Subject: DEC Supplemental

You have requested an explanation of the supplemental for the Department of Environmental Conservation that is contained in Senate Bill 100, Section 49. The need for additional general fund authorization is a result of three occurrences.

First, the budget that was approved for the fiscal year included a shift of general fund to general fund program receipts. This action was undertaken assuming that the fees would be in place on July 1, 1992. While I am pleased to say that the regulations have been filed, the effective date was February 19, 1993. The delay in implementation of the regulations resulted in a loss of receipts that will be generated during fiscal year 1993.

Secondly, during the public comment period on the proposed regulations, concern was expressed that the fees were unreasonably harsh. In response, the final fees were adjusted across the board. This included allowances for charitable organizations, seasonal operations, dual inspections, and a general downward adjustments in fees.

Thirdly, in developing the proposed fiscal year 1993 budget the department incorporated \$400.0 in new user fees. This was later increased to \$675.0 during deliberations in House Finance. While the proposed increase was at the recommendation of the department, it was a very optimistic estimate.

The three items that are explained above forced the department to review operations. While the department was able to reduce some of the programs, they were not able to absorb all of the loss revenue. The supplemental as proposed does take into account revenue that will be generated for the balance of the fiscal year. The general fund that is requested in the supplemental would allow the department to maintain essential services in the seafood and sanitation components.

March 11, 1993

The Honorable Drue Pearce
Co-Chair, Senate Finance Committee
Eighteenth Alaska Legislature
Juneau, AK 99811

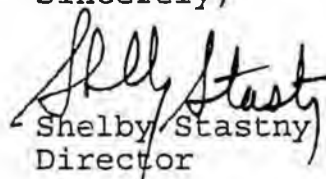

Dear Senator Pearce:

I recommend reappropriation of 250.0 of the unexpended and unobligated balance of the appropriation made in Sec. 146, Ch. 96, SLA 1991, (national education effort to gain approval for opening of the Arctic National Wildlife Refuge to oil and gas development - \$3,000,000) to Arctic Power, and lapsing into the general fund June 30, 1994.

I further recommend that the unexpended and unobligated balance of the appropriation made in Sec. 146, Ch. 96, SLA 1991, (national education effort to gain approval for opening of the Arctic National Wildlife Refuge to oil and gas development - \$3,000,000) lapse into the general fund on June 30, 1994.

Thank you for your consideration.

Sincerely,

Shelby Stastny
Director

The Honorable Steve Frank
The Honorable Drue Pearce
Co-Chairs
Senate Finance Committee
State Capitol
Juneau, Alaska 99801-1182

Dear Co-Chairs:

As the Finance Committee considers the Governor's FY 93 supplemental legislation, please consider these three amendments:

1. An amendment to section one increasing the Longevity Bonus supplemental from \$1,350,300 to \$1,980,667. The Department of Administration is realizing a greater increase in program applicants than earlier estimated. The original supplemental was based on a 5.72 percent rate of growth which has been revised upward to 6 percent. Attached is the department's memorandum further outlining this request;
2. The addition of a new section expanding the purpose of an FY 93 capital appropriation for the Northern Forum:

Sec. . . Sec. 152, ch. 5, SLA 1992, page 36, line 23, is amended to read:

	Appropriation Items	General Fund
Northern Forum Equipment <u>and Operations</u>	\$50,000	\$50,000

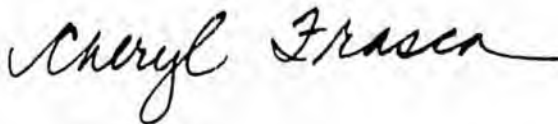

March 9, 1993
Page 2

I have also attached information in support of this amendment.

3. Amend section 57 (page 9, line 27) by increasing the Department of Administration's miscellaneous claims and stale-dated warrant appropriation amount from \$159,600 to \$181,060.

Should the committee have questions or need additional information, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Cheryl Frasca".

To: Sharon Barton, Director
From: Dennis L. DeWitt, Director 
Date: March 5, 1993
Subject: Longevity Bonus Grant Projections

Attached are our current projections for the Longevity Bonus Grants for FY93. As you can see, we will need a supplemental for \$1,980,667 for the remainder of FY93. We are still working on FY94, but our best estimate is that the FY94 budget request may be too low also.

Several factors have contributed to this. First, for the first time that we know of, our growth rate for the bonus is higher than the population growth rates estimated by the Department of Labor. The Department of Labor estimated that this year's growth rate would be 5.72%, but we expect to see a bonus increase of over 6%. In previous years, the bonus growth rate has been 1-2% below the Department of Labor's population growth rate.

Second, we believe that the high public profile of the longevity Bonus program over the past year may have influenced some people to be more aware of the program, and has encouraged them to get on it before they are excluded.

Lastly, as the charts show, the growth pattern during each of the past three fiscal years are substantially different than this year. Projections would be better if consistent patterns of participation in the program existed. We cannot assume any previous pattern will apply this year.

Dear Mr. Frazee:

As you know, our original funding for The Northern Forum
 by the state was \$100,000 operating and \$50,000 capital. I would
 like to request a change of title and scope to the original \$50,000
 capital contribution so that capital monies may be used for
 operating purposes.

We have been very successful in getting office furniture and other
 equipment donated from the private sector, some of the capital
 items originally requested are no longer required. Additionally,
 costs for long distance phone calls and marketing have
 exceeded our expectations due to the startup phase of our operation.

Thank you very much for your cooperation in this matter.

Sincerely,

Steven H. Shropshire

March 8, 1993

The Honorable Steve Frank
The Honorable Drue Pearce
Co-Chairs, Senate Finance Committee
Alaska State Legislature
State Capitol
Juneau, AK 99801-1182

Dear Senators Frank and Pearce:

During the Senate Finance Committee meetings on Senate Bill 100, questions were raised regarding various supplemental sections. The following addresses the specific questions:

Section 3: Rural Alaska Television Network - \$200,000

The FY93 budget was reduced \$138,000; why is the supplemental for \$200,000?

The Governor's FY93 proposed budget of 1,361.1 for RATNET anticipated operating cost reductions from FY92. The conference committee reduced the FY93 Governor's request by 138.4 and the 1.8 percent unallocated reduction resulted in an additional cut of 22.3, for a total legislative reduction of 160.7.

The supplemental request includes funding for uplink transmission costs that were underestimated when the FY93 budget was prepared and for unanticipated transmitter site maintenance. Additionally, some anticipated cost reductions will not occur in FY93 because a new contract for uplink transmission services is not expected to be in place before the end of the current fiscal year. Because of this, funds that were expected to be used for transmitter maintenance are not available. Many of these sites are in remote locations requiring charter flights to transport personnel, equipment and supplies.

Even with this supplemental request, RATNET's total expected operating costs of 1,400.4 will be significantly reduced from recent years as the FY92 actual expenditures were 1,734.6 and FY91 actual costs were 2,249.2

The Honorable Steve Frank
The Honorable Drue Pearce
March 8, 1993
Page 2

Section 4: Personnel Board - \$64,000

What is the process the Personnel Board uses when it receives a complaint? Does it investigate every complaint?

The procedures for handling complaints to the personnel board are set out in AS 39.52.130. This process is described in the enclosed "Sequence of Events--Ethics Complaint." (Enclosure A)

Section 9: Oil and Gas Litigation - \$8,800,000

Provide a breakdown of the expenditures proposed in FY93.

Enclosed is a memorandum from the Department of Law which outlines the activities anticipated for the remainder of the fiscal year. (Enclosure B)

Section 12: Judgments and Claims - \$1,087,700

Identify the costs associated with reapportionment and the recipients. Provide an explanation of "costs and fees." Are there any judgment and claims contained in the section where the plaintiff lost?

Enclosed is a letter from the Department of Law which explains costs and fees awards. (Enclosure C)

Section 14: Foundation Program - \$6,427,100

Does the Department of Education audit the enrollment information submitted by the school districts to determine accuracy?

The department does not routinely audit projections or actual enrollment information.

Section 15: WAMI Medical Education Program - \$98,46

What was the FY92 lapse for the Postsecondary Education Commission?

For the fiscal year ending June 30, 1992, the commission lapsed the following general funds:

The Honorable Steve Frank
The Honorable Drue Pearce
March 8, 1993
Page 3

Wiche Student Exchange	\$1,200.0
WAMI Medical Education Program	<u>98,462.0</u>
Total	\$99,662.0

Section 19: Medicaid Facilities - (\$4,719,200)

Will there be a further decrease in general fund requirements in FY94, and has the decrease been included in the proposed budget?

As introduced, the Governor's budget for FY94 is based on an anticipated 13.5 percent growth, instead of the historical 18 percent growth. As a result, a reduction has already been taken.

Section 21: JOBS Child Care \$390,000

Was the JOBS child care supplemental anticipated?

This supplemental was not anticipated. For the first three months of FY93, the need for child care was stable and at the originally planned level. Last October, however, the demand for services greatly increased, which may be attributed to the lag time from application for child care services and the actual processing of the payment for services.

Section 23: Medical Assistance Claims Processing - \$750,000

What is the amount saved in Medical Facilities as a result of the prescreening change from the 75th to the 50th percentile?

The savings is estimated to be 400.0, of which half is federal funds and half general funds.

Section 24: Foster Care Program - \$1,100,000

What happens to the Permanent Fund Dividends of children in foster care?

The dividend is placed into a trust fund until the child is released or turns 18.

Section 25: McLaughlin Youth Center - \$110,000

The committee requested a better breakdown of the increased costs at the facility.

The Honorable Steve Frank
The Honorable Drue Pearce
March 8, 1993
Page 4

The following represents the itemized expenditures associated with the supplemental:

Increased water and sewer usage	13.2
State Equipment Fleet Vehicle Costs	19.0
Medical Contracts	19.0
Increased telephone usage	5.7
Increased electricity usage	20.0
Youth counselor exams--EEO compliance	12.5
Maintenance contracts on equipment	20.6

Section 26: Post Mortem Examinations - \$229,600

What is the average rate paid for an autopsy?

The average autopsy in FY92 was \$1,015 and included transportation and storage costs. The department does not have a specific rate for these services, however, typically it ranges from \$450 in Ketchikan, \$600 in Anchorage and \$750 in Fairbanks. During FY94, 495 autopsies were performed at the crime lab, and 780 were performed in mortuaries throughout the state.

Section 34: Division of Boards - \$492,000

What is the annual budget for the Division of Boards as compared to this supplemental? Provide a comparison of the number of meetings held in FY92 to those meetings proposed in the current year. How much funding is required to support the Advisory Boards?

Enclosed is a summary of the information requested in relationship to the Division of Boards requested supplemental. (Enclosure D)

Section 36: Vendor Compensation - \$84,300

The committee requested a geographical distribution of payments. Information was also requested relating to the compensation via the general fund and a statutory change resulting in payment from the Fish and Game Fund.

Enclosed is a breakdown of license sales in the various areas of the state and a memorandum from the Department of Fish and Game on the information requested in relationship to compensation payments. (Enclosures E and F)

The Honorable Steve Frank
The Honorable Drue Pearce
March 8, 1993
Page 5

Section 39: Contract Jails - \$690,400

The committee requested information related to the terms of the contracts and the associated costs. Comparisons were also requested relating to the per day costs at contract jails and state institutions, and the costs associated with prisoner transportation include in Contract Jails in FY93 Authorized as opposed to the proposed supplemental level, an explanation of why the department assessed the miscellaneous reduction against Contract Jails, and finally, a summary of the elements incorporated in the FY93 Authorized level, the supplemental requested, and the proposed FY94 budget.

The department will provide information directly to the committee.

Section 42: Prisoner Transportation - \$125,000

The committee requested information related to the receipt of frequent flyer miles, the usage of commercial airlines and the number of moves this supplemental represents.

The department will provide information directly to the committee.

Section 43: Public Safety's Arbitration Settlement - \$101,400

The committee requested the departmental policy related to off-duty use of controlled substances. In addition, the committee requested the definition of interim compensation and if the request reflects any adjustment. The committee also would like to know if the individual was prosecuted and if not, why? Finally, the name of the arbitrator, the fee charged, and source of payment has been requested.

The department will provide information directly to the committee.

Section 47: Supply and Inventory Account - \$715,871

The committee requested that the language be rewritten to specify the amount of the ratification.

The language could be revised to read: "The sum of \$715,871 is appropriated to the Department of Transportation and Public Facilities to ratify expenditures related to supply and inventory asset accounts during fiscal years 1985 - 1992 within the Alaska State Accounting System." Additionally, Section 59 should be retained to make the action retroactive to July 1, 1984.

The Honorable Steve Frank
The Honorable Drue Pearce
March 8, 1993
Page 6

Section 49: Seafood and Sanitation - \$351,200

The committee requested year-to-date expenditure information.

Enclosed is the expenditure to date information provided by the Department of Environmental Conservation. The department has reduced expenditures, but is unable to meet the total shortfall without general fund support or a dramatic reduction in program activities. (Enclosure G)

Section 50: Paralytic Shellfish Poison Inspections - \$109,900

Senator Kerttula requested that he be kept informed of the situation.

The department will work directly with the Senator to keep him informed.

Section 55: University of Alaska Snow Removal - \$375,000

The committee requested a comparison of snowfall activity for this year compared to the previous year and year-to-date expenditure information. The committee also would like to know the extent of student employment.

Enclosed are the responses to the questions and requests for additional information. (Enclosure H)

Section 56: State v. Weiss - \$19,900

The committee requested the Attorney General's position of the Court System's need of the clerk.

The Attorney General's indicates he is supportive of all means by which the process can be speeded up in the Court System.

Sincerely,

Cheryl Frasca
Director

Enclosures

SEQUENCE OF EVENTS - ETHICS COMPLAINT

1. All complaint must be filed with the Attorney General
 - a. must be in writing.
 - b. signed under oath.
 - c. contain a clear statement of details of the alleged violation.

2. Under A.S. 39.52.310(b), if the complaint alleges a violation of AS 39.52.110-190 by the Governor, Lieutenant Governor, or the Attorney General, the matter will be referred to the Personnel Board.

3. The Personnel Board shall retain independent counsel who shall act in the place of the Attorney General under AS 39.52.310(d)-(i), AS 39.52.320-39.52.350 and 39.52.360(c) and (d).
 - a. As required by A.S. 36.30.015(d), prior written approval must be obtained from the Attorney General before contracting for an attorney to act as independent counsel. As with other procurement of professional services, an Authority to Seek Professional Services must be prepared and approved by the department commissioner.
 - b. Contracts for legal counsel may incorporate clauses for adjustment in prices, time of performance, and total dollar amount.
 - c. The provisions of 2 AAC 12.400 - Small Purchases must be followed in soliciting and evaluating potential independent counsels.
 - d. The Personnel Board selects the independent counsel during an executive session of a properly called meeting.
 - e. After the independent counsel has been selected, a copy of the ethics complaint will be forwarded to him or her for investigation.

4. If the complaint is filed regarding the conduct of a current or former public officer (Governor, Lieutenant Governor, or Attorney General) the Attorney General (independent counsel) shall:

review each complaint filed, to determine whether it is properly completed and contains allegations which, if true, would constitute conduct in violation of A.S 39.52. (A.S. 39.52.310(d).)

5. If the Attorney General (independent counsel) determines that the allegations in the complaint do not warrant an investigation, the Attorney General (independent counsel) shall dismiss the complaint. (A.S. 39.52.310(d).)

This is the first stage of the process where a complaint could end.

6. If the Attorney General (independent counsel) accepts the complaint, the Attorney General (independent counsel) shall investigate to determine whether a violation of AS 39.52 has occurred. (A.S. 39.52.310(g).)
7. If, after investigation, it appears that there is no probable cause to believe that a violation has occurred, the Attorney General (independent counsel) shall dismiss the complaint and prepare and file a confidential summary with the Personnel Board. (A.S. 39.52.320.)
8. **CONFIDENTIALITY.** Before the initiation of formal proceedings under AS 39.52.350, information regarding an investigation or obtained by the Attorney General (independent counsel) during an investigation, is confidential. All persons contacted during the course of an investigation shall maintain confidentiality regarding the existence of the investigation.
9. If the Attorney General (independent counsel) determines that there is probable cause to believe that a knowing violation or a violation that cannot be corrected under A.S. 39.52.330 has occurred, the Attorney General (independent counsel) shall initiate formal proceedings by serving a copy of an accusation upon the subject of the allegation. (A.S. 39.52.350.)
10. If the subject of the allegation denies that a violation has occurred, the Attorney General (independent counsel) shall refer the matter to the Personnel Board, which shall appoint a hearing officer to conduct a hearing. (A.S. 39.52.350(c).)

The process for appointing a hearing officer is the same as engaging an independent counsel: approval of Attorney General, Authority to Seek Professional Services, solicitation, evaluation and award.

11. After the formal hearing, the hearing officer shall serve a written report on the Personnel Board and the parties. (A.S. 39.52.360(h).) Either party may protest the hearing officer's report to the Personnel Board. If protested, the Personnel Board itself must convene, consider arguments and determine if a violation has occurred. (A.S. 39.52.370.)

12. If the subject of the allegation admits (c.f. 10 above) the allegation, and if the Personnel Board determines that a violation has occurred under 11, the Personnel Board must meet to impose the penalties under A.S. 39.52.410, 39.52.440, and 39.52.450 as appropriate.

Re: Fiscal year 1993 oil and
gas special litigation
supplemental appropriation

Dear Senator Frank:

Senator Kelly requested information concerning the objects of expenditure planned for the \$8.8 million fiscal year 1993 supplemental appropriation requested for oil and gas special litigation. First, it is important to note that this supplemental represents a reduction in total funding to \$19.1 million compared to \$26.5 million for the preceding fiscal year. This \$7.4 million reduction is attributable to the settlement of the first phase of the Amerada Hess, and British Petroleum tax cases without the need to incur the expense of trial or formal proceedings. However, as we progress into the second phase of the Amerada Hess case and bring forward other tax cases, our spending is expected to rise to near pre fiscal year 1993 levels.

Please remember that oil and gas special litigation is funded on a part year basis in the executive budget. This approach recognizes the unpredictable nature of litigation and permits the legislature to "true up" the spending authorization after the fiscal year is well underway. I am constrained from giving you specific amounts attributable to each matter in litigation for fear that our opponents will use that information to the detriment of the state. Public disclosure of those amounts could compromise the state's litigation strategy. Furthermore, both state and federal law prohibits us from identifying the taxpayers who are the subject of tax enforcement actions.

We need additional spending authority for the remainder of fiscal year 1993 to cover the following matters:

RECEIVED
FEB 25 1993

1) Collection of past due severance taxes. We are focusing our attention on two significant matters. Intensive effort is directed toward the preparation of the state's case in these matters according to deadlines imposed by the attorney general. Supplemental funding will be used to meet contractual obligations to outside counsel and expert witnesses.

2) FERC enforcement and oversight. We are financing the cost of a pipeline corrosion study that may provide valuable information concerning the safety of TAPS and form a basis for convincing the carrier that a tariff increase for the cost of repair should not be borne by shippers. This study will probably be extended for another 12 months (unfortunately this period does not correspond with the state fiscal year).

3. Amerada Hess severed issues litigation: We are using information gathered for the oil values part of this case in prosecuting our claim for past due severance taxes. This information is useful for determining the value of oil for purpose of assessing the severance tax. The cost of transferring this information in a usable form exceeded all expectations and therefore necessitates a need for a supplemental appropriation. The aspect of this case relating to the validity of certain gas processing charges is now proceeding to trial. The parties are involved in pretrial discovery and it is expected that massive amounts of documents will be exchanged, reviewed, and organized for future use. Additional funding is necessary to permit the state to keep up with an aggressive schedule set by the superior court.

4. RIK retroactive price adjustments. We are engaged in litigation with three purchasers of RIK oil. One purchaser filed lawsuits in two judicial districts within the state. Another purchaser filed an action in California. These actions were not anticipated and force us to employ counsel in a foreign jurisdiction.

5. Dinkum Sands. This case recently became active in anticipation of the delivery of the master's report to the United States Supreme Court. Our activity is preliminary to the preparation of briefing in the Supreme Court. It will also be necessary to pay fees to the master upon delivery amounting to \$5 million.

The Hon. Steve Frank, Chairman

February 23, 1993

February 19, 1993

The Honorable Steve Rieger
Senate Finance Committee
Alaska State Legislature
P.O. Box V
Juneau, AK 99811

Dear Senator Rieger:

I have been asked to respond to several questions concerning "costs and fee" awards which you recently posed to representatives from the Governor's Office of Management & Budget. As I understand it, you were specifically interested in finding out whether or not any of the judgements contained in the supplemental appropriation currently before your committee could be characterized as having been awarded in spite of the fact that the state had prevailed on the merits of the case. Although this type of situation does arise on occasion, none of the awards currently listed in the judgement supplemental fit in this category; however, we have recently received a judgement in the matter, Stein v. State, in which the state is being forced to pay the costs and fees of this public interest litigant even though the state prevailed on all but one of the issues in dispute. I anticipate forwarding within the next two weeks an amendment to our supplemental which will include this latest judgement.

In addition, I also understand that you had expressed some curiosity concerning the redundancy of the term "costs and fees" and what the distinction was between the words "costs" and "fees" as they are used in the supplemental and in various other legal documents you have come across. In actuality, the distinction between these two words is more procedural than semantic.

Under the Alaska Court System's Rules of Civil Procedure, the prevailing party at the conclusion of any civil trial has a window of opportunity in which to file claims for "costs" and "attorney fees." Although such claims are usually filed at the same time, the procedures that are followed as well as the review process used by the court system is vastly different. For example, claims for "costs" are filed with and reviewed by the Clerk of the Court under Civil Rule 79. Such reimbursable "costs" include witness fees (including expert witnesses), deposition expenses, travel costs, long-distance phone charges, copying, postage, computerized legal research, and paralegal fees; however, the court system does impose strict limitations on the amount and type of expense it will consider in a cost award.

The Honorable Steve Rieger
Re: Costs & Fee Awards

February 10, 1993
Page 2

Unlike claims for costs, claims for attorney fees are filed directly via a motion to the trial court. In situations where the prevailing party receives a monetary judgement, Civil Rule 82 (a)(1) provides a schedule that may be used in calculating the attorney fee based on the amount of the judgement. In those instances where the use of the schedule is inappropriate, a motion may be submitted requesting award based on the actual number of attorney hours expended. In either case, the trial court has broad discretion in deciding upon who the "prevailing" party is and the amount of any attorney fee award.

Although the court has allowed the award of full costs and fees in some public interest litigation, the Alaska Supreme Court has generally held that this rule was designed only to partially compensate a client for the productive work done by his or her attorney. By providing for only partial compensation it is hoped that this rule will encourage the early settlement of civil disputes as well as avoid the costs associated with protracted litigation.

For your information, I have attached a copy of Appendix Q (Costs and Attorney Fees) from our department's Civil Manual. If you should have any other questions or concerns, please don't hesitate to contact me.

Very truly yours,

CHARLES E. COLE
ATTORNEY GENERAL

Dear Representative Frank:

During the Senate Finance Committee on Senate Bill 100, Senator Rieger requested a breakdown of license sales by the various areas of the state. This data has been compiled and consolidated for the committee's information on the enclosed spreadsheet. This spreadsheet details license sales volume and gross revenues for each community in the state that sold more than 1,000 licenses and tags.

If you require any further information, please contact Marylou Burton, ADF&G Finance Officer, at 465-6068.

Sincerely,

Carl L. Rosier
Commissioner

February 23, 1993

The Honorable Tim Kelly
Senate Labor & Commerce Committee
State Capitol, Room 518
Juneau, AK 99801-1182

Dear Representative Kelly:

During the Senate Finance Committee hearing on Senate Bill 100, you raised certain questions about the additional compensation that is paid to license vendors at the end of each quarter, and asked that the department provide you with suggestions on how to revise the fee structure and/or statutes to make the payment of vendor compensation more efficient. In particular, you asked us to suggest ways in which vendors could receive full compensation at the point of sale, while still maintaining the level of compensation currently provided for in statute.

It would not be necessary to revise the basic fee structure to accomplish this, nor would we recommend a major revision. AS 16.05.390 (a) provides that vendors:

"(1) retain five percent of the fee that is charged for a license or tag or 25 cents for each license or tag sold, whichever is greater; and

(2) compensation of \$50 per year or \$1 for each license or tag sold during the year, whichever is greater."

The first section of this, which is the amount currently retained by vendors, is easily understood and easily administered. As you can see on the enclosed copies of license remittance reports, the calculation and verification of commissions retained by the vendor is fairly straightforward because the same percentage fee is applied across the board to all licenses.

The second section, however, is administered as described in AS 16.05.390(c), which directs the department to, on a quarterly basis, calculate the amount due as additional compensation and pay that amount to the vendor. In order to make the additional \$1 per license or tag sold part of the amount retained by the vendor, it would be necessary to eliminate AS 16.05.390(c). Under that

February 23, 1993

scenario, we would also recommend as a practical matter that AS 16.05.390(a)(2) be revised to read: "retain \$1 for each license or tag sold," thus eliminating the \$50 per year minimum due to the vendor. The \$50 minimum provision is seldom applicable, and would considerably complicate what would otherwise be a simple calculation.

While the quarterly payment of additional vendor compensation as currently established is somewhat time consuming and expensive to administer, it should be noted that it provides an incentive for vendors to make remittances in a timely matter. It also provides an enforcement and correcting mechanism to the department for resolution of remittances that are delinquent or incorrectly calculated. For example, payments to vendors who are in arrears at the end of a given quarter are reduced by the amount the vendor owes the state. This occurs fairly often, typically not as a result of any deliberate mispayment but through simple error. Not all of our vendors are sophisticated business people; moreover, during the peak sales season mistakes are easily made. Overall, we feel that the enforcement and correcting mechanism provided by the "after-the-fact" payment of additional compensation outweighs the administrative burden of the program, and ask that you take these factors into consideration when deciding whether or not to revise these statutes.

Your interest in helping us make the licensing program more efficient is appreciated. Please let me or Marylou Burton, ADF&G Finance Officer (465-6068), know if you require further information.

Sincerely,

Carl L. Rosier
Commissioner

Phone: (907) 465-5010
Fax: (907) 465-5097

February 24, 1993

The Honorable Steve Frank
Co-Chair, Senate Finance Committee
Room 518, Capitol Building
Juneau, AK 99801

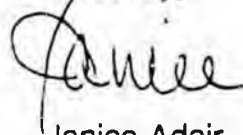

Dear Senator Frank:

During the hearing before the Senate Finance Committee on the supplemental appropriations bill, Senator Rieger asked how much the Department had expended to date in the programs for which we were asked for general funds to replace unrealized program receipts.

As you can see from the attached summary, those programs - Sanitation and Seafood Inspections - have not yet gone into the red. However, the bulk of the work in both of these components is done in the Spring when the lodges and other seasonal facilities as well as the majority of the seafood processors and shellfish growing areas reopen.

If we can provide you with any other information, please don't hesitate to call.

Sincerely,

Janice Adair
Assistant Commissioner

February 22, 1993

Cheryl Frasca, Director
Division of Budget Review
Office of Management and Budget
Pouch AM
Juneau, Alaska 99811

Dear Cheryl,

We have received some questions from Senator Finance Committee members Kelly, Frank and Sharp regarding our request for a supplemental appropriation for Fairbanks Campus Physical Plant for snow removal. Senator Kelly would like to know if students are hired to assist in the snow removal. Yes, students are employed regularly in grounds keeping and snow removal work by the physical plant. It was somewhat fortuitous that some of the heaviest snowfall occurred over Christmas break as more students were available for snow removal work.

In response to Senator Frank's request for a history of snowfall activity in Fairbanks, enclosed is data obtained from the National Weather Service showing snowfall from the 1962-63 season through January 1993. Senator Frank requested expenditure to date information which is contained on the budget impact enclosure.

If there are any further questions or need for information, please do not hesitate to contact us.

Sincerely,

Brian Rogers
Vice President for Finance

Enclosures

FY93 SUPPLEMENTAL REQUEST
for
Fairbanks Campus Physical Plant
for Costs Associated with
Additional Snow Removal

HB 135, Sec. 55; SB 100, Sec. 55

"The sum of \$375,000 is appropriated from the general fund to the University of Alaska for costs associated with additional snow removal for the fiscal year ending June 30, 1993."

The Fairbanks Campus Physical Plant plans and budgets for snow removal operations from November through April of each year based on a normal or average snowfall of approximately 70 inches. Data from the National Weather Service is used as the basis for the determination of this figure. As the snowfall chart indicates, most winters have snowfall which comes within a reasonable range of this figure.

Snow removal operations began earlier than planned this season with the heavy snowfall just after Labor Day. Snow has continued to accumulate at a record breaking pace. During the first ten days of January, Fairbanks received almost 30 inches of snow. The rapid snow accumulation required that the physical plant go to an around-the-clock operation in order to remove snow from streets and roadways, parking lots, stairs, walkways and roofs. Even with the additional effort it was necessary to issue contracts for some of the snow removal work. Temporary workers, including students, have had to be employed, additional supplies purchased and additional equipment rented.

Campus parking lots (53) and roadways have had to be plowed repeatedly. It was necessary to remove the snow from approximately 20 acres of campus roofs as accumulation weight neared roof truss design limits. Roof snow removal is not necessary during a normal snowfall winter.

The Fairbanks Campus Physical Plant began the year with a snow removal budget of \$265,000 which was based on an estimate of the costs of removing snow during a normal winter from parking lots, streets and sidewalks. Necessary expenditures through mid January for these operations were close to depleting these funds, without accounting for the additional costs of removing snow from the roofs.

FY93 SUPPLEMENTAL BUDGET REQUEST

BUDGET IMPACT OF EXTRAORDINARY SNOWFALL

BUDGET AND COST BREAKDOWN

Parking Lots, Streets and Sidewalks

Cost To Date Through Mid January	250,000
Additional Costs Projected through April	240,000
Total (Actual and Projected)	\$490,000
Budgeted	(265,000)
Impact (Additional Costs)	\$225,000

***Roof Snow Removal**

Through Mid January(only 1/3 completed)	50,000
---	--------

Completion

(Assuming no significant additional snowfall)	<u>100,000</u>
---	----------------

Impact (Additional Costs)	\$150,000
----------------------------------	------------------

Total Impact (Additional Costs)	\$375,000
--	------------------

*Roof snow removal is not routinely performed in a normal snowfall season.

The Honorable Steve Frank
The Honorable Drue Pearce
Co-Chairs
Senate Finance Committee
State Capitol
Juneau, AK 99801-1182

Dear Committee Co-Chairs:

For the Finance Committee's consideration, attached are several amendments to the supplemental appropriation bill introduced by the Governor.

Also attached is additional information in support of these requests. Should you or committee members have any questions or need additional information, please let me know.

The committee's consideration is appreciated.

Sincerely,

Cheryl Frasca
Director

MEMORANDUM

DATE: February 22, 1993

TO: Cheryl Frasca, Director
Division of Budget Review
Office of Management and Budget

THRU: *Clarke* Janet Clarke
Director
Division of Administrative Services

FROM: Deborah R. Wing *DW*
Director

SUBJECT: Clarification: Fairbanks Youth Facility Supplemental

*CMB
amendment*

Thank you for meeting with me to clarify the \$60.0 supplemental request for the Fairbanks Youth Facility. As we discussed, there were a number of unanticipated events that lead to the request.

In the FY92 budget process the Fairbanks Youth Facility reduced expenditures and 6 positions with a plan to merge the 8 bed coed unit with the 12 bed boys unit for one unit of 20 beds. The facility operated under the new 20 bed unit configuration during FY92, but with more reportable major incidents during this time. While the new configuration was in operation the Department was sued by a female resident's parents because of the practice of transporting female residents to other youth facilities elsewhere in the state. Because of the suit and findings generated from it the Fairbanks Youth Facility returned to utilizing non-permanent staff in FY93 to provide the adequate personnel coverage for safety and supervision of population needs.

Also, in FY92 the Division of Family and Youth Services under went a re-organizational structure change; merging Family Services and Youth Services. This resulted in the Probation Services 100 line to be included with the Family Services component. Prior to that time, the Probation Services 100 line was used by the Fairbanks Youth Facility to cover the shortfalls encumbered by non-permanent youth counselor hires. The practice of using Probation Services 100 line to cover shortfalls was the result of prior years budget cuts to the facility and the facilities efforts to maintain

Cheryl Frasca
February 22, 1993
Page 2

adequate twenty-four hour coverage. As you are aware, the Fairbanks Youth Facility is a 24 hour facility which requires staff coverage seven days a week. It would be impossible for limited staff to provide coverage.

It should be noted that in FY92 the Fairbanks Youth Facility experienced one of the most chaotic and trouble-ridden times since its inception as evidenced by the number of reportable major incidents associated with youth offenses. Because of staff shortages, the residents in the facility were more assaultive towards each other and the staff. There were assaults, escapes, injuries and disciplinary transfers. During FY92 there were 58 major reportable incidents from this facility.

Therefore, if the situation of safety and security of residents and staff was not immediately addressed; serious injuries and liabilities would be the outcome. Subsequently, staffing patterns were evaluated and two additional long term, non-permanent staff were hired. As a result, reportable incidents dropped 35.7%.

The positions requested in the supplement are budgeted for FY94. However, the supplemental appropriation is necessary for FY93. If the supplemental is granted, the Fairbanks Youth Facility will be able to utilize the two long term, non-permanent youth counselors to operate the program at current staffing levels and provide for safety, security and service delivery. If the supplemental request is denied, the two long-term, non-permanent youth counselor positions would be eliminated and the facility would revert back to the previous hazardous environment.

Should you have additional questions, please do not hesitate to contact me.

MEMORANDUM

State of Alaska

Department of Law

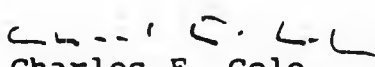

TO: J. Shelby Stastny, Director
Office of Management and Budget

DATE: March 1, 1993

FILE NO.:

TEL. NO.: 465-3600

SUBJECT: Supplemental Request
Regulations Attorney

FROM: 
Charles E. Cole
Attorney General

This is to request a supplemental appropriation of \$28,100 to pay for an Attorney III position at Juneau to handle regulations review projects, beginning April 1, 1993, and continuing through June 30, 1993. This position is needed to assist the lone attorney who oversees all legislation and regulations projects for the Executive branch of state government. As outlined below, the backlog in regulations review projects has and is causing serious delays in the implementation of regulations that are necessary for the conduct of government operations, which directly impact both businesses and individual citizens. Because of the seriousness of the regulations backlog, the Chief of Staff has advised that he concurs with this request for a regulations review attorney. This position is included in the Governor's FY 94 budget request. A summary of the circumstances that have led to this request follows below.

1. Federal compliance. The federal government has been establishing new programs and making changes in existing programs. Compliance with those new federal requirements is essential for continued or additional receipt of federal money. For example, the Regulations Attorney has reviewed several regulations projects for DHSS to allow the state to receive several hundred thousand dollars in additional federal funds. Also, that attorney recently reviewed public safety commercial trucking regulations which were essential to avoiding our state losing approximately \$300,000 in federal funds. In view of the activist policies being voiced by the new administration in Washington, D.C., federal compliance regulatory work will most certainly increase, rather than diminish.
2. Federal supremacy. In at least one situation ("drinking water regs"), the federal government has alerted the state that timely filing of certain regulations was essential to avoid federal takeover of certain programs in Alaska. Because of

the urgency of the request and overload of work in the Department of Law, this project was sent out to contract for preliminary editing. An additional attorney could have avoided the need for this contract.

3. Court decisions. The state recently lost two court cases because the state agency did not have regulations adequate to support agency decisions. Litigants are becoming more sophisticated in knowing that procedural challenges to regulations can sometimes defeat their implementation. As a result, many departments are becoming more diligent about adopting regulations. Projects are also getting more lengthy. The regulations section has recently reviewed several projects with over 100 pages apiece. This results in the need for more attorney time to review the regulations.
4. Drafting Manual. The Department of Law is assigned by statute to update the Drafting Manual for Regulations. The drafting manual was last revised in July, 1989. The manual is in need of updating to reflect new court decisions. Due to the existing workload, it will be difficult to produce an update in the near future. Keeping the drafting manual current avoids expensive litigation to the state.
5. Lengthy delay in review of regulations. At the present time, due to a backlog of projects in the Legislation/Regulations Section, nonurgent projects may take up to four to five months to review. This delay is causing some important projects not to be timely implemented, such as recent changes to the medicaid program for psychiatric services. The danger here is that long-delayed projects sometimes result in emergency situations.
6. Fish and game regulations. Fish and game regulations present a special and unique situation. The Department of Fish and Game is committed to having its fishing and hunting regulations for the entire "regulatory year" (July 1 -- June 30) adopted and filed by late spring, to allow for the distribution of copies in pamphlet form to the public. The pamphlets of fishing and hunting regulations are well received by the public and are a practical solution to the public having to carry copies of the AAC with them while fishing or hunting. This compressed schedule has been further complicated by the necessity to coordinate the new subsistence law with the "regulatory year" regulations. At the same time that these regulations need to be reviewed, the section is also reviewing 150 bill-review letters for the governor to take action on pending legislation within the governor's constitutional deadline.
7. Nonfunding Second Regulations Attorney. In the late 1970's

and through the 1980's, the Legislation/Regulations Section did have a second half-time attorney slot. Although there was sufficient need to justify additional staff at that time, the position had to be deleted in the late 1980's due to budget cuts. Our workload has increased substantially since then.

Also, the Department of Law has taken steps to expedite the regulation review process by establishing all-day Saturday regulation review parties. Even with this extra effort, the backlog has not been reduced.

Additionally, the chief of staff and I have both received requests from legislators to speed up introduction of the governor's bill package to allow early consideration of important issues. Because the Regulations Attorney is also responsible for editing the bill package, it has been impossible to dedicate sufficient additional hours to expedite the bill-drafting process. The result has been frustrating to the Department of Law, the Office of the Governor, and the Legislature.

Finally, the Department of Law recently has contracted for over \$40,000 in contracts for editing of regulations. These costs could be nearly eliminated if a new attorney on staff was hired.

MEMORANDUM

STATE OF ALASKA
Department of Administration

To: Shelby Stastny
Director
Office of Management and Budget
Office of the Governor

Date: March 2, 1993

From: Nancy Bear Usara
Commissioner
Department of Administration

Phone: 465-2200

Subject: FY 93 Supplemental - Division of Personnel/OEEO

We request that the FY 93 supplemental for the Division of Personnel/OEEO be increased from 64.0 to 131.0. 25.0 will be allocated to the Personnel/OEEO Component and 42.0 to the Labor Relations Component.

As you know, we have undertaken three major structural changes in the State's personnel system over the past year.

- o Consolidation of the Divisions of Personnel/OEEO and Labor Relations.
- o Statewide consolidation of recruitment and examining and implementation of the Human Resources Manager concept.
- o Implementation of vacancy based recruitment.

These changes have already resulted in significant statewide cost savings. However, implementation of these projects has been a major undertaking for the Division of Personnel/OEEO at a time they are also negotiating ten labor contracts. Quite frankly, we misjudged the resources needed to implement these special projects and maintain an appropriate level of service to all State agencies during implementation. Exacerbating the situation, we have temporarily lost staff in the Division of Labor Relations to illness and will need to make adjustments to cover their workload.

Our original FY 93 workplan called for layoff of several positions this spring as the division settled into the new organization and processing backlogs were caught up. The 89.0 supplemental will allow the division to maintain an adequate staffing level for the remainder of the year and provide the 200-400 funds necessary for division staff to be effective in their work.

Without this additional funding, it would be necessary to lay staff off immediately and remaining staff would not have the travel, supplies, and contractual funds necessary to be effective in their work. As services to agencies eroded, there would be a real cost to all agencies from delayed action. Further, the potential negative impact on labor negotiations could translate into increased costs far outweighing this request.

This problem should not arise in FY 94. Implementation of the structural changes will be complete and negotiation of many, if not all of the contracts should be completed. Further, the FY 94 budget request recognizes that the Division needs to be General Funded rather than relying on I/A receipts and the necessary transfers have been made.

SUBJECT: FY 93 Judgments Supplemental
Revision #1

Charles E. Cole
FROM: Charles E. Cole
Attorney General

This is to revise our request of January 15, 1993, for a supplemental appropriation to pay judgments awarded against the state during FY 93. Since that time, the Department of Law has received 6 additional judgments totalling \$45,600. Furthermore, interest on 3 judgments in the original request had to be recalculated at an increased cost of \$320. Therefore, our original request for \$87,700 to pay miscellaneous judgments should be increased to \$133,600. The revised list of judgments is attached for your review.

Arctic Power Action Plan Summer/Fall 1993

1) Outreach to major national interest organizations

A) Identify potential allied interest groups - both past supporters and new contacts - (Approximately 35 of the most active groups have been contacted, linked via fax network and are receiving regular information from Arctic Power re: wilderness legislation and what their membership can do to help prevent it).

***Contact all organizations (more than 150) with pro-ANWR resolutions on file; prepare information for national associations (over 2,000), contact and solicit their support - travel when necessary; distribute new, updated information on ANWR; provide speakers to former and new contacts; utilize and expand on existing national networks such as NIA/MULTA, other pro-development organizations.**

B) Establish computer network and national database of pro-ANWR contacts; establish fax network with 1,600 national media contacts, supply with regular facts and info on ANWR, status of the issue, etc.; coordinate press contacts with supporting groups to educate on ANWR; designate contacts and information distribution centers, provide materials.

C) Meet with interest groups to provide information, map out game plan to utilize pro-ANWR groups in specific regions, nationally.

D) Schedule regular summit meetings with supporters to maintain interest and keep them updated on ANWR status and issues.

2) Keeping Alaskans et al updated on ANWR status & issues

A) Generate ANWR status information based on current politics; distribute regularly through effective outlets and organizations that support ANWR; utilize direct mail, newspaper supplements, distribution at key business gatherings, etc. (Initiated 1/25/93).

B) Use computer and fax network in Alaska to provide immediate information on ANWR.

3) Planning of Congressional Tours of Slope & ANWR

A) Work with Alaska's congressional delegation re: 1993 summer tours; coordinate in-state planning; assist in facilitation. Because of Arctic Power's non-profit status, congressmen, staff and administration officials are more readily able under ethics laws to accept trips to Prudhoe Bay. It is expected that some of the travel in Alaska would be underwritten by oil companies.

ability to communicate with and mobilize certain, specialized segments of the population.

Following are the groups Arctic Power is contacting to begin its national network - this list will continue to expand as the network evolves:

Air Transportation Association	American Assoc. of Blacks in Energy
American Assoc. of Petroleum Landmen	American Maritime Congress
Associated Builders & Contractors	American Trucking Associations
Center for Defense of Free Enterprise	Highway Users Federation
Ind. Petroleum Assoc. of America	Internatl. Assoc. of Drilling Contractors
Inter. Assoc. of Geophysical Contractors	Interstate Natural Gas Assoc./America
Natl. Assoc. of Home Builders	American Farm Bureau
Natl. Assoc. of Manufacturers	Natl. Assoc. of Realtors
Natl. Cattlemen's Assoc.	National Inholder's Association
Natl. Coal Association	National Tour Association
People for the West	Alliance for America
The National Grange	US Chamber of Commerce

Initial contact includes a familiarization packet to the president, director, communications officer and other applicable individuals in the group. The packet details the ANWR issue, any past involvement the group has had on ANWR, information on Arctic Power, and information from Alaskan supporters.

Arctic Power will then establish phone contact with each group, designate a contact person/liaison, and provide updates on the status of the ANWR issue in Congress to the organization. Updates will include a computer bulletin board accessible through an 800 number, printed materials that can be distributed to members of the interest groups, and phone briefings to the organization's liaison. Includes production of newsletter geared to national supporters. As a standard course of business, updates will be provided between two and six times per month unless the political situation dictates an increased amount of dialogue.

In addition, **Arctic Power will establish a fax network of the national groups, key interest group chapters, and ANWR supporters in Alaska, on a fax board that allows quick distribution of urgent information.** A fax board accessing major national media will be installed.

Arctic Power will secure current pro-ANWR, anti-wilderness designation resolutions from the interest groups by working with their executive committee and board members. In some cases, where the groups have a large national convention with a broad attendance, Arctic Power will send representatives to make a presentation, staff an informational booth and meet with influential members of the organization. It is Arctic Power's intent to fill all speaking requests that would provide an opportunity to address a national audience on the ANWR issue.

Arctic Power Action Plan Summer/Fall 1993

1) Outreach to major national interest organizations

A) Identify potential allied interest groups - both past supporters and new contacts - (Approximately 35 of the most active groups have been contacted, linked via fax network and are receiving regular information from Arctic Power re: wilderness legislation and what their membership can do to help prevent it).

1/29/93

Harold Heinze
Natural Resources Advisor
Office of the Governor
411 W. 4th Avenue, Suite 2C
Anchorage, AK 99501

Dear Harold:

Arctic Power has mapped out its national interest group network, as outlined in item 1 of your 1/19/93 letter to our organization. At this time, it is critical to re-involve former allies and forge new alliances as we discussed. Arctic Power has identified the most active players formerly involved in the ANWR issue, those with large and visible memberships, those with significant impact in Washington, D.C., and some emerging and important new grassroots organizations that can be of assistance to Alaska. Arctic Power has pinpointed 24 major groups to form the groundwork for the national network - historically, more than 300 entities and organizations across the United States are on record supporting ANWR oil production and it is objective of the organization to re-contact these groups and provide information to them in coming months.

Arctic Power submits the following proposal to serve as the conduit for outreach and information on ANWR to major national interest organizations:

OBJECTIVE: Identify potential allies; re-establish connections with past supporters and initiate relationships with new contacts.

The short-term objective is to establish an information network, secure support from the governing bodies of the interest organizations, and maintain contact on the ANWR issue. The long-range plan is to communicate on a regular basis with the organizations, to secure their assistance if needed on the ANWR issue at the national level, both through their lobbying efforts and their grassroots membership involvement.

DELIVERABLE: Arctic Power has identified a group of national organizations from which to start a pro-ANWR, anti-wilderness designation network. The organizations were selected for a variety of reasons including, but not limited to, their previous support of the issue; their diversity of membership; their pro-business policies; their high visibility and/or credibility within the Beltway; and their

ability to communicate with and mobilize certain, specialized segments of the population.

Following are the groups Arctic Power is contacting to begin its national network - this list will continue to expand as the network evolves:

Air Transportation Association	American Assoc. of Blacks in Energy
American Assoc. of Petroleum Landmen	American Maritime Congress
Associated Builders & Contractors	American Trucking Associations
Center for Defense of Free Enterprise	Highway Users Federation
Ind. Petroleum Assoc. of America	Internatl. Assoc. of Drilling Contractors
Inter. Assoc. of Geophysical Contractors	Interstate Natural Gas Assoc./America
Nati. Assoc. of Home Builders	American Farm Bureau
Natl. Assoc. of Manufacturers	Natl. Assoc. of Realtors
Natl. Cattlemen's Assoc.	National Inholder's Association
Natl. Coal Association	National Tour Association
People for the West	Alliance for America
The National Grange	US Chamber of Commerce

Initial contact includes a familiarization packet to the president, director, communications officer and other applicable individuals in the group. The packet details the ANWR issue, any past involvement the group has had on ANWR, information on Arctic Power, and information from Alaskan supporters.

Arctic Power will then establish phone contact with each group, designate a contact person/liaison, and provide updates on the status of the ANWR issue in Congress to the organization. Updates will include a computer bulletin board accessible through an 800 number, printed materials that can be distributed to members of the interest groups, and phone briefings to the organization's liaison. Includes production of newsletter geared to national supporters. As a standard course of business, updates will be provided between two and six times per month unless the political situation dictates an increased amount of dialogue.

In addition, **Arctic Power will establish a fax network of the national groups, key interest group chapters, and ANWR supporters in Alaska, on a fax board that allows quick distribution of urgent information.** A fax board accessing major national media will be installed.

Arctic Power will secure current pro-ANWR, anti-wilderness designation resolutions from the interest groups by working with their executive committee and board members. In some cases, where the groups have a large national convention with a broad attendance, Arctic Power will send representatives to make a presentation, staff an informational booth and meet with influential members of the organization. It is Arctic Power's intent to fill all speaking requests that would provide an opportunity to address a national audience on the ANWR issue.

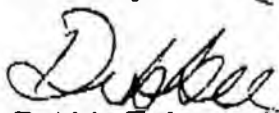

An information distribution system will also be established with key regional chapters of the interest groups in areas where the national groups, the congressional delegation, the state of Alaska and Arctic Power believe it is necessary. Several of the organizations have strong western chapters with a pro-development platform, while others have more strength in the eastern seaboard region and those ties need to be capitalized on through personal contact from Arctic Power, providing materials and speakers, and maintaining information flow.

Train and provide ongoing education for a speaker's bureau of Alaskans who can make informed presentations on many aspects of ANWR, including the history of Alaska oil development, history of the refuge and the 1002 study area, economic data, etc. These speakers will serve as emissaries to the national groups, national media and other targets as determined by the state of Alaska and Arctic Power.

Ongoing Effort - Arctic Power and the state of Alaska will jointly prioritize outreach meetings with the remaining 14 groups during the initial three month period. During this period, both parties will assess expenses from the mobilization phase and determine a structure for ongoing compensation for expenses in operating a national network.

Thanks for your time and assistance.

Sincerely,

Debbie Reinwand
Arctic Power
