

SCOMM

#49:22

The entire sample of contributed data is used in averaging the rates. For purposes of computation, hourly rates were multiplied by 173.33 to determine monthly salaries based on a 40-hour week.

Monthly salaries and hourly rates for governmental agencies are listed without adjustment, even though most State of Alaska employees are on a 37½-hour week while other public agencies operate on a 40-hour week, and not withstanding the tax-free effect of the 22.5% cost-of-living adjustment granted Federal employees in Anchorage. The tax-free salary benefits of Federal employees are offset by the shorter work day of State employees.

Salaries of State government employees in surveyed job classes in California, Oregon and Washington have been averaged to arrive at a mean salary and adjusted by a graduated cost-of-living differential. The differential is derived from the U.S. Department of Labor, Bureau of Labor Statistics report, "Autumn 1981 Urban Family Budgets and Comparative Indexes for Selected Urban Areas." This report compares costs of living in specific urban areas for precisely defined families at three (3) budget levels. The cost-of-living adjustments used in this survey have been derived from the three (3) budget levels presented in the B.L.S. report, with Anchorage compared to Seattle as a base of 100 for percentage figures.

See footnotes following table 6.

Footnotes for 3 budgets, autumn 1981

1/ The family consists of an employed husband, age 36, a wife not employed outside the home, an 8-year-old girl, and a 13-year-old boy.

2/ Total budget costs include personal income taxes, social security, other items, and total consumption.

3/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from home city.

4/ The average costs of shelter were weighted by the following proportions: lower budget, 100 percent for families living in rented dwellings; intermediate budget, 25 percent for renters, 75 percent for homeowners; higher budget, 15 percent for renters, 85 percent for homeowners.

5/ Renter costs include average contract rent plus the costs of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

6/ Homeowner costs include interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

7/ The average costs of automobile owners and nonowners in the lower budget were weighted by the following proportions of families: Boston, Chicago, New York, and Philadelphia, 50 percent for both automobile owners and nonowners; all other metropolitan areas, 65 percent for automobile owners, 35 percent for nonowners; nonmetropolitan areas, 100 percent for automobile owners. The intermediate budget proportions are: Boston, New York, Chicago, and Philadelphia, 80 percent for owners, 20 percent for nonowners; Baltimore, Cleveland, Detroit, Los Angeles, Pittsburgh, San Francisco, St. Louis, and Washington, D.C., with populations of 1.4 million or more in 1960, 95 percent for automobile owners and 5 percent for nonowners; all other areas, 100 percent for automobile owners. The higher budget weight is 100 percent for automobile owners in all areas.

8/ In total medical care, the average costs of medical insurance were weighted by the following proportions: 30 percent for families paying full cost of insurance; 26 percent for families paying half cost; 44 percent for families covered by noncontributory insurance plans (paid by employer).

9/ Other family consumption includes the average costs for reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

10/ Other items includes allowances for gifts and contributions, life insurance, and occupational expenses.

11/ As defined in 1960-61. For a detailed description of these and other geographical boundaries, see the 1967 edition of Standard Metropolitan Statistical Areas, prepared by the Office of Management and Budget.

Washington, D.C. 20212

John Rogers (202) 272-5060 USDL: 82-139
Charles Wallace (202) 523-1208
Kathryn Hoyle (202) 523-1913

FOR RELEASE: Immediate
Friday, April 16, 1982

This is the last release of four-person family budget data. The Bureau of Labor Statistics eliminated the program as part of the recent budget reduction. The expenditure data on which the budgets are based are now 20 years old. Continuation of the program would have required revision of concepts and expenditure data and extensive price collection, for which funding was not available.

AUTUMN 1981 URBAN FAMILY BUDGETS AND COMPARATIVE INDEXES FOR SELECTED URBAN AREAS

The Bureau of Labor Statistics of the U.S. Department of Labor today issued updated estimates for three hypothetical annual family budgets and the comparative indexes that can be used to compare the cost of these budgets in selected urban areas. This updating reflects changes in prices and personal taxes from autumn 1980 to autumn 1981.

In autumn 1981, the U.S. average cost of the lower budget for an urban family of four was \$15,323 a year, while the intermediate and higher levels were \$25,407 and \$38,060, respectively, as shown in table A. (Costs for 24 metropolitan areas, four nonmetropolitan regions, and Anchorage, Alaska, are shown in tables 1-3, and comparative indexes for these areas are shown in tables 4-6.)

Method of Updating

The 1981 consumption budgets were estimated by applying price changes for individual areas from autumn 1980 to autumn 1981, as reported in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), to the appropriate autumn 1980 budget costs for each main class of goods and services. The budgets have been updated by the CPI since 1969 when the last direct pricing took place. This method of updating is only approximate because the CPI reflects spending patterns and prices paid for commodities and services purchased by urban wage earners and clerical workers generally, without regard to their family type and level of living, and because the updating is done at a relatively aggregated level.

- 2 -

Table A. Summary of annual budgets for a four-person family at three levels of living, urban United States, autumn 1981

	Budget level		
	Lower	Inter- mediate	Higher
Total budget -----	\$15,323	\$25,407	\$38,060
Total family consumption -----	12,069	18,240	25,008
Food -----	4,545	5,843	7,366
Housing -----	2,817	5,546	8,423
Transportation -----	1,311	2,372	3,075
Clothing -----	937	1,333	1,947
Personal care -----	379	508	719
Medical care -----	1,436	1,443	1,505
Other family consumption ----	644	1,196	1,972
Other items -----	621	1,021	1,718
Social security & disability --	1,036	1,703	1,993
Personal income taxes -----	1,596	4,443	9,340

Note: Because of rounding, sums of individual items may not equal totals.

Changes in Budgets, 1980-81

From autumn 1980 to autumn 1981, the total cost of the lower budget rose 9.1 percent, the intermediate budget rose 9.8 percent, and the higher budget rose 10.6 percent. The increases in 1981 were approximately 3 percentage points less than those in 1980. Consumption costs rose approximately 7.5 percent at all three levels with the largest increases among consumption components occurring in transportation and medical care.

Personal income taxes shown in the three budgets include estimated 1981 Federal, State, and local tax payments. The large increases in personal income taxes, approximately 19 percent at the lower level and 18 percent at both the intermediate and higher levels, are a result of the Federal income tax structure, as well as that of many States, which calls for higher tax rates as income rises. Although the increases in taxes were quite large, they are approximately 10 percentage points less than in 1980 at the lower level and approximately 7 percentage points less at both the intermediate and higher levels. This was due to the more moderate price increases for consumption items and the rate reduction in Federal income tax rates in 1981. While the percent increase in income taxes for the lower budget was higher than for the other levels, the impact of the increase is more pronounced at the higher levels because taxes constitute a larger share of the total budget at these levels. Changes in State tax codes occurred in a number of States.

Table B. Percent change in four-person family budgets, autumn 1980 to autumn 1981

Component	Budget level		
	Lower	Inter- mediate	Higher
Food-----	5.2	4.9	4.9
Housing-----	8.0	8.6	8.7
Shelter 1/-----	7.9	8.8	8.7
Renter costs-----	7.9	7.9	7.9
Homeowner costs 2/-----	--	8.9	8.8
Housefurnishings & operations	8.2	8.2	8.1
Transportation-----	13.0	12.1	11.8
Clothing-----	3.3	3.2	3.1
Personal care-----	7.7	7.9	7.6
Medical care-----	10.6	10.7	10.7
Other family consumption-----	7.9	7.8	7.8
Total consumption less shelter---	7.2	7.1	7.1
Total consumption-----	7.3	7.5	7.5
Other items-----	6.5	6.7	6.7
Social security-----	17.6	19.3	23.9
Personal income taxes-----	19.4	17.5	17.9
Total budget-----	9.1	9.8	10.6

1/ Includes only rental housing in the lower budget.

2/ On the assumption that the home was purchased 6 years ago, these costs reflect changes in purchase prices and mortgage interest rates from 1974 to 1975 and changes in property taxes, insurance, fuels and utilities, and repairs and maintenance from 1980 to 1981.

Social security deductions increased approximately 18 percent at the lower level, 19 percent at the intermediate level, and 24 percent at the higher level. The large increases were the result of both an increase in the social security contribution rate from 6.13 percent in 1980 to 6.65 percent in 1981 and an increase from \$25,900 to \$29,700 in the maximum income on which contributions are made into the social security system.

The shelter component of housing includes only rental housing in the lower budget and shows an increase of 8 percent at that level. Both homeownership and rental housing are included in the intermediate and higher budgets with homeownership costs based on the assumption that the budget family bought its home 6 years ago. The 9 percent increase in shelter costs for the intermediate and higher budgets is the result of combining the increase in rental costs with increases in homeowner costs. For the homeowner component, large increases in fuels and utilities from 1980 to 1981 were offset somewhat by modest increases in interest costs from 1974 to 1975.

The budget costs are annual estimates reflecting autumn 1981 price levels. During the period from October 1981 to February 1982, the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 1.1 percent. However, the change in the total family budget differs from the change in the All Items CPI-W for at least three important reasons: (1) The CPI-W does not include changes in personal taxes and social security contributions; (2) the weights used in the CPI-W are different from the weights used in the budgets; and (3) the treatment of homeowner costs is different.

Differences in Budgets among Urban Areas

Area indexes reflect not only differences among the areas in price levels, but also regional variations in consumption patterns and differences in climate, types of transportation facilities, and taxes.

For the lower budget, costs were 5.9 percent higher in the metropolitan areas than in the nonmetropolitan urban areas. The metropolitan-nonmetropolitan differences were 11.4 percent for the intermediate budget and 17.3 percent for the higher. Total budget levels were lowest in small cities in the South.

Detailed indexes are presented in tables 4, 5, and 6.

Description of the Three Budgets

The budgets represent the costs of three hypothetical lists of goods and services that were specified in the mid-1960's to portray three relative standards of living--described as lower, intermediate, and higher.

These budgets are for a precisely defined urban family of four: A 38-year-old husband employed full time, a non-working wife, a boy of 11, and a girl of 8. After about 15 years of married life, the family is settled in the community, and the husband is an experienced worker. The family has, for each budget level, average inventories of clothing, housefurnishings, major durables, and other equipment. The budgets pertain only to an urban family with the specified characteristics. (Estimates of family consumption budgets for urban families of different size and composition are shown in table C.) No budgets are available for rural families.

The budgets do not represent how families of this type actually do or should spend their money, nor are they intended to represent a minimum level of adequate income or a subsistence level of living. Rather, they reflect the assumptions made about the manner of living at each of the three hypothetical levels. The geographic indexes do not measure cost differences associated with moving from one area to another or the living costs of newly arrived residents in a given community. Information on actual spending patterns is available from the 1972-73 Consumer Expenditure Survey. Preliminary data for 1980 from the

Table C. Annual consumption budgets for selected family types, urban United States, autumn 1981 ^{1/}

Family size, type, and age	Budget Level		
	Lower	Inter- mediate	Higher
Single person, under 35 years -----	\$4,220	\$6,380	\$8,750
Husband and wife under 35 years:			
No children -----	5,910	8,940	12,250
1 child under 6 -----	7,480	11,310	15,500
2 children, both under 6 -----	8,690	13,130	18,010
Husband and wife 35-54 years:			
1 child, 6-15 years -----	9,900	14,960	20,510
2 children, older 6-15 years ^{2/} -----	12,069	18,240	25,008
3 children, oldest 6-15 years ^{2/} -----	14,000	21,160	29,010
Husband and wife, 65 years and over ^{3/} -----	6,160	9,300	12,750
Single person, 65 years and over ^{4/} -----	3,380	5,110	7,000

^{1/} For details on estimating procedures, see "Revised Equivalence Scale," BLS Bulletin 1570-2.

^{2/} Costs for the BLS budgets for a four-person family from which estimates for other family types are derived.

^{3/} Estimated from the equivalence scale value of 51 percent of the base (four-person) family. Costs based on detailed BLS budgets for a retired couple may differ slightly from estimates obtained by the scale values.

^{4/} Estimated from the equivalence scale value of 28 percent of the base (four-person) family. May differ slightly from estimates obtained by applying a ratio of 55 percent to the BLS budget for a retired couple.

ongoing Consumer Expenditure Survey is expected to be available in 1982, and for later periods on a regular basis thereafter.

Food-at-home costs in the budgets are based on quantities in the 1964 low-, moderate-, and liberal-cost food plans developed by the U.S. Department of Agriculture in accordance with nutritional standards formulated by the National Research Council of the National Academy of Sciences. The food total also includes an allowance for a specified number of meals away from home at each level.

Total housing costs include not only shelter, but also housefurnishings and household operations. At the lower level, the shelter component provides only for a rented dwelling unit. Rental costs include contract rent, estimated costs for fuels and utilities where these are not part of the rent, and insurance on household contents. At the intermediate and higher levels, shelter reflects primarily homeowner costs which include average mortgage interest and principal payments for a house purchased 6 years ago. Also included are costs for

property taxes, homeowner insurance, repairs and maintenance, and heating fuels and utilities.

Medical care costs at the three budget levels include a family membership in a group hospital and surgical insurance plan, a specified number of visits to physicians, provisions for dental and eye care, and prescriptions. The higher budget also provides for major medical insurance coverage.

The source of data, methods of calculation, and quantities of goods and services for each budget level are described in detail in BLS Bulletin 1570-5, "Three Standards of Living for an Urban Family of Four Persons" (spring 1967). Copies may be obtained under accession number PB 227542/LK at a cost of \$10.50 from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Supplements, with budgets for spring 1969-70 and autumn 1971 through 1980 are available from any BLS Regional Office listed below. Selected publications from the 1972-73 Consumer Expenditure Survey may also be obtained from these offices.

See footnotes following table 6.

Footnotes for 3 budgets, autumn 1961

1/ The family consists of an employed husband, age 38, a wife not employed outside the home, an 8-year-old girl, and a 13-year-old boy.

2/ Total budget costs include personal income taxes, social security, other items, and total consumption.

3/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from home city.

5/ The average costs of shelter were weighted by the following proportions: Lower budget, 100 percent for families living in rented dwellings; intermediate budget, 25 percent for renters, 75 percent for homeowners; higher budget, 15 percent for renters, 85 percent for homeowners.

5/ Renter costs include average contract rent plus the costs of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

5/ Homeowner costs include interest and principal payments plus taxes, insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

2/ The average costs of automobile owners and nonowners in the lower budget were weighted by the following proportions of families: Boston, Chicago, New York, and Philadelphia, 50 percent for both automobile owners and nonowners; all other metropolitan areas, 65 percent for automobile owners, 35 percent for nonowners; nonmetropolitan areas, 100 percent for automobile owners. The intermediate budget proportions are: Boston, New York, Chicago, and Philadelphia, 80 percent for owners, 20 percent for nonowners; Baltimore, Cleveland, Detroit, Los Angeles, Pittsburgh, San Francisco, St. Louis, and Washington, D.C., with populations of 1.4 million or more in 1960, 95 percent for automobile owners and 5 percent for nonowners; all other areas, 100 percent for automobile owners. The higher budget weight is 100 percent for automobile owners in all areas.

2/ In total medical care, the average costs of medical insurance were weighted by the following proportions: 30 percent for families paying full cost of insurance; 26 percent for families paying half cost; 44 percent for families covered by noncontributory insurance plans (paid by employer).

1/ Other family consumption includes the average costs for reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

10/ Other items includes allowances for gifts and contributions, life insurance, and occupational expenses.

11/ As defined in 1960-61. For a detailed description of these and previous geographical boundaries, see the 1967 edition of Standard Metropolitan Statistical Areas, prepared by the Office of Management and Budget.

12/ Places with population of 2,500 to 50,000.

See footnotes at end of table.

1/ The family consists of an employed husband, age 38, a wife not employed outside the home, an 8-year-old girl, and a 13-year-old boy.

2/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from home city.

3/ Renter costs include average contract rent plus the cost of required amounts of heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

4/ Homeowner costs include interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repairs and maintenance costs.

5/ The average costs of automobile owners and nonowners in the lower budget were weighted by the following proportions of families: Boston, Chicago, New York, and Philadelphia, 50 percent for both automobile owners and nonowners; all other metropolitan areas, 65 percent for automobile owners, 35 percent for nonowners; nonmetropolitan areas, 100 percent for automobile owners. The intermediate budget proportions are: Boston, New York, Chicago, and Philadelphia, 80 percent for owners, 20 percent for nonowners; Baltimore, Cleveland, Detroit, Los Angeles, Pittsburgh, San Francisco, St. Louis, and Washington, D.C., with populations of 1.4 million or more in 1960, 95 percent for automobile owners and 5 percent for nonowners; all other areas, 100 percent for automobile owners. The higher budget weight is 100 percent for automobile owners in all areas.

6/ In total medical care, the average costs of medical insurance were weighted by the following proportions: 30 percent for families paying full cost of insurance; 26 percent for families paying half cost; 44 percent for families covered by noncontributory insurance plans (paid by employer).

7/ Other family consumption includes average costs for reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

8/ As defined in 1960-61. For a detailed description of these and previous geographical boundaries, see the 1967 edition of Standard Metropolitan Statistical Areas, prepared by the Office of Management and Budget.

9/ Places with population of 2,500 to 50,000.
