1972 Legislature  
Energy Crafts Committee Files

An Inventory of the  
Joint Pipeline Impact Committee,  
Alaska State Legislature  
Records  
in the

Alaska Historical Library

Juneau, 1972

### Historical Scope Note

The Joint Pipeline Impact Committee was appointed March 3, 1971 following the request of Governor William A. Egan for a select legislative committee to study the pipeline in depth.

In the Senate Journal Supplement no. 6, March 3, 1971, the committee was appointed to work with existing state agencies and such other agencies the governor might request.

The committee reported to the Rules Committee chairman of both houses, and continued as an interim committee upon adjournment reporting to the Legislative Council.

Committee members are:

Senator Chancy Croft, Chairman  
Senator Clifford Groh  
Senator Willie Hensley  
Senator Lowell Thomas, Jr.  
Representative Mike Colletta  
Representative Marty Farrell  
Representative Andrew Warwick  
Representative Edward Naughton

Because of the impact of the pipeline, the scope of the committee was broadly defined and asked to explore and report on the following:

- 1) The economic impact of the pipeline, prior to, during, and after construction, with particular attention to the effect on Alaska business, labor, government and our transportation and communication systems.
- 2) The environmental impact including Alaska's policy towards environmental protection and coordination with federal and local agencies. Particular emphasis should be given to the governmental structure designed to handle this area and any needed additional legislation.
- 3) Accruing state development including roads and highways, harbors and airfields.
- 4) Necessary governmental expansion including public facilities and governmental services such as schools, water and sewer systems, police protection, fish and game law enforcement, to mention a few.
- 5) State economic regulation of the pipeline generally and as it affects our royalty and severance tax income specifically, and control of potential abuses such as anti-trust restraint of trade and the inflationary aspects of construction.
- 6) Choices of action related to means of transporting oil and gas, their advantages and disadvantages.
- 7) The legal aspects of the proposals and their relation to other state problems and activities.
- 8) Alaska's natural resource policy including description of existing and potential resources, possible future development and their relationship to the proposed pipeline.
- 9) Such other areas as designated by the presiding officers.

RECORDS OF THE JOINT PIPELINE IMPACT COMMITTEE

4 drawer legal size vertical file.

Finding Aids:

Records include a "Guide to Pipeline Impact Committee Files; a Subject Index to the Administrative Records and Library Collection." This guide was prepared by the committee secretary.

A loose-leaf card file for authors of reports, legislative testimony, etc. is on top of vertical file cabinet.

I. Administrative records.

Contains correspondence, legislation, newspaper clippings, hearings and other material concerned with Committee activities.

II. Library Collection.

213 subject indexed publications. Includes a list of "Books and Other Publications" obtained by the Committee. (These have been added to the stacks of the State Library.)

Guide to Pipeline Impact Committee Files
