

SCOMM

#50:2

*Alaska Commission on Postsecondary Education*

ALASKA STUDENT LOAN

Background and Discussion Materials

February 1985

## PROGRAM DESCRIPTION

### PURPOSES

1. To provide Alaskans with access to postsecondary educational resources through low-interest loans to students.
2. To encourage an educated citizenry through initial access to education and training and through inducements to utilize that education and training in Alaska.

### TERMS

1. Undergraduates and vocational students may borrow up to \$6,000 per year of full-time study.
2. Graduate students may borrow up to \$7,000 per year of full-time study.
3. Students may borrow for up to 5 years of undergraduate study, or up to 5 years of graduate study, but for not more than 8 years combined.
4. A student must be a two-year Alaska resident to borrow and must maintain full-time study in good standing to continue borrowing Alaska student loans.
5. Loans may be used for attendance at any approved institution.
6. Proceeds from loans may only be used for the costs of tuition and fees, room and board, and books and supplies.
7. Loan repayment begins one year after the student ceases to be a full-time student (except for approved periods of deferment).
8. Repayment is over a 10-year period with provision for extending to 15 years if necessary.
9. Interest charged on the loans is 5%.

### FORGIVENESS

If, upon completion of the program of study for which the loan was granted, the borrower resides in Alaska, a portion of the loan, plus interest, shall be forgiven by the State. That portion, for up to a total of 50%, shall accrue as follows:

1. 2-3 years residence in the state, 10%
2. 3-4 years residence in the state, an additional 10%
3. 4-5 years residence in the state, an additional 10%
4. 5-6 years residence in the state, an additional 10%
5. Over 6 years residence in the state, a final 10%.

This residence must be continuous and must begin within one year of completion of program.

REPAYMENT SCHEDULE

IF YOUR STUDENT LOANS TOTAL:	YOUR MONTHLY PAYMENT FOR 120 MONTHS (10 YRS.) WOULD BE:	TOTAL TO BE REPAID:		
		5% Interest	Principal	Total

MEMORANDUM

TO: President  
Vice President  
Chancellor  
Dean of Natural Sciences  
Legislators  
Regents  
President of AMA

FROM: Sven O. E. Ebbesson, Ph.D., D.Sc.  
Director, WAMI Medical Program

A handwritten signature in black ink, appearing to read "Sven O. E. Ebbesson".

DATE: January 10, 1986

RE: Good News from WAMI

---

New data about the practice location of our Medical School graduates indicate that 44% of Alaskan WAMI graduates have returned to our State after completed residency training. That is more than we had expected and surely reflects the students' warm feelings toward everyone who contributed toward their education. Comparable figures for Montana and Idaho are 37% and 35% respectively.

It was also rewarding to learn that a large proportion of WAMI graduates now practice in smaller communities such as Bethel, Kodiak, Dillingham and Kenai. Almost all are working in primary care areas (family medicine, pediatrics and OB/GYN), where the need is the greatest. This means that the WAMI Program is a success and that our goals are being met. It also reflects well on those that developed and supported the program over the years. The program has allowed sons and daughters of Alaskans to obtain the best medical training in the world and the people of Alaska will continue to gain from their achievements and from their service.

SOE:vv

SURVEY OF 1983-84 ALASKA  
STUDENT LOAN RECIPIENTS

Alaska Commission on Postsecondary Education  
March, 1984

## INTRODUCTION

The Alaska Student Loan program, established in 1971, is the most generous loan program in the nation, and has provided student financial aid, in the form of low interest loans, to over 50,000 Alaskan residents. For a number of years the vast majority of borrowers used their Alaska loans to attend postsecondary educational institutions outside the State of Alaska, but from 1975 to 1982 there was a steadily increasing trend toward in-state attendance, culminating in over fifty percent of the 1982-83 borrowers attending school in Alaska. Then, in 1983-84, the trend broke. As of November 1, 1983, 53.4 percent of the student loan borrowers were attending school out-of-state.

In an effort to better understand this break in an eight-year pattern, all 1983-84 loan recipients were surveyed. This was the first attempt to survey current borrowers in the thirteen-year history of the loan program, so the opportunity was taken to solicit opinions on a number of issues related to Alaska student loans.

## PROCEDURE

During the last week of October 1983, questionnaires (see Appendix A) were mailed to all (13,026) 1983-84 student loan recipients. The questionnaires were mailed to the permanent home address of each borrower in the hope that it would be forwarded to school addresses when necessary. No follow-up was conducted, since not all files contain accurate current address data.

## FINDINGS

Of the 13,026 loan recipients surveyed, 7,476 (57.4%) returned completed questionnaires. For a census-type survey with no follow-up, this is an acceptable response rate as long as the respondents seem to be distributed in a pattern similar to the borrowing population. As can be seen in Table 1, the response rate by student level was quite evenly spread, when compared to the borrowing population, and therefore should serve as a good indicator for inference to the population. Similarly, the in-state/out-of-state mix is not disproportionate.

The only group which may be over-represented is graduate students attending in Alaska, since the response rate was a very high 94.4%. However, since this class of borrowers is relatively small, it should not lessen the reliability of the findings.

TABLE 1

Distribution Of Respondents By  
Student Level

Student Level	Alaska Attendance			Out-of-State			Total		
	No.	%	% of Borrowers	No.	%	% of Borrowers	No.	%	% of Borrowers
Freshman	856	25.6	43.7	974	23.6	51.5	1,830	24.5	47.5
Sophomore	743	22.2	57.6	829	20.1	58.4	1,572	21.0	58.1
Junior	596	17.8	64.4	745	18.0	64.4	1,341	17.9	64.4
Senior	516	15.4	64.2	648	15.7	63.8	1,164	15.6	64.0
Graduate	255	7.6	94.4	695	16.8	71.1	950	12.7	76.2
Vocational	378	11.4	46.4	241	5.8	47.9	619	8.3	47.0
Total	3,344	100.0	55.1	4,132	100.0	59.4	7,476	100.0	57.4

Type of Institution Attended. The loan borrowers were asked to indicate what type of school they were attending and whether it is located in Alaska or out-of-state. Over three-fourths (78.0%) of the respondents indicated they were attending a four-year college or university, either public or private, with out-of-state enrollees more heavily represented in this type of school, than Alaska enrollees. (See Table 2.) Not surprisingly, community college and vocational students tend to attend in Alaska, rather than traveling outside for schooling.

TABLE 2

Distribution Of Respondents By  
Type Of Institution

Type of Institution	Alaska		Out-of-State		Total	
	Number	%	Number	%	Number	%
Vocational	445	13.3	287	6.9	732	9.8
Community Colleges	766	22.9	231	5.6	997	13.3
Private Coll/Univ.	182	5.4	1,628	39.4	1,810	24.2
Public Coll/Univ.	1,951	58.4	1,986	48.1	3,937	52.7
Total	3,344	100.0	4,132	100.0	7,476	100.0
% of Respondents	44.7		55.3		100.0	
% of Borrowers	55.1		59.4		57.4	

Student Loan Interest Rate. The current interest rate on Alaska student loans is 5%. This is the lowest student loan interest for any state comprehensive student loan program in the nation, and there is nearly always debate over the level during each legislative session. When the borrowers were asked, they strongly endorsed retaining the 5% loan rate. Nearly three-fourths (74.9%) of the borrowers felt that 5% is the appropriate interest rate for these loans. Only 18.6% of the borrowers felt the rate should be increased, and even then, most felt only a small increase was in order. (See Table 3.)

TABLE 3

What Rate Of Interest Should Be  
Set For Student Loans?

Interest Rate	Number	Percentage
5%	5,603	74.9
6%	640	8.6
7%	441	5.9
8%	164	2.2
9%	145	1.9
No Opinion	483	6.5
Total	7,476	100.0

Student Loan Borrowing Maximums. The Alaska Student Loan program permits students to borrow up to \$6,000 per year for undergraduate study and up to \$7,000 per year for graduate study. Once again, Alaska's program is distinguished from other state-level comprehensive student loan programs in the nation. There is no other comparable loan program with borrowing maximums as high as Alaska's. Current borrowers were asked what maximums they believed to be appropriate for Alaska Student Loans. As indicated in Table 4, the majority (78.4%) by more than three-to-one, believed the current maximums are appropriate. Few, less than 5%, felt the maximums should be lowered, and 16.1% felt the maximums should be raised.

TABLE 4

Should The Loan Borrowing  
Maximum Be Changed?

Response	Number	Percent
Retains Current Level	5,863	78.4
Reduce Maximum	306	4.1
Revise Maximum Upward	1,201	16.1
No Opinion	106	1.4
Total	7,476	100.0

An interesting pattern develops when one looks at which students believe higher maximums are appropriate. These data are presented in Table 5, and indicate that freshman borrowers, both in-state and out-of-state, and graduate borrowers attending out-of-state are disproportionately represented in the 1,201 persons desiring higher borrowing limits. One might guess that the out-of-state graduate borrowers are reacting to actual costs incurred by such attendance when they want limits raised, but the fact that freshman, when compared to sophomores, juniors, and seniors, are disproportionately represented in those wishing higher limits, may simply mean that they do not know the true costs of attendance in this--their first semester of school.

TABLE 5

Distribution Of Respondents Favoring  
Raising The Loan Maximum

Type of Institution	Alaska		Out-of-State		Total	
	Number	%	Number	%	Number	%
Freshman	144	28.7	141	20.2	285	23.7
Sophomore	95	18.9	134	19.2	229	19.1
Junior	83	16.5	97	13.9	180	15.0
Senior	44	8.7	94	13.5	138	11.5
Graduate	42	8.3	184	26.4	226	18.8
Vocational	95	18.9	48	6.8	143	11.9
Total	503	100.0	698	100.0	1,201	100.0

Student Loan Forgiveness Benefits. One of the more controversial aspects of the Alaska Student Loan program is the provision of forgiveness benefits. This too, distinguishes Alaska's program as the most generous in the country. If Alaska borrowers complete the program of study for which they borrow and then live in Alaska, they can have up to 50% of their total indebtedness, including interest, forgiven by the State. Periodic discussion in Alaska's Legislature centers on whether this forgiveness provision should be retained. When asked, the current borrowers overwhelmingly indicated their belief that forgiveness should be retained at the current level. (See Table 6.)

TABLE 6  
Should The Loan Forgiveness  
Benefits Be Changed?

Response	Number	Percent
Retain Current Level	6,864	91.8
Reduce Forgiveness	358	4.8
Discontinue Forgiveness	166	2.2
No Opinion	88	1.2
Total	7,476	100.0

This rather straightforward result was not unexpected, but does not get at the heart of the debate on forgiveness. In order to better understand the effects of forgiveness, borrowers were asked if forgiveness influenced their decisions regarding how much they borrowed and where they would live after schooling. The results, found in Table 7, are somewhat mixed. For students attending in Alaska, forgiveness influenced borrowing in nearly as many cases as it did not, but for out-of-state attendees, forgiveness was said not to be a factor by nearly two-to-one. In terms of residence after schooling, forgiveness did not seem to be a big factor one way or the other for those attending in-state, but was said to influence the decisions of out-of-state attendees, again by nearly two-to-one.

TABLE 7

Influence Of Loan Forgiveness  
Benefits On Student Decisions

Do Loan Forgiveness Benefits Influence Decisions Regarding:	Alaska Attendance		Out-of-State	
	Yes	No	Yes	No
How much you borrow?	1,516	1,789	1,812	2,255
Where you live after schooling?	1,538	1,780	2,684	1,396

Change From In-State to Out-of-State Attendance. Borrowers were asked if they had attended a postsecondary school last year, and if so, where. The pattern toward continued attendance was evident for both Alaska attendees and out-of-state attendees. Of the 2,117 respondents currently attending school in Alaska who also attended a postsecondary school last year, 90.4% had attended school in Alaska last year too; and of the 2,942 respondents currently attending school out-of-state who also attended a postsecondary school last year, 78.8% had attended school out-of-state last year, too. Looking only at those students who switched from Alaska to out-of-state attendance, or the reverse, one finds that only 9.6% of the students currently attending in Alaska, attended out-of-state last year; and 21.2% of the students currently attending out-of-state, attended in Alaska last year. (See Table 8.)

TABLE 8

Attendance In-State Versus Out-Of-State This Year  
Versus Last, By Type Of Institution

Type Of Institution	Current Attendance in Alaska					Current Attendance Out-of-State				
	Alaska Last Year		Out-of-State Last Year		Total	Alaska Last Year		Out-of-State Last Year		Total
	No.	%	No.	%		No.	%	No.	%	
Vocational Community Coll.	39	90.7	4	9.3	43	-0-	0.0	77	100.0	77
Private Coll/Univ.	478	87.2	70	12.8	548	44	19.7	179	80.3	223
Public Coll/Univ.	97	85.1	17	14.9	114	204	16.7	1,018	83.3	1,222
	1,300	92.1	112	7.9	1,412	376	26.5	1,044	73.5	1,420
<b>Total</b>	<b>1,914</b>	<b>90.4</b>	<b>203</b>	<b>9.6</b>	<b>2,117</b>	<b>624</b>	<b>21.2</b>	<b>2,318</b>	<b>78.8</b>	<b>2,942</b>

In order to try to determine why a person would switch from attending in Alaska to attending out-of-state, the 624 respondents who did so were asked to list the top factors (up to four) influencing that decision. The results (based upon a weighted average giving more value to each person's primary reason for switching and correspondingly less for other reasons) are listed in Table 9. Program Availability was the most influential factor in the decision to switch to out-of-state attendance, followed by Closeness to Home and Low Tuition and Expenses. The high ranking of Closeness to Home is difficult to understand, unless persons were trying to indicate they were attending out-of-state so as not to be close to home.

TABLE 9  
Reasons For Attending Out-Of-State After  
Attending In Alaska Last Year

Reason (Descending Order)	Weighted Average
Availability of Program	442.3
Closeness to Home	333.7
Low Tuition and Expenses	321.0
Availability of Financial Aid	239.2
Geographic Location/Weather/Climate	176.5
School Reputation/Prestige	159.0
Ability to Work While Attending	137.3
Encouragement of Parents/Friend	83.1
Availability of Campus Housing	57.0
Encouragement of Teachers/Counselors	41.3
Friends Are There	36.3
Athletics/Recreational Activities	32.4
Religious Atmosphere	26.2
Sororities/Fraternities/Organizations	5.4

Next, those 624 persons switching from Alaska attendance to out-of-state were asked what factor could have encouraged them to continue their Alaska attendance rather than switching. The top factor was again Program Availability, and it was the top factor regardless of what type of institution was being attended out-of-state. The other factors which seemed to have a strong influence on the decision to switch to out-of-state attendance were: Quality, Campus Housing, Lower Costs, and Better Weather. (See Table 10.)

TABLE 10

For Those Attending Out-Of-State After  
Attending In Alaska Last Year, What  
Would Have Kept Them In Alaska?  
By Type Of Institution

Vocational School	Community College	Private Coll/Univ.	Public Coll/Univ.
Program Availability Better Quality Lower Costs	Program Availability Campus Housing Better Quality Better Weather Lower Costs	Program Availability Better Quality Campus Housing Religious Atmosphere Lower Costs	Program Availability Better Quality Campus Housing Better Weather Lower Costs

Reasons For Selecting Current Institution. All respondents were asked why they chose their particular institution for pursuing their education, and as can be seen in Table 11, Program Availability was a very important factor for all students regardless of whether they were attending in Alaska or out-of-state and regardless of the type of school attended. The top three factors for each classification are presented in Table 11, and there is a difference between the responses of those attending in Alaska compared to those attending out-of-state. While the most important factor for out-of-state attendance at community colleges and public colleges or universities is Program Availability, the most important factor for Alaskan attendance at community colleges and public colleges and universities is Closeness to Home. It should also be noted that School Reputation, while an important factor for persons attending out-of-state, was not one of the top three factors for those attending in Alaska.

TABLE 11

Top Three Reasons For Selecting Current  
Institution Of Attendance,  
By Type Of Institution

Type of Institution	Most Important Factor	Second Factor	Third Factor
Vocational (Alaska) (Out-of-State)	Program Availability Program Availability	Ability to Work School Reputation	Financial Aid Financial Aid
Community College (Alaska) (Out-of-State)	Closeness to Home Program Availability	Program Availability Low Cost	Low Cost School Reputation
Private College/University (Alaska) (Out-of-State)	Program Availability Program Availability	Ability to Work School Reputation	Financial Aid Religious Atmosphere
Public College/University (Alaska) (Out-of-State)	Closeness to Home Program Availability	Program Availability School Reputation	Low Cost Climate/Weather

For Those Attending Out-of-State, What Could Have Encouraged Alaska Attendance? The 4,132 respondents attending school out-of-state were asked what factor could have encouraged them to attend in Alaska. As with those students who switched attendance from in-state to out-of-state, the single most important factor which could have encouraged Alaska attendance was Program Availability. When the respondents were classified by type of institution (Table 12), the results were surprisingly homogenous. Program Availability and Better Quality were the two top factors for all students, regardless of institutional type. For collegiate students, Campus Housing was also an important factor.

TABLE 12

For Those Attending Out-of-State, What  
Could Have Encouraged Alaska  
Attendance? (By Type Of  
Institution)

Vocational School	Community College	Private Coll/Univ.	Public Coll/Univ.
Program Availability Better Quality Nothing Lower Costs Better Weather	Program Availability Better Quality Campus Housing Nothing Better Weather	Program Availability Better Quality Campus Housing Nothing Religious Atmosphere	Program Availability Better Quality Campus Housing Better Weather Nothing

Similarly, when the respondents were classified by student level, the same pattern emerged (Table 13). The top five factors for all undergraduate out-of-state borrowers were Program Availability, Better Quality, Campus Housing, Better Reputation, and Nothing (meaning nothing could have encouraged them to attend in Alaska).

TABLE 13

For Those Attending Out-Of-State, What  
Could Have Encouraged Alaska Attendance?  
(By Student Level)

Freshman	Sophomore	Junior	Senior	Graduate
Program Avail. Better Quality Campus Housing Nothing Better Reputation	Program Avail. Better Quality Campus Housing Better Reputation Nothing	Program Avail. Better Quality Campus Housing Better Reputation Nothing	Program Avail. Better Quality Campus Housing Better Reputation Nothing	Program Avail. Better Quality Nothing Better Reputation Lower Costs

Major Course of Study of Borrowers. All loan recipients were asked to indicate the degree being sought and their major course of study. The top ten majors are summarized by degree level and by in-state or out-of-state attendance in Table 14. Once again, one sees a surprising similarity in responses, particularly at the bachelor's and master's levels, regardless of whether the student is attending in Alaska or out-of-state. Out-of-state doctoral students are largely representative of persons pursuing degrees unavailable in Alaska.

TABLE 14

## Top Ten Majors By Degree Level

<u>Associate</u>		<u>Bachelors</u>	
Alaska	Out-of-State	Alaska	Out-of-State

Residency Plans After Graduation. Once these Alaskan students complete their programs of study, where do they plan to live? The vast majority (97.0%) say Alaska. Regardless of whether or not they are attending school in-state, nearly all respondents indicate plans of residing in Alaska after schooling. (See Table 15.)

TABLE 15

Location Plans After Completion  
Of Program Of Study

Plans After Program Completion	Attending in Alaska		Attending Out-of-State		Total	
	Number	Percent	Number	Percent	Number	Percent
Reside in Alaska	3,274	97.9	3,976	96.2	7,250	97.0
Reside Out-of-State	70	2.1	156	3.8	226	3.0
Total	3,344	100.0	4,132	100.0	7,476	100.0

Why these students plan to return to Alaska is another question asked of the respondents. As can be seen in Table 16, the top reason for those students planning to live in Alaska after degree completion, regardless of whether or not they are currently attending in Alaska or out-of-state, is "Alaska is my home." The second most important reason for those planning Alaska residence is the top reason for those planning out-of-state residence, and that is "Job Availability." Other factors influencing location decisions include loan forgiveness, geographic location/weather/climate, availability of continuing education, and location of friends.

TABLE 16

## SUMMARY/CONCLUSIONS

1. One of the principal reasons for conducting this survey was to discover if there was an explanation for the reversal of the eight-year trend toward in-state attendance. From the data collected it is a little difficult to single out exactly what caused this phenomena. However, when coupled with knowledge of the Alaska system a hypothesis may be offered.

Three factors probably have impacted the in-state/out-of-state attendance pattern. First, the state loan program imposed new "good standing" requirements. These were enforced for the first time in 1982-83 and resulted in a large number of students becoming ineligible for continued borrowing. The majority of these ineligible students were students attending in-state, so the pool of in-state students for the current year, 1983-84, was reduced.

Second, the only public university in the state with campus housing is the University of Alaska, Fairbanks (UAF). Over six months before the current school year began, UAF had filled all its campus housing. More than 300 students who wished campus housing for the 1984-84 year had to be denied.

Third, the University of Alaska, Anchorage (UAA) has been heavily over-subscribed in a number of classes both this year and last. Many students have indicated that they simply could not get into all the UAA classes they wished for pursuit of their programs.

2. Students believe 5% is an appropriate interest rate for the student loan program.
3. Students believe the \$6,000 and \$7,000 borrowing maximums are appropriate for the student loan program. However, there is some evidence that graduate students, particularly those attending out-of-state, may be requesting a higher maximum in the near future.
4. Students believe loan forgiveness should be retained at 50%. When asked directly if loan forgiveness influences their decision on where to reside after graduation, only 57.1% indicate that it is. Also, when asked which factors are most important in this determination of where to live after graduation, loan forgiveness falls far behind "Alaska is My Home" and "Job Availability." The argument that forgiveness seems to reward students for what they would do anyway seems to be supported by this survey.

APPENDIX A

Student Loan Questionnaire

ALASKA STUDENT LOAN QUESTIONNAIRE

The Alaska Commission on Postsecondary Education has not surveyed loan recipients in the past, but due to the increased level of proposed program changes, we feel some information from you, the recipients of this program, would be most useful as we enter a new Legislative Session. Please complete this brief questionnaire and return it to us in the envelope provided. All responses are completely anonymous.

1. Check those school years in which you received an Alaska Student Loan

1975-76 _____	1978-79 _____	1981-82 _____
1976-77 _____	1979-80 _____	1982-83 _____
1977-78 _____	1980-81 _____	1983-84 _____

2. Current student level (please check)

Freshman _____	Junior _____	Graduate _____
Sophomore _____	Senior _____	Vocational _____

3. Current attendance (please check)

	<u>In Alaska</u>	<u>Out-of-State</u>
Vocational School	_____	_____
Community College	_____	_____
Private College/University	_____	_____
Public College/University	_____	_____

4. What interest level do you feel is appropriate for these loans?

5% _____	7% _____	9% _____	
6% _____	8% _____	Other _____	(indicate)

5. What loan level do you feel is appropriate for these loans?

\$6,000 and \$7,000 loan levels should be retained	_____
Loan levels should be reduced	_____
Loan levels should be raised	_____

6. Why did you decide to attend your current institution? (Please number your reasons, with "1" being most important, and limit your choices to no more than four.)

Athletics/recreational activities	_____	Availability of program	_____
Sororities/fraternities/campus organization	_____	Availability of financial aid	_____
Geographic location/weather/climate	_____	Closeness to home	_____
Encouragement of parents/relatives	_____	Religious atmosphere	_____
Encouragement of teachers/counselors	_____	Friends are there	_____
Ability to work while attending school	_____	School reputation/prestige	_____
Availability of campus housing	_____	Low tuition/expenses	_____

7. If you are attending out-of-state, what single factor could encourage you to attend in-state (what could be changed, if anything)? \_\_\_\_\_

(Please continue on reverse side)

8. Did you attend a postsecondary education institution in Alaska last year (1982-83)?

Yes \_\_\_\_\_ No \_\_\_\_\_

9. What degree or certificate are you seeking and what is your major program of study?

Associate Degree (Major?) \_\_\_\_\_  
Bachelors Degree (Major?) \_\_\_\_\_  
Masters Degree (Major?) \_\_\_\_\_  
Specialist Degree (Major?) \_\_\_\_\_  
Doctorate Degree (Major?) \_\_\_\_\_  
Diploma (Course of Study?) \_\_\_\_\_  
Certificate (Course of Study?) \_\_\_\_\_

10. Do you plan to live in Alaska when your education is finished?

Yes \_\_\_\_\_ No \_\_\_\_\_

11. What factors influenced your response in question 10? (Please number your reasons with "1" being most important, and limit your choices to no more than four.)

Availability of jobs	_____	Encouragement of parents/relatives	_____
Alaska is my home	_____	Availability of continuing education	_____
Friends are there	_____	Recreational activity availability	_____
Student loan forgiveness	_____	Geographic location/weather/climate	_____

12. Does the student loan forgiveness feature influence your decisions on:

a. Whether or not you live in Alaska after schooling? Yes \_\_\_\_\_ No \_\_\_\_\_

b. How much you borrow? Yes \_\_\_\_\_ No \_\_\_\_\_

13. Should the student loan forgiveness feature be:

a. Discontinued? Yes \_\_\_\_\_ No \_\_\_\_\_

b. Reduced? Yes \_\_\_\_\_ No \_\_\_\_\_

c. Retained as is? Yes \_\_\_\_\_ No \_\_\_\_\_

14. If there were no Alaska State Student Loan Program, would you (check as many as applicable)?

a. Delay your education \_\_\_\_\_

b. Not attend school at all \_\_\_\_\_

c. Borrow under a federal loan program \_\_\_\_\_

d. None of the above \_\_\_\_\_

## ALASKA COMMISSION ON POSTSECONDARY EDUCATION

BILL SHEFFIELD, GOVERNOR

POUCH FP  
JUNEAU, ALASKA 99811  
PHONE: (907) 465-2854

October 4, 1985

The Honorable John Sund  
Alaska State Representative  
P.O. Box 6440  
Ketchikan, Alaska 99901

Dear Representative Sund:

Enclosed is a copy of a proposed regulation change for the Alaska Student Loan Program. The Alaska Commission on Postsecondary Education gave initial approval to this change at its September 20, 1985 meeting and has scheduled final action for its December 13-14, 1985 meeting.

Since you or your staff may receive questions about this proposed change, I wish you to have full information about exactly what is being suggested. The setting for this change is important so I would like to give you a very brief background. Simply stated, the demand for Alaska Student Loans has outstripped the supply for three years in a row, 1983-84, 1984-85, and 1985-86. The Legislature, demonstrating strong support for the program, has consistently provided substantial funding for student loans (FY84 - \$60.0 million General Fund, FY85 - \$60.00 million General Fund, and FY86 \$63.6 million General Fund).

At the same time, loan repayments have continued to rise (FY84 - \$6.4 million, FY85 - \$9.6 million, and FY86 - \$11.8 million projected). Yet, demand still exceeds supply. The program turned away applicants in May 1984; March 1985; and (it looks like) November 1985.

The current priority system is essentially first-come-first-served, with priority given to in-state attendance, but this system results in thousands of borrowers being turned away. The Commission felt that either program changes needed to be made, or a higher General Fund commitment was necessary. Certainly full-funding of the existing program is the most desirous alternative, but this has not been possible the last few years, and with state revenue projections such as they are, it seems unrealistic to expect substantial increased General Fund commitment these next few years. For example, we would need about \$70.0 million from the General Fund for FY87 to fund the program (a 10.1% increase over this year). Hence, the Commission explored a variety of alternatives for changing the program while still trying to preserve educational access and benefits to Alaskans.

After a great deal of study and debate, the Commission elected to change regulations to require that the borrower share more responsibility for the cost of going to school. Student loans are awarded, and may be used, for only the cost of tuition and fees, room and board, and books and supplies. Currently, if applicants state they have no non-state loan resources to meet

The Honorable John Sund

October 4, 1985

Page 2

these expenses, they are eligible to borrow the total cost, or \$6,000, whichever is smaller (for undergraduate borrowers). Under the new regulations, each borrower would have to contribute at least \$500 toward those eligible expenses. The following examples may help clarify the impact of the regulation.

Example 1. Undergraduate attending the University of Alaska, Fairbanks.

<u>Program Cost</u>		<u>Resources Available</u>	
Tuition & Fees	\$1,120	SEIG, Pell Grant	\$1,400
Books & Supplies	500	Parents	-0-
Room & Board	<u>2,500</u>	Savings	100
Subtotal	\$4,120	Other Scholarships, etc.	500
Transportation	1,000	VA benefits	-0-
Personal	<u>1,000</u>	Other	-0-
Total	\$6,120	Total	\$2,000

Loan Award: current method \$4,100  
proposed change \$3,600

Example 2. Undergraduate attending University of Alaska, Fairbanks.

<u>Program Cost</u>		<u>Resources Available</u>	
Tuition & Fees	\$1,120	SEIG, Pell Grant	\$ -0-
Books & Supplies	500	Parents	2,000
Room & Board	<u>2,500</u>	Savings	1,000
Subtotal	\$4,120	Other Scholarships, etc.	-0-
Transportation	1,000	VA benefits	-0-
Personal	<u>1,000</u>	Other	-0-
Total	\$6,120	Total	\$3,000

Loan Award: current method \$3,100  
proposed change \$3,100

Example 3. Undergraduate attending Alaska Pacific University.

<u>Program Cost</u>		<u>Resources Available</u>	
Tuition & Fees	\$4,220	SEIG, Pell Grant	\$1,500
Books & Supplies	270	Parents	-0-
Room & Board	<u>3,826</u>	Savings	1,000
Subtotal	\$8,316	Other Scholarships, etc.	500
Transportation	90	VA benefits	-0-
Personal	<u>1,020</u>	Other	400
Total	\$9,426	Total	\$3,400

Loan Award: current method \$6,000  
proposed change \$6,000

The Honorable John Sund  
October 4, 1985  
Page 3

Example 4. Undergraduate attending Southern Oregon State College.

<u>Program Cost</u>		<u>Resources Available</u>	
Tuition & Fees	\$3,691	SEIG, Pell Grant	\$ -0-
Books & Supplies	280	Parents	2,500
Room & Board	<u>2,300</u>	Savings	1,000
Subtotal	\$6,271	Other Scholarships, etc.	-0-
Transportation	2,306	VA benefits	-0-
Personal	<u>1,223</u>	Other	-0-
Total	\$9,800	Total	\$3,500

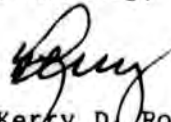

Loan Award: current method \$6,000  
proposed change \$5,750

In examples 1 and 4, the applicant did not indicate at least \$500 from non-loan sources toward eligible loan items (the subtotal). Therefore, the loan award would be reduced under the new regulation, that is,  $\$4,100 - \$500 = \$3,600$  (Example 1) and  $\$6,250 - \$500 = \$5,750$  (Example 2). In examples 2 and 3, the award would be the same because the applicant indicated at least \$500 available for eligible loan items (Example 2), or the cost of eligible loan items exceeds \$6,000 plus the \$500 requirement (Example 3).

I hope this better clarifies what we are trying to accomplish with this regulatory change. The idea is to try to spread available loan funds to more individuals without seriously hampering anyone's chances of obtaining education and training.

If you have any questions or comments, please let me know.

Sincerely,

  
Kerry D. Romesburg  
Executive Director

Enclosure

PROPOSED STUDENT LOAN REGULATION CHANGES

20 AAC 15.030 (c) is amended to read:

20 AAC 15.030 (c) Subject to the limitation of (b) of this section, an applicant's authorized loan award will be based on loan personnel's computation of the applicant's financial need. Financial need will be computed as the difference between the required fees, tuition, room, board, books and supplies, as applicable, charged by the institution for the course of study for which the applicant has been accepted or is enrolled in full-time status, and the amount of funds available to the applicant from other sources to meet those expenses or \$500 whichever is greater. The amount of the authorized loan award will be the next lower multiple of \$50 below the computed financial need.

20 AAC 15.036. is amended by adding a new subsection (4) to read:

20 AAC 15.036. (4) a program of study offered outside the state in which the institution is located, unless the program's location is based upon, and serves, a bonafide educational purpose.

20 AAC 15.045 (f) is amended as follows:

(f) An institution may not hold loan warrants for longer than 60 calendar days after the beginning of the school term, or specified date of beginning, for which the warrant is issued. If the warrant is unclaimed or the student is ineligible at the end of the 60-day period, the institution shall return the warrant to the commission stating the reasons for its return; the warrant and remaining portion of the loan will then be cancelled.

20 AAC 15.900 (b) is amended by adding a new paragraph (9) to read:

20 AAC 15.900 (b) (9) "duress" means threat or violence of a magnitude such as to inspire a person of ordinary firmness with fear of serious injury to the person, reputation, or fortune to the extent that continued school attendance is not possible or practical.

## PURPOSE OF THE REPORT

In accordance with the provisions of Title 24 of the Alaska Statutes, an examination of the Alaska Commission on Postsecondary Education, Scholarship Revolving Loan Fund was conducted to:

1. Determine if the financial statements present fairly, the financial position, results of operations, and changes in financial position for the Fund, for the fiscal year ended June 30, 1984 and 1983.
2. Determine the compliance by the Alaska Commission on Postsecondary Education with the applicable State statutes and regulations governing fiscal activities of the Fund.

## ORGANIZATION AND FUNCTION

The Scholarship Revolving Loan Fund is classified as an enterprise fund whose sole function is financing the Alaska Student Loan Program. The Alaska Student Loan Program had its origin in a program of scholarship loans established by the 1968 Alaska State Legislature. This program was amended in 1970 and completely restructured in 1971. At that time, the Legislature established the loan program under the administration of the Alaska Commission on Postsecondary Education generally as it exists today.

Educational loans of up to \$6,000 and \$7,000 per year for undergraduate and graduate study, respectively, are provided to eligible State residents. These loans, to be used only to offset the costs of tuition, room, board, and books, offer the borrower a ten-year repayment period at an annual interest rate of five percent. The loans may be used for full-time attendance at any accredited or approved college, university, or vocational-technical program. An incentive of up to fifty percent cancellation of the loan is offered to those borrowers who reside in Alaska after completion of their programs of study.

In the thirteen years of operation since restructuring in 1971, nearly 63,000 student loans have been awarded to Alaskan residents for a total of almost \$212 million.

## THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

November 6, 1984

Members of the Legislative Budget  
and Audit Committee:

We have examined the Balance Sheets of the Scholarship Revolving Loan Fund as of June 30, 1984 and 1983, and the related Statements of Revenues, Expenses and Changes in Retained Earnings, and Changes in Financial Position for the years then ended. Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above, present fairly the financial position of the Scholarship Revolving Loan Fund as of June 30, 1984 and 1983, and the results of its operations and the changes in its financial position for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

STATE OF ALASKA  
ALASKA COMMISSION ON POSTSECONDARY EDUCATION  
SCHOLARSHIP REVOLVING LOAN FUND  
NOTES TO THE FINANCIAL STATEMENTS  
For the Fiscal Years Ended June 30, 1984 and 1983

Note 1 - Basis of Accounting

- A. The financial statements are prepared on the accrual basis of accounting. Revenues are recognized at the time they are earned. Expenses are reported based upon a direct association with specific revenues or when the obligation to pay is incurred.
- B. Allowance for Doubtful Accounts is calculated on a percentage basis.
- C. Interest is computed at 5% of the loan over the repayment period. Interest is allocated on a straightline (equal) basis to each payment in the repayment schedule.

Note 2 - Allowance for Loans Forgiveness

The State will forgive a portion of the loan plus interest (up to a total of 50%), if the borrower resides in Alaska upon successful completion of the program of study for which the loan was awarded. The Allowance for Loans Forgiven is calculated on a percentage basis.

Dear Mr. Wilkerson:

Thank you for the opportunity to review and respond to the preliminary audit report on the Alaska Commission on Postsecondary Education, Scholarship Revolving Loan Fund, for Fiscal Year Ended June 30, 1984. By way of this response, I would like to express our appreciation of the professional manner in which the audit was conducted.

We are most pleased with the audit results, and we concur with the findings.

Sincerely,

Kerry D. Roesburg  
Executive Director

PREFACE

The Annual Report on Alaska Student Financial Aid Programs for 1983-84 is hereby transmitted to the Governor and the Legislature of the State of Alaska. The Student Loan Program is administered by the Alaska Commission on Postsecondary Education with advice and guidance of the Student Financial Aid Advisory Committee. Membership of this advisory committee for 1983-84 included:

Ms. Patricia Abney, Chairman (Anchorage)  
Ms. Patricia Clark (Fairbanks)  
Ms. Ida Greiner (Fairbanks)  
Ms. Carol Johnsen (Sitka)  
Ms. Marie MacKenzie (Anchorage)  
Dr. Ed Nichols (Anchorage)

The Commission and staff wish to express their gratitude for the work of this advisory committee.

  
Kerry D. Romesburg

## INTRODUCTION

The State of Alaska provides student financial assistance for postsecondary study through three programs: the Alaska Student Loan Program, the WICHE Student Exchange Program, and the State Educational Incentive Grant (SEIG) Program. The three programs provide Alaskans with access to postsecondary education which otherwise might not be available. Through the loan and grant programs direct financial assistance is awarded to students in an effort to remove or lessen financial barriers to postsecondary education. Through the student exchange program, Alaskans have access to graduate, professional, and highly specialized fields which are unavailable in-state.

This report briefly summarizes each of these programs and the participation levels for 1983-84. The Student Loan Program will be discussed first, then the WICHE Student Exchange Program, and finally, the Incentive Grant Program.

## ALASKA STUDENT LOAN PROGRAM

The Alaska Student Loan Program is one of the most successful programs offered by the State of Alaska. Its purpose is to provide low-interest loans to Alaskans wishing to pursue education and training at a postsecondary level. The program has grown from serving just over 1,000 Alaskans, in 1971-72, to the current 1983-84 level of serving nearly 15,000 Alaskans.

The Alaska Student Loan Program had its origin in a program of scholarship loans established by the 1968 Alaska State Legislature. This program was amended in 1970 and completely restructured in 1971, when the Legislature established the loan program generally as it exists at present. In the twelve years of operation since then, nearly 63,000 student loans have been awarded to Alaskan residents, for a total of nearly \$150 million.

Educational loans of up to \$6,000 and \$7,000 per year for undergraduate and graduate study, respectively, are provided to eligible state residents. These loans, to be used only to offset the costs of tuition, room, board, and books, offer the borrower a ten-year repayment period at an annual interest rate of five percent. The loans may be used for full-time attendance at any accredited or approved college, university, or vocational-technical program. An incentive of up to fifty percent cancellation is offered to those borrowers who reside in Alaska after completion of their programs of study.

### Program Summary

During the 1983-84 school year over 16,000 loans were awarded, and 14,785 were finalized and used for postsecondary attendance. Of these 14,785 loans, 50.5 percent were for attendance in Alaska, and 49.5 percent were for attendance out-of-state.

Undergraduate loans continue to dominate the loan volume, with only 13.2 percent of the 1983-84 loans going for graduate study. The largest single group of loans were for freshman borrowers, who accounted for 27.7 percent of all the 1983-84 loans.

Alaskans use these loans for study throughout the United States, and in a number of foreign countries. During the 1983-84 loan year, students from Alaska used state loans for attendance in every state in the Union and in seventeen foreign countries. The most frequent choice continues to be Alaska by more than a four-to-one margin over any other state.

### Loan Award Amounts

The average loan award continued to rise slightly in 1983-84, following the dramatic rise in 1981-82 when the borrowing maximums were raised. For 1983-84, an undergraduate average loan was \$4,171 while the average graduate loan was \$5,097. Out-of-state student loans continue to be higher, on the average, than in-state loans, due largely to non-resident tuition fees. This is graphically presented in Figure 1. It is anticipated that the trend toward higher average loans will continue in the years ahead as tuition rates continue to increase.

Table 1 contains average loan amounts by student level for the last three years, 1981-82, 1982-83, and 1983-84. In general all loans, regardless of level, have steadily increased, for students attending in-state, and have leveled, or even dropped slightly, for those attending out-of-state. The out-of-state borrower averages a higher loan amount than the in-state borrower for every classification other than vocational.

TOTAL	\$3,796	\$3,872	\$4,013	\$4,345	\$4,558	\$4,502	\$4,098	\$4,213	\$4,255

### Undergraduate Loans

The number of undergraduate students receiving loans under the state program has increased greatly over the past twelve years. In 1971-72, 990 undergraduates received assistance, while in 1983-84, the number has grown to 13,449. Of these 13,449 loan recipients, 53.3 percent used their loans for attendance in Alaska, and 46.7 percent used their loans out-of-state. The states most frequently chosen by undergraduates in 1983-84 are presented in Table 2.

The consistency of student choice over the past few years is quite high. Alaska remains the most frequent choice for undergraduate attendance this year, as it has been in the past, followed by Washington, Oregon and California.

The average loan amount increased in almost every case, with the most pronounced increase in loans for attendance in Arizona, Colorado, and Alaska. Hawaii continues to be one of the states for which undergraduate loan amounts are the lowest, (\$3,426), and two of the top ten states of attendance have lower average loans than does Alaska.

The percent of undergraduates using their loans for attendance in Alaska increased slightly this year. In fact, as can be seen in Figure 2, the 1983-84 rate of 53.3 percent is the highest in-state rate since 1971-72.

The increasing drawing power of Alaskan institutions is hypothesized to be the result of a number of factors including the maturation of Alaska's schools and the accompanying wider array of offerings, as well as the increased cost of attendance at schools outside of Alaska.

FIGURE 2  
PERCENTAGE OF UNDERGRADUATE LOANS  
USED IN ALASKA

The wide geographic distribution of Alaskans pursuing undergraduate education is shown most vividly in Figure 3, with Alaskan undergraduates attending institutions in every state of the Union. The predominance of the West and Northwest is quite evident, with only Alaska, Washington, Oregon, California, Colorado, Arizona, Idaho, Hawaii and Utah, receiving over 200 Alaskan undergraduates on state loans. Of the thirteen western states comprising the WICHE compact (Western Interstate Commission for Higher Education), only Wyoming received fewer than 35 Alaska undergraduates on state loans. In fact, the WICHE states account for 90.1 percent of the undergraduate loan recipients.

Under the state loan program, Alaskans may pursue their educational goals in whatever setting seems most appropriate for them. The freedom of choice which this provides is quite evident by the wide geographic distribution of our students.

As can be seen in Table 3, Alaska attendance accounts for a very high percentage of vocational borrowers (71.2% in 1983-84). Also, more than half (54.4%) of the freshman borrowers elected to attend in Alaska in 1983-84. There seems to be an increased tendency toward attendance out-of-state as student level increases, however this could be due to a number of factors including the changing attendance patterns the last few years and the propensity to remain in school rather than stop-out or drop-out. Hence, caution should be used in drawing inferences from these data.

TABLE 3  
IN-STATE/OUT-OF-STATE ATTENDANCE  
BY STUDENT LEVEL  
1982-83 through 1983-84

STUDENT LEVEL	1982-83				1983-84

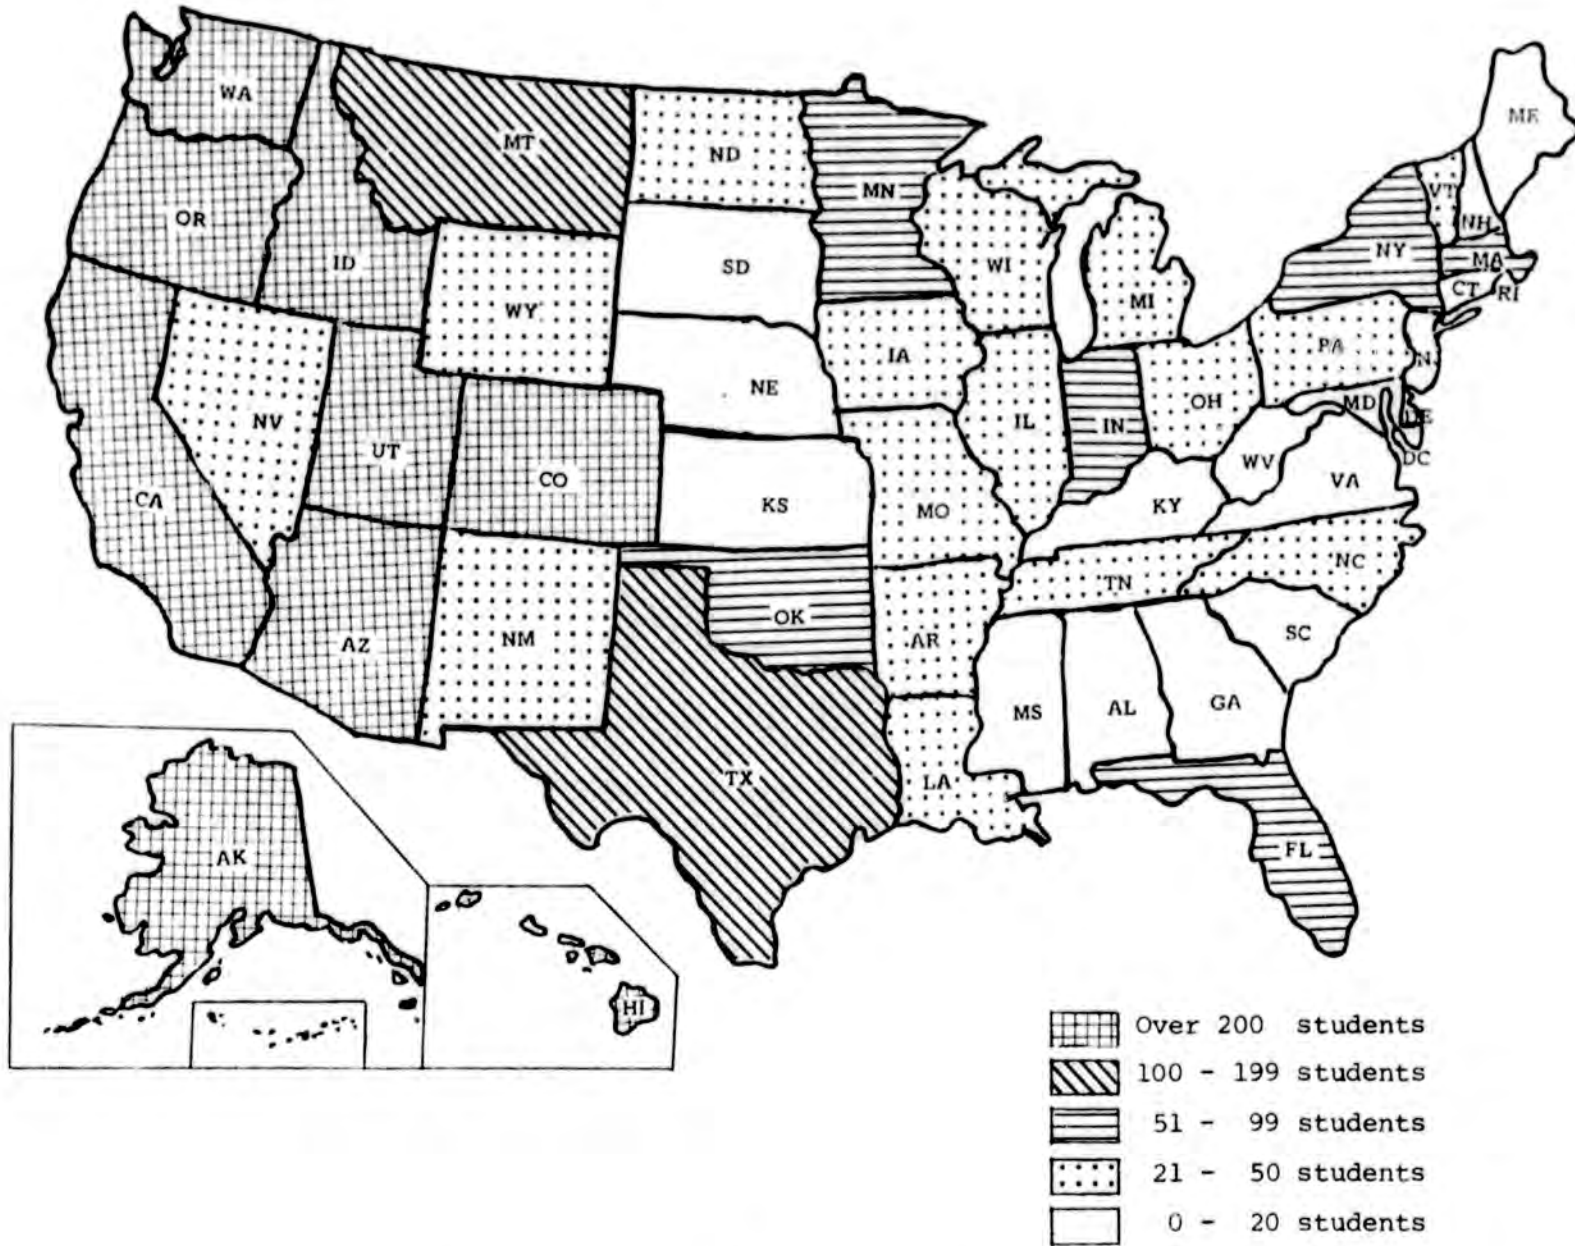

FIGURE 3  
GEOGRAPHIC DISTRIBUTION OF ALASKANS UTILIZING  
STATE LOANS FOR UNDERGRADUATE EDUCATION IN 1983-84

### Graduate Loans

The number of Alaskans receiving loans for graduate study has increased nearly twelve fold since the program began in 1971-72. This year 1,336 students received assistance for the pursuit of graduate study. Of these 1,336, 78.1 percent used their loans for attendance outside of Alaska, while 21.9 percent used them for attending school in-state. The percentage of graduate loan recipients attending school in Alaska has been relatively stable the last few years, after decreasing steadily from 1971-72 through 1977-78. This trend is presented in Figure 4, and is probably largely due to the increased availability of programs in Alaska.

The states most frequently chosen by graduate students from Alaska in 1983-84 are presented in Table 4. Again, as with undergraduates, the students' preference is quite stable.

The average loan award for 1983-84 increased for some states and decreased for others, with the largest increases for students attending graduate institutions in Hawaii and California.

Alaskans pursuing graduate educational goals are also distributed quite widely across the nation, with Alaskan graduate loan recipients attending institutions in all but four of the fifty states. The predominance of the West, and particularly the West Coast, is readily apparent in Figure 5.

Only Alaska, Washington, California, and Oregon received more than 100 Alaskan graduate students on state loans. The thirteen states comprising the WICHE compact account for 74.5 percent of all the graduate Alaskan loan recipients for 1983-84.

Foreign Study

Alaskans used state loans for study in forty different institutions in seventeen foreign countries in 1983-84. The distribution of these students by country of attendance is presented in Table 5. Not too surprisingly, Canada is the most popular foreign country for attendance of Alaskan students.

TABLE 5

### Loan Repayments

The student loan program is based upon a revolving fund with the students' loan repayments being re-utilized for future student loans. Since 1971-72 (actually 1974-75, since there were no repayments received the first few years), Alaskans have repaid over \$22 million on their educational loans. The volume of these revolving funds now contribute a significant portion of the loan account, and as can be seen in Figure 6, these repayments are rapidly increasing each year.

Also presented in Figure 6 is a representation of the forgiveness history of the student loan program. Students who reside in Alaska after completion of their course of study are eligible to have up to 50 percent of their loans forgiven. Beginning with the first such forgiveness in 1974-75, the total amount of loan funds (including interest) which the State of Alaska has forgiven has generally shown large annual increases, with the exception of 1979-80 when forgiveness benefits temporarily leveled. During 1983-84 nearly 2,500 Alaskans received partial forgiveness of their student loans. Increases are projected to continue over the next few years as larger numbers of students complete their educational programs.

FIGURE 6  
STUDENT LOAN COLLECTIONS  
AND FORGIVENESS BENEFITS

### Default

Nationally, student loans have a notoriously high default rate, and, unfortunately, Alaska's program also has experienced problems with loan collections. Although the Alaska program had been doing considerably better than the federal loan programs, the default rate has begun to rise during 1983-84. As can be seen in Table 6, the default rate had been steadily decreasing since the concerted effort began in 1975-76 to pursue these bad debts. However, during 1983-84 default volumes outstripped available manpower and the rate rose dramatically. It is anticipated that the use of private collection agencies during 1984-85 will bring the default rate back down.

TABLE 6  
ANNUAL DEFAULT RATES OF  
ALASKA STATE STUDENT LOANS  
1971-72 through 1983-84

LOAN YEAR	DEFAULT RATE* (June 30)

### Statistical Data

In the Appendix are Tables 11-17 containing data on the Alaska Student Loan Program from 1971-72 through 1983-84. Information on the number and amounts of loans made annually to undergraduate and graduate students attending in-state and out-of-state is presented in Tables 11-14. Table 15 contains summaries of the average size loan awarded each year, and Tables 16 and 17 contain data on institutions most frequently attended by Alaska Student Loan borrowers.

## WICHE STUDENT EXCHANGE PROGRAM

Through its participation in the thirteen-state Western Interstate Commission for Higher Education (WICHE), Alaska provides residents with access to sixteen fields of professional education not available in-state. The WICHE Student Exchange Program provides access to these sixteen fields at participating institutions throughout the compact states, and makes these programs available at a reduced tuition rate to the out-of-state WICHE students. These reduced rates usually amount to the normal in-state tuition rate at public colleges and universities and one-third the regular tuition rate at private colleges and universities. Alaskans certified for participation in this exchange program may also expect preferential admissions consideration by the schools to which they apply. For this, Alaska pays the college or university in which the Alaskan exchange student enrolls a set fee for a particular field of study. This fee, the support fee, covers the non-resident portion of the tuition and a portion of the institution's operating costs. The student does not receive any direct payment under this program.

### Exchange Fields

The WICHE exchange fields in which Alaska would support students for the 1983-84 year included:

Architecture	Occupational Therapy
Dentistry	Optometry
Forestry	Osteopathy
Graduate Library Studies	Pharmacy
Graduate Nursing	Physical Therapy
Law	Podiatry
Maritime Technology	Public Health
Medicine	Veterinary Medicine

A student eligible for state certification in any of these fields must apply for and gain admission to the program of study. The admission decision rests solely with the receiving institution.

### Support Fees

The amount of the support fee to be paid for each field of study is set annually by the WICHE Commission, with membership from all thirteen member states. These fees have increased more or less steadily over the last six years, and at the same time, Alaska's participation level has also steadily increased. As can be seen in Table 7, the total support fees exceeded \$1.5 million.

TABLE 7  
WICHE STUDENT EXCHANGE PROGRAM SUPPORT COSTS  
1976-77 through 1983-84

Academic Year	Total Students	Total Fees
1976-77	114	\$ 368,473

1983-84	284	1,591,440
TOTAL	1,713	\$7,770,062

### Participation Rates

Law continues to be the most popular field for Alaskan students. In 1982-83 Law students accounted for 60.0 percent of the students supported under the exchange program. In 1983-84, Law represented 58.1 percent of the exchange students. The growth fields for 1983-84 were Architecture, Graduate Nursing, Occupational Therapy, Veterinary Medicine, and Osteopathy. For the first time, Law experienced an appreciable decline. These data are listed in Table 8.

TABLE 8

\*Discontinued as an exchange field in 1981-82.

The cost of the student exchange for 1983-84 is detailed in Table 9. It can be seen that because of the relatively low support fee for Law, Law exchange students accounted for only 40.0 percent of the total exchange cost (as opposed to accounting for 58.1 percent of the students).

TABLE 9

## STATE EDUCATIONAL INCENTIVE GRANT (SEIG) PROGRAM

The State Educational Incentive Grant (SEIG) Program provides need-based grants to eligible Alaskans enrolled in undergraduate programs. Grant awards range from a minimum of \$100 to a maximum of \$1,500 each, depending upon demonstrated need. One-half of each grant is federally funded and one-half is provided by the State. Grants are awarded to eligible applicants in order of greatest financial need as measured by a standard need analysis.

### Participation Rates

1983-84 was the sixth year of operation of the SEIG Program in Alaska. Over 2,000 Alaskans applied for grant funds in 1983-84, but because of fund limitations, only 126 grants were awarded. As can be seen in Table 10, this is a decrease from 1982-83 when 161 grants were awarded. The decline is the result of reductions in funds at the federal level. The grant funds available in 1983-84 were 13.0 percent less than the previous year.

Also listed in Table 10 are the awards for in-state and out-of-state attendance and an institutional listing of the in-state awards. As in the past, University of Alaska, Anchorage students received the most SEIG awards.
