Chairman

Alaska State Legislature
House

JUNEAU ALASKA

TO: Representative Ose

FROM: Representative E. D. Hillstrand *EDH*
Chairman, House Finance Committee

SUBJECT: SENATE BILL NO. 13

DATE: January 12, 1973

The problem which you mentioned to me today -- the Governor's ability through Executive Order #20 to subvert the will of the Legislature as expressed in the General Appropriations Act -- is the subject of the enclosed piece of legislation, SENATE BILL NO. 13. I am appointing you as Chairman of a subcommittee consisting of yourself, Representative Ferguson, and Representative Saylor to research this question and report your findings to the full committee at your earliest convenience.

1 IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST
OF THE BUDGET AND AUDIT COMMITTEE

2 SENATE BILL NO. 13

3 IN THE LEGISLATURE OF THE STATE OF ALASKA
4 EIGHTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act relating to the Executive Budget Act; and pro-
7 viding for an effective date."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 * Section 1. AS 37.07 is amended by adding a new section to read:

10 Sec. 37.07.085. OPERATIONS PLAN REVISION. (a) If approved by
11 the governor and the committee, the operations plan of an agency pro-
12 vided for under sec. 80 of this chapter may be revised to allow for the

13 (1) increase of an appropriation item based on additional
14 federal or other program receipts;

15 (2) establishment of a new, permanent position not previously
16 authorized in the appropriated budget;

17 (3) reallocation between appropriation items.

18 (b) If approved by the division, the operations plan of an agency
19 provided for under sec. 80 of this chapter may be revised to allow re-
20 allocations within an appropriation item.

21 (c) The operations plan of an agency provided for under sec. 80 of
22 this chapter shall be revised by the division to reflect

23 (1) reduction of an appropriation item when there is a short-
24 fall in the appropriated estimate of federal or other program receipts;
25 the reduction shall include the shortfall in receipts and the required
26 state matching funds appropriated;

27 (2) reduction in the state funded portion of an appropriation
28 item when federal or other program receipts exceed the appropriated
29 estimate of receipts; these reductions shall be consistent with

1 applicable federal statutes; excess receipts appropriated under (a)(1)
2 of this section are exempt from the reduction requirements of this
3 paragraph;

4 (3) increase of an appropriation item to include additional
5 receipts above the appropriated estimate for refunds of shared taxes and
6 revenues to political subdivisions.

7 * Sec. 2. AS 37.07.120 is amended by adding a new paragraph to read:

8 (4) "committee" means the Legislative Budget and Audit Com-
9 mittee.

10 * Sec. 3. AS 37.07.080(e) is repealed.

JUNEAU ALASKA

Alaska State Legislature
House

March 6, 1973

The Honorable William A. Egan

Dear Governor Egan:

For your information, I am transmitting herewith a copy of minutes from our committee meeting held this morning on Senate Bill No. 13.

After you have read this, if you wish to call me I will visit your office, any time.

Earl D. Hillstrand
Chairman
Finance Committee

bcc: Mr. Alex Miller
Legislative Assistant

HOUSE FINANCE COMMITTEE
March 6, 1973

Chairman Hillstrand called the meeting to order and noted for the record that a quorum was present. Also present as witnesses were Joseph R. Henri, Commissioner, Department of Administration, and Myrton R. Charney, Director, Division of Budget & Management.

SB 13

Per custom, SENATE BILL NO. 13 (An Act relating to the Executive Budget Act; and providing for an effective date) having been referred to Rep. Freeman, the conduct of the meeting was turned over to him.

Rep. Freeman asked Mr. Henri for his comments on the bill. Mr. Henri stated the bill is on the division of power between the legislative and executive branches. Mr. Henri said he and Governor Egan have a great respect for the legislature and their rights; but "political science" is involved as to where the power should lie. The amendments proposed in SB 13 would involve considerably more power to an interim committee of the legislature and take away that much power of the Governor.

Mr. Henri continued by saying these powers include the authority to appoint new permanent positions after the legislature has ended and the power to transfer funds. Under the Executive Budget Act, the power to transfer funds between departments was denied the Governor in 1970, and he was allowed to transfer funds only within a department. The language of the appropriations bill last year gave him the authority to transfer between appropriations, as a separate column was listed entitled "allocations", giving legislative intent but not legally binding upon the administration.

When the present administration received the budget from the Miller administration, there were approximately 100 appropriations -- this year there are close to 300. Mr. Henri said the transfer of funds between appropriations becomes more important as you have more appropriations. If the level of appropriations goes down to each BRU, it would be a much more difficult situation.

It is true that every possibility can't be foreseen as things come up during the year and plans must be changed, continued Mr. Henri. In the budget this year, the administration listed all the appropriations they wanted, and from their point of view everything is fine.

3/6/73

Mr. Henri continued by saying the people voted for a strong executive and Alaska has a strong executive form of government. He did not believe this had been opposed until now, but this bill tends to dilute that intent. Mr. Henri objected to six members of the legislature making the decisions rather than the one person elected to do same -- the Governor. He did not know if it was unconstitutional, but believed it was against the spirit of the constitution. The Budget & Audit Committee membership changes every two years -- one year the chairman may be from a populous area and the next year he may be from a rural area. The Governor represents the majority of Alaskans. The 60-member legislature represents the majority of Alaskans, but the six-member Budget & Audit Committee does not.

Mr. Henri could not see the sense of coming before the Budget & Audit Committee to make the transfers or add new people. New employees are subject to the legislature's review in the following legislative session. From a practical way of doing business, it is difficult to get the records in order now to go before the Budget & Audit Committee. The preparation of explanatory material would not have to be done if it were not for the present requirements, let alone the proposed requirements.

Mr. Henri concluded by saying they have a good workable system at this time, and nothing is done without the Governor's explicit consent.

Rep. Freeman asked Mr. Charney his opinion of SB 13. Mr. Charney explained the difficulties which may arise due to implementation of this bill, and questioned whether it referred to the operating budget or the entire budget. If it pertains to the entire budget, there would be a hindrance regarding bonds. Positions are established on the basis of a contract being awarded -- may go on for three or four years, and permanent, full-time positions are needed during that period. Going before a committee for capital projects may slow or stop the project if the establishment of such positions is not allowed.

Mr. Charney continued by explaining an agency may have funds under contractual services in their budget, and then find that another state agency can provide the necessary service. An inter-agency transfer would avoid the necessity of contracting for the service, possibly from someone outside of the state. Better ways of operation may be uncovered and a reorganization needed to transfer people, continued Mr. Charney. The problem would be agencies would not be able to operate on a day-to-day basis, but must go before the Budget & Audit Committee. This year debt service has been split among the nine program categories, and a debt service payment may be prevented or delayed due to the proposed legislation.

3/6/73

Rep. Saylor joined the meeting at 9:00 A.M.

Mr. Henri referred to the amendment that the Senate put in the bill stating workbooks should be available on the day the Governor gives the budget message. He said that frankly this is an impossibility unless the Governor concluded his thinking on the budget about the middle of December. Only when he makes his final decision can the workbooks be calculated, which now involves considerable overtime, every night and weekend, on a 24-hour basis.

Mr. Charney added the workbooks were delivered this year about nine or ten days after the budget message was delivered. He thought there was enough material on the subject of revenue to keep the legislature occupied for this period of time. Xeroxing the material was time-consuming, Mr. Charney continued, and said his division has one Xerox machine which is operated 24 hours per day, 7 or 8 days straight, in preparing the workbooks.

The witnesses were thanked and excused from the meeting.

See Attachment I

IV. ATTACHMENTS

V. DATE: 1/25/73 PREPARED BY: M. R. Charney

Original: Legislative Finance
 cc: Budget and Management
 Prime Sponsor (First Legislator Named)

ATTACHMENT I

Senate Bill 13 brings into permanent legislation the closing sections of the appropriations bill and expands the authority of the Legislative Budget and Audit Committee to include final approval of transfers between appropriations and the establishment of new positions.

Based on past experience approximately 250 revised programs are processed per year including transfers between appropriations, establishment of new positions, and requests to receive and expend additional federal and program receipts. Approximately 100 (or 40%) of these revised program requests were for establishing new positions or transfers between appropriations, with final approval or disapproval granted by the Governor. With the passage of Senate Bill 13 all revision requests would be approved by the Legislative Budget and Audit Committee.

This 40% increase in revised programs being submitted to the Committee would result in additional costs to the Division of Budget and Management, and a divergence of time which would be spent on higher priority projects.

Assuming an average of 10 revised program requests considered per meeting (14 meetings in FY 72 to consider 150 requests) an increase of 10 meetings per year could be expected if Senate Bill 13 were enacted.

100	Personal Services	\$3,500
	Deputy Director - 4 days per Anchorage meeting X 8 meetings (2 held while Legislature in Juneau)	
	Clerical and Fiscal Analyst	\$250
	4 hours per meeting at approximately \$6.00 per hour	
200	Travel	\$2,000
	4 days each X 8 meetings	

In addition, the effect of Senate Bill 13 would defeat the primary purpose of program budgeting and the intended decentralization of operating controls and improvement of executive and legislative policy controls. It was the consultant's recommendation, when approval was given by the Legislature to go to program budgeting, that the Governor be authorized to approve transfers of funds between agencies within a program category, that agencies be allowed to reallocate funds within a program, and that the Legislature be required to approve fund transfers between major state program categories.

Senate Bill 13 is not only contrary to the consultant's recommendation by disallowing the Governor to give final approval on transfers between appropriations within a category, but also prohibits the Governor from giving approval for the establishment of new positions. This would

severely restrict the response time to human needs by State government, especially in the area of supervising capital improvement projects. In addition, the administration would be forced to ignore crises situations that arise on a daily basis. The present procedure which requires Legislative Budget and Audit approval whenever additional funding becomes available makes sense, however the administration, in order to carry out its' constitutional dictates, must have the flexibility to alter program emphasis on a day to day basis in order to meet changing and/or emergency conditions.

SENATE JOURNAL

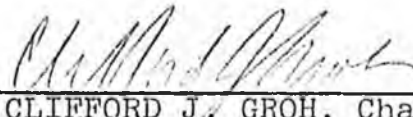

SENATE FINANCE COMMITTEE REPORT ON
COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 13

The finance committees of both houses have traditionally labored for months during each legislative session on budget work-books and related supporting material. The purpose has been to analyze state agency budgets and then establish the legislative authorization for spending during the forthcoming fiscal year. The annual product has been the General Appropriations Act.

However, as soon as the legislature adjourns and the newly budgeted fiscal year begins, state agencies begin receiving and expending additional dollars in new federal and other program receipts and transferring funds within appropriations. The agencies use these funds to create new state positions, begin new state programs or expand existing state programs. The net result is an expanded level of state operations without prior review and approval by the legislature.

Two sessions ago, the legislature began to change this procedure. Chapter 131, SLA 1971, the General Appropriations Act, contained language that made receipt of additional federal or other program receipts subject to review and approval by the Legislative Budget and Audit Committee. Last year's General Appropriations Act, Chap. 204, SLA 1972, added committee review and approval for the establishment of new, permanent positions not previously authorized in the budget. Senate Bill 13 would put these review and approval authorities in the statutes and add authority for the Budget and Audit Committee to approve reallocations between appropriation items -- approve major transfers of funds between agencies or programs.

The Committee Substitute was drafted to include the statutory requirement that budget supplement documents and related budget workbooks containing necessary background material and budget detail be available to the legislature the same day the Governor delivers his budget message.

CLIFFORD J. GROH, Chairman

2 SENATE BILL NO. 14

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 EIGHTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act providing for the issuance of general obliga-
7 tion bonds in the amount of \$10,000,000 for the pur-
8 pose of paying the cost of acquiring, constructing
9 and equipping and making other capital improvements
10 to buildings, facilities, and utilities at the com-
11 munity colleges of the University of Alaska; and
12 providing for an effective date."

13 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

14 * Section 1. For the purpose of paying the cost of acquiring, construct-
15 ing and equipping and making other capital improvements to buildings, facil-
16 ities, and utilities at the community colleges of the University of Alaska
17 general obligation bonds of the state in the principal amount of not more
18 than \$10,000,000 shall be issued and sold. The full faith, credit and
19 resources of the state are pledged to the payment of the principal of and
20 interest and redemption premium, if any, on these bonds. These bonds shall
21 be issued under the provisions of AS 37.15 as those provisions read at the
22 time of issuance.

23 * Sec. 2. If the issuance of these bonds is authorized by the qualified
24 voters of the state, a special fund of the state to be known as the "1973
25 Community Colleges Construction Bond Fund" shall be established, to which
26 shall be credited the proceeds of the sale of the bonds described in sec. 1
27 of this Act except for the accrued interest and premiums. There is appre-
28 priated from the "1973 Community Colleges Construction Bond Fund" to the
29 University of Alaska the sum of \$10,000,000. The specific uses of the

COMMITTEE COPY

1 proceeds of these bonds shall be determined by the governor.

2 * Sec. 3. If the issuance of these bonds is authorized by the qualified
3 voters of the state, the amount of \$35,000 or as much of that amount as is
4 found necessary is appropriated from the general fund of the state to the
5 state bond committee to carry out the provisions of this Act and to pay
6 expenses incident to the sale and issuance of the bonds authorized in this
7 Act. The amounts expended from the appropriation authorized by this section
8 shall be reimbursed to the general fund from the proceeds of the sale of
9 the bonds authorized by this Act.

10 * Sec. 4. The question whether the bonds authorized in this Act are to
11 be issued shall be submitted to the qualified voters of the state at the
12 next general election and shall read substantially as follows:

13 Proposition

14 State General Obligation Community

15 College Construction Bonds \$10,000,000

16 Shall the State of Alaska issue its general obligation bonds
17 in the principal amount of not more than \$10,000,000 for the
18 purpose of paying the cost of acquiring, constructing and
19 equipping and making other capital improvements to buildings,
20 facilities, and utilities at the community colleges of
21 The University of Alaska?

22 Bonds Yes []

2 SENATE BILL NO. 14

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 EIGHTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act providing for the issuance of general obliga-
7 tion bonds in the amount of \$10,000,000 for the pur-
8 pose of paying the cost of acquiring, constructing
9 and equipping and making other capital improvements
10 to buildings, facilities, and utilities at the com-
11 munity colleges of the University of Alaska; and
12 providing for an effective date."

13 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

14 * Section 1. For the purpose of paying the cost of acquiring, construct-
15 ing and equipping and making other capital improvements to buildings, facil-
16 ities, and utilities at the community colleges of the University of Alaska
17 general obligation bonds of the state in the principal amount of not more
18 than \$10,000,000 shall be issued and sold. The full faith, credit and
19 resources of the state are pledged to the payment of the principal of and
20 interest and redemption premium, if any, on these bonds. These bonds shall
21 be issued under the provisions of AS 37.15 as those provisions read at the
22 time of issuance.

23 * Sec. 2. If the issuance of these bonds is authorized by the qualified
24 voters of the state, a special fund of the state to be known as the "1973
25 Community Colleges Construction Bond Fund" shall be established, to which
26 shall be credited the proceeds of the sale of the bonds described in sec. 1
27 of this Act except for the accrued interest and premiums. There is appro-
28 priated from the "1973 Community Colleges Construction Bond Fund" to the
29 University of Alaska the sum of \$10,000,000. The specific uses of the

1 proceeds of these bonds shall be determined by the governor.

2 * Sec. 3. If the issuance of these bonds is authorized by the qualified
3 voters of the state, the amount of \$35,000 or as much of that amount as is
4 found necessary is appropriated from the general fund of the state to the
5 state bond committee to carry out the provisions of this Act and to pay
6 expenses incident to the sale and issuance of the bonds authorized in this
7 Act. The amounts expended from the appropriation authorized by this section
8 shall be reimbursed to the general fund from the proceeds of the sale of
9 the bonds authorized by this Act.

10 * Sec. 4. The question whether the bonds authorized in this Act are to
11 be issued shall be submitted to the qualified voters of the state at the
12 next general election and shall read substantially as follows:

13 Proposition

14 State General Obligation Community

15 College Construction Bonds \$10,000,000

16 Shall the State of Alaska issue its general obligation bonds
17 in the principal amount of not more than \$10,000,000 for the
18 purpose of paying the cost of acquiring, constructing and
19 equipping and making other capital improvements to buildings,
20 facilities, and utilities at the community colleges of
21 The University of Alaska?

22 Bonds Yes []

23 Bonds No []

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

- This \$10.0 million in G.O. Bonds could not be voted on in a General Election until November 1974; therefore, the University prefers to include this amount of Capital projects in its 1974 G.O. Bond request to the 1974 Legislative Session.
- This amount and more could easily be justified to handle enrollments through to fall 1978, the period that must be provided for in a 1974 Bond Issue.
- The following schedule of facility needs are needed through the period to fall 1978 as follows:

	SQ. FT.	PROJECT COST	TOTAL COST (Millions)
Anchorage Community College	180,000	@ \$70 =	\$12.6
Kenai Community College	18,500	@ 70 =	1.3

January 12, 1973

Senator John Sackett, Chairman
Senate Resources Committee
Alaska State Senate

Subject: SB 22 - Funding of two Botanist positions within
the Department of Natural Resources

The sum of \$80,000 is requested to fund two Botanist positions within the Department of Natural Resources. They will be located with the Alaska Division of Agriculture in Palmer and, with the two present agronomists, shall form the professional staff of the Plant Materials Center.

The 1972 Legislature passed legislation creating a Plant Materials Center to be located in the Matanuska Valley with the primary objective being the creation of a viable seed and plant materials industry in Alaska. The center constitutes a means whereby the State can initiate supplies of adapted plant materials to the various areas within Alaska, thus making possible adaptable revegetation projects and will help to save individuals and agencies a substantial amount of money and effort on wasted plant materials that are not conducive to the Alaskan environment.

Programs instigated by the Center have the basic objective of assembling, evaluating, selecting, and increasing the plant materials needed in soil and water conservation, agriculture, and other industries, and to maintain genetic purity of these materials.

Follow-up objectives are to propagate promising materials by field plantings on sites that represent soil and climatic conditions not similar to those at the Center and

Senator John Sackett

- 2 -

January 12, 1973

to provide and maintain basic seed stocks for agriculture and conservation interests.

Because much of our Northern Alaska vegetation, soils, and climatic conditions differ from other states, it is felt that to fully implement the professional staff of the Center, two Botanists to supplement the presently approved agronomist positions would give the facility the needed staffing now, especially with the pending developments in Northern Alaska. Knowledgeable people to gather the basic native plant materials for propagation is critical, as is the selection of non-native materials for successful adaption, especially in the northern areas.

To fully implement a professional position of this type and provide the travel and necessary supplies and facilities, \$40,000 annually is necessary.

Charles F. Herbert, Commissioner
Department of Natural Resources

TO: The Natural Resources Committee

I am writing in support of Senate Bill 22. As you are aware, the last Legislature authorized the establishment of a plant material center as a joint effort of the Department of Natural Resources and the Institute of Agricultural Sciences.

The establishment of the center is proceeding very well and I believe it will be in operation with fields planted by this coming summer's growing season.

In order for this State plant material center to be most effective in developing materials for use by all Alaskans, it is necessary that efforts be made to obtain as much and as diverse material as possible from climatically similar areas.

The Institute of Agricultural Sciences has had a collection program for Alaskan grasses and legumes since 1956. This was supported for several years by grants from the Rockefeller Foundation and is presently supported primarily by grants from various oil companies and the pipeline company who are interested in re-vegetation of disturbed areas with adapted northern plants.

From this work has come nugget blue grass which is in the process of market development throughout the U. S. and northern Europe and arctared fescue. These two varieties, in addition to their usefulness throughout Alaska and elsewhere are the two most promising varieties

for re-vegetation on the North Slope. These varieties are being produced by Alaskan seed growers.

The plant material center is designed basically for the support of agriculture, but it must be kept clearly in mind that agriculture in Alaska means much more than just the growing of crops. It also means the restoration and healing of the scars of construction whether this is pipeline, highway, apartment or housing developments. It means the production of food by commercial producers and home gardeners. It means beautification of homes and commercial landscaping. It means houseplants and flowers. It means fruit and scrubs. All of these use the methods, material and techniques of traditional agriculture and all have the same kind of agriculture.

Experience gained by the Institute over the past 25 years of varital screening shows clearly that we cannot depend on plant material collected, selected and maintained by and for people in the other states. As an example, we have tested the world collection of several of the cereal grains for their adaptation to Alaska conditions. From these only the Scandinavian and Russian material has been of value here, and this material was limited. It was discussed later that original collection had been screened in other areas before being tested in Alaska and they were not truly world collections. In addition, these so called world collections are maintained in warm areas such as Arizona where the shorter days of growing season have a detrimental effect on varieties adapted to the north, and it is likely that many varieties with potential use in Alaska were lost.

No where in the world is there a center for plant materials adapted to the north. The establishment of the Alaska plant material center in addition to providing a gene bank of Alaskan materials for use by Alaskans, also opens the door to the possibility of the development of an international gene bank for useful northern plant material. Not only will these plant materials be of value to Alaskans themselves but the establishment of an Alaskan gene bank could serve to attract considerable funding from various foundations and other sources. Because of Alaska's strategic, geographical location, such development would establish Alaska as a center for seed production of plants adapted to northern areas around the world.

In addition to the advantages to be derived from SB 22 in the accumulation of valuable plant materials there are two other specific benefits that should come of this. One is the contacts that can be developed with the people in the areas of collection which can be and undoubtedly will be of long and fruitful duration. Future exchanges of materials would thereby be facilitated on a person to person basis. Secondly and perhaps as important is the plant materials themselves would be the cultural technique invaluable in growing much of this material. Not only has Alaska in the past imported its varieties from the other states but we have also directly imported the method for growing these varieties. The importation of techniques would be especially important in the case of fruits and ornamentals, techniques already adapted to areas similar in climate to Alaska. Having visited research stations throughout northern Europe in 1958 and having spent a year doing research at the Norwegian Agricultural

College in Nollebeck, Norway in 1961-62, I am keenly aware that a great deal of information and plant materials have been developed in northern Europe of which we have been unable to take advantage.

Because we are faced with stringent State budgets, I think we have to consider investments in renewable resources that stand to return to the State a great deal more than the amount invested. One such involvement which should return long-term benefits to all Alaskans would be the support of plant materials collected as specified in SB 22.

January 12, 1973

Senator John Sackett, Chairman
Senate Resources Committee
Alaska State Senate

Subject: SB 22 - Funding of two Botanist positions within
the Department of Natural Resources

The sum of \$80,000 is requested to fund two Botanist positions within the Department of Natural Resources. They will be located with the Alaska Division of Agriculture in Palmer and, with the two present agronomists, shall form the professional staff of the Plant Materials Center.

The 1972 Legislature passed legislation creating a Plant Materials Center to be located in the Matanuska Valley with the primary objective being the creation of a viable seed and plant materials industry in Alaska. The center constitutes a means whereby the State can initiate supplies of adapted plant materials to the various areas within Alaska, thus making possible adaptable revegetation projects and will help to save individuals and agencies a substantial amount of money and effort on wasted plant materials that are not conclusive to the Alaskan environment.

Programs instigated by the Center have the basic objective of assembling, evaluating, selecting, and increasing the plant materials needed in soil and water conservation, agriculture, and other industries, and to maintain genetic purity of these materials.

Follow-up objectives are to propagate promising materials by field plantings on sites that represent soil and climatic conditions not similar to those at the Center and

Senator John Sackett

- 2 -

January 12, 1973

to provide and maintain basic seed stocks for agriculture and conservation interests.

Because much of our Northern Alaska vegetation, soils, and climatic conditions differ from other states, it is felt that to fully implement the professional staff of the Center, two Botanists to supplement the presently approved agronomist positions would give the facility the needed staffing now, especially with the pending developments in Northern Alaska. Knowledgeable people to gather the basic native plant materials for propagation is critical, as is the selection of non-native materials for successful adaption, especially in the northern areas.

To fully implement a professional position of this type and provide the travel and necessary supplies and facilities, \$40,000 annually is necessary.

Charles F. Herbert, Commissioner
Department of Natural Resources

TO: The Natural Resources Committee

I am writing in support of Senate Bill 22. As you are aware, the last Legislature authorized the establishment of a plant material center as a joint effort of the Department of Natural Resources and the Institute of Agricultural Sciences.

The establishment of the center is proceeding very well and I believe it will be in operation with fields planted by this coming summer's growing season.

In order for this State plant material center to be most effective in developing materials for use by all Alaskans, it is necessary that efforts be made to obtain as much and as diverse material as possible from climatically similar areas.

The Institute of Agricultural Sciences has had a collection program for Alaskan grasses and legumes since 1956. This was supported for several years by grants from the Rockefeller Foundation and is presently supported primarily by grants from various oil companies and the pipeline company who are interested in re-vegetation of disturbed areas with adapted northern plants.

From this work has come nugget blue grass which is in the process of market development throughout the U. S. and northern Europe and arctared fescue. These two varieties, in addition to their usefulness throughout Alaska and elsewhere are the two most promising varieties

for re-vegetation on the North Slope. These varieties are being produced by Alaskan seed growers.

The plant material center is designed basically for the support of agriculture, but it must be kept clearly in mind that agriculture in Alaska means much more than just the growing of crops. It also means the restoration and healing of the scars of construction whether this is pipeline, highway, apartment or housing developments. It means the production of food by commercial producers and home gardeners. It means beautification of homes and commercial landscaping. It means houseplants and flowers. It means fruit and scrubs. All of these use the methods, material and techniques of traditional agriculture and all have the same kind of agriculture.

Experience gained by the Institute over the past 25 years of varital screening shows clearly that we cannot depend on plant material collected, selected and maintained by and for people in the other state. As an example, we have tested the world collection of several of the cereal grains for their adaptation to Alaska conditions. From these only the Scandinavian and Russian material has been of value here, and this material was limited. It was discussed later that original collection had been screened in other areas before being tested in Alaska and they were not truly world collections. In addition, these so called world collections are maintained in warm areas such as Arizona where the shorter days of growing season have a detrimental effect on varieties adapted to the north, and it is likely that many varieties with potential use in Alaska were lost.

No where in the world is there a center for plant materials adapted to the north. The establishment of the Alaska plant material center in addition to providing a gene bank of Alaskan materials for use by Alaskans, also opens the door to the possibility of the development of an international gene bank for useful northern plant material. Not only will these plant materials be of value to Alaskans themselves but the establishment of an Alaskan gene bank could serve to attract considerable funding from various foundations and other sources. Because of Alaska's strategic, geographical location, such development would establish Alaska as a center for seed production of plants adapted to northern areas around the world.

In addition to the advantages to be derived from SB 22 in the accumulation of valuable plant materials there are two other specific benefits that should come of this. One is the contacts that can be developed with the people in the areas of collection which can be and undoubtedly will be of long and fruitful duration. Future exchanges of materials would thereby be facilitated on a person to person basis. Secondly and perhaps as important is the plant materials themselves would be the cultural technique invaluable in growing much of this material. Not only has Alaska in the past imported its varieties from the other states but we have also directly imported the method for growing these varieties. The importation of techniques would be especially important in the case of fruits and ornamentals, techniques already adapted to areas similar in climate to Alaska. Having visited research stations throughout northern Europe in 1958 and having spent a year doing research at the Norwegian Agricultural

College in Nollebeck, Norway in 1961-62, I am keenly aware that a great deal of information and plant materials have been developed in northern Europe of which we have been unable to take advantage.

Because we are faced with stringent State budgets, I think we have to consider investments in renewable resources that stand to return to the State a great deal more than the amount invested. One such involvement which should return long-term benefits to all Alaskans would be the support of plant materials collected as specified in SB 22.
