MEMORANDUM

RE: CSSB 405

A large, stylized handwritten signature in black ink, which appears to be "Jack Coghill".

I have introduced SB 405, a bill that will extend the Alaska Grain Reserve Program through 1987 at the request of the Department of Natural Resources. The original intent in setting up the Grain Reserve was to set up a base so that farmers would be able to participate in the Federal Grain Reserve Program. The oversight in the sunset of the original Grain Reserve made this impossible for all farmers to make the base acreage requirements and the non-standard varieties of barley grown in Alaska do not meet present Federal eligibility requirements. No monies will have to be allocated for this program since there are funds available within the program to make new loans.

The Grain Reserve allows Alaskan farmers to market grain in an orderly manner by providing loans to the farmer once the crop is harvested. The farmer can pay planting and harvesting expenses without selling all of the crops at harvest, a time when prices are generally their lowest point for the year. Another reason this is advantageous to the farmer is that with the in state market often times he cannot sell all of the crop at harvest because the market is saturated. As the crop is sold the loan is paid back along with interest computed at 8%.

The program so far has been successful and it does help farmers pay back other loans on time. The grain is graded and inspected. The amount loaned for the grain is based on the grade. For example #2 or better barley could yield a \$97.00 per ton loan amount. A lower quality barley would qualify for a lesser amount. Loans are made for a period of up to three years. If after the three year period the loan is not repaid the state will take ownership of any remaining grain.
