FISCAL NOTE ANALYSIS

STATE OF ALASKA
2013 LEGISLATIVE SESSION

BILL NO. CSHB 22

Analysis

HB 22 extends the termination date of the Board of Marine Pilots through June 30, 2019 and takes effect immediately upon passage. This board will terminate June 30, 2013 under current law. In accordance with AS 08.03.020 the Board of Marine Pilot will have one year to conclude their business affairs after the date of termination. Licensing and program authority transfer to DCCED if the board is terminated.

Personal Services costs include a full-time Marine Pilot Coordinator.

Travel expenses represent transportation and per diem for the seven member board and staff to meeting in accordance with AS 08.62.030.

Services include contractual obligations, support costs, legal and other necessary services.

Commodities include small equipment and business supplies.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated from board fees are anticipated to cover its full operating costs.

Sponsor Statement: House Bill 22

Extension of the Board of Marine Pilots

The State of Alaska requires almost all foreign vessels and vessels over a certain size to take on a marine pilot when they enter or travel in state waters. The requirement of marine pilots is a common historical and current practice worldwide. Pilots' knowledge of the local geography and waterways they are piloting makes them invaluable to the vessels. Pilots are responsible for the safety of those aboard a vessel and for the protection of the marine environment.

The Board of Marine Pilots benefits the public's safety and welfare by licensing and regulating marine pilots. The board provides reasonable assurance that the pilots are competent and qualified to pilot passenger and cargo ships in Alaskan waters.

In accordance with Title 24 and 44 of the Alaska Statutes, Legislative Budget and Audit has reviewed the activities of the Board of Marine Pilots. They have determined that there is a demonstrated public need for the board, and that the board has been operating in an efficient and effective manner.

House Bill 22 extends the termination date of the Board of Marine Pilots to June 30, 2018.

Division of Legislative Audit

Report Digest #08-20076-13

* Requires Acrobat Reader

SUMMARY OF: A Sunset Review on the Department of Commerce, Community, and Economic Development, Board of Marine Pilots (BMP or board), November 5, 2012

PURPOSE OF THE REPORT

In accordance with Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed BMP's activities. The purpose of this audit was to determine if there is a demonstrated public need for the board's continued existence and if the board has been operating in an effective manner. This audit also addresses the recommendations made in the prior sunset audit. As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether the board should be reestablished. Currently, under AS 08.03.010(c)(10), BMP will terminate on June 30, 2013, and will have one year from that date to conclude its administrative operations.

REPORT CONCLUSIONS

We conclude that BMP's termination date should be extended. Regulating and licensing qualified marine pilots benefits the public's safety and welfare, and protects the marine environment. The board provides reasonable assurance that individuals licensed to pilot passenger and cargo ships in Alaskan waters are qualified. We recommend that the board's termination date be extended to June 30, 2019.

The board has successfully resolved many of the issues identified in the prior sunset audit. This report makes one new recommendation to improve BMP operational activities.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The marine pilot coordinator should improve administration of BMP operational activities.

While the board has successfully resolved many of the issues identified in the prior sunset audit, current analysis of BMP operational activities showed administrative deficiencies regarding public meeting notifications, licensing documentation, and oversight of the pilot associations' drug and alcohol programs.

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities and the attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY,
AND ECONOMIC DEVELOPMENT
BOARD OF MARINE PILOTS
SUNSET REVIEW

November 5, 2012

Audit Control Number
08-20076-13

The audit was conducted as required by AS 44.66.050 and under the authority of AS 24.20.271(1). Alaska Statute 44.66.050(c) lists the criteria to be used to assess the demonstrated public need for a given board, commission, agency, or program subject to the sunset review process. Per AS 08.03.010(c)(10), the Board of Marine Pilots (board) is scheduled to terminate on June 30, 2013.

In our opinion, the termination date for this board should be extended. Regulating and licensing qualified marine pilots benefits the public's safety and welfare, and protects the marine environment. We recommend the legislature extend the termination date to June 30, 2019.

This audit was conducted in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in

the course of developing the findings and recommendations presented in this report are discussed in the Objectives, Scope, and Methodology.

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Title 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Board of Marine Pilots (BMP or board) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether the board should be reestablished. Per AS 08.03.010(c)(10), the board will terminate on June 30, 2013, and have one year from that date to conclude its administrative operations.

Objectives

The four, central audit objectives were to:

1. Determine if the board's termination date should be extended.
2. Determine if the board is operating in the public's interest.
3. Determine if the board has exercised appropriate regulatory oversight of licensed marine pilots.
4. Provide the current status of recommendations made in the prior sunset audit report.

Scope and Methodology

The assessment of BMP's operations and performance was based on criteria set in AS 44.66.050(c). Criteria set out in this statute relates to the determination of a demonstrated public need for the board.

The audit examined the board's operations and activities from July 1, 2006, through June 30, 2012.

During the course of the audit, the following was examined:

- Applicable statutes and regulations to identify board functions and responsibilities. Changes to BMP regulations were reviewed to provide information on improvements to public safety and protection of the marine environment.
- Board members' applications and resumes filed with the Office of the Governor to verify that members met statutory requirements.
- Board meeting minutes, budget documents, and annual reports to understand board proceedings and activities as well as the nature and extent of public input.

- Public notice documentation to ascertain whether public notice for board meetings was published as required by statute and division policy.
- BMP's website for public notifications and information availability.
- Licensing files and documentation for a sample of pilots who obtained new and renewed licenses issued by BMP to ensure licensees met statutory and regulatory requirements.
- Trainee files to verify qualifications and examination requirements were met.
- Files maintained by the pilot associations and contractors to determine compliance with BMP's drug and alcohol testing program. Pilot associations' staff and contractors were interviewed to understand the associations' procedures.
- Select investigative files and documentation to assess the efficiency and effectiveness of the investigative process. The Division of Corporations, Business and Professional Licensing (DCBPL) chief investigator was interviewed to understand the investigative process and for information about specific investigations.
- The prior BMP sunset audit to identify previous and existing issues affecting the board.

BMP and DCBPL internal control procedures related to various audit objectives were assessed, including procedures over licensing, investigations, and board proceedings.

Inquiries regarding BMP-related complaints were made with the following organizations:

- The Department of Commerce, Community, and Economic Development's Commissioner's Office;
- The Office of the Governor;
- The Alaska State Commission for Human Rights;
- The Office of the Ombudsman;
- The Office of Victims' Rights;
- The Department of Administration's Division of Personnel and Labor Relations; and
- The United States (U.S.) Equal Employment Opportunity Commission.

Pilots licensed and regulated by BMP and industry stakeholders who utilize the pilotage services were surveyed to gauge the overall satisfaction level with BMP's operations and activities.

To identify and evaluate the various issues relating to BMP activities, the BMP coordinator, board members, marine pilots, industry stakeholders, and the U.S. Coast Guard licensing and enforcement staff were interviewed. The questions concerned board operations and duplication of efforts.

ORGANIZATION AND FUNCTION

The Board of Marine Pilots (BMP or board) was created by Ch. 106 SLA 70, which became effective May 7, 1970. The statutes were significantly changed with the passage of the *Marine Pilot Act of 1991*. In passing the 1991 *Marine Pilot Act*, the legislature gave BMP broad statutory authority which included establishing pilotage regions, maximum tariffs, and criteria for training and licensing marine pilots. The policy, findings, and intent of the *Marine Pilot Act* stated:

It is the policy of the state to prevent the loss of lives and property, and to protect the marine environment of the state by requiring compulsory pilotage on the inland and coastal water of and adjacent to the state.

In 1995, the legislature extensively revised the statutes and overall structure of BMP. The most significant change allowed pilot organizations recognized by the board to adopt and revise rates for pilotage services and enter into agreements with the master, owner, operator, or agent of a master, owner, or operator of a vessel concerning the terms and conditions under which the pilot organization provides pilotage services.

Board Membership

BMP is composed of seven members. Membership consists of two licensed pilots who are actively engaged in marine piloting, two agents or managers of vessels subject to the statutes, two public members, and the commissioner of the Department of Commerce, Community, and Economic Development (DCCED) or a designee. All members must be Alaska residents. Board members, as of June 2012, are listed in Exhibit 1.

By statute, not more than one pilot member and one agent may be from any one pilotage region established by the board. Additionally, not more than one registered agent may be employed by, be a contractor for, or hold a financial interest in the same marine industry business entity, including commonly owned, affiliated, or subsidiary business entities.

Public members cannot be engaged in the piloting profession, have a legal contract with a pilot, or have a direct financial interest in the piloting

profession.

BMP Duties

BMP responsibilities include:

1. Maintaining an efficient and competent pilotage service on the inland and coastal waters to ensure the protection of shipping, safety of human life and property, and protection of the marine environment.
2. Adopting regulations establishing the qualifications and required training for pilots and providing for the examination of pilots.
3. Issuing original or renewal pilot licenses to qualified persons.
4. Maintaining a register of licensed pilots, licensed deputy pilots, and agents.
5. Adopting regulations establishing pilotage regions, professional fees, and criteria to recognize pilot organizations.
6. Reviewing and approving training programs conducted by pilot organizations.
7. Reviewing and approving pilot organizations' articles, bylaws, and rules.
8. Auditing pilot organizations or an individual pilot, as necessary, to implement and enforce statutes and regulations.
9. Establishing and publishing the dates of future license examinations.
10. Approving or disapproving rates for pilotage services.

DCCED's Division of Corporations, Business, and Professional Licensing (DCBPL or division)

DCBPL provides administrative and investigative assistance to BMP. Administrative assistance includes budgetary services and functions such as: collecting fees, maintaining files, receiving and issuing application forms, and publishing notice of examinations and meetings. Investigative assistance is available upon request, or the division may conduct an investigation on its own initiative if it appears an individual has engaged – or is about to engage – in a practice over which the division has authority. DCBPL can issue an order that an individual

stop a practice, bring an action in Superior Court to enjoin the act, examine the books and records of a license holder and/or association, and subpoena witnesses and records.

Marine Pilot Coordinator

DCCED employs a marine pilot coordinator to assist the board in fulfilling its statutory duties. The duties of this position, whose hiring is subject to approval by BMP, are defined in AS 08.62.050. The marine pilot coordinator cannot work as a pilot, be an active member of a pilot association, or have a financial interest in a pilot association or the equipment that it uses. The coordinator position is funded by BMP fees.

Pilot Association Organizations

All Alaska marine pilots are required to belong to an association. Pilots have formed an association in three Alaskan regions to provide services to the maritime industry. The associations exist to facilitate joint activities such as billing and collecting for pilot services and to administer the rotation, dispatch, pilot boat and training operations. The board has delegated to the associations the responsibility for administering mandatory drug and alcohol testing program for pilots, trainees, and apprentices.

(Intentionally left blank)

BACKGROUND INFORMATION

Piloting involves directing sea-going vessels into and out of waters where navigation is dangerous or difficult. Difficulties can include: (1) restricted waterways, such as channels, ports, or harbors; (2) tides, currents, and water depths; and (3) type and nature of traffic. According to AS 08.62.163, state-licensed pilots are independent contractors and may not be employed as an employee of the owner or operator of a vessel subject to state pilotage. Pilots' knowledge of the local geography and waterways they are piloting makes them invaluable to vessels. Pilots are responsible for the safety of those aboard a vessel and for the protection of the marine environment.

Pilotage of international trade vessels in the United States (U.S.) is regulated by individual states. Each state maintains a pilotage system suited to the particular needs and circumstances of its waters. In 1789, the first U.S. Congress enacted a law giving states the right to regulate pilotage in their waters. The law created the state pilotage system which remains in effect today. Every foreign flag vessel and every U.S. flag vessel engaged in international trade or moving in a state's waters is required to use the services of a state-licensed pilot.

Enacted in 1970, Alaska's original piloting law created the Board of Marine Pilots (BMP or board) to regulate and license pilots.

Vessels Subject to Alaska Marine Pilotage Regulations

A pilot must be employed for vessels navigating inland and in the coastal waters of, or adjacent to, the State (as defined by the board). This includes any oil tanker of 50,000 dead-weight tons, or greater, navigating in state water beyond Alaska pilot stations. Vessels exempt from this regulation include: vessels subject to federal pilot requirements, U.S. or Canadian fishing vessels, and many U.S. and Canadian registered vessels and foreign flag yachts 65 feet or less in overall length.

Federal Licensing Requirements

The U.S. Coast Guard (USCG) enforces federal pilotage laws and issues federal licenses to individuals who meet its requirements. In most states, including Alaska, applicants must have a USCG pilot license in order to obtain a state license. The USCG license is usually referred to as a "*minimum standard of competence*" license. USCG licensing requires a minimum amount of qualifying sea service in addition to passing a written examination.

Federal licenses are valid for five years. For license renewals, pilots must submit evidence of one year of sea service within the previous five years. Pilotage endorsements on licenses do not expire, but every five years, each pilot must make one familiarization round-trip over the route for which they have an endorsement. For long or extended routes, pilots are not required to

physically make the familiarization trip; pilots can be certified based on a review of publications and charts.

State Licensing Requirements

Since knowledge of local geography and waterways is an essential aspect of the pilotage profession, individuals licensed as marine pilots are required to have extensive navigational experience. Established by state law, these requirements involve up to ten years experience in navigating vessels of various sizes.

Pilot trainee programs provide on-the-job training in the region where licensure is sought. Entry into an apprenticeship program typically requires less experience than entry as a trainee. Candidates in trainee and apprentice programs progress from either trainee or apprentice to deputy marine pilot (license issued by BMP) and, finally, to marine pilot. All training programs require candidates to ride a ship with a fully licensed training pilot, observing their handling of the ship. Over time, a trainee or apprentice begins to handle the ship under the training pilot's guidance. Statute requires a minimum of four years apprenticeship training to become a deputy marine pilot. A deputy marine pilot, in addition to other requirements set out in statute, must have three years experience as a licensed deputy marine pilot to obtain a marine pilot license.

Drug and Alcohol Testing Program

Under AS 08.62.040(b)(2), BMP is authorized to establish a mandatory random drug and alcohol testing program. Statutes allow BMP to delegate responsibility for administering the program to local pilot associations. The board requires each pilot association to establish a mandatory random drug and alcohol testing program for pilots, trainees, and apprentices. Board regulations specify that pilots must participate in a random drug testing program conducted according to the requirements of federal regulations (46 CFR 16 and 49 CFR 40).

Rate Setting Process

Under AS 08.62.046, local pilot associations set rates either (1) through negotiation with the master, owner, operator, or agent of a vessel; or (2) by providing due notice, before October 15th, to the board and to all registered agents. If no objection to the proposed rate is filed with the board, the rate takes effect on January 1st of the year following the year in which the notice of intent to adopt the rate was filed with the board.

Objections to the proposed rate and relevant evidence demonstrating that the rate is not reasonable must be filed with the board within 60 days of the final publication date. The board may hold a hearing to determine whether the proposed rate is reasonable, or the board may refer the objection to the Office of Administrative Hearings.¹

¹The board is not required by statute to use the Office of Administrative Hearings. However, the board has elected to use the Office Administrative Hearings when applicable to help address potential conflicts of interests by board members.

REPORT CONCLUSIONS

Under AS 08.03.010(c)(10), the Board of Marine Pilots (BMP or the board) is scheduled to terminate on June 30, 2013. We recommend BMP's termination date be extended to June 30, 2019. If the legislature does not take action to extend the board's termination date, AS 08.03.020 allows the board one year in which to conclude its administrative operations.

Regulating and licensing qualified marine pilots benefits the public's safety and welfare, and protects the marine environment. The board provides reasonable assurance that individuals licensed to pilot passenger and cargo ships in Alaskan waters are qualified.

The board has successfully resolved many of the problems identified in prior sunset audits. This report makes one new recommendation for improvements to BMP operational activities.

The Department of Commerce, Community, and Economic Development's Division of Corporations, Business and Professional Licensing (DCBPL or division) improved the allocation of division indirect costs to occupational licensing boards.

A June 2011, DCBPL special audit² recommended the division improve its methodology for allocating division indirect costs. The division had charged 100 percent of its indirect expenses to the professional licensing cost pool rather than allocating costs between the professional licensing cost pool and the corporations and business licensing cost pool. This resulted in the over-allocation of divisional indirect costs to occupational boards.

The indirect cost allocation finding has been resolved. DCBPL revised its indirect cost allocation methodology to correct noted deficiencies. The revised methodology appropriately allocates division indirect costs to both cost pools based on full time equivalent positions.

To facilitate correcting the fiscal impact of prior allocation errors, the division received a \$3.4 million supplemental appropriation in FY 12. Using financial data from the state accounting system and DCBPL position counts, the division restated the schedule of revenues and expenditures for all occupational boards back to FY 00 using the revised allocation methodology. The supplemental appropriation was used to eliminate occupational board deficits resulting from the incorrect allocation methodology. The revenue and expenditure schedule presented in Exhibit 2 (page 15) reflects the board's restated financial activity for the period FY 07 through FY 12.

²This issue was identified in the special audit, *Department of Commerce, Community, and Economic Development; Division of Corporations, Business and Professional Licensing; Select Occupational Licensing and Enforcement Issues, June 29, 2011, Audit Control Number 08-30063-11.*

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

The prior, 2006 sunset audit³ included six recommendations; three of which were repeat recommendations from the 2002 sunset audit. Three prior recommendations to improve the drug and alcohol program's testing and reporting have been substantially implemented. Alaska Statutes were amended to incorporate trainees and apprentices into the drug and alcohol program. The Board of Marine Pilots (BMP or board) chair periodically issues detailed memos to pilot associations outlining responsibilities for the mandatory drug and alcohol testing program. Additionally, all pilots were enrolled in associations' drug and alcohol testing program for 2011, and the associations met the 50 percent random pilot testing and reporting requirements. Furthermore, all associations have signed agreements with a drug and alcohol testing contractor.

The prior recommendation to ensure coverage of the marine pilot coordinator's investigative functions during extended absences or a vacancy has been implemented by establishing appropriate procedures.

The prior recommendation to change the continuing professional education regulation has been implemented. The regulation now requires documentation that pilots have satisfactorily completed a board-approved simulator or manned-model course at a board-approved facility, and documentation that pilots have satisfactorily completed continuing education requirements as prescribed by the board-approved regional training program.

The prior recommendation to consider clarifying statutes regarding the use of pleasure craft exemption fees has not been implemented. According to Department of Commerce, Community, and Economic Development (DCCED) management, the exemption was enacted with the understanding that fees generated from the exemption would be used to offset related BMP expenses. DCCED management stated that administering the pleasure craft exemption takes considerable BMP time and effort. Based on this response and lack of action on behalf of the legislature to clarify statutes, this recommendation is not reiterated as part of this report.

Recommendation No. 1

The marine pilot coordinator should improve administration of BMP operational activities.

Analysis of BMP operational activities noted the following administrative deficiencies:

³Prior sunset audit: *Department of Commerce, Community, and Economic Development; Division of Corporations, Business and Professional Licensing; Board of Marine Pilots, Sunset Review, November 2, 2006, Audit Control Number 08-20045-06.*

- Three of the six meetings sampled were not publicly or timely noticed. The *Open Meetings Act* requires meetings be publicly noticed in a reasonable time frame. Division of Corporations, Business and Professional Licensing policy requires BMP notice meetings at least ten days prior to the meeting.
- Two new license and vessel endorsement application packages were not verified for completeness by the marine pilot coordinator. The application packages were missing required documents. In accordance with BMP regulations,⁴ the marine pilot coordinator is responsible for ensuring license applications are complete.
- The marine pilot coordinator did not have adequate oversight procedures over certain drug and alcohol program requirements. The marine pilot coordinator did not confirm the timeliness of the associations' drug testing. In one association, three pilots who received notification to test by mail may have not been drug tested timely. The associations' annual drug testing reports were not verified for accuracy by the coordinator. Two associations' annual reports did not tie to the detailed records. Furthermore, the drug testing program for one association's trainee was not approved by the board. Alaska Statute 08.62.040 authorizes BMP to establish a mandatory drug and alcohol testing program for licensed pilots and for trainees and apprentices seeking licensure. The board has delegated oversight of the drug and alcohol testing programs to the marine pilot coordinator.

When considered together, the administrative deficiencies described above indicate improvements in administrative activities are needed. Ongoing control deficiencies may endanger the public's safety and welfare as well as the marine environment.

We recommend the marine pilot coordinator improve procedures over administering BMP operational activities to ensure compliance with statutes and regulations.

⁴Title 12 of the Alaska Administrative Code, Section 56.025(i) states:

An application is considered complete when it satisfactorily documents that all applicable requirements for the examination, license, or endorsement have been met. The marine pilot coordinator shall review all applications that comply with all applicable requirements.

ANALYSIS OF PUBLIC NEED

The following analyses of Board of Marine Pilots (BMP or board) activities relate to the public need factors defined in AS 44.66.050(c). These analyses are not intended to be comprehensive, but address those areas we were able to cover within the scope of our review.

As part of the audit, pilots licensed and regulated by the board and industry stakeholders⁵ who utilize the pilotage services were surveyed. Eighty-six pilots⁶ were provided the survey and 53 (62 percent) responded. Twenty-four industry stakeholders were provided the survey and 12 (50 percent) responded. Survey questions and results are presented in Appendices A, B, and C of this report.

Determine the extent to which the board, commission, or program has operated in the public interest.

BMP benefits the public's safety and welfare by licensing and regulating marine pilots and thereby protects shipping, human safety and property, and the marine environment. The board provides reasonable assurance that pilots are competent and qualified to pilot passenger and cargo ships in Alaskan waters. From FY 07 through FY 12, 16 marine pilots and 13 deputy marine pilots were newly licensed by the board. Furthermore, from FY 07 through FY 12, BMP revised or updated over 20 BMP regulations. The board also significantly resolved the 2006 sunset audit recommendations.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

The majority of survey respondents reported overall satisfaction with the board's performance. Seventy-seven percent of pilot respondents and 100 percent of industry stakeholder respondents rated the board's performance between *fair* and *excellent*. The majority of respondents also gave the board a *fair* to *excellent* rating for its performance in addressing industry needs for protection of shipping, human safety and property, and the marine environment. However, 55 percent of the pilot respondents gave a *poor* rating for board member objectivity. Surveyed marine pilots expressed dissatisfaction with the current board chair's performance while the majority of industry stakeholders were satisfied. The appendices in this report include all survey questions and respondent answers.

Sixty percent of pilot survey respondents and 92 percent of industry stakeholder respondents viewed the board's handling of rate setting issues between *fair* and *excellent*. Currently, rate

⁵Industry stakeholders represent vessel agents, shipping and cruise firms, and vessel owners.

⁶Pilots surveyed included trainees.

setting disputes are either handled directly by the board or referred to the Office of Administrative Hearings. During the audit period, two rate setting disputes were brought to the board. In both instances the matter was referred to the Office of Administrative Hearings; however, the matters were withdrawn by the parties before the scheduled hearing.

The board made significant improvements in addressing prior sunset audit recommendations. However, continued improvements are needed regarding the administration of BMP operational activities. Administrative deficiencies include not verifying the accuracy of local pilot association annual drug testing reports; not confirming the timeliness of pilots' responses to drug testing notifications delivered by mail; and not seeking board approval for one trainee's drug testing program. Recommendation No. 1 further discusses the need to improve the administration of BMP operational activities.

The board's revenue is derived from yacht exemption fees, licensing fees, and renewal fees. License renewals are required biennially, creating a two-year cycle in which most revenues are received in odd-numbered fiscal years. During the audit period, license renewal fees remained fairly stable. From FY 07 through FY 10, the license fees were \$2,000, and in FY 11, the fee changed to \$2,500. The fee will remain the same for the upcoming renewal period.

A schedule of board revenues and expenditures for the period FY 07 through FY 12 is presented in Exhibit 2 (following page). The amounts in Exhibit 2 were provided by the Department of Commerce, Community, and Economic Development's (DCCED) Division of Corporations, Business and Professional Licensing (DCBPL or division) management and reflect the division's restatement of occupational board financial activity. The division restated all occupational board financial activity to adjust for the over allocation of DCBPL indirect costs to all occupational boards identified by a 2011 special audit.⁷

⁷This issue was identified in the special audit, *Department of Commerce, Community, and Economic Development; Division of Corporations, Business and Professional Licensing; Select Occupational Licensing and Enforcement Issues, June 29, 2011, Audit Control Number 08-30063-11.*

We did not audit the information in Exhibit 2. The summary schedule is provided for general information purposes.

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

There were no BMP statutory changes from FY 07 through FY 12. However, the board was active in revising and updating over 20 BMP regulations during this period. Most changes were intended to improve public safety and protect the marine environment. Significant regulation changes involved:

- License renewal, core examination, and continuing education requirements;
- General requirements for marine pilot licenses;
- Training programs for deputy marine pilots;
- Regional requirements for marine and deputy marine pilot licenses;
- Qualifications for transferring marine pilot licenses to different pilotage regions within the State;

- Training pilot endorsements;
- Registration and definition of vessel agents;
- Experience requirements for vessel endorsements;
- Supervised vessel movement documentation;
- Observer trip requirements for deputy marine pilots; and
- Pleasure craft exemptions.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

From FY 07 through FY 12, the board held between four and eight meetings per year which exceeded the minimum statutory requirement of three. Meetings were advertised on the BMP website and agendas were available from the marine pilot coordinator. However, in examining six of 31 meeting notifications, two meetings were not publicly noticed and another meeting was not noticed timely in accordance with regulation and division policies. Recommendation No. 1 further discusses the need to improve administration of BMP operational activities.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

The board allots time for public comment at each board meeting. BMP, via its website, also offers individuals the ability to subscribe to an electronic mailing list to receive meeting notifications, board meeting agendas, and notice of proposed regulation changes. Meeting minutes are available on BMP's website.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

DCCED's Commissioner's Office, Office of the Governor, the Office of Victims' Rights, and the State's Office of the Ombudsman received no BMP-related complaints from July 1, 2006, through May 25, 2012.

Sixty percent of the marine pilots that responded to the survey and 75 percent of industry stakeholder respondents rated the board from *fair* to *excellent* for the board's timeliness of handling investigations. Another 30 percent of pilot respondents and 25 percent of industry stakeholder respondents gave no opinion for this survey question.

A sample of four of the 15 new BMP investigations from FY 07 through FY 12 showed action taken by BMP was adequately supported.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

For the period FY 07 through FY 12, the board issued new licenses to 16 marine pilots and 13 deputy marine pilots. Exhibit 3 provides the total number of pilots, trainees, and apprentices by region.

Exhibit 3

Number of Licensed Pilots, Trainees, and Apprentices by Region As of June 30, 2012						
<u>Region</u>	<u>Association</u>	<u>Marine Pilots</u>	<u>Deputy Marine Pilots</u>	<u>Trainees</u>	<u>Apprentices</u>	<u>Total</u>
Southeast	Southeast Alaska Pilots' Association	47	10	1	0	58
Western	Alaska Marine Pilots, LLC	8	3	0	0	11
Southcentral	Southwest Alaska Pilots Association	16	0	1	2	19
Total		71	13	2	2	88

Pilot and industry stakeholder survey respondents generally agreed that the number of licensed pilots in their region was adequate to cover industry needs. Industry stakeholder respondents rated the skills and knowledge demonstrated by pilots at an average level of eight on a scale between *one* and *ten* with *one* being unskilled and unknowledgeable and *ten* being very skilled and knowledgeable.

Except for two missing documents, a sample of new and renewal BMP licenses⁸ showed that pilots were licensed in compliance with statutes and regulations. Recommendation No. 1 further discusses the need to improve administration of BMP operational activities including verifying the completeness of licensing documentation.

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

From July 1, 2006, through May 25, 2012, no BMP-related complaints were filed with the following agencies: the Alaska State Commission for Human Rights; the United States (U.S.) Equal Employment Opportunity Commission; and the Department of Administration's Division of Personnel and Labor Relations.

⁸New license documents for four marine pilots and three deputy marine pilots were reviewed for compliance. Documents for two new trainees and seven pilot license renewals were also reviewed.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

An analysis of BMP operational activities showed administrative deficiencies regarding public meeting notifications, licensing documentation, and the oversight of the pilot associations' drug and alcohol programs. Recommendation No. 1 further discusses the need to improve administration of BMP operational activities.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

BMP has effectively attained its objectives of regulating and promulgating safety with respect to inland marine pilotage in Alaska and has carried out its purpose in a reasonably efficient manner.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

BMP and the U.S. Coast Guard have overlapping licensing and investigation responsibilities. However, the activities are complimentary in nature and do not represent a duplication of efforts.

APPENDICES

As part of this audit, a survey was conducted of BMP pilots licensed and regulated by the board and industry stakeholders⁹ who utilize the pilotage services. Eighty-six pilots¹⁰ were provided the survey and 53 (62 percent) responded. Twenty-four industry stakeholders were provided the survey and 12 (50 percent) responded. Survey responses are summarized in the following appendices:

Appendix A: Survey Results for Questions Answered by the Marine Pilots and Industry Stakeholders.

Appendix B: Survey Results for Questions Answered by Marine Pilots.

Appendix C: Survey Results for Questions Answered by Industry Stakeholders.

⁹Industry stakeholders represent vessel agents, shipping and cruise firms, and vessel owners.

¹⁰Pilots surveyed included trainees.

LEGISLATIVE AUDIT

RE: Preliminary Report Department of Commerce, Community, and Economic Development (DCCED), Board of Marine Pilots (BMP or board)

Dear Ms. Curtis:

Thank you for the opportunity to respond to the November 5, 2012 preliminary audit report recommendation concerning the Board of Marine Pilots sunset review audit. The department concurs with the report conclusion that the board's termination date should be extended to June 30, 2019. Our comment on the sole audit recommendation is provided below.

Recommendation No.1

The marine pilot coordinator should improve procedures over the administration of BMP operational activities.

The department concurs with this recommendation. With the transition to a new marine pilot coordinator in the fall of 2011, it became apparent that a desk manual and written procedure to codify primary functions was needed. The new coordinator is developing the appropriate documentation and checklists to ensure an adequate oversight process is in place.

The division is also finalizing a revised policy pertaining to meeting preparation and public notice requirements to ensure meetings are publicly and timely noticed. Requirements of the Open Meetings Act were articulated to staff and board members during training sessions conducted in June 2012 and published in the recently developed Orientation Manual for Professional Licensing Boards & Commissions.

Thank you again for the opportunity to respond to the preliminary audit report conclusion and recommendation. If you have any additional questions, please contact me at 907-465-2500.

Sincerely,

A handwritten signature in cursive script that reads "Susan K. Bell".

RE: Preliminary Audit Report, Community of Commerce, Community, and Economic
Development, Board of Marine Pilots (BMP) Sunset Review

Dear Ms. Curtis:

Thank you for the opportunity to respond to your December 13, 2012 letter regarding the BMP
audit findings.

On behalf of the BMP, we are extremely pleased with the outcome of the audit. As there will always
be improvements that need to be made, I believe the BMP and the Marine Pilot Coordinator have
made great improvements from the BMP 2002 and 2006 Sunset Audit findings. We have
aggressively implemented the necessary changes which at times did not always meet with the
approval of the pilots. I believe that is reflected in the survey results. I am pleased the Board has
resolved many of the problems identified in prior sunset audits. The BMP routinely emphasizes the
importance of internal controls, timelines and compliance with statutes and regulations.

Recommendation No. 1

I would concur with this recommendation. The BMP was unaware of the operational
deficiencies noted. The Marine Pilot Coordinator (MPC) has been in the current
position for less than one year at the time of the audit and it is important to note there
was no transition period from the previous MPC who left unexpectedly prior to the
incumbent starting. BMP will work with the MPC and the Division of Corporations,
Business and Professional Licensing to improve upon the findings.

Thank you for the opportunity to respond to these findings and recommendations. I appreciate the
professional manner in which the audit was conducted. If you need anything further for this process,
please do not hesitate to contact me.

Sincerely,

Curtis W. Thayer
Chairman

25 January 2013

Representative Kurt Olson, Chairman
Labor and Commerce Committee
Alaska House of Representatives
State Capitol Building, Room 24
Juneau, Alaska 99801

Representative Olson,

Thank you for sponsoring HB 22, An Act to Extend the Board of Marine Pilots.
The men and women of the Southeast Alaska Pilots Association (SEAPA)
believe the board should be extended and offer our support for HB 22.

The Board of Marine Pilots (BMP) performs many important functions, including testing, qualifying and regulating pilots. The board process also serves as a forum where Alaskans can focus on marine safety and protection of the marine environment, part of our statutory charge. We appreciate the review of the board by the Division of Legislative Audit and note that the auditor recommends extending the board as well.

Thank you again for sponsoring HB 22.

Captain Larry Pullin, President
Southeast Alaska Pilots Association

The State of Alaska requires almost all foreign vessels and vessels over a certain size to take on a marine pilot when they enter or travel in State waters. The purpose under state statute is to “assure the protection of shipping, safety of human life and property and protection of the marine environment” by providing pilots who specialize in operating these vessels and who have extensive knowledge of local conditions and maritime practices.

The requirement of marine pilots is a common historical and current practice all over the world. Each jurisdiction (state or nation) sets out its own rules for qualifications and compensation of pilots. In Alaska, these rules are governed by statutes adopted by the legislature and by regulations set by the Board of Marine Pilots. This paper describes the statutory history which led to the current statutes which mandate marine pilotage in Alaskan waters but which also maintain a primarily private sector approach to the commercial relations between the parties.

1. The Basic Structure

Alaska Marine Pilot requirements are contained in Alaska Statute 08.62.110-990. This law requires vessels to employ pilots and requires pilots to provide those services without interruption, in order to keep commerce moving. The statute establishes a Board of Marine Pilots that implements regulations on qualifications, licensing and training, pilotage waters, rate setting procedures and disciplinary actions.

The Board also licenses regional Pilot Associations to provide for the dispatching, billing and other administrative activities related to providing pilots. In Alaska there are 3 recognized regions: Southeast, Southcentral and Western/Northern Alaska. A pilot must be proficient at all ports in their region.

An important and consequential function of the Board is to set the location of the pilot station, the point at which the pilot is taken on board the vessel upon entry and disembarks the vessel upon departure. For instance in the 1980's, the pilot station for Valdez tankers was set by the board to be inland waters where there were still many hazards to navigation. The Exxon Valdez oil spill occurred because the pilot disembarked the vessel at the pilot station and the ship was turned over to an irresponsible ship captain. The pilot station was then changed to offshore open waters and there have been no incidents since.

The Board is authorized by statute for a set number of years (typically 5 or 6 years) at which point the Board will sunset. This is to allow for a review by Legislative Budget and Audit staff (currently being conducted), in which they report on the operations of the Board and make recommendations for changes if any in the statute or regulations. The Legislature then considers reauthorizing the Board. This will be considered during the 2013 Legislative session.

2. The Historic Compromise That Was Reached

About ten years ago, the statutory reauthorization of the marine pilot board was bogged down in a dispute over the makeup of the Board, compensation rates to pilots, and providing for competition in marine pilotage.

The legislature was in a quandary. They appreciated the pilots and what they do for Alaska, and at the same time, they also appreciated the industry and wanted them to operate without interruption in an efficient manner. And they wanted a primarily private sector approach to resolving the issues.

The issues under contention were:

How to structure the board to have the benefit of knowledge of pilots and vessel agents (shipping company representatives), yet be balanced and ultimately to make decisions in the public interests of Alaskans as a whole.

How to structure rate setting since it was mandatory to hire pilots but at the same time they are required to provide the service without interruption (essentially a no strike clause). A traditional labor-management scenario would not work. This situation could lead to endless negotiations or disruptions of commerce. Both pilots and vessel agents agreed that they did not want a government board setting commercial rates.

How to provide competition in pilotage services to ensure reasonable rates.

The Senate President Intervenes.....

There wasn't much progress being made on resolving these issues and the Board was headed for a total sunset and shutdown. Senator President Drue Pearce stepped in and brought the pilots and vessel agents into her office announcing: "You are going to stay here in my office with my staff, and do not come out until you have reached an agreement." Here is the compromise that was reached to resolve the issues stated above and which are included in the current statute:

a. The Board would be composed of two pilots, two vessel agents, two public members and the Commissioner of Commerce or his designee (typically a Deputy Commissioner). If there were a deadlock between pilots and vessel agents on an issue, it would ultimately be decided by the public members and the Commissioner's representative.

b. The law would allow for competing pilot associations to be set up within a region to provide for competition in fees. (Competing groups were actually created in Southeast Alaska for a period of time, but were ultimately reunited for reasons of efficiency.)

c. For rate setting, pilots would publish a tariff for their pilotage services. If the vessel owners believed that the tariff was too high, they could appeal to the Board based on criteria stated in the statute. If the tariff was overturned, the pilots would have to post a new tariff. In practice, this has led to voluntary negotiated agreements for tariffs in almost all circumstances, in some cases, multi year agreements which give the shipping industry the stability they need for their operations.

3. Pilot Qualifications, Licensing and Training

The qualifications for obtaining a license as a Marine Pilot are substantial and they are specified in the statute and further defined in Board regulations. To even initiate pilot training, applicants must have many certified hours of experience sailing on vessels of various sizes.

They then go through several years of apprentice training, beginning as observers, then proceeding to do supervised sailings and dockings, finally moving on to solo sailings. And this must be done for every port in the region where pilots are expected to know local wind and current regimes, location of underwater communications and electric lines and hazards to navigation, approaches to each dock and local operations of other vessels in the area. Most pilots hold degrees from maritime universities. A typical time line for obtaining a marine pilots license is ____ years.

Random drug tests are administered to pilots on a regular basis. Discipline is extreme for infractions or for showing an inability to safely pilot vessels, up to and including loss of the Pilot's license.

The costs for licensing, investigations, Board operations and the Marine Pilot Coordinator are all paid for by annual licensing fees paid by the Pilots.

Conclusion

The Board of Marine Pilots is up for reauthorization in the 2013 Legislative session. We hope all Legislators will consider the history of the current statute in making decisions on this matter and give the maritime industry the stability it needs to operate for the next several years by passing this reauthorization.
