**HOUSE and SENATE FINANCE COMMITTEE FILES, 2003-2004**

| Community | Pop. | FY   | Project                            | State              | Federal            | Other              | Total               | Scope  | Status |
|-----------|------|------|------------------------------------|--------------------|--------------------|--------------------|---------------------|--|--------|
| Kivalina  |      | 2003 | Lagoon and Force Main              | 749,100            | 2,247,000          | 0                  | 2,996,100           | Design and construct lagoon and force main. Connect school and washeteria.   |        |
|           |      | 2003 | Water System                       | 0                  | 0                  | 1,062,640          | 1,062,640           | Install 3-phase poweline extension and control cable to reservoir and boardwalk to WTP.  |        |
|           |      |      |                                    | <b>\$3,223,333</b> | <b>\$3,813,467</b> | <b>\$7,692,571</b> | <b>\$14,729,371</b> |  |        |
|           | 382  | 1992 | Sanitation Facilities Construction | 0                  | 0                  | 1,380,000          | 1,380,000           | Construct a central washeteria, install a 747,000-gallon WST, repair insulation on the existing WST, and install a 8,000-gallon bulk fuel tank.  | C      |
|           |      | 1993 | Solid Waste and Lagoon site        | 0                  | 0                  | 325,000            | 325,000             | Construct a solid waste disposal site and honeybucket/sludge disposal lagoon.  | C      |
|           |      | 1994 | Water/Sewer System Construction    | 420,000            | 0                  | 0                  | 420,000             | Install water treatment equipment and construct 692,000 gallon water storage tank and a bulk fuel storage facility; additional funding provided by other sources   | C      |
|           |      | 1997 | Water Source Study                 | 47,000             | 0                  | 0                  | 47,000              | Conduct groundwater investigation and preliminary design work for a new water supply   | C      |
|           |      | 1999 | Relocation Water and Sewer Study   | 110,500            | 110,500            | 0                  | 221,000             | Water well exploration including two test wells; geotechnical work for a waste disposal study  | C      |
|           |      | 2000 | Water/Sewer/Solid Waste PH II      | 73,750             | 221,250            | 0                  | 295,000             | Purchase heavy equipment to maintain water, sewer and solid waste facilities in the community  |        |
|           |      | 2002 | Sanitation Master Plan             | 37,500             | 112,500            | 0                  | 150,000             | Study alternatives for water, sewer and solid waste for new location of community  |        |
|           |      |      |                                    | <b>\$688,750</b>   | <b>\$444,250</b>   | <b>\$1,705,000</b> | <b>\$2,838,000</b>  |  |        |
| Klawock   | 854  | 1993 | Sanitation Facilities Improvements | 0                  | 0                  | 540,000            | 540,000             | Upgrade wastewater disposal system, upgrade WTP, and install a pressure water filter   | C      |
|           |      | 1996 | Sanitation Facilities Improvements | 0                  | 0                  | 198,000            | 198,000             | WTP instrumentation and monitoring equipment, remove filter sand and replace with anthracite filter media, replace damaged SS filter, WST construction plan/design with property easements. Downtown WST upgrades and level gauging equipment.   | C      |
|           |      | 1997 | Water and Sewer                    | 0                  | 0                  | 150,000            | 150,000             | Construction of water and sewer mains and service lines  | C      |
|           |      | 1997 | Water and Sewer                    | 0                  | 0                  | 1,273,000          | 1,273,000           | Off-site water and sewer mains to 20 homes, 750,000 WST with piping between WTP and the water distribution system, WTP wash flow control and supply improvements, improvements to the City dam, reservoir, and raw water pipeline systems.   | C      |
|           |      | 1998 | Sewage Treatment Plant             | 0                  | 0                  | 1,200,000          | 1,200,000           | Construction of a primary sewage treatment plant.  | C      |
|           |      | 1999 | Plan                               | 0                  | 0                  | 235,000            | 235,000             | Produce completed construction plans and specs for a raw water intake structure on Three-Mile Creek, Water transmission piping from the intake to the existing city of Klawock WTP. Select water intake site location and to plan the routing for both water transmission pipeline and vehicle access to the site. | C      |
|           |      |      |                                    | <b>\$0</b>         | <b>\$0</b>         | <b>\$3,596,000</b> | <b>\$3,596,000</b>  |  |        |
| Klukwan   | 136  | 1984 | Water and Sewer Upgrade            | 189,844            | 0                  | 0                  | 189,844             | Construction of spring collection basin to increase water supply; installation of water flow savings devices in individual houses; purchase of septic pumper truck   | C      |
|           |      | 1992 | Lagoon                             | 194,500            | 0                  | 0                  | 194,500             | Study to evaluate feasibility of using a sewage lagoon; construct 8" gravity sewer main, lift station, force main and primary cell sewage lagoon.  | C      |
|           |      | 1998 | Water system upgrade study         | 42,500             | 42,500             | 0                  | 85,000              | Village is experiencing seasonal water shortages. Study water source, treatment, storage and distribution system options.  | C      |
|           |      | 2000 | Water Project                      | 0                  | 0                  | 266,000            | 266,000             | Cover and repair 2 existing groundwater infiltration galleries, upgrade existing WTP to meet community needs, repair and repaint WST.  |        |
|           |      |      |                                    | <b>\$426,844</b>   | <b>\$42,500</b>    | <b>\$266,000</b>   | <b>\$735,344</b>    |  |        |

## **Introduction**

The Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) was created by the legislature in 1986 to provide a readily available funding source to investigate, contain, clean up and take other necessary action to protect public health and welfare and the environment from the release or threatened release of oil or a hazardous substance. Alaska Statute 46.080.030 states: "It is the intent of the legislature and declared to be public policy of the state that funds for the abatement of a release of oil or hazardous substance will always be available." (SLA 1986 Sec.1 Ch. 59).

Statutes governing the Response Fund were amended in 1989, 1990, 1991, 1994, and 1999. Generally, these amendments increased the purposes for which the Response Fund could be used and increased the Department of Environmental Conservation's (DEC) reporting requirements. In addition, the 1994 amendment made major changes to the Response Fund structure by dividing the Response Fund into two separate accounts: the "response" account and the "prevention" account. The diagram on page 3 illustrates the current structure of the Response Fund. The 1999 amendment changed the requirement for an annual report to the legislature on the status of the fund to a biennial report.

## **Response Account**

The Response Account may be used to finance the state's response to an oil or hazardous substance release disaster declared by the governor, or to address a release or threatened release that poses an imminent and substantial threat to the public health or welfare, or to the environment. To access the Response Account for any incident other than a declared disaster, DEC must notify the governor and the Legislative Budget and Audit Committee within 120 hours of using the money from this account.

The Response Account is financed with a two cents per barrel surcharge and money recovered from responsible parties. The surcharge is levied on each taxable barrel of oil produced in the state. The surcharge is suspended when \$50 million is reached from the combined balances of the surcharge account, the response mitigation account and the unreserved and unobligated balance in the Response Account itself. The \$50 million balance was exceeded in December, 1994 and the surcharge was suspended as of April, 1995.

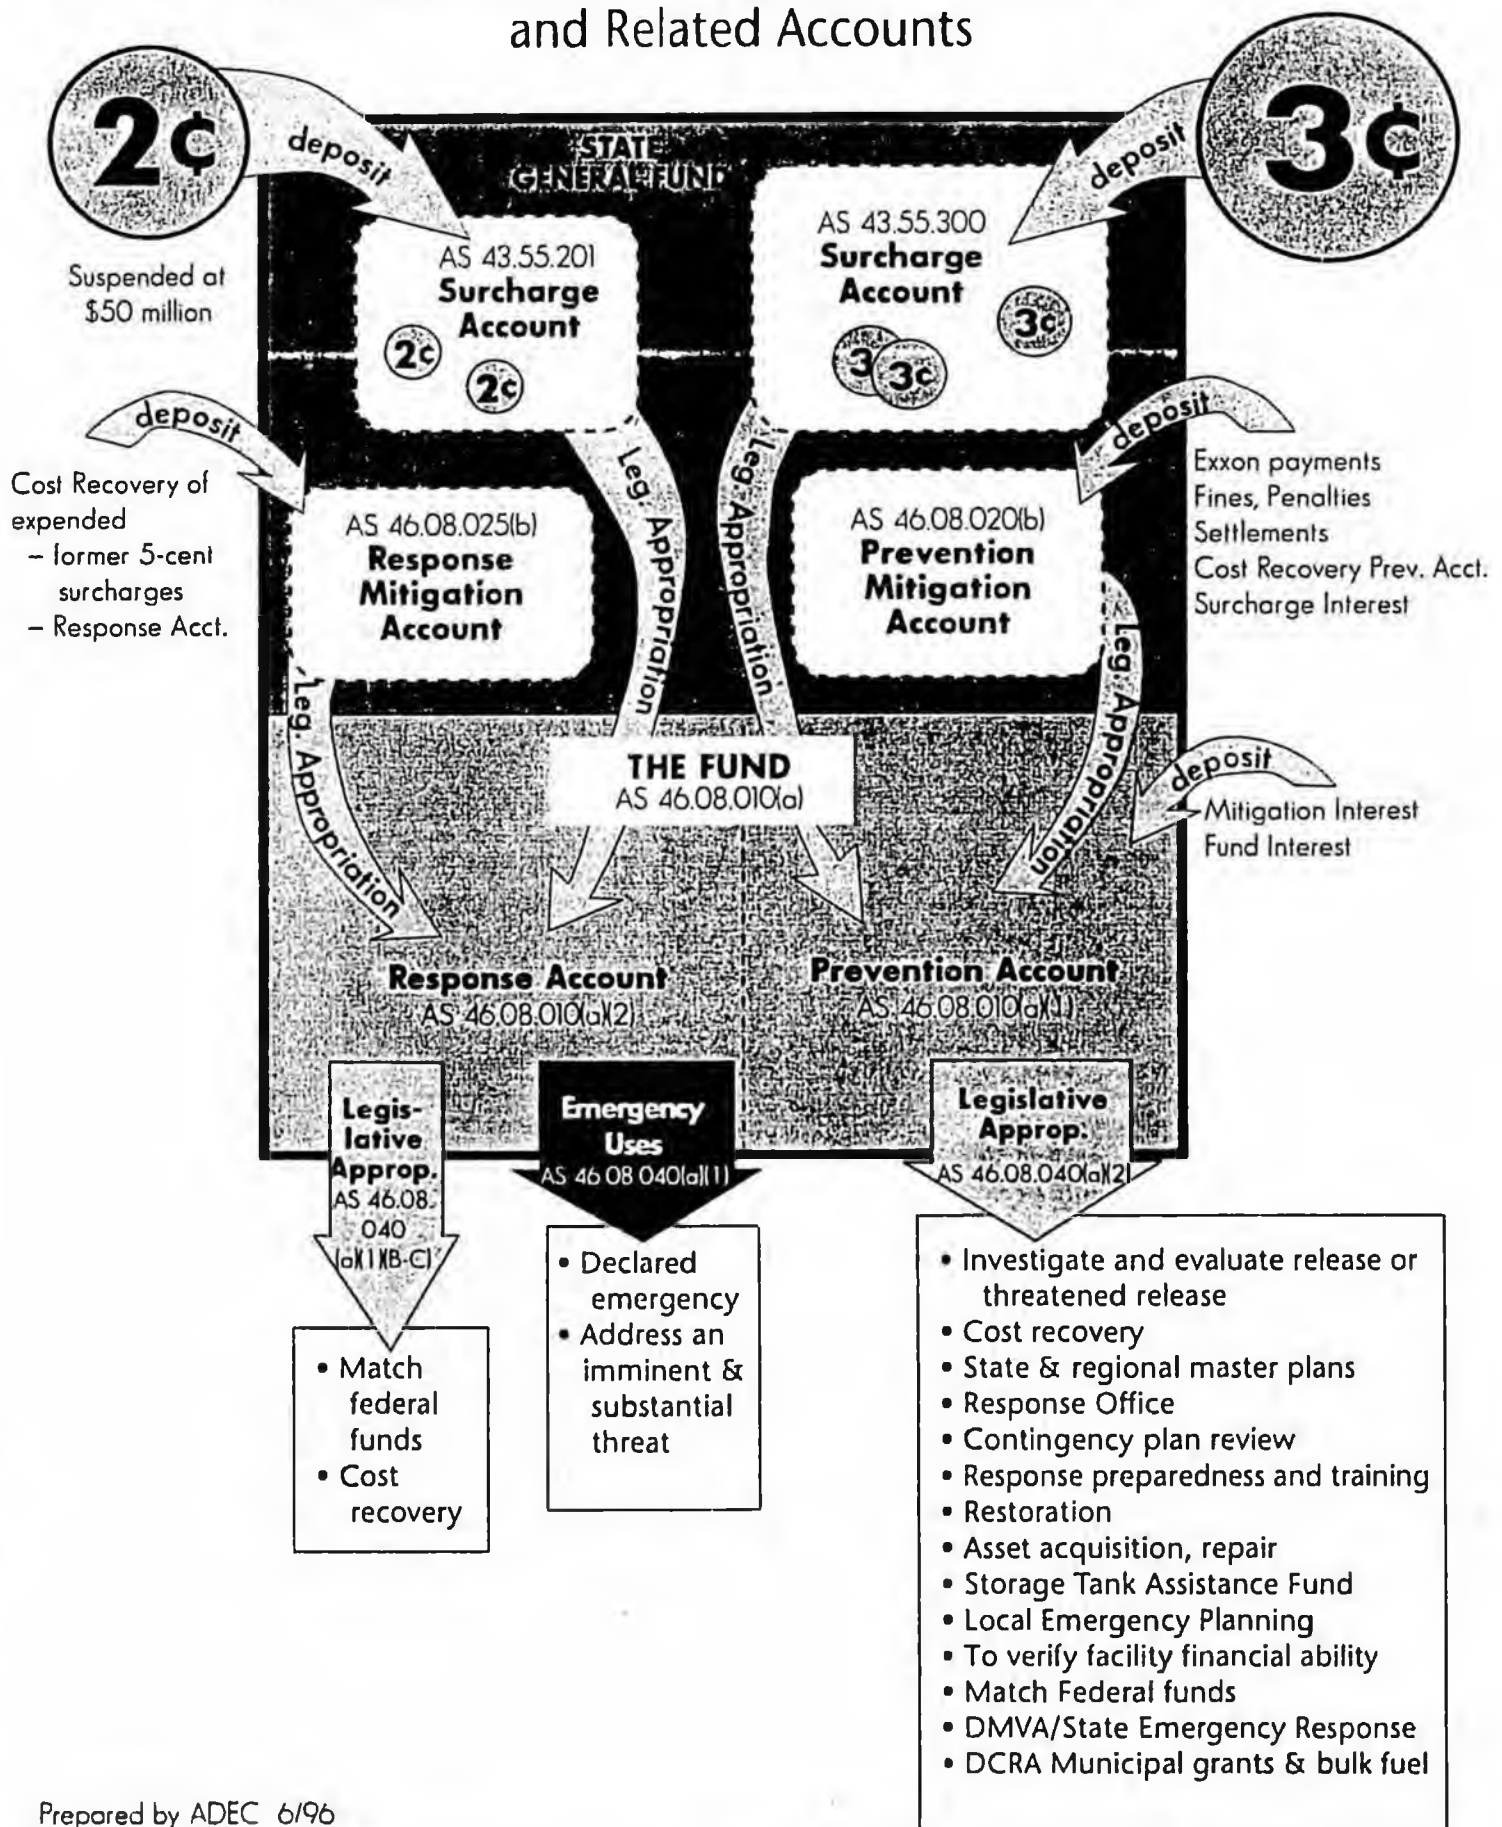

## **Prevention Account**

The Prevention Account may be used to respond to oil and hazardous substance releases that have not been declared a disaster by the governor. In addition, the Prevention Account may be used to fund Alaska's oil and hazardous substance release and prevention programs. The legislature appropriates money from the Prevention Account to support DEC and other state agencies for spill prevention and preparedness planning activities (AS 46.08.040(a)(2)).

The Prevention Account is financed with a three cent per barrel surcharge and fines, settlements, penalties and interest. The surcharge is levied on each taxable barrel of oil produced in the state.

Note 1: These amounts include reimbursable federal and interagency activity within the response fund.

Note 2: These amounts include reimbursable federal activity within the response fund.

Table B summarizes, by incident or site, deposits made in Fiscal Year 2000 and 2001 to the prevention and response mitigation accounts. All monies collected by the department as cost recovery, fines, penalties or settlement payments related to activity funded by the Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) are deposited in the mitigation accounts. These amounts do not include settlements that involved a Supplemental Environmental Project undertaken directly by the spiller.

Table B

Prevention Mitigation and Response Mitigation Revenues

Table C summarizes the various funding sources appropriated to the Oil & Hazardous Substance Release Prevention and Response Fund (Response Fund). "Program Receipts" are revenues collected from an outside party for specific program expenditures. "Mitigation Revenue" includes interest earned on surcharge deposits, cost reimbursement, fines, penalties or settlement payments from parties financially responsible for incidents or sites for which the state expended money from the Response Fund. "Oil Surcharge Revenue" represents collection in the prior year of the conservation surcharge imposed on oil produced in the state.

Table C

Revenue Sources

(In Thousands)

| Fiscal Year | Program Receipts | Mitigation Revenue | 3 Cents Oil Surcharge Revenue | 2 Cents Oil Surcharge Revenue <sup>Note 1</sup> | Other General Fund | Total       |
|-------------|------------------|--------------------|-------------------------------|---|--------------------|-------------|
| FY00        | -                | \$5,368.1          | \$11,075.5                    | -   | -                  | \$ 16,443.6 |
| FY01        | -                | \$5,803.4          | \$9,536.0                     | -   | -                  | \$ 15,339.4 |
| FY02        | -                | \$6,194.7          | \$9,295.2                     | -   | -                  | \$ 15,489.9 |
| FY03        | -                | \$6,490.0          | \$9,597.0                     | -   | -                  | \$ 16,087.0 |

Note 1: AS 43.55.221 (d) provides that imposition and collection of the \$.02 per barrel of oil surcharge levied and collected be suspended under, AS 43.55.201 when the cumulative balance of these accounts equals or exceeds \$50,000,000.00. The suspension of the imposition and collection of the surcharge went into effect as of April 1, 1995.

Table D lists contracts the department signed that are associated with response activities funded by the Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) and which exceeded \$10,000 in FY01 & FY02 payments.
