6 For an Act entitled: "An Act relating to hiring of Alaska residents as
7 school teachers."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 * Section 1. AS 14.20 is amended by adding a new section to read:

10 Sec. 14.20.220. HIRING OF ALASKA RESIDENTS AS TEACHERS. (a) Each
11 public school district that hires either a teacher who has been awarded
12 a bachelor's degree from an accredited institution of higher learning
13 located in Alaska, or a teacher who has resided in Alaska for one year
14 immediately before the commencement of their initial teaching duties,
15 shall be granted a sum of money in accordance with (b) of this section.

16 (b) Each public school district that hires a teacher which satis-
17 fies the requirements of (a) of this section is entitled to the sum of
18 \$3,000 for the first year of the teacher's employment, the sum of \$2,000
19 for the second year of the teacher's employment and \$1,000 for the third
20 year of the teacher's employment.

BY THE STATE AFFAIRS COMMITTEE

2 CS FOR HOUSE BILL NO. 741

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 NINTH LEGISLATURE - SECOND SESSION

5 A BILL

6 For an Act entitled: "An Act establishing the Alaska Highway Board; prescrib-
7 ing its organization, powers and duties; and providing
8 for an effective date."

9 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

10 * Section 1. AS 44.44.010 is amended to read:

11 Sec. 44.44.010. ORGANIZATION; ADMINISTRATION [COMMISSIONER OF
12 HIGHWAYS]. (a) There is created the Alaska Highway Board in the
13 Department of Highways. The department is under the control and super-
14 vision of the board. Administrative authority and those duties that
15 may be prescribed by law, or delegated to him by the board, are vested
16 in the commissioner.

17 (b) The principal executive officer of the Department of Highways
18 is the commissioner of highways.

19 * Sec. 2. AS 44.44 is amended by adding a new section to read:

20 Sec. 44.44.015. APPOINTMENT AND TERM OF OFFICE OF COMMISSIONER;
21 VACANCY. (a) The governor shall appoint the commissioner of highways
22 from a list of qualified persons nominated by the Alaska Highway Board
23 subject to the right of the governor to request additional nominations.
24 The appointment shall be confirmed by a majority of the members of the
25 legislature in joint session. The commissioner of highways serves for
26 a term of five years. He may be removed during his term of office by
27 four members of the board for cause. In this subsection, "cause" means

28 (1) incompetency which is the inability or the unintentional
29 or intentional failure to perform the duties of the commissioner;

1 (2) immorality which is the commission of an act which,
2 under the laws of the state, constitutes a crime involving moral turpi-
3 tude; or

4 (3) malfeasance or misfeasance in office which includes, but
5 is not limited to, the failure of the commissioner to comply with the
6 regulations adopted by the board.

7 (b) If a vacancy occurs in the office of the commissioner of high-
8 ways, the governor shall appoint a successor for the unexpired term in
9 the same manner as provided for original appointment.

10 * Sec. 3. AS 19.05.010 is amended to read:

11 Sec. 19.05.010. BOARD [DEPARTMENT] TO SUPERVISE HIGHWAY SYSTEM.
12 The department is responsible for the planning, construction, mainte-
13 nance and [,] protection [AND CONTROL] of the state highway system
14 under the supervision and control of the Alaska Highway Board.

15 * Sec. 4. AS 19.05.020 is amended to read:

16 Sec. 19.05.020. REGULATIONS. Subject to the Administrative Proce-
17 cedure Act (AS 44.62), the board [THE DEPARTMENT] shall promulgate [ADOPT
18 RULES AND] regulations necessary to carry out the purpose of chs. 5 -
19 25 of this title.

20 * Sec. 5. AS 19.05.130 is amended by adding a new paragraph to read:

21 (14) "board" means the Alaska Highway Board.

22 * Sec. 6. AS 19 is amended by adding new chapters to read:

23 CHAPTER 7. ALASKA HIGHWAY BOARD.

24 Sec. 19.07.010. BOARD CREATED. There is created the Alaska
25 Highway Board in the Department of Highways. The board consists of
26 five members appointed by the governor, subject to confirmation by a
27 majority of the members of the legislature in joint session.

28 Sec. 19.07.020. QUALIFICATIONS. Each board member shall be a
29 resident of the state for one year before appointment and while serving

1 on the board. One member shall be appointed from each judicial district
2 and one shall be appointed at large.

3 Sec. 19.07.030. TERM OF OFFICE; VACANCIES. The members of the
4 board shall be appointed for staggered five-year terms, with the term
5 of office of one member expiring each year. The first members appointed
6 serve for terms of one, two, three, four, and five years. Initial
7 terms date from February 1 immediately preceding appointment. If a
8 vacancy occurs, the governor shall fill it by appointment for the
9 unexpired term, and the appointment shall be submitted to the legisla-
10 ture for confirmation at the next regular or special session.

11 Sec. 19.07.040. REMOVAL OF BOARD MEMBERS. The governor may
12 remove a board member for inefficiency, neglect of duty, or misconduct
13 in office by delivering to him a written copy of the charges and giving
14 him an opportunity to be heard in person or through counsel at a public
15 hearing before the governor or his designee upon at least 10 days
16 notice by certified or registered mail. The member has the right to
17 confrontation by and cross-examination of all witnesses against him.
18 Upon removal the governor or his designee shall file a complete state-
19 ment of all charges made against the member and the findings in the
20 office of the lieutenant governor.

21 Sec. 19.07.050. OFFICERS. The chairman and vice-chairman shall
22 be elected from among the board members for a one-year term, and no
23 member of the board may serve as chairman for more than two consecutive
24 one-year terms.

25 Sec. 19.07.060. MEETINGS, RULES, VOTES REQUIRED. (a) The board
26 shall prescribe its own rules of procedure. A quorum is a majority of
27 the members of the board.

28 (b) The votes of the board members shall be recorded, and effec-
29 tive action requires the affirmative vote of a majority of the board

1 members present. No board member may, with respect to a matter before
2 the board, vote for or on behalf of, or in any way exercise the vote
3 of, another member of the board.

4 (c) The board shall meet at least once quarterly at a time and
5 place determined by the chairman, and at other times and places as the
6 chairman, a majority of the members of the board, or the commissioner
7 of highways consider necessary.

8 Sec. 19.07.070. OFFICE. The board shall maintain its office at
9 the principal office of the department.

10 Sec. 19.07.080. COMPENSATION AND PER DIEM. Members of the board
11 serve without compensation but are entitled to per diem and travel
12 expenses as may be authorized by law for boards and commissions.

13 Sec. 19.07.090. DEFINITIONS. In this chapter "board" means the
14 Alaska Highway Board.

15 CHAPTER 8. DEPARTMENTAL ORGANIZATION: DECENTRALIZATION:

16 REGIONAL AND STATE ADVISORY BOARDS.

17 Sec. 19.08.010. ORGANIZATION: DECENTRALIZATION. The commissioner
18 is responsible for the supervision and control of the organization,
19 management and operation of the department. However, the commissioner
20 shall, by regulation, decentralize the administration and operation of
21 the department consistent with the provisions of this chapter. He shall
22 appoint, with the approval of the governor, a regional highways director
23 in each of the state's six major physiographic regions and shall pre-
24 scribe the organization, powers and duties of that office consistent
25 with the provisions of this chapter and this title.

26 Sec. 19.08.020. REGIONAL HIGHWAY ADVISORY BOARDS. (a) The com-
27 missioner shall establish a regional highway advisory board in each of
28 the state's six major physiographic regions comprised of residents of
29 the respective regions. The boards shall advise the commissioner and

1 shall, with the assistance of the regional highway director, prepare
2 recommendations on highway-related public policy, departmental operations
3 and capital improvements programming within their respective regions.

4 (b) To avoid duplication of governmental agencies or disruption of
5 on-going regional transportation efforts, the commissioner may designate
6 an existing nonprofit, public interest regional organization as a
7 regional highway advisory board if the composition of the governing body
8 of that regional organization as prescribed in its charter, articles of
9 incorporation or bylaws meets the requirements for representation pre-
10 scribed for a regional highway advisory board under sec. 30(a) of this
11 chapter.

12 Sec. 19.08.030. MEMBERSHIP. (a) The membership of each regional
13 highway advisory board shall provide for the balanced representation of
14 both public and private interests within the region and for the effec-
15 tive representation of the interests of highway users, motor vehicle
16 operators, and regulated carriers. The membership of each regional
17 advisory board may not exceed 20 and in any event shall comprise an un-
18 even number of members. A majority of the total membership of a board
19 shall be elected public officials of municipalities organized under
20 AS 29 and located in the region.

21 (b) Each mayor of a unified municipality, borough, home rule or
22 first class city exercising planning and zoning powers shall appoint one
23 member to the regional highway advisory board in which the municipality
24 is located. The commissioner shall appoint individuals to the remaining
25 seats on each board, subject to the membership limitations of (a) of
26 this section. His appointments shall be made from lists of nominees
27 submitted by the governing bodies of municipalities located within each
28 region and by organizations headquartered within each region.

29 Sec. 19.08.040. ADVISORY BOARD ORGANIZATION. Each board shall

1 prescribe its own rules of procedure which shall include, but are not
2 limited to, provisions for the election of a presiding officer annually,
3 for regular and special meetings of the board, a quorum at these meet-
4 ings and for the number of votes required to take effective action.

5 Sec. 19.08.050. STATE HIGHWAY ADVISORY BOARD. There is created
6 the state Highway Advisory Board consisting of the presiding officers
7 of the six regional transportation advisory boards. This board shall
8 meet at least annually in the fall quarter of each calendar year to

9 (1) review the work of the regional highway advisory boards
10 during the previous year;

11 (2) review the department's proposed capital improvements
12 program;

13 (3) prepare recommendations on statewide highway policy,
14 departmental operations and capital improvements programming for pre-
15 sentation toward consideration by the governor in accordance with the
16 provisions of this title.

17 CHAPTER 9. STATE TRANSPORTATION PLAN.

18 Sec. 19.09.010. STATE TRANSPORTATION PLAN. The commissioner shall
19 develop and keep current by periodic revision, at intervals not less
20 frequent than five years, a comprehensive intermodal long-range trans-
21 portation plan for the state. The state plan shall consider means and
22 costs of improving existing modes and facilities, state subsidies, and
23 the costs and benefits of new transportation modes and facilities.

24 Sec. 19.09.020. PUBLIC PARTICIPATION. In developing and revising
25 the plan prescribed in sec. 10 of this chapter, the commissioner shall
26 seek public review and evaluation by any reasonable means and shall

27 (1) consult and cooperate with officials and representatives
28 of the federal government, other governments, interstate commissions
29 and authorities, local agencies and authorities, interested corporations

1 and other organizations concerning problems affecting transportation in
2 the state; and

3 (2) request and receive from an agency or other unit of state
4 government or of a political subdivision of it, or from a public author-
5 ity, the assistance and data that may be necessary to enable the commis-
6 sioner to carry out his responsibilities under this section.

7 Sec. 19.09.030. LEGISLATIVE REVIEW. The commissioner shall submit
8 copies of proposed policies and plans annually to the legislature within
9 10 days after the legislature convenes. The legislature may approve,
10 reject or modify the policies and plans by concurrent resolution. If
11 the legislature fails to act during the legislative session the policies
12 and plans are approved.

13 Sec. 19.09.040. PUBLIC DOCUMENT. Copies of the plan, as revised,
14 shall be kept on file as a public document in the office of the commis-
15 sioner and at each regional or district office of the department.

16 Sec. 19.09.050. PUBLIC HEARINGS AND SURVEYS. (a) When a major
17 new state transportation facility or a significant extension or altera-
18 tion of an existing system or facility is proposed, the department shall
19 give notice of the proposal and of the opportunity to request a public
20 hearing to the governing body of an affected municipality and residents
21 of each affected community. The purpose of this notice is to provide
22 information to the governing body and those residents and provide an
23 opportunity for informed public review of a proposal from the earliest
24 time practicable.

25 (b) In giving notice under this section, the notice shall describe
26 the project, invite written comments regarding the proposal, inform that
27 all current and relevant information regarding the proposal will be made
28 available in at least one designated location within the affected com-
29 munity, and inform that basic information regarding the proposal will be

1 provided upon the request of any person. The notice shall also inform
2 that a public hearing will be held upon the written request of the
3 governing body of an affected municipality or of at least 20 interested
4 residents of the affected community.

5 (c) If the governing body of an affected municipality requests a
6 hearing, the hearing shall be sponsored by or take place before that
7 governing body. Otherwise the public hearing may be held by the Alaska
8 Highway Board at any convenient location. If a public hearing is held,
9 the deadline for written comment may be not earlier than 30 days follow-
10 ing the hearing.

11 (d) At a public hearing the department shall describe the pro-
12 posal, identify the essential considerations in favor of and in opposi-
13 tion to it, and receive comments and answer questions from any interested
14 person. In addition, at a hearing, to the extent they have been devel-
15 oped, the department shall present its recommendations regarding the
16 proposal, its costs and benefits, its environmental and social effects,
17 and the alternatives which have been considered including the alterna-
18 tive of not constructing a facility.

19 (e) The department shall conduct surveys of the residents of each
20 affected community to enable the residents to express opinions regarding
21 the proposal.

22 (f) Within 90 days following a hearing the department shall pre-
23 pare and mail to the governing body of an affected municipality and to
24 each known interested person a report which summarizes the oral testi-
25 mony and written comments received and the results of surveys and other
26 relevant data and which informs whether and to what extent the proposal
27 has been modified as a result of public comments, surveys and other
28 relevant data.

29 (g) This section does not apply to improvements or modifications

1 to existing facilities which do not significantly affect the environment
2 nor to actions and repairs which may be necessary to meet a disaster or
3 emergency which threatens human lives.

4 (h) For purposes of this section,

5 (1) "affected community" means a municipality or an unincor-
6 porated village of 25 or more persons which is directly served by an
7 existing facility, or where an existing facility is actually located or
8 in which a proposed facility would actually be located, or which would
9 be directly served by a proposed facility;

10 (2) "municipality" means a home rule or general law borough
11 or city including but not limited to a unified municipality organized
12 under AS 29.68.

13 Sec. 19.09.060. REGULATIONS. The commissioner shall adopt regu-
14 lations under the Administrative Procedure Act (AS 44.62) to implement
15 this chapter.

16 * Sec. 7. If at any time legislation is enacted creating a Department of
17 Transportation, including but not limited to the consolidation within that
18 department of the functions, powers and duties of the existing Department of
19 Highways and the divisions of marine transportation, waters and harbors,
20 aviation and communications of the Department of Public Works, the Alaska
21 Highway Board, its members, officers and employees, functions, duties, and
22 responsibilities shall be transferred from the Department of Highways to the
23 Department of Transportation, and the board's name shall be changed from the
24 Alaska Highway Board to the Alaska Transportation Board. The board shall
25 have the same authority with respect to the Department of Transportation, and
26 the commissioner of transportation, as the board had with respect to the
27 Department of Highways, and the commissioner of highways.

28 * Sec. 8. This Act takes effect July 1, 1976.

1 IN THE HOUSE

2 HOUSE BILL NO. 741

3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 NINTH LEGISLATURE - SECOND SESSION

5 A BILL

6 For an Act entitled: "An Act establishing the Alaska Highway Commission; and
7 providing for an effective date."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 * Section 1. AS 44.44.010 is amended to read:

10 Sec. 44.44.010. ORGANIZATION; ADMINISTRATION [COMMISSIONER OF
11 HIGHWAYS]. (a) There is created the Alaska Highway Commission in the
12 Department of Highways. The department is under the control and super-
13 vision of the commission. Administrative authority and those duties
14 that may be prescribed by law, or delegated to him by the commission,
15 are vested in the commissioner.

16 (b) The principal executive officer of the Department of Highways
17 is the commissioner of highways.

18 * Sec. 2. AS 44.44 is amended by adding a new section to read:

19 Sec. 44.44.015. APPOINTMENT AND TERM OF OFFICE OF COMMISSIONER;
20 VACANCY. (a) The governor shall appoint the commissioner of highways
21 from a list of qualified persons nominated by the Alaska Highway Commis-
22 sion, subject to the right of the governor to request additional nomina-
23 tions. The appointment shall be confirmed by a majority of the members
24 of the legislature in joint session. The commissioner of highways serves
25 for a term of five years.

26 (b) If a vacancy occurs in the office of the commissioner of high-
27 ways, the governor shall appoint a successor for the unexpired term in
28 the same manner as provided for original appointment.

29 (c) The Alaska Highway Commission may submit a resolution to the

COMMITTEE COPY

1 governor requesting the removal of the commissioner. The resolution
2 shall set out the grounds for the request, and the governor shall give
3 the commissioner and the commission an opportunity to be heard.

4 * Sec. 3. AS 19.05.010 is amended to read:

5 Sec. 19.05.010. COMMISSION [DEPARTMENT] TO SUPERVISE HIGHWAY
6 SYSTEM. The department is responsible for the planning, construction,
7 maintenance and [,] protection [AND CONTROL] of the state highway
8 system under the supervision and control of the Alaska Highway Commis-
9 sion.

10 * Sec. 4. AS 19.05.020 is amended to read:

11 Sec. 19.05.020. REGULATIONS. Subject to the Administrative Proce-
12 cedure Act (AS 44.62), the commission [THE DEPARTMENT] shall promulgate
13 [ADOPT RULES AND] regulations necessary to carry out the purpose of
14 chs. 5 - 25 of this title.

15 * Sec. 5. AS 19.05.130 is amended by adding a new paragraph to read:

16 (14) "commission" means the Alaska Highway Commission.

17 * Sec. 6. AS 19 is amended by adding a new chapter to read:

18 CHAPTER 7. ALASKA HIGHWAY COMMISSION.

19 Sec. 19.07.010. COMMISSION CREATED. There is created the Alaska
20 Highway Commission in the Department of Highways. The commission con-
21 sists of five members appointed by the governor, subject to confirmation
22 by a majority of the members of the legislature in joint session.

23 Sec. 19.07.020. QUALIFICATIONS. Each commission member shall be
24 a resident of the state for one year before appointment and while serving
25 on the commission. One member shall be appointed from each judicial
26 district and one shall be appointed at large.

27 Sec. 19.07.030. TERM OF OFFICE; VACANCIES. The members of the
28 commission shall be appointed for staggered five-year terms, with the
29 term of office of one member expiring each year. The first members

1 appointed serve for terms of one, two, three, four, and five years.
2 Initial terms date from February 1 immediately preceding appointment.
3 If a vacancy occurs, the governor shall fill it by appointment for the
4 unexpired term, and the appointment shall be submitted to the legisla-
5 ture for confirmation at the next regular or special session.

6 Sec. 19.07.040. REMOVAL OF COMMISSION MEMBERS. The governor may
7 remove a commission member for inefficiency, neglect of duty, or mis-
8 conduct in office by delivering to him a written copy of the charges
9 and giving him an opportunity to be heard in person or through counsel
10 at a public hearing before the governor or his designee upon at least
11 10 days notice by certified or registered mail. The member has the
12 right to confrontation by and cross-examination of all witnesses against
13 him. Upon removal the governor or his designee shall file a complete
14 statement of all charges made against the member and the findings in
15 the office of the lieutenant governor.

16 Sec. 19.07.050. OFFICERS. The chairman and vice-chairman shall
17 be elected from among the commission members for a one-year term, and
18 no member of the commission may serve as chairman for more than two
19 consecutive one-year terms.

20 Sec. 19.07.060. MEETINGS, RULES, VOTES REQUIRED. (a) The commis-
21 sion shall prescribe its own rules of procedure. A quorum is a majority
22 of the members of the commission.

23 (b) The votes of the commission members shall be recorded, and
24 effective action requires the affirmative vote of a majority of the com-
25 mission members present. No commission member may, with respect to a
26 matter before the commission, vote for or on behalf of, or in any way
27 exercise the vote of, another member of the commission.

28 (c) The commission shall meet at least once quarterly at a time
29 and place determined by the chairman, and at other times and places as

1 the chairman, a majority of the members of the commission, or the com-
2 missioner of highways consider necessary.

3 Sec. 19.07.070. OFFICE. The commission shall maintain its office
4 at the principal office of the department.

5 Sec. 19.07.080. COMPENSATION AND PER DIEM. Members of the commis-
6 sion serve without compensation but are entitled to per diem and travel
7 expenses as may be authorized by law for boards and commissions.

8 Sec. 19.07.080. DEFINITIONS. In this chapter

- 9 (1) "commission" means the Alaska Highway Commission;
10 (2) "commissioner" means the commissioner of highways;
11 (3) "department" means the Department of Highways.

12 * Sec. 7. If at any time legislation is enacted creating a Department of
13 Transportation, including but not limited to the consolidation within that
14 department of the functions, powers and duties of the existing Department of
15 Highways and the divisions of marine transportation, waters and harbors,
16 aviation and communications of the Department of Public Works, the Alaska
17 Highway Commission, its members, officers and employees, functions, duties,
18 and responsibilities shall be transferred from the Department of Highways to
19 the Department of Transportation, and the commission's name shall be changed
20 from the Alaska Highway Commission to the Alaska Transportation Board. The
21 board shall have the same authority with respect to the Department of Trans-
22 portation, and the commissioner of transportation, as the commission has with
23 respect to the Department of Highways, and the commissioner of highways.

24 * Sec. 8. This Act takes effect July 1, 1976.

THE LEGISLATURE OF THE STATE OF ALASKA
FISCAL NOTE

Second Session - Ninth Legislature

I. REQUEST

Bill No. House Bill No. 746
 Title: Special appropriation for Port Development at Unalaska
 Requested by: House State Affairs Date: March 2, 1976
 Return Date Requested: March 3, 1976
 Agency: Public Works Program: Water & Harbors

II. FISCAL DETAIL

Budget Request Unit(s) Affected: Water and Harbors

A. EXPENDITURES: (Thousands of dollars)

OBJECT	FY 76	FY 77	FY 78	FY 79	FY 80	FY 81
100 PERSONAL SERVICES						
200 TRAVEL						
300 CONTRACTUAL		750.0				
400 COMMODITIES						
500 EQUIPMENT						
600 LAND & STRUCTURES						
700 GRANTS, CLAIMS, ETC.						
TOTAL		750.0				

B. FUNDING: (Thousands of dollars)

GENERAL FUND		750.0				
FEDERAL FUNDS						
OTHER						

C. POSITIONS:

PERMANENT/TEMPORARY	/	/	/	/	/	/
MAN MONTHS (P./T.)	/	/	/	/	/	/

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is assumed that this appropriation will be added to the Water and Harbors program to be used to complete the port and harbor facility now under study at Unalaska. The presently authorized \$750,000 from the 1974 Port Development Bond Fund is not sufficient to construct a port facility at Unalaska. The additional funding provided by HB 746 could be combined with available funds thereby permitting development of a viable project.

4 NINTH LEGISLATURE - SECOND SESSION

5 A BILL

6 For an Act entitled: "An Act providing for the issuance of general obliga-
7 tion bonds in the amount of \$4,500,000 for the purpose
8 of paying the cost of the Chena River Flood Control
9 Project; and providing for an effective date."

10 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

11 * Section 1. For the purpose of paying the cost of the Chena River Flood
12 Control Project, general obligation bonds of the state in the principal
13 amount of not more than \$4,500,000 shall be issued and sold. The full faith,
14 credit and resources of the state are pledged to the payment of the principal
15 of and interest and redemption premium, if any, on these bonds. These bonds
16 shall be issued under the provisions of AS 37.15 as those provisions read at
17 the time of issuance.

18 * Sec. 2. If the issuance of these bonds is authorized by the qualified
19 voters of the state, a special fund of the state to be known as the "Chena
20 River Flood Control Project Fund" shall be established, to which shall be
21 credited the proceeds of the sale of the bonds described in sec. 1 of this
22 Act except for the accrued interest and premiums. There is appropriated from
23 the "Chena River Flood Control Project Fund" to the Department of Public
24 Works the amount of \$4,500,000.

25 * Sec. 3. If the issuance of these bonds is authorized by the qualified
26 voters of the state, the amount of \$15,750 or as much of that amount as is
27 found necessary is appropriated from the general fund of the state to the
28 state bond committee to carry out the provisions of this Act and to pay
29 expenses incident to the sale and issuance of the bonds authorized in this

1 Act. The amounts expended from the appropriation authorized by this section
2 shall be reimbursed to the general fund from the proceeds of the sale of the
3 bonds authorized by this Act.

4 * Sec. 4. The question whether the bonds authorized in this Act are to be
5 issued shall be submitted to the qualified voters of the state at the next
6 general election and shall read substantially as follows:

7 Proposition

8 State General Obligation Chena River Flood

9 Control Project Bonds \$4,500,000

10 Shall the State of Alaska issue its general obligation
11 bonds in the principal amount of not more than \$4,500,000
12 for the purpose of paying the cost of the Chena River
13 Flood Control Project?

14 Bonds Yes []

15 Bonds No []

16 * Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-
17 070(c).

Chapter No.

March 3, 1978

Reverend Hugh Downs
Chairman, News Forum Commission
Atlanta House Legislative
State Capitol - Fourth V
Florence, Atlanta GA 30333

Dear Representative Downs:

A further review of my 1977 letter to the commission that it be amended to include a section regarding Chapter 105, S.B. 1075 from the 1977 session of the Georgia General Assembly. Your committee has been operating during the current year under the assumption that they would be allowed to take measures to amend Chapter 105. If this authority was removed from the jurisdiction of the committee, it would probably lead to considerable confusion and the possibility of a number of resolutions or amendments of problems or conditions about right now actually exist. I feel it would be best to refer to the committee about the Chapter 105 and the current rules and that report- while the we wait for future operating opportunities and special projects about state.

In addition to the above I would like to mention Chapter 105 of House Bill 1075 to early possible completion because special projects and business capital and operating opportunities. I feel that there have been very few cases where legislative language operating opportunities have been approved by members of the legislature. In fact I would like to mention Chapter 105 and the members of the legislature who have been for the benefit of it and the members of members of the legislature. In my report we have to understand it to have completed the structure immediately when the bill was introduced to the House.

Sincerely,

A. Tom News
Chairman

Land Use Element Fairbanks North Star Borough COMPREHENSIVE DEVELOPMENT PLAN

INTRODUCTION

A LAND USE PLAN is intended to be a graphic policy document, created to guide the long range development of a community. The plan is based upon physical, social, and economic realities which exist in the community, and upon the generally accepted short range goals and objectives set forth by the community. In operation the plan provides visual relationships to support processes and priorities, established to utilize the community's most valuable asset - its LAND - to meet its CITIZENS' needs and desires for improving the quality of their life.

A LAND USE PLAN is often interpreted as a zoning plan, and to this extent it may be considered as a negative element in the community's political process. But in fact, a LAND USE PLAN is not created to be a zoning plan nor does it function like zoning to definitively set forth what can and cannot be done with land. Rather, a LAND USE PLAN is intended to portray a comprehensive picture of desirable land use relationships in the community to which such implementation measures as zoning can be directed.

Essential to the effectiveness of the LAND USE PLAN is the requirement that it be structured in such a way as to meet the changing requirements of the people living in the area. The process under which the plan is created then becomes a key element in forming the basic foundation upon which future changes can be measured. The FAIRBANKS NORTH STAR BOROUGH LAND USE PLAN was created from an extensive public hearing process reflected against a background of the existing physical, social and environmental qualities of the area. Base maps for the study area containing color coded existing land usage were prepared from earlier Fairbanks Metropolitan Area Transportation Studies and existing mapping, updated through the use of aerial photography, assessor's records, and windshield surveys. The study area was then divided into geographical neighborhoods, and overlays were prepared depicting the major physical characteristics of the area and existing and proposed improvements.

From an analysis of this combined information, and with certain preliminary assumptions as to the degree of change anticipated to occur in the Borough during the planning period, a draft land use plan was prepared for each neighborhood. The plans were presented by the Planning and Zoning Commission to the general public at neighborhood meetings, held in the following areas: EAST FARMERS LOOP/CHENA HOT SPRINGS WEST FARMERS LOOP/SHEEP CREEK CHENA RIDGE/INTERNATIONAL AIRPORT NORTH POLE EAST GOLD STREAM/FOX WEST GOLD STREAM/ESTER FAIRBANKS TWO RIVERS SALCHA

Following the conclusion of the neighborhood meetings, the Planning Commission reviewed the transcripts of all meetings and made many changes to the preliminary plan. At the same time the Planning and Zoning Commission prepared and adopted a series of GOALS AND POLICY STATEMENTS covering land use, and growth and development of the study area. This information, together with a revised LAND USE PLAN combining all of the neighborhood plans, was then presented to the public at four community public hearings, held in the following areas: EAST GOLD STREAM WEST GOLD STREAM NORTH POLE/SALCHA FAIRBANKS. Following these hearings the Planning Commission again reviewed the public testimony and made the final revisions to the LAND USE PLAN.

CONCLUSIONS & RECOMMENDATIONS

The history of the effectiveness of 20 year period plans is not inspiring. Society is so dynamic, mobile and evolutionary, that planning periods must be considerably shorter to be effective. The plans must also have built-in flexibility to respond to changing conditions. In the FAIRBANKS LAND USE PLAN, the flexibility is represented by broad, multiple-use categories describing ranges of densities and intensities of land use. To allow for plan continuity beyond the short-range initial growth impact expected by construction of the Trans-Alaska Pipeline, as well as to establish guidelines for long range considerations envisioning a stabilizing population and economy, the LAND USE PLAN sets forth criteria relating both to the physical characteristics of land in the planning area which should be considered in the evaluation of a proposed use, and to social-economic forces irrefragably evident as factors to be recognized in the determination of land use in Alaska.

For the initial short term planning period, the FAIRBANKS LAND USE PLAN is based upon generally recognized social attitudes of the population reflected in the following preliminary assumptions: The lifestyle which people find desirable in the Fairbanks area will continue to be a major element in determining the use of land. This attitude will be maintained and enhanced through immediate and future public and private policy decisions. Local government activities will remain reflective of local lifestyle attitudes, and will be a reactive, not leading, factor in the use and development of land during the short term period. The availability of large acreages of good land in the study area plus technological features such as dependable transportation, utilities, and other public services, will cause a continual dispersion of population from the Fairbanks city area. The state of existing federal, state, and local controls governing the overall use of land in the area are such that future restrictions to plan upon the location and form of these controls to define or guide desirable land use relationships. The most immediate period of change related to the use of land is currently underway, particularly in developing suburban areas, as a result of the recent approval to construct the Trans-Alaska Pipeline. Historical, and practical physical and economic considerations which have informally reversed land use in the study area will be significantly altered during this initial (5 year) period of pipeline construction activity.

GOALS AND POLICY STATEMENTS Community goals serve an important function in providing long range and philosophic aspirations for the Community. Policy statements, on the other hand, establish realistic guidelines which the community can utilize in the pursuit of improving their lifestyle. The community goals and policy statements relating to land use for the Fairbanks Borough study area were prepared as a result of testimony given at neighborhood public hearings. The testimony stressed a need for broad policy statements which would set forth the intent of the Planning Commission in formulating land use relationships, and also serve as a guide for future decision making on land use matters, both public and private.

The public hearings brought forth testimony on the problems besetting Fairbanks, including increasing land values, suburban sprawl, and environmental degradation, and while applying differently to each neighborhood, the overall impact was interpreted as a devaluation of the quality of life for everyone living in the area. The Planning Commission, in formulating the Goals and Policy Statements, attempted to balance the expressed desires of the individual with the overall needs and requirements of the community, in a flexible series of statements intended to function within the parameters of the existing governmental and economic system. The Goals and Policy statements stress the theme of protecting and enhancing both the lifestyle and the environment while providing for orderly growth in the Borough.

GOAL STATEMENTS To protect and enhance the quality of the lifestyle in the Fairbanks North Star Borough. To protect and enhance the natural features of the landscape and the purity of the environment. To provide for a variety of choice in lifestyle, housing, transportation and recreation. To establish and maintain land use relationships consistent with the dynamic and well-being of all segments of the community.

POLICY STATEMENTS DENSITY AND INTENSITY OF USE To encourage the highest density and intensity of use in and around the City of Fairbanks, diminishing accordingly with distance from the city center. Residential densities higher than one unit per acre should be contained within the Fairbanks Bowl area and the City of North Pole.

RESIDENTIAL To encourage a variety of residential use areas in the Borough which provide and enhance urban, suburban and rural living styles. These areas should be appropriately located with respect to user demand and ultimate development trends, and protected from encroachment of high densities or incompatible uses.

COMMERCIAL To encourage the Fairbanks City Center to be the focal point for all major commercial and financial activities in the Borough. Commercial services developed in suburban areas should not dilute the effectiveness of the city center.

INDUSTRIAL To encourage industrial development, first, north of the City where there are sufficient utilities and transportation routes available; second, south of the new Richardson Highway between Fort Wainwright and North Pole. Locating industrial uses in areas where they may contribute to the overall air, ground or noise pollution is to be discouraged, as is the encroachment of such uses upon established or desirable residential areas. Natural resource extraction is to be encouraged in areas where it has been determined to be compatible with surrounding uses. However, such use of land should be strictly controlled to prevent undue degradation of the environment, and insure that the land is returned to a usable form.

TRANSPORTATION To encourage the development and implementation of an overall transportation plan which will supplement the FMATS plan, serve as a guide in evaluating various land use proposals, and create an effective overall transportation network in the Borough. Such a plan should give extensive consideration to all modes of travel. Land use plans which are based upon requirements for extensive travel between living and working areas should be closely evaluated in terms of energy limitations as well as pollution factors. Land use plans adjacent to or abutting lands controlled by the Alaska National or the Fairbanks International Airport should complement these primary transportation facilities and not limit or hamper their efficiency.

UTILITIES To encourage full development of lands now served by public utilities prior to extending service into outlying areas. Subdivision and land use considerations should include the long term eventuality that public water and sewer service will be provided to all lands within the Fairbanks Bowl area. Special consideration should be given to highway oriented community centers like Fox and Ester to assist them in securing public water and sewer facilities, to avoid undesirable dispersion of commercial growth, and to eliminate problems in ground pollution and related public health hazards.

COMMUNITY FACILITIES Land use planning considerations should include provisions for the immediate or eventual location of public facilities and quasi-public facilities in various areas and neighborhoods of the Borough, where they may provide the best opportunity for residents to utilize these services.

LAND USE AND GEOGRAPHY To encourage land use plans which recognize and enhance the natural features of the land and minimize physical degradation of the environment. To disapprove the use of land which is characterized as undesirable for permanent construction and long term habitation. To promote programs which will equitably remove such land from the market and encourage its public use for parks, open space, trails and the like. To encourage the protection and enhancement of natural features and scenic vistas. Some features, such as rivers, contain multiple use capabilities, and provision should be made to allow the best use of these lands consistent with the long term community interests.

TOURISM To consider in land use plans and programs the needs and desires of the permanent residents, and the tourist and transient population. Seasonal uses of land, and access to the historical, natural features and unspoiled environments should be encouraged. Architectural themes and aesthetic guidelines should be encouraged along scenic routes and vistas.

ALTERNATIVES TO GROWTH To recognize and understand the factors which dictate trends in future growth and development of the Borough, and the conflicts these factors present with respect to the intensity of land use and quality of life style desired and enjoyed by Fairbanksians. To devise contemporary land use policies and programs which will effectively allow the Borough to grow in an orderly manner while retaining the qualities of living and environment which the community desires.

LAND USE PLAN

The recommendations contained in the FAIRBANKS LAND USE PLAN result from the correlation and evaluation of research on the physical characteristics of the area, social and economic considerations, and public testimony. This is the basis of the planning process, and forms a framework for all land use proposals. The PLAN consists of two elements - the Physical Characteristics Plan, and the Land Use Plan. These two elements constitute the basic decision-making tools by which the Borough can plan for the future.

PHYSICAL CHARACTERISTICS PLAN The Physical Characteristics Plan graphically depicts general information concerning the relationship of the natural and man-made environment. The plan was developed to provide a basis for determining usable land within the planning area. Physical features were discovered to offer natural boundaries to measure density and intensity of uses anticipated within the planning period. Analysis of public testimony then determined final value judgments on implied social and economic aspects.

When combined graphically, the Physical Characteristics Plan shows how identified historical trends in development, and Fairbanksians' inherent respect for nature, specifically, areas where environmental conditions have and should continue to prohibit man's intensive use of the land, and correspondingly where such conditions appear areas ideally suited for future growth and development. A primary recommendation of the LAND USE PLAN is that proper recognition of undesirable physical and environmental conditions existing in the area be continued for the benefit of present and future generations. Recognition of the natural physical characteristics and capabilities of the land does not imply that the land cannot be altered for man's intensive use, but rather serves to identify where such problem areas exist and what costs and benefits are to be considered in altering the system for future use.

LAND USE PLAN The Land Use Plan refines the relationship between the natural features and the urban/rural settlement patterns already developed through historical, social and economic activities, and proceeds to set forth in broad general terms, anticipated patterns of use projected from current attitudes.

OPEN SPACE Open space is an essential element in any interface between man and his environment. In terms of land use, open space defines the boundaries of urban and rural use areas, as well as the limits of the physical systems not suited for such use. By recognizing and combining the systems with historical, social and cultural areas, a rational and functional open space system is created. Such a system becomes the basis from which other relative land use decisions can be derived concerning density and intensity of projected activities. Open space is a key ingredient in the lifestyle enjoyed by Fairbanksians. However, it is an ingredient accepted without thought, for to date, open space is an effect created by a small population dispersed over a large land area. This effect may eventually cease to exist without proper recognition as population increases and economic values, in an interrelated state, determine the future ownership and use of land.

DEVELOPMENT FORM Open space defines the form of overall land use patterns. In determining the nature and extent of land use relationships in the Fairbanks area, the following considerations were included in the decision-making process: 1) The relationship between the proposed use and the community goals and policy statements on land use. 2) The natural capability of the land to support the proposed use. 3) Physical characteristics were measured against public input, the overall economic values of the community, and the value related to public or private investments. In certain cases where the proximity of the land to the community and its undesirable physical characteristics in terms of value to the community, it will be necessary to develop criteria and standards for providing the optimum value at a minimum of incompatibility to the area. This is especially important in considering the ambient air quality problem but applies as well to the use of marginal land areas. The criteria and standards become the tools protecting and enhancing the community's values relating to natural resources and ecological systems. 4) The absence and limited effectiveness of local land use controls during the anticipated economic growth ("boom") conditions resulting, in part, from the Trans-Alaska pipeline construction activity. This became an undesirable but essentially unavoidable determinant supporting the dispersion of land use. Also, the increasing reliability of transportation systems and transportation routes gave additional support to this concept. In essence, these considerations reflect the strong "lifestyle" sought by people living in the community as well as a "comfort" in living style which technological improvements provide. These are population generators which distinctly involve the use of large amounts of land. 5) The extent to which the community could be expected to provide public services and facilities, as well as the capability of the land to support usage became determinants of projected densities or intensities of use.

DENSITY AND INTENSITY OF USE FAIRBANKS BOWL The geological features of the area plus the characteristics of existing development give boundaries to the urban form of the Fairbanks Bowl. The Bowl is generally defined by Chena Ridge and the University lands on the west; the ridge line lying north of Farmers Loop Road and McGrath Road; the ridge line east of Steese Highway and Ft. Mainwright; and the Tanana River to the south. It is in this area where most of the urban-suburban expansion should be contained and where the community can best direct its capital improvement efforts for providing full community services, particularly public transportation, housing, and air and ground pollution control.

RURAL AREAS Outside the urban-suburban Bowl, the density and intensity of development should reflect the capabilities of the land to support long term habitation, and the extent to which the community is willing and capable of providing utilities, community facilities and services.

SUB-COMMUNITIES North Pole, Moose Creek, Ester, Fox, Two Rivers, and Salcha are small population centers along major transportation routes which function as "bedroom communities" for Fairbanks, in addition to serving local and transient needs for commercial convenience services. These communities should be encouraged to develop concentrated boundaries within which such services and utilities can be provided on an economic basis. Dispersion of growth from these community centers should then be contained as above.

LAND USE PLANNING AREAS

PLANNING AREAS Following are outline descriptions of each of the community planning areas studied, certain physical characteristics found to define and determine development trends, suggested land use by area, and factors to consider in evaluating future land use proposals. Detailed studies should be conducted in each neighborhood or sub-planning area to determine the proper land use relationship. More information on the soils of each area can be found in the Soil Conservation Service booklet on the "Fairbanks Area Soils".

ESTER The Ester Planning Area covers approximately 75 square miles of land north and west of Fairbanks. The area has a rich history dating back to the early gold mining days. The physical characteristics of the planning area include the steep slopes of Ester Dome as well as the two relatively wide valleys of Sheep Creek and Cripple Creek. Chena Ridge is a long promontory separating Cripple Creek from the Chena River. The principal soils in the area include the Fairbanks, Gilmore, Minto, Ester and Gold Stream series, of which the latter three are considered the least desirable for development purposes. Existing development is sparse, concentrating in Ester, on the south slopes of Chena Ridge, and along the Fairbanks-Nenana Highway. Land use for four suggested sub-planning areas is proposed as follows: **SHEEP CREEK** Very low density rural residential development on suitable soils; agricultural uses on the valley lands. **ESTER DOME** Major (active/passive) recreational area with secondary use combination of very low density residential and weekend-recreational homes; continuation and enhancement of existing mine structures and operations, relative to tourism and economic activity. Institutional and technical uses as appropriate. **ESTER** Concentrated tourist-oriented community service center on local utility system. Some mining or tourist oriented mining activities, and certain industrial uses, along the Fairbanks-Nenana Highway corridor. Very low density residential uses on suitable soils and slopes in foothills surrounding community.

CHENA RIDGE Suburban low density uses on north end of ridge, particularly the southeast facing slopes, on an extension of the Fairbanks public utility system. Density decreasing to the south and west of Ridge Road to very low on south ridge overlooking Tanana River. Steep slope areas retained as open space.

The following recommendations should be considered in evaluating land use proposals for the Ester Planning Area: 1) Community or public water and sewer systems should be a pre-requisite to all concentrated development. 2) Strict air pollution controls should be applied to all uses proposed for valley areas. 3) Development of steep slope lands should be subject to special hillside building regulations. 4) The development of lands known to have marginal soil conditions should be prohibited or withheld until lands with suitable soils are fully developed. 5) Allowing development of hinterland areas should be carefully related to the community's ability to provide services.

FOX The Fox Planning Area covers approximately 50 square miles of the Gold Stream Valley. The area has historical significance dating back to the early gold mining days. Physical characteristics of the planning area are dominated by the wide Gold Stream Creek Valley with its drainage area and diverse soil structure. Soils in the area include the Fairbanks, Gilmore, Minto, Ester, Salcha, and Lomita classifications, the latter four being the least desirable for development purposes. Mine tailing areas are also present. Existing development is concentrated along the Steese and Elliott Highways, and the Gold Stream Road. The Gilmore Data Acquisition Facility is in the northeast corner of the planning area.

Land use proposed for three suggested sub-planning areas is described as follows: **GOLD STREAM WEST** Very low density rural residential development on suitable soils and slopes, generally close to transportation routes. **LITTLE QUEENIE CREEK** Very low density rural residential development on suitable soils and slopes. Development trends may include a spill-over from higher density development on the Farmers Loop ridge line; if so, such density will require water and sewer systems. Commercial and industrial service facilities are proposed for the intersection of Steese and Gold Stream Road. Short term storage uses will also occur relating to pipeline construction activities. **FOX** Concentrated community development on water and sewer systems at the intersection of Steese and Elliott Highway, including commercial service facilities. Low density residential development on tailing piles along highway corridor. Very low density rural residential development on suitable soils and slopes in surrounding hills.

The following recommendations should be considered in evaluating land use proposals for the Fox Planning Area: 1) Water and sewer systems should be required for any concentrated community development. 2) Commercial and/or industrial development should be concentrated in described areas and not allowed to hinder the effectiveness of the Steese, Elliott or Gold Stream Highways. 3) Development of hinterland areas should be carefully related to the Community's ability to provide services.

FARMERS LOOP The Farmers Loop Planning Area covers approximately 30 square miles immediately north of Fairbanks. The area forms the northern portion of the Fairbanks Bowl. Physical characteristics of the area consist of a curving east/west ridge line surrounding the northern portion of a large, poorly drained area called Kramer's Field. The ridge line is broken into several drainage areas. Slopes in the area are generally suitable for development. Soils include the Fairbanks, Gilmore, Minto, Ester, and Gold Stream series of which the latter three are considered the least desirable for development purposes. The Farmers Loop area is rapidly being developed as a suburban-rural residential area serving Fairbanks and the University. Development has thus far been contained to the general area along major transportation routes.

Land use proposed for three suggested sub-planning areas is described as follows: **COUNTRY CLUB** Low to medium density suburban residential development along primary access routes, on public/community water and sewer systems. Density should decrease to rural density levels per distance from main transportation routes, on suitable soils and slopes. A continuous Open Space-Trail System should be created as land is subdivided, utilizing primarily lands with poor soils and steep slopes, creeks and drainage areas. **WEST FARMERS LOOP** Low to medium density suburban residential development on public/community water and sewer systems along Farmers Loop. Density should decrease on both sides of the road per distance from the Loop Road, on suitable soils and slopes. A continuation of the Open space-trail system, with appropriate extensions over the ridge, and to Kramer's Field. **EAST FARMERS LOOP** Low to medium density suburban residential development on public water and sewer systems along major transportation routes, decreasing in density as development extends to interior lands. A continuation of the Open space-trail system.
