to apply for a CDL without skills testing. CDL knowledge (written) test(s) are not waived and must be submitted to the contract office along with this application.

APPLICANT INFORMATION

NAME (LAST, FIRST, MIDDLE)			DRIVER LICENSE NUMBER	
RESIDENCE ADDRESS (STREET)	CITY	STATE	ZIP CODE	COUNTY
MAILING ADDRESS (IF DIFFERENT)	CITY	STATE	ZIP CODE	COUNTY

DRIVER RECORD CERTIFICATION

During the two years before today's date:

- Have you had more than one license? ☐ YES ☐ NO
- Has your license been suspended, revoked, cancelled or disqualified in this or any state? ☐ YES ☐ NO
- Have you been convicted of causing a fatality through the negligent operation of a commercial motor vehicle? ☐ YES ☐ NO
- Have you been convicted of using any vehicle in the commission of a felony involving the manufacturing, distributing or dispensing of a controlled substance? ☐ YES ☐ NO
- Have you been convicted of driving a commercial motor vehicle without a commercial license? ☐ YES ☐ NO
- Have you been convicted of driving a commercial motor vehicle without a commercial license in your possession? ☐ YES ☐ NO
- Have you been convicted of driving a commercial motor vehicle without the proper class and/or endorsements? ☐ YES ☐ NO
- Have you been convicted of driving while intoxicated, driving while under the influence of alcohol (includes BAC)? ☐ YES ☐ NO
- Have you been convicted of driving while under the influence of a controlled substance or refusal to submit to an alcohol test? ☐ YES ☐ NO
- Have you been convicted of leaving the scene of an accident? ☐ YES ☐ NO
- Have you been convicted of a felony involving a motor vehicle? ☐ YES ☐ NO
- Have you been convicted of speeding 15 or more MPH over the posted speed limit? ☐ YES ☐ NO
- Have you been convicted of careless and imprudent driving? ☐ YES ☐ NO
- Have you been convicted of following too closely? ☐ YES ☐ NO
- Have you been convicted of improper lane change? ☐ YES ☐ NO
- Have you been convicted of a violation in connection with a fatal accident? ☐ YES ☐ NO
- Have you been convicted of any state law or county or municipal ordinance relating to the operation of any type of motor vehicle in connection with an accident? ☐ YES ☐ NO
- Have you had more than one conviction for any type of motor vehicle for serious traffic violations? ☐ YES ☐ NO

CERTIFICATION OF DRIVING EXPERIENCE

Have you been regularly employed in a job requiring operation of a commercial motor vehicle and have operated the vehicle for at least sixty days during the two years immediately preceding this application for a commercial driver license? ☐ YES ☐ NO

Is the vehicle you have operated representative of the commercial motor vehicle you currently operate or expect to operate? ☐ YES ☐ NO

Select One That Applies:

☐ I have been honorably discharged from military service. I am providing proof of military service (a copy of Form DD214); a notarized statement specifying the types of commercial vehicles I am qualified to operate completed by my former commanding officer on the reverse of this form; and a copy of my military driving record.

☐ I am an active duty member of the Armed Forces. I am providing a notarized statement specifying the types of commercial vehicles I am qualified to operate completed by my commanding officer on the reverse of this form; and a copy of my military driving record.

I HEREBY CERTIFY UNDER PENALTY OF PERJURY, THAT ALL INFORMATION CONTAINED IN THIS APPLICATION IS TRUE AND ACCURATE.

CDL CERTIFICATION FOR WAIVER OF SKILLS TESTS

Waiver is valid for ONLY ninety (90) days after discharge or for Active Military and Nevada National Guard
(Bring a copy of your DD-214 Military Discharge or National Guard Letter to the DMV)
NRS 483.330, NAC 483.850, 49 CFR 383.77

Part I – Applicant Certification *(Please Print)*

Name_____ Date of Birth_____
Last First Middle

Vehicle Class: ☐ A ☐ B ☐ C Endorsements: ☐ T ☐ P ☐ N ☐ H ☐ X

In compliance with Title 49 CFR 383.77, I certify that during the 2-year period immediately preceding this date:
I have not had more than one driver's license in more than one jurisdiction at one time.
I have not had my license suspended, revoked, cancelled or denied.
I have not had any convictions for any of the disqualification offenses listed below:

- Any alcohol or drug related offenses
- Leaving the scene of an accident
- Commission of a felony involving the use of a motor vehicle
- Use of a motor vehicle in a felony involving the manufacturing, distribution or dispensing of a controlled substance
- Violations of state or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident and have no record of an accident in which I was at fault.

I have not had more than one (1) conviction for any serious violations listed below:

- Following a vehicle ahead too closely
- Reckless driving
- Improper or erratic lane changes
- Excessive speeding (15 mph or more above the posted speed limit)
- Any violation for Railroad Highway Grade Crossing
- Driving a CMV without obtaining a CDL
- A violation arising in connection with a fatal accident
- Driving a CMV without the proper class of CDL and/or endorsements for the specific vehicle group being operated or for the passengers or type of cargo being transported
- Driving a CMV without a CDL in the driver's possession. (Any individual who provides proof to the enforcement authority that issued the citation, by the date the individual must appear in court or pay any fine for such a violation, that the individual held a valid CDL on the date the citation was issued, shall not be guilty of this offense.)

In compliance with NRS 483.330, I also certify that:

- I have not had my license or privilege to drive a motor vehicle suspended, revoked or cancelled during the immediately preceding 4 years.
- I have not been convicted of a violation of NRS 484.37955 (vehicular homicide).
- I have not been convicted during the immediately preceding 7 years of a violation of driving under the influence of alcohol or drugs.
- I have not had three (3) or more convictions of moving traffic violations during the immediately preceding 4 years
- I have not been convicted of any of the offenses related to the use or operation of a motor vehicle which must be reported to the National Driver Register Problem Driver Pointer System during the immediately preceding 4 years (pursuant to the provisions of Parts 1327 et seq. of Title 23 of the Code of Federal Regulations).

In compliance with Title 49 CFR 383.77, I also certify that:

- I am regularly employed in a job requiring operation of a commercial motor vehicle; and
- For at least two years immediately proceeding this date, I have operated a vehicle of the same class and type as the one I want to be licensed to drive.

I certify that I am qualified for the waiver of my driving skills tests and that the information I have provided is true.

House Bill 347
Sponsor Statement

"An Act prohibiting the use of municipal funds to support or oppose an initiative proposal to circulate a petition for a ballot initiative, or to influence the outcome of an election concerning a ballot initiative, without approval by municipal voters at an election."

Currently municipalities can spend thousands of dollars on consultants and paid signature collectors to influence the outcome of a ballot initiative. Requiring voters to approve the use of funds for special interests keeps the agenda of the municipality aligned with its voters, and prohibits municipalities from spending copious amounts of money to advance their own agendas.

This legislation empowers all citizens of a municipality by giving them the chance to weigh in on important issues. Giving citizens the opportunity to approve or disapprove of spending for a ballot initiative makes them acutely aware of exactly how municipal funds are being spent.

The intent of HB 347 is to keep the ballot initiative process fair, and to ensure that the priorities of the municipality are the same as the priorities of its citizens.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 347

Analysis

This bill authorizes municipalities to expend funds to influence the outcome of a statewide ballot initiative, if the expenditure is approved by voters. It also adds a requirement that if a municipality authorizes funds to be spent to influence the outcome of a ballot initiative election, the expenditures must be reported to the Alaska Public Offices Commission.

There is no anticipated fiscal impact to the Division of Community and Regional Affairs.

MEMORANDUM April 6, 2012

SUBJECT: Sectional Summary of CSHB 347(JUD), as it would be amended by 27-LS1396\M.3 (Work Order No. 27-LS1396\M.3)

TO: Representative Kurt Olson
Attn: Konrad Jackson

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described bill **as it would be amended by 27-LS1396\M.3**.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Amends AS 15.13.145(d) to require that a municipality report expenditures to support or oppose an initiative proposal filed with the lieutenant governor under AS 15.45.020 or to circulate a petition for a statewide initiative.

Section 2. Prohibits a municipality from expending funds to support or oppose an initiative proposal filed with the lieutenant governor under AS 15.45.020 or to circulate a petition for a statewide initiative without the expenditure being approved by municipal voters at an election.

Section 3. Provides the bill an effective date of August 29, 2012 (the day after the statewide primary election).

MEMORANDUM

TO: Representative Max Gruenberg

FROM: Anna Latham, Staff to Rep. Olson

DATE: March 27, 2012

RE: HB 347

At the State Affairs meeting on March 22, you asked for any legal research related to HB 347.

Originally our office requested that a bill was drafted prohibiting the payment of initiative petition circulators. This draft had constitutional conflicts, but I am enclosing the related memo from Legal Services because it touches on the issue of free speech and first amendment rights.

I have requested that Legal Services look into the constitutionality of HB 347, particularly regarding the free speech rights of municipalities.

Please feel free to contact our office with any additional questions regarding this bill.

MEMORANDUM January 19, 2012

SUBJECT: Prohibiting payment of initiative petition circulators
(Work Order No. 27-LS1218\A)

TO: Representative Kurt Olson
Attn: Konrad Jackson

FROM: Alpheus Bullard TLAB
Legislative Counsel

This memorandum accompanies the draft bill described above. The bill prohibits the payment of initiative petition circulators.[1] This memorandum is to alert you to constitutional issues raised by the bill.

While the legislature may statutorily regulate the initiative process in order to keep the process open, fair, and free of corruption, the United States Supreme Court has held that a state may not prohibit the payment of initiative petition circulators.

In Meyer v. Grant, 486 U.S. 414 (1988), the Supreme Court found a Colorado statute that prohibited payment for the circulation of initiative petitions unconstitutional because the state could not demonstrate that the statute, which burdened initiative sponsors' ability to communicate their message, was necessary in order to meet the state's concerns. The Court found that initiative petition circulation is "core political speech" entitled to substantial First Amendment protection and that states may not burden the exercise of the right to petition through use of the initiative by prohibiting the payment of petition circulators.

If you have questions, would like a bill drafted that provides limitations on how initiative petition circulators may be paid, or if I can be of further assistance, please do not hesitate to contact me.

MEMORANDUM April 2, 2012

SUBJECT: Questions relating to the constitutionality of HB 347 (Work Order No. 27-LS1396\A)

TO: Representative Kurt Olson
Attn: Anna Latham

FROM: Alpheus Bullard
Legislative Counsel

Anna asked two questions about HB 347. The questions, and my responses are below. Please note that I have paraphrased the questions for clarity.

Does HB 347 raise any issues under either the state or federal constitutions? Do municipalities have a right to "free speech" under the United States' Constitution?

It is my legal opinion that HB 347, which prohibits the use of municipal funds to support or oppose an initiative proposal, to circulate a petition for a ballot initiative, or to influence the outcome of an election concerning a ballot initiative, without approval by municipal voters at an election, is constitutional under the free speech clauses of both the state and federal constitutions, and I do not see any other potential constitutional issues.

You asked whether municipalities have a right to "free speech." This is a broad question involving the complex "government speech doctrine" that itself, exists in a larger body of First Amendment jurisprudence which has been evolving rapidly in the last few years.[1] Accordingly, I've limited my response to the subject of HB 347, a state constraint on certain municipal expenditures.

Under our system of government in which voters' opinions are supposed to shape the policies of government, the expenditure of municipal funds to influence voter opinion

---

[1] See *Citizens United v. Federal Election Commission*, 558 U.S.___, 130 S. Ct. 876 (January 21, 2010) (government cannot suppress political speech, in the form of independent election campaign expenditures, on the basis of the speaker's corporate identity), *Holder v. Humanitarian Law Project*, 561 U.S. ____, 130 S. Ct. 2705 (June 21, 2010) (upholding a federal law prohibiting material support to groups designated as terrorists, this is the first time a restriction on political speech has survived the strict scrutiny test) and *Sorrell v. IMS Health Inc.*, ___ U.S. ___, 131 S. Ct. 2653, (June 23, 2011) (some government restrictions on commercial speech should be subjected to some sort of "heightened" scrutiny as opposed to "intermediate" scrutiny).

could easily be construed as a threat to democratic electoral processes. The distinctive role played by government as both a possible threat to, and participant in, our system of freedom of expression warrants caution in analyzing municipal speech as a subject of First Amendment protection. However, in application to HB 347, the issue is not complex, because it involves a state statutory limitation on municipal speech.

> Political subdivisions of States--counties, cities, or whatever--never were and never have been considered as sovereign entities." *Reynolds* v. *Sims*, 377 U.S. 533, 575, 84 S. Ct. 1362, 12 L. Ed. 2d 506 (1964). They are instead "subordinate governmental instrumentalities created by the State to assist in the carrying out of state governmental functions." *Ibid.*; see also *Louisiana ex rel. Folsom* v. *Mayor and Administrators of New Orleans*, 109 U.S. 285, 287, 3 S. Ct. 211, 27 L. Ed. 936 (1883) ("Municipal corporations are instrumentalities of the State for the convenient administration of government within their limits"). State political subdivisions are "merely . . . department[s] of the State, and the State may withhold, grant or withdraw powers and privileges as it sees fit." *Trenton* v. *New Jersey*, 262 U.S. 182, 187, 43 S. Ct. 534, 67 L. Ed. 937 (1923) . . .

Ysursa v. Pocatello Educ. Ass'n, 555 U.S. 353, 362 (2009).

A municipality, as a political subdivision of the state, is a subordinate unit of government created by the state to carry out delegated governmental functions. Such a political subdivision, "created by a state for the better ordering of government, has no privileges or immunities under the federal constitution which it may invoke in opposition to the will of its creator." *Id.* at 363 citing *Williams* v. *Mayor of Baltimore*, 289 U.S. 36, 40, 53 S. Ct. 431, 77 L. Ed. 1015 (1933). The state is the sovereign body from which any municipal power must flow. Consequently, if the legislature decides to limit the authority of a municipality to "speak" in relation to initiative campaigns, the municipality does not enjoy any First Amendment protection from the statutory limitation on municipal expenditures.

Would it be unconstitutional to prohibit the use of municipal funds to support or oppose an initiative proposal, to circulate a petition for a ballot initiative, or to influence the outcome of an election concerning a ballot initiative?

For the reasons articulated above, the legislature could constitutionally prohibit the use of municipal funds to support or oppose an initiative proposal, to circulate a petition for a ballot initiative, or to influence the outcome of an election concerning a ballot initiative with or without the approval of municipal voters.

If you have further questions, please do not hesitate to contact me.

Juneau, Alaska 99801

Re: House Bill No. 347

Dear Ms. Latham,

You have asked two questions about House Bill No. 347—a bill which will limit a municipality's ability to appropriate public money to support or oppose a ballot initiative or question. Your first question was whether this proposed law infringes on a municipality's free speech rights. The answer is no. Second, you asked whether the law would prohibit a municipal officer from flying to Juneau to testify on issues related to their district during session. The answer is also no. Allow me to elaborate.

First, House Bill No. 347 is constitutional.

Governmental entities—including municipalities—have no independent First Amendment rights.[1] Municipalities are not treated like individual citizens for purposes of constitutional inquiries, and the legislature is allowed to restrict municipal appropriations for speech related activities.[2] Recently, in *Associated Students of Univ. of Cal. at Santa Barbara v. Regents of the Univ. of Cal.*, a federal district court held that a public university's decision to prohibit using public funds for ballot initiative speech was not a violation of a student group's constitutional rights.[3]

---

1 *See, e.g., Demery v. Arpaio*, 378 F.3d 1020, 1032-33 (9th Cir. 2004) (affirming that "the Bill of Rights protects the individual from the government, not the other way around").

2 *Buckley v. Valeo,* 424 U.S. 1, 93-108 (1976). *See also Regan v. Taxation with Representation of Washington*, 461 U.S. 540, 546, 549 (1983) (affirming that First Amendment rights do not require state subsidization of First Amendment speech).

3 *Associated Students of Univ. of Cal. at Santa Barbara v. Regents of the Univ. of Cal.,* 2007 WL 196747, at 4 (N.D. Cal. 2007).

In House Bill No. 347, the legislature proposes to limit a municipality's ability to spend during the ballot initiative process. The new law would allow a municipality to appropriate ballot initiative funds only if, by popular vote, the citizens of the municipality agree to do so. The legislature is also considering whether to eliminate the municipality's ability to fund ballot initiative activities altogether. Either law would be constitutional. If challenged, there would be no genuine issue of fact regarding whether the money appropriated was public money. As such, the legislature's decision to restrict funding is simply a decision not to subsidize free speech; a choice which is always at the discretion of the legislature.[4] And because this law would not restrict an individual's freedom of speech, it is constitutional.

Second, House Bill No. 347 does not prevent a municipal member from representing the district's interests during the legislative session. Municipal officers acting within the scope of their duties are exempt from Alaska's comprehensive lobbying laws.[5] Appropriating funds for a municipal officer to travel to Juneau during session to "lobby" is not implicated by House Bill No. 347.[6]

Sincerely,

MICHAEL C. GERAGHTY
ATTORNEY GENERAL

By:
John M. Ptacin
Assistant Attorney General

Cori Badgley, Legislative Liaison, Department of Law, Legislation & Regulations Section (*via email*)

---

4 *Id.* at 8.

5 AS 24.45.161(a)(2) (2010).

6 Under House Bill No. 347, a municipal member could not go to Juneau during session solely for purposes of ballot initiative advocacy. But that is not likely ever the intention of sending a municipal member to Juneau during the session.

Memorandum

TO: Representative Kurt Olson
FROM: Tim Spengler, Legislative Analyst
DATE: March 9, 2012
RE: State Prohibitions on Spending Municipal Funds on Initiatives without Voter Approval
LRS Report 12.215

You asked if any states prohibit the use of municipal funds to support or oppose an initiative proposal without voter approval.

Briefly, we identified no states with specific statutory provisions prohibiting the use of municipal funds to support or oppose an initiative (or other political or electoral matter) *without* voter approval.[1] Most of the states we reviewed, however, prohibit municipalities from expending funds for such purposes *regardless* of whether municipal voters approve of such actions or not.

Fourteen of the 20 states we reviewed prohibit the use of public funds to support or oppose an initiative.[2] Those states are Arizona; California; Georgia; Florida; Idaho; Massachusetts; Montana; Nevada; New Mexico; North Dakota; Oregon; Utah; Washington; and Wyoming.[3] It is interesting to note that none of the 11 Western States that we contacted (where initiatives are more commonly used) allow for the use of municipal funds to support or oppose an initiative. On the other hand, six of the nine states (excluding Florida, Georgia, and Massachusetts) that we contacted in the Northeast and South do not have such prohibitions.[4]

Below we provide an example of statutory language from the California Government Code 54964:

> a) An officer, employee, or consultant of a local agency may not expend or authorize the expenditure of any of the funds of the local agency to support or oppose the approval or rejection of a ballot measure, or the election or defeat of a candidate, by the voters. . . "Ballot measure" means an initiative, referendum, or recall measure certified to appear on a regular or special election ballot of the local agency, or other measure submitted to the voters by the governing body at a regular or special election of the local agency.

As previously noted, such state laws do not allow for the use of municipal funds for *any* political advocacy, not just advocacy pertaining to initiatives. Also, it appears that most or all of these states *do* allow municipalities to expend funds to provide *informational or educational* background materials regarding an initiative.

A few years ago, a wide-ranging effort was made in Alaska to prohibit public spending on political advocacy. The "Alaska Anti-Corruption Act," Ballot Measure 1, was on the primary election ballot in August of 2010. The initiative would have banned the

---

[1] For this report, we reviewed numerous state statutes and election websites, communicated with personnel from the National Conference of State Legislatures, the Initiative and Referendum Institute, the Council of State Governments, Ballot Access News, National League of Cities, and spoke with officials from many state municipal leagues.

[2] It is likely that a number of other states also have provisions prohibiting the use of municipal funds to advocate for or against a ballot initiative.

[3] In Idaho, Massachusetts and New Mexico, the prohibition is not codified in law but rather, pursuant to court rulings. (We were unable to identify the court case particulars in New Mexico.) Relevant statutory citations (or case law) are as follows: Arizona (ARS 9-500.14), California (CAL. Gov. Code 54964), Georgia (OCGA 21-5-30.2 and 21-5-3), Florida (FS 106.113), Idaho (pursuant to *Ameritel vs. Greater Boise Auditorium District*, 141 Idaho 849), Massachusetts (pursuant to *Anderson vs. City of Boston*, 367 Mass. 178), Montana (MCSA 2-2-121), Nevada (NRS 281A.520), New Mexico (pursuant to court decision), North Dakota (NDCC 16.1-10), Oregon (ORS 260.432), Utah (UCA 20A-11-1203), Washington (RCW 42.17A.555), and Wyoming (WSA 9-13-105(b) and 22-26-116).

[4] The states we identified that do not have laws prohibiting the spending of municipal funds for such purposes are Alabama, Connecticut, Maine, New Hampshire, Rhode Island, and Virginia. Again, there were numerous states that we did not contact and likely a number of those also do not prohibit municipalities from expending funds on initiatives.

use of public funds for political campaigns and lobbying by state and local government agencies and school districts to support or oppose ballot measures, lobby to pass a law, or request public funding. The measure failed as nearly 61 percent of voters cast their ballots against it.

While Ballot Measure 1 had the support of a number of groups such as Alaskans for Open Government and the Committee to Stop Corruption, it was opposed by such entities as the Alaska Chamber of Commerce, the Resource Development Council, the Alaska Municipal League, the Anchorage School Board and Assembly, and the Alaska Democratic Party.

The *Fairbanks Daily News-Miner,* which also opposed the measure, stated the following in their editorial published on August 20, 2010:

> Proponents of the measure say average voters should bring such troubles to the attention of legislators. The average voter might do so, but why cut out an authoritative source? We elect mayors, assembly members and school board members to represent us. And our local government officers shouldn't have to wait for a call from Juneau before they do that job. Alaskans should vote "no" on Ballot Measure 1.

We hope this is helpful. If you have questions or need additional information, please let us know.

Chair Gatto
House Judiciary Committee
State Capitol
Juneau, AK 99801

RE: HB 347 "An Act prohibiting the use of municipal funds to support or oppose an initiative proposal to circulate a petition for a ballot initiative, or to influence the outcome of an election concerning a ballot initiative, without approval by municipal voters at an election."

Dear Chair Gatto,

The City of Homer appreciates the opportunity to comment on HB 347 which is currently before your committee and scheduled to be heard on Monday.

A municipality has the duty to educate and inform constituents about ballot initiatives so the people can make an educated choice when voting on an initiative. I am concerned that HB 347 would restrict a municipality's ability to provide factual information to the voting public. AS.15.13.145(b) already requires that if a municipality is going to take a position or advocate for an initiative they must appropriate any funds spent on such advocacy through an ordinance. This provides for an accountable public process regarding the advocacy action. Requiring a special election before spending any funds on advocacy activity would be expensive and not allow enough time for the meaningful distribution of information.

HB 347 would have a negative impact on informed public discourse and I urge you not to support this legislation in its current form.

Thank you for your time and attention.

Sincerely,

Walt Wrede

RE: Request for Hearing **on HCR 6: Proclaim April 2011 Sexual Assault Awareness Month**

I respectfully request a hearing for HCR6 in the Senate State Affairs Committee at your earliest convenience. Given the daunting statistics regarding sexual assault and domestic violence in this state, it is crucial that state leaders continue to educate the public and promote awareness of this issue in an effort to eradicate this dark shadow that is cast across Alaska. Passing HCR 6 is just one way that we can help spread the message of no tolerance for this behavior.

With April just around the corner, I am hopeful that a hearing on the resolution will be scheduled at your earliest convenience.

Attached you will find:

House Concurrent Resolution 6
Sponsor Statement

Proclaiming the Month of April 2011
Sexual Assault Awareness Month

With Alaska possessing a sexual assault rate 2.5 times that of the rest of the nation, House Concurrent Resolution 6 encourages all Alaskans to speak out against sexual assault and let their families, friends and neighbors know that this behavior will not be tolerated.

In conjunction with the Governor's "Choose Respect" campaign and strides made in the past few years, the intention of HCR 6 is to continue public education and heighten awareness of the debilitating effects of sexual assault on Alaskans of all ages and walks of life.

HCR 6 also wishes to recognize the perseverance and dedication of the agencies, nonprofits and thousands of volunteers who work tirelessly to discourage the continuance of this shameful crime and who provide needed intervention, refuge and support for its victims.

Please join me in this endeavor by supporting this legislation to proclaim April 2011 Sexual Assault Awareness Month.

Governor Sean Parnell
STATE OF ALASKA

January 31, 2011

The Honorable Mia Costello
Alaska House of Representatives
State Capitol, Room 412
Juneau, AK 99801

Mia

Dear Representative Costello,

Last March, my administration joined with mayors and communities from around Alaska to challenge all Alaskans to "Choose Respect" and end the epidemic of domestic violence and sexual assault that has existed in our state for too long. As a result, 18 communities joined together with a message of hope and healing for the many who have suffered from these crimes.

The work begun in 2010 has given more Alaskans the courage to speak and the strength to act. This March 31st, we will again coordinate statewide "Choose Respect" events – and I have issued a challenge for at least 40 communities to participate and take a stand in 2011. I am asking you to help lead or participate in a Choose Respect event in your area on March 31st, 2011.

I hope you will join us – my administration, Alaska's non-profits, stakeholders, your fellow legislators, and all Alaskans – as we raise awareness and challenge Alaskans to continue to "Choose Respect." Together, we can make a difference and continue to cultivate a culture of respect in our state. More information can be found on the "Choose Respect" website at http://chooserespect.alaska.gov. Please contact Katie TePas in my office at 907-465-3500 for more information.

I look forward to partnering with you as we gain even more ground for safe Alaska homes and strong families.

Best regards,

Sean

Sean Parnell
Governor

Subject: Sexual assault stats/testimony

Senate finance subcommittee hears testimony on domestic violence funding

By Klas Stolpe | *JUNEAU EMPIRE*

The Senate Finance Subcommittee on Tuesday heard testimony on funding for domestic violence programs in the state from the head of the Council on Domestic Violence and Sexual Assault and also from Department of Public Safety Commissioner Joseph Masters.

"Over 10,600 people sought services during 2010," said Lauree Morton, the council's interim director. "And 61 percent described their primary issue as domestic violence."

Morton gave an overview of the council's work, detailing the importance of the council to the DPS. The council funded 20 victim's service programs across the state in fiscal year 2010.

Morton also said that 26 percent said their main problem was sexual assault.

Alaska's challenge, according to the CDVSA's annual report, is Alaska continues to lead the national average for both domestic violence and sexual assault.

Non-statutory rape occurs in Alaska at 2.3 times the national average and the highest rate of any state. The percentage of high school students in Alaska who reported having been slapped or physically hurt on purpose during the past 12 months is above the average as well, as is the number of students forced to have sexual intercourse when they did not want to.

The council requested an $550,000 to help with basic functions, such as the rising cost of health insurance, other insurances for emergency transportation and staff retention.

"This year in particular looks like it may be a struggle for the insurance programs," Morton said.

Another request of $697,500 was for legal advocates. A current federally-funded legal advocate program is for one year only.

Morton also discussed a program funded through STOP (Services Training Officers Prosecutors) by Violence Against Women Act grant funds.

"If victims have access to legal services including advocacy and representation, they have a much better chance of establishing and maintaining safety," Morton said.

Sen. Donny Olson, D-Golovin, said close to $500,000 had been spent in the last couple years on prevention and asked, "Are we seeing results?"

Morton said it is too early to see results, but what is seen is the increased numbers seeking help of the domestic violence programs around the state.

"We know that our numbers are high," Morton said. "We know that many people do not report domestic violence or sexual assault, and with the increased focused attention to those issues we have seen the numbers of people contacting the crisis lines and the programs increasing."

Sen. Fred Dyson, R-Wasilla, asked Morton, "With the accelerated number of people reporting are we seeing a jump in the number of convictions?"

DPS Commissioner Joseph Masters said the Department of Law had also increased its efforts and its internal policies on the prosecution of domestic violence cases.

"It may be a while before we actually get the statistics but it appears, at least anecdotally, that we are seeing an increase in the number of cases being referred and accepted for prosecution. I would expect with the DOL's increased efforts to focus on prosecution that there is an increased level, although I cannot give you a figure."

Morton also mentioned public awareness and prevention campaigns throughout the state, including Alaska Men Choose Respect, Stand Up Speak Up Youth Initiative, The Fourth R, and Delta/Pathways Community Based Prevention Projects.

The Fourth R (Relationships), a program out of Canada revised to fit Alaska's specific needs, was implemented in 20 schools around the state to help connect with parents through children.

"You name the community and it is probably in this group," Morton said of the Pathways program. "It has come together to look at domestic violence specifically and in the last year has merged with a statewide rape prevention to end this violence."

Stand Up Speak Up engages teenagers in leadership positions to speak out against domestic violence and sexual assault, helping to develop leadership skills and the opportunity to have input on the different prevention activities and media campaigns and messages.

Sen. Hollis French, D-Anchorage, asked Morton to ponder philosophically, since Alaska's rates are twice the national average, if all the small steps being taken incrementally are going to get the state to where it wants to go.

"If you had a budget of $25 million, where would you spend it?" he asked.

Morton stated a large portion would go in the communities on bystander prevention efforts, aimed towards having friends, neighbors, and relatives of those engaged in the violent behavior to stand up and speak out.

"Call attention to it," Morton said. "Say to that person that is not OK, we are not a community that tolerates this type of violence. Funding itself is not going to get us to a place where we have peaceful communities. But I think individually as we all step up and say it is not OK and we want peace and we will encourage that in our thoughts and in our words and our actions, which is where we will make the difference."

Morton also said it was important to have a cohesive statewide message, regional messages tweaked to various diverse communities in the state, and to ensure people have accurate translations of that information.

Morton would also increase victims' access to services closer to their home communities, particularly for sexual assault exams.

French said he shared the belief getting every victim an exam as soon as possible after an assault was important, and wondered who paid for the nurses' salaries for those exams.

"Through their agencies," Morton said. "If they are in a hospital, the hospital pays for their salaries."

French asked if more exams would lead to more prosecutions and Morton stated there was evidence to that effect, both nationally and at the state level.

Morton said while it was the goal of the council to focus on the victims, it is also a goal to hold perpetrators accountable for their actions and paying for restitution.

"Many of the programs operate on a sliding scale fee for monetary or community service," Morton said. "Anyone can be a victim of a violent crime. It has more to do with the person who chooses to commit the crime than it does with the person who has the crime committed against them."

Olson asked what other states with lower domestic violence rates were doing that seems to be working better.

"I don't know that they are doing that many things different," Morton said. "I think that some of the prevention efforts sweeping the nation have a few years on us. I think that reporting is always the question, do we actually have more domestic violence and sexual assault or have better reporting, or a combination. It could be for us that it is a combination and we actually hope to see our numbers increase over the next few years. Because we think that will show that people are more comfortable with the system and knowing that they can get help."

The Tuesday testimony will be considered as part of the state's overall spending plan being crafted by the finance committees of both the Senate and the House.

Our view: Stunning numbers

Victimization survey quantifies a brutal Alaska reality

(01/24/11 20:28:21)

A joint hearing by two state Senate committees revealed grim numbers on Monday. • More than 47 percent of Alaska women report that they've been the victims of either threats and/or actual physical domestic violence in a romantic or intimate relationship at some time in their lives.

• More than 44 percent have suffered physical violence in a close relationship, from slapping to severe beatings.

• More than 9 percent report either physical violence or the threat of it in the last year.

• More than 37 percent report that they've suffered some form of sexual assault in their lives.

• More than 4 percent report that they've suffered sexual assault in the last year.

• More than 58 percent of Alaska women report that they've suffered either threats of violence or actual physical violence in an intimate relationship or sexual assault at some time in the lives.

Andre Rosay of the UAA Justice Center told the senators that these numbers are "astonishingly high." The numbers are based on a survey of 871 adult Alaska women in May and June of 2010, called the 2010 Alaska Victimization Survey. Both Rosay and Lauree Morton, interim director of the state Council on Domestic Violence and Sexual Assault, said even those staggering numbers are almost certainly conservative.

Sen. Hollis French asked Morton if the numbers surprised her. "Sen. French, no," Morton replied. She said people working in the field have long known that Alaska numbers were high. The survey -- which had women reporting sexual assault at about 10 times the rate sexual assault is reported to police -- only quantified what many Alaskans have known or suspected. Still, the numbers shock. What to do? Recent actions include Gov. Sean Parnell's "Choose Respect" campaign and his hiring of more village public safety officers in rural Alaska. Sen. Fred Dyson noted the success of programs to report crimes against children, in which police, nurses and counselors work together to ease the pain of interviews and exams; similar models could ease the ordeal of reporting, arrests and successful prosecutions for women.

Even in the brief testimony and comments Monday, two elements became clear. Prevention is far preferable to treatment. Morton talked about a pilot program in schools that teaches about the "fourth R": relationships. But when assault has occurred, Alaska's women need to know that the state's best and most caring people are on their side, that they are not and need not be alone. French said Monday's hearing and the report were a beginning. The end should be to change this violent reality.

BOTTOM LINE: Domestic violence and sexual assault survey should spur Alaskans to change numbers, save lives.

Poll aims to get baseline data for Alaska domestic violence

'ALARMING': Officials in Alaska may learn if efforts to curb the problem work.

By BECKY BOHRER
The Associated Press
(01/25/11 07:34:02)

JUNEAU -- Nearly half of all Alaska women have been threatened or physically harmed by a partner during their lifetime, according to a newly released survey intended to provide a baseline for domestic violence and sexual assault rates in the state.

About 37 percent of women polled said they'd been sexually victimized at some point during their lives.

Andre Rosay, director of the University of Alaska Anchorage Justice Center, which took the lead in conducting the poll commissioned by a legislative committee, called the rates "very alarming." It's not immediately clear how Alaska compares with other states: The survey, which found nearly 48 percent of women in the state have been threatened or harmed by a partner, was based on a national poll, the results of which aren't expected for several months, he said.

The Alaska survey of 871 women has holes: Conducted last May and June, it involved only English-speaking adults with at least one phone in their household. The report on its findings notes rates of violence "may be significantly higher" among those not interviewed -- including non-English speakers and women in prison or shelters.

It also notes the continued stigma connected with reporting violence and calls the findings conservative.

Rosay called the survey a "first wave" of information gathering. He said it provides a baseline that includes both incidents reported and not reported to law enforcement. Using the baseline, he said, officials should be able to track whether steps being taken to curb the violence are working.

Gov. Sean Parnell has made cracking down on what he calls the scourge of domestic violence and sexual assault a centerpiece of his legislative agenda -- calling on Alaskans to speak out, take away the stigma. So-called "Choose Respect" rallies, which Parnell helped lead in Juneau last year, are slated for communities around the state March 31.

Last year, the Legislature passed a suite of measures aimed at addressing the problem, including funding that Parnell said put village public safety officers in communities that did not have any law enforcement presence and what he called greater access to counseling services and shelters for abused women.

The governor is seeking funding for 15 additional officers for the next fiscal year.

Efforts are also under way to do regional victimization reports, said Lauree Morton, interim executive director of the Council on Domestic Violence and Sexual Assault. Variations among different parts of the state could be significant, Rosay said, and the results could show where additional attention or resources need to be focused.

The current proposals are "headed in the right direction," he said. "But I don't know if they'll be sufficient. It will take a great deal of effort and time to turn the curve."

Sen. Hollis French, chairman of the Judiciary Committee, which has been looking at the issue for some time, said the state has a "strong set" of laws for sentencing those convicted of sexual assault, but he said he wants to make sure investigators have the resources they need to build stronger cases to ensure there are more successful prosecutions. For example, he said, in many cases photos that could help build a case are never taken, or cell phone records that could establish a relationship between the victim and abuser aren't obtained.

Lawmaker questions governor's anti-sex crime bills

HIT 'EM HARDER: Ramras wants tougher laws for sexual, domestic abuse.

By JEREMY HSIEH
The Associated Press
(01/25/10 23:23:28)

JUNEAU -- An Alaska lawmaker is questioning whether the Parnell administration's proposals for cracking down on domestic violence and sexual assault are far-reaching and tough enough to adequately address the problem.

"The remedy doesn't seem to meet the rhetoric of an epidemic," said Rep. Jay Ramras, a Fairbanks Republican also running for lieutenant governor this year.

Ramras' comment came Monday, when the first of three bills that Gov. Sean Parnell is proposing to address the problems came before the House Judiciary Committee, which Ramras chairs. Parnell has referred to domestic violence and sexual assault as epidemics.

The bill, which Ramras supports, would allow for stiffer penalties for certain offenders and require convicted sex offenders who move to Alaska to register in the state.

The state Department of Corrections submitted a cost estimate with the bill of $136,900 in the 2012 budget year. Ramras said that price tag translates into only three or four additional inmates a year, based on average inmate housing costs from Deputy Commissioner Dwayne Peeples.

Peeples said it would likely mean more inmates serving shorter sentences. He noted his department had submitted rough estimates.

Annie Carpeneti of the Department of Law said more substantial changes are in the governor's proposed budget, which includes money for a crime lab and more village public safety officers. Two more bills are forthcoming that address post-conviction DNA testing and revise bail laws for people charged with sexual assault or domestic violence.

Ramras also sought firmer Alaska-specific numbers for quantifying the problem and setting goals for addressing it. Department of Public Safety Commissioner Joseph Masters said state troopers respond to 800 to 1,000 cases a year of women and children who have been sexually assaulted.

Ramras aims to move the bill out of his committee after another hearing Wednesday. The Senate Judiciary Committee also held a hearing Monday on its version of the bill.

Like Ramras, Peggy Brown, the executive director of the Alaska Network on Domestic Violence and Sexual Assault praised the governor's intentions, but said more ought to be done, particularly on the prevention side.

"I'm happy the governor's doing it, but there's a part missing," Brown said.

Safety ★ Prevention ★ Accountability

Forcible Rape in Uniform Crime Reports

- **Forcible rape is defined as the carnal knowledge of a female forcibly and against her will**
- **UCR statistics show the number of forcible rapes reported to police each year**
- **Important limitations:**
  - Not all police agencies participate in the UCR program
  - These statistics only include rapes reported to police
  - These statistics exclude:
    - Statutory rapes
    - Incapacitated rapes
    - Rapes with male victims
    - Other sex offenses
    - Rapes with more serious offenses (e.g., homicide)

CDVSA

UCR Forcible Rape Statistics

	2007 to 2008	2008 to 2009
U.S.	-2.3%	-2.1%
Alaska	-16.9%	+12.3%
Anchorage	-2.7%	+11.6%
Fairbanks	-12.5%	+27.1%

- Changes in UCR forcible rape statistics may be attributable to:
  - Changes in victimization rates,
  - Changes in reporting,
  - Changes in both victimization rates and reporting.

Council on Domestic Violence and Sexual Assault

Council Vision:

Alaska, free from domestic and sexual violence

Council Mission:

Provide safety for Alaskans victimized or impacted by domestic Violence and sexual assault through a system of statewide crisis intervention, perpetrator accountability and prevention services.

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

FY10 Alaska Victimization Survey

- Designed to establish a baseline with statewide intimate partner and sexual violence estimates.
- Modeled after the National Intimate Partner and Sexual Violence Surveillance System (CDC, NIJ, DoD) and administered by RTI.
- Utilized a statewide random digit dial dual frame phone survey (both land and cell phone lines).
- Maximized respondent safety and confidentiality.

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

FY10 Alaska Victimization Survey

- Survey respondents were limited to English-speaking adult women residing in a household with at least one land or cell phone line.
- Includes 871 adult women throughout Alaska, surveyed in May/June 2010.
- Sample provides an excellent representation of the Alaska population of adult women.
- Sampling weights were used to control for selection, non-response, and coverage.

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

Intimate Partner Violence Definitions

- Intimate partner violence includes two measures:
  - *A – Threats of physical violence.*
  - *B – Physical violence.*
  - *Both include intimate partners only, defined as romantic or sexual partners.*
  - *Measures are then combined into a single 'intimate partner violence' composite.*
- Threats of physical violence by intimate partners:
  - *Have your romantic or sexual partners made threats to physically harm you?*

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

Intimate Partner Violence Definitions

- Physical violence by intimate partners:
  - *Have your romantic or sexual partners…*
    - *Slapped you?*
    - *Pushed or shoved you?*
    - *Hit you with a fist or something hard?*
    - *Kicked you?*
    - *Hurt you by pulling your hair?*
    - *Slammed you against something?*
    - *Tried to hurt you by choking or suffocating you?*
    - *Beaten you?*
    - *Burned you on purpose?*
    - *Used a knife or gun on you?*

Sexual Violence Definitions

- Sexual violence includes two measures:
  - *A – Alcohol or drug involved sexual assault.*
  - *B – Forcible sexual assault.*
  - *Measures are not limited to intimate partners.*
  - *Measures are then combined into a single 'sexual violence' composite.*
- Alcohol or drug involved sexual assault:
  - *When you were alcohol or drug intoxicated and unable to consent, has anyone…*
    - *Had vaginal sex with you?*
    - *Made you receive anal sex?*
    - *Made you perform oral sex?*
    - *Made you receive oral sex?*

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

Sexual Violence Definitions

- Forcible sexual assault:
  - *Has anyone used physical force or threats to physically harm you to…*
    - *Make you have vaginal sex?*
    - *Make you receive anal sex?*
    - *Make you perform oral sex?*
    - *Make you receive oral sex?*
    - *Put their fingers or an object in your vagina or anus?*
    - *Try to have vaginal, oral, or anal sex with you?*

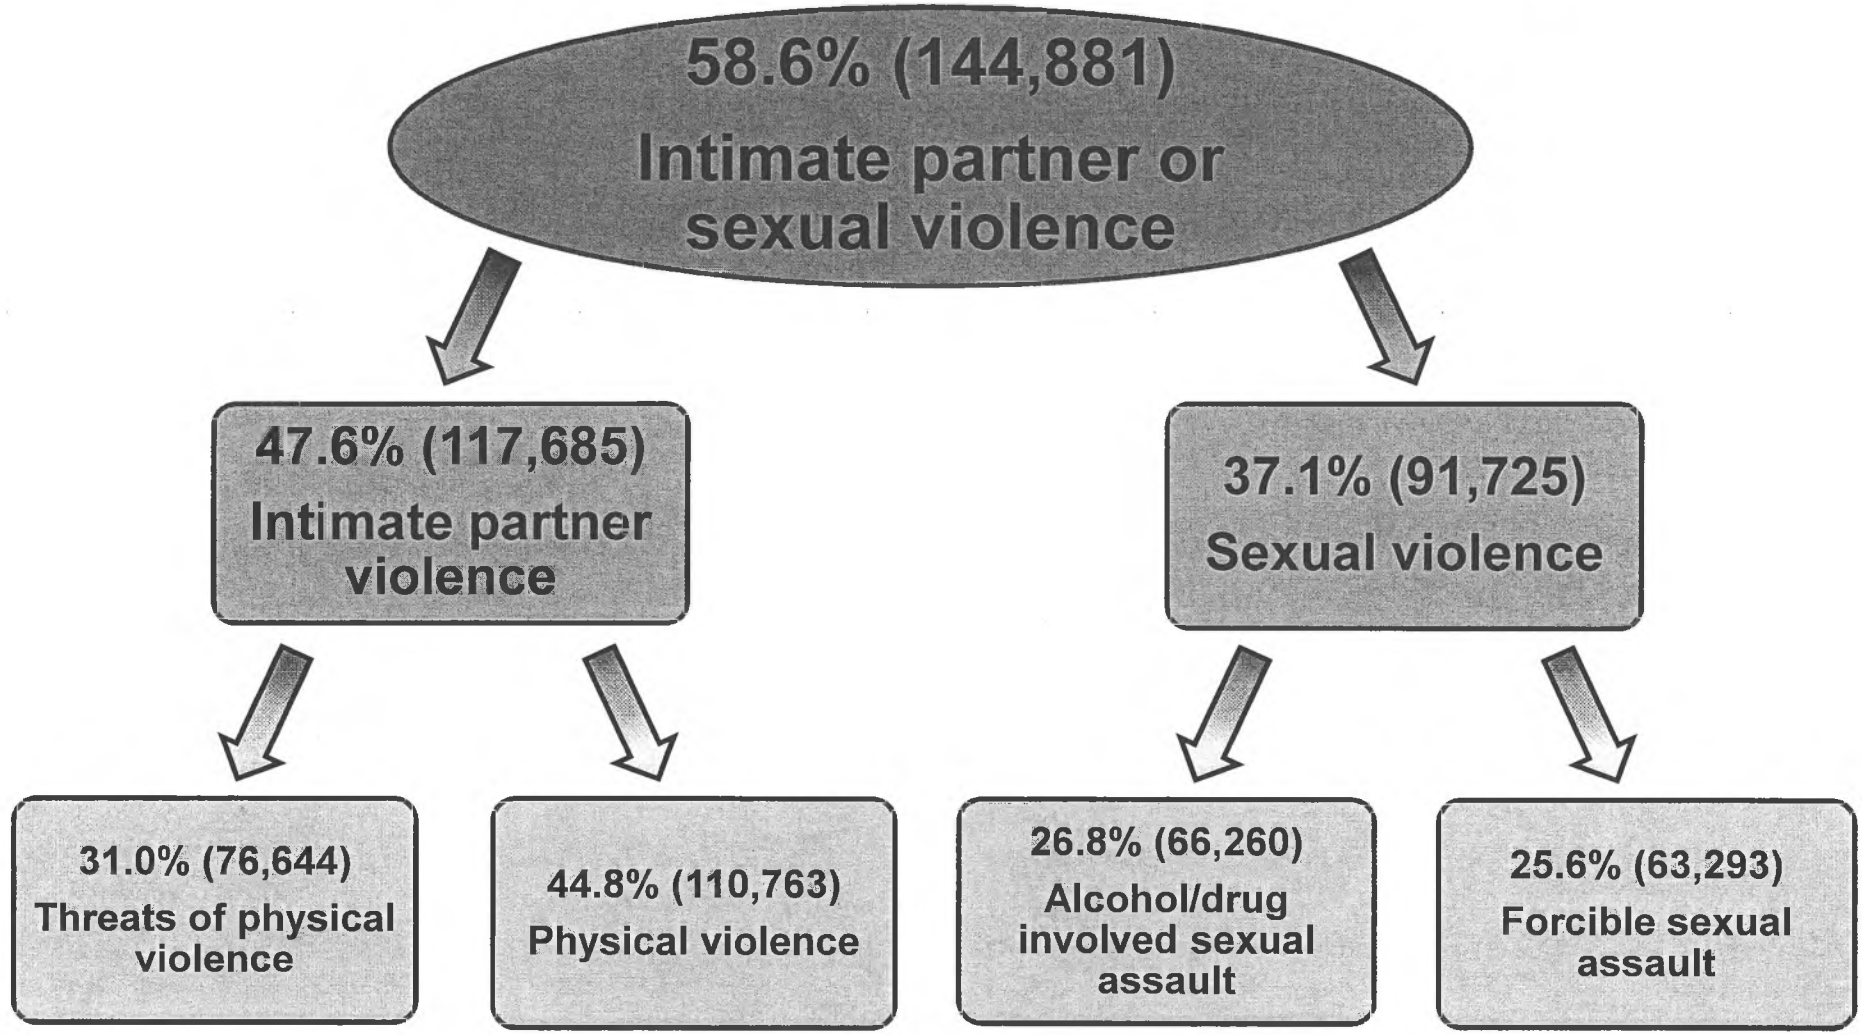
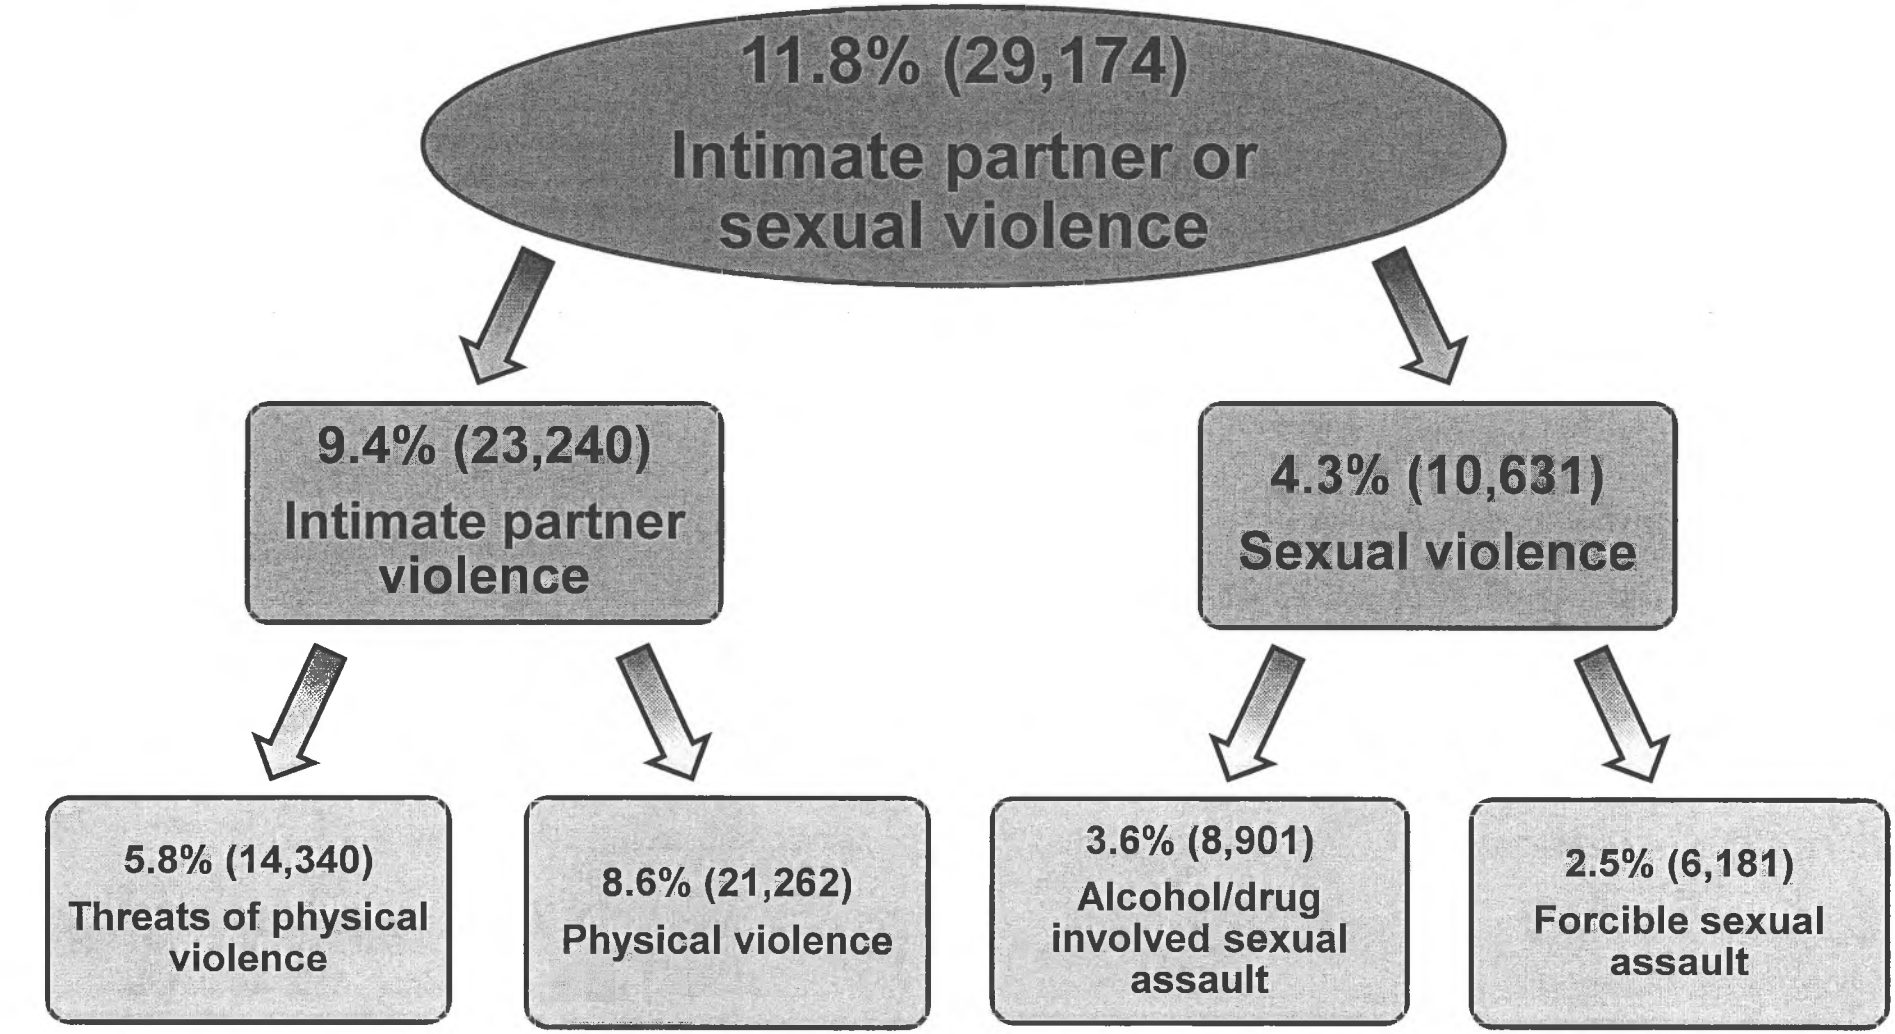
Summary of Lifetime Estimates



Note: percentages do not sum because some respondents experienced multiple victimizations.

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Summary of Past Year Estimates



Note: percentages do not sum because some respondents experienced multiple victimizations.

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Important Limitations

- Survey only provides a statewide average and masks regional differences. Regional estimates may vary significantly.
- Survey excluded non-English speaking women, women without phone access, and women not living in a residence (e.g., shelters, hospitals, homeless, prisons). Estimates may be significantly higher among women excluded from the survey.

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Important Limitations

- Measured *number of victims*, not *number of victimizations*. The number of victimizations is higher than the number of victims.
- Survey did not measure all forms of intimate partner violence or sexual violence. Estimates are therefore conservative.
- Estimates may also be conservative because of the continuing stigma of reporting intimate partner and sexual violence.

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

A Special Thank You!

We sincerely thank the women who invested time and effort to participate in the 2010 Alaska Victimization Survey.

They re-lived horrendous experiences – experiences no one should be subjected to – to help the rest of us understand the extent of intimate partner and sexual violence in Alaska. Thank you!

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

FY10 Alaska Victimization Survey

- Survey provides the first statewide, comprehensive, and behaviorally specific measures of violence against Alaskan women
- Establishes a new baseline for Alaska
- Fills an important gap left by police reports and public health records
- National comparisons and comparisons with other states will soon be available
- Results will be used to guide policy and practice

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

FY11 Alaska Victimization Surveys

- Surveys will soon begin in Anchorage and Fairbanks
- In addition, surveys will include at least one rural location
- FY11 surveys will include two new questions:
  - Location of victimization (in/out of Alaska)
  - Child witnesses to violence
- FY11 surveys are again funded by the Alaska Council on Domestic Violence and Sexual Assault

CDVSA
COUNCIL ON DOMESTIC VIOLENCE & SEXUAL ASSAULT
Safety ★ Prevention ★ Accountability

Our Vision:

Alaska, free from domestic and sexual violence

Our Mission:

The Council provides safety for Alaskans impacted or victimized by domestic violence and sexual assault through a system of statewide crisis intervention, perpetrator accountability and prevention services

Our Purpose:

"There is established in the Department of Public Safety the Council on Domestic Violence and Sexual Assault. The purpose of the council is to provide for planning and coordination of services to victims of domestic violence or sexual assault or to their families and to perpetrators of domestic violence and sexual assault, and to provide for crisis intervention and prevention programs."

-Alaska Statute § 18.66.010

INTRODUCTION

In 1981, the Council on Domestic Violence and Sexual Assault (The Council or CDVSA) was created by legislation and established in the Department of Public Safety. For 30 years, the Council has funded programs across the state of Alaska to end domestic violence and sexual assault. In FY2010, the Council funded and supported 20 victim service programs and monitored 14 community and prison-based batterer intervention programs, 8 of which were funded partially through the Council.

COUNCIL FUNDED PROGRAMS PROVIDE:

- 24-hour emergency support
- safe shelter
- safety planning
- prevention initiatives
- children's services including child care, counseling, and group activities
- counseling for victims
- accountability for batterers
- information and referral for employment, housing, and medical care
- legal advocacy and civil legal referral
- community coordination focused on systemic change
- rural outreach and community education programs

THE COUNCIL ALSO DIRECTLY FUNDS TRAINING FOR:

- law enforcement personnel
- health providers and counselors
- attorneys and court personnel
- staff of Native organizations and other community groups
- school based educators
- prevention coordinators and advocates

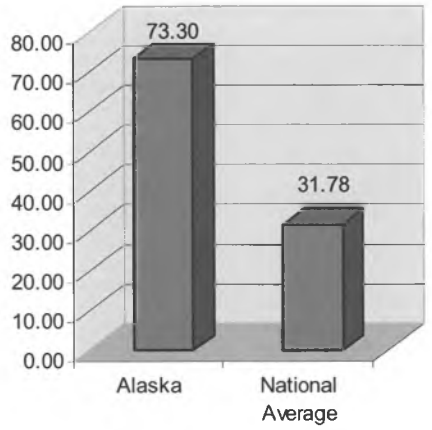
"Just wanted to say, Thank-you for all you did for my children and I. We are settling down here & things are going well – I even dropped off my first resume & cover letter today. Every one here has been so helpful & friendly too – it feels good – and we are starting to feel better too. Thanks for everything you did for us."

-Thank You Card sent to a shelter from a victim of domestic violence who received assistance in moving out of the area

ALASKA'S CHALLENGE

The collective efforts of the Council and its funded programs have ameliorated the effects of domestic violence and sexual assault. However, Alaska continues to face tremendous challenges as the incidents of both domestic violence and sexual assault in Alaska are still much higher than the national average.

Alaska's Rate of Forcible Rape is 2.3 Times the National Average



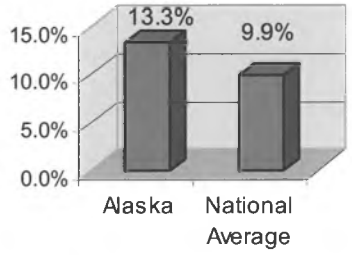
Rate of Forcible Rate
(per 100,000 population)

Alaska has the HIGHEST rate of forcible rape of ANY state.

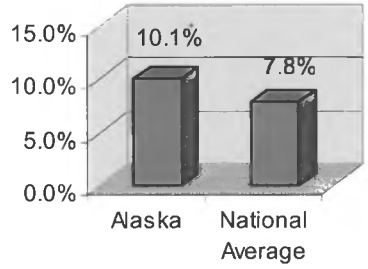
Source: Uniform Crime Reports 2000-2

% of High School Students in Alaska who reported having been:

hit, slapped, or physically hurt on purpose by their boyfriend/girlfriend during the past 12 months:

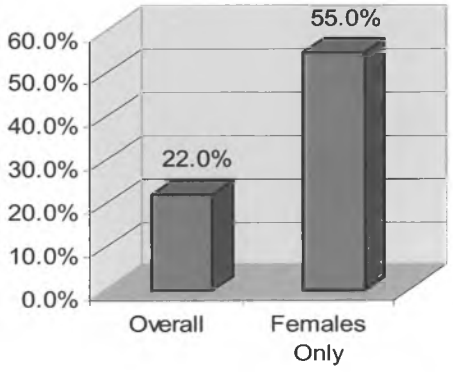


forced to have sexual intercourse when they did not want to:



Source: Alaska Youth Risk Behavior Survey, 2009

% of Homicides in Alaska resulting from Intimate Partner Violence



Both of these homicide percentages are HIGHER than the percentages of any of the other 15 states surveyed.

Council Purpose Areas, Goals & Activities

Purpose Areas:

- Prevention
- Crisis Management and Intervention
- Perpetrator Accountability

Goals:

- Coordinate domestic violence and sexual assault prevention efforts in Alaska
- Provide immediate, appropriate crisis response, intervention and shelter
- Build public awareness and support for crisis management and intervention services
- Develop crisis management options that allow victims, if they choose to do so, to stay safely in their homes while perpetrators are removed
- Perpetrators will be held accountable for their actions
- Implement and maintain best practices in the operation of programs providing domestic violence and sexual assault services
- Define and describe the scope and impact of domestic violence and sexual assault
- Ensure effective Council administration

Activities:

- Coordinate services with the Departments of Law, Education, Public Safety, Health and Social Services, Corrections and other state and community groups dealing with our identified population
- Request, receive, and disperse funds from the State of Alaska and the federal government for domestic violence and sexual assault programs
- Gather data on domestic violence, sexual assault, crisis intervention, and prevention
- Fund and support 20 victim service programs in 18 Alaska communities, collectively serving 235 towns and villages throughout the state
- Monitor and provide technical assistance to all approved Batterer Intervention Programs; 14 approved – 8 funded
- Coordinate and fund training on issues of domestic violence and sexual assault to government agencies, law enforcement, community agencies, and the public
- Conduct quarterly public meetings and participate in public forums on a regular basis

2010 HIGHLIGHTS

CDVSA SPECIAL PROJECTS IN FY2010:

- **Funded 20 victim service programs across the state resulting in:**
  - 2,235 people volunteering 54,832 hours of service to the cause
  - 201 staff members operating programs 24 hours a day, seven days a week, to ensure safe refuge and help their communities develop strategies for creating peace
  - 93% of program participants learning more about resources and help available to themselves and their families and how to access those resources
  - 92% of program participants knowing more or different intervention safety strategies than they did prior to the interaction

Candlelight vigil held by Interior Alaska Center for Non-Violent Living to raise awareness of domestic violence and sexual assault

- **Funded public awareness and prevention campaigns throughout the state, including:**
  - Alaska Men Choose Respect
  - Stand Up Speak Up Youth Initiative
  - The Fourth R
  - DELTA/PATHWAYS Community Based Prevention Projects & Statewide Committee Planning Group
  - (see page 18 for more information on these campaigns)

- **Enhanced training and prevention in Alaska by managing and securing grants for:**
  - Statewide Rural Domestic Violence and Child Victimization Conference; training on topics specific to child victimization in rural Alaska. Participants included 126 rural providers from diverse professions including child welfare, behavioral health, law enforcement and victim advocacy.

LEGISLATION

LEGISLATION RELATED TO DOMESTIC VIOLENCE AND/OR SEXUAL ASSAULT PASSED DURING THE SECOND SESSION OF THE 26TH ALASKA LEGISLATURE

HCR 20, Sexual Assault Awareness Month

The resolution proclaimed April 2010 as Sexual Assault Awareness Month in Alaska.

HB 307, Sexual Assault Protective Orders

This bill allows protective orders to be issued in cases involving sexual assault.

SCS CSHB 6(JUD), Cruelty to Animals

This bill adds animal cruelty to the pattern of assaultive behavior that is currently listed as an aggravating factor in considering the sentencing for someone convicted of felony offenses.

HB 52, Counseling for Jurors

This bill allows a trial judge to offer not more than 10 hours of post-trial psychological counseling, without charge, to a juror or an alternate juror who serves on a trial jury in a trial involving extraordinarily graphic, gruesome, or emotional evidence or testimony.

HJR 48, Resolution

The resolution urges Congress to support the Crime Victim Fund Preservation Act which would provide sustainability for the federal Crime Victims Fund through which Victim of Crime Act money is distributed to state Crime Victim Assistance and Compensation Programs.

HCS CSSB 110(FIN), DNA Testing & Evidence Preservation

The bill requires preservation of all evidence gathered relating to a sexual assault or sexual assault of a minor investigation or prosecution for the period of time the crime remains unsolved or 50 years whichever comes first. It further requires preservation of adequate biological evidence to create a DNA profile of someone convicted of a sex crime while the person is incarcerated and while the person is required to register as a sex offender. The bill also establishes a Task Force on Standards and Training of Evidence Technicians in the Department of Law.

CSSB 222(JUD)(ct rule fld H), Offensive Touching

The bill creates a Class A misdemeanor for offensive touching that does not rise to the level of sexual assault in the first, second, or third degree. The bill also grants more discretion in sentencing defendants, allowing a judge to increase a sentence above the usual range if the defendant knew that the victim was vulnerable as a result of having consumed alcohol or drugs.

SB 266 am H, Emergency Compensation

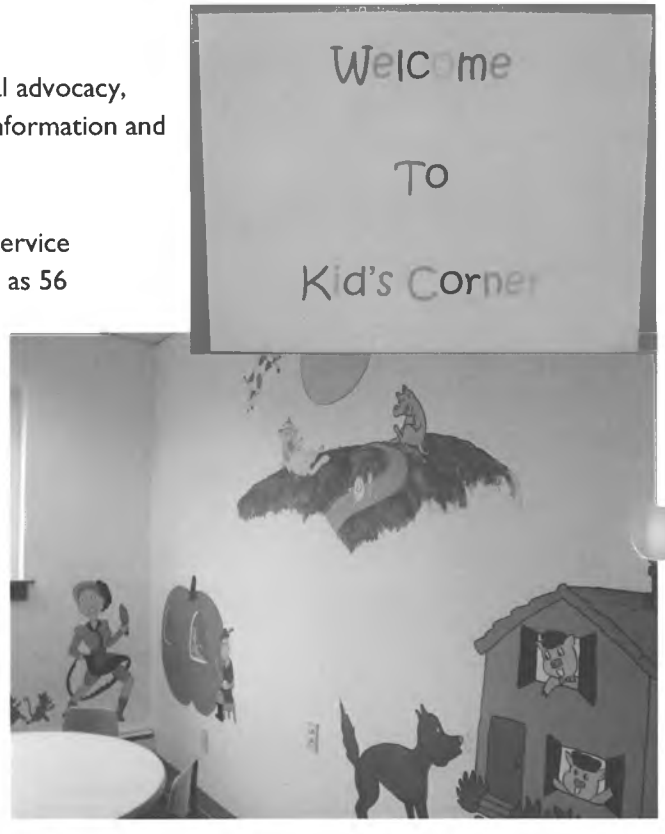
The bill raises the amount of emergency funds available to victims through the Violent Crimes Compensation Board from $1,500 to $5,000.

VICTIM SERVICE PROGRAMS

The Council provides funding for victim service programs throughout the state. These programs provide immediate and safe sanctuary, prevention services, crisis interventions, advocacy services, educational information and support to victims. Essentially, victim service programs inform and aid victims, and communities at large, towards healthy and safe choices for themselves and their families.

THE PROGRAMS PROVIDE:

- Shelter, crisis intervention, personal advocacy, legal advocacy, children's services, case management, education, information and referral, counseling, and support groups
- Coordination of services to communities in their service delivery areas, from as few as 3 villages to as many as 56
- Outreach, including safe houses within villages, working with the community leaders, and providing education and training
- Leadership in their communities through domestic violence/sexual assault community coalitions and partnerships that support prevention and intervention activities
- Prevention activities with youth on healthy relationships, building leadership and peer educator skills; community media and social norm campaigns and awareness focused on ending the tolerance of violence



The Kid's Corner at Seaview Community Services

On an Average Day in Alaska:

- Domestic and sexual violence service providers respond to 240 crisis situations, including 80 hotline calls and 160 in-person requests for assistance.
- Domestic violence shelters provide overnight accommodations to 307 victims.
- Sexual assault centers accompany 10 victims to receive medical services.
- 23 trainings are offered throughout the state to educate approximately 350 community members, students, first responders, and service providers on domestic violence.
- 45 individuals will receive legal advocacy assistance from victim service programs.

Program Service Areas:

Since it is not possible to have shelters in every village, programs must provide outreach services to many other communities. Program outreach requires a formalized system in place to contact villages on a regular basis. The purpose of outreach is to work with the village community to provide training, resources, and information to address the issues of domestic violence and sexual assault, stalking, and dating violence. A listing of villages served by each program begins on page 18.

Collaboration with Law Enforcement:

Many programs cover large areas of the state that are not connected by the road system. This presents a challenge to providing immediate safety. Program staff work closely with Village Public Safety Officers, Village Police Officers, the Alaska State Troopers, Health Aides and other community services to ensure safety. Many programs also support a network of volunteer "safe homes" in villages and small towns where victims can find temporary shelter until the perpetrator is removed or they can come to the "hub" community shelter.

Transportation Barriers:

The high cost of air transportation needed to bring victims to safe shelter is a challenge. Tickets for a family to reach safety can be up to $2,000 or more. Programs struggle with finding the resources to provide this essential service.

Emergency Transportation Services Provided in 2010

BATTERERS INTERVENTION PROGRAMS

ABOUT BATTERER INTERVENTION PROGRAMS

There is sometimes a misunderstanding about batterer intervention programs (BIPs) when we fail to remember that, by themselves, these programs have little chance of rehabilitating perpetrators of domestic violence. BIPs are one part of a coordinated community response to the crime of domestic violence and to succeed, a strong, integrated criminal justice response is also needed. The arrest, incarceration, and sentencing of perpetrators to enroll in a batterers' program gives a clear message that abusive behaviors will not be tolerated. A swift consequence for a failure to comply with court orders reinforces that message.

PROGRAMS IN THE STATE OF ALASKA:

The Council reviews batterer intervention programs according to Department of Corrections regulations (22 AAC Chapter 25) for approved status and monitors the approved programs for compliance on an annual basis. The Council provided small grants to eight of the programs.

During FY10 fourteen batterer intervention programs operated in Alaska; eleven were community based Batterers Intervention Programs (BIP) and three were Prison Batterers Programs (PBP). All of these programs have the primary goal of victim safety. The Council collaborates with the Department of Corrections to provide these programs. In FY10, the overwhelming majority of participants admitted into batterers' programs were court ordered. Programs are available in Anchorage, Barrow, Fairbanks, Homer, Juneau, Kenai-Soldotna, Kodiak, Valdez, and Ketchikan. Many areas of the state still lack ready access to a batterer intervention program.

BIP/PBP STATISTICS AND TASK FORCE:

A task force has been formed to analyze State approved BIP and PBP programs. The Task Force will make recommendations on how BIP and PBP programs can be improved and how to further enrich data gathering and reporting techniques to understand the effectiveness of BIP/PBP programs within the State of Alaska.

STOP VIOLENCE AGAINST WOMEN GRANT PROGRAMS

KEY AREAS:

The Council funds a variety of programs through federal STOP (Services • Training • Officers • Prosecutors) Violence Against Women Act Grant funds. This grant funds four key areas in the fight against domestic violence and sexual assault: law enforcement, prosecution, courts, and victim service. FY2010 funding highlights are:

DEPARTMENT OF PUBLIC SAFETY

- Training for DPS recruits at the Sitka Academy included 24 hours of classroom and 16 hours of proctored scenarios for domestic violence response offered twice during the year; 16 hours of class room for sexual assault and sexual assault of a minor response offered twice during the year; 24 hours of class room and proctored scenarios at the VPSO Academy offered once; and 20 hours of class room at the University of Alaska Fairbanks' TVC Law Enforcement program
- A first responder training was conducted in conjunction with Tundra Women's Coalition and the Yukon Kuskokwim Health Corporation—participants included health aides, behavioral health aides and VPSOs
- A Sexual Assault Response Team statewide training for law enforcement, victim advocates, health care professionals and prosecutors was held in Bethel

ALASKA COURT SYSTEM

- The Court System provided telephonic language interpretation services to parties in 114 domestic violence protective order hearings
- Training was provided to 83 judicial officers and senior court staff
- Regional Clerks of Court training were held in Anchorage and Palmer this year

Department of Law

- Funded the criminal division's statewide victim witness coordinator position to provide statewide oversight of victim witness services which address the needs of victims of domestic violence, sexual assault, and stalking, and to ensure compliance with Alaska statutes requiring notification of criminal proceedings
- Funded the annual 2-day District Attorney Conference
- Funded series of advanced trial skills training for prosecutors
- Funded regional and telephonic training for paralegals

Alaska Network on Domestic Violence & Sexual Assault

Domestic Violence/Sexual Assault Legal Training for Advocates and Attorneys

- Sponsored the twelfth annual *Litigating Family Law Cases Involving Domestic Violence and Sexual Assault* continuing legal education conference. 92 participants attend the February 15 and 16, 2010 event at the Hotel Captain Cook in Anchorage. Featured speakers included Dr. Anna Salter, national expert on sexual assault and sex offenders, and Judge Paula Casey and Dr. Nancy Olesen from the National Council on Juvenile and Family Law Judges who discussed custody issues in cases with domestic violence and sexual assault. Christine Pate shared facts regarding domestic violence in Alaska and the role of the ANDVSA Pro Bono Program in aiding those victims with access to safety and justice. Alaska's Attorney General, Dan Sullivan addressed the group on the importance of providing legal services for victims and encouraging attorneys to donate their time to the project.

Technical Assistance

- Provided case consultations to legal advocates, attorneys and other social service providers through phone, e-mail, and web based communication
- Published and updated legal resource materials including the Family Law Practice Manual, and Legal Advocacy Curriculum

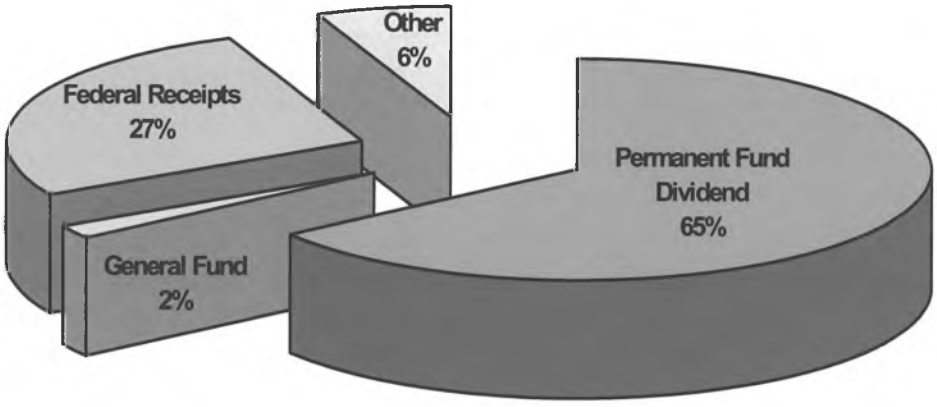
Direct Representation

- Trained and recruited volunteer attorneys and placed 60% of cases referred with volunteer attorneys
- Operated the Information & Referral Hotline, with volunteer lawyers answering requests for information and assistance from victims

ANDVSA
Alaska Network on Domestic Violence & Sexual Assault

FUNDING SOURCES

FY10 Funding - $12,774,100



FEDERAL FUNDING SOURCES

FAMILY VIOLENCE PREVENTION SERVICES ACT (FVPSA)

FVPSA provides federal funding to all states. The Council uses this funding to finance domestic violence programs throughout Alaska. All programs receiving these grant funds provide shelter or related assistance to domestic violence victims and their children. The programs operate shelter facilities that are staffed around the clock and provide a full spectrum of services including basic food and immediate shelter, crisis intervention, counseling, and advocacy.

VICTIMS OF CRIME ACT (VOCA)

Administered by the Dept. of Justice Office of Victims of Crime, VOCA funds provide financial support to state and local agencies that offer services to crime victims. This fund is a U.S. Treasury account generated entirely by the fines and penalties levied against criminals convicted of federal crimes. As such, the amount available in this fund can vary greatly from year to year. The Council awards the majority of this funding directly to programs that provide services to victims of domestic violence, sexual assault, and other violent crimes.

U.S. DEPARTMENT OF JUSTICE OFFICE OF VIOLENCE AGAINST WOMEN GRANTS

S.T.O.P. (SERVICES • TRAINING • OFFICERS • PROSECUTORS) GRANT

VAWA STOP grants serve to improve the national response to domestic violence and sexual assault by combining a series of federal sanctions and initiatives as well as national, state, and local resources to improve the response to crimes against women. S.T.O.P. funds are committed to four specific areas: prosecution, law enforcement, victim service, and courts. S.T.O.P. is awarded to all states and territories through a federal formula that uses a base amount plus a consideration for population. Activities funded under this grant are described on pages 11-12.

Rural Domestic Violence and Child Victimization Grant (RDVCV)

The primary purpose of the Rural Program is to enhance the safety of victims of domestic violence, dating violence, sexual assault, stalking, and child victimization by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. In FY 2010, this grant funded projects in five rural areas of the state.

Supervised Visitation and Safe Exchange Grant Program (SVSEP)

The Safe Havens: Supervised Visitation and Safe Exchange Grant Program (Supervised Visitation Program) provides an opportunity for communities to support the supervised visitation and safe exchange of children in situations involving domestic violence, dating violence, child abuse, sexual assault, or stalking. Studies have shown that the risk of violence is often greater for victims of domestic violence and their children after separation from an abusive situation. Visitation and exchange services provided through the Supervised Visitation Program exhibit a clear understanding of the dynamics of domestic violence, dating violence, sexual assault and stalking; the impact of domestic violence on children; and the importance of holding offenders accountable for their actions.

STATE FUNDING SOURCES

Department of Health and Social Services

In FY2010, the Department of Health and Social Services (DHSS) provided funds to the Council for Sexual Assault Prevention activities. These funds were from the federal Sexual Assault Prevention (SAP) and Rape Prevention and Education (RPE) grants. The majority of these grants fund education programs delivered in schools by victim service programs in Anchorage and Juneau.

Department of Corrections

Department of Corrections (DOC) contributes funds to the Council to administer the Batterer Intervention and the Prison Batterer Programs.

Permanent Fund Dividend (PFD)

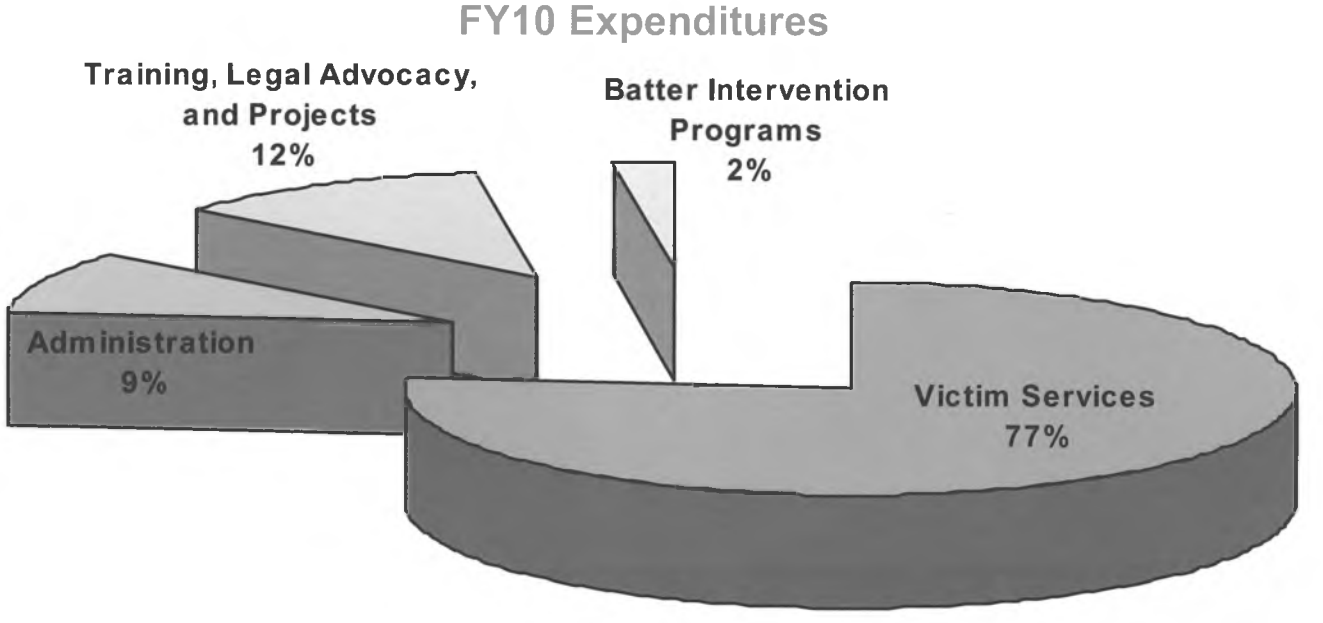
Incarcerated felons and qualifying misdemeanants forfeit PFDs to the state. The state allocates these funds to the Council for victim services, the Office of Victim Rights, the Violent Crimes Compensation Board and the Department of Corrections for programs.

Alaska General Fund

General funds comprise a portion of the budget; they are used to support victim service programs and Council administration.

SUMMARY OF EXPENDITURES

The Council continues to disburse the great majority of its budget directly to community victim service agencies. The 12% designated for Training, Legal Advocacy, and Projects is predominantly spent towards enhancing the expertise and ability of community service providers' response to domestic violence and sexual assault.



Victim Services	Administration	Training, Legal Advocacy, & Projects	Batter Intervention Programs
$9,787,480	$1,207,000	$1,481,383	$298,237

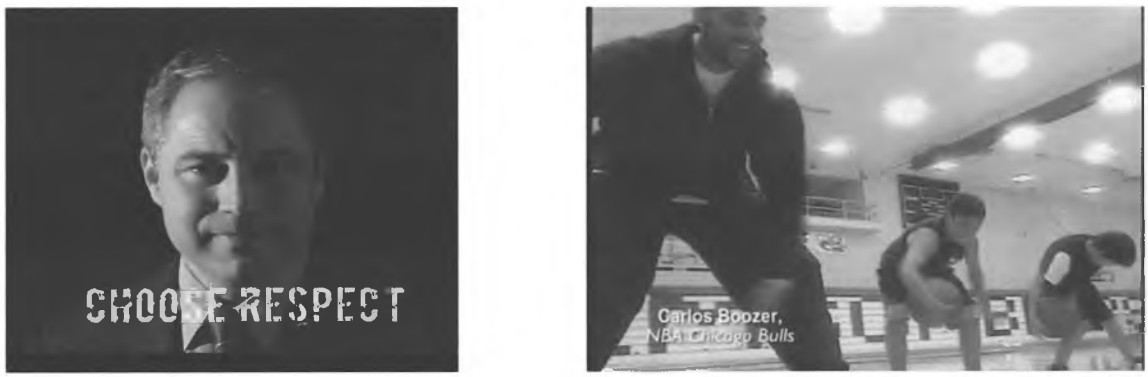
Total
$12,774,100

CDVSA's 2010 Public Awareness & Prevention Campaigns

In FY10, the Council supported prevention through a variety of campaigns. The Council contracted and worked in partnership with the Alaska Network on Domestic Violence & Sexual Assault (the Network or ANDVSA) to plan and implement this endeavor.

Alaska Men Choose Respect (launched December 2009)

This public awareness campaign was targeted towards men and focuses on prevention. The campaign is suppored by Governor Parnell and was launch at the Governor's Press Conference in Anchoarage at Bartlett High School. Five televsion commercials were shown on both cable and broadcast networks through April 2010.



Television commercials featuring Governor Sean Parnell (left) and NBA Player Carlos Boozer (right).

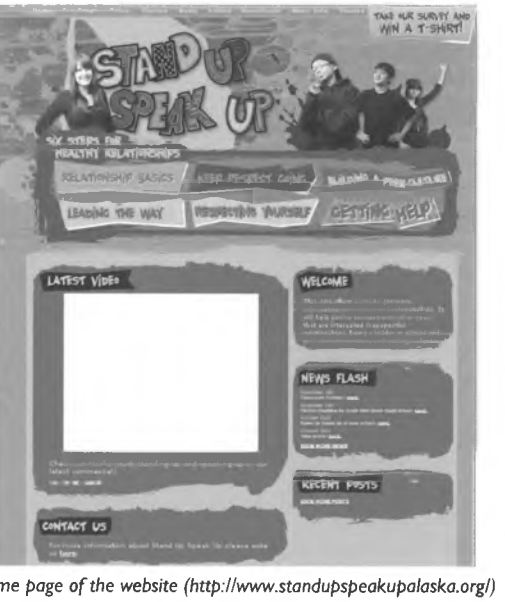
In addition, a website (located at www.AlaskaMenChooseRespect.org) was develped to support the public information campaign efforts. The more than 8,900 visits to the website during the fiscal year attest to the success of this campaign.

Home Page of www.AlaskaMenChooseRespect.org

Stand Up Speak Up Youth Initiative (launched April 2010)

This campaign is targeted toward youth to promote respect and create safer relationships and communities. Two commercials and six poster designs have been developed. In addition, T-shirts, lanyards, and stickers were distributed to every middle school and high school in the state, and to every public health clinic, every village clinic, and every member program. A website (located at http://www.standupspeakupalaska.org/) was also developed allowing children to learn more about the program and what they can do to make a difference.

Still from the Stand Up Speak Up Commercial



Home page of the website (http://www.standupspeakupalaska.org/)

Additionally, the campaign supported ten youth-led community projects throughout the state.

The Fourth R (began November 2009)

The Fourth R is a comprehensive school-based program designed to include students, teachers, parents, and the community in reducing violence and many of today's risk behaviors. The Fourth R provides information and practice opportunities for students to improve decision-making, establish positive relationship models, and explore alternatives to the negative decision-making they frequently see in the world around them.

"The Fourth R" was created in Canada a few years ago, but the program has been tailored to suit Alaska's population and Native communities.

DELTA/PATHWAYS Community Based Prevention Projects & Statewide Committee Planning Group (ongoing project)

The Council has played a significant role in the development of a statewide plan to augment the framework for statewide prevention. The idea is to provide a roadmap for ending domestic violence and sexual assault in Alaska in our lifetimes.

MEMORANDUM

Date: March 30, 2011

From: Representative Dan Saddler -DAS
House Military and Veterans' Affairs, Co-Chair

To: Senator Bill Wielechowski
Senate State Affairs, Chair

Re: Hearing Request for HCR 7 – Alaska Decoration of Honor

Attached is the bill packet for House Concurrent Resolution 7, an act relating to awarding the Alaska Decoration of Honor to certain members of the military. In the packet, you will find the only version of the bill, the sponsor statement, and the fiscal note.

Your consideration to hear this resolution is greatly appreciated. It is my hope to get this measure passed this legislative session, if at all possible.

Please be sure to let me know if you have any questions or need additional information.

Thank you.

REPRESENTATIVE DAN SADDLER

SPONSOR STATEMENT
HCR 7

This resolution awards the Alaska Decoration of Honor to thirty individuals who were killed in the line of duty while honorably serving our state and country, between January 1, 2009 and February 15, 2011.

Established in 2007 in House Bill 244, the Alaska Decoration of Honor is awarded to military service members from Alaska, or those service members deployed while stationed in Alaska, who were killed in action or in support of combat action.

The Legislature must authorize the award by resolution, so the decoration can be presented to the recipients' survivors. In 2008, the Legislature awarded the medal to 171 individuals dating back to statehood. In 2009, it authorized the award for another six individuals.

Passage of HCR 7 will allow the families of these thirty individuals to receive the decoration in honor of their loved ones' sacrifice. While it is our fervent hope that all those in uniform will return home from their service safely, the reality is that a few will not. It is our obligation, and our privilege, to authorize this decoration in their honor.

I respectfully request favorable support of House Concurrent Resolution 7.

Thank you.

BILL NO. HCR 7

Analysis

This fiscal note has zero impact on the Legislative Affairs Agency.

Alaska Decoration of Honor

The Alaska Decoration of Honor was created to recognize Alaskan service members who have been killed in action or in support of combat. The medal is awarded on behalf of the people of the State of Alaska to show our gratitude to the families of those who gave the ultimate sacrifice in serving our state and nation.

Jon Van Zyle, a local and nationally renowned artist and Vietnam veteran, donated his time and talents in designing the Alaska Decoration of Honor medal. His design (shown on front cover) has many symbolic elements:

Raven - is symbolic of life and is important in all Alaska Native cultures. The raven, which lives in Alaska year round, is shown in the shape of a cross to signify faith.

Northern Lights - represents of the souls of the departed

North Star - represents Alaska

Forget-me-not - is Alaska's state flower and was chosen for the term "forget-me-not"

Circle design – indicates "never ending"

It was Mr. Van Zyle's hope that when the families of these soldiers look up in the sky and see a raven, the Northern Lights, or the North Star, they will be reminded of their loved one.

HCR 28 SEXUAL ASSAULT AWARENESS MONTH

All Alaskans deserve a life free from violence. Whether it is in the home, in relationships, or in our communities, every individual should live a life without fear and with security and safety. This resolution encourages Alaskans to speak out against sexual assault as we rise in unison to dispel the anger, self-blame, depression and anxiety that can be exhibited both emotionally and physically by those who have endured this terrible experience. This resolution emboldens Alaskans to declare that sexual assault of any kind will not be accepted.

As we embrace the Governors "Choose Respect" campaign we join him and march arm in arm as we continue our message against all forms of sexual assault in Alaska. HCR 28 also recognizes the dedicated work in Alaska of the volunteers, staff, and agencies who dedicate their lives to ensure victims have someone to talk to, a place to go and other services and avenues to help. These individuals and groups deserve our respect and support and we join them to remove the veil of silence and declare intolerance towards sexual assault in Alaska.

HCR 28 proclaims the month of April 2012 to Sexual Assault Awareness Month in Alaska.

Intimate Partner Violence and Sexual Violence in the State of Alaska:

Key Results from the 2010 Alaska Victimization Survey

CDVSA
Council on Domestic Violence & Sexual Assault
Safety * Prevention * Accountability

Out of every 100 adult women who reside in the State of Alaska:

48 experienced intimate partner violence (IPV):

37 experienced sexual violence:

59 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2010 survey of adult women in the State of Alaska.
Source: UAA Justice Center, Alaska Victimization Survey, http://justice.uaa.alaska.edu/avs.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate partner violence and sexual violence are endemic problems. Up until now, comprehensive statewide data were not available to guide planning and policy development or to evaluate the impact of prevention and intervention services. This study provides the first definitive measures of intimate partner violence and sexual violence for the State of Alaska. The survey was designed to establish a baseline for the State. Results can be used to support prevention and intervention efforts that reduce violence against women.

Methodology

A total of 871 adult women in Alaska participated in the survey. Respondents were randomly selected by phone (using both land lines and cell phones) in May and June of 2010. Respondents were asked behaviorally specific questions about intimate partner violence (both threats and physical violence). Intimate partners included romantic and sexual partners. Respondents were also asked about sexual violence (both alcohol or drug involved sexual assault and forcible sexual assault). These questions were not limited to intimate partners. Procedures were designed to maximize the safety and confidentiality of all respondents. The survey was approved by multiple institutional review boards and was supported by the Alaska Council on Domestic Violence and Sexual Assault.

Acknowledgments

We sincerely thank the 871 adult women in Alaska who invested time and effort to participate in this victimization survey. They re-lived horrendous experiences, experiences that no one should be subjected to, to help the rest of us understand the extent of intimate partner and sexual violence in Alaska. Funding for this project was provided by the Alaska Council on Domestic Violence and Sexual Assault. The survey was administered by RTI International. Data were analyzed by the UAA Justice Center.

Intimate Partner Violence and Sexual Violence in the State of Alaska: Key Results from the 2010 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the State of Alaska who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 58.6% of adult women in Alaska (or 144,881) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 11.8% (or 29,174) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	47.6%	117,685	9.4%	23,240
Threats of physical violence	31.0%	76,644	5.8%	14,340
Physical violence	44.8%	110,763	8.6%	21,262
Sexual violence (composite)	37.1%	91,725	4.3%	10,631
Alcohol or drug involved sexual assault	26.8%	66,260	3.6%	8,901
Forcible sexual assault	25.6%	63,293	2.5%	6,181
Any Violence (composite)	**58.6%**	**144,881**	**11.8%**	**29,174**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 47.6% of adult women (or 117,685) experienced intimate partner violence in their lifetime, with:
  - 31.0% (or 76,644) experiencing threats of physical violence, and
  - 44.8% (or 110,763) experiencing physical violence.
- 9.4% of adult women (or 23,240) experienced intimate partner violence in the past year, with:
  - 5.8% (or 14,340) experiencing threats of physical violence, and
  - 8.6% (or 21,262) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 37.1% of adult women (or 91,725) experienced sexual violence in their lifetime, with:
  - 26.8% (or 66,260) experiencing at least one alcohol or drug involved sexual assault, and
  - 25.6% (or 63,293) experiencing at least one forcible sexual assault.
- 4.3% of adult women (or 10,631) experienced sexual violence in the past year, with:
  - 3.6% (or 8,901) experiencing at least one alcohol or drug involved sexual assault, and
  - 2.5% (or 6,181) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured.

For additional information on the Alaska Victimization Survey, please visit http://justice.uaa.alaska.edu/avs, or contact André Rosay with the UAA Justice Center (907-786-1821) or Lauree Morton with the Council on Domestic Violence and Sexual Assault (907-465-5503). National, statewide, and local resources for domestic violence, sexual assault, stalking, and teen dating abuse can be found online at: http://gov.alaska.gov/parnell/priorities/choose-respect/links-to-organizations.html.

2012 Alaska Dashboard

Key Issues Impacting

Domestic Violence and Sexual Assault in Alaska

Some of the data below are based on self-disclosures to survey questions on domestic violence (DV) and sexual assault (SA). These estimates are conservative (actual rates are much higher). As the stigma of reporting violence lessens and as we increase victim safety, those experiencing violence will be more likely to report and seek help. Certain estimates may increase over time (e.g., reports of harm, utilization of services, and reports to law enforcement).

Key Population Indicators for Alaska	Previous AK Data	Current AK Data	Percent Change	Progress
Childhood Exposure to Domestic Violence				
1. Percent of adults exposed to intimate partner violence of parent (BRFSS)	19.1%	19.2%	+1%	○

2012 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

National Comparisons

National data for comparison purposes are only available for a few of the population indicators on the Alaska dashboard for key issues impacting domestic violence and sexual assault in Alaska. Few of the data sources on the Alaska dashboard are available nationally or in other states. When they are available, data are rarely directly comparable. In particular, different states have different definitions for domestic violence and sexual assault. Listed below are the few indicators that are directly comparable to national data.

Key Population Indicators for Alaska	Previous AK Data	Current AK Data	U.S. Data
Child and Youth Victimization			
3. Percent of students experiencing physical dating violence in past year (YRBS)	13.3%	12.0%	9.8%
4. Percent of students experiencing sexual violence in lifetime (YRBS)	10.1%	9.2%	7.4%
Reports of Harm (Child and Youth)			
5. Rate of reported child abuse and neglect per 10,000 (US DHHS)	190.1	150.8	92.2
Reports to Law Enforcement			
15. Rate of forcible rape reported to law enforcement per 10,000 (UCR)	7.3	7.5	2.8

Percent of students experiencing physical dating violence in the past year (YRBS)
In 2009 (previous AK data), the percentage of Alaska high school students experiencing physical dating violence in the past year was 13.3%, compared to 9.8% of high school students in the U.S. The percentage of high school students experiencing physical dating violence in the past year was 1.4 times higher in Alaska than in the U.S.

Percent of students experiencing sexual violence in lifetime (YRBS)
In 2009 (previous AK data), the percentage of Alaska high school students experiencing sexual violence in their lifetime was 10.1%, compared to 7.4% of high school students in the U.S. The percentage of high school students experiencing sexual violence in their lifetime was 1.4 times higher in Alaska than in the U.S.

Rate of reported child abuse and neglect per 10,000 (US DHHS)
In 2010 (current AK data), the rate of reported and substantiated child abuse and neglect was 150.8 per 10,000 children (ages 0 to 17) in Alaska, compared to 92.2 per 10,000 children in the U.S. The Alaska rate was 1.6 times higher than the U.S. rate.

Rate of forcible rape reported to law enforcement per 10,000 (UCR)
In 2010 (current AK data), the rate of forcible rape reported to law enforcement was 7.5 per 10,000 in Alaska, compared to 2.8 per 10,000 in the U.S. The Alaska rate was 2.7 times higher than the U.S. rate.

Forthcoming Indicators

Reports to Law Enforcement
1. Number of sexual assaults reported to law enforcement (DPS)
2. Number of sexual abuses of minors reported to law enforcement (DPS)
Offender Accountability
3. Percent of juvenile sex offenders who recidivate (DJJ)
4. Percent of adult sex offenders who recidivate (DOC)
Primary Prevention and Protective Factors
5. Percent of students who feel connected to their school (SCCS)

2012 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

Percent Change

Percent change is the increase or decrease in the current Alaska data relative to the previous Alaska data. It is not an absolute difference in percent. For example, indicator #2 has increased from 4.0% to 7.2%. The absolute difference in percent is 3.2, but the percent change from the previous to the current Alaska data is 80%, because 3.2 is 80% of the previous Alaska data. Percent changes may or may not be statistically significant since some change randomly occurs from year to year.

$$\textbf{Percent Change is } \frac{\textbf{Current AK data - Previous AK data}}{\textbf{Previous AK data}} \times 100$$

Dashboard Indicator Definitions

Childhood Exposure to Domestic Violence
1. Percent of adults exposed to intimate partner violence of parent Behavioral Risk Factor Surveillance System (BRFSS). Approximately every third year, 2,500 adults in Alaska are asked "As a child, did you ever see or hear one of your parents or guardians being hit, slapped, punched, shoved, kicked or otherwise physically hurt by their spouse or partner?" Most current Alaska data are from 2009 and previous Alaska data are from 2006.
2. Percent of mothers whose 3 year old child saw violence or physical abuse Childhood Understanding Behaviors Survey (CUBS). Each year, over 1,000 mothers of three year old children are asked "Has your child ever experienced seeing violence or physical abuse in person?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

Child and Youth Victimization
3. Percent of students experiencing physical dating violence in past year Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "During the past 12 months, did your boyfriend or girlfriend ever hit, slap, or physically hurt you on purpose?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.
4. Percent of students experiencing sexual violence in lifetime Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "Have you ever been physically forced to have sexual intercourse when you did not want to?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.

Reports of Harm (Child and Youth)
5. Rate of reported child abuse and neglect per 10,000 US Department of Health and Human Services (US DHHS). Rate of unique victims of reported and substantiated child abuse and neglect per 10,000 children ages 0-17. Child abuse and neglect is defined as any recent act or failure to act on the part of a parent or caretaker which results in death, serious physical or emotional harm, sexual abuse or exploitation; or an act or failure to act which presents and imminent risk of serious harm. Most current Alaska data are from 2010 and previous Alaska data are from 2009. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.
6. Rate of reported child sexual maltreatment per 10,000 Office of Children's Services (OCS). Rate of non-duplicated children per 10,000 (ages 0-17) that are referred to the Office of Children's Services for substantiated incidents of sexual maltreatment. Sexual maltreatment includes sexual abuse (sexual assault, sexual abuse of a minor, incest, online enticement of a minor, unlawful exploitation of a minor, indecent exposure), sexual exploitation (allowing, permitting, or encouraging child prostitution), and prostitution or promoting prostitution. Most current Alaska data are from 2010 and previous Alaska data are from 2009. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

Adult and Elder Victimization

7. Percent of women experiencing intimate partner violence in past year
Alaska Victimization Survey (AVS). In 2010, over 800 adult women were asked if in the past year, an intimate partner (a) "Made threats to physically harm you?" (b) "Slapped you?" (c) "Pushed or shoved you?" (d) "Hit you with a fist or something hard?" (e) "Kicked you?" (f) "Hurt you by pulling your hair?" (g) "Slammed you against something?" (h) "Tried to hurt you by choking or suffocating you?" (i) "Beaten you?" (j) "Burned you on purpose?" or (k) "Used a knife or gun on you?" Most current Alaska data are from 2010.

8. Percent of women experiencing sexual violence in past year
Alaska Victimization Survey (AVS). In 2010, over 800 adult women were asked "When you were drunk, high, drugged, or passed out and unable to consent" in the past year, has anyone (a) "Had vaginal sex with you?" (b) "Made you receive anal sex?" (c) "Made you perform oral sex?" or (d) "Made you receive oral sex?" and has anyone in the past year "used physical force or threats to physically harm you to" (a) "Make you have vaginal sex" (b) "Make you receive anal sex?" (c) "Make you perform oral sex?" (d) "Make you receive oral sex?" (e) "Put their fingers or an object in your vagina or anus?" or (f) "Try to have vaginal, oral, or anal sex with you, but sex did not happen?" Most current Alaska data are from 2010.

9. Percent of pregnant women experiencing intimate partner physical abuse
Pregnancy Risk Assessment Monitoring System (PRAMS). Each year, one of every six women who delivered a live-born infant is asked "During your most recent pregnancy, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

Reports of Harm (Adult and Elder)

10. Number of vulnerable adults reporting abuse or neglect
Adult Protective Services (APS). Number of vulnerable adults with a substantiated allegation of abuse or neglect reported to Adult Protective Services. Vulnerable adults are people 18 years of age or older who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data are from 2011 and previous Alaska data are from 2010. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

11. Number of vulnerable elders reporting abuse or neglect
Adult Protective Services (APS). Number of vulnerable elders with a substantiated allegation of abuse or neglect reported to Adult Protective Services. Vulnerable elders are people 65 years of age or older who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data are from 2011 and previous Alaska data are from 2010. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

Primary Prevention and Protective Factors

Primary prevention includes approaches before violence has occurred to prevent initial perpetration or victimization

12. Percent of pregnant women whose health provider talked to them about DV
Pregnancy Risk Assessment Monitoring System (PRAMS). Each year, one of every six women who delivered a live-born infant is asked "During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about physical abuse to women by their husbands or partners?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

13. Percent of students comfortable seeking help from 3 or more adults
Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "Besides your parents, how many adults would you feel comfortable seeking help from if you had an important question affecting your life?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.

14. Percent of schools implementing Fourth R healthy relationship curriculum
Department of Education & Early Development (DEED). Percentage of public secondary schools that have teachers trained in the Fourth R healthy relationship curriculum. Secondary schools include public high schools, middle schools, and alternative schools. Most current Alaska data are from FY12 and previous Alaska data are from FY11.

Reports to Law Enforcement

15. Rate of forcible rape reported to law enforcement per 10,000

Uniform Crime Reports (UCR). Rate of forcible rape reported to most law enforcement agencies in Alaska per 10,000 population. Forcible rape is defined as the carnal knowledge of a female forcibly and against her will. Attempted forcible rapes are included, regardless of the age of the victim. Statutory offenses (no force used – victim under age of consent) are excluded. To obtain rates per 100,000, multiply the rates per 10,000 by 10. Most current Alaska data are from 2010 and previous Alaska data are from 2009.

16. Number of domestic violence related homicides reported to law enforcement

Alaska Department of Public Safety (DPS). Number of homicides (willful nonnegligent killings) known to law enforcement that occurred in Alaska where the homicide was committed by a household member against another household member. Household members include adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, who are related or formerly related by marriage, who have a child of the relationship. Household members also include children of a person in any of these relationships. In some cases, the relationship of the victim to the offender is unknown. These cases are not included in the number of domestic violence related homicides. Most current data are from 2010 and previous Alaska data are from 2009.

17. Number of elderly victims reporting DV-related sexual/physical assaults to AST

Alaska Department of Public Safety (DPS). Number of elderly victims (age 60 or older) who reported an assault involving domestic violence or a sexual assault involving domestic violence to Alaska State Troopers. This is the unduplicated count of victims, not the count of offenses or cases. In addition, each victim is counted only once per year. This number does not include offenses reported to local or municipal police departments. This number also does not include other domestic violence offenses (other crimes against the person, burglary, criminal trespass, arson or criminally negligent burning, criminal mischief, terrorist threatening, violating a protective order, and harassment). Crimes are domestic violence related if they occur between household members (i.e., adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Most current data are from 2010 and previous Alaska data are from 2009.

Utilization of Services

18. Rate of children evaluated by child advocacy centers per 10,000

Alaska Children's Alliance (ACA). Number of children evaluated at a child advocacy center (duplicated count) per 10,000 children ages 0-17. Children are evaluated at child advocacy centers for allegations of child sexual abuse or assault, child physical abuse, drug endangerment, witnessing violent events in the home where they are present, and neglect or medical failure to thrive. Most current Alaska data are from state fiscal year 2010 and previous Alaska data are from state fiscal year 2009.

19. Rate of adults utilizing services for domestic violence per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated adults per 10,000 adults (age 18 and older) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being a primary victim of domestic violence. Primary victims are adults who are directly harmed, either physically or emotionally, by the actions of another. Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

20. Rate of children with adults in domestic violence services per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated minors per 10,000 minors (ages 0-17) who utilized services from a CDVSA-funded domestic violence or sexual assault service agency, and who were recorded as being a secondary victim of domestic violence. Secondary victims are minors beyond the immediate victim who have been affected by the repercussions of an event or events. These may include child witnesses who although not the direct target of abuse, have been affected. This number does not include minors who were primary victims of domestic violence (even if they were also secondary victims). Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

21. Rate of adults utilizing services for sexual assault per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated adults per 10,000 adults (age 18 and older) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are adults who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

22. Rate of youth utilizing services for domestic violence per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being a primary victim of domestic violence. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

23. Rate of youth utilizing services for sexual assault per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

Offender Accountability

24. Percent of reported forcible rapes resulting in an arrest
Alaska Department of Public Safety (Crime Reported in Alaska). Number of offenses cleared by arrest or exceptional means per actual offenses reported or known to law enforcement. Unfounded complaints are excluded. Most current Alaska data are from 2010 and previous Alaska data are from 2009.

25. Rate of juveniles referred for sex offenses per 10,000
Alaska Division of Juvenile Justice (DJJ). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for sexual assault in the first to fourth degree or sexual abuse of a minor in the first to fourth degree. Most current Alaska data are from FY11 and previous Alaska data are from FY10.

26. Rate of juveniles referred for a DV-related assault per 10,000
Alaska Division of Juvenile Justice (DJJ). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for domestic violence related assault in the first to fourth degree. An assault is domestic violence related if it occurred between household members (i.e., minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Most current Alaska data are for FY11 (these were extrapolated from data that were available from 2/23/11 to 6/30/11). These data were not collected prior to 2/23/11.

27. Number of sexual assault cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

28. Percent of accepted sexual assault cases with a conviction
Alaska Department of Law (DOL). Percent of sexual assault cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

29. Number of abuse of minor cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

30. Percent of accepted sexual abuse of minor cases with a conviction
Alaska Department of Law (DOL). Percent of sexual abuse of minor cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

31. Number of domestic violence cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

32. Percent of accepted domestic violence cases with a conviction
Alaska Department of Law (DOL). Percent of assault cases involving domestic violence accepted for prosecution that resulted in a conviction for an assault involving domestic violence. Percentage is based on the number of cases accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

MEMORANDUM

Date: March 28, 2011

To: Senator Bill Wielechowski, State Affairs Chair

From: Rep. Bob Herron

RE: HJR 15 (EDT), Supporting Arctic Caucus

I respectfully request that **HJR 15 (EDT),** "Relating to collaboration with the Yukon and the Northwest Territories through the Pacific NorthWest Economic Region and its Arctic Caucus to address common issues" **be scheduled for a hearing in the Senate State Affairs Committee.**

This resolution encourages the Alaska Legislature to collaborate with the legislative assemblies of the Yukon and the Northwest Territories through PNWER and its Arctic Caucus to facilitate communication and cooperation among the Arctic Caucus member jurisdictions and, as a result, to more effectively address common problems.

Notably, the Arctic Caucus will also strive to promote a synchronized message detailing the common needs of the Arctic Caucus member regions to their respective federal governments and emphasizing that coordinated United States and Canadian federal policies are vital for the well-being of the region's citizens.

If you have any questions or need additional information, please contact myself or my staff Rob Earl at 465.4942.

CS FOR HOUSE JOINT RESOLUTION NO. 15(EDT)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE HOUSE SPECIAL COMMITTEE ON ECONOMIC DEVELOPMENT, TRADE, AND TOURISM

Offered: 3/18/11
Referred: Rules

Sponsor(s): REPRESENTATIVES HERRON, Kerttula, Peggy Wilson, Gardner

A RESOLUTION

Relating to collaboration with the Yukon and the Northwest Territories through the Pacific NorthWest Economic Region and its Arctic Caucus to address common issues.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the Pacific NorthWest Economic Region was formed in 1991 as a forum for collaborative public and private sector planning among the states of Alaska, Montana, Washington, Oregon, and Idaho, the Canadian provinces and territories of the Northwest Territories, Yukon, British Columbia, Alberta, and Saskatchewan, and the national capitals of Washington, D.C., and Ottawa, Canada; and

WHEREAS the Arctic Caucus of the Pacific NorthWest Economic Region was formed in November 2009 as an informal group of legislators, government officials, business leaders, and leaders of nonprofit organizations committed to the responsible development of North America's Arctic regions; and

WHEREAS the purpose of the Arctic Caucus is to provide a forum within the Pacific NorthWest Economic Region for the Arctic jurisdictions of Alaska, the Yukon, and the Northwest Territories to share information, discuss issues of mutual concern, and identify areas for collaboration, including working with other jurisdictions and providing Arctic-

related input to the working groups of the Pacific NorthWest Economic Region; and

WHEREAS, on December 1 - 3, 2010, the Arctic Caucus met in Barrow, Alaska, to discuss the federal Arctic policies of the United States and Canada, the Arctic transportation and communication infrastructure needs of the Arctic Caucus member regions, and the priorities and action of the Arctic Caucus; and

WHEREAS the Alaska Northern Waters Task Force attended the 2010 meeting of the Arctic Caucus in Barrow, and future cooperative action between the Alaska Northern Waters Task Force and the Arctic Caucus was outlined; and

WHEREAS the 21st Annual Summit of the Pacific NorthWest Economic Region will be held July 19 - 22, 2011, in Portland, Oregon, and will provide a forum for continued Arctic Caucus collaboration; and

WHEREAS Alaska, the Yukon, and the Northwest Territories, the three northern regions of the Pacific NorthWest Economic Region, have problems in common, including limited educational opportunities; a minimal distance-delivery education infrastructure; a need for expanded workforce development programs; a need for better cold climate housing; a high rate of suicide; a high rate of domestic violence; a high rate of substance abuse; an economic reliance on resource-extraction industries and a corresponding need for economic diversification; remote and inaccessible communities that face high costs for fuel and commodities; and an urgent need for investment in transportation and communication infrastructure; and

WHEREAS there is much to be gained by Alaska, the Yukon, and the Northwest Territories more closely sharing strategies to solve common problems and working together to solve those problems; and

WHEREAS some of the issues that the Arctic Caucus might address include increasing cooperation on scientific research and vessel tracking; exploring strategies to address and mitigate tension between local users and industry; identifying economic development opportunities through tourism, infrastructure development, and regional partnerships; supporting Arctic marine safety through appropriate jurisdictional licensing of marine pilots; exploring increased cooperation in emergency and disaster preparedness; and increasing coordination of search and rescue efforts;

BE IT RESOLVED that the Alaska State Legislature will collaborate with the

legislative assemblies of the Yukon and the Northwest Territories through the Pacific NorthWest Economic Region and its Arctic Caucus to facilitate communication and cooperation among the Arctic Caucus member regions and, as a result, to address more effectively problems common to those regions; and be it

FURTHER RESOLVED that the Alaska State Legislature will work with the legislative assemblies of the Yukon and the Northwest Territories through the Pacific NorthWest Economic Region and the Arctic Caucus to promote a synchronized message detailing the common needs of the Arctic Caucus member regions to their respective federal governments and emphasizing that coordinated United States and Canadian federal policies are vital to the welfare of Alaska, the Yukon, and the Northwest Territories; and be it

FURTHER RESOLVED that the Alaska State Legislature invites the governments of the Yukon and the Northwest Territories to join Alaska in an enduring alliance to pursue the common goals of their regions.

right honourable

COPIES of this resolution shall be sent to the Honorable Stephen Harper, Prime Minister of Canada; the Honorable John Morris Duncan, Canadian Minister of Indian Affairs and Northern Development; the Honorable Jim Kenyon, Member of the Legislative Assembly of the Yukon; the Honorable Bob McLeod, Member of the Legislative Assembly of the Northwest Territories; the Honorable Denis Stevens, Consul General of the Consulate General of Canada in Seattle, Washington; the Honorable Barack Obama, President of the United States; the Honorable Hillary Rodham Clinton, United States Secretary of State; the Honorable Robert M. Gates, United States Secretary of Defense; the Honorable Ken Salazar, United States Secretary of the Interior; the Honorable Sean Parnell, Governor of Alaska; the Honorable Mead Treadwell, Lieutenant Governor of Alaska; and the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

CS HJR 15 (EDT)

"Relating to collaboration with the Yukon and the Northwest Territories through the Pacific NorthWest Economic Region and its Arctic Caucus to address common issues."

The Arctic Caucus was formed in November 2009 as an informal group of legislators, government officials, business leaders, and leaders of nonprofit organizations committed to the responsible development of North America's Arctic regions, including Alaska, Northwest Territories, and the Yukon. The Arctic Caucus is now a working group within the Pacific Northwest Economic Region (PNWER), a statutory public-private partnership which promotes economic development between three Canadian provinces, two territories and five American states, including Alaska. Alaska was a founding member of PNWER in 1991. The Arctic Caucus is designed to facilitate communication and cooperation among the Arctic Caucus member jurisdictions.

The Arctic Caucus held its first Leadership Forum in Barrow, AK Dec. 1-3, 2010. This meeting was attended by six Alaska legislators, key officials from the US and Canada, and leadership from Yukon and the Northwest Territories.

Issues on which the Arctic Caucus has agreed to focus on include:

- Increasing cooperation on scientific research and vessel tracking
- Exploring strategies to reduce tension between local users and industry
- Identifying bi-national economic development opportunities through tourism
- Regional infrastructure and partnership development
- Exploring increased cooperation in emergency and disaster preparedness, and
- Increasing coordination of search and rescue efforts.

This resolution encourages the Alaska Legislature to collaborate with the legislative assemblies of the Yukon and the Northwest Territories through PNWER and its Arctic Caucus to facilitate communication and cooperation among the Arctic Caucus member jurisdictions and, as a result, to more effectively address common problems.

Notably, the Arctic Caucus will also strive to promote a synchronized message detailing the common needs of the Arctic Caucus member regions to their respective federal governments and emphasizing that coordinated United States and Canadian federal policies are vital for the well-being of the region's citizens.

This resolution's final resolve calls on "the governments of the Yukon and the Northwest Territories to join Alaska in an enduring alliance to pursue the common goals of their regions." We feel the time has come for such an alliance and are confident it will be embraced by our closest Canadian neighbors. We further hope and expect that the Alaska Legislature will welcome this spirit of northern camaraderie and support this resolution as a vehicle toward increased cooperation in the Arctic.

Explanation of Changes for HJR 15, Support Arctic Caucus

For Senate State Affairs Committee

Changes from the original HJR 15 in the House Economic Development, Trade & Tourism Committee

P.2, line 14, after "including" -- inserted
"limited educational opportunities; a minimal distance-delivery education infrastructure; a need for expanded workforce development programs;"

P. 2, line 28, after "partnerships" – inserted:
"supporting Arctic marine safety through appropriate jurisdictional licensing of marine pilots"

Lieutenant Governor Mead Treadwell
STATE OF ALASKA

February 21, 2011

The Honorable Representative Herron
Chairman House Special Committee on Economic Development,
Trade & Tourism
State Capitol Room 411
Juneau, Alaska 99811

Dear Representative Herron,

I appreciate the opportunity to be able to provide comment on HJR 15. For the record, I am Mead Treadwell, Lieutenant Governor, State of Alaska.

First, I would like to underscore the premise of this resolution: The Arctic is strategic to Alaska, the nation and the world. We feed, fuel, and defend America from the Arctic. Our Arctic location makes us a global player in aviation, and increasingly in shipping. Our Arctic scenery and culture inspires the world, and we have a major share of Arctic tourism. Arctic research conducted by Alaskans is central to global discussions on energy, climate change, shipping, health and biodiversity.

The Arctic Caucus of PNWER, and PNWER itself, is a way for us to get the word out about these important things we do, and want to do. It is a way to promote cooperation we need to develop our resources safely, protect our environment, establish safe, secure, reliable shipping, solve the Alaska-Canada border disputes, promote common investment in infrastructure, ranging from aids to navigation, oil spill response, search and rescue capability, energy development, ports and icebreakers.

As a joint resolution is an expression of the sense of the house and senate rather than of the administration, we will not be taking a position on whether or not the resolution should pass. Instead, we would like to express our appreciation for the Legislature's willingness to consider these important issues and pledge our willingness to work together on them.

Sincerely,

Mead Treadwell
Lieutenant Governor

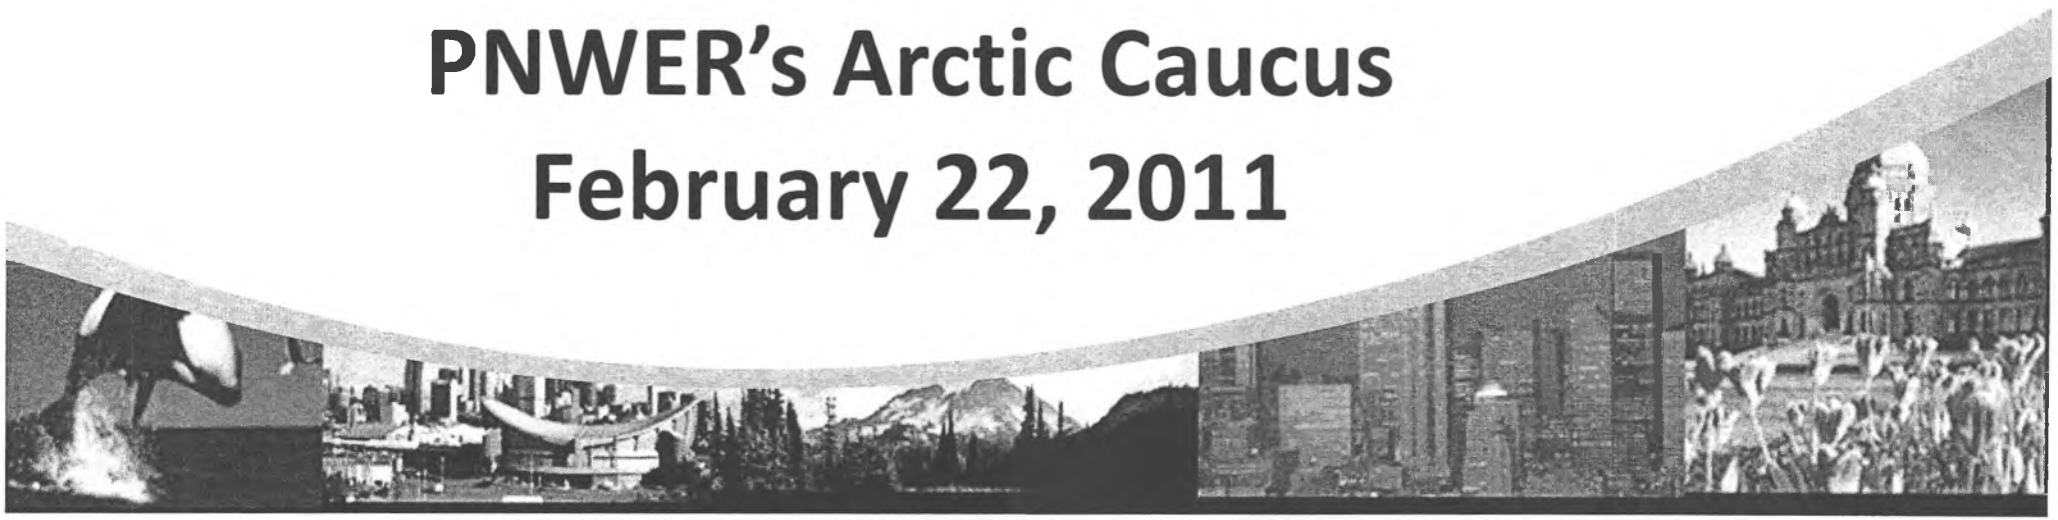
Pacific NorthWest Economic Region

PNWER's Arctic Caucus
February 22, 2011



PNWER Profile

- PNWER – formed by statute in 1991
- PNWER is a Public/Private Partnership
- Alaska, Alberta, British Columbia, Idaho, Oregon, Montana, Saskatchewan, Washington, Yukon & Northwest Territories
- Alaska Delegate Council:
  - Governor Sean Parnell
  - Sen. Fred Dyson
  - Sen. Charlie Huggins
  - Sen. Lesil McGuire
  - Sen. Tom Wagoner
  - Rep. Anna Fairclough
  - Rep. Bryce Edgmon
  - Rep. Lindsey Holmes
  - Rep. Peggy Wilson

Recent Successes

- Facilitation of Enhanced Drivers License
- Legislative Energy Horizon Institute
- 2010 Olympics and Border Symposium
- Arranged visit for AK Legislators to Alberta Oil Sands
- Foundation of the Arctic Caucus
- Support of international rail connection BC-WA

Arctic Caucus

- Founded in 2009 during Presidency of Senator McGuire
- A forum for PNWER Northern Jurisdictions to enhance collaboration amongst themselves and with other members
- Lead by Alaska, Yukon and Northwest Territories
- First Leadership Forum held in Barrow, Dec. 2010

Action Items – (see Arctic Caucus Report for complete list)

- Advocate for cabinet-level (US) participation in the Arctic Council
- Promote a pan-Northern approach to federal governments. (Including Legislative concurrent resolution)

Action Items – (see Arctic Caucus Report for complete list)

- Explore means to support the expansion of the Marine Exchange of Alaska's AIS System in Alaska as well as Northwest Territories (NWT), Yukon and BC. Support current efforts to increase Search and Rescue response capacity and infrastructure on both sides of the border including joint training/exercises
- Promote federal support of the Alaska/Canada highway and Shakwak funding.

Other Identified Issues :

- Gas Pipeline development
- UN Convention on the Law of the Sea
- Transmission/Local Energy Development
- Joint Tourism/Marketing
- Training/Workforce Development
- Support development of youth exchange programs
- Conduct an infrastructure gap analysis and provide a justification for investment in cross-border infrastructure.

Next Steps

- Arctic Caucus will meet at PNWER Summit in Portland Oregon, July 2011
- Second Leadership forum will be held August 18 – 19 in Yellowknife, NWT
- Meetings in Washington, DC and Ottawa to push Action Items to both Federal Governments
- Further development of plan for implementation and support of Arctic Caucus

HJR 34 – Coast Guard Icebreakers & Arctic Base

SPONSOR STATEMENT

The Alaska Northern Waters Task Force's Final Report was released January 30, 2012. HJR 34 formalizes two of the Task Force's recommendations and calls for the United States to:

1. Forward base the US Coast Guard in the Arctic, and
2. Fund icebreakers and other ice capable vessels.

The entire Arctic region is experiencing increased human activity related to shipping, oil and gas development, commercial fishing, and tourism and this increased activity leads to a commensurate need for immediate investment in the United States Arctic to enable the responsible development of resources; foster maritime commerce, safeguard the well-being of Arctic residents and ecosystems; facilitate emergency and disaster preparedness and response; and protect United States sovereignty.

The Coast Guard's mission in the Arctic is broad and it's becoming increasingly clear that the Coast Guard lacks the necessary assets to adequately complete its mission – without a corresponding increase in Arctic investment by the United States, this deficiency will only worsen over time. Having a sufficient number of ice-capable vessels (including shallow-draft vessels with icebreaking capability) is vital for the Coast Guard to fulfill its expanding mission in the Arctic.

Congress and the Administration are mandated by multiple laws and policies to maintain icebreaking operations, including:

- A 1936 Executive Order from President Franklin Roosevelt
- The Arctic Research Policy Act of 1984
- The Coast Guard Authorization Act of 2010, and
- The 2011 Arctic Search & Rescue (SAR) Agreement

Should a tragedy – such as the recent wreck of the cruise ship *Costa Concordia* in Italy – occur in the Arctic, the Coast Guard would be hard pressed to respond with sufficient assets in a timely fashion given their single Polar Class Icebreaker and their nearest base being in Kodiak, over 900 miles away from Alaska's Arctic coast.

CS HJR 34 (STA) am – COAST GUARD ICEBREAKERS & ARCTIC BASE

Changes from HJR 34 to CS HJR 34 (MLV)

P. 4, line 28, In the Copies Section:

Removed the Senior Arctic Officials of all eight Arctic Nations and inserted the Foreign Ministers of the other seven Arctic Nations (Secretary Clinton was already a recipient). This was done due to protocol, since the Foreign Ministers are higher ranking than the Senior Arctic Officials.

Changes from CS HJR 34 (MLV) to CS HJR 34 (STA)

P.1, line 6:
After "1959;" Deleted: ", on equal footing with the previously admitted states"

P.2, line 4:
After "tourism," Added ", and other activities"

P.4 , lines 25-27:
Removed: "icebreakers, including charging for icebreaker escorts, the option to lease rather than own the icebreakers needed in the Arctic, and selling our aging icebreakers to the private sector for refurbishment" AND

After "finance" Inserted: "the refurbishment of our current polar class icebreakers, the acquisition of new icebreakers, and the long-term maintenance funding of the United States Coast Guard icebreaker fleet and Arctic facilities"

This removes reference to charging for escorts, leasing and selling aging icebreakers to the private sector and adds reference to refurbishment and long-term maintenance.

Changes from CS HJR 34 (STA) to CS HJR 34 (STA) am

P.4, line 11:

After "the" inserted "strategically important"

Other countries fully understand the need for more Icebreakers in the Arctic:

- Russia has a fleet of eight nuclear powered icebreakers;
- Canada has committed $38 billion to a 30-year plan to build additional icebreakers and other ice-strengthened ships;
- Sweden, Finland, South Korea, and Japan have recently added icebreakers to their fleets; and
- China has a large icebreaking research ship and will have a second vessel operational in 2013

Considering it will take from seven to ten years to design and construct just one new Polar Class icebreaker, it is time critical that the U.S. fund & construct additional Icebreakers. Delay on this action will inevitably lead to undesirable consequences for the United States in the Arctic.

The Coast Guard must have a greater overall presence in the Arctic, with the ability to stage assets closer to future shipping, oil and gas drilling, and commercial fishing activities. I urge your support for this resolution.

United States Arctic Policy – NSPD-66

On January 9, 2009, President Bush signed National Security Presidential Directive (NSPD)-66 on Arctic Region Policy. Replacing the Clinton-era Arctic policy directive, NSPD-66 is now the stated Arctic policy of the Obama Administration as well.

The policy aims to:

- support the ratification of the United Nations Convention on the Law of the Sea (UNCLOS);
- promote participation in the Arctic Council;
- develop agreements with other Arctic countries on increased human activity in the region; and
- "continue to cooperate with other countries on Arctic issues through the United Nations (U.N.) and its specialized agencies."

The policy argues against the need for a treaty among Arctic nations similar to the Antarctic Treaty restricting commercial and military activities. The policy calls for the US to, "assert a more active and influential national presence to protect its Arctic interests and project sea power throughout the region," and to secure free passage of vessels through the Northwest Passage and the Northern Sea Route.

The following is a link to NSPD-66 in its entirety:
http://www.fas.org/irp/offdocs/nspd/nspd-66.htm

COMDTINST 16003.1
26 APR 2011

COMMANDANT INSTRUCTION 16003.1

Subj: U.S. COAST GUARD ARCTIC STRATEGIC APPROACH

Ref: (a) Arctic Region Policy, National Security Presidential Directive-66 / Homeland Security Presidential Directive-25 (NSPD-66/HSPD-25) dtd 09 Jan 2009
(b) U.S. Coast Guard Strategy for Maritime Safety, Security, and Stewardship
(c) National Environmental Policy Act Implementing Procedures and Policy for Considering Environmental Impacts, COMDTINST M16475.1(series)

1. PURPOSE. To promulgate the U.S. Coast Guard's strategic approach for mission execution in the Arctic[1] region.

2. ACTION. All U.S. Coast Guard unit commanders, commanding officers, officers-in-charge, deputy/assistant commandants, and chiefs of headquarters staff elements shall comply with the provisions of this Instruction. Internet release is authorized.

3. DIRECTIVES AFFECTED. None.

4. ARCTIC STRATEGIC VISION. As the Nation's lead agency for ensuring maritime safety, security, and stewardship, the U.S. Coast Guard will lead our nation's maritime engagement in the Arctic, and be a leader in advancement of U.S. national interests in the Arctic maritime domain. The U.S. Coast Guard must have the capability to perform the Service's statutory missions in the demanding Arctic maritime environment to ensure the Arctic remains a safe, secure, and environmentally sustainable region. The U.S. Coast Guard's Arctic strategy is founded on its

[1] A definition of the Arctic is contained in 15 USC § 4111. However, for the purposes of this Instruction, the Arctic region is defined as: "All United States and foreign territory north of the Arctic Circle and all United States territory north and west of the boundary formed by the Porcupine, Yukon, and Kuskokwim Rivers; all contiguous seas and straits north of and adjacent to the Arctic Circle, including the Arctic Ocean, the Bering, Chukchi, Beaufort, Greenland, Norwegian, Barents, Kara, Laptev, Lincoln, Wandel, and East Siberian seas, the Bering, Davis, Fram, and Denmark straits, the Canadian archipelago and Baffin Bay, and the Aleutian islands chain." This definition was agreed upon by U.S. Coast Guard and U.S. Navy in 2009 and is more inclusive of regions in which we may be called to operate.

NON-STANDARD DISTRIBUTION:

overarching strategy for maritime safety, security, and stewardship; and its intent to strengthen operational capability and field an adaptive, responsive force.

5. DISCUSSION.

a. U.S. Coast Guard Strategic Approach to the Arctic.

(1) As outlined in reference (a), the Arctic region is primarily a maritime domain. Human activity in the region is increasing and is projected to increase further in coming years. The National Arctic Policy directs the Departments of State, Homeland Security, and Defense to develop greater capabilities and capacity, as necessary, to protect U.S. borders; increase Arctic maritime domain awareness (MDA); preserve global mobility; project a sovereign United States maritime presence; encourage peaceful resolution of disputes; cooperate with other Arctic nations to address likely issues from increased shipping; establish a risk-based capability to address hazards in the region including cooperative search and rescue (SAR), basing and logistical support; and evaluate the feasibility for using the Arctic for strategic sealift. This tasking requires the United States to assert a more active and influential national presence to protect its Arctic interests throughout the region. Reference (b) is the overarching strategy for accomplishing the U.S. Coast Guard's missions in the maritime domain, and it will guide our efforts in meeting our national objectives in the Arctic region.

(2) Driven by changes in the physical environment, the Arctic operational and tactical environment has changed dramatically in recent years. Greater accessibility and human activity in Arctic waters, previously covered by ice, have increased the significance and national urgency associated with ensuring the United States has the ability to preserve freedom of navigation, provide safety of life at sea, protect our natural resources, and preserve the natural environment.

(3) The U.S. Coast Guard will be a leader in supporting the Nation's policy objectives and interests as outlined above and in reference (a). We will assert an active, layered, adaptive, fiscally responsible and scalable approach in meeting maritime safety, security, and stewardship requirements in the dynamic and challenging Arctic maritime domain.

(4) Although the U.S. Coast Guard will face complex and different operational challenges than experienced just a few years ago, we will aggressively work to overcome these challenges and operational gaps in a fiscally responsible manner. In doing so, the U.S. Coast Guard will build on the interlocking system of governance comprised of legal regimes, awareness, and operational capabilities outlined in reference (b). Similarly, we must meet the broad and fundamental national interests and tasks outlined in reference (a).

b. Arctic Strategic Focus.

(1) Maritime Safety, Security, and Stewardship: The core elements of our strategic approach to maritime safety, security and stewardship remain valid in the Arctic. However, the vast and harsh environment, lack of infrastructure, and current low levels of commercial maritime activity represent unique challenges in this regard. To overcome these challenges, we must work to build upon existing legal regimes, enhance our partnerships with key stakeholders,

such as tribal governments, enhance maritime domain awareness, and field an operational capability that is adaptive to the seasonal operational mission demands.

(a) Legal Regimes and Partnerships: Statutes, regulations, international agreements, conventions, and standards all establish the maritime rule set. As the Arctic maritime community continues to evolve, legal regimes required to ensure sound safety, security and stewardship will likely evolve as well. The U.S. Coast Guard will take a leadership role in ensuring proper maritime legal regimes are in place for the Arctic domain. In addition, the U.S. Coast Guard's extensive history of Arctic service that began in 1865 provides both experience and an expansive network of governmental, non-governmental, and private partnerships which we will leverage to meet the demands of the Arctic. The U.S. Coast Guard will make enhancing federal, state, local, tribal, and industry partnerships a priority. Strong partnerships and broad authorities are key to our leadership in a comprehensive approach to meet national policy objectives in the Arctic.

(b) MDA: It results from the full integration of situational awareness and intelligence. Greater awareness and effective understanding of maritime activity in the Arctic is required to promote safety, protect the environment, and respond to maritime incidents and threats. The U.S. Coast Guard will assert its leadership in developing an integrated MDA program that will fuse the expertise and input from our tribal, local, state, federal and industry partners and the myriad of informative sources available in the region.

(2) Mission Performance and Preparedness: The U.S. Coast Guard must build toward a level of mission performance and preparedness in the Arctic comparable to that of other maritime regions. This will require enhancement of our partnerships with other Arctic nations, industry, and state, local, tribal, and federal agencies. This phased approach will use available resources balanced against other national priorities. In doing so, we will be prepared for and conduct operations across a broad range of mission sets, including environmental response in the Arctic region.

(3) Capability: The U.S. Coast Guard must be prepared to respond to all threats, all hazards, and fully perform its mission responsibilities in the Arctic. We will work to develop the appropriate capabilities with sufficient capacity to execute our missions at an acceptable level of risk, and in a manner that is adaptive to the drastic changes in environmental conditions. It is important that we adopt an approach in the Arctic that leverages the capability of our federal, state, local, tribal and industry partners.

(a) Capability Partnerships: As public and private infrastructure is developed in the Arctic, it should be leveraged to build MDA, and where appropriate, operational capability. In concert with our international and interagency partners, state, local and tribal governments, and the private sector, the U.S. Coast Guard will be a leader in safeguarding the Arctic against all maritime threats and hazards, while meeting our national objectives, today and in the future.

(b) Technology: Recent advances in surveillance, navigation, and communications systems present the potential to eliminate the need for traditional, industrial-age marine transportation infrastructure, and at a fraction of the life-cycle cost. Not only can our Arctic partners benefit from technological advances to reduce costs and increase

effectiveness, but the U.S. Coast Guard can benefit as well. We will be a leader in leveraging technology to meet our mission demands.

(c) Right-sized Assets: There are few U.S. Coast Guard (or other federal) assets capable of operating in the harsh maritime environment of the Arctic. As new capabilities are developed, the U.S. Coast Guard will work to ensure its force structure is appropriately sized, trained, equipped, and postured to meet national Arctic mission and regulatory requirements as seasonal environmental conditions demand. As stated previously, this phased approach will be consistent with available resources and balanced with other national priorities.

6. ENVIRONMENTAL ASPECT AND IMPACT CONSIDERATIONS.

a. Environmental considerations under the National Environmental Policy Act (NEPA) of 1969 were examined in the development of this Instruction. This Instruction includes preparation of guidance documents that implement, without substantive change, the applicable Commandant Instruction or other Federal agency regulations, procedures, manuals, and other guidance documents. The policies contained in this Instruction provide a broad general plan for a U.S. Coast Guard strategy in the Arctic, which includes the guidance and direction for appropriate environmental planning and compliance with all applicable environmental laws. Because this Instruction contains specific guidance and direction, as appropriate, on completion of necessary environmental planning analysis under NEPA (which would ensure compliance with other environmental mandates), it is appropriate to categorically exclude the policy from further NEPA analysis. Specifically, Categorical Exclusion (CE) (33) as published in National Environmental Policy Act Implementing Procedures and Policy for Considering Environmental Impacts, COMDTINST M16475.1(series), and Figure 2-1 (reference (c)) is applicable. An Environmental Checklist and Categorical Exclusion Determination (CD) are not required for this CE.

b. However, additional NEPA analysis and documentation should be completed as appropriate for specific actions resulting from, or connected to, implementation of this policy. Any such actions should be assessed for potential environmental impacts under NEPA and the applicability of other environmental mandates and appropriate compliance completed, as necessary.

26 APR 2011

COMMANDANT INSTRUCTION 16003.1

Subj: U.S. COAST GUARD ARCTIC STRATEGIC APPROACH

Ref: (a) Arctic Region Policy, National Security Presidential Directive-66 / Homeland Security Presidential Directive-25 (NSPD-66/HSPD-25) dtd 09 Jan 2009
(b) U.S. Coast Guard Strategy for Maritime Safety, Security, and Stewardship
(c) National Environmental Policy Act Implementing Procedures and Policy for Considering Environmental Impacts, COMDTINST M16475.1(series)

1. PURPOSE. To promulgate the U.S. Coast Guard's strategic approach for mission execution in the Arctic[1] region.

2. ACTION. All U.S. Coast Guard unit commanders, commanding officers, officers-in-charge, deputy/assistant commandants, and chiefs of headquarters staff elements shall comply with the provisions of this Instruction. Internet release is authorized.

3. DIRECTIVES AFFECTED. None.

4. ARCTIC STRATEGIC VISION. As the Nation's lead agency for ensuring maritime safety, security, and stewardship, the U.S. Coast Guard will lead our nation's maritime engagement in the Arctic, and be a leader in advancement of U.S. national interests in the Arctic maritime domain. The U.S. Coast Guard must have the capability to perform the Service's statutory missions in the demanding Arctic maritime environment to ensure the Arctic remains a safe, secure, and environmentally sustainable region. The U.S. Coast Guard's Arctic strategy is founded on its

[1] A definition of the Arctic is contained in 15 USC § 4111. However, for the purposes of this Instruction, the Arctic region is defined as: "All United States and foreign territory north of the Arctic Circle and all United States territory north and west of the boundary formed by the Porcupine, Yukon, and Kuskokwim Rivers; all contiguous seas and straits north of and adjacent to the Arctic Circle, including the Arctic Ocean, the Bering, Chukchi, Beaufort, Greenland, Norwegian, Barents, Kara, Laptev, Lincoln, Wandel, and East Siberian seas, the Bering, Davis, Fram, and Denmark straits, the Canadian archipelago and Baffin Bay, and the Aleutian islands chain." This definition was agreed upon by U.S. Coast Guard and U.S. Navy in 2009 and is more inclusive of regions in which we may be called to operate.

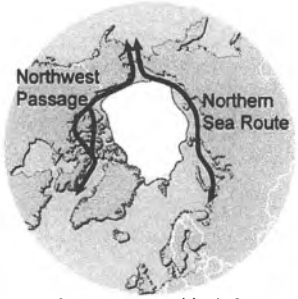
NON-STANDARD DISTRIBUTION:

Marine Transportation

Introduction

Within the next ten to twenty years, the loss of perennial sea ice is expected to open Arctic waters for a part of each year to new shipping routes. Maritime powers have been searching for a shorter route from the Atlantic to Asia for centuries. The melting Arctic raises the possibility of two such routes:

- The Northern Sea Route runs along Russia's northern border from Murmansk to Providenya and could be used for trade between northeast Asia and northern Europe.
- The Northwest Passage runs through the Canadian Arctic Islands and the Alaskan Arctic Ocean and could be used for trade between northeast Asia and North America.



Source: Hugo AhleniUS, UNEP/GRID- Arendol

The economic benefits of these new routes could be significant. Of the two sea lanes, the Northern Sea Route holds particular promise due to superior depth, summers freer of ice, and comparatively direct routing. Therefore, it is anticipated that this will be the preferred Arctic sea lane in the near future. Ships sailing between East Asia and Western Europe could save more than 40% in transportation time and fuel costs by navigating this route instead of the Suez Canal.

Currently, most Arctic marine traffic is destinational, delivering goods and supplies to the Arctic or transporting minerals out of the region. In 2006, it was estimated that some 6,000 vessels operated in or transited the Arctic in tourism, minerals mining, oil and gas exploration, military operations, and other activities. Today this number has reached more than 7,000, and many nations are actively building more ships designed to operate in Arctic waters. Notably, traffic related to eco-tourism is expanding rapidly in the region. In 2004, an estimated 1.2 million passengers visited the Arctic; by 2007 this number had doubled.

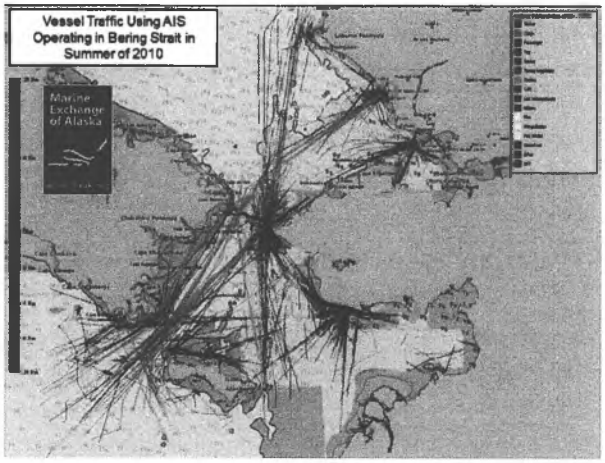
With increased shipping and marine traffic comes increased risk of vessel groundings, spills, collisions, pollutants, noise disturbances, and invasive species. This risk is particularly high due to the lack of detailed navigational charts, reliable weather forecasting, vessel traffic separation protocols, search and rescue infrastructure, and overall maritime domain awareness throughout the Arctic.

Based on these factors the ANWTF makes the following recommendations:

1. The ANWTF Recommends that the United States Work with the International Community to Finalize the Polar Code and Establish a Bering Strait Vessel Traffic Separation Scheme.

Maritime shipping is regulated through international treaties that establish standards for the safety and security of maritime operations. These standards are agreed upon through the International Maritime Organization (IMO), an agency of the United Nations.

Currently, ships navigating the Arctic are governed by the same requirements as any other open water ships. The IMO



Vessel Traffic in the Bering Strait Region during the summer of 2010 as depicted by the Marine Exchange of Alaska.

needs to finalize the Polar Code to supplement international maritime and environmental conventions that already apply in the Arctic. The Polar Code can provide additional requirements regarding rescue equipment, passenger safety, firefighting, ice navigation, and navigation in uninhabited areas. Additionally, the code can include requirements for ship construction, design, equipment, crew training, and operations. The IMO should also consider measures or regulatory frameworks to provide safety mechanisms for the regions of the central Arctic Ocean beyond coastal state jurisdiction.

The Polar Code is currently being drafted, and the rules are expected to be in force by 2014. The United States and Alaska should be actively involved in discussions with the IMO to ensure that Alaska's unique needs are met.

The United States and Russia need to begin a process with the IMO of establishing Bering Strait routing measures.

Clearly, all transient traffic in the future, regardless of the route taken, must transit the Bering Strait. This remote, narrow, and hazardous international strait is located in an environmentally sensitive area with little to no search and rescue or maritime disaster-response capability within 800 miles. Increased vessel traffic in the future will make this area particularly vulnerable to maritime disasters. It is only prudent that basic routing measures and vessel monitoring systems be put in place to reduce the risk of calamity in the Bering Strait.

2. The ANWTF Recommends the Establishment of Non-Tank Vessel Rules and Standards for Arctic Transit.

Today the most likely environmental threat to the Arctic is an incident involving a non-tank vessel. These are typically large commercial vessels with fuel tanks in excess of one million gallons of fuel and related hazardous cargos. These vessels make up the greatest percentage of transits, and they have proven over time to be the vessels most likely to experience an accident that puts them in jeopardy of sinking or running aground. Non-tank Vessel rules will require these vessels to meet more stringent standards of responsible-party requirements and allow government agencies to provide greater oversight.

Immediate implementation of the USCG Non-tank Vessel Response Plan (NTVRP) rules would advance development of a response capability as well as marine firefighting and salvage capacity in the Aleutians. This is critical in an area of the state that supports the largest commercial fishery in the country. This rule would require vessel response plans for non-tank vessels calling in U.S. ports. In combination with the tank vessel rule already in place, this rule would place the burden of providing sufficient salvage, firefighting, and response capabilities on all vessels passing through the Aleutians that call on U.S. ports. The requirement to comply with these rules would provide the necessary incentives for vessel owners/operators to fund increased salvage and spill response capabilities in the Aleutians. It may also be the means for financing an appropriate rescue tug for this economically and biologically important resource area.

3. The ANWTF Recommends that Navigational Charts and Other Aids to Navigation be Updated and Improved along with Vessel Tracking and Automatic Identification Systems (AIS).

For safe shipping, existing nautical charts for the Arctic need to be updated. In an effort to reduce the likelihood of accidents, an assessment of navigational needs should be undertaken to identify priority actions and target locations most likely to present hazards. Short and long range navigation aids will be needed, including buoys, iceberg and other sea-condition warning systems, high-risk-area vessel-traffic management systems, and improved communication technology.

Alaska currently has over 70 automatic identification stations that track vessels in Alaskan waters. The existing Automatic Identification System should be expanded across Alaskan northern waters beyond the Canadian border to Tuktoyuktuk. This should be a high priority. The current system—an international government/industry partnership—serves vital governmental and private sector needs by aiding safe, secure, efficient, and environmentally sound maritime operations. Expanding AIS will provide a clear record of transport across the U.S. Arctic waters, particularly for vessels servicing Canadian western Arctic communities or bound for transit through the Northwest Passage. AIS also provides emergency contact information, port data, locations of other vessels, and navigational information via the internet. Expanding the AIS network across the western Arctic will also allow for compliance under the International Maritime Organization Guidelines for Ships Operating in Polar Waters (Resolution A.1024(26)).

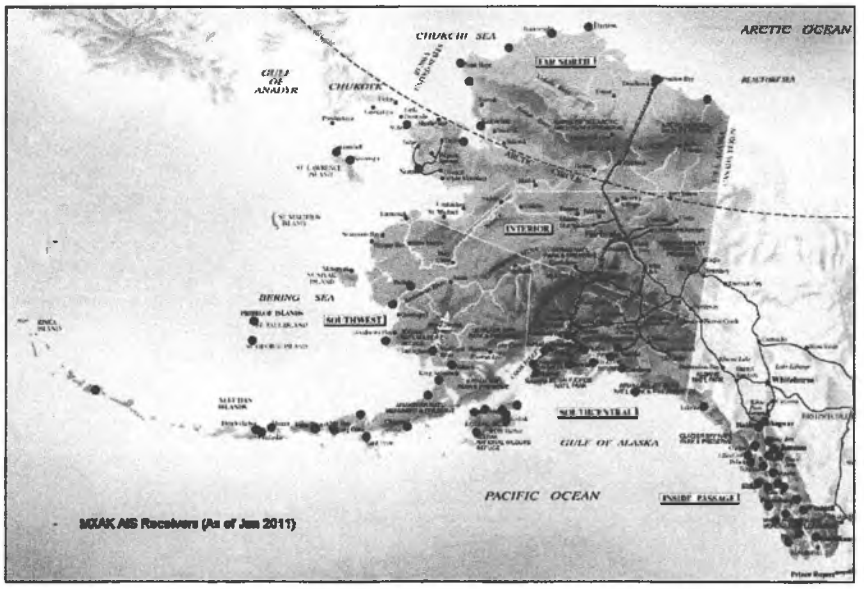
The Alaska State Legislature and the state of Alaska should continue to support the expansion of vessel tracking in the Arctic. The task force encourages the organizations and agencies involved in vessel tracking to pursue all channels of funding to increase their vessel tracking range.

4. Alaska Northern Waters Task Force Supports the National Oceanic and Atmospheric Administration's (NOAA) Hydrographic Arctic Mapping and Recommends that NOAA Also Include Detailed Near-Shore Bathymetric Mapping.

The ANWTF supports increased funding to expedite the mapping of the Arctic regions of Alaska, with particular support for updated mapping of coastal navigation routes and entrance routes to coastal villages.

The ANWTF concurs with the 2011 National Hydrographic Survey Priorities for Alaska. However, NOAA priorities for Alaska in the Bering Strait should be moved from priority two to priority one. The Bering Strait is the shipping choke point in Alaska's northern waters. It is imperative that up-to-date bathymetric information be provided for safe navigation. The ANWTF encourages the exchange of this information with the Russian government so that both governments have complete mapping of the entire strait.

The task force also supports NOAA's efforts to fund additional tidal observations to close the tidal data gap in accordance with the 2008 NOAA Network Gap Analysis for the National Water Level Observation Network. These increased observations will allow the joining of the digital mapping initiative vertical data with the Mean High Water and Mean Lower Low Water data that determine own-



Locations of the Marine Exchange of Alaska's AIS Receivers as of Jan 2011.

ership and jurisdiction of state, federal, Native, and private lands.

The ANWTF also encourages public release of bathymetric data collected by the U.S. Navy that would not threaten our national security, as well as public release of bathymetric data collected by private industry that would not threaten their proprietary economic interests.

5. The ANWTF Recommends that the Alaska State Legislature and the State of Alaska Continue to Support Maritime Training Centers in Alaska.

The need for trained and experienced mariners to operate in the Arctic is clear. The task force highly recommends the development of training programs throughout Alaska that can produce competent seafarers for safe operations in the Arctic. Specialized training—such as a USCG approved Ice Navigator curriculum that would implement the recommendations of the Arctic Marine Shipping Assessment and be consistent with the future requirements of the IMO Polar Code—is essential. In addition, qualifications, training, and experience standards for operation of icebreakers, arctic lightering operations, and high latitude navigation should be considered to ensure that increased maritime commerce in the Arctic is developed safely.

The ANWTF sees a real opportunity for Alaska to become the U.S. center of excellence in Arctic maritime training and seafarer development. Building on the state's strong university system, institutions such as the AVTEC Maritime Training Center, and practical training opportunities in Alaska's ice covered waters, this state is uniquely positioned to become an international leader in high latitude navigation safety training.

6. The ANWTF Supports Completion of the Aleutian Islands Risk Assessment; State of Alaska Participation in the U.S. Coast Guard Port Access Route Study; and Development of a Bering Strait Vessel Traffic Separation Scheme.

Aleutian Islands Risk Assessment

The Aleutian Islands Risk Assessment is a joint venture between the National Fish & Wildlife Foundation, the USCG, and the Alaska Department of Environmental Conservation. The project was organized in response to the grounding of the M/V Selendang Ayu in 2004 and the oil spill it caused. It is a multi-phase risk assessment of maritime transportation in the Bering Sea and the Aleutian Archipelago. Phase A of the Aleutian Island Risk Assessment has been completed.[1]

The study mainly focused on traffic following the great circle route through the Aleutian Islands and Bering Sea. The guiding principles applied to the analysis of risk reduction options were that prevention measures take priority over response measures and all measures should be realistic and practical.

The advisory panel assembled for the project developed recommendations for risk reduction options in two categories: those recommended for immediate implementation and those recommended for further study in Phase B of the assessment.

Options for immediate implementation include:

- Develop an enhanced vessel monitoring and reporting program;
- Enhance towing capabilities on USCG cutters, and increase cutter presence in the Aleutians;
- Stage additional emergency towing systems in the Aleutians.

1. The findings of the Aleutian Islands Risk Assessment can be found at http://aleutiansriskassessment.com/.

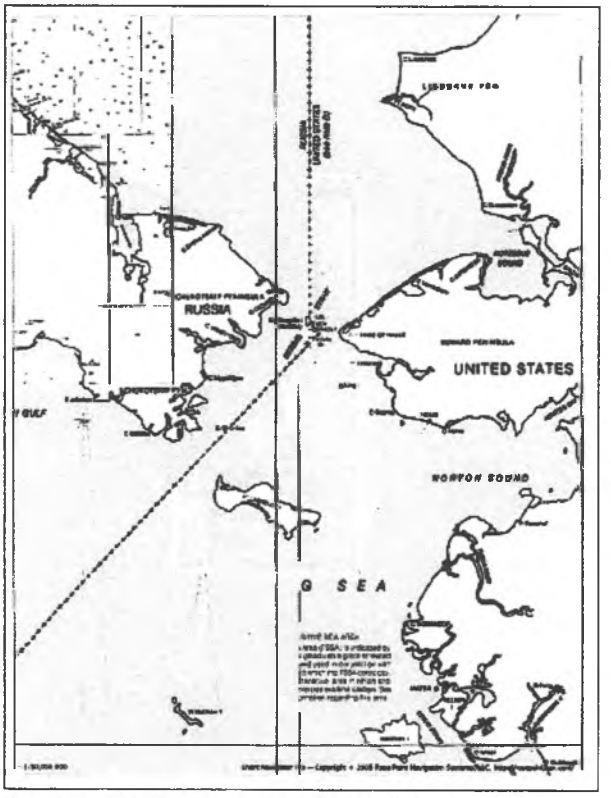
Options recommended for additional development or study in Phase B, prior to full implementation, include:

- Increase rescue tug capability in the Aleutians;
- Increase salvage and spill response capability in the Aleutians;
- Determine the boundaries of IMO Particularly Sensitive Sea Areas, and develop recommendations for associated protective measures;
- Strengthen the Aleutians Subarea Contingency Plan.

The ANWTF recommends that the risk assessment move forward with those risk reduction options that were identified by the advisory panel for immediate implementation. In addition, it is recommended that an additional risk reduction option be evaluated in Phase B of the project. A key consideration for reducing the risk of groundings and spills is offshore vessel routing for circumpolar traffic to provide timeframes for responding to disabled vessels. Offshore vessel routing has been successfully employed along the Pacific west coast and is a primary, cost-effective tool for reducing risk.

Bering Strait Port Access Route Study and Vessel Traffic Separation Scheme

The ANWTF recommends that the state of Alaska participate in and support the efforts of the USCG Port Access Route Study of the Bering Strait. Alaska should work with the USCG and Russia to bilaterally assess the risk of increased shipping through the Bering Strait and analyze the options for staging international assets to respond to that risk. The location of staging areas in Nome or other Alaska coastal locations should be considered for U.S. assets. Provideniya or other Russian coastal areas should be considered for Russian assets. This effort would contribute greatly to the development of any future IMO-led effort to establish internationally binding ship routing measures, such as a Bering Strait Vessel Traffic Separation Scheme.



The shaded region represents the Study Area for the USCG's Bering Strait Port Access Route Study as described in 75 FR 68568.

Planning and Infrastructure Investment

Introduction

A number of state initiatives are underway to look at the potential needs and feasibility of infrastructure projects in Alaska's Arctic region. These include the Alaska Department of Transportation and Public Facilities' (ADOTPF) Industrial Use Roads Study, several Arctic Ports studies, and similar work relating to possible land transportation links to Nome, Ambler, and the Umiat region.

Changes in temperature and precipitation are likely to hold enormous implications for both existing and future construction of all sorts. The ability to better predict and understand the effects of phenomena such as widespread thawing of permafrost will help Alaska prepare for considerable maintenance issues on existing roads, airports, buildings, and pipelines. Just as importantly, it will aid engineers when it comes to properly siting, designing, and constructing new infrastructure capable of withstanding future changes in their specific environments. These important concerns have also been examined in ADOTPF's "Impact of Climate Change on Alaska's Transportation Infrastructure."

These changes also pose significant challenges to some communities in Arctic coastal and riverine areas, most notably those located along the Bering and Chukchi Seas. A number of communities are threatened with increased rates of coastal erosion and flooding as a result of storm activity and battered shorelines once protected by shore-fast ice. These problems could become chronic as the climate warms, seasonal sea ice retreats, and destructive coastal storms become more frequent. These important concerns have been recognized in reports issued by the state of Alaska's Climate Change Subcabinet Immediate Action and Adaptation work groups.

Immediate investment in Arctic infrastructure is a foremost priority for Alaska and the entire United States. Alaska will need to explore ways to attract substantial sources of capital investment in addition to state and federal funding. Action is needed to enable the responsible development of resources; facilitate, secure, and benefit from new global transportation routes; and safeguard Arctic residents and ecosystems.

This investment will improve the safety, security, and reliability of transportation in the region—a goal established by the U.S. Arctic Policy signed by President Bush in 2009. As interest and activity in the Arctic continues to rise, America's preparedness in the region becomes ever more important to national security.

Increased human activity related to shipping, oil and gas development, commercial fishing, and tourism will require, at a minimum, new ports and safe harbors, equipment and facilities for oil spill response, additional Polar Class icebreakers for the U.S. fleet, and improved charting and mapping.

The U. S. Coast Guard's needs in these areas well illustrate the magnitude of infrastructure investment necessary in the Arctic. The Search & Rescue (SAR) agreement recently negotiated by the eight Arctic Nations through the Arctic Council commits the United States to search and rescue response in regions of the Arctic. Domestically, the National Contingency Plan requires the U.S. Coast Guard to oversee oil spill planning and preparedness in coastal waters and to supervise any oil spill response. Additionally, the U.S. Coast Guard's mission is to protect the public, the environment, and U.S. economic interests in the nation's ports and waterways, along the coast, on international waters, or in any maritime region as required for national security.[1]

At present, the Coast Guard has very limited Arctic emergency response capabilities and no permanent bases on Alaska's North Slope to support its operations. Basic needs there include communications, housing, and support facilities. It is especially notable that the Coast Guard has only one operational Polar Class icebreaker, the USCG Cutter Healy. Clearly, the Coast Guard does not have the assets required to carry out its expanding mission in the Arctic.

With transformation in the Arctic calling for a broad spectrum of new facilities on such a large scale, the state of Alaska must take an active role in regional planning efforts with communities and their stakeholders. This will help communities develop local strategies and ensure that the state is getting the most return on investment for local projects. Some communities may not have the resources to adequately prepare for the future, and the state should take this opportunity to help increase local capacity for the benefit of all Alaskans.

1. The ANWTF Recommends that the Alaska State Legislature Urge the United States to Forward Base the U.S. Coast Guard in the Arctic.

As human activity increases in Alaska's northernmost waters, the need to establish a Coast Guard base in the Arctic grows. The most northern Coast Guard base in the United States is in Kodiak, Alaska, more than 1,000 miles from pos-

1. The Coast Guard has 11 Statutory (non-discretionary) missions: Search and Rescue, Maritime Safety, Ports & Waterways Security, Drug Interdiction, Migrant Interdiction, National Defense, Living Marine Resources, Marine Environmental Protection, Aids to Navigation, Ice Operations, and Law Enforcement.

sible Chukchi Sea drilling sites and nearly as far from existing Arctic shipping lanes in the Bering Strait.[1] This distance causes untenable logistical problems that negatively impact response times and capabilities. The Coast Guard must have a greater overall presence in the Arctic, with the ability to stage assets closer to future shipping, oil and gas drilling, and commercial fishing activities.

The federal government should begin planning immediately to establish an Arctic base, and it must also move forward on interim measures for search and rescue and oil spill response in the region. The latter include working with communities to site required equipment at strategic locations, upgrading regional airports and associated storage facilities to enable efficient airlifting of assets, and increasing communications infrastructure.

2. The ANWTF Recommends that the Alaska State Legislature Urge the United States to Fund Icebreakers and Other Ice-capable Vessels.

At present, the United States has only one Polar Class icebreaker in service, the Coast Guard's Healy. A second Polar Class icebreaker, the Polar Star, is undergoing extensive repairs in Seattle and is not expected to return to service until 2013. Its sister ship, the Polar Sea, was decommissioned in 2011.

Meanwhile, Russia has a fleet of eight service-ready nuclear powered icebreakers, including an ice-breaking container ship. A ninth is under construction and will join their fleet in 2015. China owns the world's largest non-nuclear icebreaker and plans to launch a second by 2013. Canada has committed $38 billion to a 30-year plan to build additional icebreakers and other ice-strengthened ships suitable for Arctic service. Sweden, Finland, South Korea, and Japan are adding icebreakers to their fleets.[2]

The United States Coast Guard Cutter Healy is a medium strength vessel used most recently as a platform for scientific research. Its design is less suited to military missions. Congress has appropriated $60 million for repairs to the Polar Star. At this level of funding, its overhaul is estimated to provide for seven to ten years of additional service—the same length of time the Coast Guard estimates is required to design and construct a new Polar Class icebreaker, at a cost of about $860 million.

This limited number of icebreakers presents a major challenge to the Coast Guard mission in Alaska. Having ice-capable vessels is vital to maintain sovereignty, continue scientific research, and provide emergency and oil spill response. Overreliance on the Healy, which was not designed to meet all these challenges, poses risks for the United States and Alaska.

The ANWTF urges the state of Alaska to prevail upon the U.S. government to fund the construction of new heavy icebreakers and additional cutters for the U.S. Coast Guard. The Coast Guard is developing a long term vessel asset plan, but so far it has been unable to secure funding. It is expected that additional vessels will be required in support of oil spill response; these vessels must be capable of year-round Arctic operations. Immediate steps should be taken to begin construction of these assets.

Further, the ANWTF supports planning for other necessary facilities for search and rescue responsibilities, spill cleanup equipment and response vessels, and research. The Coast Guard needs this infrastructure to fulfill its mission.

3. The ANWTF Recommends that the Alaska State Legislature Support Search and Rescue Coordination Centers along the Coast to Assist Federal and State Responders.

The ANWTF supports search and rescue efforts at all levels—federal, state, and local. Because the USCG doesn't have an Arctic presence, local communities are often the first responders to an emergency.

The state of Alaska should coordinate planning with the USCG and local communities to develop strategies for increased search and rescue capabilities in the Arctic. Strategies may include purchase of equipment, training, and increased communications capability at the community level.

Other countries are already moving ahead with similar initiatives. Russia is currently in the process of building ten search and rescue centers along its Arctic coast line. Given the size of the Alaskan Arctic, effective local response will be critical. State planning should begin immediately.

4. The ANWTF Recommends Supporting the University of Alaska Fairbanks Scenarios Network for Alaska and Arctic Planning.

Scientists reviewing weather data for Alaska believe the state has been experiencing a warming trend with drier conditions in parts of the state. The ANWTF heard presentations on impacts this could have on Arctic communities and businesses. They include, among others, drier conditions in Interior Alaska resulting in more frequent and severe forest fires; species moving outside their historical ranges and perhaps displacing other species; changes in the active layer and permafrost in areas of the state resulting in loss of structural support and other adverse effects on roads and infrastructure; increase in the rate of coastal erosion in areas of

1. To put this distance into perspective, the distance between Kodiak and Barrow is about the distance between Los Angeles and Seattle.
2. For a list of ice breaker assets around the world go to: http://www.globalsecurity.org/military/world/icebreakers-list.htm

the state; and changes in hydrology including loss of surface ponds used for drinking water. It is important for state and local governments and industry to have a better understanding of possible future climatic conditions in the state when planning long-term infrastructure and critical services.

The University of Alaska Fairbanks formed the Scenarios Network for Alaska and Arctic Planning (SNAAP) to help decision makers understand possible future climate scenarios and their impacts in the state. SNAAP has developed data-driven models and scenarios for specific areas of the state that describe possible effects from longer-term changes in air temperature and precipitation. SNAAP has been working with other researchers to integrate down-scaled climatic models with terrestrial models to make predictions of landscape changes and the implications of such changes (melting permafrost, shifting and intensity of fire regimes, etc.) on the state's roads, airports, ports, pipelines, and rural communities. Both marine and terrestrial models should include predictions of impacts on resource development and related infrastructure. Such models would inform future infrastructure development and management.

The ANWTF recommends the state of Alaska support the work being done by SNAAP and encourages making this information, along with any important caveats on the limitations on such climatic predictions, available to state agencies, local governments, and the public to assist them in their long-term planning. The ANWTF believes this information could also be useful to agencies and organizations involved in setting standards for construction around the state.

5. The ANWTF Recommends Continuing the Analysis and Development of Ports and Safe Harbors in the Arctic Region.

Studies by the U.S. Coast Guard, the U.S. Navy, the Arctic Council, the U.S. Army Corps of Engineers, and the Alaska Department of Transportation and Public Facilities all identify the need to develop ports and harbors in Arctic Alaska. Given the long lead times for such construction, ports should be among the highest priorities for Arctic infrastructure.

Building on the findings of the 2008 and 2011 state/federal Alaska Regional Ports Workshops and the 2011 Arctic Ports Charette, the state of Alaska and the U.S. Army Corps of Engineers should continue analyzing options for deep- and medium-draft port and safe harbor construction in the Alaskan Arctic. The state should convene an industry-focused Alaska Arctic Ports Workshop to assess the pros and cons of alternative locations and types of ports, address environmental conditions and engineering approaches, and explore funding alternatives.

Locations to consider include:

- St. Paul Island in the Pribilof Islands. Here there is an existing harbor for the Central Bering Sea fishing fleet and fish processing facilities.
- St. Lawrence Island. There is no existing sea port on St. Lawrence.
- Nome/Teller. A medium-draft port exists at Nome. Considerations include expanding the Nome causeway, improving the Nome-Teller road, and developing a seasonal deep-draft port at Port Clarence Bay off Teller.
- Kotzebue/Cape Blossom. A shallow-draft port complex exists at Kotzebue. During the ice-free season, deep-draft freighters anchor 15 miles out to sea and cargo is lightered to port. Shallow-draft barges deliver cargo to area communities. Cape Blossom, across Kotzebue Sound, offers a potential deep-draft port site.
- Mekoryuk. Located on Nunivak Island, Mekoryuk has no boat harbor but does have moorage for small boats protected by a breakwater.
- Cape Thompson. Located on the Chukchi Sea about 26 miles southeast of Point Hope, Cape Thompson has previously been considered for a port site. It is located on a promontory with bulk rip-rap and aggregate potential and is broadly sheltered from the north by the spit of Point Hope. It has an old airstrip but is otherwise largely undeveloped.
- Wainwright. Wainwright is the nearest village to the Chukchi Sea OCS leases and is located on Wainwright Inlet, which is capable of sheltering shallow- to medium-draft vessels. It is located 90 miles west of Barrow. The city presently does not have a seaport.
- Point Franklin. Located between Wainwright and Barrow, Point Franklin and its adjacent barrier islands may serve as a shelter and possible port site for shallow- to medium-draft vessels.
- Barrow. With a population of more than 4000, Barrow boasts considerable infrastructure despite its remote location and is the geographic midpoint between the active exploration areas in the Beaufort and Chukchi Seas. Just east of Point Barrow is Eluitkaak Pass, which is the "notch" between the Barrow spit and the barrier islands of Elson Lagoon. Eluitkaak Pass is about 50 feet deep at its deepest, although it shallows at both ends toward the north and the south. Elson Lagoon, although shallow, is protected from the open ocean by barrier islands. At present there is no protected harbor at Barrow.
- Prudhoe Bay. Prudhoe Bay has been extensively developed for oil industry support. There is a causeway and dock system on the east and west sides of Prudhoe Bay that currently services the line-haul barges that transport drilling and production infrastructure to the North Slope. The community, made up almost entirely of oil industry

employees, is connected year-round to the North American road system by the Dalton Highway.

- Mary Sachs Entrance. This is a channel between barrier islands located about 60 miles north and east of Prudhoe Bay.

Plans for the development of deep-draft ports and improved safe harbors in northern waters should be intended also to improve access to inland resources in the region. Consideration should be given to the proximity of exploitable natural resources and access to them by navigable inland waterways or through the construction of railways or roads.

A key economic factor in the viability of developing natural resources in Alaska is the distance to an ocean port. Natural resources within 100 miles of a coast line typically have a higher probability of development due to shipping proximity. Development of resource transportation corridors to Arctic ports is critical for both shipping of product to market and for resupply of materials and equipment necessary for resource exploration, development, and extraction. Options for public-private partnerships (P3's) should be explored as a mechanism to capitalize development of the resource deposits and provide a return on investment to the state and private sector industries. Port planning for the Arctic should include a prioritized strategy for approaches to specific resource deposits and options for developing infrastructure to support exploration, development, and transportation of the resource.

6. The ANWTF Recommends the State of Alaska Consider Proposals to Expand Fiber Optic Cable Routes Across Northern Waters.

The retreat of sea ice and stability of the sea floor in the Arctic is creating interest in a potential fiber optic cable route from London to Tokyo via the Canadian Northwest Passage and Alaskan Arctic. Just as shipping routes are significantly shorter across the northern waters, so would be cable routes.

Linking Alaska's Arctic communities to trans-Arctic cable routes would bring many benefits. Increased communications will be needed in support of the Coast Guard's mission, including search and rescue and oil-spill response operations. Better communications are also required for the safe operations of ships transiting the region and offshore oil field development activities. At the same time, broadband links would enhance economic development and distance learning opportunities for Arctic communities.

The state should consider an assortment of strategies. In 2010, Kodiak Kenai Cable Company developed an international consortium for a Tokyo-London link with a landing at Prudhoe Bay. The company also proposed branches linking Kodiak with the more remote communities of Dutch Harbor, Nome, Kotzebue, and Barrow before rejoining the primary cable at the Prudhoe Bay landing. While this proposal was unsuccessful in obtaining funding, the effort produced valuable research, and the related Arctic Cable Company has now been formed.

On land, GCI's Terra SW has connected 65 coastal villages and communities in the Bristol Bay and Yukon-Kuskokwim Delta regions to a fiber optic/microwave network. GCI is exploring expanding the network to include the communities of northwest Alaska. On the North Slope of Alaska, the Arctic National Broadband Network initiative explored developing broadband capability between Barrow and Nuiqsut.

The state should continue to encourage fiber optic cable ventures that will include links to coastal hub communities and industry bases adjoining the northern waters.

7. The ANWTF Recommends that the State of Alaska Explore Models to Access Funding for Arctic Infrastructure.

As the state of Alaska determines its priorities for Arctic infrastructure projects, the Alaska Industrial Development and Export Authority (AIDEA) should begin examining which categories of projects are likely to meet its criteria for funding and which will need additional or wholly alternative sources.

The state should consult with financing and investment specialists to explore strategies to attract additional sources of capital to infrastructure priorities. Such considerations could include private sector investment as well as the creation of state, national, and international development corporations.

Representative Bob Herron
Alaska State Legislature
State Capitol Room 411
Juneau, AK 99801

Potential Changes to HJR34 (Coast Guard Icebreakers & Arctic Base)

Dear Representative Herron,

I am writing this as an Arctic policy researcher at UAF with experience as a U.S. Coast Guard officer and work within the Arctic Council. I have reviewed HJR34 and propose two, key changes to the Committee. One is a protocol issue and the second, removal of, or changes to, the final resolution statement in the draft text.

(A)-Protocol Issue ~ In the Draft HJR34, the Resolution is being sent to Senior Arctic Officials (SAOs) of the eight Arctic states. Since the Resolution is being sent to our Secretary of State, among many, it should also by protocol be sent to the seven Foreign Ministers who act as Arctic Ministers of their respective Arctic state. Sending the Resolution directly to the SAO's is inappropriate since they are the administrative agents for the Arctic Ministers doing the work of the Arctic Council. The Senior Arctic Official's are not the leaders of the Arctic Council as leadership of the Council is the responsibility of the eight Foreign Ministers of the Arctic states. I highly recommend the Alaska Legislature pass this Resolution to the Secretary of State and her seven colleagues, the Foreign Ministers of Canada, Denmark, Finland, Iceland, Norway, Sweden and Russia.

(B)-Further Resolved.... (Final Text) ~ I believe this passage should be removed as the overall sense of the resolution prior to this text is that the Congress and the Administration are to fund all federal (in this case Coast Guard) facilities and vessels. HJR34 should not specify how to execute this responsibility. This is the responsibility of the Congressional appropriators working in concert with the federal agencies. As for the charging for icebreaker escorts, most of these waters around Alaska allow for freedom of navigation (where no fees can be charged under international law); these waters are not the internal waters of the U.S. Charging fees for icebreaker escort in the Arctic is only conducted along Russia's Northern Sea Route; Canada does not charge fees (and never has) for escort by federal icebreakers in the Canadian Arctic. Both in the U.S. and Canada, under emergency situations, icebreakers will assist in escort (such as the recent Nome operation). I do not believe the Alaska State Legislature should have words in the Resolution regarding options involving the private sector, specifically leasing of future U.S. Coast Guard icebreakers (rather than fully funded by the Congress) or passing our current icebreakers to the private sector for commercial operation.

Statement for the Record
The Honorable Mead Treadwell
Lieutenant Governor
State of Alaska
Before the
United States House of Representatives
Committee Transportation on Transportation and Infrastructure
Subcommittee on Coast Guard and Maritime Transportation

"America is Missing the Boat"
December 1, 2011
Washington, D.C.

Introduction

Mr. Chairman, members of the Committee, Congressman Young, for the record, I am Mead Treadwell, the lieutenant governor of the State of Alaska. Thank you for inviting me to offer some views from Alaska about the future of Arctic shipping and maritime activities, and the need to ensure we are prepared to embrace those challenges and opportunities safely.

We've said it before – in my appearance before this Subcommittee in 2006 and in Governor Sean Parnell's Senate testimony in 2009,[1] and we'll say it again, because not much has changed: it is time for the nation to act – and act now – to add new polar class icebreakers to the United States Coast Guard's fleet. With so much happening in the North today, the need is more urgent and apparent than ever. We would like to ask this Committee, and by extension Congress and the Executive Branch, to look with us at the bigger picture – the historic changes happening in the Arctic and what they portend for world commerce and Alaska's shores – and recognize three imminent needs:

First, the United States must commission new heavy icebreakers to operate in the Arctic.

Second, we need legal measures in addition to icebreakers to protect our shores from the dangers of unregulated itinerant vessels carrying hazardous cargoes near our coasts.

And third, Congress and the Administration must fulfill the legal mandates that are already in place regarding icebreakers. These mandates reflect needs in commerce, science, and protection of Americans' sovereignty, safety, and security. The State of Alaska is responding to opportunities and risks associated with the historic changes in global shipping patterns resulting from changes in the Arctic Ocean. We are eager to continue in cooperation with the nation.

I. Congress needs to act now on icebreakers.
A. Other nations have already seen the big picture.

[1] Governor Sean Parnell made the case for icebreakers in the Arctic in his 2009 testimony before the Senate Subcommittee on Homeland Security Appropriations, stating, "The Coast Guard needs to move north and improve its capability – our heavy class icebreakers are on their last legs."

The purchase of Alaska in 1867 made America an Arctic nation, yet after 150 years, the myth of Seward's Folly still lingers. It's time to quit arguing whether investment in the North is worth it and recognize the valuable people, resources and location we gained as a nation.

Arctic resources include globally significant quantities of commercial fisheries, minerals, renewable energy sources, and world-class amounts of oil and gas. A 2008 U.S. Geological Survey estimates 13% of the world's undiscovered oil, and 23% of undiscovered gas lies in the Arctic. Six of the Arctic nations are already pursuing oil and gas development offshore, and energy may soon be the primary cargo transiting the Bering Strait.

America is one of only eight Arctic nations, and one of two with territory adjoining the Bering Strait – really a "Bering Gate," the only route from the Pacific to the Arctic.

Changes in the Arctic are creating opportunities in a once remote and harsh region. Ice cover is at historic minimums, and multi-year ice is decreasing. Icebreaking technology has advanced, bringing significant new efficiencies. Northern sea routes, sought by explorers for hundreds of years, are opening up.

Several sources report that international shipping of crude oil, refined products, and other potentially hazardous cargoes through the Bering Strait is growing rapidly as European and Asian shippers see the advantages of the Arctic route. Other Arctic – and even non-Arctic – nations have seen the potential, but America is missing the boat.

Most traffic occurs under arrangements for icebreaker escort by vessels working with Russia's Northern Sea Route Administration. We understand that last year, for the first time, Norway's Tschudi Shipping Company worked a partnership with Russian maritime authorities to bring 41,000 tons of iron ore from Kirkenes, Norway to China.

Again this year, Russian ships, and ships of other nations escorted by Russia's Northern Sea Route Administration, are coming in force. Hazardous cargoes are making the backhaul as well – at least one tanker bringing gas condensate to Asia this year is reported to have returned to Europe with aviation fuel.

In August of this year, Norway's *MV Nordic Barents* was the first non-Russian bulk cargo ship to transit the Northern Sea Route in Russian waters.

Other records are being set along the Northern Sea Route, from the *STI Heritage's* fastest-ever voyage from Murmansk to Thailand, transiting in just eight days, to the *Perseverance's* latest-ever northern voyage, which ended just two weeks ago on November 18. Altogether, the Northern Sea Route saw nine tankers carrying 600,000 tons of gas condensate pass by this year.

I joined an Arctic conference in Arkhangelsk, Russia in September, where Russia's Prime Minister Vladimir Putin told the Russian Geographical Society that his country sees the opportunities in the Arctic, and they are ready to pounce. Speaking of the Northern Sea Route at the Russian Geographical Society conference, Putin told us, "We are planning to turn it into a

key commercial route of global importance. … We see its future as an international transport artery capable of competing with traditional sea routes in cost of services, safety, and quality."[2] President Medvedev, dedicating a new northern rail project in Yakutsk – headed for the Bering Strait – indicated as much last month.

Russia intends to make the Northern Sea Route as important to global shipping and commerce as the Suez Canal.

And Russia is putting its money where its mouth is, building nine new icebreakers in the next decade, and discounting tariffs on icebreaker escorts to make sure that shippers find the Northern Sea Route for distance savings of up to 40 percent. Russia's claim to new extended continental shelf resources in the Arctic Ocean under the United Nations Convention on the Law of the Sea could give Russia greater control of Arctic shipping. Cargo moving through the Bering Strait this year – from Russian and American sources – is worth well over $1 billion. Add to that a Bering Sea fishery owned by both nations worth billions each year and the situation is clear: in monetary terms, there's billions to be made and billions to protect.

At the same Arkhangelsk conference, Russia's Academy of Sciences Vice President Nikolai Laverov showed a slide of Alaska's declining throughput in the Trans-Alaska Pipeline System (or TAPS) and Russia's competitive success in attracting Arctic investment. All Arctic energy production depends on access, and Russia has it. Russia is now in the lead in Arctic oil production – and they're keen to stay there.

Meanwhile, other Arctic and circumpolar nations are investing in fleets of icebreakers. The report of exactly how many ships are being operated by other countries varies (some count polar, medium and light icebreakers, as well as ice 'strengthened' or 'capable' vessels), but all the tallies make one thing clear: other nations have seen the writing on the wall and are investing in infrastructure. Sweden has at least four vessels; Finland, at least six; and Russia over two dozen (and counting). Canada has about eight, and even the European Union is constructing an icebreaker – a heavy, polar class icebreaker.[3]

Our Arctic neighbors are leaps and bounds ahead of our position, and non-Arctic nations are in hot pursuit.

A Chinese researcher, Mr. Li Zhenfu of Dalian Maritime University, writes that, "Whoever has control of the Arctic route will control the new passage of world economics and international strategies."[4] The prospect of commercial and strategic opportunities presented by receding sea ice cover and accessibility of Arctic resources has moved the Chinese government to allocate more resources for Arctic research, and they have asked to join the Arctic Council as an observer. China's Rear Admiral Yin Zhuo has asserted that no nation has sovereignty over the

Arctic, and said that China must plan to have an indispensable role in Arctic exploration as they have one-fifth of the world's population.[5]

Japan has stepped up its research in global environment, climate and marine science in the Arctic. And with China and Korea, Japan has applied for permanent observer status on the Arctic Council.

Polar air routes have characterized the jet age since the late 1950s, and Arctic air transport is now key to air cargo bound between North America or Europe and Asia. Governments and industries in Russia, Europe and Asia see the same potential for shipping. Why don't we?

B. Our national mandates are not being met.

The irony of America's present situation is painful: a staggering national debt weighs on the future of our children, while the contributions of a promising and abundant region go largely unnoticed. When we ask you for icebreakers, it's for safety, security, and American jobs. It's to serve American shipping, American exports. It's to help lower costs for Americans in regions like Western Alaska, which has a higher cost of living than anyplace in the nation. Americans lack jobs, our industries struggle with the cost of doing business, and rural Alaskans suffer the staggering cost of energy, while huge amounts of foreign energy are beginning to pass by our front door in tankers, taking advantage of game-changing shipping opportunities.

The United States is falling behind in maintaining an Arctic presence and in helping to set best practices as this region sees increasing international resource development and shipping. But more importantly, we are failing in our own national mandates, goals and policy.

In 1936, President Franklin Roosevelt issued Executive Order 7521, directing the Coast Guard, under the direction of the Secretary of the Treasury and with the cooperation of the Secretaries of War (Army), the Navy, and Commerce, to keep channels and harbors open to navigation by means of icebreaking operations. That order has never been implemented in the Arctic.

The Arctic Research and Policy Act of 1984 recognized that the United States was lagging behind other circumpolar nations even then, and it directs the Office of Management and Budget to "seek to facilitate planning for the design, procurement, maintenance, deployment and operations of icebreakers needed to provide a platform for Arctic research by allocating all funds necessary to support icebreaking operations, except for recurring incremental costs associated with specific projects, to the Coast Guard."

Last year's Coast Guard Authorization Act of 2010, section 307, implements the Arctic Marine Shipping Assessment (AMSA), mandating that the Coast Guard "shall promote safe maritime navigation by means of icebreaking where necessary, feasible, and effective..." That makes

President Roosevelt's order the law of the land for the entire nation. We welcome this mandate as Alaska has half the nation's coastline, and likely over half of America's ice.

That act also required that a report on the comparative cost-benefit analyses of icebreaker renovation or construction be delivered no later than October 15 of this year to the Senate Committee on Commerce, Science and Transportation, and the House Committee on Transportation and Infrastructure. It moreover required a report from the Commandant of the Coast Guard on the High-Latitude Study assessing the polar icebreaking requirements for Coast Guard missions, including search and rescue, marine pollution response and prevention, fisheries enforcement, and maritime commerce. We understand that full report is embargoed still by President Obama's administration.

This past spring, the President updated the United States military's Unified Command Plan to give U.S. Northern Command advocacy responsibility for Arctic capabilities. Accompanying shifts of UCP geographic boundaries mark the military's awareness of the vital and ever-growing importance of the Arctic. Then Commander of the Northern Command, U.S. Navy Admiral James Winnefeld, Jr., recognized the implications of the changing Arctic, and noted the gaps faced by the military, including infrastructure and mobility, and search and rescue capabilities.[6] General Charles Jacoby, his successor, formerly ran the U.S. Army in Alaska. He, too, knows our challenges.

Around the same time as this spring's announcement, a report by the National Research Council on the implications of climate change on national security cited major gaps in U.S. naval forces' ability to perform their missions in the Arctic.[7] That report advised that the U.S. Navy, Marine Corps and Coast Guard take action to ready themselves for Arctic conditions. The protection of our domestic security is the fundamental mandate of the U.S. Armed Forces, and it is threatened if we remain unprepared.

This year, in response to the recommendations of AMSA, the eight Arctic Council nations signed a binding Search and Rescue Agreement. Alaska supported this, and sent experts to the first multinational exercise conducted under this agreement in October in Whitehorse, Yukon Territory. Without icebreakers and other Arctic USCG assets, major deficiencies in the region's life safety response capabilities exist – and our promise to provide search and rescue in our sector of the Arctic is compromised.

Finally, the United States Congress, in the 2010 Coast Guard Authorization Act, charged the Committee on Marine Transportation Services (CMTS) to develop an integrated Arctic shipping regime, and to coordinate the establishment of domestic transportation policy to realize the goal set by President George W. Bush of safe, secure and reliable shipping in the Arctic. The AMSA Implementation Act, additionally, encourages the Coast Guard to negotiate agreements with

other Arctic nations through the International Maritime Organization. Those agreements would focus on aids to navigation; marine safety, tug, and salvage capabilities; oil spill prevention and response capability; maritime domain awareness (including long-range vessel tracking); and search and rescue.

The United States has been protecting our sovereign airspace along Alaska's shores for over 50 years. The United States Coast Guard has been protecting America's coast for over 200 years. Why don't we protect our sovereign waters along Alaska's Arctic coast with the same vigor?

America has a duty to protect its citizens in coastal communities and to safeguard their way of life. Coastal Alaskans have spent thousands of years relying on the sea for their food and clothing, for the heat they create from whale oil and the shelter they derive from driftwood. The majority of Alaska Natives in the North get more than half of their meat and fish from wild, local harvests. Sixty percent of those wild harvests are from marine mammals. It is imperative we ensure that the increasing foreign ship traffic off our shores does not jeopardize the freedom of Americans to maintain a subsistence lifestyle.

Mr. Chairman, the United States has a long history of national mandates and policy that require our action. And yet we fail to act on them. Moreover, the recent decision of the U.S. House of Representatives to retire the nation's only heavy icebreaking ships without replacements is a disappointment. But to the extent that the all-or-nothing approach forces a legitimate conversation about the need for icebreakers and an opportunity to spotlight the conversation – I applaud the decision.

We should, however, be cautious about the risky "game of chicken." If it fails, it fails Americans – and Alaskans most of all.

C. The savings and benefits outweigh the costs.

We understand that the action we are asking Congress to take will require significant funds. We understand the costs, but we cannot ignore our obligations or the major opportunities we face.

In a conference recently in Juneau, University of Alaska Professor Dr. Lawson Brigham, a former USCG icebreaker captain, noted that the U.S. Navy is building 47 Littoral Combat Ships at a price of $400-500 million each. He asked, why not consider building 45 of these ships, and allocating that other $800 million to $1 billion in the budget for the Coast Guard to build one major polar icebreaker?

Some have argued we should charge for icebreaker escort services as other nations do. Ship owners pay for services in the Panama and Suez Canals. U.S. vessels pay for oil spill preparedness and insurance. A bill pending in this Congress would have the U.S. lease, rather than own, icebreakers it needs in the Arctic. Long term charter agreements are in place in the Antarctic, and it has been argued that private contractors are able to build icebreakers more quickly and less expensively, operate them more efficiently in terms of cost and maintenance, and would bear the expense of decommissioning. This is worthy of consideration if it moves us forward faster in the Arctic.

However we work out our finances, America and its trading partners could reap huge economic benefits from accessing northern sea routes. Former U.S. Coast Guard Lieutenant Commander Scott Borgerson wrote nearly four years ago about the financial advantages available to world commerce through Arctic shipping.[8] He told us how plying the Northern Sea Route from Rotterdam to Yokohama instead of traveling via the Suez Canal would yield distance savings of more than 40 percent. He told us that one container ship voyage from Seattle to Rotterdam via the Northwest Passage instead of the Panama Canal could save about 20 percent of its costs – then about $3.5 million dollars.

Borgerson envisioned a future of global Arctic shipping where "a marine highway directly over the North Pole will materialize. Such a route," he wrote, "which would most likely run between Iceland and Alaska's Dutch Harbor, would connect shipping megaports in the North Atlantic with those in the North Pacific and radiate outward to other ports in a hub-and-spoke system."

As the Arctic Marine Shipping Assessment predicted, most Arctic shipping traffic today is destinational, carrying resources out from or products in to Arctic regions. But we need to envision a time, coming soon, when products travelling to and from non-Arctic ports traverse our Arctic Ocean and Bering Sea – and we need to be ready.

II. Our lack of legal protection.

I want to make sure Congress understands there are now two classes of ships operating in the Bering Strait region – those that are under contingency planning requirements for oil spills, and those that are not. U.S. vessels are highly regulated: by NOAA, by EPA air quality controls, by the Interior Department's BOEM and BSEE oversight of exploration – in fact, over 120 federal laws regulate the use of the coastal zone and offshore areas. But ships originating outside the U.S. – such as those traveling between Russia or Europe and Asia, are not even required to have a spill contingency plan, even though they pass by hundreds of miles of U.S. coastline. We face the prospect of increasing international ship traffic through the Bering Strait – carrying anything from crude oil to aviation fuel – with minimal requirements to prepare for oil spills, maintain air quality, or care for wildlife and subsistence needs.[9]

Icebreakers can help us reduce the risks brought about by that disparity. If we are to achieve our policy of advancing safe, secure and reliable shipping as the Arctic Ocean becomes more accessible, the U.S. must operate new polar class icebreakers. Without them, little or no appropriate government capability exists to enforce prevention measures or to respond to a spill in this region. It is folly to rely on aircraft and submarines alone to protect U.S. interests. We learned that tragic lesson when we lost six lives as a helicopter crashed trying to evacuate crew from the shipwrecked *Selendang Ayu* in 2004.

---

[8] Borgerson, Scott G. "Arctic Meltdown: the Economic and Security Implications of Global Warming." *Foreign Affairs*, vol. 87, no. 2.

[9] The State of Alaska has sought remedies to this situation in its comments on the USCG Port Access Route Study for the Bering Strait.

There are a range of legal ways and international agreements we might pursue to require safety measures from itinerant vessels transiting the Bering Strait. (None are quick or easy solutions, but measures that protect our national security rarely are.)

- Working on a vessel routing system to prevent collisions and groundings from increased shipping, following protocols of the International Maritime Organization, and coordinating with the Russian Federation. The State of Alaska provided comments to the USCG's Port Access Route Study for the Bering Strait regarding this approach.

- Having all Arctic nations seek ship owners' participation in an Oil Spill Response Organization with a contingency plan, perhaps as part of the upcoming Arctic Council Oil Spill Preparedness and Response Agreement. Alaska has joined U.S. delegations negotiating this agreement.

- Resolving the debate on Law of the Sea, and ratifying the Law of the Sea Treaty, which with Article 234 authorizes the extension of environmental law in traditionally ice-covered areas. As the debate on ratification continues, the State has asked for clarification of U.S. intent in implementing Article 234.

- Using existing authority in the Oil Pollution Act of 1990 to cover nontank vessels and working a reciprocal deal with Russia and Canada. The Final Rule on Nontank Vessel Response Plans and Other Vessel Response Plan Requirements Regulations is still under development within the Coast Guard and the Department of Homeland Security. Section 701 of the Coast Guard Authorization Act of 2010 directs that this final rule be issued no later than April 15, 2012.

- Forming an agreement with Canada and/or Russia similar to the 1817 Rush-Bagot Agreement, creating a mechanism like that of the St. Lawrence Seaway Development Corporation, whereby Arctic nations establish a shipping authority that administers the route, provides compliance, icebreaking, and other aids to navigation, including spill preparedness and response. (Borgerson also suggested this in his 2008 article, "Arctic Meltdown".)

III. How Alaska is helping America live up to the promise of the Arctic.

Mr. Chairman, Congress spoke last year in the Coast Guard Authorization Act of 2010 and AMSA Implementation, and charged the Committee on Marine Transportation System with this mission: to coordinate the establishment of domestic transportation policy to ensure safe and secure maritime shipping in the Arctic. I would like to say for the record now that as these processes get underway, we need to be ambitious, creative, and determined. The United States must acknowledge its responsibilities and embrace new possibilities. The Arctic needs resources, not just rules. What's happening in the Arctic Ocean and along northern sea routes has global, historic and exciting significance, and we need to take an active role. We must plan for an Arctic shipping future that could be like a new Suez Canal.

In a visit to D.C. last month, I briefed the leaders of CMTS in some activities the State of Alaska is conducting to help America move toward the new world of Arctic shipping, and how we are bringing resources to the table to help to achieve safety, create jobs, and spur exports of goods and services. We are hopeful the CMTS will mesh with the outcome of our current work with the Arctic Council, the International Maritime Organization, and the U.S. Coast Guard and Army Corps of Engineers, and Alaska's Northern Waters Task Force.

Below is a non-comprehensive list of these activities:

- **Arctic Council:** The State of Alaska actively supports the United States' work within the Arctic Council, and I serve as our state's liaison on Council issues. As we support the Council's work to implement recommendations of the 2009 AMSA, the State is active in implementing the Arctic Council's aforementioned Search and Rescue Agreement, signed at the Ministerial in Greenland this past May. We are likewise a participant in the Council's oil spill response instrument negotiations. In addition, through the Pacific Northwest Economic Region (PNWER), Alaska is bringing resources and support for the Arctic Council Sustainable Development Working Group's proposed aviation and maritime infrastructure project, which will survey the region's infrastructure needs.

- **USARC/Research programs:** Alaska is also deeply involved in Arctic research. I work closely with the U.S. Arctic Research Commission (USARC), which I chaired under Presidents Bush and Obama from 2006-2010, and served on from 2001-2010 as a Commissioner, and which is currently chaired by Ms. Fran Ulmer, former lieutenant governor of Alaska and former chancellor of the University of Alaska Anchorage. Our University is currently working hard to launch the newest ice-strengthened research vessel, the Sikuliaq (see KOO lee auk), in the nation's NSF-sponsored UNOLS fleet. Moreover, with the University vice president, I co-chair a State Committee on Research which is writing a research and development plan that assesses Alaska's research and development needs for our economy, health, safety, environment, and culture. Alaska researchers play a major role in our understanding of Arctic change and Arctic resources, Arctic engineering and methods of spill response in ice-covered waters.

- **USCG forward basing:** In Alaska we are supporting the U.S. Coast Guard's efforts to bring forward basing to Alaska's North Coast, and we're examining ways we can help provide hangars for fixed and rotary wing aircraft in Barrow and Nome. The Alaska National Guard air-refuelable helicopters and aircraft, as well as helicopters of the North Slope Borough, are America's front-line for search and rescue in the Arctic Ocean today – Coast Guard response is based much further away.

- **New and improved ports:** The State of Alaska has also joined with the U.S. Army Corps of Engineers to conduct a port study for western and northern Alaska. Our intent after the study is to foster investment to establish a deep water port in Western Alaska to serve as a port of refuge for Coast Guard vessels and itinerant traffic. The port would also meet the needs of large vessels, including fishing fleets, and resource export vessels. At the same time, we see a need to upgrade the minimal port facilities which now exist for cargo import and export in a range of Western Alaska communities.

- **Shuttle container shipping:** In 2006, the State of Alaska committed $50,000 for the first pre-feasibility study on transarctic container shipping, looking at the economics and logistics of trans-shipping containers from North America and Asia between Aleutian and Icelandic ports, thus tying North Atlantic and North Pacific shipping together through the Arctic. The results of the study are promising.[10] Recently, we have heard interest to look at this again from Aleutian, Asian and European ports that would send and receive cargo in such a system. One option to consider as we proceed would be to include this work under the Arctic Council's proposed Arctic Maritime and Aviation Transportation Infrastructure Initiative.

- **Early warning system:** The State is a major financial sponsor of the Automatic Identification System receiver network established by the Marine Exchange of Alaska, which now covers all traffic operating in the Arctic region, approaching or leaving the Bering Strait and the Aleutian Archipelago. The network provides location data and advanced warning to the U.S. Coast Guard and state emergency responders of all ships approaching state waters, and gives us – and communities – a heads-up on traffic, including stalled itinerant vessels that might be headed for a shipwreck.

- **Review of new regimes for shipping administration:** Last year, Alaska's State Legislature created the Northern Waters Task Force (NWTF).[11] This task force is charged with examining the effects of changes in the Arctic on shipping, energy and local industry and making recommendations on infrastructure and regulatory needs, mitigation strategies, and ways for the State to be involved in governance of Arctic shipping. NWTF will present their report to the Legislature in January of 2012. Early discussions indicate that international cooperation and investment in oil spill response capabilities will be among the measures recommended.

Conclusion

Mr. Chairman, members of the Committee, Alaska has and will continue to work hard on Arctic policy because we are America's Arctic – it's our home, our history, our heritage and our future. And we work hard with high hopes for outcomes.

But we ask for the U.S. to work hard with us. To reiterate, Mr. Chairman, we ask for three things.

First, we need icebreakers. Without action on this, America is putting its national security on the line, and we are going to miss the opportunities of the Arctic while watching other nations advance. Good policy only goes so far without the infrastructure to act upon it. We have mandated icebreakers more than once. We're missing the boat. Let's build them.

---

[10] Niini, M., M. Arpiainen, and R. Kiili. *Arctic shuttle container link from Alaska, US to Europe*. Report AARC K-63. Aker Arctic Technology Inc., Mar. 2006.

[11] Alaska State Legislature, HCR 22, Legislative Resolve No. 54 (2010), Establishing and relating to the Alaska Northern Waters Task Force. Available online: http://housemajority.org/coms/anw/pdfs/26/Scan001.pdf.

Second, while we wait for new icebreakers, we need to take legal action to protect our coasts and prevent spills in the Arctic and Aleutians. We made this clear in our comments to the U.S. Coast Guard's Port Access Route study, and we urge the U.S. to step up the pace.

And third, the federal and state governments need to continue working together through the CMTS and Arctic Council processes to ensure that America does not miss out on the historic, game-changing opportunities in Arctic shipping. Arctic shipping presents safety challenges for sure. But for America, it is an opportunity, and one that could pass us by.

Alaska encourages America's new shipping policy to be ambitious. It should keep us safe, create jobs, help improve the quality of life in Western Alaska, and generate goods and service exports, as polar aviation does today. We need to grasp the historic opportunities of the changing Arctic. America has been an Arctic nation for 150 years. It's time we started acting like it.

Thank you.

FROM USCG AUTH. ACT OF 2010

SEC. 307. ARCTIC MARINE SHIPPING ASSESSMENT IMPLEMENTATION.

(a) Purpose- The purpose of this section is to ensure safe and secure maritime shipping in the Arctic including the availability of aids to navigation, vessel escorts, spill response capability, and maritime search and rescue in the Arctic.

(b) International Maritime Organization Agreements- To carry out the purpose of this section, the Secretary of the department in which the Coast Guard is operating is encouraged to enter into negotiations through the International Maritime Organization to conclude and execute agreements to promote coordinated action among the United States, Russia, Canada, Iceland, Norway, and Denmark and other seafaring and Arctic nations to ensure, in the Arctic--

(1) placement and maintenance of aids to navigation;
(2) appropriate marine safety, tug, and salvage capabilities;
(3) oil spill prevention and response capability;
(4) maritime domain awareness, including long-range vessel tracking; and
(5) search and rescue.

(c) Coordination by Committee on the Maritime Transportation System- The Committee on the Maritime Transportation System established under a directive of the President in the Ocean Action Plan, issued December 17, 2004, shall coordinate the establishment of domestic transportation policies in the Arctic necessary to carry out the purpose of this section.

(d) Agreements and Contracts- The Secretary of the department in which the Coast Guard is operating may, subject to the availability of appropriations, enter into cooperative agreements, contracts, or other agreements with, or make grants to individuals and governments to carry out the purpose of this section or any agreements established under subsection (b).

(e) Icebreaking- The Secretary of the department in which the Coast Guard is operating shall promote safe maritime navigation by means of icebreaking where necessary, feasible, and effective to carry out the purposes of this section.

(f) Independent Ice Breaker Analyses-

(1) IN GENERAL- Not later than 90 days after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall require a nongovernmental, independent third party (other than the National Academy of Sciences) that has extensive experience in the analysis of military procurements, to--

(A) conduct a comparative cost-benefit analysis, taking into account future Coast Guard budget projections (which assume Coast Guard budget growth of no more than inflation) and other recapitalization needs, of--

(i) rebuilding, renovating, or improving the existing fleet of polar icebreakers for operation by the Coast Guard;

(ii) constructing new polar icebreakers for operation by the Coast Guard;

(iii) construction of new polar icebreakers by the National Science Foundation for operation by the Foundation;

(iv) rebuilding, renovating, or improving the existing fleet of polar icebreakers by the National Science Foundation for operation by the Foundation; and

(v) any combination of the activities described in clause (i), (ii), (iii), or (iv) to carry out the missions of the Coast Guard and the National Science Foundation; and

(B) conduct a comprehensive analysis of the impact on all Coast Guard activities, including operations, maintenance, procurements, and end strength, of the acquisition of polar icebreakers described in subparagraph (A) by the Coast Guard or the National Science Foundation assuming that total Coast Guard funding will not increase more than the annual rate of inflation.

(2) REPORT- Not later than 1 year after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall submit a report containing the results of the analyses required under paragraph (1), together with recommendations the Commandant considers appropriate under section 93(a)(24) of title 14, United States Code, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives.

(g) High-Latitude Study- Not later than 90 days after the date of enactment of this Act or the date of completion of the ongoing High-Latitude Study to assess polar icebreaking mission requirements for all Coast Guard missions including search and rescue, marine pollution response and prevention, fisheries enforcement, and maritime commerce, whichever occurs later, the Commandant of the Coast Guard shall submit a report containing the results of the study, together with recommendations the Commandant considers appropriate under section 93(a)(24) of title 14, United States Code, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives.

(h) Arctic Definition- In this section the term 'Arctic' has the same meaning as in section 112 of the Arctic Research and Policy Act of 1984 (15 U.S.C. 4111).
