150

Revenue Sharing

- Commercial Vessel Passenger Tax Account
 - First 5 ports of call
 - Legislature appropriated all proceeds collected in FY 2007 (collected through June 30, 2007)
 - Collected \$3,845,140 in FY 2007
 - Funds disbursed to qualifying municipalities and boroughs in December 2007
 - Collected \$42,626,130 to date in FY 2008 (since July 2007).
 - Future disbursements must be appropriated by Legislature

FY 2008 Disbursements

(first 5 ports of call)

City/Borough	Number of Passengers	Total Revenue Disbursed
Ketchikan Borough	81,524	\$203,810.00
Hoonah	2,803	14,015.00
Kenai Peninsula Borough	6,489	16,222.50
Seward	6,489	16,222.50
Skagway	67,971	339,855.00
Whittier	8,968	44,840.00
Sitka	20,665	103,325.00
Haines	1,258	<u>6,290.00</u>
Total Disbursements		\$744,580.00

FY 2009 Estimated Disbursements (first 5 ports of call)

City/Borough	Number of Passengers ⁽¹⁾	Estimated Revenue Sharing
Ketchikan Borough	814,262	\$2,035,655.00
Hoonah	107,202	536,010.00
Kenai Peninsula Borough	154,174	385,435.00
Seward	154,174	385,435.00
Skagway	742,993	3,714,965.00
Whittier	211,994	1,059,970.00
Sitka	200,079	1,000,395.00
Haines	21,586	107,930.00
Kodiak	2,041	<u>10,205.00</u>
Total Disbursements		\$9,236,000.00

(1) Based on 2007 cruise ship season. Doesn't include May 2008 receipts collected in FY 2008.

Account Balances (2007 Cruise Ship Season)

Account	Total Actual Revenue Disbursed or Available
Commercial Vessel Passenger (CVP) Tax Account – Total amount collected	\$34,853,452.50
Amount disbursed to first 5 ports of call in December 2007	\$744,580.00
Amount available to disburse to first 5 ports of call in FY 2009	<u>\$9,236,000.00</u>
Amount remaining for other projects	\$24,872,872.50
Regional Cruise Ship Impact Fund – Total amount collected	<u>\$11,617,817.50</u>
Total available for other projects and impacted regions	\$36,490,690.00

CPV Tax Account (\$24.8 million)

- Commercial Vessel Passenger Tax Account
 - Remaining revenue (after sharing with first 5 ports of call) is **not** shared with communities
 - Funds can be used to “for state-owned port and harbor facilities, other services to properly provide for vessel or watercraft visit, to enhance the safety and efficiency of interstate and foreign commerce and such other lawful purposes”
 - Funds can be used for state projects in specific communities
 - Dept. of Revenue is not tasked with drafting regulations to determine how this fund is spent
 - Appropriation is required by the Legislature
 - No appropriation made by Legislature in FY 2007 or FY 2008

Regional Cruise Ship Impact Fund

(estimated amount available for appropriation - \$11.6 million annually)

- Disbursements from this fund must be appropriated by Legislature
- Funds can only go to municipalities and other governmental entities “impacted” by cruise ship activity
- Funds cannot go to communities receiving revenue under “first 5 ports of call” rule

FISCAL NOTE #2

STATE OF ALASKA
2008 LEGISLATIVE SESSION

BILL NO. CSSSHB 348(RES)

ANALYSIS CONTINUATION

SSHB 348 was written for the purpose of emphasizing, in statute, the allocative nature of many game regulation decisions, so that such decisions would not be subjected to the whims of political change through the initiative process. Unfortunately, the way the bill is worded, it could easily be interpreted as serving to limit the Board of Game's ability to exercise many of its most important powers to only those situations in which the regulations are being done "as a means to allocate the asset of game." Because of this danger, the Board would be forced to build a record for every regulation which illustrates how the Board is allocating game through that regulation. This would likely add several days to each major board meeting, with resulting costs, and to more legal arguments and challenges regarding whether, and how, the Board is allocating, also with resulting costs. It is difficult to predict the increased costs for the Department of Law, but it might be reasonable to guess, for now, that up to two more lawsuits per year might be the result requiring additional resources equivalent to 1/4 FTE of attorney time.

REPRESENTATIVE WES KELLER DISTRICT 14 Sponsor Statement

CS FOR SS HB 348 (RES)

"An Act relating to the adoption of regulations by the Board of Game."

For years Alaska has devoted time and money to the management of one of its most valuable renewable resources. Wild Game represents many things to many Alaskans. Be it commercial guiding, hunting, or simply viewing wildlife, Alaska is unique and every Alaskan enjoys the gift of the resource.

Every year, Alaskans and tourists carrying in state or out of state licenses look for the moose, caribou or bear. Every summer thousands of tourist marvel at herds of caribou or a lone moose or sow with her cubs.

Alaska's wildlife is an asset. Without them not as many people would visit the state, which translates into a loss of revenue. Without them, guides would not earn a living and hunters would not put food on the table.

The problem we face is that we have not allowed our Boards of game to manage the resource and allocate it for what it actually is, an asset. CS for SS for House Bill 348 (RES) will accomplish that by inserting those important words into statute. The language makes it clear to others that it is our asset and we will manage for abundance as promised in the Alaska Constitution.

We urge your support for the language in CS for SS for HB 348 (RES) to make it clear we understand what our wildlife truly is and what they mean. It is language that is easy to understand whether you live in Alaska or somewhere else.

Ads connect predator control, corruption

Rep. Mary Kapsner, D-Bethel (KTUU-TV)

by Jason Moore
Tuesday, March 11, 2008

ANCHORAGE, Alaska -- The scandal-ridden VECO Corp. had little to do with the state's predator control policies.

But one wouldn't know that watching an ad now airing by the Defenders of Wildlife Action Fund.

The group is attempting to pressure lawmakers into rejecting a pair of bills that would strengthen the predator control laws.

Defenders of Wildlife was active in gathering signatures for the ballot measure that would outlaw aerial wolf killing. (KTUU-TV)

The ad highlights the ongoing corruption scandal, including bribes and politicians who find themselves in jail concerning the Legislature's oil tax debates in 2006.

But group is attempting to stop predator control by drawing a correlation to the corruption probe.

"56,000 Alaskans signed a petition saying we want an opportunity to weigh in on these important wildlife issues for our state and the Legislature is pushing bills that could remove their ability to do that and we think the public needs to know about it," said Defenders of Wildlife Action Fund spokesman William Lutz.

Rep. Lindsey Holmes, D-Anchorage (KTUU-TV)

Defenders of Wildlife was active in gathering signatures for the ballot measure that would outlaw aerial wolf killing.

It argues bills under consideration would limit what game issues are decided by ballot initiative. But lawmakers don't like the group's tactics.

"Many of those of us from rural Alaska who have had nothing to do with VECO or Bill Allen or Rick Smith have been strong proponents of aerial wolf kill and predator control," said Rep. Mary Kapsner, D-Bethel. "I am deeply offended by that intimation that those are somehow those are connected."

Orutsararmiut Native Council Co-Chairman Greg Roczicka (Rich Jordan/KTUU-TV)

"I was not impressed," said Rep. Lindsey Holmes, D-Anchorage. "I thought that drawing the parallel between those two was inappropriate."

Backers of wolf control programs called the ad disingenuous.

"If you want to say that folks that would support legislation

like that are corrupt then you might as well call all bush Alaskans corrupt as well by association," said Orutsararmiut Native Council Co-Chairman Greg Roczicka.

"It's about the trust people place in their representatives to represent their point of view," Lutz said. "Whether it's corruption and kickbacks or removing the public's ability to vote on issues that they said they want an opportunity to vote on -- it's all about the public trust in their representatives."

The VECO scandal had a backlash that hurt the oil industry in the form of higher taxes.

Defenders of Wildlife hopes the Legislature's credibility is shaken enough for a similar backlash against predator control.

One of the bills at issue is House Bill 348 authored by Wasilla Rep. Wes Keller.

His office says the bill would change the wording in state law to make it clear game is an asset that can only be allocated by the Legislature, not a citizens' initiative.

Keller says the bill will not affect the aerial wolf killing initiative on the ballot this year.

Shameful tactic 3/13/08

PAULI GONZA

Wildlife group pulls a sleazy trick

OPPONENTS OF predator control in Alaska are zealots and avid mudslingers, but they are stooping to a new low with their media campaign against wolf control legislation.

A television ad running in a heavy (and expensive) schedule on Alaska's broadcast stations suggests that their opponents are tied in with the ongoing corruption scandals involving several legislators and two former executives of Veco Corp. It even incorporates footage shot by the FBI with hidden cameras in the infamous Room 604 of the Baranof Hotel.

The ad, funded by the Defenders of Wildlife Action Fund, says "the corruption must end." Only problem for them — and members of the public who are deceived by the ad — is that the wolf control legislation being considered has nothing whatever to do with the corruption scandal.

Defenders of Wildlife is upset because the proposed legislation would blunt the impact of a wolf-control initiative on the ballot for this . . .

(cont'd from front page) August's primary election in Alaska, one signed by 56,000 people.

Rep. Wes Keller, a Wasilla Republican, is sponsor of one of the bills. His would establish game as an asset that can only be allocated by the Legislature, not a citizens' initiative.

Defenders of Wildlife's ploy is a sleazy opportunist trick intended to distort public policy with downright dishonesty.

We support Keller's idea and feel it should be expanded to put further limits on what can and can't be decided by petition. We think another measure would be in order as well, one restricting the sales pitches used by activists soliciting signatures on petitions.

Right now, the signature collectors can say anything they want. Even if people read before they sign, anyone who has ever been approached by them has probably heard statements made like: "Do you like wolves? Sign here." or in other cases: "Want to save democracy? Just write your name here."

By the time the person bends over to read the petition, he or she has already made up their mind and skims the wording (if they read it at all) before signing.

This is gross abuse of the public trust. The right to petition government is sacred in this country, but abuses like those we see here every year must be curtailed.

Suzanne - Please distribute this as my Email testimony on HB 348 to all the members.

Dear House Finance Committee members:

I urge you not to pass HB 348:

HB 348. This bill puts the welfare of Alaskans Wildlife into the hands of only a few. These few represent only a small percentage of Alaska's population and this is not equal representation. I also strongly believe it is in the best interest of Alaska's Wildlife to have a broad group of Alaskans develop and give input to the wildlife management policies of Alaska and not just a few people. I think the move to make the Wildlife "assets" of the state and therefore closed to public debate was not the intent of the Constitution of the State of Alaska. The citizens of this state must be allowed to continue to bring forth initiatives regarding predator control and the management of our wildlife. The management of Alaska's Wildlife should not be in the hands of the Board of Game, these people are not the best qualified people to make these policies. Our wildlife management policies and predator control program must be based on sound science and we must absolutely require scientific data to support any management decision or policy effecting Alaska's wildlife. To do otherwise is unprofessional, short sighted and not in Alaska's best interest. Alaska deserves the very best and the most qualified professionals to develop and monitor our wildlife management policies. How can the Board of Game monitor and report or even make recommendations for predator control with unsubstantiated, unproven, unscientific, speculative, tenuous data at best? In addition the citizens of this state must be allowed to continue to bring forth initiatives regarding predator control and the management of our wildlife. The initiative process has and always will, serve the greater good, bring forth the better way, because it is the democratic way.

Article 8 - Natural Resources

§ 1. Statement of Policy

It is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest.

I urge you not to support HB 348.

Subject: HB 348 & HB 176

As a long time eco tour operator in Southeast, Alaska and the president of SAWTA.ORG (Southeast Alaska Wilderness Tours Association) we are in strong opposition to both of these pieces of legislation. Wilderness tourism is such a strong part of Alaska's economy and aerial hunting of predators as seen by tourists in the lower 48 and abroad has a huge impact on that industry. A couple of years ago when there was publicity on aerial hunting of wolves in Alaska it actually had a significant impact on our business. Several of our customers voiced real opposition to the proposed aerial wolf hunts. Many things have changed the dynamics of tourism in the last 25 years. One of the big draws throughout Alaska is Bear Viewing why don't you let these outside tourist no you plan to make it easy to hunt them by air and see how many tourists you loose. A few months back there was an incident at McNeil River and I know the Anchorage daily news had a reference to it, where a bear was shot at close range. I heard about it from about 50 different people around the world who were all extremely upset. I know they are not Alaska residents but they represent a vital part of Alaska's economy.

Thank you,

Sincerely,

John Swanson

Dear House Resource Members::

We oppose HB 348 which makes wildlife an "asset" or commodity much akin to oil and gas or other resources. Clearly the intent of this bill is to redefine wildlife as an asset so that the public will no longer be able to bring wildlife initiatives to the voters. At the same time this bill's language strengthens the Board of Game mandates for predator control under the intensive game management law. Basically, this bill would make it the Board of Game's job to turn management of our state's wildlife into a game ranch for moose and caribou. Before humans interfered there were more prey and predators which cycled naturally and achieved a dynamic equilibrium.

This was not the intent of our original constitution. Wildlife belongs to all Alaskans, not just hunters and trappers who constitute only 18% of Alaska's adult population. Wildlife also does not just mean moose and caribou. Wildlife should be managed by the Board of Game to protect all species so that healthy ecosystems are maintained throughout the state. Predators are usually the scapegoat for excessive numbers of game taken by hunters.

Again, the purpose of this bill, like SB 176, is to remove the right of citizens to bring wildlife initiatives to the voters. Wildlife management should be scientifically based, and citizens should have the right to take serious issues of game management to the voters. This is the state's system of checks and balances. Please do not remove this democratic oversight from the public.

Oppose HB 348!

Sincerely,

Nina Faust

Subject: Legislation HB 348

Hello

I am writing you with great concern, regarding the current proposed legislation, specifically HB 348. The proposal, as we all know, is simply an attempt by the Alaska State Board of Game to avoid a repetition of the rather unfortunately necessary embarrassment of being sued for failing to comply with their own mandates and laws.

The Board of Game's wish to impose and allow airborne and same day airborne aerial predator exterminating runs contrary to long-standing and respected hunting traditions. The Board of Game's wish to make decisions without due and careful study, without consideration of the best available sound science is, at best, narcissistic, more probably negligence and gross malfeasance. Any decisions of environmental management must consider and value the best available sound science over the whims of a few people granted political postings.

Of equal importance here is the issue of accountability. The Board of Game's intent to remove the potential for any further litigation against them is unacceptable. Political decisions must, like all choices we make, come with responsibility and accountability. The Board of Game are flagrantly denying basic principles of a democracy. Proposing that their own opinion of the time is reason enough to make decisions that flout the opinions of their state constituents is not a basis for any reasonable system of government, and certainly does not belong in the institution of American Politics. Governor Palin touts transparency as a critical structure of her government. Well, this is as transparent as it gets - I'm certain the Alaskan voting population, as well as the hundreds of thousands of tourists who spend their vacation dollars in this state every year can see right through this farcical and completely unacceptable proposal.

Government officials must be accountable to the will of the populace they represent. The Board of Game MUST be required to show any and all factors affecting their decisions, they must be required to reflect conclusions of examined and peer-reviewed sound science that informs their decisions. Policy must be supported by, and reflect, the infallible information, not the egos and outdated Neanderthalic ideologies of a few. Constituents must have opportunity for input, as well as full legal recourse for failing and unreasonable policies. In the interest of Alaskan tourism, of Alaskan community, human and non-human alike, HB 348 must not be adopted.

HB 348 is an affront to the fundamental principles the laws of this country are based on. The "will of the people, of the people for the people" does not contain the word "regardless" in it. The people of Alaska have spoken, clearly, emphatically and repeatedly they do not want the wildlife of Alaska to be declared a "public assot". By the Board of Game's own game management law, the intent is to "reallocate the harvestable surplus of game animals from predators to humans", and yet they, simultaneously intend that the "people" are removed from decisions regarding that allocation, that the will and clearly communicated desire of the people is not just ignored, but opposed. Alaskan citizens have voted against aerial predator control twice now, and requested proposed initiatives to vote it down yet again, and the Board of Game, in all their suited and veiled arrogance, are attempting to wrestle even this opportunity out of their reach. To deny the constituency even a voice in policy-making is as un-American as bad Apple Pie. I sincerely urge you to consider the long-standing traditions of accountability of a land and place-based hunting ethos, of democracy and decent community and vote down HB348.

Thank you.

Best Regards

Carl

SB 176, HB 256, HB 348 and
proposals 41, 42

Pg 2

We read about the biologist VIC VAN BALLEMBERGHE AND BOB TOBEY WHO SAID "WHY KILL PREDATORS TO BOOST THE MOOSE POPULATION IF THE HABITAT CAN'T HELP SUPORT MORE MOOSE?" But we should blame Fish and Game Board for the deliberately open hunting. Recently Fish & Game came up with these proposals 41 and 42, which will allow MOTHERS BEARS AND THEIR CUBS TO BE KILLED AND WOLVES PUPS IN THEIR DENS TO BE KILLED. HOW CAN PEOPLE HAVE THIS TERRORIST- LIKE IDEOLOGIES? NOT EVEN THE WILD ANIMALS DO THAT INSTEAD THEY FIGHT FOR THEIR CALVES OR PUPS. HOW COME A HUMAN ACCEPT THESE ATROCITIES. God made the people special but God also made the animals therefore they have value because GOD made them. TO KILL ANIMALS AS A SPORT IS CRUEL, AND INHUMANE. House Bill 256 IS REPUGENT AND DISGRACEFUL. THIS COUNTRY WAS BUILT UPON THE BIBLE AND SOMEDAY GOD WILL JUDGE EACH OF US. WE HAVE TO GIVE AN ACCOUNT TO GOD. IF WE DON'T HAVE COMPASSION WHILE WE ARE ON EARTH, GOD WON'T HAVE MERCY ON US. Right now Sarah Palin and friends from the Fish and Game Board are killing indiscriminately the WOLVES. REVELATION 22-12 SAYS, "AND BE HOLD, I COME QUICKLY; AND MY REWARD IS WITH ME, TO GIVE EVERY MAN ACCORDING AS HIS WORK SHALL BE." REVELATION 22-13 SAYS, " I AM ALPHA AND OMEGA, THE BEGINNING AND THE END, THE FIRST AND THE LAST." WE ARE GLAD THAT GOD IS MORE POWERFUL THAN ANY MAN ON THE EARTH. SAMUEL 1-7 says " FOR THE LORD SEETH NOT AS MAN SEETH; FOR MAN LOOKETH ON THE OUTWARD APPEARANCE, BUT THE LORD LOOKETH ON THE HEART.

When it comes to wildlife existence, GOD created everything with a purpose. The purpose was to feed humans when necessary; as "SUBSISTENCE", and to enjoy them. GOD didn't give the authority to completely eliminate them, as Sarah Palin and her friends from the Fish and Game Board want to eliminate the animals that don't produce any money and the animales that kill moose, caribou etc.

 Governor

MARCH 2008

To: Governor Sarah Palin, Lt. Governor, Senators and Legislators.

The voters of the State of Alaska have voted twice to ban aerial shooting. Alaska voters have spoken aerial shooting should be banned. ARE YOU GOING AGAINST ALASKANS VOTES? HOW CAN THE POLITICIANS IGNORE TWO STATE WIDE VOTES ON PREDATOR CONTROL. SB 176, HB 256 and proposal 41,42 are BARBARIC, SAVAGE AND INHUMANE, How can people have these "TERRORIST-LIFE IDEOLOGIES. The Alaskans don't want you to kill the Wolves and Bears in different ways. THE NATURAL RESOURCES BELONG TO ALL ALASKANS NOT ONLY TO THE POLITICIANS. YOU NEED TO LISTEN TO THE NON-HUNTERS TOO. GOD created the animals with a purpose. The purpose was TO EAT EACH OTHER and feed humans when necessary, as subsistence, and for people to enjoy them. GOD didn't give the authority to completely eliminate certain animals, as the politicians want. Nature can take care itself. Since GOD is perfect, some politician want to TWIST the creation of GOD for their own purposes. To kill wild animals for SPORT OR FOR TROPHY IS CRUEL AND INHUMANE. GOD made the animals, so they have value. If people say the animals have value, then WHY DO ONLY RICH PEOPLE WEAR OR CAN AFFORD, TO WEAR FUR COATS. Right now, we are begging the POLITICIANS, to have COMPASSION for the WOLVES AND BEARS. Someday the POLITICIANS will be begging for MERCY FROM GOD. YOU SHOULD READ LUKE 16: 19-25. REVELATION 22-12 SAYS, "AND BEHOLD, I COME QUICKLY; AND MY REWARD IS WITH ME, TO GIVE EVERY MAN ACCORDING AS HIS WORK SHALL BE." REV. 22-13 SAYS, "I AM ALPHA AND OMEGA, THE BEGINNING AND THE END, THE FIRST AND THE LAST". WE ARE GLAD THAT GOD IS MORE POWERFUL THAN ANY MAN ON THE EARTH. SAMUEL 1-7 SAYS "FOR THE LORD SEETH NOT AS MAN SEETH; FOR MAN LOOKETH ON THE OUTWARD APPEARANCE, BUT THE LORD LOOKETH ON THE HEART.

THE POLITICIANS MADE RULES WE MUST OBEY AND FOLLOW. IF PEOPLE BREAK THE RULES THEY HAVE TO PAY THE CONSEQUENCES. GOD MADE THE 10 COMMANDMENTS AND PEOPLE SHOULD RESPECT AND FOLLOW THEM, WITHOUT BREAKING THEM. THE 10 COMMANDMENTS ARE MORE IMPORTANT THAN THE POLITICIANS RULES. HOWEVER, THE POLITICIANS DON'T CARE ABOUT GOD RULES, AND THEY BREAK THEM.

Don't blame the WOLVES AND BEARS for the decrease of Moose and Caribou population. GOD made the animals to eat each other. When animals kill animals it is THEIR NATURE GOD MADE THEM THAT WAY. You should blame the Fish and Game Advisory Committee and the BOARD, they manage the NATURAL RESOURCES ACCORDING TO THEIR CONVENIENCE AND PURPOSE. After all the BOARD has consisted largely of white, male, urban "sportsman" professional hunters and trappers. Hunting is a HUGE BUSINESS CONTROLLED BY A FEW PEOPLE. You should blame the BOARD for the OPEN HUNTING OF CARIBOU AND MOOSE. (

February 2008

To: Governor Sarah Palin

House Bill 256, HB 348, SB 176, Senator Bill 176 & proposals 41, 42

Yolanda de la Cruz
806 W. 57th Avenue
Anchorage, AK. 99518

Despite two public votes by Alaskans and to abolish it. The voters of the State of Alaska have voted twice to ban aerial shooting. Alaskan voters have spoken that aerial shooting should be banned. Are you going against Alaskans votes? How convenient it is for the Fish & Game Board with the support of the Governor Sarah Palin to exterminate certain animals for there own convenience and purposes, and satisfy their ego. Fish and Game Advisor Committee and the Board of Game are responsible for the decrease of caribou and moose population. For the open hunting within the interior, a cow hunt was recently held and a calf hunt also opened. Fish & Game opened a moose hunt in Tanana Flats and Alaska Range Foothills and still through Feb.28, 2008 hunters have killed more than 2,100 moose, about 90 percent of them were COWS. Even some people said the state should have shut down the hunting SEASON and the hunting season is still on. It came up on the ANCHORAGE Daily News. On October 1, 2007 the new extra moose hunt started on the creek to reduce moose population. Fish and Game Advisory Committee held a meeting on November 2007. Their goal was to getting rid of moose population on the Hillside and around Anchorage to give way to new CONSTRUCTION. Last year more than 1,600 moose were killed by car accidents. Even our authorities killed some moose here in Anchorage claiming it was in self-defense to protect people. The media said last week that the Fish and Game decided to go to Hatcher's Pass and exterminate all the MOOSE. In another place, they opened the hunting for moose and they killed all the moose and even the calves. People are poisoning the enviroment with pipeline, mine, pesticides etc. There are many factors, which are affecting the wild animals. Don't blame and use the WOLVES AND BEARS FOR THE PEOPLES FAULT. When animals kill animals it is their NATURE. GOD made them that way to eat each other. Some politicians want to twist the creation of GOD for their own purposes. Hunting is a HUGE business controlled by a few people. "HUNTER CONTROL NOT PREDATOR CONTROL"

Deliberation).

PAGE # 2

SB 176, HB 256 and proposals 41,42 HB 348

The WOLVES and BEARS HAVE TO WORK FOR THEIR OWN FOOD. THEY ARE RISKING THEIR LIVES EVERYDAY AND THEY SUFFER FROM DISEASES, WHICH ARE KILLING THEM. AS IF THAT WERE NOT ENOUGH, NOW WHEN THE WOLVES LOOK FOR FOOD, THEY FIND DEATH INSTEAD FROM TRAPS. THIS IS CRUEL AND INHUMANE. HOW COME PEOPLE ACCEPT THESE ATROCITIES. THIS COUNTRY WAS BUILT UPON THE BIBLE AND SOMEDAY WE HAVE TO GIVE AN ACCOUNT TO GOD. GOD MADE THE WOLVES AND THEY ARE UNIQUE. PEOPLE CAN'T NO REPRODUCE THEM BECAUSE THEY LIVE IN THE WILD.

They are many factors which are affecting the Wild animals. People are poison the ENVIRONMENT with PESTICIDES, PIPELINE, MINE ETC. So don't blame the WOLVES AND BEARS FOR THE PEOPLE FAULT. WHEN THE POLITICIANS DECIDE FOR THE ANIMALS FUTURE "BALANCE" THEY NEED TO BE MORE HUMANE INSTEAD OF KILLING THEM INDISCRIMINATELY, AS THE POLITICIANS DOING NOW. THEY ARE KILLING THE WOLVES AND ALSO THEY WANT TO KILL THE BEARS TOO. Some politicians like the profits they make from the animals but, at the same time they dislike them. For example the TOURISM come to Alaska to see the wild animals to take pictures of them. Last year the TOURISM brought to the State of Alaska over \$ 2 billion dollars through HOTELS, RESTAURANT, SHOPS ETC. The politicians are using the animals for EXPLOITATION to make profits from them. This year they were using the Reindeers what about the IDITAROD. "HUNTER CONTROL NOT PREDATOR CONTROL". The politicians do not spend a penny feeding them or taking care of them. They take care of themselves. GOD MADE THEM THAT WAY.

A BILL

FOR AN ACT ENTITLED

1 "An Act relating to the adoption of conservation, development, and utilization
2 regulations by the Board of Game to address primary concerns relating to public
3 assets."

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

5 * Section 1. AS 16.05.255(d) is amended to read:

6 (d) Regulations adopted under (a) of this section

7 (1) must provide that, consistent with the provisions of AS 16.05.258,
8 the taking of moose, deer, elk, and caribou by residents for personal or family
9 consumption has preference over taking by nonresidents;

10 (2) involving the conservation, development, or utilization of game
11 resources must authorize the board to regulate in a manner that addresses
12 whether, how, when, and where the public asset of game is allocated or
13 appropriated.

Sec. 16.05.255. Regulations of the Board of Game; management requirements.

(a) The Board of Game may adopt regulations it considers advisable in accordance with AS 44.62 (Administrative Procedure Act) for

(1) setting apart game reserve areas, refuges, and sanctuaries in the water or on the land of the state over which it has jurisdiction, subject to the approval of the legislature;

(2) establishing open and closed seasons and areas for the taking of game;

(3) establishing the means and methods employed in the pursuit, capture, taking, and transport of game, including regulations, consistent with resource conservation and development goals, establishing means and methods that may be employed by persons with physical disabilities;

(4) setting quotas, bag limits, harvest levels, and sex, age, and size limitations on the taking of game;

(5) classifying game as game birds, song birds, big game animals, fur bearing animals, predators, or other categories;

(6) methods, means, and harvest levels necessary to control predation and competition among game in the state;

(7) watershed and habitat improvement, and management, conservation, protection, use, disposal, propagation, and stocking of game;

(8) prohibiting the live capture, possession, transport, or release of native or exotic game or their eggs;

(9) establishing the times and dates during which the issuance of game licenses, permits, and registrations and the transfer of permits and registrations between registration areas and game management units or subunits is allowed;

(10) regulating sport hunting and subsistence hunting as needed for the conservation, development, and utilization of game;

(11) taking game to ensure public safety;

(12) regulating the activities of persons licensed to control nuisance wild birds and nuisance wild small mammals;

(13) promoting hunting and trapping and preserving the heritage of hunting and trapping in the state.

(b) *[Repealed. 12 ch 52 SLA 1986.]*

(c) If the Board of Game denies a petition or proposal to amend, adopt, or repeal a regulation, the board, upon receiving a written request from the sponsor of the petition or proposal, shall in addition to the requirements of AS 44.62.230 provide a written explanation for the denial to the sponsor not later than 30 days after the board has officially met and denied the sponsor's petition or proposal, or 30 days after receiving the request for an explanation, whichever is later.

(d) Regulations adopted under (a) of this section must provide that, consistent with the provisions of AS 16.05.258, the taking of moose, deer, elk, and caribou by residents for personal or family consumption has preference over taking by nonresidents.

(e) The Board of Game shall adopt regulations to provide for intensive management programs to restore the abundance or productivity of identified big game prey populations as necessary to achieve human consumptive use goals of the board in an area where the board has determined that

(1) consumptive use of the big game prey population is a preferred use;

(2) depletion of the big game prey population or reduction of the productivity of the big game prey population has occurred and may result in a significant reduction in the allowable human harvest of the population; and

(3) enhancement of abundance or productivity of the big game prey population is feasibly achievable utilizing recognized and prudent active management techniques.

(f) The Board of Game may not significantly reduce the taking of an identified big game prey population by adopting regulations relating to restrictions on harvest or access to the population, or to management of the population by customary adjustments in seasons, bag limits, open and closed areas, methods and means, or by other customary means authorized under (a) of this section, unless the board has adopted regulations, or has scheduled for adoption at the next regularly scheduled meeting of the board regulations, that provide for intensive management to increase the take of the population for human harvest consistent with (e) of this section. This subsection does not apply if the board

(1) determines that intensive management would be

(A) ineffective, based on scientific information;

(B) inappropriate due to land ownership patterns; or

(C) against the best interest of subsistence uses; or

(2) declares that a biological emergency exists and takes immediate action to protect or maintain the big game prey population in conjunction with the scheduling for adoption of those regulations that are necessary to implement (e) of this section.

(g) The Board of Game shall establish population and harvest goals and seasons for intensive management of identified big game prey populations to achieve a high level of human harvest.

(h) *[Repealed, 2000 Ballot Measure No. 6.]*

(i) For the purpose of encouraging adults to take children hunting, the board shall establish annual hunting seasons in appropriate areas of the state for big game, other than bison and musk ox, that are open before schools start in the fall and before regular hunting seasons begin. Only a resident child accompanied by a resident adult or a child accompanied by the child's resident parent, resident stepparent, or resident legal guardian may take big game in an area where a season established under this subsection is in effect. The adult, parent, stepparent, or legal guardian who accompanies the child may only assist the child in taking big game. A big game animal taken under this subsection must be counted against the bag limits of both the child and the adult, parent, stepparent, or legal guardian who accompanies the child. In this subsection,

(1) "adult" means an individual who is 21 years of age or older;

(2) "child" means an individual who is not more than 17 years of age and not younger than eight years of age.

(j) In this section,

(1) "harvestable surplus" means the number of animals that is estimated to equal the number of offspring born in a game population during a year less the number of animals required for recruitment for population maintenance and enhancement, when necessary, and the number of animals in the population that die from all causes, other than predation or human harvest, during that year;

(2) "high level of human harvest" means the allocation of a sufficient portion of the harvestable surplus of a game population to achieve a high probability of success for human harvest of the game population based on biological capabilities of the population and considering hunter demand;

(3) "identified big game prey population" means a population of ungulates that is identified by the Board of Game and that is important for providing high levels of harvest for human consumptive use;

(4) "intensive management" means management of an identified big game prey population consistent with sustained yield through active management measures to enhance, extend, and develop the population to maintain high levels or provide for higher levels of human harvest, including control of predation and prescribed or planned use of fire and other habitat improvement techniques.

(5) "sustained yield" means the achievement and maintenance in perpetuity of the ability to support a high level of human harvest of game, subject to preferences among beneficial uses, on an annual or periodic basis.

 Subject: I STRONGLY URGE YOU TO VOTE AGAINST HB 348!!!

I strongly oppose HB 348 for the following reasons and want this to be a part of the public record as I am unable to testify via the phone:

1. HB 348 has the explicit intent of removing citizen initiatives that focus on wildlife management policies by designating Alaska's wildlife as an "asset" to be allocated or appropriated. This simple change completely alters the options available to the public. Not only will it remove citizens initiatives in the future in regards to resource use priorities, this bill will also remove a current, third citizens ballot initiative, concerning aerial predator control scheduled for a state wide vote this summer.
2. Citizens initiatives are the only avenue the majority of Alaskans have for representation in regards to wildlife management policy. HB 348 would allow a minority of the state's population to have a monopoly in regards to policies that may have a strong negative impact on the states largest employer and second largest funding source for the states budget, the tourism industry.

The Alaska Board of Game is mandated to "manage Alaska's wildlife for the benefit of ALL Alaskan's". Yet despite that mandate, the Board of Game is composed of only hunters and trappers which represent only 15% of the citizens of Alaska. The other 85% of the states citizens, those who do not purchase a hunting license, or either work or own a tourism business, also have a vested interest in our wildlife resources yet have no representation on the Board of Game. Citizen initiatives have been the only option they have had.

The House Finance Committee has an obligation to ensure that tourism has fair and equal representation. Such a critical and important industry as tourism certainly deserves strong representation in regards to developing wildlife management policies that may have a very negative impact to that industry. HB 348 attempts to jeopardize one of the largest industries in Alaska by denying the citizens and those in the tourism industry of any form of representation in the programs developed by the Board of Game to manage our wildlife resources.

In addition, in light of the political corruption scandal that is sweeping through our fair state, the people of Alaska are paying attention! Those that vote to support this undemocratic bill, HB 348 or its ugly sisters, HB 256 and SB 176, will be held accountable at the ballot box. I am just a guy in Anchorage, but I will not forget any legislator that supports legislation that possibly might put science in the realm of politics. If the science is sound, then it should stand up in court. In addition, the voice of the people should matter. The ability of the people to petition their government

should NOT be undermined nor should the voice of the people through ballot initiatives be taken away for ANY reason on ANY topic!!!

Thanks for your time and consideration.

To: House Finance Committee
Re: Opposition of HB348

March 3, 2008

Dear Representative Chenault, Representative Meyer, { Co-Chairs } and Finance Committee Members,

HB348 is a bad idea as it would make game animals assets of the state which would subsequently eliminate the right of Alaskans to bring game related issues to the ballot through the initiative process. State wildlife is a natural resource that belongs to all of us and should therefore be managed in the best interest and welfare of all Alaskans. Our State constitution guarantees this and the initiative process is an avenue in which citizens can participate in setting policy to manage state resources including wildlife. HB348 would eliminate that right.

In 1996 and in 2000 voters used the initiative process to place the banning of aerial wolf killing and one day land and shoot on the ballot. As a result of this; extreme predator control programs were banned by a majority of Alaskans. A similar measure will appear on the August 2008 ballot due to the 56,000 Alaskans that put it there.

To support HB348 is to support a state government that denies its citizenry a legal process in which to make their voices heard and to participate within state policy making. I believe that HB348 is an attempt of our democratically elected legislators to decrease our democratic rights.

State wildlife belongs to all Alaskans and as a result all Alaskans should have the opportunity to decide how it is managed.

Sincerely,

Jenny Pursell, P.O.Box 33578, Juneau, AK, 99803

To: Rep. Wes Keller
Subject: HB 348 and HJR 31

Dear Representative Wes Keller,

Thank you first for your service to the State of Alaska and for bringing the HB 348 and HJR 31 to the attention of our government body. Both of these speak to issues plaguing Alaska and must be addressed.

I whole-heartedly support HB 348 and would like to offer the following comments;

- 1) It puts Alaska Dept. of Fish and Game back into the correct role of managing Alaska's fish and game resources for ABUNDANCE and not managing people through archaic seasons, bag limits and poorly designed experiments like the proposed "any ram" hunt in 14A and 13D.
- 2) It gives Alaskans preferential use of game resources. I would like to again bring up the proposal #15b to take 13D and 14 A and eliminate an open sheep hunt for Alaskans, turn it into a draw and reduce opportunity for Alaskans by 2/3 AND allocate 10% permits for non-residents. If there are not enough sheep to have an open hunt there can be no opportunity for non-residents. I say ADF&G must manage for more sheep not limit opportunity, this bill sets it straight
- 3) Puts into code (Pullen v Ulmer) that game is an asset much like it defined fish.
- 4) This is backed by independent tourist industry business people, backed by hunter groups, subsistence hunters, guides and native organizations because it manages for abundance and reduces in-fighting amongst Alaskans.
- 5) Allows Alaska to manage game without meddling from outside special interest with single-minded objectives not compatible with the Alaskan way of life or constitution.
- 6) Last but not least this does not change any law, law on initiatives, it simply clears the air and helps everyone see the job at hand and give them a base to work off of to do that job.

HJR 31 put another tool in our wildlife manager's tool box and we must be willing to try. If we can take nothing else from the aerial wolf control of Alaska's pre-statehood days, it's that 30 years of intense wolf eradication efforts failed to kill all of or even place Alaska's wolves into a threatened or endangered category. We simply need to put things back into balance. Like it or not People are part of the ecosystem and we are obligated to manage, let manage for healthy moose, caribou, sheep AND bear and wolves.

Thank you for your efforts and I would be more than willing to speak or lend my voice anytime. Keep up the good fight.

Congressman George Miller (D-California, 7th District)
Committee on Education and Labor, Committee on Resources

New Bill Would Stop Illegal Airborne Hunting of Alaskan Wolves and other Wildlife

Tuesday, September 25, 2007

WASHINGTON – Legislation introduced today would protect wolves, bears, and other wildlife from the illegal and inhumane practice of airborne hunting. The new bill would close a loophole in federal law that Alaska officials have exploited to permit individual hunters to shoot and kill nearly 700 wolves from aircraft in the past four years.

"It's time to ground Alaska's illegal and inhumane air assault on wolves," said Congressman George Miller (D-CA), a leader in Congress on conservation and natural resource issues and author of the new bill. "The state of Alaska has been operating an airborne hunting program that not only ignores federal law but violates Alaskans' and other Americans' wishes. The PAW Act will help to protect our nation's wildlife from the unethical and unfair practice of airborne hunting."

The Protect America's Wildlife Act, or PAW Act, was introduced by Miller along with Rep. John Dingell (D-MI) the dean of the House and floor manager of the debate on the original Airborne Hunting Act, and Rep. Norm Dicks (D-WA), the chair of the Interior Appropriations Subcommittee.

At a press conference on Capitol Hill, Miller was joined by Atka, a 5-year-old Arctic grey wolf, and two wildlife experts and advocates -- Joel Bennett, an Alaska resident and former member of the state's Board of Game and Rodger Schlickeisen, President of Defenders of Wildlife, a national conservation and environmental advocacy organization.

In response to public outcry over airborne wolf hunting in Alaska, Congress passed the Airborne Hunting Act in 1972 to prohibit shooting or harassing animals from aircraft. However, for the last several years, officials in Alaska have licensed people to shoot hundreds of wolves from aircraft under the guise of wildlife management and predator control but in clear violation of the intent of the federal ban.

In 1996 and again in 2000, Alaskans approved two popular ballot measures that banned airborne hunting in the state, but the state legislature largely overturned each of those measures.

Hunting wildlife from an aircraft violates wildlife management principles and the hunting rules of fair chase, as does the related practice of chasing animals in an aircraft until they are exhausted and then executing them on the ground, known as 'land and shoot.'

The PAW Act makes it clear that states can only conduct activities prohibited by the Airborne Hunting Act to respond to legitimate biological and other emergencies, not just to authorize otherwise-illegal hunting practices. The bill does not alter existing exceptions for the use of aircraft for animal control where land, livestock, water, pets, crops, or human health and safety are at risk.

The bill is numbered H.R. 3663, and has been referred to the Committee on Natural Resources.

Wildlife Conservation

Overview of Relationships Between Bears, Wolves, and Moose in Alaska

Relationships between large predators and their prey in Alaska are complex, and no one model fits all situations. It is possible to generalize about some situations, particularly in Interior Alaska. This information on the biology of moose, bears, and wolves, represents highlights from 25 years of research and management programs conducted by universities and state, provincial and federal governments in Alaska and Canada. In 1997, the National Academy of Sciences published a summary and review of predator/prey interactions in Alaska (National Research Council, 1997). More research has been conducted since that review. The published references listed below can be found in most university or large municipal libraries.

In the boreal forest of northern Canada and Interior Alaska, where bears (either black bears, grizzly bears, or both) and wolves are lightly harvested and are major predators on moose, moose densities typically remain well below levels that their habitat can support. Under these circumstances, moose density fluctuates between about 0.1 and 1.0 moose/mi² over large areas; most commonly densities are 0.4 to 0.6 moose/mi². Biologists refer to this situation as the Low Density Dynamic Equilibrium or LDDE because moose density fluctuates yet remains low. This occurs primarily because, together, bears and wolves are efficient predators on moose calves, and kill most of the calves born each year. The highest densities reached in these systems (about 1 moose/mi²) tend to occur in very large burns where habitat is excellent and moose apparently are more successful at avoiding predators.

Although the LDDE prevails in much of remote interior Alaska, differences occur between areas. In most areas, bears are the major predator on moose calves. An exception occurs in Game Management Unit 20A where wolf control has been shown to be effective at maintaining high numbers of moose and high long-term harvests of moose. In Unit 20A, initial reductions in wolves increased moose population density, wolves also quickly increased after wolf control because, ultimately, the number of wolves in an area depends mostly on the number of prey animals in the area. Number of moose harvested also remained high after wolves increased. An abundance of trappers in Unit 20A has kept wolves from increasing to the point where they could cause declines in the moose population. A similar situation likely occurs in portions of Units 20B and 20D South.

Grizzly bears have been shown to be particularly effective predators of moose calves from birth to about 2 months of age and often kill adult moose in the spring. In this regard, one grizzly bear is

equivalent to many black bears. Not all bears are equal, however, and some bears seem to become specialists at killing both adult and calf moose.

Black bears have been found to be the most important predator of moose calves in some areas of Alaska where grizzly bears are uncommon. In these areas, black bears killed about 40% of all moose calves that were born. Most predation was by adult males.

Biologists expect that significant reductions in bear numbers (either black or grizzly or both) will also lead to higher numbers of moose for harvest. For example, in areas of Canada and the northern states where moose coexist only with wolves, moose are often found at high densities that fluctuate with weather and habitat (e.g. Isle Royale).

Numbers of grizzly bears have probably increased in Interior Alaska since the 1950s. We base this on incidental observations by older hunters, local residents, cabin owners, and Native elders, who all indicate that grizzly bear numbers have increased. This is corroborated to some degree by modern studies. For example, grizzly bears were recently found to be significant predators of moose calves on the Yukon Flats and are commonly seen by local residents, whereas 20-30 years ago, observations of grizzly bears were rare.

In the Anchorage and Fairbanks areas, where wolves and bears are not common, moose are abundant.

Grizzly bear populations appear to be much more resilient to harvest than previously believed. During the last 10 years, the Alaska Board of Game has made a deliberate effort to reduce numbers of grizzly bears in a few important hunting areas (e.g. Game Management Unit 13-the Nelchina Basin) by increasing the bag limit and extending hunting seasons. So far, these new regulations have had no noticeable affect on grizzly bear populations even though hunters have taken an increased number of bears.

Wolves have been found to be very adaptable and they recover from low numbers within a few years. Despite relatively heavy hunting and trapping over the last century in Alaska, wolves occur on nearly all of their traditional habitat throughout mainland Alaska. Historically, wolf numbers were greatly depressed. Specifically, wolves were rare in Interior Alaska between about 1910 and 1925, and during the 1950s. During 1910-1925 wolves may have succumbed to diseases brought in by sled dogs or to widespread poisoning. During the 1950s, federal predator control agents reduced wolves by poisoning and aerial shooting. Wolves have been abundant and have occurred in all of their historic ranges in Alaska since state management began in about 1960 (except for the Anchorage and Fairbanks areas, and the western Seward Peninsula).

Wolves are social animals that live in large family groups. Usually, only a single female per pack successfully raises pups, but depending upon the relationship of adult males and females in a wolf pack, multiple litters may occur in a single pack in a single year. Most pups born into a pack stay in the pack for at least one year, but virtually all have dispersed away from their natal pack by the age of 3. Large packs of 20 or more wolves may occur in areas where food is abundant and pup survival is high. Wolf populations in North America commonly sustain annual harvests or natural mortality rates of 20-40% without experiencing a year-to-year decline in numbers. High reproductive rates, high mortality rates and long distance dispersal behavior results in extensive gene flow within wolf populations and between wolf packs.

In Alaska and other areas, if wolves are not hunted or trapped, most mortality is from intraspecific aggression (fighting with other wolves). In trapped wolf populations, natural mortality rates are often lower than in untrapped populations.

In coastal areas of Alaska, where fox rabies is endemic, wolves are periodically reduced to low levels by rabies.

Practical Aspects of managing moose in areas where the LDDE exists

Usually, without predator control, hunters can take about 5% of a low-density moose population each year – almost all of the harvest must be bulls or the population will decline.

LDDE does not present a biological problem – moose are not likely to become threatened, endangered or extinct due to predation.

The fact that the LDDE prevails in large areas does not usually present a management problem either. Interior Alaska is sparsely populated and access to moose populations is often poor. This means that hunting pressure is relatively light in many areas anyway.

The LDDE can cause a management problem around villages, or in areas that have become important hunting areas for Alaskans near the road system. In these areas, people need or want to harvest more moose than the system can support. In Alaska, moose are valuable to people as a source of food and income (i.e. guiding and transporting hunters), particularly in rural areas. This is why people often express the desire for predator control.

In some areas, where there is a demand to increase moose harvests, it might be possible to harvest more moose by reducing bear predation. Although this idea is reasonable, it is a relatively new idea, has not been adequately tested in Alaska, and programs of this nature need to be viewed as experiments.

Moose

The moose (*Alces alces*) is the world's largest member of the deer family. The Alaska race (*Alces alces gigas*) is the largest of all the moose. Moose are generally associated with northern forests in North America, Europe, and Russia. In Europe they are called "elk." In Alaska, they occur in suitable habitat from the Stikine River in the Panhandle to the Colville River on the Arctic Slope. They are most abundant in recently burned areas that contain willow and birch shrubs, on timberline plateaus, and along the major rivers of Southcentral and Interior Alaska.

General description: Moose are long-legged and heavy bodied with a drooping nose, a "bell" or dewlap under the chin, and a small tail. Their color ranges from golden brown to almost black, depending upon the season and the age of the animal. The hair of newborn calves is generally red-brown fading to a lighter rust color within a few weeks. Newborn calves weigh 28 to 35 pounds (13-16 kg) and within five months grow to over 300 pounds (136 kg). Males in prime

condition weigh from 1,200 to 1,600 pounds (542-725 kg). Adult females weigh 800 to 1,300 pounds (364-591 kg). Only the bulls have antlers. The largest moose antlers in North America come from Alaska, the Yukon Territory, and the Northwest Territories of Canada. Trophy class bulls are found throughout Alaska, but the largest come from the western portion of the state. Moose occasionally produce trophy-size antlers when they are 6 or 7 years old, with the largest antlers grown at approximately 10 to 12 years of age. In the wild, moose rarely live more than 16 years.

Life history: Cow moose generally breed at 28 months, though some may breed as young as 16 months. Calves are born any time from mid-May to early June after a gestation period of about 230 days. Cows give birth to twins 15 to 75 percent of the time, and triplets may occur once in every 1,000 births. The incidence of twinning is directly related to range conditions. A cow moose defends her newborn calf vigorously.

Calves begin taking solid food a few days after birth. They are weaned in the fall at the time the mother is breeding again. The maternal bond is generally maintained until calves are 12 months old at which time the mother aggressively chases her offspring from the immediate area just before she gives birth.

Moose breed in the fall with the peak of the "rut" activities coming in late September and early October. Adult males joust during the rut by bringing their antlers together and pushing. Serious battles are rare. Bulls may receive a few punctures or other damage and occasionally die from their wounds. The winner usually mates with the female.

By late October, adult males have exhausted their summer accumulation of fat and their desire for female company. Once again they begin feeding. Antlers are shed as early as November, but mostly in December and January.

Food habits: During fall and winter, moose consume large quantities of willow, birch, and aspen twigs. In some areas, moose actually establish a "hedge" or browse line 6 to 8 feet above the ground by clipping most of the terminal shoots of favored food species. Spring is the time of grazing as well as browsing. Moose eat a variety of foods, particularly sedges, equisetum (horsetail), pond weeds, and grasses. During summer, moose feed on vegetation in shallow ponds, forbs, and the leaves of birch, willow, and aspen.

Movoments: Most moose make seasonal movements for calving, rutting, and wintering areas. They travel anywhere from only a few miles to as many as 60 miles during these transitions.

© Ashley Dean

Population dynamics: Moose have a high reproductive potential and can quickly fill a range to capacity if not limited by predation, hunting, and severe weather. Deep crusted snow can lead to malnutrition and subsequent death of hundreds of moose and decrease the survival of the succeeding year's calves.

Moose are killed by wolves and black and brown bears. Black bears take moose calves in May and June. Brown bears kill calves and adults the entire time the bears are out of their winter dens. Wolves kill moose throughout the year. Predation limits the growth of many moose populations in Alaska.

Hunting: More people hunt moose than any other of Alaska's big game species.

Economic and future status: Because moose range over so much of Alaska, they have played an important role in the development of the state. At one time professional hunters supplied moose meat to mining camps. Historically, moose were an important source of food, clothing, and implements to Athapaskan Indians dwelling along the major rivers. Today, Alaskans and nonresidents annually harvest approximately 6,000 to 8,000 moose—some 3.5 million pounds of meat. Moose are an important part of the Alaskan landscape, and tourists photograph those animals that feed along the highway.

Man's developments in Alaska include many alterations upon the face of the land. These activities create conflicts between man and moose as moose eat crops, stand on airfields, eat young trees, wander the city streets, and collide with cars and trains.

Man's removal of mature timber through logging and careless use of fire has, in general, benefited moose as new stands of young timber have created vast areas of high-quality moose food. The future for moose is reasonably bright because man is learning how to manipulate habitat with wildfire and is becoming more skilled at managing factors that limit moose populations, such as predation and hunting.

Performance

State of Alaska > Governor > OMB > Performance > Agency List > Wildlife Conservation

Department of Fish and Game

Wildlife Conservation

[Results Summary](#) | [Details](#) | [Questions/Comments](#)

Mission

- The mission of the Division of Wildlife Conservation is to conserve and enhance Alaska's wildlife and habitats and provide for a wide range of public uses and benefits.

Desired Results

- A: Healthy and sustainable wildlife populations in Alaska that provide a diversity of opportunities for public use and enjoyment.

Performance Measure Detail

A: Result - Healthy and sustainable wildlife populations in Alaska that provide a diversity of opportunities for public use and enjoyment.

Target #1: Achieve population targets for at least 75% of big game populations for which the Board of Game (BOG) has set targets (i.e., objectives).

Measure #1: Percentage of BOG population targets attained.

Analysis of results and challenges: The Board of Game (BOG) has set population objectives for selected ungulate populations that it has determined are important for providing high levels of harvest for human consumptive use. To meet BOG management objectives, sufficient animals must exist in a game management unit in order to meet the highest levels of hunter demand. For FY07, 29 of the population objectives set for deer, caribou and moose were met, out of a total of 54 objectives set by the BOG. Four more game management units (GMU) met management objectives in FY07 than in FY06. The division's target is 75% of the number of GMU objectives. Some big game surveys were not conducted due to poor weather conditions or a lack of funding. Some of the population objectives may not be possible to meet given the habitat capacity that can be achieved in some areas. Population objectives for those areas should be reviewed by the BOG and possibly revised.

Target #2: Develop and implement recovery strategies for 75% of those "species of concern" under primary division management.

Measure #2: Percentage of species for which recovery strategies are being implemented.

Analysis of results and challenges: There are 11 wildlife species of special concern under primary or shared division management. Conservation action plans are in place for 10 (91%) of these species, including blackpoll warbler, Townsend's warbler, olive-sided flycatcher, Steller's eider, spectacled eider, northern goshawk, Arctic peregrine falcon, American peregrine falcon, Aleutian Canada goose and Kenai brown bear. In 1999 the Pacific Flyway Council adopted a management plan for Aleutian Canada goose (updated in 2006) to resume "normal" management after delisting. A plan has not been prepared for the Gray-checked thrush. In the state Comprehensive Wildlife Conservation Strategy (CWCS), completed during FY06, both species are on the nominee list for species of special concern. The State of Alaska Species of Special Concern list was last revised in 1998; therefore, when the list is formally revised Aleutian Canada goose can be removed. Revision of that list is expected to occur within the next year.

Target #3: No increase in the number of species under state management designated as threatened or endangered in Alaska from the 2003 level.

Measure #3: Number of new threatened or endangered species designations

Analysis of results and challenges: The state endangered species list includes the Eskimo curlew, short-tailed albatross, humpback whale, right whale, and blue whale. There has been no change in the state endangered species list since 1993 and no new species were added to federal lists in FY07.

Re: Hb 348

ATT: PLEASE DISTRIBUTE TO ALL THE COMMITTEE MEMBERS

Biography for Martin Wade Willis

- Biologist with a degree in zoology from Colorado State University
- Active moose hunter and subsistence fishermen
- Former biologist for the ADF&G and Federal Marine Mammal Protection Division
- Owner of a guide business for 10 years - Vision Quest Adventures - offering non consumptive wildlife watching tours and consumptive fishing tours.

I strongly oppose HB 348 for the following reasons:

1. HB 348 has the explicit intent of removing citizen initiatives that focus on wildlife management policies by designating Alaska's wildlife as an "asset" vs. a "resource". This simple change completely alters the options available to the public. In addition to removing citizens initiatives in the future, this bill will also remove a third ballot initiative concerning aerial predator control scheduled for a state wide vote this summer.

Yesterday, Tuesday, March 4, I spoke with Jim Pound, Rep. Keller's staff liaison for HB 348. He told me that the intent of this bill was to once and for all remove, what he termed, Ballot Box Biology, from the options available to the citizens of Alaska.

An astonishing 56,000 plus Alaska citizens signed the citizens petition to put aerial predator control back on the ballot for the third time. What Jim Pound referred to as Ballot Box Biology is in essence Ballot Box Policy. Where better to set state policy than by a vote of the people?

This bill would amount to back door legislation with the sole intent of denying Alaskan citizens the opportunity to vote on controversial wildlife management issues such as aerial predator control.

2. **Citizens initiatives are the only avenue the majority of Alaskans have for representation in regards to wildlife management policy. HB 348 would allow a minority of the state's population to have a monopoly in regards to policies that may have a strong negative impact on the states largest employer and second largest funding source for the states budget, the tourism industry.**

The Alaska Board of Game is mandated to "manage Alaska's wildlife for the benefit of ALL Alaskan's". Yet despite that mandate, the Board of Game is composed of only hunters and trappers which represent only 15% of the citizens of Alaska. The other 85% of the states citizens, those who do not purchase a hunting license also have a vested interest in our wildlife resources yet have no representation on the Board of Game.

Such a critical and important industry as tourism is certainly deserves representation in regards to developing wildlife management policies that may have a very negative impact that industry. Alaskan's have a right to have fair representation, as mandated by law, in policies for managing our wildlife resources. The House Finance Committee has an obligation to ensure this industry has equal representation. HB 348 attempts to jeopardize one of the largest industries in Alaska by denying the citizens and tourism industry of any form of representation in the programs developed by the Board of Game to manage our wildlife resources.

Rep. Harris, yesterday spoke on the floor of the House and noted the importance of Alaska tourism to the state of Alaska when HB 147 was passed.

Rep. Harris said:

"This change in the match formula is intended to help out the mom-and-pop, locally-owned tourism businesses that are such an important component of the economies of Alaskan communities."

Sen. McGuire has this to say for a bill she sponsored relating to tourism:

"Alaska tourism is a proven economic engine for the state.

- Tourism is one of Alaska's largest industries, with an estimated 2.4 billion dollar annual economic impact
- When compared to the industries of timber, mining and commercial fishing, tourism generates the highest net revenue to the state: 20.5 million in FY 05; total revenues for tourism related state taxes, licenses and fee's in FY 05 equaled 49.7 million.
- Tourism is one of Alaska's largest generators of employment: in 2002 over 40,000 jobs (13.7% of all employment) were attributed to the tourism industry"

Please vote not no on HB 348. If not please amend the bill by removing the word "asset" from the language of the bill.

To: House Finance Committee
Re: Opposition of HB348

3/5/08

March 3, 2008

Dear Representative Chenault, Representative Meyer, { Co-Chairs } and Finance Committee Members,

HB348 is a bad idea as it would make game animals assets of the state which would subsequently eliminate the right of Alaskans to bring game related issues to the ballot through the initiative process. State wildlife is a natural resource that belongs to all of us and should therefore be managed in the best interest and welfare of all Alaskans. Our State constitution guarantees this and the initiative process is an avenue in which citizens can participate in setting policy to manage state resources including wildlife. HB348 would eliminate that right.

In 1996 and in 2000 voters used the initiative process to place the banning of aerial wolf killing and one day land and shoot on the ballot. As a result of this; extreme predator control programs were banned by a majority of Alaskans. A similar measure will appear on the August 2008 ballot due to the 56,000 Alaskans that put it there.

To support HB348 is to support a state government that denies its citizenry a legal process in which to make their voices heard and to participate within state policy making. I believe that HB348 is an attempt of our democratically elected legislators to decrease our democratic rights.

State wildlife belongs to all Alaskans and as a result all Alaskans should have the opportunity to decide how it is managed.

Sincerely,

Jenny Pursell, P.O.Box 33578, Juneau, AK, 99803

ANALYSIS: (Attach a separate page if necessary)

The changes in this bill would reduce, from two to one, the number of complete sets of fingerprints a person who is applying for a concealed handgun permit is required to provide to the department. The department does not expect this bill to have any fiscal impact.

SPONSOR STATEMENT

CSHB No. 351 (JUD)

"An Act relating to submission of fingerprints by applicants for a concealed handgun permit; and providing for an effective date."

Because of changes in the way the Department of Public Safety processes fingerprint cards, it is now possible to notify the Alaska Automated Fingerprint Identification System and the Federal Bureau of Investigation from one fingerprint card.

CS HB 351 (JUD) will amend the requirements in AS 18.65.700(a)(4) from submitting two sets of fingerprint cards to submitting one set for individuals applying for a concealed handgun permit. It also changes the FBI approved fingerprint card to a format approved by the department.

These changes will be a savings in cost and effort for those that provide fingerprinting for concealed handgun permit applicants. Additionally, as technology changes the format for the fingerprint card may change and giving the Department of Public Safety the latitude to change the format of the fingerprint card will not require another bill to correct the format requirement sometime in the future.

MEMORANDUM

Date: February 22, 2008
To: House Finance Committee Members
From: Representative John Coghill, Chair
House Rules
Re: CSHB 351(JUD)

The attached CSHB 351(JUD) reflects a change proposed by the Department of Public Safety to change the requirement of the FBI fingerprint card to department approved format, in preparation for the coming change to electronic transmission.

The original intent of this bill is to allow those who provide fingerprints for applicants for conceal carry handgun permit to no longer submit two sets. With advancements made in DPS only one set of prints is necessary. However, it was necessary to change the statute because it specifically stated two sets of fingerprints. This is a benefit to the DPS and those who submit fingerprints to the state.

I am requesting your support of this bill. Thank you.

Please enter into the record my testimony to the

HOUSE JUDICIARY

committee name

committee on

HB 351

dated

2/11/08

Good Afternoon ,

My name is Richard Lampe and I reside in The Glennallen area. I am a current holder of a Concealed Handgun Permit. I obtained my first permit in 2001 after passing the required course, Passing the range test, then being fingerprinted and photographed and paying the required fees including the extra amount to be exempt from the Federal "National Instant Check System" Referred to hereafter as "NICS". In March of 2006, my permit was expiring, so I filled out the necessary paperwork, got fingerprinted twice again, photographed, and enclosed the required Fees. My renewal turned into a nightmare as the FBI had incorrect Information in my records , and the State of Alaska would not renew my permit until I filed for an appeal with the FBI and it took 3 months to do so, 2 more sets of fingerprints and Court documents from Florida to prove I was eligible , during all the prior years, I had not been arrested nor left the State of Alaska.

It is My understanding that 2 fingerprint cards are required by the FBI to do a Criminal records check, reason being one set could be smudged or rejected by the FBI as not sufficiently readable for manual or computer use. Under 13 AAC 30.050. "Processing of Applications; appeals" section "i" reads ... "The department shall issue a permit that states that the permit holder is "NOT NICS Exempt" if the permit holder's fingerprints have been rejected by the Federal Bureau of Investigation as not sufficiently readable for manual or computer use."

So one fingerprint Card may not be sufficient, in some cases. In June of 2006, the Department of Public Safety, Concealed Handgun Licensing Unit stopped issuing permits that are "NICS Exempt" claiming that the FBI would no longer provide the required Information to have this exemption on a holders license. There is Nothing in the Alaska Administration codes or laws addressing this issue.

I respectfully ask that this committee address this issue of "NICS Exemption" on Concealed Handgun Licenses while discussing the fingerprint card issue before you.

Since Alaska citizens are no longer required to have a license to carry a concealed weapon by Law , the only time a license is necessary is if an Alaskan travels to the lower 48 to a State that has reciprocity allowing concealed carry by recognizing the Alaska Concealed Handgun Permit. Many people are delayed when trying to purchase a firearm from a Federally Licensed dealer if the FBI NICS check says "Delay", it is 5 more working days before a person can purchase a firearm if the FBI does not call back and DENY the transaction .

This creates an expensive burden on Alaskans that live in the rural areas where there are no Gun shops, if they have to stay a week in town or make another trip to complete the transaction and pick up a new Firearm.

People who have never been arrested for anything have been delayed by the NICS check because of Errors in the Federal Data Base, Criminals with the same or similar name, Identity theft , or Computer systems being inoperable at the time, and other reasons the FBI will not disclose. If Alaskans are going through the process of getting fingerprinted, whether it be one or two cards, photographed, and qualifying to Carry Concealed Handguns, we should also be "Exempted" from the NICS check which is allowed under Federal Law on the Form 4473 that has to be filled out when purchasing a Firearm from a Dealer. This speeds up the process of buying a firearm and continues to insure that Alaskans can readily purchase the protection they may need without a lot of "Federal Government Red Tape". This was the main reason I got my License , not just to be armed all the time.

Another point that needs to be made is that it is difficult or impossible to find a qualified person to take fingerprints in Rural Alaska villages and communities sometimes. For that reason , Alaska State Troopers or VPSO's should be able to provide this service since they are trained to fingerprint people and because the License is issued by the Department of Public Safety.

Please address these issues and insure that Law abiding Alaskans continue to have the quality of life we deserve and the freedoms we are entitled.

Thank You for your time.

Sincerely,

Richard F. Lampe

ANALYSIS: (Attach a separate page if necessary)

No cost to the Department of Education and Early Development. Individual libraries will incur cost ranging from \$100 each year for very small libraries, to as much as \$20,000 for the largest library systems in the state. The costs are for software, annual licensing fees, maintenance, and staff time for this program. Libraries will also incur costs for required updates. The Act would also increase the number of libraries eligible to receive Public Library Assistant Grants from the state. This would result in each library receiving a reduced amount since the grants are currently being prorated.

HOUSE BILL NO. 353

IN THE LEGISLATURE OF THE STATE OF ALASKA
TWENTY-FIFTH LEGISLATURE - SECOND SESSION

BY REPRESENTATIVES KELLER, Wilson, Gatto

Introduced: 2/6/08
Referred: State Affairs, Finance

A BILL

FOR AN ACT ENTITLED

1 "An Act relating to the blocking of certain Internet sites at public libraries and to
2 library assistance grants."

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

4 * Section 1. AS 14.56 is amended by adding a new section to read:

5 Sec. 14.56.335. Internet blocking compliance. Notwithstanding the other
6 provisions of AS 14.56.300 - 14.56.340, the department may not make a grant under
7 AS 14.56.300 - 14.56.340 to a public library that provides members of the public with
8 access to the Internet unless the public library is complying with AS 14.56.500. In this
9 section, "public library" has the meaning given in AS 14.56.500.

10 * Sec. 2. AS 14.56 is amended by adding a new section to article 6 to read:

11 Sec. 14.56.500. Internet blocking filters required. (a) Except as provided by
12 (b) of this section, a public library that provides members of the public with access to
13 the Internet shall install and maintain in good working order Internet software filters
14 that block Internet sites that depict the items described in AS 11.61.128(1)(A) - (F).

1 (b) If an adult has a research or other lawful purpose to access Internet sites
2 that depict the items described in AS 11.61.128(1)(A) - (F), a public library may
3 disable the technology measure for the adult.

4 (c) In this section,

5 (1) "adult" means an individual who is 18 years of age or older;

6 (2) "public library" means a library that is open to members of the
7 public.
