<TARGET><BILL>SB 82</BILL><SUBJECT>SB  
82</SUBJECT><COMM>SEDC28</COMM></TARGET>

Residents of Alaska's bigger communities pay about \$25 per month for unlimited access to the Internet, including unlimited use of email. Residents of smaller/more remote towns (such as Angoon, Pelican, Sand Point, Unalaska, White Mountain, Teller, and Brevig Mission) pay about \$45 per month for similar services. Over two dozen different companies within Alaska offer Internet service; some, including GCI, PTI, and Internet Alaska, offer service to many communities statewide. Other ISPs, such as Kenai Net serving the Kenai, Seward Net serving Seward to Moose Pass, and Mosquitonet serving Fairbanks, offer service to a smaller geographic area only.

Members of a few Southeast Alaska communities receive Internet service through a non-commercial ISP: SEAKnet, a regional computer network initially funded by a federal NTIA grant to the Alaska State Library, originally served the communities of Gustavus, Haines, Hoonah, Kake, Petersburg and Wrangell. SEAKnet is now a collaboration between the Alaska State Library, the SEAKnet communities, and the University of Alaska.

Currently, SEAKnet serves four communities since Petersburg and Wrangell elected to continue Internet service through commercial providers. Routers, terminal servers, and modems in each community allow local users to connect their own computers to the University of Alaska's computer network and, in turn, to the Internet by dialing a local telephone number. SEAKnet is currently administered by representatives in each of the four remaining communities and at the Alaska State Library, with network services provided by the University of Alaska and technical support by volunteers and library staff in each community. SEAKnet relies heavily on local libraries and volunteers to sign up users and help them get connected. Users pay a monthly fee of \$25 (plus a local contribution in some communities).

In 1999, community members in Hoonah began a spin-off from SEAKnet and now have their own non-profit community-based ISP, HoonahNet. With support from the City of Hoonah and the Liquor Board, the community installed a VSAT satellite and server. Users pay \$30 per month plus a \$35 installation fee. The organization's website reports that \$10 per month goes to administer and maintain the dial-in, web and mail servers and do the organization's bookkeeping; \$10 per month is earmarked for the 512k VSAT satellite service fees; \$7 per month pays for the dial-in phone lines from PTI; the remaining \$3 per month fee, as well as the \$35 installation fee, goes towards adding modems and dial-in lines and maintaining existing equipment.

---

## THE FEDERAL E-RATE PROGRAM AND ASTF GRANTS: HELPING TO CONNECT ALASKA'S SCHOOLS

---

According to Della Matthis, Alaska State Library's E-Rate Coordinator, all school district offices and nearly every school in the state have access to the Internet. She estimates that students in 95% of the school buildings in the state have Internet access; the only schools without Internet access are those located in areas with extreme physical obstacles (e.g., schools at the back of fjords in Southeast Alaska). She reports that some schools still use radio phones and a few have a single copper-grade phone line that allows only a slow connection and a long distance phone call.<sup>7</sup> Ms. Matthis credits two sources of funding—the Alaska Science and Technology Foundation (ASTF) and

---

<sup>7</sup> Ms. Matthis reports that schools without Internet access include 3 or 4 schools in the Southeast Island School District, 2 schools in the Chugach School District, one school in the Yukon Flats School District, and one in the Yukon-Koyukuk School District.

the E-rate discounts—with the Internet connectivity of Alaska schools.<sup>8</sup> Ms. Matthis believes that “through the influx of Alaska Science and Technology Foundation funding and E-Rate discounts, the districts of Alaska are fast becoming connected to the greater world of information. Still to be overcome are the enormous monthly costs of such connections and the difficulty of supporting and maintaining networks off the road system.”

---

### THE FEDERAL E-RATE PROGRAM

---

Federal law has long recognized that communication services were vital to all Americans.<sup>9</sup> The Communications Act of 1934 first codified that goal as follows:

To make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges.

These words continue to provide the ideological and legal basis for many U.S. telecommunications laws and programs. The Universal Service Fund (USF) was established in 1983 to ensure that all Americans can afford telephone service wherever they live. Prior to 1983, this was accomplished through AT&T's internal rate structure, but the divestiture of AT&T led to the establishment of the USF to keep telephone service affordable in a competitive telecommunications market.

Until 1996, the fund compensated telecommunications companies providing service to low income areas and rural communities. In 1996, Congress passed the Telecommunications Act of 1996, mandating that the Universal Service Fund also provide support for schools, libraries and rural health care providers.

The USF is comprised of contributions from all telecommunications companies in the United States, including local and long distance phone companies, wireless and paging companies, and payphone providers. All of the country's communities—including public and private schools, public libraries, rural health care providers, low-income neighborhoods, and remote communities—are now eligible to seek discounts for communications services from the Universal Service Fund.

---

<sup>8</sup> It should be noted that although praised by most policymakers, the E-rate program has its critics. For example, David Hughes, listed as the contact for “policy and operational questions” at Old Colorado City Communications, a company offering wireless connections to the Internet, points out that “even though there are technologies (no-license wireless or microwave) that would permit a school district to buy the equipment to link all of its schools to the closest ISP, or to each other across a town, and NOT pay for a recurring cost last-mile-link service, month after month, and year after year, the telephone companies who only agreed to do this if THEY were the primary beneficiaries of E-rate, lobbied the FCC to make the rules so that a school could NOT buy the wireless-devices or microwaves they wanted, so, forcing the schools to get their service from the telephone companies or in some small part, maybe the cable companies. Many schools. . . wanted to use the first year's E-rate program funds to make the one-time purchase of [such equipment]. . . but they were prohibited from doing so by the FCC new Telephone Company, rules. So that wonderful E-rate, that has cost \$3.5 billion so far, will cost another \$3.5 billion, and another, and another every year for Eternity. So the schools are being held hostage by the telephone companies. Having installed the telephone company ‘services’ with that recurring annual (which the schools have to apply for every year - add the cost of its administration) subsidy, IF the Congress cuts off that program, or threatens too, all the schools and libraries will scream bloody murder to keep up that ‘free’ money from Washington. . . . The telephone companies, once the services are installed, can't lose. . . . The E-Rate program remains one of the most backward looking public policies in the nation. With a hell of a lot of smoke and mirrors hiding the dirty little secrets. But with plenty of self-congratulations being passed around” (emphasis in original, from an email authored by David Hughes, forwarded to Maria Gladziszewski by Mark Springer, March 4, 2000).

<sup>9</sup> This brief history of universal service is adapted from information contained on the web site of the Universal Service Organization (<http://www.universalservice.org/info/usf.html>).

Under direction from the Federal Communications Commission, the Universal Service Administrative Company (USAC), a private, not-for-profit organization, administers the USF and the following four programs: the High Cost Program, the Low Income Program, the Rural Health Care Program, and the Schools and Libraries Program. The Universal Service Fund for Schools and Libraries—popularly known as the "E-rate" program—has greatly benefited schools in rural Alaska. Table 2 lists the funding received by schools, libraries, and rural health facilities in Alaska for each of the last two federal funding cycles. Alaska's schools and libraries received approximately \$12 million in discounts in each of the first two E-rate funding cycles, more per student than any other state.

### SCHOOLS AND LIBRARIES

The Schools and Libraries Division of the USAC administers the program offering discounted telecommunications services for eligible schools and libraries. The Telecommunications Act of 1996 expanded the concept of universal service to include a mandate that all telecommunications carriers provide "services to elementary schools, secondary schools, and libraries for educational purposes at rates less than the amounts charged for similar services to other parties." Program funds, capped at \$2.25 billion annually, provide discounts of 20 to 90 percent on telecommunications services, Internet access, and internal connections within schools and library buildings. Schools and libraries in low-income areas—as measured by the number of students eligible for the National Free Lunch Program—as well as those in rural areas qualify for the highest discounts. All of Alaska, except the Anchorage area, is considered rural for the purposes of calculating the discount level.

Once approved, discounts are paid directly to the companies providing the telecommunications, Internet access or internal connections; the schools and libraries are responsible for paying the undiscounted portion. According to data published by the Schools and Libraries Division, in each of the first two years of the program, schools and libraries in Alaska received an average discount of over 70 percent for eligible services.<sup>10</sup>

### RURAL HEALTH CARE

The Rural Health Care Division of USAC administers the program offering discounted telecommunications services to eligible rural health care providers. Congress mandated that discounted services for rural health care, capped at \$400 million annually, be offered so that public or non-profit rural health care providers pay no more than their urban counterparts for telecommunication services. The Rural Health Care Division aims to provide support to rural health care providers for telecommunications services related to the use of telemedicine and telehealth.

In addition, any not-for-profit health care provider—whether in a rural or urban area—qualifies for Internet access assistance if the organization must pay toll charges (long distance) in order to access an Internet Service Provider. In this case, the health care provider may qualify to receive 30 hours or \$180 per month, whichever is less, to pay for the toll charges. All of Alaska outside of the Anchorage area is classified as rural for the purposes of this program.

As you can see from Table 2, during the first year funds were available to rural health care providers, Alaska providers received \$444,000—nearly 20 percent of the total distributed nationally. Rural health care providers in House Election District 37 (including providers in Ambler, Buckland, Deering, Kivalina, Kobuk, Kiana, Kotzebue, Noatak, Noorvik, Point Hope, Selawik, and Shungnak), received nearly 43 percent of that amount, or \$188,000.

---

<sup>10</sup> School and library funding data are available on-line at [www.sl.universalservice.org/apply/fcyear1/state.asp](http://www.sl.universalservice.org/apply/fcyear1/state.asp) and [www.sl.universalservice.org/apply/fcyear2/state.asp](http://www.sl.universalservice.org/apply/fcyear2/state.asp). The data for Alaska are presented in Table 2 of this report.

## FISCAL NOTE ANALYSIS

STATE OF ALASKA  
2013 LEGISLATIVE SESSION

BILL NO. SB082

### Analysis

The Schools and Libraries portion of the Universal Service Fund, more widely known as E-Rate, was authorized as part of the Telecommunications Act of 1996. Section 254 codified provisions for universal service, a principle that broadly means everyone should have access to advanced telecommunications services at reasonable rates regardless of their location. E-Rate schools in Alaska receive a 60-90% discount on the cost of their telecommunications and internet charges. There are 280 Title 1 schools in both urban and rural Alaska.

This legislation would provide state grants for the non-discounted portion (district share) for bandwidth of up to 200 Mbps, where available, for Title I schools or school districts.

Currently, only one district is known to have 200 Mbps (megabits per second) capabilities. Many Title I schools are lacking adequate infrastructure such as broadband, transponder space, fiber optic vs. terrestrial delays and equipment like computers, switches and routers. Many may not be able to accommodate the increased bandwidth.

This fiscal note is indeterminate at this time since the cost of broadband will depend on:

- How difficult it is to access (i.e. is fiber optic cable available, and if not, how much expansion is possible on their satellite or microwave transponders).
- What is the current maximum capacity available to districts that is not being used due to fiscal constraints?
- How many students are accessing the Internet at one time? (Smaller schools may not need as much at one time.)
- How the broadband is managed (hardware and distribution) through each service provider, consistency of equipment and filtering.

**Office of Non-Public Education (ONPE)**

**E-RATE PROGRAM - DISCOUNTED TELECOMMUNICATIONS SERVICES  
FEDERAL COMMUNICATIONS COMMISSION (FCC)/  
UNIVERSAL SERVICE ADMINISTRATIVE COMPANY (USAC)/  
SCHOOLS AND LIBRARIES DIVISION (SLD)**

Non-profit private schools -- along with public schools, and libraries -- can receive discounted telecommunications services through the E-rate program.

The E-rate program is administered by the Schools and Libraries Division (SLD) of the Universal Service Administrative Company (USAC). The program was set up in 1997 when the Federal Communications Commission (FCC) adopted a Universal Service Order implementing the Telecommunications Act of 1996. The Order was designed to ensure that all eligible schools and libraries have affordable access to modern telecommunications and information services. Up to \$2.25 billion annually is available to provide eligible schools and libraries with discounts under the E-rate program for authorized services.

**Amount of Discounts**

The E-rate provides discounts of 20 percent to 90 percent for eligible telecommunications services, depending on economic need and location (urban or rural). The level of discount is based on the percentage of students eligible for participation the National School Lunch Program or other federally approved alternative mechanisms. (Non-public schools and others not participating in the National School Lunch Program can use federally approved alternative mechanisms contained in the Improving America's Schools Act. Details of such mechanisms may be found in "Alternative Discount Mechanisms" on the SLD web site.)

<b>INCOME Measured by % of students eligible for the National School Lunch Program</b>	<b>URBAN LOCATION E-Rate Discount</b>	<b>Rural Location E-Rate Discount</b>
<b>If the percentage of students in the school qualifying for the National School Lunch Program is...</b>	<b>...and the school is in an URBAN area, the E-rate discount will be...</b>	<b>...and the school is in a RURAL area, the E-rate discount will be...</b>
<b>Less than 1%</b>	<b>20%</b>	<b>25%</b>
<b>1% to 19%</b>	<b>40%</b>	<b>50%</b>
<b>20% to 34%</b>	<b>50%</b>	<b>60%</b>
<b>35% to 49%</b>	<b>60%</b>	<b>70%</b>
<b>50% to 74%</b>	<b>80%</b>	<b>80%</b>
<b>75% to 100%</b>	<b>90%</b>	<b>90%</b>

**Eligible Services**

Discounts can be applied to commercially available telecommunications services, Internet access, and internal connections. Eligible services range from basic local and long distance phone services, and Internet access services, to acquisition and installation of equipment to provide internal connections.

An "Eligible Services List" is posted on the [SLD web site](#). Be sure to check the SLD web site for this list; updates are occurring for Year 4. Any service NOT included on this list as an eligible service should be considered ineligible. Please note that not all of the eligible services may be available in all areas throughout the country. (Note: The FCC has authority to revise service eligibility determinations. Applicants and service providers are well advised to regularly check the SLD web site to learn of any possible additions or adjustments to the Eligible Services List.)

*Examples of Eligible and Ineligible Services (Eligibility may in some cases be conditional)*

Eligible Services	Ineligible Services
<ul style="list-style-type: none"> <li>● Basic phone service, which includes local and long distance (toll) service</li> <li>● Leased data circuits</li> <li>● T-1, 56K, ISDN lines</li> <li>● Dial-up Internet access</li> <li>● Direct Internet connections</li> <li>● Email</li> </ul>	<ul style="list-style-type: none"> <li>● Voicemail</li> <li>● Online content</li> <li>● Professional development training</li> <li>● Software (see, Eligible Internal Connections)</li> </ul>

Eligible Internal Connections	Ineligible Internal Connections
<ul style="list-style-type: none"> <li>● Telecommunications wiring</li> <li>● Routers</li> <li>● Switches</li> <li>● Hubs</li> <li>● Network Servers</li> <li>● Certain system operating software</li> <li>● Wireless LANs</li> <li>● Installation &amp; basic maintenance</li> <li>● Private Branch Exchange (PBX)</li> </ul>	<ul style="list-style-type: none"> <li>● Personal computers</li> <li>● FAX machines</li> <li>● Modems in personal computers</li> <li>● Electrical wiring</li> <li>● Asbestos removal</li> <li>● Cameras</li> </ul>

**Application Process**

Schools that plan to participate in the E-Rate program will need to follow a series of steps in order for their request for services to be placed on the SLD website. The timeline for filing appropriate forms is announced annually by the SLD on their [website](#). While this request for services (form 470) is on the website, vendors interested in providing services can access your request and provide bids on it. At the end of the required posting period, you may choose a vendor who can provide the services you have requested. Here are the steps that must be followed:

Instructions provided by SLD on the application process or <http://www.sl.universalservice.org/apply/> (Note that the dates are for funding year 4. The SLD website will be updated in future years to show the dates for those years.)

To apply for E-rate Discounts, the applicant ("you") must:

1. **Develop a technology plan:** If you have not already developed a technology plan, you need to do so then and submit it for approval by your State or another certified approving body (see above). Note that your technology plan must be approved before you file the Form 486 and receive discounts.
2. **Submit FCC Form 470 (Description of Services Requested and Certification Form):** If you plan to file a Form 471 ONLY for services provided during Funding Year 4 under contracts signed pursuant to posted

# SENATE COMMITTEE REPORT

## First Committee of Referral

DATE: 3/19/13

FURTHER: Finance

Date of 5-Day Notice: 3/21/13  
(in accordance with Uniform Rule 23)

DATE TURNED  
IN TO OFFICE: 4/5/13

**Education Committee** considered SENATE BILL NO. 82

SB 82-BROADBAND DISCOUNTS FOR SCHOOLS

"An Act providing for public school funding for telecommunications or Internet services."

and recommends:

- be replaced with CS SB 82 (EDC) [ ] Same Title  New Title
- [ ] adopt previous CS SCS/CS- Forthcoming [ ] Same Title [ ] New Title
- [ ] attached amendment(s)
- [ ] adopt \_\_\_\_\_ Letter of Intent
- [ ] further referral to \_\_\_\_\_ Committee
