There were two significant features of the statute under review in the Oklahoma case. First, a provision of the statute required the state treasurer to purchase the public corporation's bonds issued to provide financing for the building to be leased to the state. Second, the public corporation was authorized to require state agencies and departments to occupy space in the building and pay rent. A third feature also merits consideration, that feature being the intended rental of a portion of the building to federal government agencies.

Despite the first two of the foregoing features of the statute, the court reasoned that housing for state agencies was essential to state government. If the state did not own the housing, a proper method of providing it was through leases.

The court then noted:

> We see no real distinction between a state department entering into a lease agreement and paying rent to a private party and having the same transaction with the Authority. In either event the state department receives a service in the form of housing which the state itself does not own. In addition the state will obtain two office buildings paid for in part from rentals from federal agencies.

355 P.2d at 1032. Given the second of the statutory provisions described above, we must allow that other courts might have seen a difference.

Two lower court California cases were decided in 1962 and 1963. In McClain v. County of Alameda, 25 Ca.R. 660 (Dist.-Ct. of App., First Dist., Calif. 1962), and City of La Habra v. Pellerin, 30 Ca. R. 752 (Dist. Ct. of App., Fourth Dist., Calif. 1963), the California courts upheld leaseback transactions on two bases:

(1) the leases did not create an immediate indebtedness for the aggregate amount of the installment rent due; and

(2) under previous California cases, an obligation imposed by law on a city (such as, in these cases, to provide facilities for city functions) is not an indebtedness or liability within the meaning of the California debt limitation provisions. At least with respect to the first of the foregoing bases, the California courts, without citing Giessel II or Book, reflected a judicial attitude similar to that expressed in those other cases.

The following year, 1964, brought forth Montana's only entry in the leaseback transaction area, State v. City of Missoula, 395 P.2d 249 (Mont. 1964). The transaction there was somewhat unique to the extent that the financing entity involved was an individual -- Theodore Jacobs. In a succinct opinion, the Montana court expressed its belief that

> A debt payable in the future is obviously no less a debt than if payable presently; and a debt payable upon a contingency, as upon the happening of some event, such as the rendering of service or the delivery of property, etc., is some kind of debt, and therefore within the prohibition.

395 P.2d at 251 (quoting from State ex rel. Helena Water Works v. City of Helena, 63 P. 99 (Mont. 1900)). Thus, with virtually no discussion of the elements of the lease from Jacobs to the city, the court reached the opinion that the lease would constitute prohibited debt. It is worth noting another difference in outlook, if not legal analysis, between this case and the California and Oklahoma cases described above: that is, in both California and Oklahoma the need for governmental facilities was viewed as rising to the level of a legal duty, while the Montana court expressed the following opinion as to the need of Missoula for the building in question:

> No one, we believe, would seriously contend that the acquisition of a building valued at approximately $46,000 would be a reasonable and necessary expense requisite to maintain the corporate existence of the City of Missoula.

395 P.2d at 251.

It took the Arizona court five years -- from 1965 through 1969 -- to ultimately conclude its leaseback transaction case. The case began as City of Phoenix v. Phoenix Civic Auditorium & Convention Center Association, Inc., 408 P.2d 818 (Ariz. 1965). Quoting extensively from McCutcheon, Trujillo, and Yelle, the court adopted the principles and reasoning of those cases and invalidated the leaseback transaction because (1) it was, in reality, a purchase agreement; and (2) the source of payment of rents by the city under the lease was to come from the general revenues of the city and not from a special fund derived other than from general taxes.

The next year, the court was asked to clarify its opinion as to whether the debt limitation would be violated if the lease agreement expressly provided that rental payments would come only from excise and ad valorem taxes and not from the city's general taxes and general fund. City of Phoenix v. Phoenix Civic Auditorium & Convention Center Association, Inc., 412 P.2d 43 (Ariz. 1966). Under such circumstances, the court indicated it would find no debt limitation violation.

After fully complying with the clarifications presented in the court's 1966 supplementary opinion, the City of Phoenix found itself once more challenged over the lease agreement. The City sought a peremptory writ of prohibition from the Supreme Court to prevent the City's challengers from proceeding with their case in the superior court. The Supreme Court issued the writ, thus finally concluding the case. City of Phoenix v. Superior Court, 455 P.2d 257 (Ariz. 1969).

In Hall v. Baltimore, 250 A.2d 233 (Md. 1969), the Maryland Supreme Court upheld a leaseback transaction relying on the prevalent common law rule that rent to fall due beyond the current period is not a present debt. The court specifically noted that there was no pledge of municipal assets as the leases involved were subordinate to the city's interest in the property. The court cited with approval Giessel II to the same effect.

Another 1969 case, McFarland v. Barron, 164 N.W.2d 607 (S. Dak. 1969) presented a leaseback transaction which should probably be the model for future endeavors in the area. The court provided the following summary of the plan which reflects a careful and thoughtful preparation for the avoidance of debt limitation problems:

> The leases must contain a provision that rents shall be payable solely from appropriations to be made by the legislature and any revenues derived from the operation of the leased premises. In the event of nonpayment of rents by the State, the building or facility may be leased to others for suitable purposes. A lease may be made for a term of one year from the time a building is completed and ready for occupancy, with an option to the lessee to extend the term for one year from the expiration of the original term and for one year from the expiration of each extended term until the original term of the lease has been extended for a total number of years to be agreed upon at a rental which, if

> paid for the original term and for each of the full number of years for which the term of the lease may be extended, will amortize the total cost of the erection of the building and appurtenances.

164 N.W.2d at 609. Referring to the common law concept that future rents do not create present indebtedness, the court upheld the arrangement. To the suggestion that the state would have a moral obligation to discharge the bonds, the court reponded:

> While the legislature in making appropriations may not be confined to legal obligations, but may recognize moral or equitable obligations...there would exist under the proposed leases no binding legal obligation to authorize expenditures for rent ....In the event of nonpayment of rent or failure of the legislature to appropriate funds the Building Authority is empowered to lease the building or facility to others for suitable purposes to meet accruing payments.

164 N.W.2d at 609 -- 610. And the court finally concluded:

> Since the stipulation of the State to pay rents to the Building Authority will be subject to available appropriations and current revenues, the inhibition of the debt limitation provisions of the Constitution will not apply.

164 N.W.2d at 611.

We temporarily abandon our chronological order once more to note here the subsequent South Dakota case, Millar v. Barnett, 221 N.W.2d 8 (S. Dak. 1974). Citing McFarland, the court again upheld a leaseback transaction similar to the transaction under review in the preceding case.

In 1970, three cases from three states were decided. New Mexico produced its second leaseback transaction case (following the 1941 Trujillo decision) in McKinley v. Alamogordo Municipal School District Authority, 465 P.2d 79 (N.W. 1970). The leaseback arrangement in Alamogordo stands in stark contrast to that crafted in the McFarland case. The financing entity in this arrangement was to be a nonprofit corporation whose membership was identical to the membership of the municipal agency which would be the corporation's lessee. As part of the lease

agreement the municipal corporation was to agree to budget and appropriate sufficient funds to pay the rent under the lease and, moreover, the municipal corporation agreed to the placement of a lien on all of its income from all sources, except ad valorem taxes, to cover the rental payments. There was at least one mitigating factor; that is, the lease was for only one year with successive one year extensions and was terminable at the request of either party. This mitigating factor was insufficient to prevent the court from invalidating the agreement.

In the Trujillo tradition, the court recognized the corporation as "nothing more nor less" than the municipal agency. Thus, the bonds of the corporation would necessarily be debts of the municipal agency. Although the court averred that the pledge of the municipal agency's income and the lien on funds to be received by the municipal agency were not critical factors in its decision (465 P.2d at 81), the court nevertheless referred to these factors in its concluding paragraphs:

> Here the only source of money to pay rent to accrue is state tax proceeds and amounts received from federal sources. As a matter of fact, these moneys are specifically pledged by the terms of the lease. It is quite apparent that the funds to be used are those realized from "general taxation" held unconstitutional in Trujillo.

465 P.2d at 84.

While McFarland reflects careful consideration in the preparation of a leaseback transaction to avoid the constitutional concerns expressed by the various courts, Alamogordo seems to represent a studied indifference to those concerns. The result is that New Mexico has two invalidating cases and none validating. It would be enlightening to see how the New Mexico court would handle a case involving a leaseback transaction which reflects some concern for judicial precedent.

The Nevada case of State v. Hancock, 468 P.2d 333 (Nev. 1970), approaches, but does not achieve, such an effort. The leaseback transaction in that case, invalidated by the Nevada court, provided on the one hand that rentals from the state would derive from biennial appropriations from the legislature; on the other hand, the drafters of the plan curiously chose to also provide that the legislature could choose to pledge itself to make future appropriations as necessary to pay the rents.

The Nevada court followed the McCutcheon, Trujillo, Yelle, and Ayer approach of looking to "the essence" of the plan to reveal the true nature of the public corporation as the alter ego of the state and, thus, concluded that the corporation's debt was the state's debt. The argument was presented to the court that biennial legislative appropriations for the rent would not present a debt problem, with regard to the lease, because the constitutional concern does not extend to expenses payable out of current revenues. The court conceded that the argument carried "some persuasive force" but, in reviewing the transaction as a whole, was convinced that

> successive biennial appropriations for rent until the bonds issued by the Authority are fully retired must be considered in the same light as a legislative pledge to make future appropriations for the same purpose. It is inconceivable that the legislature would default in either instance since the good faith of Nevada would not allow it.

468 P.2d at 338.

The third 1970 case was from West Virginia; it was followed in 1971 by a second West Virginia case. The 1970 case invalidated a leaseback transaction, while the 1971 case upheld such a transaction.

The 1970 case is State ex rel. Hall v. Taylor, 178 S.E.2d 48 (W. Va. 1970). Although the legislation authorizing the transaction in Taylor indicated that the rents to be paid by the state would come from annual appropriations, the court found an obligation, as a practical matter, for the state to make the appropriations. In the court's words:

> It is an exercise in fiction, semantics, sophistry or circumlocution, devoid of substance, to assert that the statute in question does not create a state debt. It is a debt which, in the contemplation of the statute, must necessarily be paid in annual installments over a period of years and by successive legislatures from fiscal year to fiscal year. The state is legally obligated to furnish office space and to pay other expenses incidental to the continued existence and functioning of the various state agencies and departments which rented office space in the building in question. The legislature is le-

> gally obligated to make appropriations from time to time to defray the costs of such essential governmental operations.
>
> It is no answer to the invalidity of this statute and of the action of the Building Commission in issuing these bonds to say that some future legislature is not required to make an appropriation to one of these agencies or departments in order that the agency or department might make its payment of rent. The failure to make such an appropriation could result in the holders of the bonds taking over the buildings involved, and it is incomprehensible that any legislature would permit any such thing to happen. However, the test is not whether a future legislature is required to make such appropriations. The test is the authority to do so. Clearly the only source of income by which the bonds may be liquidated is the rent to be paid by the occupants of the buildings. Therefore, the reason for the invalidity of the statute lies in the authority of the legislature to make such future appropriations. It is not necessary for this Court to wait until some future legislature refuses to make an appropriation to make a determination of the legality of this procedure.

178 S.E.2d at 57 and 58 -- 59 (emphasis in original). The reasoning employed by this court is singular among all the leaseback transaction cases.

In the following year, the West Virginia court reviewed another leaseback transaction which cured the problem apparently perceived by the court in the Taylor case. In State ex rel. State Building Commission v. Moore, 184 S.E.2d 94 (W. VA. 1971), the rental payments from the state were to be made from a special fund into which flowed proceeds from the state's sale of alcohol. Since the state's general revenues would not be considered for payment of the rents, the court was not offended by the plan. Curiously, however, a provision in the lease agreement which required the state agency occupants of the building to provide for the maintenance and operation of the buiding from their general revenue funds appropriated by the legislature survived the court's review notwithstanding Taylor. Without any explanation, the court simply ruled that payments under the provision by

the state agencies would conform with the provisions of the Act under review.

Ohio decided its second leaseback transaction case in 1972. The court's opinion in State ex rel. Kitchen v. Christman, 285 N.E.2d 362 (Ohio 1972), began with the court's recitation that

> At the outset, it should be emphasized that this court examines this transaction, not for what it purports to be, but for what, in essence, it is. In short, the court looks through the form to the substance of the proposed transaction.

285 N.E.2d at 365. The court's conclusion should come as no surprise. True to the McCutcheon, et al., tradition, the court pierced the lease agreement veil to find the hidden purchase agreement. The court concluded that

> the entire contract price is a present indebtedness of the city. The city has presently obligated itself to make future payments, and the Company has a present right to compel each succeeding administration to make those payments. The city's obligation under the contract is a continuing one, and no succeeding city council can refuse to appropriate available funds (generated by its taxing power) for payment.

285 N.E.2d at 367 (footnote omitted).

Of particular interest in the opinion is a footnote in which the court states;

> If such an unconditional obligation of payment [by the city] did not exist, but instead, the city were free to periodically choose whether to continue to appropriate monies for the purpose of acquiring eventual complete ownership of the property in question, an entirely different question might have been presented.

285 N.E.2d at 367, n.6.

Another 1972 case, Bachtell v. City of Waterloo, 200 N.W.2d 548 (Iowa 1972), also followed the "piercing" approach to

conclude that a leasing arrangement was merely a subterfuge for an attempted purchase. The court listed many of the cases both pro and con which had preceded it in the leaseback area. The court considered that those which had upheld such transactions were distinguishable from this case, though the court scarcely attempted to explain either the distinguishing features of the other cases or even the particular objectionable features of the plan under review.

In Opinion to the Governor, 308 A.2d 802 (R.I. 1973), the Rhode Island court responded to questions proposed by the governor of that state regarding a contemplated leaseback transaction. The governor asked whether lease payments under the transaction would involve debt of the state. Viewing the position that such payments would not constitute debt as the majority view and as the "sounder and more reasonable" position, the court answered the governor's question in the negative.

The Oregon Supreme Court, in Martin v. Oregon Building Authority, 554 P.2d 126 (Ore. 1976), reviewed a leaseback transaction which, among other things, provided that the state's obligation to make rental payments was unconditional as long as the premises were available for rental and which also provided that the state's full faith and credit supported such obligation. As the court noted regarding the use of a public corporation in such a scheme to attempt to avoid the constitutional debt limitation:

It is a scheme which would fool only a lawyer.

554 P.2d at 131. Although the provisions of the leaseback transaction noted above were relatively outlandish, the court's opinion creates the impression that even a more moderate plan would have reached the same result as long as it involved a public corporation whose only purpose for existence was to issue bonds to provide financing for state projects and whose only source of revenues was rental payments from the state. In this regard, Martin should probably be added to the list of McCutcheon-Trujillo-Ayer-Yelle type cases.

In an unusually flexible approach to debt limitations and leaseback transactions, the court in In re Request for Advisory Opinion Enrolled Senate Bill 558 (Being 1976 PA 240), 254 N.W.2d 554 (Mich. 1977), indicated that a leaseback transaction would be upheld even though it acknowledged that, under the plan, future legislatures would be bound to appropriate the necessary public funds to meet the state's rental obligation. The court took the following pragmatic approach to the question:

> However, in that its power to invoke sovereign immunity can particularly or even totally obstruct enforcement, the state differs essentially from non-governmental contractors....Although in granting limited jurisdiction over all contract claims against the state to the Court of Claims...the State of Michigan has waived its sovereign immunity, even that waiver is subject to legislative revocation.

254 N.W.2d at 547. This case probably should not be considered likely precedent for most other states.

In Laramie Citizens for Good Government v. City of Laramie, 617 P.2d 474 (Wyo. 1980), the leaseback transaction was not unusual except to the extent that it involved the purchase of a ranch by a public corporation with the intent that the corporation would lease the ranch to the city so that the city would have the benefit of water rights on the ranch. The public corporation was created solely for that purpose. Nine of the eleven members of the corporation's board of directors were elected city officials. The corporation had no financial base except for the rents it would receive from its lease of the ranch to the city. All of this led the court to the conclusion that the corporation was the alter ego of the city and that the corporation's debt was prohibited.

The court also considered the nature of the lease agreement and concluded that it was a mere subterfuge for a purchase of the ranch. In its opinion, the court listed the following factors which reflect a lease rather than a purchase:

> provision for cancellation of the lease by the lessee at its option at yearly intervals, or the converse provision that the term is for one year with yearly renewal options; provision for payment of a fixed and substantial amount at the end of the term, or the converse that there is no provision for transfer of title at the end of the term without payment at that time of a fixed and substantial amount in addition to rental payments; provision that the lessor pay the cost of upkeep, repair, taxes, etc., the amount of the rental payments being equal to the debt service amount.

617 P.2d at 479.

Eberhart v. Mayor & City Council of Baltimore, 433 A.2d 1118 (Md. 1981), was Maryland's second leaseback transaction case and was by far the most ornate of the plans we have reviewed. The subject of the plan was a parcel of land with improvements owned by the City. The City rented the land and building on a rent free at will basis to a culinary arts institute. The City desired to extract its capital out of the property while still enabling the institute to rent the property at no cost. Under the plan, the City would sell the building to a limited partnership and lease the land to the partnership for thirty-five years. The partnership would lease the land and building back to the City under a thirty year lease. The partnership, in order to obtain financing, would seek the issuance of industrial development bonds by the Industrial Development Authority of the Mayor and City Council of Baltimore, a public corporation. The authority would issue its bonds, and the proceeds of the sale of the bonds would be loaned to the partnership to finance the partnership's purchase of the building from the City. As security for the bonds, the partnership would grant a mortgage on the building and its leasehold interest in the land, which would be assigned to the trustee for the bonds. The mortgage would be subordinate to the City's interests as tenant under the ground and building lease and as fee simple owner of the land.

The partnership would also assign to the trustee the right to receive rent payments from the City.

This plan was challenged on the same grounds enunciated in the McCutcheon line of cases; that is, that the authority was simply the alter ego of the City so that the authority's bonds constituted debt of the City and that the use of the general funds of the City to pay rent under the lease amounted to an obligation on the part of the City to repay the authority's bonds. Although the court noted and the City conceded that the obligation to pay rental under the lease was a full faith and credit obligation of the City, the court rejected the challenge and upheld the arrangement.

With regard to the contention that the authority was the alter ego of the City, the court listed an interesting collection of statutory provisions rebutting the position.

> The provisions of Art. 41, secs. 266A--I indicate that an industrial development authority is not simply the alter ego or instrumentality of the county or municipality which creates it. An authority is a body politic and corporate and "a political subdivision of the State." Section 266A-3 mandates that none

> of the five members of the board of directors that govern an authority and exercise its powers by resolution may be officials or employees of the incorporating county or municipality. A director, although appointed by the incorporating county or municipality, may be removed only for misfeasance, neglect of duty, or other good cause. Sec. 266A-3(b)-(7). Section 266A-3(a) provides that the incorporating county or municipality may exercise its own powers under secs. 266A--I even though it has chosen to incorporate an authority with similar powers. These various statutory provisions suggest that an authority is a distinct entity from its incorporating county or municipality.

433 A.2d at 1127.

With regard to the notion that the City's rental payments will be used to pay the authority's bonds and therefore constitute debt, the court noted that the determinative factor was the payment of bona fide rent by the City. The court stated:

> Uncontradicted evidence was presented to the circuit court that the City's estimated annual rental payments under the Ground and Building Lease would represent the fair rental value of the Property. The correlation of the City's rental payments to Culinary Associates' debt service obligation does not, therefore, destroy the essential character of the Ground and Building Lease as a lease. Because the rent reserved under the Ground and Building Lease represents the fair rental value of the Property, and there are no factors that suggest a contrary result, the Ground and Building Lease is a bona fide lease. Thus, the City's obligation to make rental payments will not create debt even though the obligation to pay rent is an enforceable, full faith and credit obligation of the City.

433 A.2d at 1125.

Another 1981 case, Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1931), also upheld a leaseback transaction against

similar contentions. The transaction took the form of a lease-back to the City of land by a nonprofit corporation, which lease provided for 25 consecutive one-year renewals which were automatic unless the City elected against the renewal. The rental payments from the City under the lease would be used to repay the bonds issued by the corporation, and the security for the bonds would include a lien on the corporation's building and on the corporation's lease of the land. Upon payment of the bonds, the corporation would transfer title to the building to the City.

The court first considered the contention that the corporation was the alter ego of the City, noting that, where the alter ego doctrine applies, the court will disregard a corporate entity, or pierce the corporate veil, and consider the actions ostensibly taken by the corporation to be those of its shareholders. The court noted that "the record fails to establish the essential element that the building authority is to be used to promote injustice or protect fraud." 636 P.2d at 697. The court found no fraud upon the taxpayers of the City, though the taxpayers had earlier voted on and rejected a general obligation bond issue to finance the facility now being financed through the issuance of the corporation's bonds, because it is not the construction of a facility that requires voter approval but rather, the creation of general obligation debt. The plan before the court did not create any general obligation debt. As to any potential fraud on purchasers of the bonds, the court noted:

> The record reflects that the financing plan has been carefully structured to assure that the city has no obligation on the anticipation notes or the revenue bonds and that purchasers of those instruments will be made fully aware of that fact by the terms of the notes and bonds. The purchasers also will be advised that the city's lease and attendant obligations can be terminated at the end of any year and that, should the city elect to terminate its lease, the security for the building authority's obligations is limited to the municipal office building itself and the building authority's 25-year lease on the building site.

636 P.2d at 698.

The court then considered whether the City's rental obligation for future years under the lease agreement constituted proscribed debt and concluded that it did not.

> Of particular importance to our conclusion that the city's rental obligations for future years do not constitute debt in contravention of Colo. Const. Art. XI, Sec. 6 is the lease provision that those obligations are contingent upon exercise of the city's renewal options. We have held that discretionary or
>
> contingent obligations are not constitutional debt. "To constitute a debt in the constitutional sense, one legislature, in effect, must obligate a future legislature to appropriate funds to discharge the debt created by the future legislature."

636 P.2d at 699.

Finally, the plaintiffs in the case urged the court to take the McCutcheon "total picture" approach to determine that the plan as a whole amounted, in essence, to a subterfuge and an evasion of the constitutional debt limitations. Taking such an approach, the court reached the opposite conclusion. Recognizing that the corporation was created solely for the purpose of providing financing for the project after the voter's had disapproved general obligation indebtedness for the project, the court found "no evil in seeking an alternate means of achieving a result so long as the alternate is itself consistent with the law." 636 P.2d at 699 -- 700.

> As noted earlier, there is a real difference between the city's proposed plan and the plan which was rejected by the voters. That difference is the absence of any obligation of the city on the anticipation notes or revenue bonds under the new plan. We are aware of the argument that, although the city's lease is terminable in form, practicalities dictate that the likelihood of termination is remote because the city hall will be specially designed to city specifications and because of the prospect, gaining substance with each rental payment, that the city will become the owner of the building when the bonds have been retired....The ability to terminate its lease gives the city flexibilty which is real, not illusory. We cannot say that the city will never avail itself of its termination rights.

636 P.2d at 700.

The final case in our review is Baliles v. Mazur, 297 S.E.2d 695 (Va. 1982), involving the financing of state capital projects through the issuance of revenue bonds by a public corporation of the state. To the question of whether the revenue bonds constituted debt of the state, the court answered they did not, noting that the enabling legislation specifically denied such assertion. To the assertion that the issuance of the revenue bonds was a transparent attempt to evade the constitutional debt limitations, the court summarily disagreed.

CONCLUSION

The foregoing review of cases demonstrates that the majority of jurisdictions which have considered the issue accept leaseback transactions as consitutionally permissible methods for financing public facilities. It is our opinion that the majority view upholding such transactions would be followed in Alaska. Moreoever, we are also of the opinion that the categorization of the agreement between the state and a financing entity as either a "lease" or an "installment purchase contract" is insignificant as long as the state's obligation to make payents is contingent upon annual appropriations by the legislature for that purpose. Thus, whether the arrangement is for a lease or for an installment sale, we believe the courts in Alaska will uphold it.

We noted in the "Overview" to this memorandum that 16 of the states whose cases we have reviewed can be considered as "validating states" in the sense that the most recent cases in those states are cases which uphold leaseback transactions. Ten of the states can be considered invalidating states. This does not necessarily mean that leaseback transactions are prohibited in the other ten states.

The only significance to the categorization of the 16 states as validating states is that we can be sure that in a clear majority of the states a constitutionally valid leaseback transaction can be created. It may be equally true that constitutionally valid leaseback transactions could be created in some or all of the invalidating states, with some changes in the features of the transactions presented to the courts in those states as a result of recent cases.

The following list describes features of a leaseback transaction which may be considered significant in analyzing the transaction under constitutional debt limitations. We emphasize that these should not be considered as "musts" (with the exception of item "3" below) but are provided only as suggestions. If all other considerations allow and if the concensus is to take

the most conservative approach, the preparation of a leaseback transaction containing all of the suggestions listed below would come as close as possible to satisfying the most conservative of the invalidating state courts. It should be recognized, however, that other considerations are likely to call for different or even conflicting features. We do not mean to imply that those other considerations cannot or should not be accomodated. Again, the following list is intended only to provide suggestions for contemplation in fashioning a leaseback (or installment purchase) agreement.

1. The financing entity, whether a public corporation or a private corporation, should have some business to perform other than and in addition to the financing of the particular project to be leased to the state. One of the common themes of the invalidating cases is the "alter ego" argument. If the financing entity has some other purpose for existence it will help to refute that argument.

2. For the reason stated in "1", the financing entity should have some source of revenue other than rents to be paid by the state.

3. In any lease agreement with the state, the state's obligation to pay rent must be contingent upon annual appropriations by the legislature.

4. The amount of rent to be paid by the state should bear some resemblance to "fair rental value" for the property rather than simply being based on debt service requirements for the bonds.

5. If possible, title to the property should remain in the financing entity (if a public corporation) at the expiration of the lease; alternatively, the state should be required to pay a significant amount to exercise an option to purchase at the term of the lease.

6. The lease should be terminable by the state at any time without any further obligation.

7. The financing entity should have the ability to lease the facility to users other than or in addition to the state during the period of the lease.

8. Should the state terminate the lease, the financing entity should have control over the use or disposition of the facility.

9. No existing state property should be encumbered except for the leaseholder interest granted to the financing entity.

10. If title to the property on which the facility is to be built remains in the state, provision should be made in the lease agreement for the disposition of the facility at the termination or expiration of the lease if the state does not exercise its purchase option.

11. The statute, the bonds, and any other pertinent documents should clearly indicate that the bonds are not obligations of the state and are payable solely from the revenues derived from the project.

12. Should the legislature fail to appropriate money for rental payments or the state fail for any reason to make rental payments, it should be clear that neither the financing entity nor the bondholders have any recourse against the state, though the financing entity may endeavor to enter into other lease agreements, and, if the financing entity holds title to the land and building, it may re-enter and take possession thereof.

13. If a financing entity is to be specially created for the purpose (which we advise against; see "1" above), membership in the entity should not include officers of the state.

14. There should be no possibility of loss by the state of any of its pre-existing property.

15. There should be a provision reducing or eliminating the state's rent to the extent that the facility is not timely completed or, upon completion, becomes unusable.

16. Any long-term lease should be prepared as a one-year lease with the proper number of annual options to renew.

17. Revenues from other state facilities should not be pledged as security for tne bonds. This is particularly so in Alaska given our state's dedicated fund prohibition.

18. The statute creating the financing entity, if any, should carefully describe the financing entity as having a separate and independent legal existence.

19. The financing entity, if a public corporation, should not be given powers of eminent domain.

20. The financing entity, as lessor to the state, should agree to pay the cost of upkeep, repairs, taxes, etc. with regard to the facility.

21. If the financing entity is created by statute, its directors should be removable from office only for malfeasance, neglect of duty, or other good cause.

Finally, with respecy to the applicability of this memorandum to lease participation certificates, we perceive no reason why such certificates should be considered differently from revenue bonds or why lease participation transactions should be considered differently from leaseback transactions.

Attention: Mr. Milt Barker

Ladies and Gentlemen:

You have requested that we review various issues raised by the proposed lease-purchase financing by the State of Alaska ("State") of various State facilities.

Under the proposed financing structure, the Alaska State Housing Authority ("ASHA") would issue bonds or notes in order to provide funds to pay the costs of construction of the State facilities. Pursuant to a lease agreement ("Lease") between ASHA, as lessor ("Lessor"), and the State, as lessee, the Lessor would lease the State facilities and lease or sublease1/ the underlying land (collectively, the "Facilities") to the State. The State would be obligated to make rental payments2/ on a fixed basis throughout the term of the Lease in amounts sufficient to pay when due the principal and interest on the Lessor's outstanding bonds or notes. The State's rental payment obligation would be subject to annual appropriations; failure by the State legislature to appropriate sufficient funds to make rental payments would result in the termination of the Lease. Upon the expiration of the term of the Lease, the State would pay a predetermined purchase price in order to acquire title to the Facilities.

1/ If Lessor does not own, but rather leases from the owner thereof, the underlying land, the Lessor would sublease the land to the State.

2/ The interest component of the State's rental payments would be exempt from federal income taxation, assuming compliance with all applicable federal tax law requirements.

The question we have considered is whether this proposed financing of the Facilities would be in violation of the debt limitations set forth in the State Constitution. Analysis of this general issue requires consideration of two component issues: (1) whether debt issued by ASHA would be found to constitute prohibited State debt under the State Constitution and (2) whether the State's rental payment obligation under the Lease would be found to constitute prohibited State debt under the State Constitution.3/

Article IX, § 8 ("Section 8") of the State Constitution provides in pertinent part:

> No state debt shall be contracted unless authorized by law for capital improvements or unless authorized by law for housing loans for veterans, and ratified by a majority of the qualified voters of the State who vote on the question.

Article IX, § 11 ("Section 11") of the State Constitution, however, excepts from the Section 8 debt limitations revenue bonds of a public corporation of the State, as follows:

> The restrictions on contracting debt do not apply to debt incurred through the issuance of revenue bonds by a public enterprise or public corporation of the State or a political subdivision, when the only security is the revenues of the enterprise or corporation.

3/ We note that between 1966 and 1974 ASHA issued eleven separate series of bonds in the aggregate principal amount of $106,150,000 to finance construction of a variety of capital projects for lease to the State. The bonds were secured by lease rentals from the State. Over $60 million of the bonds remain outstanding. 1984 Moody's Municipal & Government Manual 244-246.

Thus, Section 8 restrictions on incurring State debt apply only to obligations against the general credit of the State. 1959 Op. Att'y Gen., No. 39.

If the debt to be issued by ASHA to finance the Facilities will fit within the Section 11 exception, the Section 8 debt limitations will not be applicable. In National Bank of Alaska v. State of Alaska, Department of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982), the Supreme Court of Alaska ("Court") found that bonds issued by ASHA do not constitute debt of the State subject to the Section 8 debt limitations.4/ The Court based its conclusion on § 18.55.160 of the Alaska State Housing Authority Act ("Act"), which provides in pertinent part as follows:

> The bonds of the authority are not a debt of the state or a political or municipal corporation or other subdivision of the state and each bond shall so state on its face. Neither the state nor a political or municipal corporation or other subdivision of the state other than the authority is liable on the bonds, nor are the bonds payable out of funds or properties other than those of the authority. The authority may not pledge the faith of the people of the state for a loan or obligation. Bonds of the authority are not a debt, indebtedness or the borrowing of money within the meaning of any limitation or restriction on the issuance of bonds contained in the constitution or laws of the state.

4/ In National Bank of Alaska, the Court held, inter alia, that ASHA bonds (and bonds of the Alaska Housing Finance Corporation) are not "state obligations" for purposes of the Alaska Business License Act. Bonds at issue in the case appear to have included lease revenue bonds referred to in footnote 3/ above.

Without expressly referencing the Section 11 exception the Court found that § 18.55.160 of the Act placed ASHA bonds outside of the scope of the Section 8 debt limitations: "the ASHA . . . bonds in the instant case are not, by the very terms of AS 18.55.160 . . . state debts backed by general treasury funds." Id. at 817.

The Court cited as controlling two of its earlier decisions on the issue of whether bonds of public corporations are subject to the Section 8 debt limitations: DeArmond v. Alaska State Development Corporation, Sup. Ct. Op. No. 116 (File No. 285), 376 P.2d 717 (1962) (enabling act provisions determined finding that bonds of Alaska State Development Corporation are not debts of the State) and Walker v. Alaska State Mortgage Association, Sup. Ct. Op. No. 353 (File No. 669), 416 P.2d 245 (1966) (enabling act provisions determined finding that bonds of Alaska State Mortgage Association are not debts of the State within the scope of Section 8).

Thus, we conclude that ASHA bonds issued in conformance with the Act in order to finance the Facilities on the terms outlined above would not constitute prohibited debt of the State.

Arguably, the provisions of Section 11 as applied to a revenue bond financing secured by rental payments made by ASHA pursuant to the Lease are dispositive of the entire issue and render irrelevant the question of whether the Lease, in itself, constitutes State debt. Nonetheless, the majority of jurisdictions which have considered this issue have upheld the validity of lease financings of public facilities under state constitutional debt limitations. The generally accepted view is that a lease arrangement between a state and an independent state agency constitutes state debt only if the state presently has an unconditional, legally enforceable obligation binding future legislatures to make future annual rental payments under the terms of a multi-year lease. See, e.g., Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981); State ex rel. Kitchen v. Christman, 285 N.E.2d 362 (Ohio 1972); Book v. State Office Building Commission, 149 N.E.2d 273 (Ind. 1958); State ex rel. Thomson v. Giessel, 72 N.W.2d 577 (Wisc. 1955). If, however, under the terms of a multi-year lease the state has a present obligation to pay current rental payments out of current revenues and only a contingent, legally

nonenforceable obligation at the discretion of future legislatures to make future annual rental payments, no prohibited debt is created. Thus, the essence of the majority rule is that no constitutionally prohibited debt results from a state's obligation to make future annual rental payments under a multi-year lease if the obligation is conditioned upon legislative appropriations. See e.g., Enourato v. New Jersey Building Authority, 448 A.2d 449 (N.J. 1982); Bulman v. McCrane, 312 A.2d 857 (N.J. 1973); McFarland v. Barron, 164 N.W.2d 607 (S. Dak. 1969).5/

We are of the view that a lease-purchase financing of the Facilities on the terms outlined above is valid under Section 8 debt limitations. Support for our view comes from several sources.

In the Walker opinion, supra, at 253 and 254, the Court cited approvingly in footnotes two of the landmark decisions holding that lease-purchase financings do not violate state constitutional debt limitations. Although it cited the Book and Giessel opinions specifically in connection with its resolution of the issue of whether the debt of a public corporation constitutes state debt, it is reasonable to assume that the Court would similarly embrace the holdings in those decisions validating lease-purchase financings.

In the October 14, 1983 Informal Opinion of the Attorney General (File No. 366-101-84),6/ the Alaska

---

5/ In this connection we have also reviewed the following authorities, inter alia: Ayer v. Commissioner of Administration, 165 N.E.2d 885 (Mass. 1960); State v. Yelle, 289 P.2d 355 (Wash. 1955); McCutcheon v. State Building Authority, 97 A.2d 663 (N.J. 1953).

6/ Although opinions of the Attorney General are not controlling on a court, his opinions are entitled to great weight. See Allison v. State, 583 P.2d 813, 817 (Alaska, 1978) in which the Court adopted the following statement from a California appellate court decision:

> While opinions of the attorney general are not controlling as to the meaning of the statute the fact that his opinions

(Cont'd)

Attorney General opined in accordance with the majority position that a lease financing of a public facility by means of a lease agreement between the State and the developer of a public facility would not violate Section 8 if future legislatures of the State are not bound to appropriate funds for rental payments. As the Attorney General explained in interpreting Section 8:

> [It is] imperative that the state's right to possess and use the facility is contingent on annual appropriations from revenue anticipated for the fiscal year in which the lease obligation is incurred. Traditionally, appropriations for lease payments are considered operating appropriations which lapse on June 30 of the fiscal year. A lease agreement which provides for termination of the leasehold if sufficient appropriations to pay rent are not enacted will negate the conclusion that a debt is created. A one-year lease with automatic annual renewal for a maximum number of years upon enactment of an appropriation to finance the annual rent has been approved as a term which negates any possibility that a debt is created. Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981). See also Glennon Heights, Inc. v. Central Bank and Trust, 658 P.2d 872 (Colo. 1983).

Further support for our conclusion can be found in Proceedings of the Alaska Constitutional Convention, pages

---

> have not been challenged and that he is the officer charged by law with advising the officers charged with the enforcement of the law as to the meaning of it, entitl[illegible] his opinions to great weight. (citations omitted)

2435 - 2437.7/ Although the delegates to the Convention do not appear to have addressed directly the precise issue of the consitutional validity of lease financings of public facilities by the State, the following excerpts from an exchange between Delegate V. Fischer and Delegate White regarding the committee proposal form of Section 11 8/ suggest that the delegates viewed lease-purchase financings as being within the scope of the Section 11 exception:

V. FISCHER The committee proposal in Section 10 authorizes the floating of bonds by public corporation when the only security from such indebtedness is the revenue of the enterprise or public corporation. The Committee, in putting that in, has specifically told us in the commentary9/ that they're condoning

---

7/ Warren v. Boucher, 543 P. 2d 731, 735 (Alaska 1975) (In interpreting a constitutional provision, the Court "must infer the purposes and intentions of the framers from the language of the constitution itself, with careful regard for the apparent aims which the framers had in mind.")

8/ Referred to therein as Section 10.

9/ As noted in a Memorandum to the Constitutional Convention Committee on Finance and Taxation summarizing the comments of various finance specialists on proposal forms of Sections 8 and 11:

> The prohibition against incurring debt except by referendum in Section 9 [Section 8] and the exceptions in Section 11 as pertains to revenue bonds of public corporations would appear to be an open invitation to create 'authorities,' in the Pennsylvania pattern, for the financing of public improvements.

(Cont'd)

a practice which is used in every state as a means of getting around this kind of bonding restriction as we currently have in Section 8. In other words, we put the provision in Section 8, it is a cumbersome provision. We are telling the state that that of course is of too much bother. Therefore, go ahead and create a separate corporation; if you want to build highways, set up a toll road, set up a separate corporation. If you want to put up public buildings, set up a separate corporation and many states have done that, float bonds and then the state purchases those buildings from that corporation. What happens in those cases? In those cases the credit of the state is not pledged . . .

. . . .

WHITE: Mr. President, just in closing, briefly, in answer to Mr. Fischer I think he has brought a side issue in here by mentioning Section 10. If Mr. Fischer can draft language that would eliminate the necessity for Section 10, I'm sure the Committee would go for it. The reason Section 10 is in there is because it has been found that no matter what you do, as far as the Committee can find, that way can be found to get around debt limitations, and, therefore,

---

See Kelley v. Earle, 190 A. 140 (Pa. 1937), in which the Supreme Court of Pennsylvania upheld the validity under state constitutional debt limitations of lease financings between the State of Pennsylvania and the General State Authority for the construction of public projects.

> if in order to avoid suits in court you might just as well make the authority clear. . . . [I]f the legislature wants to take this end way around of getting at it and going to special authorities they are subject to check by the people, the people will know what's being done and they will react accordingly if they are not in favor of it. . . . Id. (Emphasis added)

In addition to reflecting the liberal, modern approach of the framers of the State Constitution, these comments suggest that the delegates did not consider as prohibited debt an obligation of the State to make payments to acquire a public facility financed with debt of a public corporation. It appears that the delegates contemplated and condoned reading Section 11 as authorizing an outright purchase by the State of a public building from the financing public corporation, a more extreme debt limitation circumvention device than the proposed lease-purchase financing.

Other statements of delegates to the Convention demonstrate that the fundamental impetus behind the Section 8 debt restrictions was the framers' desire to restrict the State's ability to contract debt prospectively. Since the proposed lease-purchase financing of the Facilities would not entail the creation of a rental payment obligation binding future legistlatures of the State, it is not likely that the Court would find that such a financing contravenes the Section 8 debt limitations.

Thus, in view of the apparent aim of the framers of the State Constitution in imposing the Section 8 debt limitations and in granting the Section 11 exception therefrom, and in light of the approach taken by the Court in this general area, we are of the opinion that the Lease would not constitute debt of the State.

After you have had an opportunity to review our views, we would be happy to discuss them, and any related concerns which you may have, with you at your convenience.

Very truly yours,

BIRCH, MORTON, BITTNER,
PESTINGER AND ANDERSON

907-465-3800

MEMORANDUM March 3, 1986

SUBJECT: Notice of Bond Sale - CSHB 519
(House Special Committee on State Loans)

TO: Representative John Sund
Attention: John Hartle

FROM: Joyce James
Legislative Counsel

The new text deletes the requirement of notice for international airport revenue bond sales in AS 37.15.450 and toll facility revenue bond sales in AS 37.15.650. Please be advised that AS 37.15.040 still requires notice inviting sealed bids before selling an issue or series of bonds. Because it is not clear that AS 37.15.040 applies only to general obligation bonds, or, if your intent is to allow flexibility in the sale of all bonds, you may want to amend this section also.

If I can be of further assistance please advise.

Debt Management Plan

February, 1986

State of Alaska
Office of the Governor

February 1986

DEBT MANAGEMENT PLAN

Governor Bill Sheffield

Through careful management, the State of Alaska has maintained the best credit rating we've ever had. That AA rating, in turn, has allowed local governments across Alaska to keep their investment grade ratings as well. This good credit rating translates into lower property taxes for Alaskans.

With dropping world oil prices, however, Alaska's annual debt payments automatically become a larger part of our expenses.

So, I have asked the 14th Alaska Legislature to approve a package of new laws which, viewed as a whole, will give our young state a plan for comprehensive debt management for the first time. None of these proposed improvements in our laws is flashy or exciting, but as a package they are vital to the continued financial health of Alaska. I encourage you to read the enclosed information.

In short, the debt management plan I have placed before the Alaska Legislature will keep the commitments voters have made to our future, particularly in regards to local school construction. The plan also will guarantee we can continue to incur a reasonable amount of debt for school construction and other improvements in the future, while we preserve our good credit rating.

Debt Management Plan

"We've borrowed a considerable amount of money to help build Alaska. We can manage that debt, but it takes planning...lest that debt manage us in the future."

Governor Bill Sheffield
January 14, 1986

DEBT MANAGEMENT PLAN

An Overview

Without firm control of public debt the credit rating of all debt issuers in Alaska could be in jeopardy. Right now the State has an AA rating, the highest it's ever had, and all issuers within the State are rated as investment grade. But as oil prices decline, the share of revenues devoted to debt service will become an increasingly heavier burden. The State of Alaska cannot control the price of oil. What we can and must control is the amount of public debt.

Proper stewardship of public debt in Alaska can be accomplished through enactment of legislation covering four distinct needs. Taken separately, each of the four bills brings reasonableness to a different aspect of public debt. But viewed as a whole, this legislation provides a plan for comprehensive debt management for the first time. It assures that all State-supported debt, which is any debt paid from the State general fund, is subject to the control of the State Bond Committee. It is this total of State supported debt which the rating agencies look to in establishing the State's credit rating.

The first bill, House Bill 293, provides for orderly financial management in the event of a default by a municipality of its debt obligations. This legislation protects both issuers of public debt in Alaska and creditors.

House Bill 519 provides for the lease financing of public buildings through the Alaska State Housing Authority, acting as

the Alaska State Building Authority. The bill gives the State Bond Committee control over issuance of this debt as well as debt of the University of Alaska.

House Bill 520 gives the State Bond Committee control over the total amount and maturity of municipal school debt to be reimbursed by the State. The investment community needs to see some control on this fast-growing part of State supported debt.

The fourth bill, House Bill 521 places a limit on the issuance of general obligation debt by municipalities. Even with this limit some municipalities in Alaska will have some of the highest debt ratios in the United States. This legislation does not limit the ability to issue revenue bonds.

As background, Alaska's combined debt (State, municipal and school district) through the issuance of general obligation bonds was $2.9 billion as of June 30, 1985. That amounts to about $5,500 per Alaskan. When the amount of G.O. Bond debt for veterans' housing is included in the total, Alaska's per capita debt load is $7,000.

That debt is manageable, but it takes planning. The State of Alaska has not had a bond authorization since 1980. Yet, the per capita interest on the State's general obligation bond debt is 20 times the national average. State policy limits debt service to five percent of unrestricted revenues, but that ratio is about 10 percent now and could climb to 16 percent by fiscal year 1989.

Again, this is a result of a combination of factors. World oil markets have seriously eroded the revenue Alaska receives from oil and gas production. At the same time, Alaska voters have authorized new debts, including $325.0 million in school construction bonds so far in fiscal year 1985 alone. That translates into a possible 30 percent increase in State

reimbursement for local school debt--added costs which show up in the State operating budget.

These and other construction commitments are viewed by the nation's financial markets in different ways. On one hand, Alaska's rating agencies know this is a unique state, with enormous potential for generating public revenues and a young, dynamic workforce; on the other hand, the rating agencies look at all of Alaska's debt together, and while they are concerned about how much we borrow, they are more concerned that Alaska have controls on the growth of debt statewide.

To tackle that issue, Governor Sheffield is asking the Legislature to take the following initiatives:

- For school construction, honor all existing debt (as of March 31, 1986) under the current 80 percent reimbursement law, and limit the growth of future State reimbursement to $10 million per year for school construction in the future.

- Set standards for school construction to guarantee more schools can be built with the funds available.

- Reimburse 100 percent of principal only for bonds authorized after April 1, 1986. This will encourage local districts to shop for the lowest interest rates.

- For local governments, limit debt to seven percent of assessed property values.

- Designate the Alaska State Housing Authority, acting as the Alaska State Building Authority, as the issuer of lease revenue bonds to finance public buildings. This

change was recommended by a citizens task force appointed by the Governor to study the issue in 1985.

- Designate the State Bond Committee as overseer of lease revenue bond issues and the total of State reimbursement for school debt (after March 31, 1986).

DEBT MANAGEMENT PLAN

Questions and Answers

QUESTION: Why do we need a debt management package?

ANSWER: The State has achieved a AA rating for its general obligation debt. However, the burden of paying the State's debt becomes heavier as revenues shrink. Now, with oil prices falling, the State must demonstrate to the rating agencies that it has the procedures, checks, and balances necessary to manage its debt obligations, if the State is to retain its high credit rating.

QUESTION: Why does the State have to be concerned about lease-purchase financing, University of Alaska, and municipal school debt? (HB 519, HB 520)

ANSWER: All or a major portion of the payments on this debt come from the State's general fund. These types of debt obligations are referred to as State supported debt. The total of State supported debt and State general obligation debt is the figure that Moody's and Standard and Poor's uses as the measure of the State's debt burden. As of June 30, 1985, this total was $1,610.3 million, of which less than half, $752.7 million, was State general obligation debt. Even the State's share of school debt alone, $753.6 million, exceeded State general obligation debt.

QUESTION: Why should the State seek to limit municipal debt generally? (HB 521)

ANSWER: Because of high levels of State support to municipalities, they may be tempted to issue more debt than they could reasonably expect tax payers to support without the State aid. With State revenues declining, State support for municipalities eventually may suffer budget cuts along with other programs. The State needs to insure that such developments do not create avoidable financial difficulties for municipalities.

QUESTION: Is one reason for the State's concern with municipal debt levels that municipal credit ratings affect the State's ratings? (HB 521)

ANSWER: No. The State's rating is not affected by the rating of any or all municipalities. Even a municipal financial emergency or default would not ordinarily affect the State's rating. However, an emergency or default would be likely to tarnish all Alaska issuers somewhat, much as the New York City default affected all municipal debt issuers and the WPPSS (Whoops) default affected Northwestern U.S. and public power supply issues. This could significantly raise, for some period of time, the interest rates the State and other municipalities have to pay on bonds.

QUESTION: Is the WPPSS (Whoops) syndrome the reason for the introduction of the Municipal Financial Emergency Commission legislation? (HB 293)

ANSWER: It's one reason. However, a more important reason is to establish a mechanism that ensures satisfactory and early resolution of a municipal financial crisis so that provision of public services is impeded. Unlike nuclear power plants, municipalities cannot be mothballed. A mechanism for

satisfactory and early resolution also provides a valuable assurance to bond buyers.

QUESTION: What is the State's debt capacity and how is it determined?

ANSWER: In recent years, the State's debt policy has been that the State had capacity to issue additional general obligation debt if the debt service on the new bonds, combined with the debt service on outstanding bonds, would not exceed 5 percent of the State's unrestricted revenues. 5 percent is a level which few states with a AA credit rating exceed.

QUESTION: What is the current level of debt service relative to unrestricted revenues?

ANSWER: Considering only State general obligation bonds, the level for fiscal year 1987 is 5.7%. However, inclusion of all State supported debt which the rating agencies look at boosts the percentage to 11.5%. Falling State revenues will push the debt service to a level of 16.4% of revenues in fiscal year 1989.

QUESTION: Does this mean the State can't issue any more debt in the near future?

ANSWER: No. In the first place, the State could issue additional debt if it were willing to sacrifice its credit rating and that of State agencies and municipalities, whose ratings generally are tied to the State's. More to the point, additional issuance in modest amounts with a AA rating might be possible if the rating agencies were assured total debt obligations will remain limited. The limits and controls in Governor Sheffield's debt management package are an essential step in providing these assurances.

QUESTION: What happens to the State's reimbursement of municipal school debt that was authorized last fall? (HB 520)

ANSWER: That debt and all municipal school debt authorized before April 1, 1986, will be grandfathered under current law. This means State reimbursement for that debt will be under the current formula of 80% of principal and interest.

QUESTION: Does the Governor's budget contain the funds necessary for the State to reimburse the grandfathered bonds? (HB 520)

ANSWER: The amount required is contained in the Department of Education's fiscal note for HB 520. The estimated amount required for fiscal year 1987 is $43 million. The Governor plans to support the $43 million appropriation if the legislation is passed.

QUESTION: How much additional school debt could be reimbursed by the State under HB 520?

ANSWER: HB 520 would permit State reimbursement of $10 million per year for debt authorized after March 31, 1986. Since the legislation establishes reimbursement at 100% of principal and requires the debt to have a 10 year term and constant principal payments, the $10 million State reimbursement could support as much as $100 million initially.

QUESTION: How does 100% of principal compare to 80% of principal and interest? (HB 520)

ANSWER: It depends on how much the interest is in relation to principal, which depends on the interest rates at the time the bonds are sold. At current interest rates, 100% of principal is approximately 89% of the current formula for reimbursement (80% of principal and interest). Thus, the new formula would provide

reimbursement at a level about 11% less than current reimbursement. 100% of principal would represent approximately 71% of total principal and interest.

QUESTION: How will it be decided what municipal school debt receives reimbursement if the $10 million limit otherwise would be exceeded? (HB 520)

ANSWER: The Department of Education will establish a priority list based on criteria specified by law. Portions of school construction project costs also may be deemed ineligible for reimbursement based on design standards and regional cost differentials determined by the Department of Transportation and Public Facilities. Financing costs will not be eligible for reimbursement. State reimbursement will be reduced further by the interest earned on bond proceeds, except arbitrage which would have to be paid to the federal government under pending congressional legislation. These limitations will spread increasingly scarce State dollars further and enable the State to support more schools under the $10 million limit.

QUESTION: Why is the limit set at only $10 million? (HB 520)

ANSWER: There has been an explosion of authorization of municipal school debt. Between October 1, 1985, and March 31, 1986, total municipal school debt receiving voter approval is expected to exceed $350 million. This would represent an increase of almost 50% in six months over the $739 million school debt outstanding as of June 30, 1985. It is this explosion which will propel State payments for debt service to over 16% of State revenues by fiscal year 1989.

QUESTION: Can the limit be revised? (HB 520)

ANSWER: Certainly the limit could be amended by law in future legislative sessions. A report to the 1988 session of the legislature by the Department of Education on school construction needs is required in section 17 of HB 520. This would be an appropriate time to consider a revision. As an alternative, the State bond committee may revise the limit at any time in light of State credit conditions, school requirements, or any other reason.

QUESTION: Will the State Bond Committee decide which schools receive funding? (HB 520)

ANSWER: No. This will be determined solely by the Department of Education in establishing the priority list. The State Bond Committee will be concerned only with the credit implications for the State of the total amount of reimbursement to be paid.

QUESTION: What is lease-purchase financing? (HB 519)

ANSWER: Lease-purchase financing consists of debt obligations issued by a private developer or State agency to finance the construction or acquisition of facilities which are leased to the State. The lease payments made by the State are in an amount and duration which is equal to the principal and interest payments on the debt obligation. The debt obligation may take the form of a revenue bond or a certificate of participation in rent (CP or COP as they are sometimes called). At the conclusion of the lease, title to the facility generally passes to the State.

QUESTION: Why is the Alaska State Housing Authority (ASHA) designated as the issuer of all lease-purchase financing for State facilities? (HB 519)

ANSWER: ASHA has previously issued lease revenue bonds for State facilities and is the current lessor of these facilities to the State. The designation of a single agency which has experience

and technical expertise in this area will improve accountability, efficiency, and control of these types of financing.

QUESTION: Why would ASHA be issuing debt under the name of the Alaska State Building Authority? (HB 519)

ANSWER: This name change, applicable only to the financing of public buildings, will improve the marketability of the debt. The alternate name avoids confusion about the issuer and debt since most state housing authorities issue debt only for the provision of low and moderate income housing. The name change helps recognize the higher credit standing accorded debt which is secured by payments from a state government for leases rather than from private individuals for rent.

QUESTION: What became of the State Office Complex Financing Task Force?

ANSWER: The Task Force, a body of executive branch officials, two legislators, and five members of the public with substantial financing experience, held hearings in the fall of 1985 and produced a report to the Governor which is available from the Treasury Division of the Department of Revenue. HB 519 implements the recommendations contained in that report.

QUESTION: Will ASHA be deciding what public buildings will be built or acquired? (HB 519)

ANSWER: No. Each branch of government and the University of Alaska would decide what facilities would be built or acquired. The facilities would have to meet the requirements and specifications of each branch or the University before the branch or University could be expected to execute the lease. No financing can occur without an executed lease.

QUESTION: Does this mean each branch or the University can enter into lease-purchase financings without legislative approval or approval by law? (HB 519)

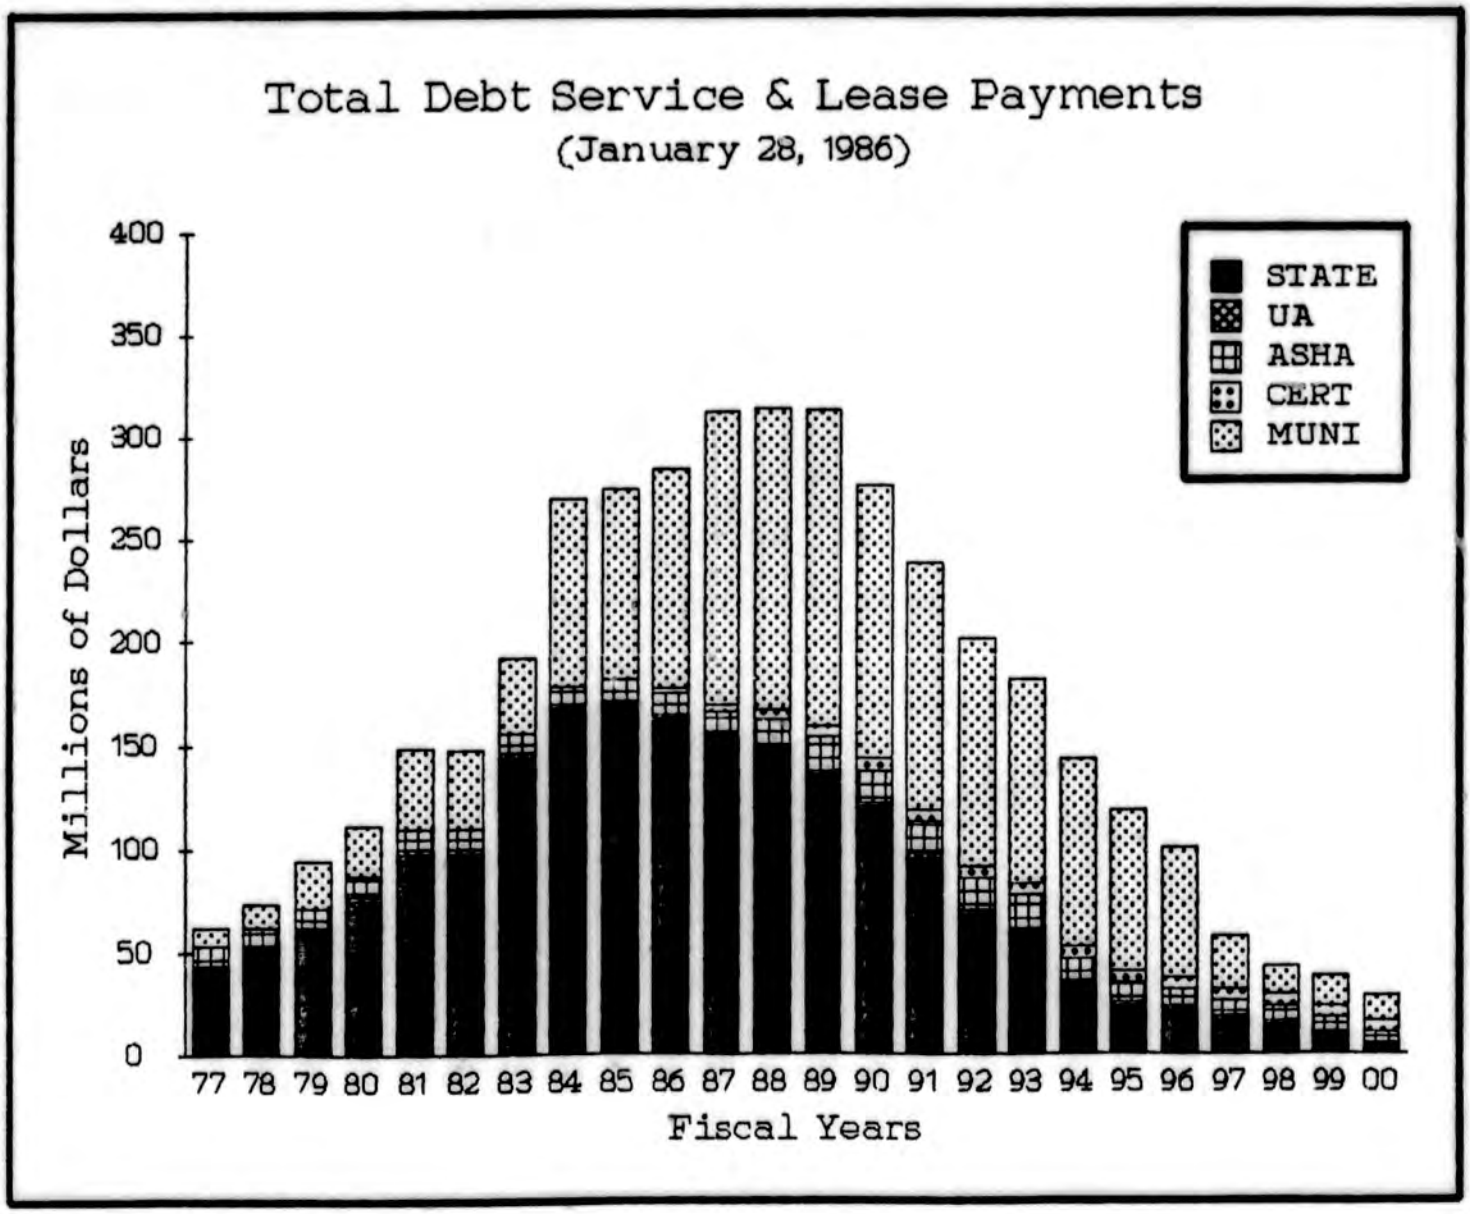
ANSWER: Yes. However, the annual lease payments are subject to appropriation by the legislature as a matter of constitutional law. HB 519 requires lease-purchase agreements to state this fact so that it is clear to all parties. Because lease payments are subject to appropriation, lease-purchase financing is not debt from the standpoint of the State Constitution.

QUESTION: Could legislative approval or approval by law be required of lease-purchase financing by statute? (HB 519)

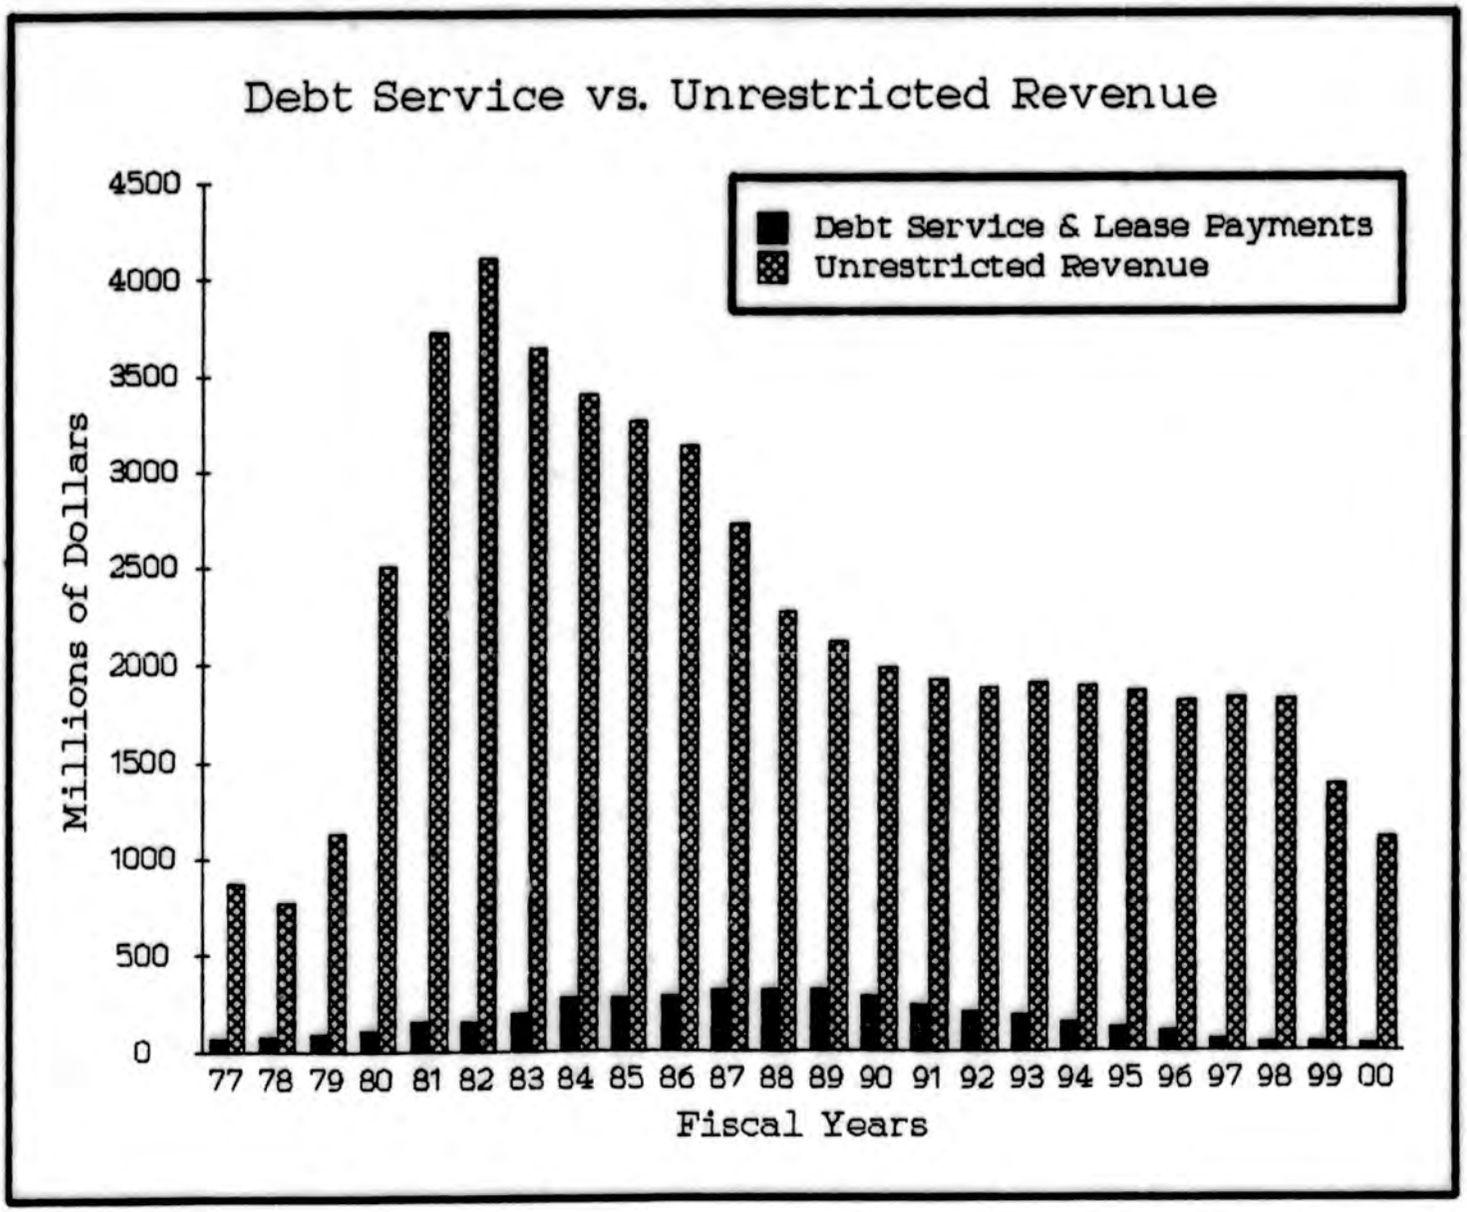
ANSWER: Alaska Supreme Court decisions indicate that this probably would violate the separation of powers doctrine and be unconstitutional. Legal questions of this caliber can easily derail debt financings because bond buyers will not purchase debt with such uncertainties about it. To achieve the same purpose, Governor Sheffield has pledged to seek legislative approval of any executive branch lease-purchase financings. The other branches and University might be expected to do the same.

QUESTION: Why does the State Bond Committee need to approve lease-purchase financings? (HB 519)

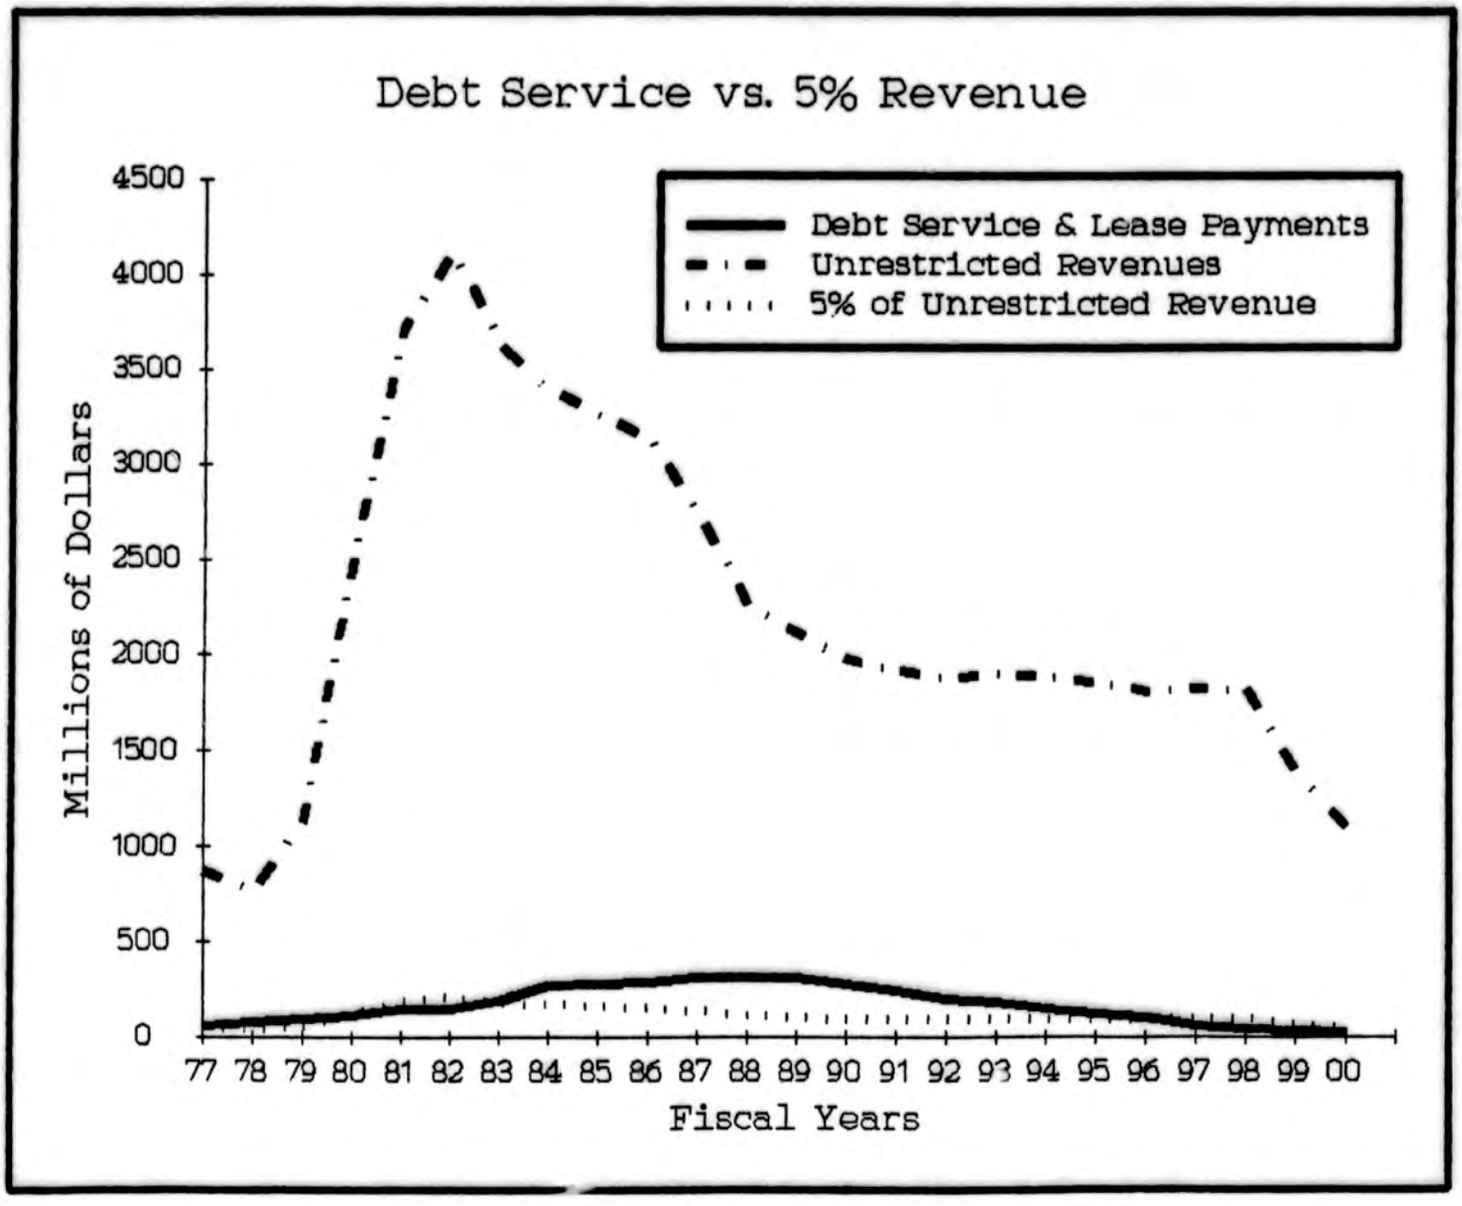
ANSWER: Lease-purchase financing is paid from the State general fund and, accordingly, is added into the State's debt burden by the credit rating agencies. Because of this, the State Bond Committee needs to control aspects of such financings which can affect the State's credit standing. This can include such things as the maturities of the debt, need for insurance, or the timing of the sale. The State Bond Committee will not be concerned with project justification or specification. This is the same manner



in which the Committee functions with respect to State general obligation debt.



QUESTION: What municipalities would be forestalled from issuing additional debt under HB 521?



ANSWER: The North Slope Borough and the city of Wrangell currently have general obligation debt exceeding 7% of the full value of their property tax base. They would not be able to issue additional debt until their tax base has increased sufficiently or outstanding debt is paid down. The North Slope Borough should be able to issue additional debt again within two years. The city of Nenana would not be limited by the cap due to the exemption in HB 521 for self-supporting debt which is issued as a general obligation bond. Issuance of revenue bonds and refunding bonds are not limited by HB 521.

QUESTION: Why is the limit set at 7%? (HB 521)

ANSWER: National medians for municipal general obligation debt are in the range of 3% to 4% of full value. A higher level is appropriate for Alaska because the economy is still developing, with spurts of rapid growth in particular localities, if not statewide. However, a level significantly above 7% would not be an effective limit or provide the credit markets any comfort that Alaska is managing its debt.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 27, 1986

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
P.O. Box V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting two bills that provide for improved state debt management. One relates to control of state-supported school debt, the other to lease-financing transactions by the various branches of government.

These two bills are each cornerstones of a comprehensive proposal designed to monitor and control more effectively the issuance of debt instruments that harbor substantial credit implications for the state. (Some citations in each bill are to provisions in the other bill. The two work together.) Alaska's remarkable wealth has facilitated tremendous economic growth in all areas of the state's economy and at all levels of government. Many of these worthy projects and programs have been funded directly by the state. In other instances, however, funding has been obtained through the issuance of debt instruments, either by the state or by local governments. Where government activities are funded through the issuance of debt, maintenance of a favorable credit rating for the state assumes critical importance. Simply stated, actions detrimental to the state's credit standing are injurious to the Alaska economy.

Unlike past years, we approach an era where the state's vast wealth is not, in and of itself, sufficient to support a favorable credit rating. In my discussions with representatives of the national financial community, the constant theme stated was the need for Alaska to demonstrate its ability to effectively manage its resources. One critical

attribute of responsible state management is an effective debt management program.

Any discussion of maintenance of a favorable credit rating for the state must reflect the broad array of financial obligations encompassed within the term "state-supported debt." It is critical to bear in mind that state general obligation bonds are but one type of debt instrument that affects the state's credit standing. The financial community also looks to other recurring, long-term financial obligations which are paid from the general fund, such as those which arise under a lease-financing agreement. In a similar vein, the state's commitment to support school debt issued by municipalities is a type of long-term financial commitment with substantial credit implications.

Debt management concerns must further reflect the impact of excessive or improvident municipal debt issuance on the state's credit standing. I initially observe that responsible state debt management policies must necessarily include a degree of state supervision of municipal debt issuance. While I am, of course, cognizant and supportive of the prerogatives of local government, problems with municipal debt issuance inevitably burden the state as well. For that reason, I previously introduced a bill that relates directly to the issuance of municipal debt. Last session I proposed the establishment of a Municipal Financial Emergency Commission to assist municipalities that have defaulted in bonded indebtedness (HB 293). I am also proposing legislation that imposes reasonable limitations on a municipality's authority to issue general obligation debt. As noted in the transmittal letters accompanying each of those bills, responsible state management of municipal debt is necessary to assure the continued investment community support of and confidence in municipal and state debt issues.

The two bills attached to this letter today are intended to assure proper state oversight before the state enters into the type of recurring, long-term financial commitments that might have an impact on the state's credit standing. Where the state issues general obligation bonds, the constitutional requirement of voter approval offers an appropriate opportunity for the electorate and for elected officials to gauge any adverse effect that issuance of the debt may have on the state. Under present law, however, neither the statutory reimbursement formula for school debt nor the unrestricted authority to enter lease-financing agreements

offers comparable mechanisms to assure that state credit implications are adequately addressed. As the decline of available revenues further exacerbates the sensitivity of the state's credit standing, it is of critical importance to assure that each project is viewed not only on its own merits but also with consideration of how the issuance of additional state-supported debt will affect broader state interests. I believe that these two bills offer a responsible way of meeting the needs of the state to obtain office facilities and of municipalities to provide necessary educational facilities -- a way that best preserves the state's favorable credit standing.

I.

The shorter bill implements the recommendations of the State Office Complex Financing Task Force, a body whose membership brought together the views of executive-branch officials, two legislators, and several members of the public with substantial financing expertise. The task force conducted extensive hearings to consider the most appropriate method to provide state office facilities in the most cost-efficient manner possible. After review of the available financing alternatives, the task force recommended the enactment of legislation to facilitate the acquisition of state office facilities through lease-financing agreements. The bill designates the Alaska State Housing Authority as the appropriate financing entity, but provides that when the authority issues debt for this purpose, it do so as the Alaska State Building Authority. The name change is intended to prevent confusion in national financing markets.

Sections 1, 6, 7 and 8 provide that the university and each branch of government, respectively, have legal authority to enter into lease-financing agreements with the Alaska State Housing Authority acting as the Alaska State Building Authority. The state has previously executed lease-financing agreements under existing lease authority, and these sections are thus intended to remove any ambiguities regarding the legal authority to enter into lease-financing agreements. The cost of building acquisition or development would be provided by the sale of revenue bonds by the Alaska State Building Authority. In all instances, a lease-financing agreement preserves legislative prerogatives through the requirement that lease payments be subject to annual appropriation.

While the bill recognizes the desirability of the lease-financing technique, the bill also imposes effective debt

management controls. First, lease-financing agreements may only be executed with the Alaska State Building Authority, a limitation that ensures uniformity and continuity in the state's lease-financing programs.

More importantly, secs. 9 -- 16 expand the responsibilities of the state bond committee (AS 37.15) to ensure that the broader credit implications are adequately assessed before the state enters into a lease-financing agreement. Under sec. 15, for example, proposed AS 37.15.770 authorizes the state bond committee to review any proposed lease-financing in detail and to prohibit or condition the sale of the debt instruments if it is in the best interests of the state to do so.

I observe that sec. 8 of this bill is similar to legislation that I proposed last session in the wake of the controversy surrounding the Anchorage Office Complex. The bill proposed last session (HB 392 and the identical SB 293) provided for project-specific legislative approval before execution of a lease-financing agreement. In the transmittal letter accompanying the initial bill, dated April 19, 1985 (1985 H.J., p. 1001, and 1985 S.J., p. 856), I noted that the provision of project-specific legislative approval posed substantial constitutional problems. Both the constitutional doctrine of separation of powers and the constitutional prohibition against special and local legislation place in serious legal doubt any statutory requirement to seek project-specific approval. And public finance is the worst forum to interject such a substantial legal uncertainty. Accordingly, the present bill does not propose project-specific approval. To do so, in my view, would impermissibly intrude upon the constitutional prerogatives of future governors. Although I believe it inappropriate to require project-specific approval as a matter of law, I reaffirm my personal commitment to seek legislative approval before the executive branch enters into any lease-financing agreement.

II.

The longer of these two bills that I am transmitting makes several changes to the state's support of public school construction. Most notable of the significant changes proposed under this bill is a cap is placed upon the amount of municipal debt obligations for which the state will provide reimbursement. Municipalities issuing debt to finance school construction will pay the interest costs, while the state will pay the principal in equal payments up

to an aggregate amount of $10,000,000 in any year for debt approved by local voters after March 31, 1986.

The state presently provides, in addition to its municipal grant program, three forms of aid for school construction. Under AS 14.11.010 all school districts may apply to the Department of Education for an appropriation for school construction projects for which the department may request, in order of priority, appropriations from the legislature. If an appropriation for a school construction project is made, the school district may, under AS 14.11.020, request the assumption of the state's responsibility to plan, design, and construct the particular project. The department provides for the assumption of the responsibility by executing a grant agreement with the school district.

AS 14.11.100 provides two additional forms of state aid for public school construction which are only available to municipal school districts. The state reimburses municipal debt service payments in varying percentages which, because of amendments made in ch. 78, SLA 1985, are at least 80 percent. The state also reimburses a municipality for at least 80 percent of its cash payments used for school construction. To receive reimbursement of either debt service or cash payments, the municipality must first quantify the need for the project and provide a description of the project and an estimate of its cost. The Department of Education reviews the project and its justification, and, when appropriate, grants its approval of the project and its estimated costs. The next step is approval of the municipality's voters to sell the bonds. If the local voters approve the sale of the bonds, the state will reimburse the costs of debt service by requesting money in each year's budget.

There are several weaknesses in the state's present programs of financing school construction.

First, there are inadequate procedures to ensure that the estimates of project costs are reasonable. Before 1982, the administration of the school construction grant program was shared by the Department of Education and the Department of Transportation and Public Facilities. Chapter 92, SLA 1982 transferred all responsibility for the state's construction grant program to the Department of Education. This same weakness exists under AS 14.11.100.

The second major failing is that there is no ceiling for the amount of money which the state will be requested to reim-

burse under AS 14.11.100. In the proposed FY 1987 state budget, approximately $106,000,000 in municipal debt service payments is requested to continue existing level of debt.

During the last session of this legislature, the percentage of reimbursement for debt service costs was increased to 80 percent, although allowable projects were limited to facilities necessary for increased enrollment or to correct health and safety problems. The result of last session's amendments to AS 14.11.100 has been an identification of required projects with approval of the projects closely followed by local bond elections. These recent municipal elections have authorized approximately $312,500,000 of new municipal debt for which local communities will seek reimbursement from the state for debt service costs. I anticipate, if all of this newly authorized debt is incurred in the near term, that the impact on the debt retirement program could be as much as an additional $45,000,000 in requested reimbursements in FY 1987. I intend to support this additional funding as soon as the amount is determined and necessary debt management legislation is passed.

I, of course, recognize that there are municipalities in the state which have experienced significant population increases, and which therefore need the construction of new schools. I believe that these existing needs should be met at the current levels of state support. However, the future of state revenues and the need for new schools are uncertain. Consequently, I believe that different approaches need to be applied to the way the state considers all school construction in the state.

With discipline and altered approaches to the school construction, I believe that the state and its municipalities can contain state-supported debt and still allow for adequate state support of school construction.

This bill changes procedures for reviewing and approving school projects.

Section 1 amends AS 14.08.151. These amendments are desirable to clarify the manner in which the state conveys title for school sites to regional education attendance areas.

Section 2 amends AS 14.11.010(b) by requiring the Department of Education to request cost estimates from the Department of Transportation and Public Facilities and to base its

project approval upon that cost estimate. This same requirement is found in sec. 11 in amendments to AS 14.11.102, which relates to project approval for the debt retirement program. Section 14 contains new authority for DOT/PF to estimate construction costs for all school projects financed by appropriations and debt retirement. Included within that authority is the responsibility to establish design standards.

Section 3 of the bill amends AS 14.11.010(c) by adding new criteria, relating to population trends and the condition of facilities, which the Department of Education will consider when approving projects for appropriation. These amendments are also applicable to the debt retirement program under language found in sec. 11.

Section 4 proposes new language that will require school districts requesting state aid to inventory and inspect the schools in their districts and to revise that inventory on a yearly basis. The provisions of this section also require that school districts provide information relating to maintenance and operation costs. This information regarding existing school facilities will enable the state to better analyze new projects that the state will be asked to finance by appropriation or by debt reimbursement.

Sections 5 and 6 limit the state's reimbursement of school debt to principal only for approved projects financed by new municipal debt authorized by local voters after March 30, 1986. If the debt was authorized by local voters before April 1, 1986, the state's reimbursement continues as before. The state's reimbursement of cash payments by municipalities ends for payments made after June 30, 1986.

Section 7 amends AS 14.11.100(b) by offsetting the amount that the municipality receives for debt reimbursement by the amount of interest earned on the proceeds of bonds sold for a particular project. This amendment parallels existing law found in AS 14.11.100(k), which is repealed in sec. 16.

Sections 8, 9, and 10 contain a number of amendments to AS 14.11.100(h), (i), and (j), respectively, which are necessary to reflect the new class of reimbursement under the language proposed in AS 14.11.100(a)(6) in sec. 6 of the bill. Section 10 has a fiscal impact. It amends AS 14.11.100(j)(2) to allow refunding of bonds only in those situations where there is at least a five percent saving in debt service costs. It also amends AS 14.11.100(j)(3) by requiring that the principal on bonds be reimbursed in equal

annual payments over a period of 10 years or a term set by the state bond committee.

Under sec. 12, the Department of Education will continue to allocate money to reimburse municipal debt. However, a cap on reimbursement is placed upon debt authorized by local voters after April 1, 1986. The department may only allocate money for the reimbursement of principal paid on new debt if the new payments, when combined with all other reimbursements under this class of debt, do not exceed the $10,000,000 or an amount set by the state bond committee. This mechanism will have two results. It puts a cap on state-supported debt, but, with discipline, it will enable municipalities to construct needed school projects in addition to those that are financed by bonds authorized by local voters before April 1, 1986.

Section 13 amends AS 14.11.135(3) by changing the definition of school construction costs. It excludes all financing costs for debt authorized by local voters after March 31, 1986.

Section 14 adds three new sections to AS 35.15. Under the proposed language, the Department of Transportation and Public Facilities will estimate the costs of all school construction projects under common design standards that it will develop.

Section 15 amends AS 37.15 to give the state bond committee the ability to manage state-supported school debt, which is accomplished under two different mechanisms. First, it may establish a higher or lower ceiling for allocations for reimbursement of new authorizations of school debt under AS 14.11.100(a)(6) (found in sec. 6), depending on the state's credit standing as well as on the needs for school construction. Second, it may control the term of the obligations to ensure that their maturity structure does not adversely affect the state's credit standing. While a 10-year term is allowed by the proposed provisions of AS 14.11.100(j)(2) (found in sec. 10), the committee is accorded the ability to set a different term when it is in the state's best interest.

It is our intent with the language in sec. 17 to develop a long range plan for the state's school construction through the end of the century. The necessary components of this plan would include projected enrollments under reasonable population projections, construction costs, design parameters, and financing techniques. It is our hope that,

after the completion of the plan, a rational mechanism can be put in place to provide for the state's public school construction needs which is within the state's ability to pay.

III.

Continued economic prosperity for all sectors of the Alaska economy is in part inextricably tied to more rigorous state debt management. These two bills, as well as legislation relating to responsible limitation on municipal debt, promote more responsible state debt management. Alaska's credit standing is, of course, in part dependent on factors beyond our control. That the state cannot control all relevant factors is no excuse, however, for the inadequate management of those factors within our control. I believe that it is critical that the state become more sensitive to the long-term credit implications of each isolated funding decision. These two bills provide for responsible yet flexible state debt management, and I urge your prompt consideration and approval of these measures.

Sincerely,

Bill Sheffield

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to establish a Municipal Financial Emergency Commission that will provide assistance to municipalities that are in default on bonded indebtedness.

Recent controversy surrounding the financial practices of the North Slope Borough has led to a greater sensitivity to the consequences of local financial disorder. While there is absolutely no indication that the present problems of the North Slope Borough will have any effect on the borough's ability to satisfy all debt service obligations, the controversy has led to concern that current law does not provide a role for the state in the event of a municipal default. It bears noting that a municipal default will inevitably affect the state and other municipalities as well. While each municipality's general obligation debt is of course a direct financial burden of only the issuing municipality, the practical fact is that all governmental entities in the state share, to one degree or another, in the consequences of a municipal default. While I reiterate that there is no present prospect of municipal default, it is imperative to establish a procedure to deal with that event before a financial crisis occurs -- not in response to one.

The bill proposes the establishment of the Municipal Financial Emergency Commission which consists of the commissioners of the Departments of Community and Regional Affairs, Revenue, and Administration. Under proposed AS 29.58.420, a municipality must provide notice of a default to the commission, or the municipality may request the assistance of the commission in anticipation of financial distress. Once the commission receives notice of a municipality in financial disarray, the commission must

promptly convene and assess the municipality's financial affairs.

Under proposed AS 29.58.410, the commission enjoys extraordinarily broad powers to assure, to the extent possible, the resolution of the financial crisis. The fundamental objective of the commission is to adopt a plan that satisfies debt service obligations in a manner acceptable to municipal creditors. The commission enjoys the power to issue subpoenas and orders as are necessary to undertake this task.

I certainly anticipate that a municipality will act to implement the plan adopted by the commission. However, the bill provides that, in the unlikely event that a municipality fails to implement the plan, or if the commission determines that the municipality remains in financial disarray, the commission may assume full control of the defaulting municipality's financial affairs. This extraordinary intrusion upon local governmental prerogatives can only be exercised in narrowly prescribed instances and, as do all of the commission's powers, the authority of the commission expires upon the successful satisfaction of the default. While certain of these broad powers may approach the legal limit of the state's authority to impair local government powers, I believe that the overwhelming public concern for the financial stability of all Alaskan communities offers a compelling justification for this possible intrusion.

I again emphasize that this bill does not foretell any municipal default. In the area of municipal finance, however, it is not sufficient to act only in response to events. Instead, it is far preferable to establish a mechanism before any default, so that if a municipality does default on a debt service obligation, the repercussions to the state and to other municipalities are limited to the extent possible. With due respect for the prerogatives of local governments, I believe that this bill provides a needed mechanism for state involvement. I urge your prompt consideration and passage of this bill.

Sincerely,

Bill Sheffield

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 27, 1986

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
P.O. Box V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that will establish a reasonable limit on the authority of a municipality or borough to issue general obligation bond debt.

At present, there is no limit as to the amount of general obligation debt that municipalities may incur. And, while taxing limits are generally prescribed by statute, current law specifically exempts from the taxing limitation any assessments necessary to satisfy debt service obligations. The potential for excessive municipal debt burdens -- a burden that both directly and indirectly affects the state and other municipalities -- is one which simply must be controlled.

I believe that reasonable general obligation bond debt limitations are essential to preserve the financial stability of Alaska municipalities. We are all aware that the level of per capita municipal debt in Alaska far exceeds the national average. To be sure, the lack of basic public services in many areas of the state contributes to the current level of debt. While I am certainly sensitive to the extreme, and at times costly, needs of rural communities, I am equally concerned that excessive municipal debt will only undermine the substantial economic progress enjoyed by all Alaska communities in the last several years.

The problems associated with excessive debt requirements will increase in the future. As state revenues decline,

municipalities will increasingly be responsible for the cost of governmental services, and this inevitable burden will only be further compounded if municipalities are saddled with excessive debt service obligations.

The bill proposes that a municipality may not incur additional general obligation debt if, upon issuance, the municipality's general obligation debt would exceed seven percent of the market value of property which is taxable under state law. The Department of Community and Regional Affairs is currently required by statute to ascertain annually the property value necessary for this limit. That only three communities -- the North Slope Borough, the cities of Nenana and Wrangell -- exceed the seven percent standard is indicative that the limit is reasonable, and will not unfairly limit the prerogatives of local governments.

It is equally important to note what the bill does not do. The bill does not limit in any manner a municipality's authority to levy taxes in order to satisfy debt service obligations. The bill does not limit a municipality's authority to issue revenue or refunding bonds. And finally, the bill does not penalize those municipalities that have issued debt in excess of the seven percent standard.

I believe that the bill provides a needed assurance that municipalities will not incur an unsupportable debt burden. Establishment of a debt ceiling greatly diminishes the prospect of a municipal default. It also prevents a decline in state revenues as municipal assessments are increased to support an ever-increasing debt burden. I urge your prompt passage of this legislation.

Sincerely,

Bill Sheffield

IN THE HOUSE

BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

CS FOR HOUSE BILL NO. 519 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

(5) borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770 and approved by law; an appropriation does not constitute approval by law for purposes of this paragraph;

(6) do and have done all matters necessary for the purpose of any function set out [FORTH] in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to

annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The board may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.-010 - 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770 and the building has been approved by law. An appropriation for the building does not constitute approval by law for purposes of this section.

* Sec. 5. AS 18.55.140 is amended by adding a new subsection to read:

(b) Bonds issued by the authority for public buildings must be

issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 - 18.55.290.

* Sec. 6. AS 18.55.288 is amended by adding a new paragraph to read:

(4) "bond" means any bond, note, interim certificate, debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.010 - 18.55.290;

* Sec. 7. AS 22.05.025 is amended by adding a new subsection to read:

(c) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The supreme court may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 8. AS 24.23 is amended by adding new sections to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing

Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under this subsection, the agency shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The agency may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 9. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 - 37.05.-280. A [NO] lease or contract for a lease may not provide for a period of occupancy greater than 40 years. A lease agreement must provide that lease payments are subject to annual appropriation. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

* Sec. 10. AS 37.05 is amended by adding a new section to read:

Sec. 37.05.285. LEASE FINANCING. The department may enter into

lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The department may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 11. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in <u>the</u> [SUCH] manner [AS] it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder <u>or bidders</u>. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 12. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE. There is created <u>within the Department of Revenue</u> a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee <u>IN THE</u>

DEPARTMENT~~E~~ shall act as a member of the committee in the member's place.

* Sec. 13. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee shall be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 14. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

* Sec. 15. AS 37.15.140 is amended by adding new subsections to read:

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show

(1) all outstanding debt of debt-issuing entities of the state;

(2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt;

(3) which long-term debt is state supported and which is supported only by revenue attributable to the project being financed

by the debt;

(4) all long-term capital lease obligations of the state;

(5) the volume of short-term debt issued and retired during the year by debt-issuing entities of the state;

(6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt; STATE GUARANTEE BONDS

(7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and

(8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 16. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 17. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in the manner, price or prices, [SUCH] amounts or series, and at the [SUCH] time or times [AS]

determined by the committee at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS IN SUCH MANNER AS IT MAY PRESCRIBE. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE SHALL BE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT THE BIDS RECEIVED ARE NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDERS, IT MAY REJECT ALL BIDS RECEIVED.] The bonds, or each series of them, shall be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest shall be payable annually or semiannually.

* Sec. 18. AS 37.15.460 is amended to read:

Sec. 37.15.460. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide where a [WHETHER THE] notice of sale, if any, is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.450].

* Sec. 19. AS 37.15.650(a) is amended to read:

(a) The toll facilities bonds are sold in the manner, price or prices, amounts or series, and at the time as determined by the committee, at either public or private sale. [BEFORE SELLING A SERIES OF

BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE ARE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT A BID RECEIVED IS NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDER, THE COMMITTEE MAY REJECT THE BID RECEIVED.] Bonds, or a series of bonds, may not be sold if the effective interest rate over the life of the bonds exceeds 11 percent per year or that rate of interest that is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest is payable annually or semiannually.

* Sec. 20. AS 37.15.660 is amended to read:

Sec. 37.15.660. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale, and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions, and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.650].

* Sec. 21. AS 37.15 is amended by adding new sections to read:

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public

buildings; and

(2) the University of Alaska.

(b) The committee may review the general programs and financing plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

G.O. DEBT

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or

retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interest of the state, the committee may

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, that may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 22. AS 39.25.120(c) is amended by adding a new paragraph to read:

(19) employees of the state bond committee.

* Sec. 23. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE HOUSE

BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

CS FOR HOUSE BILL NO. 519 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

~~(5)~~ borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770;

(6) do and have done all matters necessary for the purpose of any function set out [FORTH] in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the

legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The board may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.010 - 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

* Sec. 5. AS 18.55.140 is amended by adding a new subsection to read:

(b) Bonds issued by the authority for public buildings must be issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 - 18.55.290.

* Sec. 6. AS 18.55.288 is amended by adding a new paragraph to read:

(4) "bond" means any bond, note, interim certificate, debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.010 - 18.55.290;

* Sec. 7. AS 22.05.025 is amended by adding a new subsection to read:

(c) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to e issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The supreme court may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 8. AS 24.23 is amended by adding new sections to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under

this subsection, the agency shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The agency may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 9. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 - 37.05.280. A [NO] lease or contract for a lease may not provide for a period of occupancy greater than 40 years. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

* Sec. 10. AS 37.05 is amended by adding a new section to read:

Sec. 37.05.285. LEASE FINANCING. The department may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement

under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The department may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 11. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in <u>the</u> [SUCH] manner [AS] it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder <u>or bidders</u>. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 12. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE. There is created <u>within the Department of Revenue</u> a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee [IN THE DEPARTMENT] shall act as a member of the committee in the member's place.

* Sec. 13. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee shall be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 14. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

* Sec. 15. AS 37.15.140 is amended by adding new subsections to read:

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show

(1) all outstanding debt of debt-issuing entities of the state;

(2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt;

(3) which long-term debt is state supported and which is supported only by revenue attributable to the project being financed by the debt;

(4) all long-term capital lease obligations of the state;

(5) the volume of short-term debt issued and retired during

the year by debt-issuing entities of the state;

(6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt;

(7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and

(8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 16. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 17. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in the manner, price or prices, [SUCH] amounts or series, and at the [SUCH] time or times [AS] determined by the committee at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS IN SUCH MANNER AS IT MAY PRESCRIBE. IF SATISFACTORY BIDS

ARE RECEIVED, THE BONDS OFFERED FOR SALE SHALL BE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT THE BIDS RECEIVED ARE NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDERS, IT MAY REJECT ALL BIDS RECEIVED.] The bonds, or each series of them, shall be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest shall be payable annually or semiannually.

* Sec. 18. AS 37.15.460 is amended to read:

Sec. 37.15.460. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.450].

* Sec. 19. AS 37.15.650(a) is amended to read:

(a) The toll facilities bonds are sold in the <u>manner, price or prices,</u> amounts or series<u>,</u> and at the time as determined by the committee<u>, at either public or private sale</u>. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE ARE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT A

BID RECEIVED IS NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDER, THE COMMITTEE MAY REJECT THE BID RECEIVED.] Bonds, or a series of bonds, may not be sold if the effective interest rate over the life of the bonds exceeds 11 percent per year or that rate of interest that is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest is payable annually or semiannually.

* Sec. 20. AS 37.15.660 is amended to read:

Sec. 37.15.660. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale, and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions, and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.650].

* Sec. 21. AS 37.15 is amended by adding new sections to read:

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public buildings; and

(2) the University of Alaska.

(b) The committee may review the general programs and financing

plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interest of the state, the committee may

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, that may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 22. AS 39.25.120(c) is amended by adding a new paragraph to read:

(19) employees of the state bond committee.

* Sec. 23. This Act takes effect immediately in accordance with AS 01.-10.070(c).

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 521

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the issuance of municipal general obligation bonds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 29.47.190(b) is amended to read:

(b) Before a general obligation bond issue election, the governing body shall have published a notice of the total existing bond indebtedness at least once a week for three consecutive weeks. The first notice must (SHALL) be published at least 20 days before the date of the election. A notice must (SHALL) include

(1) the current total general obligation bonded indebtedness, including authorized but unsold bonds, of the municipality and the current total general obligation bonded indebtedness, including authorized but unsold bonds, of any other municipalities which may be payable from taxes on taxable property in the municipality;

(2) the cost of the debt service on the current

indebtedness;

(3) the total assessed value of <u>taxable</u> property in the municipality;

<u>(4) the full value of taxable property as determined by the Department of Community and Regional Affairs under AS 14.17.140</u>.

* Sec. 2. AS 29.47 is amended by adding a new section to read:

Sec. 29.47.195. LIMITATION ON MUNICIPAL DEBT. (a) No general obligation bond authorization shall be finally adopted by a municipality unless the net debt of the municipality at the time of adoption of the bond authorization does not exceed 7 percent of average assessed valuation.

(b) Notwithstanding the provisions in (a) of this section, a bond authorization may be finally adopted if the bond authorization authorizes obligations solely for one of the following:

(1) to meet an expenditure which is the result of a natural disaster;

(2) to meet an expenditure which is necessary to protect the public health;

(3) for a purpose which is self-liquidating; or

(4) to refund existing debt.

(c) For purposes of this section the following terms shall have meanings as follows:

(1) "average assessed valuation" means the average of the full value of taxable property for the last two years as determined by the Department of Community and Regional Affairs under AS 14.17.140.

(2) "bond" or "debt" means bonds, notes, or other obligations.

(3) "bond authorization" means the action completed after the bond election by the governing body of the municipality which authorizes a specific amount of general obligation debt of the municipality for a specified purpose but need not include action to fix the rate or rates of interest on the debt or include action to fix further details of the debt or action to sell the debt.

(4) "self liquidating debt" is debt for which the cash receipts from fees, rents, or other charges (other than taxes) in a fiscal year pledged to pay the debt are sufficient to meet operating and maintenance costs (exclusive of depreciation and obsolescence) and interest and debt redemption charges payable or accruing in such year without recourse to general taxation.

(5) "net debt" means all general obligation debt issued, and all general obligation debt authorized but not issued, after deducting the following general obligation debt issued and authorized but not issued:

(A) bond anticipation notes;

(B) revenue anticipation notes issued

pursuant to Art. IX, Section 10, Alaska Constitution;

(C) self-liquidating debt; and

(D) debt for which there are funds on hand or sinking funds pledged to the payment thereof including the proceeds of any bonds or notes held for that purpose.

* Sec. 3. AS 29.10.200 is amen ed by adding a new subsection to read, and renumbering existing subsections accordingly:

(42) AS 29.47.195 (limitation on municipal debt)

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.070(c).

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 521

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the issuance of municipal general obligation bonds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.47.190(b) is amended to read:

(b) Before a general obligation bond issue election, the governing body shall have published a notice of the total existing bond indebtedness at least once a week for three consecutive weeks. The first notice must (SHALL) be published at least 20 days before the date of the election. A notice must (SHALL) include

(1) the current total general obligation bonded indebtedness, including authorized but unsold bonds of the municipality;

(2) the cost of the debt service on the current indebtedness;

(3) the total assessed value of taxable property in the municipality;

(4) the full value of taxable property as determined by the Department of Community and Regional Affairs under AS 14.17.140.

* Sec. 2. AS 29.47 is amended by adding a new section to read:

Sec. 29.47.195. LIMITATION ON MUNICIPAL DEBT. (a) No general obligation bond authorization shall be finally adopted by a municipality unless the net debt of the municipality at the time of adoption of the bond authorization does not exceed seven percent of average assessed valuation.

(b) Notwithstanding the provisions in (a) of this section, a bond authorization may be finally adopted if the bond authorization authorizes obligations solely for one of the following:

(1) to meet an expenditure which is the result of a natural disaster;

(2) to meet an expenditure which is necessary to protect the public health;

(3) for a purpose which is self-liquidating; or

(4) to refund existing debt.

(c) For purposes of this section the following terms shall have meanings as follows:

(1) "average assessed valuation" means the average of the full value of taxable property for the last two years as determined by the Department of Community and Regional Affairs under AS 14.17.140.

(2) "bond" or "debt" means bonds, notes or other obligations.

(3) "bond authorization" means the action completed after the bond election of the governing body of the municipality which authorizes a specified amount of general

obligation debt of the municipality for a specified purpose but need not include action to fix the rate or rates of interest on the debt or include action to fix further details of the debt or action to sell the debt.

(4) "self liquidating Debt" is debt for which the cash receipts from fees, rents or other charges (other then taxes) in a fiscal year pledged to pay the debt are sufficient to meet operating and maintenance costs (exclusive of depreciation and obsolescence) and interest and debt redemption charges payable or accruing in such year without recourse to general taxation.

(5) "net debt" means all general obligation debt issued, and all general obligation debt authorized but not issued, after deducting the following general obligation debt issued, and authorized but not issued:

(a) as bond anticipation notes in anticipation of bonds;

(b) as revenue anticipation notes issued pursuant to Art. IX, Section 10, Alaska Constitution;

c. as self-liquidating debt; and

d. for which there are funds on hand or sinking funds applicable to the payment thereof only including the proceeds of any bonds or notes held for that purpose and any accounts receivable or amounts which may be payable from the United States, the state or any public instrumentality thereof, which funds are applicable only to the payment of any part of the debt not otherwise deductible.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

Introduced: 1/27/86
Referred: House Special Committee on State Loans, Judiciary and Finance

(LANDLORD) (TENANT) ASHA. MEMORANDUM OF REAL ESTATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

IN THE HOUSE

HOUSE BILL NO. 519

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

(5) borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770;

(6) do and have done all matters necessary for the purpose of any functions set forth in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the

legislature and to the state bond committee. The notice must include the anticipated annual lease payment and the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority The board may not enter into an agreement under this section until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.-010 -- 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. (a) The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

(b) Bonds issued by the authority for public buildings must be issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 -- 18.55.290.

* Sec. 5. AS 18.55.288 is amended to read:

Sec. 18.55.288. DEFINITIONS. In AS 18.55.010 -- 18.55.290[:]

(1) "authority" means the Alaska State Housing Authority;

(2) "bond" means any bond, note, interim certificate,

debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.-010 -- 18.55.290 ["PUBLIC BUILDINGS" MEANS A PUBLICLY OWNED STRUCTURE LEASED TO THE STATE FOR GOVERNMENTAL, PUBLIC OR EDUCATIONAL USE];

(3) "project site" means area devoted for a public housing project;

(4) "public buildings" means a publicly owned structure leased to the state for governmental, public, or educational use.

* Sec. 6. AS 22.05.025 is amended to read:

Sec. 22.05.025. COURT FACILITIES. (a) The supreme court has authority over all matters relating to the planning, design, construction, maintenance, occupancy, leasing, and operation of all court facilities and shall cooperate and coordinate with the Department of Transportation and Public Facilities so that court facility construction projects are carried out in accordance with the statutes and regulations applicable to state public works projects.

(b) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment and the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority. The supreme court may not enter into an agreement under this subsection until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

(c) In this section, "court facility" means a state facility in

which 75 percent or more of the net usable space is occupied by the court system and other justice-related agencies.

* Sec. 7. AS 24.23 is amended by adding a new article to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees. The Legislative Affairs Agency shall adopt regulations that establish procedures for the lease of space which are substantially comparable to the procedures under AS 37.05.280 governing the lease of space for state agencies.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under this subsection, the agency must provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment and the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority. The agency may not enter into an agreement under this section until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

* Sec. 8. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. (a) The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 -- 37.05.280. No lease or contract for a lease may provide for a period

of occupancy greater than 40 years. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

(b) The department may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment and the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority. The department may not enter into an agreement under this subsection until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

* Sec. 9. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in such manner as it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder or bidders. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 10. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE.

There is created within the Department of Revenue a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee [IN THE DEPARTMENT] shall act as a member of the committee in the member's place.

* Sec. 11. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee must [SHALL] be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 12. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. (a) The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show (1) all outstanding debt of debt-issuing entities of the state; (2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt; (3) which long-term

debt is state supported and which is supported only by revenue attributable to the project being financed by the debt; (4) all long-term capital lease obligations of the state; (5) the volume of short-term debt issued and retired during the year by debt-issuing entities of the state; (6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt; (7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and (8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 13. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 14. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in such amounts or series and at such time or times as determined by the committee. Before selling a

series of bonds, the committee shall give notice inviting sealed bids in such manner as it may prescribe. If satisfactory bids are received, the bonds offered for sale must [SHALL] be awarded to the highest responsible bidder or bidders. If the committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received. The bonds, or each series of them, must [SHALL] be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest must [SHALL] be payable annually or semiannually.

* Sec. 15. AS 37.15 is amended by adding a new article to read:

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public buildings; and

(2) the University of Alaska.

(b) The committee may review the general programs and financing plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interests of the state, the committee may

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, which may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 16. AS 39.25.120(c) is amended by adding a new paragraph to

read:

(19) employees of the state bond committee.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Juneau, Alaska 99811

Re: House Bill No. 521

Dear Representative Sund:

In case I cannot testify at your Loans Committee hearing on House Bill 521, I would like to submit this letter in the record to point out some of the technical deficiencies in this Bill.

The Bill creates a limit on municipal general obligation bonded debt. The limit created is that general obligation bonded debt cannot exceed 7% of the full property value of the municipality as determined by the Department of Community and Regional Affairs under AS 14.17.140. Exceptions are refunding bonds or self-supporting debt even though such debt may also be general obligation debt of the municipality.

For the purposes of this letter and for your hearing record this week, I call to your attention the following shortcomings of House Bill 519:

1. It is generally conceded that "authorization" debt limits are more efficient and effective then the "issuance" debt limit proposed here. An authorization debt limit provides that the authorizing document may not finally be adopted if the debt authorized would cause debt to exceed a certain percentage of assessed valuation. This is desirable to permit effective and efficient planning of municipal improvements so that expenditures may be made with assurances that they will be bond funded.

REFUNDING

2. In common with other States the New Jersey Local Bond Law (NJSA 40:A) provides for an average of assessed valuation over the last three years. Under House Bill 519 the debt limit may change annually and perhaps suddenly when the Department of Community and Regional Affairs makes its AS 14.17.140 determination. An average figure of two or more years is suggested.

3. The attempt to provide for the overlapping indebtedness situation in section 2(b) is defective. This provision will not work as an independent municipality cannot share the debt limit of another municipality. Conceivably each will be pitted in a race against each other to exhaust the authorized indebtedness limitation which applies to both.

#521 (%)

4. Many debt limit provisions have a list of exceptions which would permit indebtedness raised to meet the effects of a natural disaster or to prevent a menace to public health as well as for refund purposes or when the debt is "self-liquidating". Despite the fact that other legislation introduced expands the power of the State Bond Committee, this Bill fails to permit exceptions to the debt limit for cases of public emergency upon the approval of any official body or person.

5. The bill does not define "bond" and we are left to speculate whether or not short-term notes including revenue anticipation notes are included within the overall limit.

6. The Bill does not specify the extent to which it controls home rule municipalities, if at all.

7. Finally the Bill should have an effective date as of July 1 or October 1 so that public bond issuing planning can proceed without being impeded.

PASSAGE - CERTAIN

Very truly yours,

Eric E. Wohlforth

MEMORANDUM

TO: Representative John Sund

ATTN: John Hartle

FROM: Mary Jennings
Legislative Analyst

RE: Bonded Indebtedness of Schools in Alaska
Research Request 86-063

You requested a short history of the State program which reimburses construction costs incurred by schools in Alaska. You also requested a tabulation of debt by election district and the amount of the debt covered by the State.

History

Under AS 14.11.100 (originally enacted in 1970 as AS 43.18.100), the State reimburses municipalities 50, 80, 90, or 100 percent of cash expenditures on school construction and debt service on bonds issued to finance school construction. The percentage depends on the year in which the costs were incurred or the debt was issued. School construction costs in Regional Education Attendance Areas (REAAs) are paid by the State and are not included in the reimbursement program.

Although the statute specifies reimbursement rates, the actual amount reimbursed through the program is dependent on annual legislative appropriations to the school construction account and on the amount of cigarette tax receipts allocated to the districts. Historically, appropriations have usually been sufficient to fully fund the level of payments authorized by statute. When amounts in the account are insufficient, the available funds are allocated pro rata among the eligible districts. This was done in FY 79, FY 80, and FY 83.

The 1970 statute provided for a two-year lag between the debt service payment by the municipality and reimbursement by the State. This lag does not apply to debt authorized by the voters after June 30, 1983,

but it still applies to all cash payments. The 1970 statute also stated that reimbursement of debt service is "exclusive of any funds from state or federal sources", which includes cigarette tax receipts. This language continues to be applied.

Table 1 contains a chronology of changes in the percentage of school construction costs reimbursed by the State. The first column lists the percentage of coverage for bonds, notes, or other indebtedness. The second column lists the coverage for cash payments made by the muncipality to pay the costs of school construction, additions to schools, and major rehabilitation projects.

For municipalities that constructed schools with cash prior to the enactment of the reimbursement law, the State bases payments on the debt service costs that would been incurred if the municipality had issued debt securities of 10 years' duration bearing interest at the rate of six percent per year.

Debt

Table 2 shows the amount of school debt outstanding at the end of FY 84 and 85. The percentage of school debt covered by the State is a blending of reimbursement rates in effect for the years in which the debt was incurred.[1] The figures represent maximum potential coverage; they will be realized only if full funding is available every year and there are no cigarette tax receipts.

---

[1]The Department of Revenue has not yet compiled debt coverage figures for FY 85. The information is expected to be available in March.

Table 1

History of Changes in the Percentage of School Construction Costs Reimbursed by the State of Alaska

	Percentage Reimbursement by the State on Debt Service of the Municipality	Percentage Reimbursement by the State for Cash Payments made by the Municipality
1970	50 percent	0 percent
1971		50 percent*
1972	75 percent (Vocational Education)	
1973		50 percent
1977	100 percent before 7-1-77 50 percent After 7-1-77	100 percent Before 7-1-76 50 percent After 7-1-77
1978	80 percent After 6-30-77	80 percent After 6-30-76
1982	90 percent After 6-30-77	90 percent After 6-30-76
1983	50 percent After 6-30-83	50 percent After 6-30-83
1985	80 percent After 6-30-83	80 percent After 6-30-83

*For municipalities that constructed schools with cash prior to 1973, the State bases payments on the debt service cost that would have been incurred if the municipality had issued debt securities of 10 years duration bearing interest at the rate of six percent per year. The 1973 amendments allowed recovery of the entire amount of cash payments made two years prior to the current year.

Prepared by the House Research Agency, January 1986.

*Parts of the Kenai school district are in four different election districts. Because the majority of the school district is in election district five, we have attributed all Kenai school district debt to election district five.

Note: Election District 25 contains Rural Education Attendance Areas. There is no debt outstanding because construction costs are paid by the State.

Prepared by the House Research Agency January 21, 1985

Table 2 also shows the State and local shares of school district debt service for the period FY 79 through FY 85.[2] The column labeled "Cigarette Tax" refers to the school district's share of cigarette tax receipts.[3] The cigarette tax is an excise tax of two and one-half mills on the value of all cigarettes imported or acquired in the state. These proceeds and those derived from manufacturer, retailer, and vendor machine license fees are paid into a State fund entitled "School Fund" and are used exclusively to rehabilitate, construct, and repair the State's school facilities and for the insurance to cover these activities. The allocation of this tax is independent of the amount of debt service and/or construction activity of school districts.

The "Calculated State Share" indicates the amount of debt service the State would have reimbursed if cigarette tax allocations were not deducted from the State's share. The "Actual State Reimbursement" is payments net of the cigarette tax allocations. The "Calculated Local Share" and the "Actual Local Share" are the municipalities' shares of debt service before and after deducting cigarette tax, respectively.

Generally, the cigarette tax allocations, actual State reimbursement, and actual local share add up to 100 percent of debt service costs. However, there are some cases where cigarette tax allocations exceed the State and/or State plus local share of debt service. Kake, Norton Sound and King Cove had the local share of debt service reduced by "surplus" cigarette tax allocations.

The average actual State reimbursement of debt service was 84 percent, the average local share was 11 percent, and cigarette tax allocations covered the remaining five percent.

I have attached AS 14.11.100, giving the current percentages of reimbursement and years to which the two-year lag applies. Also attached are amendments to this statute. If you have any questions about this memorandum, or if we can be of further assistance, please contact us.

[2]Although data for earlier years may be available from the Department of Education, FY 79 is the earliest data we have on file.

[3]In a given year, the Cigarette tax allocation made two years prior is deducted from the State's share of debt service. Table 2 shows the cigarette tax receipts distributed between 1977 and 1983.

Sec. 14.11.100 State aid for retirement of school construction debt. (a) During each fiscal year, the state shall allocate to a municipality that is a school district, the following sums:

(1) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 90 percent of

(A) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the municipality during the fiscal year two year earlier to pay costs of school construction;

(3) 90 percent of

(A) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 and before January 1, 1982 to pay costs of school construction projects approved under AS 14.07.020(11);

(B) cash payments made after June 30, 1978 and before July 1, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11);

(4) subject to (h) and (i) of this section up to 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981, and authorized by the qualified voters of the municipality before July 1, 1983, to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982, and before July 1, 1983, by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(C) payments made by the municipality during the current year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are submitted to the Department of Education for approval under AS 14.07.020(11) before July 1, 1983, and approved by the qualified voters of the municipality before October 15, 1983, not to exceed a total project cost of (i) $6,600,000 if the annual growth rate of average daily membership of the municipality is more than 7 percent but less than 12 percent, or (ii) $20,000,000 if the annual growth rate of average daily membership of the municipality is 12 percent or more; payments made by a municipality under this paragraph on total project costs that exceed the amount set out in (i) and (ii) of this paragraph are subject to (a)(5)(A) of this section.

(5) subject to (h), (i) and (j) of this section, 80 percent of

(A) payments made by the municipality during the fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness authorized by the qualified voters of the municipality after June 30, 1983 to pay costs of school construction, additions, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1983 by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

(b) The commissioner shall administer the program of reimbursement authorized under this section and shall provide by regulation for the filing of applications for reimbursement, the form of proof of costs for which application for reimbursement is made, and other regulations necessary to administer the program. The commissioner shall exclude from the total school construction cost of the local district all state and federal funds included in these costs except funds provided under this section and AS 43.50.140. In approving applications for reimbursement, the commissioner shall

(1) Offset against the amount of reimbursement authorized the amount of any funds distributed to the borough or city in the second preceding fiscal year from the school fund provided for in AS 43.50.140;

(2) Repealed. (Sec. 10 ch 92 SLA 1982)

(c) The school construction account is established. Funds to carry out the provisions of this section may be appropriated annually by the legislature to the account. If amounts in the account are insufficient for the purpose of providing the share to which a borough or city is entitled under this section, those funds that are available shall be distributed pro rata among the eligible local governments.

(d) Money in the school construction account which, at the end of the fiscal year for wnich the money is appropriated, exceeds the amount required for the allocations authorized in this section reverts to the general fund.

(e) The commissioner shall annually provide a report to the legislature on allocations of state aid made under this section, including but not limited to, the amount of state aid paid on a per capital and per student basis and the resultant effect on the rate of levy of taxes by the municipality for educational purposes.

(f) Repealed. (Sec. 17 ch 147 SLA 1978)

(g) Repealed. (Sec. 47 ch 6 SLA 1984)

(h) An allocation under (a)(4) or (5) of this section for school construction begun after July 1, 1982, shall be reduced by the amount of money used for the construction of residential space, hockey rinks, planetariums, saunas, and other facilities for the single purpose of sporting or recreational uses that are not suitable for other activities and the money used for construction that exceeds the amount needed for construction of a facility of efficient design as determined by the department. An allocation under (a)(4) or (5) of this section may not be reduced by the amount of money used for construction of a small swimming pool, tank, or water storage facility used for water sports. However, an allocation shall be reduced by the difference between the amount of money used to construct a swimming pool that exceeds the standards adopted by the department and the amount of money that would have been used to construct a small swimming pool, tank, or water storage facility, as determined by the commissioner.

(i) For the purpose of (a)(4) and (5) of this section

(1) an indebtedness for bonds is incurred after the bonds are sold;

(2) reimbursement for a cash payment may only be made after the payment is made to a vendor; and

(3) payments may not be made for costs that are incurred under a contract after the contract has been released.

(j) The state may not allocate money to a municipality for a school construction project under (a)(5) of this section unless the municipality complies with the requirements of (1) - (4) of this subsection and the project is approved by the commissioner before the local vote on the bond issue for the project. In approving a project under this subsection, the commissioner shall require

(1) the municipality to include on the ballot for the bond issue the estimated total cost of each project including estimated annual operation and maintenance costs and the estimated amounts that will be paid by the state and by the municipality;

(2) that the bonds may not be refunded unless the annual debt service on the refunding issue is not greater than the annual debt service on the original issue;

(3) that the bonds must be repaid in approximately equal annual principal payments or approximate equal debt service payments over a period of at least 10 years.

(k) An amount equal to the interest earned on the investment of the proceeds of bonds issued for a school construction project shall be used by the municipality to

(1) pay the costs of the project;

(2) pay accrued interest on the bond issue;

(3) redeem all or part of the bonds; or

(4) pay the costs of issuing the bonds;

(4) the municipality to demonstrate need for the project by establishing that the school district has

(A) projected long-term student enrollment that indicates the district has inadequate facilities to meet present or projected enrollment; or

(B) facilities that require repair or replacement in order to meet health and safety laws or regulations or building codes.

Sec. 14.11.102. EVALUATION OF PROJECTS. The department shall evaluate projects for which retirement of school construction debt is requested by school districts in accordance with the procedures set out in AS 14.11.010. A request for an allocation of funds under AS 14.11.100 must be submitted to the department by the school district no later than October 15 of the fiscal year before the fiscal year for which the request is made.

Sec. 14.11.105. Public School facilities construction advance account. The public school facilities construction advance account is established. The account consists of appropriations for distribution under AS 14.11.105-14.11.135 to boroughs and cities which are school districts to assist in paying the costs of the public school facilities projects approved under AS 14.07.020(11) for which construction is commenced after June 30, 1978 and for which no bonding, notes, or other indebtedness was incurred before July 1,1978. (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.110. Eligibility. Eligibility of a proposed construction project for funding assistance under AS 14.11.105-14.11.135 shall determined by the department based on standards and criteria established by regulation. The standard and criteria to be considered in determining eligibility include the following:

(1) emergency requirements;

(2) number of unhoused students;

(3) new elementary or secondary programs;

(4) existing community and school facilities and their condition; and

(5) economic and social stability of the community. (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.115. State Aid. (a) The amount of state aid payable in advance under AS 14.11.105-14.11.135 is the amount by which the cost of construction of the approved school construction project would cause the debt-to-valuation ratio of the municipality to exceed 12 percent.

(b) A payment under (a) of this section is limited to an amount which, when combined with estimated payments to the school district for the retirement of the principal and interest on bonds, notes or other indebtedness or reimbursement of cash payments for a school construction project for which payment is made under AS 14.11.100(a)(1) or (2) or for an approved school construction project for which payment is made under AS 14.11.100(a)(3), does not exceed 80 percent of the cost of the school construction project.

(c) For purposes of this section,

(1) "debt" means the principal amount of the direct and general obligation indebtedness of the municipality for which all taxable property is subject to taxation to pay the bond, note or other evidence of the debt, determined and reported in accordance with AS 14.17.140(c);

(2) "valuation" means the full and true value of the real and personal property of the municipality determined in accordance with AS 14.17.140(a). (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.120. Application for Aid. (a) The commissioner shall prescribe the necessary forms and procedures to be used in applying for construction cost assistance under AS 14.11.105-14.11.135.

(b) A borough or city which is a school district seeking construction cost aid shall apply to the department by October 15 prior to fiscal year.

(c) Based on the commissioner's review of applications and determination of project eligibility, the commissioner shall recommend to the governor an appropriation of funds for state aid for those projects under AS 14.11.105-14.11.135. (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.125. Conditions of state aid. (a) Funds distributed to a borough or city which is a school district during a school year under AS 14.11.105-14.11.135 shall be received, held, and expended by the district in accordance with the applicable provisions of law and of regulations adopted by the department. Funds provided under AS 14.11.105-14.11.135, but which are not required for the project for which they were granted or which are in excess of that borough's or city which is a district's entitlement for aid under AS 14.11.115 shall be returned to the department and deposited in the general fund.

(b) Each borough or city which is a school district shall maintain financial records of the receipt and disbursement of state funds received under AS 14.11.105-14.11.135 and money provided toward local effort. The records shall be in the form prescribed by the department and are subject to audit by it at any time.

(c) Upon completion of the construction project, the chief school administrator of the district shall report the total cost of the project and means of financing it to the commissioner.

(d) Boroughs and cities that are school district shall secure and maintain in full force and effect adequate property loss insurance for the replacement cost of all facilities constructed after July 1, 1978 and for which state funds are available under AS 14.11.100-14.11.135. (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.130. Construction and Implementation. (a) AS 14.11.105-14.11.135 may not be construed so as to create a debt to the state.

(b) Funds to carry out the provisions of AS 14.11.105-14.11.135 may be appropriated annually by the legislature into the public school facilities construction advance account. If amounts in the account are insufficient to meet the allocations authorized by the commissioner under AS 14.11.105-14.11.135, such funds as are available shall be distributed pro rata among each borough and city which is a school based upon its computed entitlement. (Sec. 13 ch 147 SLA 1978)

Sec. 14.11.135. Definitions. In this chapter, unless the context requires otherwise.

(1) "approved school construction project" means the plan for a new school or an addition to or major rehabilitation of an existing school to the extent to which approved by the commissioner in accordance with AS 14.07.020(11);

(2) "commissioner" means the commissioner of education;

(3) "costs of school construction" means the cost of acquiring, construction, enlarging, repairing, remodeling, equipping or furnishing of public elementary secondary school buildings and includes the sum total of all costs of financing or carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special service, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary;

(4) "department" means the Department of Education.

Sec. 14.11.140. REGULATIONS. The department shall adopt regulations to carry out the purpose of this chapter.

Sec. 9 LEGISLATIVE REVIEW. Proposed permanent regulations under AS 14.11.140 as enacted in sec. 8 of this Act shall be submitted to the legislature no later than the 10th day of the Second Session of the Fourteenth Alaska State Legislature. Notwithstanding AS 44.62, permanent regulations adopted under AS 14.11.140 take effect the 90th day of the Second Session of the Fourteenth Alaska State Legislature, unless a law is enacted disapproving the regulations.

Chapter No. 29

AN ACT

Extending workmen's compensation benefits to firemen in certain situations where they would not otherwise be covered.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.243. EXTENDING COVERAGE TO CERTAIN FIREMEN. (a) For the purposes of workmen's compensation, any injury, disability or death incurred by a fireman by reason of his proceeding to or engaging in a fire suppression or rescue operation, or the protection or preservation of life or property, anywhere in the state shall be considered to have arisen out of and been sustained in the course of employment, and the fire department or regularly organized volunteer fire department of his primary employment or registration is considered to be the employer, except when the injured, at the time of injury or death, is acting for compensation from another.

(b) Nothing in this section requires the extension of benefits to a fireman employed by a home rule or general law municipality which by law or regulation expressly prohibits the activity giving rise to the injury, disability or death.

Approved by governor: March 29, 1971
Actual effective date: June 27, 1971

quantities, shall be made by the commissioner upon recommendations of the director, the state geologist or the United States Geological Survey under AS 41.08.060.

* Sec. 41. AS 38.05.181(s) is amended to read:

(s) Short title. This section may be cited as the Geothermal Resources Act.

* Sec. 42. AS 39.25.110 is amended by adding a new paragraph to read:

(14) commissioners and employees of the Alaska Commercial Fisheries Entry Commission.

* Sec. 43. AS 42.05.351 is amended to read:

Sec. 42.05.351. TESTING OF APPLIANCES. The commission shall provide for the examination and testing of appliances used for the measuring of a service of a public utility, and may purchase equipment, apparatus, and standards required for this purpose. The commissioner of commerce may assign the examination and testing function to the section of weights and measures. Upon the payment of a reasonable fee established by the commission, a consumer may have an appliance, which is used by him, tested. The commission shall establish by regulation allowable tolerances with respect to the functioning or operation of the appliance. If the measuring appliance does not perform within those tolerances, the utility concerned shall pay the cost of the test by reimbursing the person requesting the test for the fee paid by him. This reimbursement shall be made not later than at the time of the next regular billing following the test.

* Sec. 44. AS 43.18.010(h)(4) is amended to read:

(4) funds received by a local government under (1), (2) or (3) of this subsection shall be used for the costs of operation, maintenance, or health services or facilities, as the local government or hospital outside a municipality determines;

* Sec. 45. AS 43.18.040 is amended to read:

Sec. 43.18.040. REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of secs. 10 - 99 of this chapter.

* Sec. 46. AS 43.18.050 is amended to read:

Sec. 43.18.050. SPECIFIC EXPENDITURES. A municipality shall expend funds received for the operation and maintenance of hospitals and health facilities and services under secs. 10 - 99 of this chapter only for those specific facilities and services.

* Sec. 47. AS 43.18.100(g) is amended to read:

(g) In this section, unless the context requires otherwise,

(1) "commissioner" means the commissioner of education;

(2) "costs of school construction" means the cost of acquiring, constructing, enlarging, repairing, remodeling, equipping or furnishing of public elementary and secondary school buildings and includes but is not limited to the cost of acquisition of sites, legal, engineering, fiscal, architectural and other fees of specialists or consultants, costs of labor, materials, equipment and supplies, costs of authorization, issuance and sale of bonds, notes, or other evidences of debt.

* Sec. 48. AS 43.20.335(a) - (e) are amended to read:

(a) A person who wilfully attempts to evade the tax imposed by this chapter is, in addition to other penalties provided by this chapter, guilty of a felony and, upon conviction, shall be fined not more than $5,000, or imprisoned for not more than five years, or both.

(b) A person required under this chapter to collect, account for, and pay over the tax imposed by this chapter who wilfully fails to collect or truthfully account for and pay over the tax is, in addition to other penalties provided by this chapter, guilty of a felony and, upon conviction, shall be fined not more than $10,000, or imprisoned for not more than five years, or both.

(c) A person required under this chapter to pay a tax, make a return, keep records, or supply information, who wilfully fails to pay the tax or estimated tax, make the return, keep the records, or supply the information, is, in addition to other penalties provided by this chapter, guilty of a misdemeanor and, upon conviction, shall be fined not more than $5,000, or imprisoned for not more than one year, or both.

(d) A person who wilfully makes and subscribes a return, statement, or other document required under this chapter which contains or is verified by a written declaration that it is made under the penalties of perjury which he does not believe to be true and correct as to every material matter is, in addition to other penalties provided by this chapter, guilty of a felony and, upon conviction, shall be fined not more than $5,000, or imprisoned for not more than three years, or by both.

(e) A person who wilfully and knowingly aids or assists in, or procures, or counsels the preparation or presentation in connection with any matter arising under this chapter of a return, affidavit, claim, or other document, which is fraudulent or is false as to any material matter is guilty of a felony whether or not the falsity or fraud is with the knowledge or consent of the person required to present the return, affidavit, claim, or document, and, upon conviction, shall be fined not more than $5,000, or imprisoned for not more than three years, or both.

* Sec. 49. AS 44.62.150 is repealed.

* Sec. 50. AS 44.68.020 is amended to read:

* Sec. 24. AS 43.18.010 is amended by adding a new subsection to read:

(1) For the purposes of (j) of this section, "total project cost" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project. These include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

* Sec. 25. AS 43.18.100(g)(2) is repealed and re-enacted to read:

(2) "costs of school construction" means the cost of acquiring, constructing, enlarging, repairing, remodeling, equipping or furnishing of public elementary and secondary school buildings and includes the sum total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

* Sec. 26. AS 43.18.300(h) is amended by adding a new paragraph to read:

(3) "costs of construction" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of

other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary; it does not include the cost of feasibility studies.

* Sec. 27. AS 43.18.460(` is repealed and re-enacted to read:

(2) "cost of construction" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary; it does not include the cost of promotion, travel, or feasibility studies;

* Sec. 28. AS 44.33.150 is amended to read:

Sec. 44.33.150. QUALIFYING FOR MATCHING MONEY. In order to qualify for tourist attraction development matching money, the applicant shall submit and have approved by the director of tourism, a feasibility study of the program to be used for carrying out the development of the tourist attraction. Subject to the provisions of sec. 120(8) of this chapter, matching money may also be secured by an applicant for the cost of construction, improvement or operation of a visitor information center established for the intent of providing Alaska visitors and residents with tourist travel information on a local and statewide basis. This may include printing and distributing travel promotion material about Alaska. In order to qualify for visitor information center matching money, the applicant must first submit and have approved by the director of tourism a feasibility study of the construction, improvement or operation of the visitor information center.

* Sec. 29. AS 44.33.150 is amended by adding a new subsection to read:

(b) For purposes of (a) of this section, "cost of construction" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project. These include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the

LAWS OF ALASKA

1977

Chapter No.

120

AN ACT

Relating to state aid for school construction; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.18.100(a) is repealed and re-enacted to read:

(a) During each fiscal year, the state shall allocate to an organized borough or a city which is a school district, the following sums:

(1) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction, and cash payments made by the borough or city before July 1, 1976 to pay the cost of school construction;

(2) 50 per cent of

(A) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after July 1, 1977 to pay costs of school construction;

(B) cash payments made after July 1, 1977 by the borough or city during the fiscal year two years earlier to pay costs of school construction.

* Sec. 2. AS 43.18.100(b) is amended to read:

(b) The commissioner shall administer the program of reimbursement authorized under this section and shall

provide by regulation for the filing of applications for reimbursement, the form of proof of costs for which application for reimbursement is made, and other regulations necessary to administer the program. The commissioner shall exclude from the total school construction cost of the local district all state and federal funds included in these costs except funds provided under this section and AS 43.50.140. In approving applications for reimbursement, the commissioner shall

(1) offset against the amount of reimbursement authorized the amount of any funds distributed to the borough or city in the second preceding fiscal year from the school fund provided for in AS 43.50.140;

(2) require the borough or city to provide, with its application, a certified copy of the notice to taxpayers required by sec. 30 of this chapter.

* Sec. 3. AS 43.18.100(e) is amended to read:

(e) The commissioner shall annually provide a report to the legislature on allocations of state aid made under this section, including but not limited to, the amount of state aid paid on a per capita and per student basis and the resultant effect on the rate of levy of taxes by the municipality for educational purposes.

* Sec. 4. AS 43.18.030 is amended to read:

Sec. 43.18.030. LOCAL TAX LEVY REDUCTION. (a) The intent of secs. 10 - 100 of this chapter in authorizing state aid for educational purposes and municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year.

(b) If the municipality levies and collects real or personal property taxes, the governing body shall furnish the following notice with tax statements mailed for the fiscal year for which aid is received under AS 14.17 and secs. 10 - 100 of this chapter:

"NOTICE TO TAXPAYER

For the current fiscal year the (city) (borough) has been allocated the following amount of state aid for school and municipal purposes under the public school foundation program (Alaska Statutes 14.17), the municipal services revenue sharing program of Alaska Statutes 43.18.010 - 43.18.050, and the program of state aid for retirement of school construction debt (Alaska Statute 43.18.100):

PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	$
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	$
AID BASED ON MUNICIPAL SERVICES FURNISHED (fire protection, police protection, air or water pollution control, land use planning, road maintenance, parks and recreation, transportation facilities and services, hospital operation)	$
Total Aid	$

The millage equivalent of this state aid, based on the dollar value of a mill in the municipality for the current assessment year and for the previous assessment year, is:

	MILLAGE EQUIVALENT PREVIOUS YEAR
PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	...MILLS
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	....MILLS
AID BASED ON MUNICIPAL SERVICES FURNISHED	....MILLS
TOTAL MILLAGE EQUIVALENT	....MILLS

* Sec. 5. AS 43.18.030 is amended by adding a new subsection to read:

(c) If the municipality levies and collects a general sales tax, the governing body shall provide a notice substantially in the form set out in (b) of this section. In providing notice under this subsection, the governing body shall substitute for the millage equivalent an estimate of the equivalent sales tax rate for all categories of financial assistance set out in this section. Notice shall be provided

(1) by publishing in a newspaper of general circulation within the municipality a copy of the notice once each week for a period of three successive weeks with first publication to occur not earlier than 45 days before the first day of the municipality's fiscal year;

(2) if there is no newspaper of general circulation in the municipality, by posting a copy of the notice for at least 20 days in at least two public places within the municipality, with posting to occur not more than 45 days before the first day of the municipality's fiscal year.

* Sec. 6. This Act takes effect July 1, 1978.

Approved by the Governor: June 14, 1977
Actual Effective Date: July 1, 1978

necessary, the commissioner may require as a condition of an agreement approval of the agreement by the federal government. Regulations adopted, amended or repealed by the department under this section which relate to educational facilities shall be developed in conjunction with the Alaska Association of School Boards and the Alaska Association of School Administrators and reviewed by those associations before final action on the regulations is taken by the department.

* Sec. 8. AS 35.15.090 is amended to read:

Sec. 35.15.090. USE OF APPROPRIATED FUNDS. Upon assumption by a municipality or regional educational attendance area of the department's responsibilities under sec. 80(a)(1) of this chapter, or upon execution of an agreement under sec. 80(a)(2) of this chapter, state funds appropriated for a public works project which is the subject of the assumption or the agreement shall be transferred to a special account in the state treasury. A municipality or regional educational attendance area administering the project under the assumption or agreement may draw on the account for costs of the project, under fiscal control of the department. If an agreement provides for joint or cooperative administration of the project, payment of costs shall be made to the party incurring the costs.

* Sec. 9. AS 35.15.110(a) is amended to read:

(a) Title acceptable to the department to a suitable project site shall be vested in the state before work is begun on the site, except that, if the project involves construction of an educational facility, title or sufficient interest determined acceptable by the department to an approved site for a school building shall be vested in the municipality, the regional educational attendance area or the state before advertisement for bids or initiation of construction contract negotiations.

* Sec. 10. AS 14.07.020 is amended by adding a new paragraph to read:

(10) review plans for construction of new public elementary and secondary schools and for additions to and major rehabilitation of existing public elementary and secondary schools and, in accordance with regulations adopted by the department, determine the extent of eligibility for state aid of a school construction project begun after the effective date of this Act; for purposes of this paragraph, a "plan" includes educational specifications, schematic designs, and final contract documents.

* Sec. 11. AS 14.14.060(e) is amended to read:

(e) The borough school board is responsible for the design criteria of school buildings. To the maximum extent consistent with education needs, a design of a school building shall provide for multiple use of the building for community purposes. Subject to the approval of the assembly, the school board shall select the appropriate professional personnel to develop the designs. The school board shall submit preliminary and subsequent designs for a school building to the assembly for approval or disapproval;

if the design is disapproved, a revised design shall be prepared and presented to the assembly. A design or revised design approved by the assembly shall be submitted by the board to the department in accordance with AS 14.07.020(10).

* Sec. 12. AS 43.18.100(a) is repealed and re-enacted to read:

(a) During each fiscal year, the state shall allocate to an organized borough or a city which is a school district, the following sums:

(1) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 80 per cent of

(A) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the borough or city during the fiscal year two years earlier to pay costs of school construction;

(3) 80 per cent of

(A) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 to pay costs of school construction projects approved under AS 14.07.020(10);

(B) cash payments made after June 30, 1978 by the borough or city during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(10).

* Sec. 13. AS 43.18 is amended by adding new sections to read:

Sec. 43.18.105. PUBLIC SCHOOL FACILITIES CONSTRUCTION ADVANCE ACCOUNT. The public school facilities construction advance account is established. The account consists of appropriations for distribution under secs. 105 - 135 of this chapter to boroughs and cities which are school districts to assist in paying the costs of public school facilities projects approved under AS 14.07.020(10) for which construction is commenced after June 30, 1978 and for which no bonding, notes, or other indebtedness was incurred before July 1, 1978.

Sec. 43.18.110. ELIGIBILITY. Eligibility of a proposed construction project for funding assistance under secs. 105 - 135 of this chapter shall be determined by the

92

Chapter 92

* Sec. 7. AS 35.15.090 is amended to read:

Sec. 35.15.090. USE OF APPROPRIATED FUNDS. Upon [ASSUMPTION OF MUNICIPALITY OR REGIONAL EDUCATIONAL ATTENDANCE AREA OF THE DEPARTMENT RESPONSIBILITIES UNDER AS 35.15.080(a)(1), OR UPON] execution of an agreement under AS 35.15.080(a) [AS 35.15.080(a)(2)], state funds appropriated for a public works project which is the subject of the [ASSUMPTION OR THE] agreement shall be transferred to a special account in the state treasury. A municipality [OR REGIONAL EDUCATIONAL ATTENDANCE AREA] administering the project under the [ASSUMPTION OR] agreement may draw on the account for costs of the project, under fiscal control of the department. If an agreement provides for joint or cooperative administration of the project, payment of costs shall be made to the party incurring the costs.

* Sec. 8. AS 43.18.100(a) is amended to read:

(a) During each fiscal year, the state shall allocate to a municipality that [AN ORGANIZED BOROUGH OR A CITY WHICH] is a school district the following sums:

(1) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 90 [80] percent of

(A) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the municipality [BOROUGH OR CITY] during the

fiscal year two years earlier to pay costs of school construction;

(3) 90 [80] percent of

(A) payments made by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 and before January 1, 1982 to pay costs of school construction projects approved under AS 14.07.020(11);

(B) cash payments made after June 30, 1978 and before July 1, 1982 by the municipality [BOROUGH OR CITY] during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11);

(4) subject to (h) and (i) of this section 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981 to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982, by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

Sec. 9. AS 43.18.100 is amended by adding new subsections to read:

(h) An allocation under (a)(4) of this section for school construction begun after July 1, 1982, shall be reduced by the amount used for the construction of residential space, hockey rinks, pools, saunas, and other facilities for single purpose sports or recre-

tional uses that are not suitable for other activities. An allocation under (a)(4) of this section may not be reduced by the amount of money used for construction of a small swimming pool, tank, or water storage facility used for water sports. However, an allocation shall be reduced by the difference between the amount of money used to construct a swimming pool that is competition size or larger and the amount of money that would have been used to construct a small swimming pool, tank, or water storage facility, as determined by the commissioner.

(i) For the purposes of (a)(4) of this section

(1) an indebtedness for bonds is incurred after the bonds are sold;

(2) reimbursement for a cash payment may only be made after the payment is made to a vendor; and

(3) payments may not be made for costs that are incurred under a contract after the contract has been released.

* Sec. 10. AS 14.08.161 and AS 43.18.100(b)(2) are repealed.

* Sec. 11. This Act takes effect July 1, 1982.

AN ACT

Relating to state support for education; and providing for an effective date.

---

* Section 1. AS 43.18.100(a)(4) is amended to read:

(4) subject to (h) and (i) of this section up to 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981, and authorized by the qualified voters of the municipality before July 1, 1983, to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1982, and before July 1, 1983, by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(C) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes, or other indebtedness to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are submitted to the

83

Mat-Su

Department of Education for approval under AS 14.07 before July 1, 1983, and approved by the qualified voters [illegible] municipality before October 15, 1983, not to exceed a [illegible] project cost of (i) $6,600,000 if the annual growth rate average daily membership of the municipality is more [illegible] percent but less than 12 percent, or (ii) $20,000,000 [illegible] annual growth rate of average daily membership of [illegible] municipality is 12 percent or more; payments made by a [illegible]ipality under this paragraph on total project costs that [illegible] the amounts set out in (i) and (ii) of this paragraph are subject to (a)(5)(A) of this section.

* Sec. 2. AS 43.18.100(a) is amended by adding a new paragraph to read:

(5) subject to (h) and (i) of this section, 50 percent of

(A) payments made by the municipality during the [illegible] year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness authorized by the qualified voters of the municipality after June 30, 1983 to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1983 by the municipality during the fiscal year two years earlier for costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

* Sec. 3. AS 43.18.100 is amended by adding a new subsection to read:

(j) The state may not allocate money to a municipality for a school construction project under (a)(5) of this section unless the project is approved by the commissioner before the local vote on

nd issue for the project. In approving a project under this subsection, the commissioner shall require

(1) the municipality to include on the ballot for the bond issue the estimated total cost of each project and the estimated amounts that will be paid by the state and by the municipality;

(2) that the bonds may not be refunded unless the annual debt service on the refunding issue is not greater than the annual debt service on the original issue;

(3) that the bonds must be repaid in approximately equal annual principal payments or approximate equal debt service payments over a period of at least 10 years;

(4) the municipality to demonstrate need for the project by factors such as increased enrollment in the school district, the health and safety of the students, and the factors listed in AS 14.11.010(c).

* Sec. 4. FINDINGS. The legislature finds that the present system of providing assistance to school systems should be studied for modification and improvement. The legislature further finds that during the period of study an alternative mechanism to the existing foundation support system is desirable.

* Sec. 5. The operation of AS 14.17.021(a), 14.17.022, 14.17.031(a), (b), (c), and (e), 14.17.041, 14.17.051, 14.17.056, 14.17.160, 14.17.180, 14.17.225(b), and the provision of 14.17.170 that requires the withholding of one-half of the June payment of state aid pending a final determination of each school district's state aid is suspended from July 1, 1983, through June 30, 1984. During the period of suspension, the provisions of AS 14.17.031(d) remain in effect except that the number of students in average daily membership in each school district may be used instead of instructional units to calculate reductions in

state aid. During the period of suspension, funding for the b... aid and supplemental equalization aid that otherwise would have be... vided under the provisions of AS 14.17.021(a), 14.17.022, and 1... shall be provided to school districts and for centralized corres... study in accordance with the provisions of sec. 6 of this Act.

* Sec. 6. For fiscal year 1984 the amount of state aid for each ... district and for centralized correspondence study is the following ... subject to adjustment under AS 14.17.021(b), for each pupil in ... daily membership less any aid overpaid as determined by the commissio... education:

Central Correspondence	[illegible]

* Sec. 7. The commissioner shall determine the state aid for each school district on the basis of the reports submitted under AS 14.[illegible] for fiscal year 1983. Beginning July 15 of the fiscal year, and on the 15th of each month, for seven successive months, 1/12th of each district's state aid shall be distributed.

* Sec. 8. Appropriations made for fiscal year 1984 for supplemental programs under AS 14.17.061(a) may be used only for average daily membership increases beyond the average daily membership reported by the districts under AS 14.17.170 for fiscal year 1983. If the amount appropriated for fiscal year 1984 is insufficient to meet the average daily membership allocations authorized under sec. 6 of this Act with respect to the increased average daily membership, the available funds shall be distributed on a pro rata basis among the school districts with increased average daily membership.

Sec. 9. During the period of suspension under sec. 5 of this Act, a school district shall continue to provide services to students in programs of bilingual, special, and vocational education commensurate with the needs of the students and in strict accordance with applicable state and federal laws and regulations.

* Sec. 10. The commissioner of education shall recommend to the legislature a method of revising and improving the public school foundation program no later than January 9, 1984. If the commissioner of education has not made recommendations to the legislature by January 9, 1984,

[illegible]ions of AS 14.17 notwithstanding, the amount of basic state aid to [illegible] school district and regional educational attendance area under the [illegible]ic school foundation program as calculated by fiscal year 1984 revised [illegible]rage daily membership calculations, beginning in fiscal year 1985, shall be adjusted and identified in January 1984 to reflect the changes in the Consumer Price Index for all Urban Consumers for the Anchorage Metropolitan Area compiled by the Bureau of Labor Statistics, United States Department of Labor in January 1984, for the preceding twelve-month period. The index for January 1983 is the reference base index.

* Sec. 11. Sections 4 - 10 of this Act are repealed June 30, 1985.

* Sec. 12. Sections 1 - 3 of this Act take effect July 1, 1983.

* Sec. 13. Sections 4 - 13 of this Act take effect immediately in accordance with AS 01. 10.070(c).

right-of-way of the highway to gain access to the [HIS] mining

* Sec. 3. This Act is retroactive to October 5, 1980.

* Sec. 4. This Act takes effect immediately in accordance with [illegible](c).

LAWS OF ALASKA

1985

Source: CCSSB 51

Chapter No.: 79

AN ACT

Relating to state aid for school construction, and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 9

UNDERLINED MATERIAL INDICATES TEXT THAT IS BEING ADDED TO THE LAW AND BRACKETED MATERIAL IN CAPITAL LETTERS INDICATES DELETIONS FROM THE LAW; COMPLETELY NEW TEXT OR MATERIAL REPEALED AND RE-ENACTED IS IDENTIFIED IN THE INTRODUCTORY LINE OF EACH BILL SECTION.

Approved by the Governor June 2, 1985
Actual Effective Date July 1, 1985

AN ACT

Relating to state aid for school construction; and providing for an effective date.

---

* Section 1. AS 14.11.100(a)(5) is amended to read:

(5) subject to (h), [AND] (i), and (j) of this section, 80 [50] percent of

(A) payments made by the municipality during the fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness authorized by the qualified voters of the municipality after June 30, 1981, to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11); and

(B) cash payments made after June 30, 1981, by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 14.07.020(11).

Sec. 2. AS 14.11.100(h) is amended to read:

(h) An allocation under (a)(4) or (5) of this section for school construction begun after July 1, 1982, shall be reduced by the amount [MAY] used for the construction of residential space, [BOWLING ALLEYS, GYMNASIUMS,] saunas, and other facilities for single purpose sporting [RECREATIONAL] uses that are not suitable for other activities and by

the money used for construction that exceeds the amount needed
construction of a facility of efficient design as determined by
department. An allocation under (a)(4) or (5) of this section may
be reduced by the amount of money used for construction of a
swimming pool, tank, or water storage facility used for water spo
However, an allocation shall be reduced by the difference between
amount of money used to construct a swimming pool that exceeds
standards adopted by the department [IS COMPETITION SIZE OR LAN
and the amount of money that would have been used to construct a
swimming pool, tank, or water storage facility, as determined by
commissioner.

* Sec. 3. AS 14.11.100(i) is amended to read:

(i) For the purposes of (a)(4) and (5) of this section

(1) an indebtedness for bonds is incurred after the
are sold;

(2) reimbursement for a cash payment may only be made
the payment is made to a vendor; and

(3) payments may not be made for costs that are inc
under a contract after the contract has been released.

* Sec. 4. AS 14.11.100(j) is amended to read:

(j) The state may not allocate money to a municipality
school construction project under (a)(5) of this section unless
municipality complies with the requirements of (1) - (4) of
subsection and the project is approved by the commissioner before
local vote on the bond issue for the project. In approving a pr
under this subsection, the commissioner shall require

(1) the municipality to include on the ballot for the
issue the estimated total cost of each project including
annual operation and maintenance costs and the estimated amoun

will be paid by the state and by the municipality;

(2) that the bonds may not be refunded unless the
debt service on the refunding issue is not greater than
debt service on the original issue;

(3) that the bonds must be repaid in approximately
annual principal payments or approximate equal debt service payments
over a period of at least 10 years;

(4) the municipality to demonstrate need for the project by establishing that the school district has

(A) projected long-term student enrollment that indicates the district has inadequate facilities to meet present or projected enrollment; or

(B) facilities that require repair or replacement in order to meet health and safety laws or regulations or building codes [; FACTORS SUCH AS INCREASED ENROLLMENT IN THE
TRICT, THE HEALTH AND SAFETY OF THE STUDENTS, AND
LISTED IN AS 14.11.010(c)].

* Sec. 5. AS 14.11.100 is amended by adding a new subsection to read:

(k) An amount equal to the interest earned on the investment of the proceeds of bonds issued for a school construction project shall be used by the municipality to

(1) pay the costs of the project;

(2) pay accrued interest on the bond issue;

(3) redeem all or part of the bonds; or

(4) pay the costs of issuing the bonds.

* Sec. 6. AS 14.11 is amended by adding a new section to read:

Sec. 14.11.102. EVALUATION OF PROJECTS. The department shall evaluate projects for which retirement of school construction debt is requested by school districts in accordance with the

out in AS 14.11.010. A request for an allocation of funds u
AS 14.11.100 must be submitted to the department by the school
trict no later than October 15 of the fiscal year before the fi
year for which the request is made.

* Sec. 7. AS 14.11.135 is amended to read:

Sec. 14.11.135. DEFINITIONS. In this chapter [AS 14.11.1
14.11.135], unless the context requires otherwise,

(1) "approved school construction project" means the
for a new school or an addition to or major rehabilitation of
existing school to the extent to which approved by the commissioner
accordance with AS 14.07.020(11);

(2) "commissioner" means the commissioner of education;

(3) "costs of school construction" means the cost of
quiring, constructing, enlarging, repairing, remodeling, equipping
furnishing of public elementary and secondary school buildings
includes the sum total of all costs of financing and carrying out
project; these include, but are not limited to, the costs of
necessary studies, surveys, plans and specifications, architectu
engineering or other special services, acquisition of real prope
site preparation and development, purchase, construction, reconst
tion and improvement of real property and the acquisition of machi
and equipment as may be necessary in connection with the project;
allocable portion of the administrative and operating expenses of
grantee; the cost of financing the project, including interest
bonds issued to finance the project; and the cost of other it
including any indemnity and surety bonds and premiums on insura
legal fees, fees and expenses of trustees, depositaries, fi
advisors, and paying agents for the bonds issued as the issuer
siders necessary;

(4) "department" means the Department of Education.

* Sec. 8. AS 14.11 is amended by adding a new section to read:

Sec. 14.11.140. REGULATIONS. The department shall adopt regulations to carry out the purposes of this chapter.

* Sec. 9. LEGISLATIVE REVIEW. Proposed permanent regulations under AS 14.11.140 as enacted in sec. 8 of this Act shall be submitted to the legislature no later than the 10th day of the Second Session of the Fourteenth Alaska State Legislature. Notwithstanding AS 44.62, permanent regulations adopted under AS 14.11.140 take effect the 90th day of the Second Session of the Fourteenth Alaska State Legislature, unless a law is enacted disapproving the regulations.

* Sec. 10. (a) The amendments to AS 14.11.100(j) provided for in sec. 4 of this Act apply only to school construction projects approved by the commissioner of education after the effective date of this Act.

(b) The requirement of AS 14.11.102, added by sec. 6 of this Act, that requests for an allocation of funds under AS 14.11.100 be submitted by October 15 of the fiscal year before the fiscal year for which the request is made, does not apply to requests for fiscal year 1987.

* Sec. 11. This Act takes effect July 1, 1985.

Moody's **Municipal** Department

1985 Medians

Selected Indicators of Municipal Performance

State Indicators and Rankings

City and County Debt Medians

Enterprise Performance Medians

As a measure of a government's burden of debt, a ratio is calculated between its net debt and the estimated full value of taxable property. The estimated full value serves as a direct measure of local government wealth and, therefore, is reflective of the government's capacity to service its debt. Taxable valuation is utilized as a wealth measure because it tends to be up-to-date and readily available for all types of municipal government.

"

HB 519

No State Agency or quasi State Agency may incur long-term debt except in accordance with the provisions of this chapter.

State Agency or quasi State Agency includes but is not limited to the following:

All Operating Departments of the Executive Branch
All Agencies of the Judicial Branch
All Agencies of the Legislative Branch
The University of Alaska
The Alaska State Housing (Building) Authority
The Alaska Municipal Bond Bank Authority
The Alaska Power Authority
The Alaska Industrial Development Authority

Long-term debt is defined as any debt with a payment period that extends beyond the end of the fiscal year in which the debt is incurred.

So called "lease financing" contracts where the object is for the state to acquire the attributes of ownership of real property after making "rent" payments for a number of years are considered long-term debt and are subject to the provisions of this chapter.

Leases that are cancellable at the end of each fiscal year without penalty to the State are not considered long-term debt for purposes of this chapter.

A State Agency or quasi State Agency with the authority by statute or regulation to incur long-term debt shall do so in accordance with the terms of legislation signed into law by the Governor and approved by a vote of the people in a general election.

No State Agency or quasi State Agency may issue bonds or sign contracts for long-term debt until the state bond committee has approved the proposal for the issuance of debt in accordance with the terms of this chapter.

CITY of WRANGELL, ALASKA

INCORPORATED JUNE 15, 1903

BOX 531, 99929 (907) 874-2381

ADOPTED AUGUST 1972

February 26, 1986

Senator Robert H. Ziegler, Sr.
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

RE: Alaska Legal Services Funding

Dear Senator Ziegler:

The Wrangell City Council has been informed that the Ketchikan office of Alaska Legal Services is closing due to a cutback in State funding. Although we do not know the actual number of cases in Wrangell, we do know that Alaska Legal Services has provided the assistance necessary to some of our senior citizens to resolve problems on their property discriptions and/or title. From all reports, many persons receive assistance from Alaska Legal Services that they would otherwise be unable to afford.

The City Council request your support for the funding necessary to maintain the office in Ketchikan to at least continue the level of service previously provided to the area.

Sincerely,

Joyce Rasler
City Manager

cc: Representative John Sund
Representative Robin Taylor

City of Ketchikan

February 25, 1986

The Honorable John Sund
Representative
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Mr. Sund:

This letter is a followup to your conversation with Councilmember Tom Friesen regarding House Bill 521. As you know, House Bill 521 would establish a limit on general obligations indebtedness that a municipality could maintain. Although a limit on such bor .ng may be appropriate, I have the following concerns.

A summary of the bill shows that the bill limits general obligation bond debt to seven percent of the full property value of the municipality. A municipality is defined as "a municipality or a combination of municipalities that occupy, in whole or in part, the same geographic area." G.O. bonded debt does not include refunding bonds or "self supporting debt".

I have discussed this bill with Al Learned, Finance Director, and we suggest that based on our brief review there are two areas of concern.

1. The seven percent limitation may be too low (based on our interpretation of self-supporting debt). Currently, our debt ratio is approximately 3%. However, with the potential decline in state money available for local projects, including school projects, and the need in the future for various capital projects in the City, including those of the school district, we may find ourselves close to or over the 7% limitation even with our excellent debt ratio.

2. The definition of self supporting debt is not clear. If self supporting debt includes the state's portion of school construction debt and debt supported by sales tax (for example), then the impact of this bill may be lessened. In any case, we (municipality as defined above) can issue approximately $14 million additional bonds not considered to be self-supporting [there is cur ently approximately $20 million outstanding]. This could easily be achieved by a combination of school, borough and city bond issues over the next few years.

LT3/114

In order to cushion the effects of this bill on this municipality, I would recommend an increase of the limit to a higher level [15% for example] and a clear definition of debt that is included in self supporting debt.

Sincerely,

Dan Allen
Assistant City Manager

STATE AID TO EDUCATION

Subject to annual legislative appropriations, the State of Alaska Department of Education makes direct payments to the Borough and other governmental units which operate schools under the following major education aid programs:

1. *Reimbursement of Debt Service and Cash Payments on School Facilities.* Except as noted below, the State reimburses 50% of debt service payments on bonds sold, or of cash payments made, for school construction. For some facilities, such as vocational classrooms and equipment, the State's share is 75%. Beginning July 1, 1978, the State law provides for reimbursement of 100% of debt service payments for debt incurred prior to July 1, 1977 and 100% of local cash payments made prior to July 1, 1976, for school construction. These payments lag two years behind the actual debt service or cash payments. The State makes such payments in two installments during the fiscal year.

2. *Construction Funds.* A portion of the cigarette taxes levied by the State and collected within a Governmental Unit's jurisdiction are returned to the Governmental Unit. These funds are designated for new construction, rehabilitation or maintenance and insurance of schools or for the payment of debt service on bonds issued for such purposes. Payments are generally made in December.

3. *Education Operation Expenses.* The State reimburses Governmental Units for 95% (increased from 93% for fiscal years prior to 1976/1977) of their "basic education" operating expenses as defined by the State, calculated on the basis of the pre-fiscal year computations. Beginning July 1, 1978, the State will increase the reimbursement to 97%. The State applies differential adjustments based on area.

4. *Pupil Transportation.* The State reimburses local school districts for 100% of the costs of transporting pupils to and from school for distances greater than one and a half miles.

5. *State Impact.* This program offers financial relief to schools providing free public education to students whose parents work and/or live on State property.

6. *Additional Support.* The State provides additional support to schools for food service, community schools and boarding school home grants.

ANTICIPATED FUTURE FINANCING

In addition to the improvements to be financed by proceeds of this bond issue, Borough officials indicate a need for additional major capital projects, all of which are for school purposes (primarily new facilities and additions to existing facilities). The combined total costs of needed projects is estimated at approximately $20 million. The timing of and funding for these projects have not been established nor have bonds been authorized by the voters.

SCHEDULE OF DIRECT AND OVERLAPPING GENERAL OBLIGATION DEBT (1)
June 30, 1977

Outstanding General Obligation Debt:	
Kenai Peninsula Borough: School Purposes (2)	$21,822,000
Service Areas: Fire, Recreation and Hospital Purposes (3)	1,870,097
This Issue (4)	25,970,000
Total Direct Debt, Including This Issue	$49,662,097
Estimated Overlapping Debt (100%):	
Cities of:	
Seldovia	$ 505,000
Homer	2,381,000
Kenai	4,690,000
Seward	1,489,000
Soldotna	1,648,000
Total Overlapping Debt	$10,713,000
Direct and Overlapping Debt, Including This Issue	$60,375,097

(1) Source: Kenai Peninsula Borough; the Borough has no authorized but unissued general obligation debt.

(2) Excludes refunded issues; 100% of the debt service requirements on these bonds will be reimbursed by the State of Alaska (see page 14) for payments made in 1976 and after.

(3) Includes $334,597 Central Hospital Service Area Small Business Administration Loan (see page 30, Appendix B).

(4) Approximately 50% of the debt service requirements on these bonds will be reimbursed by the State of Alaska (see page 14).

BONDED DEBT RATIOS*
June 30, 1977

Assessed Value (100% of Actual Value)	$1,188,172,242
Estimated Borough Population (see page 10)	24,611
Ratio of:	
Direct Debt to Assessed Value	4.18%
Direct and Overlapping Debt to Assessed Value	5.08%
Per Capita:	
Assessed Value	$48,278
Direct Debt	2,018
Direct and Overlapping Debt	2,453

*Includes this $25,970,000 issue.

Major industrial growth is occurring within the Borough, most notably, expansion of petrochemical industries and petroleum and natural gas exploration in the Gulf of Alaska and Cook Inlet (see page 16). However, District officials predict normal permanent growth (excluding any growth due to major oil related industrial expansion) as follows:

1977-78 Actual Enrollment	1978-79 Projected	1979-80 Projected	1980-81 Projected	% Increase 1977-78 to 1980-81
5,708	6,189	6,531	6,934	21.5%

Any significant additional growth prompted by major industrial expansion is expected to occur after 1980 and much of that growth would have a temporary effect. District officials expect to accommodate any such temporary growth in portable classrooms or rented spaces.

BOROUGH FINANCES

Major sources of revenue for the Borough include contributions from the state and federal governments and levy of property and sales taxes. The largest expenditures are for education, general administration and capital projects.

The State Department of Revenue collects the following taxes at the local level and returns all or a portion of the tax revenues to the local governments: general business license tax, amusement and gaming tax, aviation fuel tax, electric and telephone tax, liquor license tax and raw fish tax.

SCHOOL FINANCES

ESTIMATED REVENUE RECEIPTS FOR PUBLIC SCHOOLS, 1975-76 (1)

	Amount (millions)				Source: Percent of Total		
	Total	Federal	State	Local & Other	Federal	State	Local & Other
Average, All States	$67,136.9	$5,345.9	$29,321.6	$32,469.4	8.0	43.7	48.3
State of Alaska	$ 232.9	$ 35.2	$ 151.2	$ 46.5	15.1	64.9*	20.0

*% contribution by State of Alaska exceeded only by Hawaii and North Carolina; "Revenue Receipts" include receipts for: current expenditures, capital outlay and interest, and for summer school, adult programs and community services.

STATE AID TO EDUCATION

The State of Alaska Department of Education makes direct payments to the Borough and other governmental units which operate schools under the following education aid programs: construction funds; reimbursements for debt service and cash payments on school facilities; general fund operation expenses; state impact; non-resident tuition; and pupil transportation.

None of these programs creates a debt or liability of the State, and each is subject to annual legislative appropriations. The following descriptions are based on Alaska Statutes as amended through the First Session of the Tenth Legislature (1977) and on records and documents of the Department of Education.

1. **Construction Funds** — A portion of the cigarette taxes levied by the State and collected within a Governmental Unit's jurisdiction are returned to the Governmental Unit. These funds are designated for new construction or major rehabilitation of schools or for the payment of debt service on bonds issued for such purposes. Moneys can be accumulated over a period of years as long as they are used only for the designated purposes. Payments are generally made in December following November 15 audits of the prior fiscal year.

2. **Reimbursement of Debt Service and Cash Payments on School Facilities** — Except as noted below, the State reimburses 50% of debt service payments on bonds sold, or of cash payments made, for school construction. For some facilities, such as vocational classrooms and equipment, the State's share is 75%. Beginning July 1, 1978, the State will reimburse 100% of debt service payments for debt incurred prior to July 1, 1977 and 100% of cash payments made prior to July 1, 1976, for school construction. These payments lag two years behind the actual debt service or cash payments. The calculation of school construction costs excludes all state and federal funds included in these costs except funds provided under the Construction Funds Program (described in the preceding paragraph) which are offset against the amount of reimbursement under this program. The State makes such payments in two installments, one in the late fall and one in the early spring of the fiscal year.

3. **General Fund Operation Expenses ("Public School Foundation Act")** — The State reimburses Governmental Units for 95% (increased from 93% for fiscal years prior to 1976/77) of their "basic needs" operating expenses as defined by the State, calculated on the basis of the pre-fiscal year computations. Beginning July 1, 1978, the State will increase the reimbursement to 97% of "basic needs." This money, prorated according to its availability, is generally paid monthly. A formula is used to adjust payments to schools based upon factors such as assessed valuations per pupil for the school district as compared to the Statewide average, location of the schools and the like.

4. **State Impact** — This program offers financial relief to schools providing free public education to students whose parents work and/or live on State property. The amount of State aid is based on the State average cost of education per student, as reflected in the audit report of district schools for the prior fiscal year, times the number of qualifying students in average daily membership. The State pays 50% of this amount to schools for each pupil with a parent who lives on *and* works on State property, and 25% for each pupil with a parent who lives on *or* works on State property. This money is also prorated according to its availability and generally paid in December based on the prior fiscal year. The Governor line-item vetoed a portion of the legislative appropriation for this program for fiscal year 1977/78 to reduce the amount to approximately 50% of entitlement for fiscal year 1976/77, as the first step of an expected two year phase-out of the program.

5. **Non-Resident Tuition** — When pupils residing outside of a city or borough, where the State is responsible for operating schools, attend a school operated by a city or borough, the State makes tuition payments to the Governmental Unit operating the school.

6. **Pupil Transportation** — The State reimburses local school districts for 100% of the costs of transporting pupils to and from school for distances greater than one and a half miles.

SALES TAX

Alaska Statutes allow boroughs to levy and collect sales tax not exceeding 3%, on sales and rents and on services performed within the borough. The Borough levies a sales tax which is dedicated to school purposes including debt service on school construction bonds. Total annual sales taxes have been collected by the Borough as follows:

Fiscal Year Ending June 30:	Tax Rate % of Sales	Sales Tax Collection*
1978	2	$2,600,000
1977	2	2,243,065
1976	2**	2,349,342
1975	3	2,144,923
1974	3	1,644,363
1973	3	1,423,111
1972	3	1,304,990
1971	3	1,277,148
1970	3	1,385,452

*Source: Kenai Peninsula Borough.

**The rate was changed from 3% to 2% in October, 1975; Borough officials anticipate maintaining the rate at 2%.

(1) Includes all Kenai Peninsula Borough General Obligation Bonds as listed in Appendix B, page 30. Excludes a Small Business Administration loan for the Central Hospital Service Area with an outstanding principal balance due of $334,597 at June 30, 1977.

(2) Beginning July 1, 1978, the State of Alaska will reimburse 100% of debt service payments issued for school construction for general obligation bonds issued prior to July 1, 1977.

(3) The State will reimburse 50% of debt service payments on bonds sold for school construction (where bonds were issued subsequent to July 1, 1977) except for vocational classrooms (75% reimbursement); reimbursement will lag two years behind actual debt service payments.

Interest exempt, in the opinion of bond counsel, from present federal income taxes under existing statutes, regulations, rulings and court decisions.

OFFICIAL STATEMENT

$48,000,000

CITY OF VALDEZ, ALASKA

City General Obligation Bonds, Series 1979

Dated: June 1, 1979 **Dated: June 1, as shown below**

Principal and semi-annual interest (June 1 and December 1) payable at the Seattle-First National Bank, Seattle, Washington, or, at the option of the holder, at The Chase Manhattan Bank, N.A., New York, New York. First interest coupon due December 1, 1979. Coupon bearer bonds, not registrable.

These bonds (the "Bonds") constitute direct and voted general obligations of the City, payable from ad valorem taxes levied, *without limitation as to rate and amount*, on taxable property located within the City. The City has never defaulted.

The Bonds maturing on and after June 1, 1990, will be subject to redemption prior to maturity, at the option of the City, on or after June 1, 1989 at the redemption prices set forth herein.

1,600,000	1996						

(Accrued Interest from June 1, 1979, to be added)

The Bonds are offered for delivery when, as and if issued, and subject to the approving opinion of Wohlforth & Flint, Anchorage, Alaska, Bond Counsel, whose approving opinion will be printed on the Bonds. It is expected that the Bonds will be delivered on or about June 12, 1979.

May 7, 1979

REVENUES FROM OTHER GOVERNMENTAL AGENCIES

Education—Operating

The principal source of aid is the State's basic Foundation Program for support of education operating activities. The formula of the 1976 Legislature according to the State Department of Education would provide support for the operating school budget of $4,002,468.75 for FY 1976-77, and $4,402,715.52 for FY 1977-78.

The revisions of the 1977 Legislature resulted in the FY 1977-78 amount being increased to $4,859,250, and an amount of $5,232,180 for FY 1978-79.

Education—Construction

The 1977 Legislature passed legislation which as of July 1, 1978 revises the aid program to provide for 100% of the debt service incurred before July 1, 1977 and thereafter reverts back to the 50% formula for debt service incurred after July 1, 1977 or cash payments. The specific statute is as follows:

AS 43.18.100(a): "During each fiscal year, the state shall allocate to an organized borough or a city which is a school district, the following sums:

(1) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction, and cash payments made by the borough or city before July 1, 1976 to pay the cost of school construction;

(2) 50 percent of

(A) payments made by the borough or city during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after July 1, 1977 to pay costs of school construction;

(B) cash payments made after July 1, 1977 by the borough or city during the fiscal year two years earlier to pay costs of school construction."

(See Table A-3, Appendix A, Projections of Debt Service—State Aid—School Bonds.) This table reflects the aid at 50%. However, those principal and interest payments after July 1, 1978 will result in 100% aid authorization. This additional aid is projected at $22,670,500 for those projected disbursements from FY 1978/79 above the projected $12,014,000 outlined for those bonds outstanding as of June 30, 1976 and the $15,315,000 projected for the $23,000,000 of this issue for a total aid of $49,999,500 over the life of the $40,000,000 in school bonds issued by the Borough.

Other Intergovernmental Receipts

Table IV illustrates the detailed receipts of Revenues from Other Governmental Agencies.

OTHER RECEIPTS

Table V contains details concerning Miscellaneous Revenues of the Borough.

OTHER MISCELLANEOUS DATA

Retirement

As of December 31, 1975, an actuarial study indicated unfunded accrued benefits at $246,690 to the State Public Employees' Retirement System. The consolidated employer rate is 9.43% of salaries of which 3.10% is for prior service benefits to be amortized over a 40-year period at $14,382 per year.

ALASKA MUNICIPAL BOND BANK

$16,170,000

1980 SERIES A BONDS
GENERAL OBLIGATION SERIES

DATED: August 1, 1980 **DUE: August 1, 1982-2000**

The Bonds will be general obligations of the Alaska Municipal Bond Bank (the "Bank") issued in the denomination of $5,000 either in coupon form, payable to bearer and registrable as to principal alone, or in fully registered form without coupons. Both principal of and interest on the Bonds will be payable at the offices of the Trustee, Rainier National Bank, Seattle, Washington, or, in the case of coupon bonds only, coupons and unregistered principal are also payable at Chemical Bank, New York, New York. The Bonds will pay interest semi-annually on the first days of August and February commencing August 1, 1981.

See Redemption Provision

(Accrued Interest to be Added)

Redemption Provision — The Bank reserves the right to redeem any or all of the Bonds outstanding, in whole or in part, on or after August 1, 1990 at par plus accrued interest to the date of redemption. Notice will be given by publication once a week for two successive weeks, the first such publication not less than 30 days nor more than 60 days prior to date of redemption, in a newspaper of general circulation publishing financial news in New York, New York. A like notice will be mailed to registered owners of any Bonds. Interest on any Bonds called for redemption will cease on such redemption date.

Legal Opinion and No Litigation Certificate — These Bonds are offered when, as and if issued, subject to the approval of legality by Wohlforth & Flint, Bond Counsel, Anchorage, Alaska. The Bank will furnish the unqualified approving legal opinion of Wohlforth & Flint, to the effect that the Bonds are valid and legally binding obligations of the Bank and to the effect that the interest on the Bonds is exempt from Federal income taxation under existing statutes, regulations, rulings and court decisions. The customary closing papers, including a certificate to the effect that no litigation of any nature has been filed or is then pending to restrain the issuance and delivery of the Bonds, or which would affect the provisions made for their payment or security, or in any manner questioning the validity of said Bonds or the coupons appertaining thereto, will also be furnished.

It is anticipated that these Bonds in definitive form will be ready for delivery on or about August 21, 1980.

State Payments to Government Units

The State of Alaska disburses funds to the Government Units (as described below) which generally are available for uses other than paying Municipal Bond debt service. However, in event of default by the Government Units, the Bank can cause such funds, held in custody by the State, to be paid over to the Bank.

Three State Departments disburse moneys to Government Units as follows:

(1) *Department of Education* — State appropriations and cigarette taxes earmarked for education, including reimbursements (at rates of 50-100%) of both debt service and cash payments on school facilities.

(2) *Department of Revenue* — Local share of various taxes collected by the State within the jurisdiction of the local governments including corporate income, amusement, aviation fuel, electric, telephone, liquor and raw fish taxes.

(3) *Department of Community and Regional Affairs* — State Aid to local governments includes direct grants and contributions for roads, health facilities, and hospitals under 1980 legislation.

During the year 1979 State payments totalling approximately $50.1 million for the three categories of payments outlined above were made to Government Units which currently have general obligation Municipal Bonds outstanding (owned by the Bank) under the General Resolution and the 1980 Bond Resolution.

Government Unit	Education Aid (1)	Shared Taxes (2)	State Aid (3)	Totals	Future Average Annual Debt Service (5)	State Payments Ratio (6)

(4) Only State payments payable to Bristol Bay Borough and the City and Borough of Sitka after May 1, 1980 may be withheld in the event of default on the general obligation Municipal Bonds which secure the 1980 First Special Issue bonds. These bonds together with Reserve Fund Obligations comprised the 1980 First Special Issue dated April 1, 1980.

(5) This column shows the future average annual debt service due on Municipal Bonds purchased by the Bank.

(6) This column represents the ratio of State Payments to Government Units versus future average annual debt service for the respective municipalities on one or more bond issues including this Bond issue. Debt service for this Bond issue was calculated assuming an interest rate of 8% per annum. State aid in future years is subject to legislative appropriation.

KODIAK ISLAND BOROUGH

Kodiak, Alaska

May, 1983

FINANCIAL AND FISCAL MATTERS

Debt Structure

Neither state law nor the Kodiak Island Borough Code imposes any debt limit on Alaskan municipalities. The Borough Code does, however, require general obligation bond issues, except refunding bonds, to be authorized by a majority vote of the electorate voting on the question.

The following statement of direct and overlapping bonded debt relates to the outstanding general obligation bonds of the Borough, including the $7,400,000 of general obligation bonds sold in May 1983.

Outstanding General Obligation Bonds:		
School Bonds	$ 22,000,000	
Other Bonds	300,000	
Gross Debt	$ —	$ 22,300,000
Less: Self-Supporting Bonds	—	—
Special Assessments	—	—
Total Net Direct Debt		$ 22,300,000
Assessed Valuation, 1982①		
Real Property	$370,439,377	
Personal Property	67,606,123	
		$438,045,500

Ratios to 1982 Assessed Valuation①		**Per Capita**②	
Net Direct Debt	5.1%	Net Direct Debt	$ 1,754
Total Debt	5.1%	Total Debt	1,754
		1982 Assessed Valuation①	34,454

① Valuations are at 100% of estimated full value.

② Population of 12,714 as of August 1, 1982 per Special Census and accepted by the State Demographer.

Including the recent sale of the $7,400,000 general obligation bonds, the Borough will have a total of general obligation bonds authorized but unissued of $9,500,000, all for school purposes. The Borough presently has no other types of bonds authorized.

State Contribution Toward School Bond Debt Service

The State of Alaska contributes to local school construction and debt retirement primarily through two programs. The first involves a share of State tobacco tax revenues, which share the District has dedicated to debt service on school bonds and the amounts of which are included in Table 3 below.

The second program was created by the State Legislature in 1970 and provides a system under which the State, subject to annual appropriation by the Legislature, will reimburse local school districts part of the cost of debt service on school construction bonds and a share of the cost of construction of school plant not financed by bonds. About 90% of the State's revenue comes from oil and gas production in the form of royalties and taxes. A decrease in the world market price of crude oil has had an adverse impact on the State's ability to fund this program. Under the statute (AS 43.18.100), which created the second program, the amount of the tobacco tax allocation received by a school district is offset against the amount of the reimbursement. The reimbursement each year is based upon the amount of debt service on school debt and/or the amount paid for school construction from funds other than bond proceeds during the fiscal year two years prior to the year of the reimbursement. The allocations pursuant to this program received by the School District are shown below and are available for debt service on school bonds, although such allocations are unrestricted revenue and can be used to fund general education expenditures as well.

TABLE 17

STATE CONTRIBUTION TO KODIAK ISLAND BOROUGH SCHOOL DISTRICT CONSTRUCTION

Year Ended June 30	Tobacco Tax Allocation	State Aid Allocation	Total
1982	$79,326	$634,491	$713,817
1981	65,784	616,108	681,892
1980	62,086	317,602	379,688
1979	59,891	283,969	343,860
1978	61,969	173,701	235,670
1977	73,508	157,424	230,932
1976	59,628	215,693	275,321
1975	63,835	223,000	286,835
1974	62,659	168,578	231,237
1973	67,427	8,462	75,889

Source: Kodiak Island Borough.

Legislation entitled "Senate Committee Substitute for Committee Substitute for House Bill No. 279 (Finance)" was enacted in 1982. Such legislation provides generally that for debt issued prior to 1977, the State will reimburse the Borough at 100% of annual costs, but with a two-year lag. Debt incurred after June 30, 1977 and before December 31, 1981 would have the State reimburse 90% of annual costs with a two-year lag. Debt issued after December 31, 1981 (the Bonds would apply) would have the State reimburse 90% debt service in the fiscal year paid. As noted previously, this reimbursement is subject to annual appropriations and could be adversely impacted by a decrease in state revenues due to a decline in crude oil prices.

Revenues and Expenditures

Each year the Borough must approve a budget and a tax levy ordinance. Budget hearings are held during the months of March and April and individual budget sessions follow with departments and agencies. The total 1982/83 budget called for expenditures of $5,030,760 compared to revenues received in 1981/82 of $5,964,088.

In fiscal year ei led June 30, 1982, General Fund revenues generated locally totalled $3,260,827 of which 69%—or $2,236,368—was from property taxes. Receipts from State and Federal governments increased revenues by $2,703,261 to a total of $5,964,088 of which only 37% was represented by local property taxes. Total expenditures for the period equalled $3,893,139.

OFFICIAL STATEMENT
Relating to the Original Issuance of

$90,800,000
North Slope Borough, Alaska

General Obligation Refunding Bonds of 1983
Series B
Dated: November 15, 1983 **Due: June 30, As Shown Below**

The General Obligation Refunding Bonds of 1983, Series B will be issued only as fully registered bonds in the denomination of $5,000 or any integral multiple thereof. These Bonds are not subject to redemption prior to maturity.

Interest from the date of the Bonds will be payable annually at the rates specified below on June 30, commencing June 30, 1984, by check or draft mailed to the owner in whose name the Bond is registered upon the Books of Registry as of the close of business on the fifteenth day of June in each year at his address appearing upon such Books of Registry to be kept by Rainier National Bank, Registrar, at its principal office in Seattle, Washington, and by Chemical Bank, Co-Registrar, at its principal office in New York, New York. Principal payable at Rainier National Bank, Paying Agent, in Seattle, Washington.

The Bonds are general obligations of the Borough, and the full faith and credit of the Borough are pledged to the payment of the principal of and interest on the Bonds The Borough has the power and is obligated to levy ad valorem taxes on all property within the Borough, subject to taxation by the Borough, without limitation as to rate or amount, for the payment of the principal of and interest on the Bonds. The Bonds are issued for the purpose of refunding certain outstanding bonds of the Borough. The proceeds of the Bonds, together with other funds of the Borough, will be applied to the purchase of direct obligations of the United States the principal of and interest on which will be used to pay the interest on and principal of such outstanding bonds as they become due.

MATURITIES

Year	Amount	Interest Rate	Yield or Price
1987	$18,200,000	8.75 %	%
1988	31,200,000	8.75	
1989	25,500,000	9.25	
1990	15,900,000	9.50	

(Plus accrued interest from November 15, 1983.)

The Bonds are offered when, as and if issued by the Borough, and accepted by the Underwriter named below, subject to prior sale and subject to the approval as to their validity by Wood & Dawson, New York, New York, Bond Counsel. Certain legal matters will be passed upon by Counsel to the Underwriter, Willkie Farr & Gallagher, New York, New York. It is expected that the Bonds will be available for delivery in definitive form on or about November 15, 1983. In the opinion of Bond Counsel interest on the Bonds is exempt from federal income taxation under existing law and regulations. See "Opinion of Bond Counsel."

*Note: The Legislature underfunded this program by 4% to date.

State Aid for Education—Construction

Pursuant to Alaska Statutes 43.18.100, State aid is authorized for the payment of 100% of the debt service incurred prior to July 1, 1977 by a municipality for school construction, and 90% of the debt service so incurred or cash payments made subsequent to June 30, 1978 by an organized borough or city for school construction projects, as approved by the State. Alaska Statutes provide as follows:

"(a) During each fiscal year the state shall allocate to a municipality that is a school district, the following sums:

(1) payments made by the municipality during the fiscal year or two years earlier for the retirement of principal and interst on outstanding bonds, notes or other indebtedness incurred before July 1, 1977 to pay costs of school construction;

(2) 90 per cent of

(A) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1977 and before July 1, 1978 to pay costs of school construction;

(B) cash payments made after June 30, 1976 and before July 1, 1978 by the municipality during the fiscal year two years earlier to pay costs of school construction; and

(3) 90 percent of

(A) payments made by the municipality during the fiscal year two years earlier for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after June 30, 1978 and before January 1, 1982 to pay costs of school construction projects approved under AS 14.07.020(11);

(B) cash payments made after June 30, 1978 and before July 1, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction projects approved under AS 14.07.020(11)."

(4) subject to (h) and (i) of this section 90 percent of

(A) payments made by the municipality during the current fiscal year for the retirement of principal and interest on outstanding bonds, notes or other indebtedness incurred after December 31, 1981 to pay costs of school construction, additions to schools, and major rehabilitation projects that exceed $25,000 and are approved under AS 1407.020(11); and

(B) cash payments made after June 30, 1982 by the municipality during the fiscal year two years earlier to pay costs of school construction, additions to schools, and major rehabilitation projects that exeed $25,000 and are approved under AS 14.07.010(11).

Alaska Statutes 14.07.020(11) requires the approval by the State Department of Education of plans for construction and the extent of eligibility for State aid of school construction projects. The critical effect of the preceding statutory requirements on the Borough is the consequent statutory diminution of the financial participation in school construction by the State after July 1, 1978, to 90% of the approved costs of basic educational facilities, as defined by regulation. The remaining 10% of such costs will not be funded by the State. To the extent that such costs for the additional facilities exceed regulatory standards set by the Department of Education, such costs will not be funded by the State.

State aid for construction of educational facilities is projected as follows:

	Aggregate Principal Amount Outstanding	Total Debt Service	State Aid*
	($000)	($000)	($000)
Bonds Issued Prior to June 30, 1978	$ 40,000	$ 53,838	$ 49,985
Gen. Obligation Bonds, Series I-K,N,O,P	131,100	205,743	126,398
Bonds Authorized and to be Issued**	36,120	55,338	27,669
	$207,220	$314,919	$204,052

*State Aid is projected at approximately 50% of debt service on bonds issued subsequent to June 30, 1978 to pay the costs of school construction, thereby assuming, among other factors, appropriations by the State Legislature at a level below that authorized by statute.

**Pursuant to Ordinance 82-10A, bonds authorized but unisused $34,555,000 and $1,565,000 to be authorized (see "Operating and Capital Budget Procedures").

See Table II-8, Code 50-507 Debt Service, for past receipts and budget estimate FY 1982/83.

Federal Aid—Operations

Table II-10 provides a summary of federal aid in prior years as well as budgetary estimates; while Table II-8 outlines the detailed receipt code (asterisked) for aid. The principal single source is Public Law 874 reimbursement for certain children whose parents live or work on federal property. The next major source is in the area of health and social services for various contract work performed throughout the Borough's eight communities.

Federal Aid—Construction

There has been little federal aid for construction directly to the Borough; the exception being for construction of the Point Lay school of $4,542,000.

CITIZEN BONDS™

RATINGS: Moody's: A1
Standard & Poors: A

In the opinion of Bond Counsel, interest on the Bonds is exempt from all present Federal income taxes under existing statutes, regulations, court decisions and rulings.

$14,000,000
MUNICIPALITY OF ANCHORAGE, ALASKA
1985B GENERAL OBLIGATION GENERAL PURPOSE BONDS

Dated: June 1, 1985

Due: August 1, 1986-2005

The Bonds are to be issued only as fully registered bonds without coupons and when issued will be registered to Cede & Co. as nominee of The Depository Trust Company, New York, New York, which will act as depositary. Individual purchases of Bonds will be made in the principal amount of $1,000 or integral multiples thereof and will be in book-entry form only. Purchasers of Bonds will not receive certificates representing their beneficial ownership interests in the Bonds, but each will receive a credit balance on the books of its nominee, and this credit balance will be confirmed by an initial-transaction statement stating the details of the Bonds purchased. Certain concepts and procedures employed in the issuance of, and the registration program for, the Bonds are embraced by the CITIZEN BONDS™ program developed by Prudential-Bache Securities Inc. (See "CITIZEN BONDS™" hereinafter.)

Principal of and interest (February 1, 1986, and semiannually thereafter February 1 and August 1) on the Bonds are payable to Cede & Co., and such principal and interest payments will in turn be disbursed to the owners of the Bonds through their nominees. Transfer of ownership interests in the Bonds will be accomplished by book entries made by the depositary and the nominees of Bond owners so that a new Bond owner will receive a credit balance on the books of its nominee and a confirming statement in the same manner as an initial purchaser of an ownership interest in the Bonds. The Bonds are subject to redemption prior to maturity on any interest payment date on and after August 1, 1995, at the redemption prices set forth herein.

The Bonds are general obligations of the Municipality of Anchorage, and the full faith, credit and taxing power of the Municipality are pledged for the payment of the principal of and interest on the Bonds when due. The Municipality has irrevocably pledged and covenanted to levy and collect taxes upon all taxable property within the Municipality, without limitation as to rate or amount, in amounts sufficient together with other funds available therefor to pay the principal of and interest on the Bonds when due.

MATURITIES, AMOUNTS, RATES AND PRICES OR YIELDS

Due August 1	Amount	Rate	Price	Due August 1	Amount	Rate	Price
1986	$340,000	5.50%	100%	1996	$ 885,000	8.50%	100%

(Accrued interest from June 1, 1985 to be added)

The Bonds are offered in book-entry form when, as and if issued and received by the Underwriters and subject to the approving legal opinion of Wohlforth & Flint, Bond Counsel, of Anchorage, Alaska, as to validity and the exemption of interest thereon from Federal income taxation. Certain legal matters will be passed upon for the Underwriters by Preston, Thorgrimson, Ellis & Holman, Underwriters' Counsel, of Seattle, Washington.

It is expected the Bonds will be delivered to the Underwriters for deposit with The Depository Trust Company in New York, New York, on or about June 27, 1985.

Taxes levied by a municipality for purposes other than debt service on general obligation bonds are limited by Alaska Statutes 29.53.050(a) to an amount equal to 3 percent of the assessed valuation of taxable property. Certain types of property related to oil and gas production and transmission, as defined by AS 43.56, are assessed by the State Department of Revenue and, except for taxes levied for debt service on general obligation bonds, taxes against such properties are limited to a State levy maximum rate of 20 mills (2%) on the true value, and levies by municipalities against such properties are treated as credits against the State levy and are subject to certain limitations designed to restrict taxation of such properties by sparsely settled municipalities which have disproportionately large installations of oil and gas facilities within their boundaries. These limitations appear to have no foreseeable material effect upon the financial position or resources of the Municipality, the assessed valuation of such oil and gas properties within the Municipality being only $85,796,600 for 1984 taxes.

At the October 4, 1983 election, voters of the Municipality approved an initiative measure amending the Municipal Charter effective with the 1984 municipal budget (and the 1984-85 School District budget) which provides that the total amount of municipal tax that can be levied during a fiscal year shall not exceed the total amount approved by the Assembly for the preceding year by more than a percentage determined by multiplying the percentage increase in the Federal Consumer Price Index for Anchorage from the preceding fiscal year times the average percentage growth or loss in the Anchorage municipal population over the preceding five fiscal years as determined by the State Department of Community and Regional Affairs. This tax limitation does not apply to:

1. Taxes on new construction or property improvements which occur during the current fiscal year.

2. Taxes required to fund additional services mandated by voter-approved ballot issues.

3. Special taxes authorized by voter-approved ballot issues.

4. Taxes required to fund the costs of judgments entered against the Municipality.

5. Taxes required to pay principal or interest on bonds, including revenue bonds.

6. Taxes required to fund the cost of an emergency ordinance enacted pursuant to the Municipal Charter.

Any tax increases which result from exceptions 1 through 3 set forth above will be added to the base amount which is used for the calculation of the subsequent year tax increase limit.

STATE CONTRIBUTIONS TOWARD SCHOOL BOND DEBT SERVICE

The outstanding general obligation debt of the Municipality included $150,235,000 School Bonds, as of December 31, 1984, issued by the Municipality and its predecessor, the Greater Anchorage Area Borough. The Anchorage School District does not have the authority to issue bonds.

The State of Alaska contributes to local school construction and debt retirement primarily through two programs. Under the first program, the State distributes a share of State tobacco tax revenues among local school districts. The Anchorage School District has dedicated its share of these revenues to debt service on school bonds although it is not required to do so.

The second program was created by the State Legislature in 1970 and provides a system under which the State, subject to annual appropriation, will reimburse local school districts part of the cost of debt service on school construction bonds and a share of the cost of construction of school plant not financed by bonds. Under the statute (AS 43.18.100), the amount of the tobacco tax allocation received by a school district is an offset against the amount of the reimbursement. The reimbursement formula has been revised by the State Legislature several times. Under the current formula, the reimbursement for school bond debt service will be calculated as follows:

1. For debt issued prior to July 1, 1977, the amount of the reimbursement will be 100 percent of debt service

during the fiscal year two years prior to the year of reimbursement (in other words, there is a two-year lag between the year of payment of debt service and the year of reimbursement).

2. For debt issued between July 1, 1977, and December 31, 1981, the amount of the reimbursement will be 90 percent of debt service during the fiscal year two years prior to the year of reimbursement.

3. For debt issued on or after January 1, 1982, and authorized on or before June 30, 1983, the amount of the reimbursement will also be 90 percent of debt service, but the reimbursement will be made in the fiscal year in which the debt service is paid.

4. For debt authorized after June 30, 1983, the amount of the reimbursement will be 80 percent of debt service, and the reimbursement will be made in the fiscal year in which the debt service is paid. None of the outstanding school bonds of the Municipality fall within this category.

Approximately 90 percent of the State of Alaska's revenue is derived from oil and gas production in the form of royalties and taxes. A decrease in the world market price of crude oil has an adverse impact on the State's financial position and, consequently, its ability to fund this program.

Under the statute, in the event funds are not available to fully fund the program, the funds that are available will be distributed pro rata among the eligible local governments. State appropriations are also subject to a Constitutional amendment passed in 1982 which limits State appropriations.

The allocations pursuant to the tobacco tax and State aid programs received by the Anchorage School District the past 10 years have been as follows:

Year Ended June 30	Tobacco Tax Allocation	State Aid Allocation	Total
1985 (Preliminary)	$1,079,068	$17,368.913	$18,447,981
1984	1,069,038	18,552,237	19,621,275
1983	3,075,365	14,272,757	17,348,122
1982	1,061,903	9,914,812	10,976,715
1981	855,623	11,446,809	12,302,432
1980	869,367	9,739,183	10,608,550
1979	894,332	9,944,227	10,838,559
1978	957,931	5,598,798	6,556,729
1977	1,090,725	4,866,856	5,957,581
1976	802,369	4,649,923	5,452,292

MUNICIPALITY OF ANCHORAGE

Anchorage, situated on a broad plain at the head of Cook Inlet in southcentral Alaska, was settled in 1915 as a construction base of the Alaska Railroad built by the Federal Government from the Gulf of Alaska to Fairbanks in interior Alaska. The largest of Alaska's cities, Anchorage is a modern, progressive and dynamic metropolitan center with a population, estimated by the Community Planning Department of the Municipality, of 244,030, as of July 1, 1984.

In 1975, the citizens of the Anchorage area ratified a Home Rule Charter for a unified municipal government, and under the Charter the former governments (the City of Anchorage (the "City"), incorporated in 1920; the Greater Anchorage Area Borough (the "Borough"), incorporated in 1964; and two small incorporated communities, Girdwood and Glen Alps) were dissolved as of September 15, 1975, and the Municipality became their legal successor for all rights, titles, actions, suits, franchises, contracts and liabilities and all civil, criminal or administrative proceedings. The area of the Municipality is coterminous with the area of the former Borough and totals approximately 2,006 square miles (approximately 1,717 square miles of land area).

* Yield is estimated because of thin secondary market supply. Estimate is based on previous trading characteristics.

** Arizona, Arkansas, Colorado, Idaho, Indiana, Iowa, Kansas, Nebraska, South Dakota, and Wyoming have little or no outstanding state general obligation debt.

*** NR = not rated.

**** State comparative trading relationships are subject to change at any moment due to extreme market volatility and heavy supply of new issue state general obligation debt in the primary market.

PROPOSED DRAFT LANGUAGE
FOR MUNICIPAL SCHOOL DEBT SECTION OF
ALASKA PUBLIC DEBT 1986

As of June 30, 1985, $738 million of municipal school debt was outstanding. Under a program enacted in 1970 (Alaska Statutes 14.11.100) the State will reimburse the municipalities for debt service on certain portions of that debt. On June 30, 1985, the aggregate total percentage of municipal school debt to be reimbursed by the State was 93%. The State share of municipal school debt was thus $687 million.

Because the statute which provides for reimbursement of a portion (100, 90 or 80 percent) of debt service on municipal school debt specifies a two year lag between payment by the municipality and reimbursement by the State for debt incurred prior to January 1, 1982, some principal and interest paid during the fiscal years ending June 30, 1984 and June 30, 1985 has not yet been reimbursed. The State share of municipal school debt outstanding on June 30, 1985 plus the State share of municipal school debt principal payments made by the municipalities during prior years but not yet reimbursed by the State amounted to a total of $754 million. If added to the total of State and State supported debt, the amount of the State's principal outstanding on that debt would have been $1,686 million.

On October 1, 1985 voters in six municipalities approved the issuance of an additional $303 million of general obligation school debt. Most of that debt will have been issued by June 30, 1986. Voters in the City of Sitka approved the issuance of $22.6 million of general obligation school debt in a special election on January 27, 1986. Voters in the Kodiak Island Borough will decide on the issuance of almost $10 million of general obligation school debt in a special election on March 25, 1986. If issued, current statute provides for State reimbursement of up to eighty percent of the debt service on that debt during the year in which the payments are made.

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 521

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the issuance of municipal general obligation bonds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.47.190(b) is amended to read:

(b) Before a general obligation bond issue election, the governing body shall have published a notice of the total existing bond indebtedness at least once a week for three consecutive weeks. The first notice must (SHALL) be published at least 20 days before the date of the election. A notice must (SHALL) include

(1) the current total general obligation bonded indebtedness, including authorized but unsold bonds, of the municipality and the current total general obligation bonded indebtedness, including authorized but unsold bonds, of any other municipalities which may be payable from taxes on taxable property in the municipality;

(2) the cost of the debt service on the current

indebtedness;

(3) the total assessed value of taxable property in the municipality; in the municipality

(4) the full value of taxable property as determined by the Department of Community and Regional Affairs ~~under AS 14.17.140~~.

* Sec. 2. AS 29.47 is amended by adding a new section to read:

Sec. 29.47.195. LIMITATION ON MUNICIPAL DEBT. (a) No general obligation bond authorization shall be finally adopted by a municipality unless the net debt of the municipality at the time of adoption of the bond authorization does not exceed 7 percent of average assessed valuation.

insert (b) From HB521 Pg 2, line 1-4 →

(~~b~~ c) Notwithstanding the provisions in (a) of this section, a bond authorization may be finally adopted if the bond authorization authorizes obligations solely for one of the following:

(1) to meet an expenditure which is the result of a natural disaster;

(2) to meet an expenditure which is necessary to protect the public health;

(3) for a purpose which is self-liquidating; or

(4) to refund existing debt.

(~~c~~ d) For purposes of this section the following terms shall have meanings as follows:

(1) "average assessed valuation" means the average of the full value of taxable property for the last two years as determined by the Department of Community and Regional Affairs under AS 14.17.140.

(2) "bond" or "debt" means bonds, notes, or other obligations.

(3) "bond authorization" means the action completed after the bond election by the governing body of the municipality which authorizes a specific amount of general obligation debt of the municipality for a specified purpose but need not include action to fix the rate or rates of interest on the debt or include action to fix further details of the debt or action to sell the debt.

(4) "self liquidating debt" is debt for which the cash receipts from fees, rents, or other charges (other than taxes) [~~in a fiscal year~~] pledged to pay the debt [~~are~~] have been sufficient in each fiscal year since issuance of the debt to meet operating and maintenance costs (exclusive of depreciation and obsolescence) and interest and [~~debt~~] redemption charges on the debt payable or accruing in such year without recourse to general taxation.

(5) "net debt" means all general obligation debt issued, and all general obligation debt authorized but not issued, after deducting the following general obligation debt issued and authorized but not issued:

(A) bond anticipation notes;

(B) revenue anticipation notes issued

pursuant to Art. IX, Section 10, Alaska Constitution;

(C) self-liquidating debt; and

(D) debt for which there are funds on hand or sinking funds pledged to the payment thereof including the proceeds of any bonds or notes held for that purpose.

* Sec. 3. AS 29.10.200 is amended by adding a new subsection to read, and renumbering existing subsections accordingly:

(42) AS 29.47.195 (limitation on municipal debt)

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.070(c).

(4) the full value of taxable property as determined by the Department of Community and Regional Affairs under AS 14.17.140.

* Sec. 2. AS 29.47 is amended by adding a new section to read:

Sec. 29.47.195. LIMITATION ON MUNICIPAL DEBT. (a) No general obligation bond authorization shall be finally adopted by a municipality unless the net debt of the municipality at the time of adoption of the bond authorization does not exceed seven percent of average assessed valuation.

(b) Notwithstanding the provisions in (a) of this section, a bond authorization may be finally adopted if the bond authorization authorizes obligations solely for one of the following:

(1) to meet an expenditure which is the result of a natural disaster;

(2) to meet an expenditure which is necessary to protect the public health;

(3) for a purpose which is self-liquidating; or

(4) to refund existing debt.

(c) For purposes of this section the following terms shall have meanings as follows:

(1) "average assessed valuation" means the average of the full value of taxable property for the last two years as determined by the Department of Community and Regional Affairs under AS 14.17.140.

(2) "bond" or "debt" means bonds, notes or other obligations.

(3) "bond authorization" means the action completed after the bond election of the governing body of the municipality which authorizes a specified amount of general

obligation debt of the municipality for a specified purpose but need not include action to fix the rate or rates of interest on the debt or include action to fix further details of the debt or action to sell the debt.

(4) "self liquidating Debt" is debt for which the cash receipts from fees, rents or other charges (other then taxes) in a fiscal year pledged to pay the debt are sufficient to meet operating and maintenance costs (exclusive of depreciation and obsolescence) and interest and debt redemption charges payable or accruing in such year without recourse to general taxation.

(5) "net debt" means all general obligation debt issued, and all general obligation debt authorized but not issued, after deducting the following general obligation debt issued, and authorized but not issued:

(a) as bond anticipation notes in anticipation of bonds;

(b) as revenue anticipation notes issued pursuant to Art. IX, Section 10, Alaska Constitution;

c. as self-liquidating debt; and

d. for which there are funds on hand or sinking funds applicable to the payment thereof only including the proceeds of any bonds or notes held for that purpose and any accounts receivable or amounts which may be payable from the United States, the state or any public instrumentality thereof, which funds are applicable only to the payment of any part of the debt not otherwise deductible.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

RE: HB521 MUNICIPAL GENERAL OBLIGATION BONDS

I HAVE THE FOLLOWING CONCERNS: REGARDING "SELF-SUPPORTING DEBT", IT IS NOT CLEAR AS TO WHO WOULD MAKE THIS DETERMINATION AND THE PARAMETERS THAT WOULD BE UTILIZED. FOR INSTANCE WOULD G. O. BONDS REPAID FROM DESIGNATED SALES TAX BE CONSIDERED SELF SUPPORTING?

I HAVE OTHER CONCERNS, BUT POM LIMIT IS 50 WORDS.

IN THE HOUSE

BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

CS FOR HOUSE BILL NO. 519 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

(5) borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770;

(6) do and have done all matters necessary for the purpose of any function set out [FORTH] in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the

legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The board may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.010 - 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770.

* Sec. 5. AS 18.55.140 is amended by adding a new subsection to read:

(b) Bonds issued by the authority for public buildings must be issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 - 18.55.290.

* Sec. 6. AS 18.55.288 is amended by adding a new paragraph to read:

(4) "bond" means any bond, note, interim certificate, debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.010 - 18.55.290;

* Sec. 7. AS 22.05.025 is amended by adding a new subsection to read:

(c) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The supreme court may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 8. AS 24.23 is amended by adding new sections to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under

this subsection, the agency shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The agency may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 9. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 - 37.05.280 A [NO] lease or contract for a lease may not provide for a period of occupancy greater than 40 years. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

* Sec. 10. AS 37.05 is amended by adding a new section to read:

Sec. 37.05.285. LEASE FINANCING. The department may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement

under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The department may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 11. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in <u>the</u> [SUCH] manner [AS] it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder <u>or bidders</u>. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 12. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE. There is created <u>within the Department of Revenue</u> a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee <u>[IN THE DEPARTMENT]</u> shall act as a member of the committee in the member's place.

* Sec. 13. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee shall be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 14. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

* Sec. 15. AS 37.15.140 is amended by adding new subsections to read:

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show

(1) all outstanding debt of debt-issuing entities of the state;

(2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt;

(3) which long-term debt is state supported and which is supported only by revenue attributable to the project being financed by the debt;

(4) all long-term capital lease obligations of the state;

(5) the volume of short-term debt issued and retired during

the year by debt-issuing entities of the state;

(6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt;

(7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and

(8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 16. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 17. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in the manner, price or prices, [SUCH] amounts or series, and at the [SUCH] time or times [AS] determined by the committee at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS IN SUCH MANNER AS IT MAY PRESCRIBE. IF SATISFACTORY BIDS

ARE RECEIVED, THE BONDS OFFERED FOR SALE SHALL BE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT THE BIDS RECEIVED ARE NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDERS, IT MAY REJECT ALL BIDS RECEIVED.] The bonds, or each series of them, shall be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest shall be payable annually or semiannually.

* Sec. 18. AS 37.15.460 is amended to read:

Sec. 37.15.460. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide where a [WHETHER THE] notice of sale, if any, is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.450].

* Sec. 19. AS 37.15.650(a) is amended to read:

(a) The toll facilities bonds are sold in the manner, price or prices, amounts or series, and at the time as determined by the committee, at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE ARE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT A

BID RECEIVED IS NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDER, THE COMMITTEE MAY REJECT THE BID RECEIVED.] Bonds, or a series of bonds, may not be sold if the effective interest rate over the life of the bonds exceeds 11 percent per year or that rate of interest that is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest is payable annually or semiannually.

* Sec. 20. AS 37.15.660 is amended to read:

Sec. 37.15.660. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale, and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions, and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.650].

* Sec. 21. AS 37.15 is amended by adding new sections to read:

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public buildings; and

(2) the University of Alaska.

(b) The committee may review the general programs and financing

plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interest of the state, the committee may

School debt PN

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, that may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 22. AS 39.25.120(c) is amended by adding a new paragraph to read:

(19) employees of the state bond committee.

* Sec. 23. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE HOUSE BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

CS FOR HOUSE BILL NO. 519 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

(5) borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770 and approved by law; an appropriation does not constitute approval by law for purposes of this paragraph;

(6) do and have done all matters necessary for the purpose of any function set out [FORTH] in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to

annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The board may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.-010 - 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770 and the building has been approved by law. An appropriation for the building does not constitute approval by law for purposes of this section.

* Sec. 5. AS 18.55.140 is amended by adding a new subsection to read:

(b) Bonds issued by the authority for public buildings must be

issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 - 18.55.290.

* Sec. 6. AS 18.55.288 is amended by adding a new paragraph to read:

(4) "bond" means any bond, note, interim certificate, debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.010 - 18.55.290;

* Sec. 7. AS 22.05.025 is amended by adding a new subsection to read:

(c) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The supreme court may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 8. AS 24.23 is amended by adding new sections to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing

Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under this subsection, the agency shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The agency may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 9. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 - 37.05.-280. A [NO] lease or contract for a lease may not provide for a period of occupancy greater than 40 years. A lease agreement must provide that lease payments are subject to annual appropriation. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

* Sec. 10. AS 37.05 is amended by adding a new section to read:

Sec. 37.05.285. LEASE FINANCING. The department may enter into

lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The department may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 11. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in <u>the</u> [SUCH] manner [AS] it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder <u>or bidders</u>. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 12. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE. There is created <u>within the Department of Revenue</u> a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee [IN THE

DEPARTMENT] shall act as a member of the committee in the member's place.

* Sec. 13. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee shall be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 14. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

* Sec. 15. AS 37.15.140 is amended by adding new subsections to read:

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show

(1) all outstanding debt of debt-issuing entities of the state;

(2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt;

(3) which long-term debt is state supported and which is supported only by revenue attributable to the project being financed

by the debt;

(4) all long-term capital lease obligations of the state;

(5) the volume of short-term debt issued and retired during the year by debt-issuing entities of the state;

(6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt;

(7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and

(8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 16. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 17. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in the manner, price or prices, [SUCH] amounts or series, and at the [SUCH] time or times [AS]

determined by the committee at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS IN SUCH MANNER AS IT MAY PRESCRIBE. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE SHALL BE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT THE BIDS RECEIVED ARE NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDERS, IT MAY REJECT ALL BIDS RECEIVED.] The bonds, or each series of them, shall be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest shall be payable annually or semiannually.

* Sec. 18. AS 37.15.460 is amended to read:

Sec. 37.15.460. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide where a [WHETHER THE] notice of sale, if any, is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.450].

* Sec. 19. AS 37.15.650(a) is amended to read:

(a) The toll facilities bonds are sold in the manner, price or prices, amounts or series, and at the time as determined by the committee, at either public or private sale. [BEFORE SELLING A SERIES OF

BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE ARE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT A BID RECEIVED IS NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDER, THE COMMITTEE MAY REJECT THE BID RECEIVED.] Bonds, or a series of bonds, may not be sold if the effective interest rate over the life of the bonds exceeds 11 percent per year or that rate of interest that is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest is payable annually or semiannually.

* Sec. 20. AS 37.15.660 is amended to read:

Sec. 37.15.660. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale, and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions, and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.650].

* Sec. 21. AS 37.15 is amended by adding new sections to read:

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public

buildings; and

(2) the University of Alaska.

(b) The committee may review the general p ograms and financing plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or

retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interest of the state, the committee may

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, that may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 22. AS 39.25.120(c) is amended by adding a new paragraph to read:

(19) employees of the state bond committee.

* Sec. 23. This Act takes effect immediately in accordance with AS 01.-10.070(c).

STATE OF ALASKA

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER

BILL SHEFFIELD, GOVERNOR

POUCH S
JUNEAU, ALASKA 99811
PHONE: (907) 465-2300

February 20, 1986

The Honorable John Sund
Chairman
House Loans Committee
P.O. Box V
Juneau, AK 99811

Dear Chairman Sund:

Lease purchase financing was contemplated by the delegates to the constitutional convention when they incorporated Section 11 in Article IX. Statutory authority to do this type of financing was given to the Alaska State Housing Authority in 1966 where Chapter 60, SLA 1966, was enacted. A copy of that Act is enclosed for your ready reference.

Also enclosed are memoranda of the Attorney General, dated October 14, 1983, Wohlforth & Flint, dated January 17, 1984, and Birch, Horton, Bittner, Pestinger and Anderson, dated April 4, 1984. These memoranda deal with different questions arising out of lease purchase or, as it is frequently termed, lease revenue financing. As is pointed out in footnote 3 of the Birch, Horton et al., memorandum, between 1966 and 1974 ASHA financed 11 projects under the grant of authority contained in Chapter 60, SLA 1966.

In the context of this substantial history of activity in the area of lease revenue financing, I should like to reiterate that the purpose of HB 519 is 1) to establish a single landlord agency for the leasing by the state of buildings financed by lease revenue bonds and, 2) to provide the authority in the State Bond Committee to manage debt so acquired in a logical manner.

The bill merely seeks to order a potentially chaotic situation with regard to this type of financing. It does not mandate lease revenue financing any more than Section 11, Article IX, mandates such financing. Indeed, nothing in either the constitution or in statute compels the usage of such financing or, for that matter, compels the usage of any type of term financing. All public works projects could be financed through construction appropriations. All could be financed through general obligation bonds. Many, but not all, could be financed through revenue bonds. The method of financing should be chosen to accord with the best interests of the State after careful analysis of the short- and long-term implications of the financing.

As pointed out by Governor Sheffield in his transmittal letter, rating agencies have begun to take into account all state supported debt

when measuring the creditworthiness of a state or a particular financing. It is the informed belief of the members of the State Bond Committee that to fail to enact HB 519 as applicable to all branches of government is to fail to bring order and control to the management of the state's debt.

Some concern has been expressed that the State Bond Committee would, under the terms of HB 519, be vested with the ability to thwart the will of the Legislature by refusing to issue debt or allow the issuance of debt on a whim. The State Bond Committee has been in existence since 1960 and has managed the issuance of general obligation and revenue debt sold since that time. This debt has financed a substantial number of public works for the judicial branch and the executive branch. The management of that debt in a sound manner has resulted in the state's present rating of AA by Standard & Poors and a comparable rating from Moody's, the foremost rating agencies in the United States. I know of no instance when the State Bond Committee has made a judgment as to the value of the project itself. The judgments made by the Committee have been those solely relating to the debt, and the project itself has only been of interest for the role it plays in structuring the debt.

One difficulty could be presented and that would be when the dollar value of several projects, all ready for financing, exceeded the calculated capacity for new debt. Obviously, if all projects arose within one branch of government, that branch would have to establish financing priorities. If the projects arose in more than one branch, negotiations or consultations between or among those branches, conducted by the heads of those branches, would be required to establish financing priorities. The State Bond Committee would render to the negotiators what assistance it could, but since it has no authority to make selections of projects, it could not establish the priorities.

I call your attention to Section 12 of HB 519 which would require the State Bond Committee to report to the Legislature before March 31 of each year, not only as to existing debt, but also future debt and debt capacity. This is a new requirement and is sought as an additional element in the ordering and management of state debt. Such a report would enable the Legislature to make the discrete judgments it must make in authorizing or approving the projects presented during the budget process by each agency of government requiring the construction of public works projects.

Such centralization of management and reporting will greatly assist the state in maintaining creditworthiness in the nation's financial markets and, more importantly, fulfill on an orderly basis the needs of the public for sound and balanced development of public facilities.

Sincerely,

Mary A. Nordale
Commissioner of Revenue

LAWS OF ALASKA

1966

Source:

SB 198 am by Conference Committee

Chapter No

60

AN ACT

To provide public buildings for the use of the state and its political subdivisions.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.55.010 is amended to read:

Sec. 18.55.010. PURPOSE OF SECS. 10 - 290 OF THIS CHAPTER. The purpose of secs. 10 - 290 of this chapter is to remedy the acute housing shortage that exists in certain localities of the state by undertaking slum clearance, low-cost housing projects, housing for persons and their families engaged in national defense activities in the state, and housing projects and housing for veterans of World War II and other citizens of the state and to remedy the short supply of necessary public buildings by providing for the financing, construction and acquisition of public buildings for lease to the state and its political subdivisions.

* Sec. 2. AS 18.55.100(a)(15) is amended to read:

(15) arrange or contract for the financing, design, construction and acquisition of public buildings

for lease to the state or a political subdivision of the state in accordance with secs. 10 - 290 of this chapter.

* Sec. 3. AS 18.55 is amended by adding a new section to read:

Sec. 18.55.105. LEASE OF AUTHORITY'S PUBLIC BUILDINGS TO POLITICAL SUBDIVISIONS. (a) A public building owned by the authority may not be leased to a political subdivision of the state except upon execution of a prior agreement of lease of the premises between the state and the authority. An agreement of lease shall grant an option to the state to apply rental payments made under the lease towards purchase of the premises and receive conveyance of title upon satisfaction of the purchase price. The purchase price shall be a sum equal to all costs of the authority in financing, designing, constructing and acquiring the premises leased and shall include the cost of amortizing indebtedness incurred for those purposes. Total rental payments required under the lease shall equal the purchase price of the premises leased. Upon execution of an agreement of lease between the state and the authority, the state may sublease or assign its interest in the lease to a political subdivision which satisfies the requirements of (b) of this section. A sublease or lease assignment shall include the same option of purchase and right to conveyance of title upon satisfaction of the purchase price as is afforded the state in its agreement of lease with the authority. In case of a sublease to a political subdivision, the state shall covenant with the sublessee that it will not exercise its option to purchase the premises subleased during the term of the sublease.

a political subdivision

ed by adding a new section to
OF AUTHORITY'S PUBLIC BUR-
a) A public

(b) A political subdivision may qualify for a sublease or assignment of the state's interest in a lease with the authority as authorized by (a) of this section only if

(1) the premises which are the subject of the sublease or lease assignment are sought as a replacement for a local facility which is condemned, destroyed by fire or other calamity, or is certified by a state official to be inadequate, unsafe, or otherwise unsatisfactory under the laws of the state for its intended use;

(2) the purchase price of the premises does not exceed $2,500,000;

(3) the amount of total indebtedness outstanding on all premises subleased or assigned by the state under this section does not exceed $7,500,000;

(4) the political subdivision agrees to assign to the state, as security for payments required under the proposed sublease or lease assignment, receipts of state taxes shared with the political subdivision, to the extent of the amount of any default in payments required under the proposed sublease or lease assignment;

(5) the Department of Commerce investigates and certifies to the governor the feasibility of a proposed sublease or lease assignment, including but not limited to certification of the fiscal capacity of the political subdivision to meet payments required under the proposed sublease or lease assignment;

(6) the proposed sublease or lease assignment is ratified by referendum vote of a majority of the qualified voters voting in a regular or special local election

provided that the voters are apprised specifically on the ballot of

(A) the term of years of the proposed sublease or lease assignment;

(B) the amount of required payments;

(C) the security required under (4) of this subsection;

(D) the option to purchase and right of conveyance; and

(E) other terms and conditions of the proposed sublease or lease assignment, as determined by the governing body of the political subdivision;

(7) the proposed sublease or lease assignment is ratified by the legislature by concurrent resolution.

(c) If a political subdivision party to a sublease or lease assignment authorized by this section fails to make timely payment of sums due to be paid under the sublease or lease assignment, the state, upon not less than 90 days' notice to the governing body of the political subdivision, may assess, levy and collect taxes within the political subdivision in an amount equal to the payments due and limited to those taxes which the political subdivision is authorized to assess, levy and collect under other provisions of law. Assessment, levy, collection and enforcement of collection shall be at the time and in the manner authorized the political subdivision under other provisions of law.

* Sec. 4. AS 18.55.288(2) is amended to read:

(2) "public buildings" means a publicly owned structure leased to the state or a political subdivision of

MEMORANDUM State of Alaska

TO: Hon. Daniel A. Casey, Commissioner
Department of Transportation &
Public Facilities
AND
Hon. Lisa Rudd, Commissioner
Department of Administration

DATE: October 14, 1983

FILE NO: 366-101-84

TELEPHONE NO: 465-3600

SUBJECT: Construction financing of a public facility by lease agreement

FROM:
Norman C. Gorsuch
Attorney General

W.F.C.

By: William F. Cummings
Assistant Attorney General
Transportation Section-Juneau

James L. Baldwin
Assistant Attorney General
Governmental Affairs-Juneau

The Department of Administration (DOA) and Department of Transportation and Public Facilities (DOT/PF) have requested our advice whether there is sufficient authority granted by law to permit a state agency to finance the construction of a public facility on state land under a lease agreement with a developer and owner of the facility other than the state. Briefly, the lease agreement consists of a conveyance of a leasehold interest in state land to a developer who constructs a facility on the land which is leased back to the state. Upon expiration of the lease agreement, the facility either reverts to the state or the state has an option to purchase it.

Using this financing technique, DOA proposes to centralize state offices in Anchorage and DOT/PF proposes to construct a legislative hall in Juneau. Under both proposals, facilities owned by others would be located on state land. 1/ The answers to your questions involve consideration of the issues set out below.

1. Does financing a public facility through a lease agreement violate provisions of the Alaska Constitution governing the creation of state debt?

We believe that the financing of construction by lease is valid only if terms and conditions are imposed which provide sufficient evidence that future legislatures are not bound to ap-

1/ We believe that other public facilities are being studied for financing by lease agreement including facilities for the Alaska Vocational Technical Training Center in Seward and a maximum security prison.

propriate money for the rental. 2/ Article IX, section 8 of the Alaska Constitution prohibits the creation of public debt except for capital improvements and then only after authorization by the legislature and a vote of the people. The lease transactions proposed are a means to finance the construction of public facilities without directly appropriating from the general fund for the cost of construction or authorizing the creation of debt by selling general obligation bonds. This makes it imperative that the state's right to possess and use the facility is contingent on annual appropriations from revenue anticipated for the fiscal year in which the lease obligation is incurred. Traditionally, appropriations for lease payments are considered operating appropriations which lapse on June 30 of the fiscal year. A lease agreement which provides for termination of the leasehold if sufficient appropriations to pay rent are not enacted will negate the conclusion that a debt is created. A one-year lease with automatic annual renewal for a maximum number of years upon enactment of an appropriation to finance the annual rent has been approved as a term which negates any possibility that a debt is created. Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981). See also Glennon Heights, Inc. v. Central Bank and Trust, 658 P.2d 872 (Colo. 1983).

2. Does existing law prevent a state agency from entering into a lease agreement for the construction of a public facility?

The lease of state office space is governed by AS 37.05.220 -- 37.05.280. These statutes require a competitive bidding process with award of the contract by DOA to the lowest responsible bidder for the lease. However, the statutes provide one further requirement for office space leases which is lacking in other state contracts for the purchase of goods or services. AS 37.05.280 provides in relevant part that "no contract or lease executed after January 1, 1966, which provides for a payment or payments by the state in excess of $12,000 annually is valid unless the use of the space to be provided for by such contract or lease has been expressly approved by the legislature by concurrent resolution." This provision requires legislative approval of virtually all leases which the state executes to procure office and other space. However, we believe that this part of the

2/ The advice given in this memorandum is consistent with the majority of state courts which have considered the question. E.g., Bulman v. McCrane, 312 A.2d 857 (N.J. 1973); State ex rel. Thomson v. Gisel, 72 N.W.2d 577 (Wisc. 1958); but see Opinion of the Justices, 79 A.2d 753 (Me. 1951).

statute is invalid for two reasons.

Article II of the Alaska Constitution requires that the legislature exercise the law-making power by the passage of a bill not by the adoption of a concurrent resolution. State v. A.L.I.V.E. Voluntary, 606 P.2d 769 (Alaska 1980). Furthermore, the requirement for legislative approval of a lease is a violation of the doctrine of the separation of powers. Governmental power is allocated among the three branches of government by the Alaska Constitution. Some powers are logically allocated to the executive and others to the legislature. The power to execute the law on behalf of the state is one which falls to the executive. Alaska Const. art. III, § 16. It is the role of the legislature to enact laws which establish the conditions under which the executive may enter into leases. Alaska Const. art. II, § 1. However, it is not appropriate for the legislature to reserve a veto power over the enforcement decisions made by the executive. The legislature may amend or repeal the leasing authority for DOA. However, the legislature may not usurp the executive function to lease facilities without destroying the system of checks and balances inherent in our tripartite system of government. 3/ Bradner v. Hammond, 553 P.2d 1 (Alaska 1976).

DOT/PF has limited authority to dispose of land acquired for public works other than highways. 4/ DOT/PF may "vacate land or part of it, or rights in land acquired for public work purposes" by executing and filing a deed in the appropriate recording district upon vacating. AS 35.20.070. "Title reverts to the persons, heirs, successors, or assigns in whom it was vested at the time of the taking." Id. All other disposals of land acquired for public works are conducted by the Department of Natural Resources (DNR).

Before DNR may lease state land, the public must be informed of the nature and terms of the conveyance. Alaska Const. art. VIII, § 10; AS 38.05.035(a)(14), 38.05.345. DNR, acting in

---

3/ The cited portion of AS 37.05.280 was held invalid on the basis of separation of powers and improper exercise of the law making power by the superior court in Marine View Tenants' Association v. ASHA, No. 1JU-80-1037 CIV (Nov. 1, 1981). That case was not appealed. However, this decision has limited precedential value until a final decision is rendered by the Alaska Supreme Court.

4/ AS 19.05.070 grants broader discretion to dispose of land acquired for highway purposes.

concert with DOA, must prescribe a disposal procedure for state land which provides the safeguards required by law and permits the construction of a facility which the state will lease from the developer. That procedure may include the grant of a lease under AS 38.05.315 to the state agency responsible for the facility. The lease granted by DNR will allow the lessee agency to sublease the land for development of a leased public facility under specified terms which will include prior DNR review and selection of the sublessee according to AS 37.05.230. The sublease of the land will continue in effect long enough to secure financing for the facility. The payment of rent under the lease to the state agency for the facility would be contingent on the enactment of annual appropriations. If the lease is terminated by the failure to appropriate, the lessor would be the successor to the state agency's right to possess the building until reversion or exercise of the option to purchase.

3. Does existing law prevent a state agency from obtaining financing from a municipality to design and construct a state-occupied facility on state-owned property and then enter into an agreement with the municipality for payback without competitive bidding?

DOT/PF is proposing to finance the construction of the legislative hall by lease agreement. The City and Borough of Juneau (city) would sell tax exempt municipal revenue bonds, secured by the lease payments to be paid by the state. The state would then supervise the design and construction of the facilities and be the contracting authority.

As a general proposition, DOT/PF has the authority to make contracts with municipalities for public works. AS 35.05.-040(7). The purpose of this form of contract is further defined by AS 35.15.080(c), which provides in relevant part, "[a] municipality may request joint assumption of responsibilities with the department relating to the planning, design, and construction of a public works project." The term "public works" is very broad and includes public buildings. A public building is one which is "owned or controlled and held by the state for government or public use." AS 35.25.020(5) and (6).

We believe that DOT/PF may contract with the city for the planning, design and construction of the legislative hall. We reach this conclusion because under the provisions of the lease agreement, the state will have control over the building which it will hold for government or public use. Additionally, the state will have significant ownership interests in the facility because it holds fee title to the land upon which the build-

ing will be constructed and at the expiration of the lease agreement, will own the building free of the interest of the city. However, a contract may not alter the city's responsibility for repaying the long term debt established to finance the cost of construction of the facility.

Our memorandum of May 9, 1983 indicated that AS 37.05.-230 generally required competitive bidding to award a lease agreement which provides for the construction of a public facility. However, competitive bidding is not required in all instances of public contracting. McKinnon v. Alpetco, 633 P.2d 281 (Alaska 1981). The lease transaction under consideration may present an instance where it is in the best interests of the state to negotiate directly with a municipality rather than offer the contract to the lowest bidder. See AS 37.05.230(2). A decision to negotiate directly requires a detailed finding of fact in writing by DOA. In the finding of fact, the commissioner must justify the conclusion that negotiation is in the best interests of the state. A municipality enjoys a preferred status when dealing with the state. Intergovernmental contracts are not governed by the same considerations applicable to the state when it is participating in the open market place. It is probable that a facility can be financed cheaper with municipal revenue bonds than by private means. It may be futile to obtain any advantage from the competitive bid process. If DOA sets out ultimate facts in the finding which supports the conclusion that negotiation furthers the public's interest, then competitive bidding is not required. Libby v. City of Dillingham, 612 P.2d 33, 45 (Alaska 1980)(Rabinowitz, J. concurring). However, the award without competitive bidding would be subject to judicial review to determine whether the decision was arbitrary, capricious or an abuse of discretion. McKinnon, 633 P.2d at 287; Hertz Drive-Ur-Self Systems, Inc. v. Tucson Airport Authority, 299 P.2d 1071 (Ariz. 1956); Volume Services Division of Interstate United Corp. v. Canteen Corp., 369 So. 2d 391 (Fla. App. 1979).

4. Does the appropriation to finance the site acquisition and planning for a legislative hall contain defects which prevent DOT/PF from proceeding with the project?

Section 95, ch. 106, SLA 1983 appropriates $4,500,000 to DOT/PF plus other money received for land acquisition and facilities planning in Juneau. The land acquisition, planning, and preliminary design efforts for the legislative hall will be paid from this appropriation.

This section makes an appropriation from two sources: $4,500,000 from the general fund and an unspecified amount from

an unspecified source. 5/ This appropriation is for land acquisition and facility planning in Juneau.

The appropriation contains a unambiguous statement of purpose that DOT/PF is appropriated at least $4,500,000 for land acquisition and facilities planning in Juneau. There is no specification of the public facility upon which the appropriation may be expended. The use of the $4,500,000 appropriated for site acquisition, planning, and preliminary design for the legislative hall is within the purpose set out in the appropriation. However, the appropriation of money which may be received from other sources presents a serious legal issue. Because no amount is stated for the appropriation, sufficient authorization may not exist to expend the money beyond the $4,500,000. 6/ Nonetheless, the unspecified source of the appropriation is presumably severable from the general fund part of the appropriation which is stated with specificity in the amount of $4,500,000. AS 01.10.-030. Consequently, until you begin receiving amounts from "other sources," whatever they may be, the expenditure of general fund money authorized by the appropriation is not a problem.

CONCLUSION

We believe there is sufficient authority under existing law to finance the construction of a public facility by lease. However, because this financing technique is not specifically authorized by law, we cannot with absolute certainty advise you that a court would agree with our opinion. You should make allowance for this risk when you plan further development of each project to be financed by the lease purchase method.

WFC:ebc:prm/JLB:pjg

cc: Hon. Harold J. Raynolds, Jr.
Commissioner
Department of Education

5/ We presume "the other money received" was intended to include money to be provided under a lease agreement with the city as discussed in section 3, supra.

6/ Each appropriation must state an amount. AS 24.30.030. It is not necessary for the appropriation Act to set out the amount in dollars and cents if the appropriation contains provisions which make the amount capable of mathematical calculation. Orbison v. Welsh, 179 N.E.2d 727 (Ind. 1962).

MEMORANDUM

Constitutional Debt Limitation/State and Municipal Leaseback Transactions

This memorandum reviews cases relating to state and municipal leaseback transactions, focusing on the viability of such transactions under constitutional debt limitations. For purposes of clarity, it may help to begin by defining some of the terms used in this paragraph.

Our concept of "leaseback transaction" generally includes the following basic elements:

(1) one party is a state or local government which cannot or will not directly finance a capital project (with "capital project" here generally limited to those capital projects which do not generate user income other than in the form of rent from the state or local government users);

(2) a second party to the transaction is the financing entity, which may be either a public or private corporation;

(3) the financing mechanism generally involves the issuance of bonds; and

(4) the relationship between the state or local government and the corporation is established by a lease agreement under which the state or local government agrees to lease from the corporation the capital project financed with the corporation's bonds; there may also be a preceding lease or sale of land from the state or local government to the corporation for use as the site of the capital project.

By "consitutional debt limitations" we refer to those provisions in the various state constitutions which inhibit the ability of a state or local government to incur debt. These limitations generally fall into one of two categories: (1) those which prohibit debt absent voter approval except for certain

enumerated purposes; and (2) those which limit permissible debt to a particular amount, usually expressed as a percentage of revenues. Alaska's debt limitation falls into the former category, and, because of their relevance to proposed leaseback transactions in Alaska, we present here in full the four pertinent sections from the Constitution of the State of Alaska, Article IX:

> SECTION 8. STATE DEBT. No state debt shall be contracted unless authorized by law for capital improvements or unless authorized by law for housing loans for veterans, and ratified by a majority of the qualified voters of the State who vote on the question.The State may, as provided by law ratification, contract debt for the purpose of repelling invasion, suppressing insurrection, defending the State in war, meeting natural disasters, or redeeming indebtedness outstanding at the time this constitution becomes effective.
>
> SECTION 9. LOCAL DEBTS. No debt shall be contracted by any political subdivision of the State, unless authorized for capital improvement by its governing body and ratified by a majority vote of those qualified to vote and voting on the question.
>
> SECTION 10. INTERIM BORROWING. The State and its political subdivisions may borrow money to meet appropriations for any fiscal year in anticipation of the collection of the revenues for that year, but all debt so contracted shall be paid before the end of the next fiscal year.
>
> SECTION 11. EXCEPTIONS. The restrictions on contracting debt do not apply to debt incurred through the issuance of revenue bonds by a public enterprise or public corporation of the State or a political subdivision, when the only security is the revenues of the enterprise or corporation. The restrictions do not apply to indebtedness to be paid from special assessments on the benefited property, nor do they apply to refunding indebtedness of the State or its political subdivisions.

We note also the presence of Article IX, Section 16, of the Alaska Constitution, which establishes a ceiling on permissible annual appropriations by the State. While this section is not per se a limitation on debt (the section expressly exempts from its provisions appropriations of bond proceeds), it may have some effect on the feasibility of a proposed leaseback transaction to the extent that it limits the state's ability to make appropriations.

Finally, among our list of defined terms is "lease participation certificate." By this, we refer to the financing instrument used in a lease participation transaction. A "lease participation transaction" has the same basic elements described for a "leaseback transaction" with one exception: instead of or in addition to issuing bonds to finance the capital project, the corporation, as lessor of the project, issues lease participation certificateswhich entitle their holders to a share of the lease revenues generated by the project.

With these preliminary matters established, we proceed now to an overview of the research we have completed with regard to leaseback transactions and constitutional debt limitations.

OVERVIEW

In preparing this memorandum, we have reviewed some 47 cases decided in 26 states. The earliest case was decided in 1939, the most recent in 1982. There are earlier cases which we declined to include in this survey, primarily because of the existence of more recent cases in their jurisdictions. For ease of reference, we will refer to those cases which have invalidated leaseback transactions as invalidating cases and to those cases which have upheld leaseback transactions as validating cases.

While legal research can seldom, if ever, be satisfactorily reduced to figures and statistics, some of the numbers revealed by our research may be of interest. Of the 47 cases we reviewed, 21 were invalidating cases and 26 validating. Among the 26 states in which these 47 cases were decided, 16 states can be considered validating states in the sense that the most recent decisions in those states are validating decisions. The remaining 10 states have only invalidating decisions, but only two of those states -- Ohio and New Mexico -- have considered the question more than once. Of the 16 validating states, 10 have considered the question more than once. Six of the validating states had early invalidating decisions followed later by validating decisions. In no state has an invalidating decision followed a validating decision.

On the following pages of this memorandum, we will generally follow a chronological order in presenting the cases reviewed; however, three states -- New Jersey, Wisconsin, and Missouri -- have had such extensive judicial review of leaseback transactions that their cases are most instructive if viewed apart from the others. Therefore, the following pages will begin with cases decided in New Jersey, Wisconsin, and Missouri and will then proceed with a chronological review of the cases from the other states.

NEW JERSEY

New Jersey's supreme court has decided four leaseback transaction cases. Its first decision, McCutcheon v. State Building Authority, 97 A.2d 663 (N.J. 1953), became the most cited of the leaseback transaction cases of all the states. McCutcheon has been cited approvingly or for support in the invalidating cases of Arizona, Iowa, Massachusetts, Ohio, Oregon, Washington, West Virginia, and Wisconsin. It has also been cited and then ignored, distinguished, or dismissed by many of the validating cases.

In 1968, the New Jersey court expressed some clear misgivings about its McCutcheon decision, though it did not expressly overrule the decision at that time. In 1973, the court fortified the impression created in the 1968 case that it no longer endorsed McCutcheon. Again, however, the court did not expressly overrule the decision at that time. A New Jersey Appellate Court summed up the status of McCutcheon in 1981 with the following comment: "it is apparent that as precedent the case is dead; it simply has not as yet been interred." Enourato v. New Jersey Building Authority, 440 A.2d 42, 48 (N.J. Appel. 1981). Final interment arrived in 1982 when Enourato was appealed to the New Jersey Supreme Court, which expressly overruled McCutcheon.

The effect of McCutcheon on other state courts which have reached invalidating decisions should be noted. We listed above eight states whose courts have reached such invalidating decisions. Three of these states -- Arizona, West Virginia, and Wisconsin -- have since had validating cases decided in their supreme courts. The remaining five states have not had any other post-McCutcheon cases. It will be interesting to note the effect, if any, which the overruling of McCutcheon has on those states as future cases come before their courts.

McCutcheon involved a statutorily created public corporation known as the State Building Authority. The sole business of the Authority was to provide for the construction and acquisition of buildings through the issuance of its bonds. The source of income to the Authority from which the bonds were to be

repaid was the leasing of the buildings to the state and its various departments and agencies. Under the Authority's enabling statutes, the lease contracts would be "valid and binding upon the department, agency, or instrumentality of the State, notwithstanding that no appropriation was made or provided to cover the cost or estimated cost of the contract." 97 A.2d at 665.

Neither the statutory nor the lease provisions set forth by the court in its opinion indicate whether or under what circumstances title to the property would be transferred to the State; however, the statute did authorize the Authority to convey property it acquired. In any event, the most significant concern to the court, as reflected in the following passage from the opinion, was whether the lease contracts were actually purchase contracts:

> While in form a way of providing the State with leasehold interests in building facilities for public use, in reality the design of the act is to enable the State by contracts of purchase to acquire for state use buildings possessed and constructed by the Authority by means of bond issues sustained by the State's promise to supply in the guise of rentals sufficient money to liquidate the bonds, available only through the medium of annual appropriations. And this in disregard of the constitutional debt limitation and the restraints laid by the organic law upon the appropriations process. There is no pretense of conformance with the debt limitation provision; there was no submission of the project to the electorate .... The legislation proceeds upon the hypothesis that the fulfillment of the project will not burden the State with a debt or liability within the constitutional sense. But in this the accent is on the external appearance rather than the substance. The label is unimportant; it is the essence that controls. It is an obvious truism that constitutional limitations may not be set at naught by indirection.

97 A.2d at 668. It was this piercing of the lease contract to unveil an underlying purchase agreement which primarily led the court to conclude that the transaction was governed by, and invalid under, the State's constitutional debt limitations.

Another important factor to the court was the nature of the Authority. Regarding this factor, the court stated:

> There is for the reasons stated, a radical difference in the relationship between the State and the Authority and the State and a private corporate lessor....The Authority is not an independent autonomous public corporation. It may lease its building faciltities only to the State, its departments, agencies, and instrumentalities....And, quite apart from the other considerations heretofore adverted to, the State's taxing power is the sole source of its revenue.

97.A.2d at 671. The court's apparent perception of the Authority as, in essence, the alter ego of the State involved in a transaction which the court viewed as, in essence, a purchase agreement created the situation necessary for the court to reach its conclusion. From the court's perspective, it was reviewing, in essence, a capital construction contract entered into by the State without the required voter approval. The result was inevitable.

As noted above, the statute made the lease payments valid and binding against the state agencies entering into the lease contracts even if the legislature failed to make appropriations for such payments. While the meaning of the statute is not clear, one might have expected the court to use the statute to conclude that any lease entered into under it would be prohibited debt by virtue of its apparent attempt to avoid the appropriation process. Instead, the court virtually ignored the statute. In fact, the following passage, which should most likely be considered as dicta, reflects the opposite situation -- one in which there is no obligation to make payments except to the extent that appropriations so provide:

> The constitutional debt-limitation provision is not limited in quality and scope to debts enforceable by action. It has in view the temptation or inducement and incentive to make appropriations for "debts" beyond the prescribed amount, unless approved by the people in the manner ordained. Moral and ethical compulsions are not to be allowed to override the constitutional safeguard against improvidence and the integrity of the State's economy.

97 A.2d at 671

By the court's own account, McCutcheon stood as a rigid enforcement of the state's debt limitation provisions. Any leaseback transaction plan which reflected any indicia of a purchase -- whether by transfer of title at termination of the lease, or by the holding of title by a public corporation, or by lease payments fashioned to pay for debt service on the bonds -- would likely have failed before that court, at least to the extent that one party to the plan was a public corporation whose only customer was the State.

Fifteen years after McCutcheon, the New Jersey Supreme Court again considered a leaseback transaction case, this time with a markedly different result. The second of the New Jersey cases was Clayton v. Kervick, 244 A.2d 281 (N.J. 1968). The opinion was written by Justice Jacobs, the only remaining member of the McCutcheon court and a dissenter in that case (along with Justice, later to become Mr. Justice, Brennan).

The statute in Clayton established the New Jersey Educational Facilities Authority. The Authority was empowered to borrow money and issue bonds to construct projects to be leased to public and private colleges. The projects were anticipated to be revenue producing projects (such as dormitories), and the revenues they produced were primarily the source from which lease payments were to be derived. To this extent the transaction in Clayton was not a "leaseback transaction" as we have defined the term for purposes of this memorandum, and, indeed, it was the revenue-producing character of the projects upon which the court ultimately distinguished the Clayton situation from the McCutcheon situation.

Nevertheless, before distinguishing McCutcheon, the court referred approvingly for nearly two full pages in its opinion to the dissent in McCutcheon and to cases from other states which had rejected the majority opinion in McCutcheon. As to the McCutcheon dissent and the cases from the other states, the court stated:

> these decisions, along with the dissent in McCutcheon, appear to us to be clearly the more persuasive....

244 A.2d at 281. Although the court was able to find a way to distinguish, rather than expressly overrule, McCutcheon its disenchantment with the earlier case was apparent.

Thus, while Clayton, is not, strictly speaking, a leaseback transaction case under our definition, its use by the court as the vehicle to undercut McCutcheon, to warmly embrace

the McCutcheon dissent, and to cite approvingly the leaseback transaction cases from other states rejecting the McCutcheon thesis makes the case important for our purposes. Fifteen years after writing his dissent in McCutcheon, Justice Jacobs was finally able to incorporate into a majority opinion his thoughts about the McCutcheon case. Taking full advantage of the opportunity, he recorded the following pertinent comments, among others:

> In their separate opinion, the dissenting justices [in McCutcheon] referred to the fact that the generally accepted accounting practice thoughout the country does not encompass future rents as debts or liabilities and that corporate balance sheets would be examined in vain for references to lease rentals payable in future years....
>
> The majority in McCutcheon apparently viewed the rental plan as a purchase rather than a lease and as evasion rather than avoidance of the debt limitation....But, as the dissent pointed out, leases between affiliated governmental bodies are common and unquestioned in our society and there was no plausible basis for dishonoring the carefully formulated leasing arrangement between the independent Building Authority and the non-autonomous agencies of the State.

244 A.2d at 288.

Although the Clayton court chose to distinguish rather than overrule McCutcheon, and though much of what the Clayton opinion had to say about McCutcheon was, therefore, simply dicta, it should have been reasonably clear that Clayton marked the deathknell for the earlier case. Still, five years later, a New Jersey Superior Court apparently had not yet clearly received the message.

Bulman v. McCrane, 302 A.2d 163 (N.J. Super. 1973), involved the following issue as explained by the court:

> Put concisely, the problem presented is whether a lease-purchase arrangement whereby a state agency contracts with a builder to erect a facility on state-owned land and lease the same to the State for a term of

> years at stipulated annual rentals, with an option to purchase at intervals during the term, title to revert to the State at the expiration thereof, violates the debt limitation clause of the State Constitution.

302 A.2d at 164. After reviewing McCutcheon and Clayton, the Superior Court concluded that neither provided guidance for a situation involving a lease to the State of a non-income producing facility by a private corporation. While it avoided using either case as authority for its decision, the court nevertheless reached the McCutcheonesque conclusion that, while the arrangement was cast in the form of a lease, it was, in essence, a purchase agreement. As such, the court determined that the arrangement created prohibited debt. The reason for the court's perception of the arrangement as a purchase agreement basically rested upon the fact that the lease provided for reversion of the building (which was built on state-owned land) to the State at the expiration of the lease.

Nine months later, the New Jersey Supreme Court reversed. Bulman v. McCrane, 312 A.2d 857 (N.J. 1973). The court stated:

> The fact that the State may be advantaged by ultimately acquiring title to a potentially useful building as the residue of a transaction otherwise faithful to the theory of a lease...represents no good reason for judicial assiduity in laying hold of that circumstance to destroy the transaction as an unconstitutional debt. The sole obligation of the State here is for future installments of rent. They will presumably be paid out of current revenues as annually appropriated for the purpose. Under settled principles, there is no present debt in the constitutional sense.

312 A.2d at 863-864 (footnote omitted).

The most recent of the New Jersey leaseback transaction cases is Enourato v. New Jersey Building Authority, 448 A.2d 449 (N.J. 1982). The statute in this case, very much like that in McCutcheon, created a state building authority the sole function of which was to construct buildings for lease to the State. Rental payments, made subject to annual appropriations, were the sole source of repayment of the bonds issued by the Authority to finance the construction of the buildings. The bonds, of course,

expressly stated on their face that they were the obligations of the Authority and not the State. In a relatively brief review of the question, the court rejected the claim that the Authority's bonds would create a state debt. The court noted:

> The Authority's creditors have notice that their only remedy lies against the Authority.
>
> Nor does the liability of the State on its lease agreements with the Authority create any debt of the State. Both the statute and the lease make clear that all rent payments from the State are subject to legislative appropriations....
>
> Since the Building Authority Act does not authorize the creation of any debts by the State, the debt limitations clause...does not apply to the Authority's debts or any obligations of the State on its lease agreements with the Authority. We have already disapproved the contrary result reached by a sharply divided Court in McCutcheon...and now expressly overrule that case.

448 A.2d at 456.

These New Jersey cases, from McCutcheon to Enourato, demonstrate an evolution in judicial thinking with regard to leaseback financing. Several of the early cases took the view expressed in McCutcheon of rigid adherence to debt limitation provisions. Under that view, the enforceability of an obligation claimed to exist against a state was not determinative. Any arrangement which appeared to be or could plausibly be said to be a purchase agreement was equated with debt. If there were any moral obligation to make payments or even if the court surmised that, because of practical considerations, the legislature would most likely make the appropriation for the payments regardless of the existence of any moral or legal compulsion, that, too, could be equated with debt. We believe the modern trend and certainly the majority position is more closely attuned to the Enourato view. As long as the obligation of the state under the lease agreement is clearly subject to annual appropriation by the legislature, as long as the bonds issued to finance the project clearly identify the foregoing and clearly indicate that they are not the obligations of the state, as long as state property is not encumbered (a factor extensively discussed in the Wisconsin cases reviewed below), and as long as the enabling statutes

authorizing the transaction reflect all of the foregoing, the likelihood is that the transaction will be upheld.

WISCONSIN

Like New Jersey, Wisconsin's supreme court has reviewed four cases concerning leaseback transactions. Unlike New Jersey, however, all of Wisconsin's cases were decided in a two-year period (1953 -- 1954), and, in its four decisions, the Wisconsin court has not experienced the dramatic change in attitude reflected in New Jersey's cases.

The first Wisconsin case was State v. Giessel, 65 N.W.2d 529 (Wisc. 1954) (herein "Giessel I"). The plan in Giessel I called for the incorporation of a non-profit corporation by the State Building Commisssion. The Commission would lease state land to the corporation. The corporation would construct a building on the land and lease both land and building back to the Commission for the use of state agencies. As security for its loans, the corporation would have the ability to mortgage its lease of the land and of any buildings on the land. One project of the corporation was to construct an addition to an existing state office building. To secure financing for the project, the corporation intended to mortgage the lease to the corporation of the land and existing building.

The court found no fault with the financing plan except with regard to the mortgaging of an interest in state property. As to such mortgaging, the court declared the plan unconstitutional and void, stating:

> Logically there would seem to be just as much coercion on the part of the state to pay an indebtedness, for the payment of which existing state property, or an interest therein, had been pledged as security but the state had not otherwise agreed to pay the debt, as
>
> the state had made itself directly liable for the payment thereof.

65 N.W.2d at 540.

Three months later, the court decided State ex rel. Rogers v. Milligan, 66 N.W.2d 326 (Wisc. 1954) (herein "Milligan I"). This case involved virtually the same facts as in Giessel I and was decided in accordance with that case.

Early in 1955, the court had before it State ex rel. Rogers v. Milligan, 69 N.W.2d 485 (Wisc. 1955) (herein Milligan II"). Once again, the facts were virtually identical to Giessel I and Milligan I except that here the building company as lessor of the land (which was owned by the city and leased to the building company) and building, instead of mortgaging its leasehold interest in the land, would be able to re-enter and take possession of the land and building if the city failed to pay its rent. The court saw no distinction in this feature of the lease and ruled the plan unconstitutional, noting, however, that if the building company were also the owner of the land "this objection to the lease would be eliminated." 69 N.W.2d at 487.

Finally, toward the end of 1955, the Wisconsin court considered State ex rel. Thomson v. Giessel, 72 N.W.2d 577 (Wisc. 1955) (herein "Giessel II"). Decided only two years after McCutcheon, Giessel II became the second most prominent case on leaseback transactions (after McCutcheon). In a lengthy analysis of the leaseback transaction before it, the court considered McCutcheon and rejected the conclusions of that case, stating:

> That case is distinguishable from the present situation in that it rests on legal premises which this court has not adopted....This court....has heretofore held that no debt is created unless the state itself is under a legally enforceable obligation.

72 N.W.2d at 589. The Wisconsin court indicated various distinguishing factors between the two cases and between the constitutions of the two states. Whether it was a result of those distinguising factors or, more likely, a result of a plain disagreement between the two courts, the Winsconsin court reached conclusions opposite to those of the New Jersey court with respect to two significant legal issues: first, as noted above, the Wisconsin court found no constitutional debt in the absence of a legally enforceable obligation; and second, the Wisconsin court, though it did not find an installment purchase contract to exist in the plan before it, indicated that even if such contract did exist it would not necessarily create state debt (this second conclusion being no more than a corollary to the first in that a purchase contract, to the same extent as a lease, creates no debt in the absence of a legally enforceable obligation).

The plan before the court in Giessel II was a typical leaseback transaction involving a private, nonprofit corporation as the financing entity. The corporation was empowered to either purchase or lease land from the state for the purpose of constructing buildings on the land and either leasing or subleasing,

depending upon the interest initially conveyed to the corporation, the land and building to the state. There were three causes of action presented to the court in Giessel II.

The first cause of action related to a lease and sublease. Rent on the sublease was calculated to enable the corporation to retire the indebtedness to be created in the construction of the building. The sublease provided that "it is mutually agreed by the parties hereto that the corporation, its successors or assigns, hereby waive, relinquish and release any and all rights of re-entry, or to re-take possession of the herein demised premises, and hereby agree not to exercise any such rights, in the event of nonpayment of rent or of other defaults hereunder by the University, its successors or assigns." 72 N.W.2d at 580. The second cause of action involved the same type of arrangement with the same re-entry waiver.

The third cause of action related to a sale of land by the state to the corporation. The corporation was to build an office building on the land and lease it to the state building commission. The loan by the corporation to finance the construction was to be secured by a mortgage on the land. The lease provided that if the legislature failed to appropriate money for rental or for any other breach of the lease, the corporation would be entitled to "enter on, and expel, the commission from said premises forthwith, and without notice, and the corporation may from time to time apply all monies held by the corporation as security for faithful performance by the commission of its covenants and undertakings hereunder, to the payment of all damages sustained by the corporation by reason of any such default, which damages shall include, without limiting the generality of the foregoing thereby, the cost of decorating, altering and improving the premises and brokers' commission incurred in reletting the same, and also the difference between the net income actually received by the corporation from said demised premises upon reletting and the rent limited herein." 72 N.W.2d at 581. The lease further provided that it was made subject to a mortgage made by the corporation to its lender. Under the mortgage, rents to be paid by the commission were pledged to the lender.

With regard to these causes of action it should further be noted that (1) the state consented to a pledge or assignment of the state's obligation to pay rent by the corporation to its lender; (2) the state purchased equity in the building projects described in the first two causes of action in amounts greater than fifty percent of the cost of the projects; and (3) the state was authorized to use income derived from existing state buildings to pay the rent on the building described in the first cause of action.

The court first considered whether the state's consent to the assignment of its rental payments to the corporation's lender created debt. The court ruled that it did not and referred to the principle enunciated in Giessel I that the payment of future rent is not a presently existing debt. 72 N.W.2d at 584. The court noted that the assignment of the rents simply changed the party entitled to receive the rents if paid and did not obligate the state to pay the corporation's obligations.

The court next considered whether the state's investment in the projects led to prohibited debt. The court rejected the contention, stating that the investment did not obligate the state to pay all or any portion of the sums borrowed by the corporation to construct the buildings "even though good judgment may dictate that it do so voluntarily". 72 N.W.2d at 586.

The court next encountered the old McCutcheon argument that the leases and subleases were, in effect, contracts of purchase which created impermissible state debt. As noted above, the court chose not to follow McCutcheon and adhered to its general principle that where there is no obligation against the state to make payments, whether under a lease or under a purchase contract, there can be no debt.

Finally, the court considered whether the state's agreement to use income from existing state buildings to pay the rent on the building leased from the corporation created a state debt. The court noted that the nature of the fund from which the rental payments were to come had no bearing on the nonenforceable and contingent nature of the state's obligation and, therefore, did not affect the court's determination that no debt had been created.

To the degree that McCutcheon was rigid, Giessel II can be said to be flexible in considering its constitution's debt limitation provisions. Giessel II represents the position that as long as the state's obligation is nonenforceable and contingent and as long as there can be no loss of state-owned property there is no state debt.

MISSOURI

The first of the Missouri cases is Board of Public Buildings v. Crowe, 363 S.W.2d 598 (Mo. 1962). The financing entity in that case was a public corporation which had authority, once it constructed a building in a city, to require any state agency which occupied rental quarters in such city to rent space from the corporation's building and to contribute from funds

appropriated for such agency's support a proportion of the rentals of the building. It was argued in the case that the payment of rentals from funds appropriated to the state agencies and taken from revenue raised by taxation would create a "liability" of the state. The court noted that no rents could be paid by any agency unless the legislature appropriated money to that agency. Once such an appropriation was made, the money lost its character as general state revenue. The court rejected the contention and sustained the transaction.

Crowe was followed in 1971 by New Liberty Medical and Hospital Corporation v. E. F. Hutton and Company, 474 S.W.2d 1 (Mo. 1971). In this case the Missouri court did find constitutionally prohibited indebtedness arising from the provisions of the lease agreement used in the leaseback transaction. Under the agreement, the hospital district (which was subject to the state's constitutional debt limitations) was obligated unconditionally to pay rentals "without abatement, deduction, set-off, counterclaim, recoupment or defense or any right of termination or cancellation arising from any circumstances whatsoever." 474 S.W.2d at 6. The court noted that

> This is more than the usual obligation of lessee to pay rent for premises furnished. It is an unconditional undertaking to pay a sum total which will equal the principal and interest on the debentures plus taxes, costs and certain other items over a 30-year period, even if for some reason the premises become unavailable for use of lessee. This is assuming indebtedness which must be paid in all events.

474 S.W.2d at 6. Not surprisingly, the court invalidated this leaseback transaction. A similar lease agreement was used in the third Missouri case, Scroggs v. Kansas City, 499 S.W.2d 500 (Mo. 1973), and it, too, was invalidated by the court.

The last of the Missouri cases was St. Charles City-County Library District v. St. Charles Library Building Corporation, 627 S.W.2d 64 (Mo. 1981). Like the lease agreement in the Colorado Gude decision, discussed later in this memorandum, the district here was able to avail itself of annual options to renew. Because of this feature, the court distinguished Scroggs and held that there were no long-term repayment obligations created on the part of the district and, hence, no violation of the constitutional debt limitations of Missouri.

OTHER STATES

Having reviewed the cases of three of the most active courts in the leaseback transaction area, we proceed in this part to review the remaining cases from the other states. As noted earlier, this review will proceed in chronological order.

The earliest case in our survey is State v. Griffith, 22 N.E.2d 200 (Ohio 1939). The leaseback transaction in this case involved a public corporation which constructed additions to state mental hospitals and subleased the buildings back to the state Department of Public Welfare. Under their contract, the department pledged "all and every part of its available source of income" to pay the rent on and to maintain the buildings. There were a number of elements to the transaction to which the court took exception in invalidating the arrangement.

While the court accepted the concept that pure revenue bonds (that is, those payable solely from the revenues generated from the project financed with the bonds) were acceptable under constitutional debt limitations, the court could not accept a general obligation bond of a public corporation. This was particularly so in a situation, as in this case, where the public corporation was joined in its obligation by the Department of Public Welfare

The court noted that

> the obligation of the Department of Public Welfare of the state of Ohio under its contract with the authority to pay as rental for the state property turned over to the authority the sum of $421,500 per annum for twenty-five years, plus other expenses of the authity is an absolute and outright obligation of the department, an arm of the state, on account of such bonds. In addition the department obligates itself to liquidate the indebtedness to the authority by pledging "all and every part of its available sources of income" and "to fix the amount or amounts to be charged and collected for the support of patients and inmates of the hospitals under [its] control...so as to be sufficient in the aggregate to provide available funds to pay the maintenance costs of said buildings-...and to pay the Public Institutional Building Authority the sums" promised....

22 N.E.2d at 205. The court additionally disapproved of the pledging of income derived from existing buildings in addition to the income to be derived from the buildings financed with the bonds. The court reasoned that "to the extent that the income from the use of these buildings is diverted to the payment of rental to the authority for the purpose of servicing these bonds, the general revenues from taxation to support these institutions must necessarily be increased to the same extent. The income from the institutions ought to be increased, by reason of the new structures, but there will also be greater expense in administration and upkeep." 22 N.E.2d at 205.

Plainly, the most serious problem in the Griffith situation was the outright pledge by a department of the state to pay a sum certain annually under contract with the corporation. Because of the number of concerns expressed by the court, it is difficult to surmise how a provision making all payments subject to annual appropriation by the legislature might have changed the court's conclusion, but such provision could only have helped the situation.

In 1941, New Mexico's supreme court rendered the first of its two leaseback transaction cases, State Office Building Commission v. Trujillo, 120 P.2d 434 (N.M. 1941). Trujillo presented a lengthy and considered analysis of leaseback transactions in the light of constitutional debt limitations and became another oft-cited and significant case in the area.

As much as any other case in the field, Trujillo clearly pointed out the dual considerations inherent in any leaseback transaction involving a public corporation. The court carefully considered the relationship of the public corporation in Trujillo to the state and then considered the nature of the obligation entered into by the state itself.

The statute creating the corporation in Trujillo designated it "a public body corporate as an agency of the State." The court immediately seized upon this language and noted that "it is through such agency that the State is to act, and being an agency, its acts are the acts of the State." 120 P.2d at 440. The conclusion that the bonds of the corporation are then debts of the State itself could hardly be avoided from that point. It may not be likely that the same difficulty would be encountered in Alaska considering the Alaska Consitution's express reference to obligations of public corporations as exceptions to this state's debt limitation provisions. (Constitution of the State of Alaska, Article IX, Section 11); however, it is certainly advisable in any event to give the courts a clearer indication that a separate and independent legal entity is intended to be

created as has generally been done in the statutes creating Alaska's present public corporations.

From the perspective of the obligation created by the other state agencies in entering into the lease contracts, it was urged upon the court that the rental payments should not be considered debt for the reason that they amounted to current administrative expenses. This, of course, was the argument accepted by the Wisconsin court in Giessel II; however, the facts in this case did not permit such a conclusion. There was no provision in the agreement or in the statute making the payment of rent by the state agencies contingent upon appropriation for the purpose; in fact, once the agencies entered into the lease agreement, both the statute and the agreement prevented them from terminating the lease except under narrowly specified circumstances. As the court noted:

> Subject only to the one condition set out in said section, the state would be obligated to continue payment of rentals until the indebtedness of the Commission was satisfied. This would mean, so long as the agencies did not recede from the lease agreements under the one specified condition, that future legislatures would be bound to provide appropriations for payment of rentals.

120 P.2d at 448 (emphasis in original). The lesson from this aspect of the case is the now familiar refrain: the obligation of the state agency to pay rent must be contingent upon the legislature's decision to appropriate for that purpose. Such a provision might not have saved the case before a court such as that in McCutcheon, but it could have made a difference in many of the cases.

The next leaseback transaction case was Opinion of the Justices, 79 A.2d 753 (Maine 1951). In this lone entry into the leaseback transaction arena by the Supreme Court of Maine, the state senate presented to the Justices a proposed leaseback transaction the only significant feature of which was a statutory provision which appeared to make it mandatory upon the state and the public corporation to enter into a lease agreement upon completion of construction of the building by the corporation. The lease agreement was to provide rents sufficient to retire the corporation's bonds. There is no provision indicating that rental payments by the state were subject to appropriations.

The court foreshadowed the McCutcheon analysis by finding the "so-called" lease to be a contract of purchase.

> The so-called rental is not true rent, to wit, payment for the use of property. The total amount of so-called rental is the purchase price the State is to pay for the property....Being a contract of purchase, obligating the State to pay the purchase price, unless the entire amount thereof is to be paid pursuant to appropriation presently made from funds or revenues currently available therefor, such contract of purchase would in the consitutional sense be a liability created by the Legislature on behalf of the State.

79 A.2d at 756 (emphasis in original).

In 1955, two leaseback cases from two states emerged. In McArthur v. Smallwood, 281 S.W.2d 428 (Ark. 1955), the rental payments from the state to the public corporation were to come first from legislative appropriations and, if such appropriations were not forthcoming, then from a special levy to be assessed by various county treasurers. Noting particularly that there was no obligation on the legislature to make the appropriations, the court upheld the transaction. The special levy was upheld on the basis of the "special fund doctrine", which was also a significant consideration in the Trujillo case. The "special fund doctrine" provides, in essence, that the repayment of bonds from a special tax or levy does not violate state debt limitations because the general taxing power of the state is not involved. Any reliance upon such a doctrine in Alaska, of course, would require serious consideration of the dedicated fund prohibition in the Alaska Constitution (Article IX, Section 7).

The other 1955 case was State v. Yelle, 289 P.2d 355 (Wash. 1955). Yelle relied extensively on McCutcheon, employed the same analysis, determined that the lease was actually a purchase, and invalidated the arrangement. The opinion does not clearly indicate whether there was any compunction on the legislature to make the appropriations to pay for the rents, nor is it clear that the rental payments were contingent upon such appropriations. In any event, such considerations probably do not make much difference with regard to the McCutcheon progeny. We have discovered no Washington case subsequent to the crumble or demise of McCutcheon.

Illinois' court considered a municipal leaseback transaction in People v. Public Building Commission of Chicago, 142 N.E.2d 67 (Ill. 1957). Of particular importance to that case was a provision in the statute which required municipalities entering into leases with the public corporation to "enact an ordinance or

resolution providing for the levy or a direct annual tax sufficient to pay the annual rental under the lease when it becomes due and payable." 142 N.E.2d at 72. The Illinois court noted that its definition of "indebtedness" was "not as liberal as that indulged in by a majority of jurisdictions." 142 N.E.2d at 75. Nevertheles, even in the more liberal jurisdictions, a provision such as that embodied in the statute quoted above would have been likely to lead to a finding of debt. The Illinois court had no trouble reaching such conclusion.

In 1958, the Indiana Supreme Court was presented with a leaseback transaction involving a public corporation. In Book v. State Office Building Commission, 149 N.E.2d 273 (Ind. 1958), the lease agreement between the public corporation and its state agency lessees contained a provision, much like that in Trujillo, which permitted the lessees to terminate their agreement only under specified conditions. Nevertheless, the court upheld the agreement.

In Book, the court was presented with a series of assertions reflecting a McCutcheon-like analysis of the situation. The court repudiated each assertion as it was presented. Thus, the court, looking to the statute creating the public corporation and to previous Indiana cases, denied that the public corporation was "in reality" the State of Indiana. It followed that since the corporation was a corporate body separate from the state, the holders of its bonds would have to rely upon the corporation's revenues derived from rental income and would not have any recourse against the state. For these reasons, the court concluded that the bonds of the corporation were not debt of the state. In response to the assertion that the lease agreements were "in reality" contracts to pay the corporation's bonds, the court stated the general rule that

> a municipal corporation may lawfully contract for necessary services over a period of years and agree to pay therefor in periodic installments as the services are furnished. In such cases the aggregate of the amounts to be paid as the services are rendered under such contracts are not considered as an indebtedness of the corporation, and such contracts are not rendered invalid by the fact that the aggregate of the installments exceeds the debt limitation.

149 N.E.2d at 284 - 285. In any event, the fact that the state agencies might obtain title to the buildings they rented at the expiration of their lease would not be sufficient to convert the

lease into a purchase agreement. The court further stated, reminiscent of Giessel II, that the Indiana debt limitation provisions applied only to legally enforceable obligations. Since the court found no language binding any future legislature to make appropriations for the rent under the lease agreement and since the rentals could be paid only by appropriations made by the legislature, the court concluded that the lease agreement created no constitutionally prohibited debt.

Giessel II and Book are located on the more liberal end of the leaseback transaction spectrum, with Book perhaps a bit more liberal because of the court's willingness to overlook the lease provision apparently limiting the state agencies' ability to terminate the lease.

It is worthwhile at this point to temporarily abandon our chronological order to briefly review a later Indiana case -- Teperich v. North Judson-San Pierre High School Building Corporation, 275, N.E.2d 814 (Ind. 1971). We note the case only for its reaffirmation of the Book principle that rent payments "cannot be considered debt until the payments become due." 275 N.E.2d at 817.

In 1960, the Massachusetts court issued its solitary opinion relating to leaseback transactions. Ayer v. Commissioner of Administration, 165 N.E.2d 885 (Mass. 1960), involved, as the financing entity, a nonprofit corporation created by statute. The sole purpose of the corporation was to construct a building to be leased, and ultimately transferred, to the state. Citing McCutcheon, Trujillo, and Yelle, among others, the court embarked upon its analysis by "looking through form to substance". 165 N.E.2d at 892. The court first considered the nature of the corporation and then considered the nature of the lease agreement.

Although the court agreed that the corporation was an entity separate from the state, it nevertheless concluded that the corporation was "nothing more than a mere intermediary to carry out only one purpose." The following factors were pertinent to the court's analysis: (1) the corporation's sole purpose was to construct and lease to the state a building to be used only by the state; (2) the corporation was given powers of eminent domain; (3) the building, at the expiration of the lease, would become the absolute property of the state and the corporation would fade from existence; and (4) the corporation had virtually no power to deal with its property except as provided in the lease agreement. Reflecting upon these factors, the court then considered the statutory provision that the bonds of the corporation would not constitute a debt of the state or a pledge

of its faith and credit. The court's opinion as to this was as follows:

> This disclaimer is ineffective if, contrary to the disclaimer, such be the natural and reasonable effect of the statute.

165 N.E.2d at 889.

With regard to the lease agreement, the court noted:

> Viewing realities, we consider that the so-called "rentals" are not really rentals at all, but in practical effect are installment payments on account of a purchase by the Commonwealth of an office building, with full title to be acquired at an indefinite future date.

165 N.E.2d at 890. One of the important characteristics of the lease agreement leading the court to this conclusion was the requirement in the agreement that the state continue to make rental payments even if the building was not completed on time or was damaged or destroyed.

This 1960 case, which to the best of our knowledge has not been followed by any other Massachusetts leaseback transaction case, employed the McCutcheon-like analysis of piercing through form to arrive at the court's impression of substance. In this regard, the presence of a provision making the state's rental payments contingent upon legislative appropriations may not have changed the result, particularly if the Massachusetts court adopted the McCutcheon view that a mere moral imperative or even a practical likelihood for making the appropriations would suffice to create debt. However, the absence of such a provision allowed the court to reach its conclusion without the necessity of taking that position, and the presence of the affirmative duty of the state to make the rental payments even in the absence of a completed or inhabitable building for the state to occupy doubtless provided a strong incentive to the court to find a prohibited debt.

Another 1960 case, which was also the only decision on the subject we have found for its jurisdiction, was Application of the Oklahoma Capitol Improvement Authority, 355 P.2d 1028 (Ok. 1960). While Ayer emulated McCutcheon and Yelle, the Oklahoma court closely followed the pattern of Giessel II and Book.

There were two significant features of the statute under review in the Oklahoma case. First, a provision of the statute required the state treasurer to purchase the public corporation's bonds issued to provide financing for the building to be leased to the state. Second, the public corporation was authorized to require state agencies and departments to occupy space in the building and pay rent. A third feature also merits consideration, that feature being the intended rental of a portion of the building to federal government agencies.

Despite the first two of the foregoing features of the statute, the court reasoned that housing for state agencies was essential to state government. If the state did not own the housing, a proper method of providing it was through leases.

The court then noted:

> We see no real distinction between a state department entering into a lease agreement and paying rent to a private party and having the same transaction with the Authority. In either event the state department receives a service in the form of housing which the state itself does not own. In addition the state will obtain two office buildings paid for in part from rentals from federal agencies.

355 P.2d at 1032. Given the second of the statutory provisions described above, we must allow that other courts might have seen a difference.

Two lower court California cases were decided in 1962 and 1963. In McClain v. County of Alameda, 25 Ca.R. 660 (Dist.-Ct. of App., First Dist., Calif. 1962), and City of La Habra v. Pellerin, 30 Ca. R. 752 (Dist. Ct. of App., Fourth Dist., Calif. 1963), the California courts upheld leaseback transactions on two bases:

(1) the leases did not create an immediate indebtedness for the aggregate amount of the installment rent due; and

(2) under previous California cases, an obligation imposed by law on a city (such as, in these cases, to provide facilities for city functions) is not an indebtedness or liability within the meaning of the California debt limitation provisions. At least with respect to the first of the foregoing bases, the California courts, without citing Giessel II or Book, reflected a judicial attitude similar to that expressed in those other cases.

The following year, 1964, brought forth Montana's only entry in the leaseback transaction area, State v. City of Missoula, 395 P.2d 249 (Mont. 1964). The transaction there was somewhat unique to the extent that the financing entity involved was an individual -- Theodore Jacobs. In a succinct opinion, the Montana court expressed its belief that

> A debt payable in the future is obviously no less a debt than if payable presently; and a debt payable upon a contingency, as upon the happening of some event, such as the rendering of service or the delivery of property, etc., is some kind of debt, and therefore within the prohibition.

395 P.2d at 251 (quoting from State ex rel. Helena Water Works v. City of Helena, 63 P. 99 (Mont. 1900)). Thus, with virtually no discussion of the elements of the lease from Jacobs to the city, the court reached the opinion that the lease would constitute prohibited debt. It is worth noting another difference in outlook, if not legal analysis, between this case and the California and Oklahoma cases described above: that is, in both California and Oklahoma the need for governmental facilities was viewed as rising to the level of a legal duty, while the Montana court expressed the following opinion as to the need of Missoula for the building in question:

> No one, we believe, would seriously contend that the acquisition of a building valued at approximately $46,000 would be a reasonable and necessary expense requisite to maintain the corporate existence of the City of Missoula.

395 P.2d at 251.

It took the Arizona court five years -- from 1965 through 1969 -- to ultimately conclude its leaseback transaction case. The case began as City of Phoenix v. Phoenix Civic Auditorium & Convention Center Association, Inc., 408 P.2d 818 (Ariz. 1965). Quoting extensively from McCutcheon, Trujillo, and Yelle, the court adopted the principles and reasoning of those cases and invalidated the leaseback transaction because (1) it was, in reality, a purchase agreement; and (2) the source of payment of rents by the city under the lease was to come from the general revenues of the city and not from a special fund derived other than from general taxes.

The next year, the court was asked to clarify its opinion as to whether the debt limitation would be violated if the lease agreement expressly provided that rental payments would come only from excise and ad valorem taxes and not from the city's general taxes and general fund. City of Phoenix v. Phoenix Civic Auditorium & Convention Center Association, Inc., 412 P.2d 43 (Ariz. 1966). Under such circumstances, the court indicated it would find no debt limitation violation.

After fully complying with the clarifications presented in the court's 1966 supplementary opinion, the City of Phoenix found itself once more challenged over the lease agreement. The City sought a peremptory writ of prohibition from the Supreme Court to prevent the City's challengers from proceeding with their case in the superior court. The Supreme Court issued the writ, thus finally concluding the case. City of Phoenix v. Superior Court, 455 P.2d 257 (Ariz. 1969).

In Hall v. Baltimore, 250 A.2d 233 (Md. 1969), the Maryland Supreme Court upheld a leaseback transaction relying on the prevalent common law rule that rent to fall due beyond the current period is not a present debt. The court specifically noted that there was no pledge of municipal assets as the leases involved were subordinate to the city's interest in the property. The court cited with approval Giessel II to the same effect.

Another 1969 case, McFarland v. Barron, 164 N.W.2d 607 (S. Dak. 1969) presented a leaseback transaction which should probably be the model for future endeavors in the area. The court provided the following summary of the plan which reflects a careful and thoughtful preparation for the avoidance of debt limitation problems:

> The leases must contain a provision that rents shall be payable solely from appropriations to be made by the legislature and any revenues derived from the operation of the leased premises. In the event of nonpayment of rents by the State, the building or facility may be leased to others for suitable purposes. A lease may be made for a term of one year from the time a building is completed and ready for occupancy, with an option to the lessee to extend the term for one year from the expiration of the original term and for one year from the expiration of each extended term until the original term of the lease has been extended for a total number of years to be agreed upon at a rental which, if

> paid for the original term and for each of the full number of years for which the term of the lease may be extended, will amortize the total cost of the erection of the building and appurtenances.

164 N.W.2d at 609. Referring to the common law concept that future rents do not create present indebtedness, the court upheld the arrangement. To the suggestion that the state would have a moral obligation to discharge the bonds, the court reponded:

> While the legislature in making appropriations may not be confined to legal obligations, but may recognize moral or equitable obligations...there would exist under the proposed leases no binding legal obligation to authorize expenditures for rent ....In the event of nonpayment of rent or failure of the legislature to appropriate funds the Building Authority is empowered to lease the building or facility to others for suitable purposes to meet accruing payments.

164 N.W.2d at 609 -- 610. And the court finally concluded:

> Since the stipulation of the State to pay rents to the Building Authority will be subject to available appropriations and current revenues, the inhibition of the debt limitation provisions of the Constitution will not apply.

164 N.W.2d at 611.

We temporarily abandon our chronological order once more to note here the subsequent South Dakota case, Millar v. Barnett, 221 N.W.2d 8 (S. Dak. 1974). Citing McFarland, the court again upheld a leaseback transaction similar to the transaction under review in the preceding case.

In 1970, three cases from three states were decided. New Mexico produced its second leaseback transaction case (following the 1941 Trujillo decision) in McKinley v. Alamogordo Municipal School District Authority, 465 P.2d 79 (N.M. 1970). The leaseback arrangement in Alamogordo stands in stark contrast to that crafted in the McFarland case. The financing entity in this arrangement was to be a nonprofit corporation whose membership was identical to the membership of the municipal agency which would be the corporation's lessee. As part of the lease

agreement the municipal corporation was to agree to budget and appropriate sufficient funds to pay the rent under the lease and, moreover, the municipal corporation agreed to the placement of a lien on all of its income from all sources, except ad valorem taxes, to cover the rental payments. There was at least one mitigating factor; that is, the lease was for only one year with successive one year extensions and was terminable at the request of either party. This mitigating factor was insufficient to prevent the court from invalidating the agreement.

In the Trujillo tradition, the court recognized the corporation as "nothing more nor less" than the municipal agency. Thus, the bonds of the corporation would necessarily be debts of the municipal agency. Although the court averred that the pledge of the municipal agency's income and the lien on funds to be received by the municipal agency were not critical factors in its decision (465 P.2d at 81), the court nevertheless referred to these factors in its concluding paragraphs:

> Here the only source of money to pay rent to accrue is state tax proceeds and amounts received from federal sources. As a matter of fact, these moneys are specifically pledged by the terms of the lease. It is quite apparent that the funds to be used are those realized from "general taxation" held unconstitutional in Trujillo.

465 P.2d at 84.

While McFarland reflects careful consideration in the preparation of a leaseback transaction to avoid the constitutional concerns expressed by the various courts, Alamogordo seems to represent a studied indifference to those concerns. The result is that New Mexico has two invalidating cases and none validating. It would be enlightening to see how the New Mexico court would handle a case involving a leaseback transaction which reflects some concern for judicial precedent.

The Nevada case of State v. Hancock, 468 P.2d 333 (Nev. 1970), approaches, but does not achieve, such an effort. The leaseback transaction in that case, invalidated by the Nevada court, provided on the one hand that rentals from the state would derive from biennial appropriations from the legislature; on the other hand, the drafters of the plan curiously chose to also provide that the legislature could choose to pledge itself to make future appropriations as necessary to pay the rents.

The Nevada court followed the McCutcheon, Trujillo, Yelle, and Ayer approach of looking to "the essence" of the plan to reveal the true nature of the public corporation as the alter ego of the state and, thus, concluded that the corporation's debt was the state's debt. The argument was presented to the court that biennial legislative appropriations for the rent would not present a debt problem, with regard to the lease, because the constitutional concern does not extend to expenses payable out of current revenues. The court conceded that the argument carried "some persuasive force" but, in reviewing the transaction as a whole, was convinced that

> successive biennial appropriations for rent until the bonds issued by the Authority are fully retired must be considered in the same light as a legislative pledge to make future appropriations for the same purpose. It is inconceivable that the legislature would default in either instance since the good faith of Nevada would not allow it.

468 P.2d at 338.

The third 1970 case was from West Virginia; it was followed in 1971 by a second West Virginia case. The 1970 case invalidated a leaseback transaction, while the 1971 case upheld such a transaction.

The 1970 case is State ex rel. Hall v. Taylor, 178 S.E.2d 48 (W. Va. 1970). Although the legislation authorizing the transaction in Taylor indicated that the rents to be paid by the state would come from annual appropriations, the court found an obligation, as a practical matter, for the state to make the appropriations. In the court's words:

> It is an exercise in fiction, semantics, sophistry or circumlocution, devoid of substance, to assert that the statute in question does not create a state debt. It is a debt which, in the contemplation of the statute, must necessarily be paid in annual installments over a period of years and by successive legislatures from fiscal year to fiscal year. The state is legally obligated to furnish office space and to pay other expenses incidental to the continued existence and functioning of the various state agencies and departments which rented office space in the building in question. The legislature is le-

> gally obligated to make appropriations from time to time to defray the costs of such essential governmental operations.
>
> It is no answer to the invalidity of this statute and of the action of the Building Commission in issuing these bonds to say that some future legislature is not required to make an appropriation to one of these agencies or departments in order that the agency or department might make its payment of rent. The failure to make such an appropriation could result in the holders of the bonds taking over the buildings involved, and it is incomprehensible that any legislature would permit any such thing to happen. However, the test is not whether a future legislature is required to make such appropriations. The test is the authority to do so. Clearly the only source of income by which the bonds may be liquidated is the rent to be paid by the occupants of the buildings. Therefore, the reason for the invalidity of the statute lies in the authority of the legislature to make such future appropriations. It is not necessary for this Court to wait until some future legislature refuses to make an appropriation to make a determination of the legality of this procedure.

178 S.E.2d at 57 and 58 -- 59 (emphasis in original). The reasoning employed by this court is singular among all the leaseback transaction cases.

In the following year, the West Virginia court reviewed another leaseback transaction which cured the problem apparently perceived by the court in the Taylor case. In State ex rel. State Building Commission v. Moore, 184 S.E.2d 94 (W. VA. 1971), the rental payments from the state were to be made from a special fund into which flowed proceeds from the state's sale of alcohol. Since the state's general revenues would not be considered for payment of the rents, the court was not offended by the plan. Curiously, however, a provision in the lease agreement which required the state agency occupants of the building to provide for the maintenance and operation of the buiding from their general revenue funds appropriated by the legislature survived the court's review notwithstanding Taylor. Without any explanation, the court simply ruled that payments under the provision by

the state agencies would conform with the provisions of the Act under review.

Ohio decided its second leaseback transaction case in 1972. The court's opinion in State ex rel. Kitchen v. Christman, 285 N.E.2d 362 (Ohio 1972), began with the court's recitation that

> At the outset, it should be emphasized that this court examines this transaction, not for what it purports to be, but for what, in essence, it is. In short, the court looks through the form to the substance of the proposed transaction.

285 N.E.2d at 365. The court's conclusion should come as no surprise. True to the McCutcheon, et al., tradition, the court pierced the lease agreement veil to find the hidden purchase agreement. The court concluded that

> the entire contract price is a present indebtedness of the city. The city has presently obligated itself to make future payments, and the Company has a present right to compel each succeeding administration to make those payments. The city's obligation under the contract is a continuing one, and no succeeding city council can refuse to appropriate available funds (generated by its taxing power) for payment.

285 N.E.2d at 367 (footnote omitted).

Of particular interest in the opinion is a footnote in which the court states;

> If such an unconditional obligation of payment [by the city] did not exist, but instead, the city were free to periodically choose whether to continue to appropriate monies for the purpose of acquiring eventual complete ownership of the property in question, an entirely different question might have been presented.

285 N.E.2d at 367, n.6.

Another 1972 case, Bachtell v. City of Waterloo, 200 N.W.2d 548 (Iowa 1972), also followed the "piercing" approach to

conclude that a leasing arrangement was merely a subterfuge for an attempted purchase. The court listed many of the cases both pro and con which had preceded it in the leaseback area. The court considered that those which had upheld such transactions were distinguishable from this case, though the court scarcely attempted to explain either the distinguishing features of the other cases or even the particular objectionable features of the plan under review.

In Opinion to the Governor, 308 A.2d 802 (R.I. 1973), the Rhode Island court responded to questions proposed by the governor of that state regarding a contemplated leaseback transaction. The governor asked whether lease payments under the transaction would involve debt of the state. Viewing the position that such payments would not constitute debt as the majority view and as the "sounder and more reasonable" position, the court answered the governor's question in the negative.

The Oregon Supreme Court, in Martin v. Oregon Building Authority, 554 P.2d 126 (Ore. 1976), reviewed a leaseback transaction which, among other things, provided that the state's obligation to make rental payments was unconditional as long as the premises were available for rental and which also provided that the state's full faith and credit supported such obligation. As the court noted regarding the use of a public corporation in such a scheme to attempt to avoid the constitutional debt limitation:

> It is a scheme which would fool only a lawyer.

554 P.2d at 131. Although the provisions of the leaseback transaction noted above were relatively outlandish, the court's opinion creates the impression that even a more moderate plan would have reached the same result as long as it involved a public corporation whose only purpose for existence was to issue bonds to provide financing for state projects and whose only source of revenues was rental payments from the state. In this regard, Martin should probably be added to the list of McCutcheon-Trujillo-Ayer-Yelle type cases.

In an unusually flexible approach to debt limitations and leaseback transactions, the court in In re Request for Advisory Opinion Enrolled Senate Bill 558 (Being 1976 PA 240), 254 N.W.2d 554 (Mich. 1977), indicated that a leaseback transaction would be upheld even though it acknowledged that, under the plan, future legislatures would be bound to appropriate the necessary public funds to meet the state's rental obligation. The court took the following pragmatic approach to the question:

> However, in that its power to invoke sovereign immunity can particularly or even totally obstruct enforcement, the state differs essentially from non-governmental contractors....Although in granting limited jurisdiction over all contract claims against the state to the Court of Claims...the State of Michigan has waived its sovereign immunity, even that waiver is subject to legislative revocation.

254 N.W.2d at 547. This case probably should not be considered likely precedent for most other states.

In Laramie Citizens for Good Government v. City of Laramie, 617 P.2d 474 (Wyo. 1980), the leaseback transaction was not unusual except to the extent that it involved the purchase of a ranch by a public corporation with the intent that the corporation would lease the ranch to the city so that the city would have the benefit of water rights on the ranch. The public corporation was created solely for that purpose. Nine of the eleven members of the corporation's board of directors were elected city officials. The corporation had no financial base except for the rents it would receive from its lease of the ranch to the city. All of this led the court to the conclusion that the corporation was the alter ego of the city and that the corporation's debt was prohibited.

The court also considered the nature of the lease agreement and concluded that it was a mere subterfuge for a purchase of the ranch. In its opinion, the court listed the following factors which reflect a lease rather than a purchase:

> provision for cancellation of the lease by the lessee at its option at yearly intervals, or the converse provision that the term is for one year with yearly renewal options; provision for payment of a fixed and substantial amount at the end of the term, or the converse that there is no provision for transfer of title at the end of the term without payment at that time of a fixed and substantial amount in addition to rental payments; provision that the lessor pay the cost of upkeep, repair, taxes, etc., the amount of the rental payments being equal to the debt service amount.

617 P.2d at 479.

Eberhart v. Mayor & City Council of Baltimore, 433 A.2d 1118 (Md. 1981), was Maryland's second leaseback transaction case and was by far the most ornate of the plans we have reviewed. The subject of the plan was a parcel of land with improvements owned by the City. The City rented the land and building on a rent free at will basis to a culinary arts institute. The City desired to extract its capital out of the property while still enabling the institute to rent the property at no cost. Under the plan, the City would sell the building to a limited partnership and lease the land to the partnership for thirty-five years. The partnership would lease the land and building back to the City under a thirty year lease. The partnership, in order to obtain financing, would seek the issuance of industrial development bonds by the Industrial Development Authority of the Mayor and City Council of Baltimore, a public corporation. The authority would issue its bonds, and the proceeds of the sale of the bonds would be loaned to the partnership to finance the partnership's purchase of the building from the City. As security for the bonds, the partnership would grant a mortgage on the building and its leasehold interest in the land, which would be assigned to the trustee for the bonds. The mortgage would be subordinate to the City's interests as tenant under the ground and building lease and as fee simple owner of the land.

The partnership would also assign to the trustee the right to receive rent payments from the City.

This plan was challenged on the same grounds enunciated in the McCutcheon line of cases; that is, that the authority was simply the alter ego of the City so that the authority's bonds constituted debt of the City and that the use of the general funds of the City to pay rent under the lease amounted to an obligation on the part of the City to repay the authority's bonds. Although the court noted and the City conceded that the obligation to pay rental under the lease was a full faith and credit obligation of the City, the court rejected the challenge and upheld the arrangement.

With regard to the contention that the authority was the alter ego of the City, the court listed an interesting collection of statutory provisions rebutting the position.

> The provisions of Art. 41, secs. 266A--I indicate that an industrial development authority is not simply the alter ego or instrumentality of the county or municipality which creates it. An authority is a body politic and corporate and "a political subdivision of the State." Section 266A-3 mandates that none

> of the five members of the board of directors that govern an authority and exercise its powers by resolution may be officials or employees of the incorporating county or municipality. A director, although appointed by the incorporating county or municipality, may be removed only for misfeasance, neglect of duty, or other good cause. Sec. 266A-3(b)-(7). Section 266A-3(a) provides that the incorporating county or municipality may exercise its own powers under secs. 266A--I even though it has chosen to incorporate an authority with similar powers. These various statutory provisions suggest that an authority is a distinct entity from its incorporating county or municipality.

433 A.2d at 1127.

With regard to the notion that the City's rental payments will be used to pay the authority's bonds and therefore constitute debt, the court noted that the determinative factor was the payment of bona fide rent by the City. The court stated:

> Uncontradicted evidence was presented to the circuit court that the City's estimated annual rental payments under the Ground and Building Lease would represent the fair rental value of the Property. The correlation of the City's rental payments to Culinary Associates' debt service obligation does not, therefore, destroy the essential character of the Ground and Building Lease as a lease. Because the rent reserved under the Ground and Building Lease represents the fair rental value of the Property, and there are no factors that suggest a contrary result, the Ground and Building Lease is a bona fide lease. Thus, the City's obligation to make rental payments will not create debt even though the obligation to pay rent is an enforceable, full faith and credit obligation of the City.

433 A.2d at 1125.

Another 1981 case, Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981), also upheld a leaseback transaction against

similar contentions. The transaction took the form of a lease-back to the City of land by a nonprofit corporation, which lease provided for 25 consecutive one-year renewals which were automatic unless the City elected against the renewal. The rental payments from the City under the lease would be used to repay the bonds issued by the corporation, and the security for the bonds would include a lien on the corporation's building and on the corporation's lease of the land. Upon payment of the bonds, the corporation would transfer title to the building to the City.

The court first considered the contention that the corporation was the alter ego of the City, noting that, where the alter ego doctrine applies, the court will disregard a corporate entity, or pierce the corporate veil, and consider the actions ostensibly taken by the corporation to be those of its shareholders. The court noted that "the record fails to establish the essential element that the building authority is to be used to promote injustice or protect fraud." 636 P.2d at 697. The court found no fraud upon the taxpayers of the City, though the taxpayers had earlier voted on and rejected a general obligation bond issue to finance the facility now being financed through the issuance of the corporation's bonds, because it is not the construction of a facility that requires voter approval but rather, the creation of general obligation debt. The plan before the court did not create any general obligation debt. As to any potential fraud on purchasers of the bonds, the court noted:

> The record reflects that the financing plan has been carefully structured to assure that the city has no obligation on the anticipation notes or the revenue bonds and that purchasers of those instruments will be made fully aware of that fact by the terms of the notes and bonds. The purchasers also will be advised that the city's lease and attendant obligations can be terminated at the end of any year and that, should the city elect to terminate its lease, the security for the building authority's obligations is limited to the municipal office building itself and the building authority's 25-year lease on the building site.

636 P.2d at 698.

The court then considered whether the City's rental obligation for future years under the lease agreement constituted proscribed debt and concluded that it did not.

> Of particular importance to our conclusion that the city's rental obligations for future years do not constitute debt in contravention of Colo. Const. Art. XI, Sec. 6 is the lease provision that those obligations are contingent upon exercise of the city's renewal options. We have held that discretionary or
>
> contingent obligations are not constitutional debt. "To constitute a debt in the constitutional sense, one legislature, in effect, must obligate a future legislature to appropriate funds to discharge the debt created by the future legislature."

636 P.2d at 699.

Finally, the plaintiffs in the case urged the court to take the McCutcheon "total picture" approach to determine that the plan as a whole amounted, in essence, to a subterfuge and an evasion of the constitutional debt limitations. Taking such an approach, the court reached the opposite conclusion. Recognizing that the corporation was created solely for the purpose of providing financing for the project after the voter's had disapproved general obligation indebtedness for the project, the court found "no evil in seeking an alternate means of achieving a result so long as the alternate is itself consistent with the law." 636 P.2d at 699 -- 700.

> As noted earlier, there is a real difference between the city's proposed plan and the plan which was rejected by the voters. That difference is the absence of any obligation of the city on the anticipation notes or revenue bonds under the new plan. We are aware of the argument that, although the city's lease is terminable in form, practicalities dictate that the likelihood of termination is remote because the city hall will be specially designed to city specifications and because of the prospect, gaining substance with each rental payment, that the city will become the owner of the building when the bonds have been retired....The ability to terminate its lease gives the city flexibilty which is real, not illusory. We cannot say that the city will never avail itself of its termination rights.

636 P.2d at 700.

The final case in our review is Baliles v. Mazur, 297 S.E.2d 695 (Va. 1982), involving the financing of state capital projects through the issuance of revenue bonds by a public corporation of the state. To the question of whether the revenue bonds constituted debt of the state, the court answered they did not, noting that the enabling legislation specifically denied such assertion. To the assertion that the issuance of the revenue bonds was a transparent attempt to evade the constitutional debt limitations, the court summarily disagreed.

CONCLUSION

The foregoing review of cases demonstrates that the majority of jurisdictions which have considered the issue accept leaseback transactions as consitutionally permissible methods for financing public facilities. It is our opinion that the majority view upholding such transactions would be followed in Alaska. Moreoever, we are also of the opinion that the categorization of the agreement between the state and a financing entity as either a "lease" or an "installment purchase contract" is insignificant as long as the state's obligation to make payents is contingent upon annual appropriations by the legislature for that purpose. Thus, whether the arrangement is for a lease or for an installment sale, we believe the courts in Alaska will uphold it.

We noted in the "Overview" to this memorandum that 16 of the states whose cases we have reviewed can be considered as "validating states" in the sense that the most recent cases in those states are cases which uphold leaseback transactions. Ten of the states can be considered invalidating states. This does not necessarily mean that leaseback transactions are prohibited in the other ten states.

The only significance to the categorization of the 16 states as validating states is that we can be sure that in a clear majority of the states a constitutionally valid leaseback transaction can be created. It may be equally true that constitutionally valid leaseback transactions could be created in some or all of the invalidating states, with some changes in the features of the transactions presented to the courts in those states as a result of recent cases.

The following list describes features of a leaseback transaction which may be considered significant in analyzing the transaction under constitutional debt limitations. We emphasize that these should not be considered as "musts" (with the exception of item "3" below) but are provided only as suggestions. If all other considerations allow and if the concensus is to take

the most conservative approach, the preparation of a leaseback transaction containing all of the suggestions listed below would come as close as possible to satisfying the most conservative of the invalidating state courts. It should be recognized, however, that other considerations are likely to call for different or even conflicting features. We do not mean to imply that those other considerations cannot or should not be accomodated. Again, the following list is intended only to provide suggestions for contemplation in fashioning a leaseback (or installment purchase) agreement.

1. The financing entity, whether a public corporation or a private corporation, should have some business to perform other than and in addition to the financing of the particular project to be leased to the state. One of the common themes of the invalidating cases is the "alter ego" argument. If the financing entity has some other purpose for existence it will help to refute that argument.

2. For the reason stated in "1", the financing entity should have some source of revenue other than rents to be paid by the state.

3. In any lease agreement with the state, the state's obligation to pay rent must be contingent upon annual appropriations by the legislature.

4. The amount of rent to be paid by the state should bear some resemblance to "fair rental value" for the property rather than simply being based on debt service requirements for the bonds.

5. If possible, title to the property should remain in the financing entity (if a public corporation) at the expiration of the lease; alternatively, the state should be required to pay a significant amount to exercise an option to purchase at the term of the lease.

6. The lease should be terminable by the state at any time without any further obligation.

7. The financing entity should have the ability to lease the facility to users other than or in addition to the state during the period of the lease.

8. Should the state terminate the lease, the financing entity should have control over the use or disposition of the facility.

9. No existing state property should be encumbered except for the leaseholder interest granted to the financing entity.

10. If title to the property on which the facility is to be built remains in the state, provision should be made in the lease agreement for the disposition of the facility at the termination or expiration of the lease if the state does not exercise its purchase option.

11. The statute, the bonds, and any other pertinent documents should clearly indicate that the bonds are not obligations of the state and are payable solely from the revenues derived from the project.

12. Should the legislature fail to appropriate money for rental payments or the state fail for any reason to make rental payments, it should be clear that neither the financing entity nor the bondholders have any recourse against the state, though the financing entity may endeavor to enter into other lease agreements, and, if the financing entity holds title to the land and building, it may re-enter and take possession thereof.

13. If a financing entity is to be specially created for the purpose (which we advise against; see "1" above), membership in the entity should not include officers of the state.

14. There should be no possibility of loss by the state of any of its pre-existing property.

15. There should be a provision reducing or eliminating the state's rent to the extent that the facility is not timely completed or, upon completion, becomes unusable.

16. Any long-term lease should be prepared as a one-year lease with the proper number of annual options to renew.

17. Revenues from other state facilities should not be pledged as security for the bonds. This is particularly so in Alaska given our state's dedicated fund prohibition.

18. The statute creating the financing entity, if any, should carefully describe the financing entity as having a separate and independent legal existence.

19. The financing entity, if a public corporation, should not be given powers of eminent domain.

20. The financing entity, as lessor to the state, should agree to pay the cost of upkeep, repairs, taxes, etc. with regard to the facility.

21. If the financing entity is created by statute, its directors should be removable from office only for malfeasance, neglect of duty, or other good cause.

Finally, with respecy to the applicability of this memorandum to lease participation certificates, we perceive no reason why such certificates should be considered differently from revenue bonds or why lease participation transactions should be considered differently from leaseback transactions.

Attention: Mr. Milt Barker

Ladies and Gentlemen:

You have requested that we review various issues raised by the proposed lease-purchase financing by the State of Alaska ("State") of various State facilities.

Under the proposed financing structure, the Alaska State Housing Authority ("ASHA") would issue bonds or notes in order to provide funds to pay the costs of construction of the State facilities. Pursuant to a lease agreement ("Lease") between ASHA, as lessor ("Lessor"), and the State, as lessee, the Lessor would lease the State facilities and lease or sublease1/ the underlying land (collectively, the "Facilities") to the State. The State would be obligated to make rental payments2/ on a fixed basis throughout the term of the Lease in amounts sufficient to pay when due the principal and interest on the Lessor's outstanding bonds or notes. The State's rental payment obligation would be subject to annual appropriations; failure by the State legislature to appropriate sufficient funds to make rental payments would result in the termination of the Lease. Upon the expiration of the term of the Lease, the State would pay a predetermined purchase price in order to acquire title to the Facilities.

1/ If Lessor does not own, but rather leases from the owner thereof, the underlying land, the Lessor would sublease the land to the State.

2/ The interest component of the State's rental payments would be exempt from federal income taxation, assuming compliance with all applicable federal tax law requirements.

The question we have considered is whether this proposed financing of the Facilities would be in violation of the debt limitations set forth in the State Constitution. Analysis of this general issue requires consideration of two component issues: (1) whether debt issued by ASHA would be found to constitute prohibited State debt under the State Constitution and (2) whether the State's rental payment obligation under the Lease would be found to constitute prohibited State debt under the State Constitution.3/

Article IX, § 8 ("Section 8") of the State Constitution provides in pertinent part:

> No state debt shall be contracted unless authorized by law for capital improvements or unless authorized by law for housing loans for veterans, and ratified by a majority of the qualified voters of the State who vote on the question.

Article IX, § 11 ("Section 11") of the State Constitution, however, excepts from the Section 8 debt limitations revenue bonds of a public corporation of the State, as follows:

> The restrictions on contracting debt do not apply to debt incurred through the issuance of revenue bonds by a public enterprise or public corporation of the State or a political subdivision, when the only security is the revenues of the enterprise or corporation.

3/ We note that between 1966 and 1974 ASHA issued eleven separate series of bonds in the aggregate principal amount of $106,150,000 to finance construction of a variety of capital projects for lease to the State. The bonds were secured by lease rentals from the State. Over $60 million of the bonds remain outstanding. 1984 Moody's Municipal & Government Manual 244-246.

Thus, Section 8 restrictions on incurring State debt apply only to obligations against the general credit of the State. 1959 Op. Att'y Gen., No. 39.

If the debt to be issued by ASHA to finance the Facilities will fit within the Section 11 exception, the Section 8 debt limitations will not be applicable. In National Bank of Alaska v. State of Alaska, Department of Revenue, Sup. Ct. Op. No. 2480 (File No. 5482), 642 P.2d 811 (1982), the Supreme Court of Alaska ("Court") found that bonds issued by ASHA do not constitute debt of the State subject to the Section 8 debt limitations.4/ The Court based its conclusion on § 18.55.160 of the Alaska State Housing Authority Act ("Act"), which provides in pertinent part as follows:

> The bonds of the authority are not a debt of the state or a political or municipal corporation or other subdivision of the state and each bond shall so state on its face. Neither the state nor a political or municipal corporation or other subdivision of the state other than the authority is liable on the bonds, nor are the bonds payable out of funds or properties other than those of the authority. The authority may not pledge the faith of the people of the state for a loan or obligation. Bonds of the authority are not a debt, indebtedness or the borrowing of money within the meaning of any limitation or restriction on the issuance of bonds contained in the constitution or laws of the state.

4/ In National Bank of Alaska, the Court held, inter alia, that ASHA bonds (and bonds of the Alaska Housing Finance Corporation) are not "state obligations" for purposes of the Alaska Business License Act. Bonds at issue in the case appear to have included lease revenue bonds referred to in footnote 3/ above.

Without expressly referencing the Section 11 exception the Court found that § 18.55.160 of the Act placed ASHA bonds outside of the scope of the Section 8 debt limitations: "the ASHA . . . bonds in the instant case are not, by the very terms of AS 18.55.160 . . . state debts backed by general treasury funds." Id. at 817.

The Court cited as controlling two of its earlier decisions on the issue of whether bonds of public corporations are subject to the Section 8 debt limitations: DeArmond v. Alaska State Development Corporation, Sup. Ct. Op. No. 116 (File No. 285), 376 P.2d 717 (1962) (enabling act provisions determined finding that bonds of Alaska State Development Corporation are not debts of the State) and Walker v. Alaska State Mortgage Association, Sup. Ct. Op. No. 353 (File No. 669), 416 P.2d 245 (1966) (enabling act provisions determined finding that bonds of Alaska State Mortgage Association are not debts of the State within the scope of Section 8).

Thus, we conclude that ASHA bonds issued in conformance with the Act in order to finance the Facilities on the terms outlined above would not constitute prohibited debt of the State.

Arguably, the provisions of Section 11 as applied to a revenue bond financing secured by rental payments made by ASHA pursuant to the Lease are dispositive of the entire issue and render irrelevant the question of whether the Lease, in itself, constitutes State debt. Nonetheless, the majority of jurisdictions which have considered this issue have upheld the validity of lease financings of public facilities under state constitutional debt limitations. The generally accepted view is that a lease arrangement between a state and an independent state agency constitutes state debt only if the state presently has an unconditional, legally enforceable obligation binding future legislatures to make future annual rental payments under the terms of a multi-year lease. See, e.g., Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981); State ex rel. Kitchen v. Christman, 285 N.E.2d 362 (Ohio 1972); Book v. State Office Building Commission, 149 N.E.2d 273 (Ind. 1958); State ex rel. Thomson v. Giessel, 72 N.W.2d 577 (Wisc. 1955). If, however, under the terms of a multi-year lease the state has a present obligation to pay current rental payments out of current revenues and only a contingent, legally

nonenforceable obligation at the discretion of future legislatures to make future annual rental payments, no prohibited debt is created. Thus, the essence of the majority rule is that no constitutionally prohibited debt results from a state's obligation to make future annual rental payments under a multi-year lease if the obligation is conditioned upon legislative appropriations. See e.g., Enourato v. New Jersey Building Authority, 448 A.2d 449 (N.J. 1982); Bulman v. McCrane, 312 A.2d 857 (N.J. 1973); McFarland v. Barron, 164 N.W.2d 607 (S. Dak. 1969).5/

We are of the view that a lease-purchase financing of the Facilities on the terms outlined above is valid under Section 8 debt limitations. Support for our view comes from several sources.

In the Walker opinion, supra, at 253 and 254, the Court cited approvingly in footnotes two of the landmark decisions holding that lease-purchase financings do not violate state constitutional debt limitations. Although it cited the Book and Giessel opinions specifically in connection with its resolution of the issue of whether the debt of a public corporation constitutes state debt, it is reasonable to assume that the Court would similarly embrace the holdings in those decisions validating lease-purchase financings.

In the October 14, 1983 Informal Opinion of the Attorney General (File No. 366-101-84),6/ the Alaska

---

5/ In this connection we have also reviewed the following authorities, inter alia: Ayer v. Commissioner of Administration, 165 N.E.2d 885 (Mass. 1960); State v. Yelle, 289 P.2d 355 (Wash. 1955); McCutcheon v. State Building Authority, 97 A.2d 663 (N.J. 1953).

6/ Although opinions of the Attorney General are not controlling on a court, his opinions are entitled to great weight. See Allison v. State, 583 P.2d 813, 817 (Alaska, 1978) in which the Court adopted the following statement from a California appellate court decision:

> While opinions of the attorney general are not controlling as to the meaning of the statute the fact that his opinions

(Cont'd)

Attorney General opined in accordance with the majority position that a lease financing of a public facility by means of a lease agreement between the State and the developer of a public facility would not violate Section 8 if future legislatures of the State are not bound to appropriate funds for rental payments. As the Attorney General explained in interpreting Section 8:

> [It is] imperative that the state's right to possess and use the facility is contingent on annual appropriations from revenue anticipated for the fiscal year in which the lease obligation is incurred. Traditionally, appropriations for lease payments are considered operating appropriations which lapse on June 30 of the fiscal year. A lease agreement which provides for termination of the leasehold if sufficient appropriations to pay rent are not enacted will negate the conclusion that a debt is created. A one-year lease with automatic annual renewal for a maximum number of years upon enactment of an appropriation to finance the annual rent has been approved as a term which negates any possibility that a debt is created. Gude v. City of Lakewood, 636 P.2d 691 (Colo. 1981). See also Glennon Heights, Inc. v. Central Bank and Trust, 658 P.2d 872 (Colo. 1983).

Further support for our conclusion can be found in Proceedings of the Alaska Constitutional Convention, pages

---

> have not been challenged and that he is the officer charged by law with advising the officers charged with the enforcement of the law as to the meaning of it, entitle his opinions to great weight. (citations omitted)

2435 - 2437.7/ Although the delegates to the Convention do not appear to have addressed directly the precise issue of the consitutional validity of lease financings of public facilities by the State, the following excerpts from an exchange between Delegate V. Fischer and Delegate White regarding the committee proposal form of Section 11 8/ suggest that the delegates viewed lease-purchase financings as being within the scope of the Section 11 exception:

V. FISCHER The committee proposal in Section 10 authorizes the floating of bonds by public corporation when the only security from such indebtedness is the revenue of the enterprise or public corporation. The Committee, in putting that in, has specifically told us in the commentary9/ that they're condoning

---

7/ Warren v. Boucher, 543 P. 2d 731, 735 (Alaska 1975) (In interpreting a constitutional provision, the Court "must infer the purposes and intentions of the framers from the language of the constitution itself, with careful regard for the apparent aims which the framers had in mind.")

8/ Referred to therein as Section 10.

9/ As noted in a Memorandum to the Constitutional Convention Committee on Finance and Taxation summarizing the comments of various finance specialists on proposal forms of Sections 8 and 11:

> The prohibition against incurring debt except by referendum in Section 9 [Section 8] and the exceptions in Section 11 as pertains to revenue bonds of public corporations would appear to be an open invitation to create 'authorities,' in the Pennsylvania pattern, for the financing of public improvements.

(Cont'd)

a practice which is used in every state as a means of getting around this kind of bonding restriction as we currently have in Section 8. In other words, we put the provision in Section 8, it is a cumbersome provision. We are telling the state that that of course is of too much bother. Therefore, go ahead and create a separate corporation; if you want to build highways, set up a toll road, set up a separate corporation. If you want to put up public buildings, set up a separate corporation and many states have done that, float bonds and then the state purchases those buildings from that corporation. What happens in those cases? In those cases the credit of the state is not pledged . . .

. . . .

WHITE: Mr. President, just in closing, briefly, in answer to Mr. Fischer I think he has brought a side issue in here by mentioning Section 10. If Mr. Fischer can draft language that would eliminate the necessity for Section 10, I'm sure the Committee would go for it. The reason Section 10 is in there is because it has been found that no matter what you do, as far as the Committee can find, that way can be found to get around debt limitations, and, therefore,

---

See Kelley v. Earle, 190 A. 140 (Pa. 1937), in which the Supreme Court of Pennsylvania upheld the validity under state constitutional debt limitations of lease financings between the State of Pennsylvania and the General State Authority for the construction of public projects.

> if in order to avoid suits in court you might just as well make the authority clear. . . . [I]f the legislature wants to take this end way around of getting at it and going to special authorities they are subject to check by the people, the people will know what's being done and they will react accordingly if they are not in favor of it. . . . Id. (Emphasis added)

In addition to reflecting the liberal, modern approach of the framers of the State Constitution, these comments suggest that the delegates did not consider as prohibited debt an obligation of the State to make payments to acquire a public facility financed with debt of a public corporation. It appears that the delegates contemplated and condoned reading Section 11 as authorizing an outright purchase by the State of a public building from the financing public corporation, a more extreme debt limitation circumvention device than the proposed lease-purchase financing.

Other statements of delegates to the Convention demonstrate that the fundamental impetus behind the Section 8 debt restrictions was the framers' desire to restrict the State's ability to contract debt prospectively. Since the proposed lease-purchase financing of the Facilities would not entail the creation of a rental payment obligation binding future legistlatures of the State, it is not likely that the Court would find that such a financing contravenes the Section 8 debt limitations.

Thus, in view of the apparent aim of the framers of the State Constitution in imposing the Section 8 debt limitations and in granting the Section 11 exception therefrom, and in light of the approach taken by the Court in this general area, we are of the opinion that the Lease would not constitute debt of the State.

After you have had an opportunity to review our views, we would be happy to discuss them, and any related concerns which you may have, with you at your convenience.

Very truly yours,

INTRODUCTION

In the period which has followed the recent recession, the performance of the states on the whole has markedly improved. This is due to the fact that most states have a high reliance on sales tax revenues and income tax revenues, and that these sources of funds benefit positively from an upturn in the economy. Certain states have also seen improved revenues due to the implementation of increased tax rates. During this period certain states have imposed tougher controls on state expenditures which, when combined with higher revenues, have resulted in stronger general fund balances.

Some areas that continue as question marks in state performance are tax-payer initiatives which would put pressure on revenues, as well as the price levels of specific resources that a state may rely heavily upon for funds. As an example, the weakness in oil prices has severely strained the revenue stream of such states as Louisiana, Texas and Alaska. As an indication of just how big an impact this source can have, consider that for every $1 drop in the price of oil, these states lose approximately $150 million in revenues. Finally, the stream of funds to the state coffers from the Federal government remains a large question mark as it concerns the amount of aid which can be expected from this source.

When considering the rating to place on a state credit, the above factors play a very large role. In addition to these areas, the aspects which are unique to each state are examined. Included in this analysis is an examination of the historical performance of financial policy makers as to whether operations have been run conservatively or if estimations of revenues and expenditures have consistently been beyond reasonable expectations. A history of good operations tends to indicate similar performance in the future. Also examined are the economics of the states, with positive emphasis on those exhibiting well-diversified and growing characteristics, as well as on those striving to diversify. States which possess economies reliant on one or two industries, particularly if cyclical industries, are closely scrutinized for other aspects which can help to overcome this problem. Other pieces in the analytical puzzle include the willingness to raise revenue sources, debt levels, wealth levels and historical employment levels. When combined, all of the above areas give us an idea of just how the state will perform, and helps us to assign a rating on outstanding debt.

Definition of Ratios

Net G.O. Debt Per Capita - This is a measure of the state's debt burden. By dividing net G.O. debt by the state's population, we gain a better perspective of the amount of debt per person that is supported by the general taxing powers of the state.

Net G.O. Debt as a % of Personal Income - This ratio divides the net G.O. debt by the state's total personal income. It provides a tool for standardizing and measuring the burden of a state's debt, and gives an indication of the taxpayer's ability to support the debt.

Net G.O. Debt as a % of Full Market Value - By dividing the net G.O. debt of the state by the full market value of all real property in the state, a perspective can be gained on the relationship between the size of debt and wealth of the state. This percentage also allows insight into the burden and magnitude of a state's debt relative to other states.

General Fund Balance as a % of General Fund Revenues - This ratio gives an indication of a state's financial performance by relating its degree of solvency to its existing revenue capacity.

U.S. Trends and Averages

Unemployment
- 1984: 7.5%
- Five year average: 8.3%

Per capita income (1984): $11,675

Median Debt Ratios

ALABAMA

Moody's: Aa **SLB:** Lower AA **S & P:** AA
Trend: Stable

In the 1984 fiscal year financial performance within the State improved significantly, with the unencumbered General Fund balance increasing to a level of $21.6 million, from $6.9 million. The major sources of revenues include corporation taxes, gross receipts business taxes and income taxes. The last income tax rate increase was implemented in 1982.

The economy of Alabama is extremely sensitive to business cycles, due to a heavy reliance on the durable goods manufacturing sector. This sector expanded 8.8% between '83 and '84, with the service sector expanding 4.1%. Wealth levels within the State are low, with unemployment rates having been traditionally high. Debt ratios within Alabama are average. As a buffer for State operations, the Heritage Trust Fund is currently at a level of $120 million. Due to the highly cyclical economy and low levels of State wealth, we view the State as a Lower AA with a stable trend.

ALASKA

Moody's: Aa **SLB:** Mid AA **S & P:** AA-
Trend: Stable

The State, which relies on oil taxes and royalties for close to 85% of its revenues, was hurt in 1984 as oil prices remained weak. Revenues in the General Fund decreased 2.2%, with expenditures also declining, at a rate of 11.9%. The General Fund balance fell, albeit modestly, to a level of $2.09 billion. Every $1 decrease in the price of a barrel of oil translates into a loss of revenues of approximately $150 million, which has placed the State under a great deal of revenue pressure. Some oil analysts are currently projecting a price for oil below $20 a barrel within the next few years. Oil and gas production taxes, the single largest revenue source, fell 6.8% in 1984.

With an economy dependent on oil and gas, revenue projections have been sharply reduced for the 1985 fiscal year. What the State has in its favor is a huge General Fund balance and the Alaska Permanent Fund, which currently has a principal balance of over $6 billion. The Permanent Fund serves as a constitutionally established "savings account". Fifty percent of the income generated by the Permanent Fund is transferred to the General Fund. Debt ratios are extremely high, with State unemployment also on the high side. Alaska does, however, possess very high wealth levels and a rapidly expanding population base. While the situation in terms of oil related revenues is deteriorating at a fast pace, the ability to control expenses, large fund cushions, and as yet untapped tax sources (i.e. sales and personal income taxes) provide adequate security for the State's debt, although the situation bears watching.

CALIFORNIA

Moody's: Aa **SLB:** Upper AA **S&P:** AA+
Trend: Stable

California, one of the wealthiest states, possesses an economy marked by its diversified character. While still sensitive to a downturn in the economy, the low level of California's debt burden ($110 net G.O. debt) provides excellent security for outstanding bonds.

The 1983-84 fiscal year was a turnaround year for the State. Major revenue sources, helped in part by the upsurge of the national economy, rebounded strongly. Sales and personal income tax grew at an annual rate of 12.9% and 20.6% respectively in 1984. The General Fund moved from a deficit of over $608 million in 1983, to a surplus of $328 million in '84, helped in part by expenditure controls (3.6% over 1983 levels). Future initiatives, such as the defeated Jarvis IV, could affect the revenue raising capabilities of the State. Any such initiatives will have to be examined as they are presented in order to determine their potential impact on California. Moves by the State to reduce its unfunded pension liability should be a priority in the future. The population of the State is growing at a fast pace, and the State possesses very high wealth levels. Unemployment levels approximate the national average.

CONNECTICUT

Moody's: Aa I **SLB:** Mid AA **S & P:** AA
Trend: Upward

1984 was a banner year for Connecticut, with total General Fund revenues increasing 17.1%, and an unappropriated deficit of $47.9 million in 1983 being completely drawn down (with $165 million placed in a Budget Reserve Fund). Sales tax revenues, which account for approximately one third of revenues, increased at a 21.4% clip, with corporate profits taxes rising 20.2%. The State finds itself in the enviable position of looking for areas in which to slash taxes, in order to stem the flow of surplus funds. To this point in fiscal '85, Connecticut has already registered a projected surplus of approximately $50 million.

The economic base of the State is relatively narrow in scope, but it has shown movement towards diversification. Similarly, the tax base is also narrow in scope. The debt ratios are very high, and are expected to move even higher with the planned infrastructure borrowing. Overall, the wealth of the State and continuing strong financial performance help to mitigate high debt and the narrow economic base, justifying an upward trend.

DELAWARE

Moody's: Aa

SLB: Mid AA
Trend: Stable

S & P: AA

After three years of operating at or near a deficit in the General Fund, the 1984 fiscal year ended with an operating surplus of $48.1 million. The following revenue areas all showed strong gains: personal income taxes (+9.9%), franchise taxes (+8.6%) and corporate income taxes (+46.2%), with total revenues increasing 12%. Disbursements increased at a rate of only 2.9%. Overall, the General Fund balance improved to finish at a total of $97.4 million.

Manufacturing, particularly in chemicals and automobiles dominates the State's economy. DuPont accounts for 38% of manufacturing employment and 9% of total State employment. Growth in the trade sector helps to offset the cyclicality of the manufacturing sector. Wealth levels in the State are high with unemployment recently falling below the national averages. Debt ratios in the State are extremely high. Revenues are reliant on income tax revenues, with no sales tax currently being levied. Well-controlled finances, a diversifying economy, consistent balances and untapped revenue sources provide adequate security for the outstanding debt, placing Delaware as a Mid AA with a stable trend.

FLORIDA

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

In fiscal 1984, Florida revenues were slightly below projections and expenditures were also slightly below projected levels. Total operating expenses fell by approximately $750,000,000, with taxes, licenses and fee revenues increasing by approximately $1.5 billion. The State ended the year with an operating surplus in the General Fund of $131 million. The General Fund balance has firmed its position since substantial declines in the 1982 fiscal year.

Florida has an economy which has moved away from a reliance on tourism and citrus agriculture to more of a diversified make-up. Manufacturing has been increasing at an average annual rate during the past 10 years of 3.6%, with Florida ranked #1 in its attractiveness as a business climate for manufacturers. Unemployment has traditionally been below the national average, with wealth levels at the national average. Debt ratios are moderate, with a majority of debt being double barrelled. The quick pace of growth, a diversifying economy and the double barrelled nature of debt provide good security for the bonds, and cause us to view Florida as a Mid AA with a stable trend.

GEORGIA

Moody's: Aaa **SLB:** Upper AA **S&P:** AA
Trend: Upward

In the 1984 fiscal year, Georgia saw strong gains in its revenue stream, and as a result, was able to replenish the monies in the Revenue Shortfall Reserve Fund (funded with 3% of revenues) and Mid-year Adjustment Reserve Fund (funded with 1% of revenues) which had been depleted during the 1982 and 1983 fiscal years. To date in 1985, revenue receipts are running ahead of State estimates by a rather substantial margin. The two largest sources of revenue for Georgia, sales and income taxes, each saw sizable increases from '83 to '84, increasing 10.7% and 12.8% respectively.

The State possesses a sound economic foundation, with agriculture becoming less important, as other sectors have taken over. The growing services sector (increasing 3.6% in '82 and 5.7% in '83) has helped to insulate Georgia from recessionary periods. The most recent recession, as evidenced by a revenue stream only somewhat affected, points to this fact. The population of the State has been increasing at a fast pace, with unemployment holding at very low levels. Per capita income, while below the national average, is on par with that of the region. Debt ratios of the State are moderate, and when combined with an improved economic make-up, improved financials and a growing population base cause us to view the State as an Upper AA with an upward trend.

HAWAII

Moody's: Aa **SLB:** Lower AA **S & P:** AA
Trend: Stable

The budgetary gap which the State has been experiencing was substantially narrowed in the 1984 fiscal year to a level of $20 million, from a level of $92 million in 1983. However, as a result of this gap, the General Fund balance declined once again in '84, to a level of $105 million. Revenues were lessened in 1984 due in part to a cessation of the gross receipts tax on airlines.

Overall, the already high debt burden of Hawaii has increased since the last survey, although this is consistent with the growth mode the State is in. The economy is reasonably diversified, with a strong reliance on tourism, federal defense and agriculture. Tourism trade in Hawaii has been consistently strong even during economic downturns, with a 1984 increase in visitors of 10.6% over 1983. Even with the strength of the dollar against the yen, the ever important Japanese tourist segment increased 15.7% over 1983 levels. The dollar has recently shown signs of weakening which should bode well for the State's Japanese tourist trade. Given the State's debt burden and limited economic diversification in conjunction with relatively low unemployment, good resident wealth and a thriving tourism industry, we place Hawaii in the range of a Lower AA credit with a stable trend.

ILLINOIS

Moody's: Aaa **SLB:** Upper AA **S & P:** AA+
Trend: Stable

Illinois, one of the wealthier states, also possesses an economy marked by its diversified nature. Durable goods manufacturing, however, comprises a large percentage of the economy, which will be problematical if the State goes into another recessionary period. The trend of budgetary deficits has been reversed (due in part to an improved economy and temporary tax hikes), as has the downward trend of the State's General Fund balance.

Overall, the 1983-84 fiscal year was one of great improvement for Illinois. Temporary tax increases, coupled with a strong economy, helped revenues of the State rebound sharply. Income tax revenues increased at a 33% rate, with sales tax revenues growing 10.7%. On the expenditure side, increases were kept at a level below the increases in revenues. The General Fund balance, which had decreased in the four previous years, rebounded sharply to finish at a level of $217 million in 1984 and $479 million in 1985. Due to an increase in 1986 projected expenditures and a decrease in projected revenues, the 1986 balance could be drawn down to $177 million unless certain measures are taken. As evidenced by temporarily increased tax rates, the State is willing to take measures necessary to improve its operating performance. Sensitivity to a possible economic downturn, high levels of wealth, a diversified economy and an adequate fund balance cause us to view the State as an Upper AA credit with a stable trend.

IOWA

Moody's: MIG-2 **SLB:** Lower MIG-1 **S & P:** N.R.
Trend: Stable

With its foray into the capital marketplace, the State of Iowa has debt currently outstanding (consisting of tax and revenue anticipation notes) of $452,000,000. The need for the notes was to offset the timing difference between revenues and scheduled disbursements, particularly in the area of school aid.

The 1984 fiscal year saw Iowa maintain its General Fund at a balance of $8.3 million, which was transferred to the Economic Emergency Fund (money used to alleviate General Fund deficits in any future year). Revenues were hurt by a weakness in corporate income taxes. Constitutionally, the State cannot end a fiscal year with a General Fund Deficit; so that, expenditures will be slashed if new revenue sources are not located. Certain tax rates are moderate and can potentially be raised (e.g. sales tax). Wealth levels in Iowa are slightly below the national average, with unemployment well below the national average. The economy is fairly diversified with only 19.6% of employment accounted for by the manufacturing sector, and as a source of personal income only 2% is accounted for by the agricultural sector. Currently 123 of the Fortune 500 companies have manufacturing plants in Iowa. The State's low debt ratios, and the fact that constitutionally it cannot sustain a General Fund Deficit help to overshadow the slim State surplus and difficulty in timing revenues and expenditures, causing us to view Iowa as a Lower MIG-1 credit.

LOUISIANA

Moody's: A1 **SLB:** Lower AA **S&P:** AA-
Trend: Stable

Louisiana, like the State of Texas, has a high reliance on oil and gas for revenues in the General Fund. Unlike Texas, they do not have the cushion of a substantial General Fund balance to help carry them through their current and potential future lean times. The balance declined from a 1983 level of $180 million to an 1984 level of $7 million. For the current year the State expects to maintain a token fund balance, although large expenditure cuts are required. Oil and gas severence taxes fell by 7.2% last year, and are projected to fall 6.1% this year. Should oil prices drop more than projected, any positive balance would not be a probable occurrence.

The 1985 fiscal year was one of heavy borrowing for Louisiana, making already poor debt ratios even worse. Debt as a percentage of personal income rose to 6.9%, while the median for all states has dropped to 2.4%. Revenues for the year should increase approximately $500 million, due in large part to tax increases, particularly in the corporate income tax rate, gasoline tax and sales tax; but as mentioned before, expenditures need to be cut. The wealth statistics of the State are well below national averages, with unemployment well above. While high levels of debt, an economy highly reliant on an industry in a downward trend and an extremely large unfunded pension liability ($4 billion) are very negative factors, the constitutional pledge of monies first to bond debt service enhances the quality of Louisiana debt.

MAINE

Moody's: Aa1 **SLB:** Upper AA **S & P:** AAA
Trend: Stable

Revenues of the State, after increasing only 1.8% in the 1983 fiscal year (led by a 2.1% decline in tax revenues), rose 13.8% in 1984. Adjustment to the total loss of unemployment compensation taxes and a substantial increase in corporate income tax revenues were prime contributors to the improvement. The undesignated General Fund balance, which until 1983 had been at very consistent levels rebounded in 1984 to end at an amount of $16.7 million. Operating results which in 1983 saw a deficit of $15.5 million, in 1984 ended with a surplus of $44.5 million. Estimation of receipts tend to be very accurate.

The economy of the State tends to be somewhat problematical, with a concentration in forest products, fishing and textiles. The planned expansion of national defense spending within the State is a positive factor. Wealth statistics, while below the national average, have risen at a rate above the national average. Additionally, population and resident employment have increased faster than the national average. New jobs are expected to be concentrated in the trade and service sectors. The debt ratios of Maine are at moderate levels. Conservative operations, moderate debt, and consistent performance over the past 10 years justify an Upper AA rating for the State of Maine.

MARYLAND

Moody's: Aaa **SLB:** Lower AAA **S&P:** AAA
Trend: Stable

In the 1984 fiscal year, revenues and expenditures were extremely close to projected levels on a budgetary basis, with a favorable balance in General Fund receipts of 1% and an unfavorable balance in expenditures of .1%. Overall, revenues increased 12.5%, led by income taxes (+15.7%) and sales taxes (+14.2%), while expenditures increased only 4.7%. The General Fund, which reports according to GAAP (Generally Accepted Accounting Principles), widened its deficit to $65 million and on a budgetary basis, ended at $41.3 million, down from $54.9 million. The drop is due mainly to planned use of the surplus.

The State of Maryland currently enjoys a balanced economy featuring tourism, services, agriculture and a strong government sector benefiting from its proximity to the nation's capital. Wealth levels are well above average and unemployment well below the national average. The G.F. balance on a GAAP basis is expected to be on the positive side in the 1985 fiscal year. An area for concern includes very high debt levels, with per capita debt at a level of $682. The current S & L crisis is being responsibly handled and should not affect the States' prime rating. Deficits and high debt levels are partially offset by the traditionally responsible performance of State government (e.g. no short-term borrowing) and the typically short maturity of outstanding debt, placing the bonds as a Lower AAA with a stable trend.

MASSACHUSETTS

Moody's: A1 **SLB:** Upper A **S&P:** AA
Trend: Stable

Massachusetts ended the 1984 fiscal year with an operating deficit in the General Fund, due in part to a substantial increase in State aid to cities and towns. This was caused partially by the passage of Proposition 2 1/2, which limited local revenue raising capabilities. The General Fund balance moved from a $64.4 million surplus in 1983 to a $19.3 million surplus in 1984. For the 1985 fiscal year, the State expects to widen its balance to $37.2 million, but large increases in fund transfers, aid to cities and basic State expenditures will put a strain on the balance, particularly in the event of an economic slowdown.

The State exhibits very high per capita wealth, low levels of unemployment, a stable population and an economy marked by a shift towards the service, trade and high technology industries. This shift away from the more traditional manufacturing industries has helped to insulate the State from some of the effects of a recession. Debt ratios are on the high side, with the State spending more and more on aid to local entities. Wealth levels and improving economic make-up help to provide adequate security when all aspects of State operations are taken into consideration, and cause us to view Massachusetts as an Upper A with a stable trend.

MICHIGAN

Moody's: A **SLB:** Mid A **S&P:** A+
Trend: Stable

Tax revenues in 1984 rose sharply, up 23.5% from 1983, due in part to an improved economy and temporary income tax increases. Overall, State revenues increased 12.1%. Due mainly to lower than expected receipts from Federal agencies, actual General Fund revenues were below target. Expenditures were kept at an increase of 5.5%, compared to an increase of 5.7% the year before. The undesignated General Fund balance, at a level of $19.7 million in 1983, ballooned to $283.2 million in 1984. In the 1985 fiscal year, it is expected that approximately $386.7 million will be deposited in the Budget Stabilization Fund.

The Michigan economy, traditionally concentrated in durable goods manufacturing, has been extremely sensitive to hard economic times. While diversification is being encouraged, at this point in time the vulnerability remains. The State possesses a high unemployment rate, a certain amount of migration to other States, and only average per capita wealth. State government has made a concerted effort to improve operations with budget cuts, work force reductions and tax increases. The debt ratios of the State are low, and when looking at G.O. debt, they are very low. Given the commitment to improved operations, low debt ratios and an improved economy, Michigan can support a Mid A rating, although the State economy continues to leave it vulnerable to the downswing in the business cycle.

MINNESOTA

Moody's: Aa **SLB:** Mid AA **S&P:** AA+
Trend: Stable

The 1984 fiscal year was one of marked improvement for the State, as evidenced by its General Fund balance moving from a $5.3 million surplus to a $344.3 million surplus. Expenditures, which had been slashed 22% in the 1983 fiscal year increased in 1984 to slightly above 1982 levels, with revenues increasing 16.2% in 1984. The revenue base increased in part because of tax increases and also because of an improved economy. The economic pause in the beginning of 1985 combined with major tax cuts has caused a reduction in forecasted revenues. A cushion against revenue shortfalls will be provided by a $450 million Reserve Fund expected to be funded in the upcoming biennium.

Wealth levels in Minnesota are above the national average, with unemployment consistently well below the average. Agriculture, comprises 6.1% of employment; and the service sector, which is less sensitive to a downturn in the economy, has been gaining in importance. Debt ratios in the State are moderate, and short-term borrowing needs will be greatly reduced in the future. A stronger economy, a commitment to balanced financial operations and moderate debt levels indicate an improved position, although the tax cuts put through are an area of concern in light of weakening revenues. We view Minnesota as a Mid AA with a stable trend.

MISSISSIPPI

Moody's: Aa **SLB:** Lower AA **S & P:** AA-
Trend: Stable

In fiscal 1984, General Fund receipts and expenditures were about equal, with receipts increasing 9.3%, and expenditures 7.7%. Tax rate increases (sales, personal income and corporate income) were made permanent, with sharp increases in sales tax revenues (+13%) and income tax revenues (+19.1%) over fiscal 1983. The General Fund balance dropped to a level of $10.6 million from $15.2 million the year before. To this point in 1985, operations have shown improvement with the General Fund operating at a surplus, due in part to strict controls on expenditures. The Working Cash Balance Fund, to be funded with approximately $31 million, is intended to ease cash flow imbalances.

The State currently has an economy based in manufacturing, although the trade sector has increased by 7% since 1980. The main components of manufacturing are textiles and lumber which have been weak in the recent past. Mississippi is the poorest state in the nation, with per capita income only 69% of the national average, unemployment well over the national average, and 23.9% of its families below the poverty level. Overall, the State has had responsible fiscal operations, moderate levels of debt, has planned for the future and displayed a willingness to raise taxes, all of which combine to place the State as a Lower AA with a stable trend.

MISSOURI

Moody's: Aaa **SLB:** Mid AAA **S & P:** AAA
Trend: Stable

1984 was a year of substantial improvement over the 1983 fiscal year. After three years of an operating deficit (after operating transfers out), 1984 resulted in a surplus. General Fund revenues increased approximately 4.4%, while expenditures rose 10.5%, but operating transfers out increased only 3.9%. Preliminary results for 1985 indicate that revenues are running approximately 6% over original estimates. The major tax sources consist of general sales taxes and personal income taxes. Undesignated General Fund monies increased in 1984, ending at a level of $242 million.

The Missouri economy exhibits a diverse nature, with durable goods manufacturing a major component (automobiles and aircraft). This left State finances vulnerable to the recent recessionary period. The economy has seen more growth in the other sectors, helping to lower the impact of economic downturns. Personal income is average, with unemployment traditionally above the national average. Given the low amount of debt which the State has outstanding and the improved economic environment, Missouri's prime credit rating is upheld.

MONTANA

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

The 1984 fiscal year saw General Fund revenues for the State of Montana decrease 6.1%, due in large part to a 19% drop in gas, oil and coal production taxes. Strong increases in its revenue stream were provided by personal income taxes, which rose 12.4%. Expenditures were pared, however, with general government spending being slashed 33.9%, and overall spending decreasing approximately 1%. The undesignated General Fund balance of the State has consistently shown a surplus, and has ended the 1984 fiscal year at a level of $36 million, down from $57 million.

The economy of Montana is concentrated in the agricultural, mining and forest product sectors, areas which have not performed well in the recent past. Due to this economic makeup, the growth of the State will not be as powerful as had been expected. Oil and coal related industries have been weak, combined with a drought that has hurt agriculture. Wealth levels of the State are below average, with per capita income only 80% of the national average. Debt ratios, which as recently as 1981 had been low, are now moderate, due to large borrowing for a variety of capital projects. The State has, however, exhibited not only a stable financial past, but a conservatism in its financial operations which provide good security for outstanding debt, and cause us to view Montana as a Mid AA with a stable trend.

NEVADA

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

In 1984, total revenues increased at a 6.9% rate, led by sales tax revenues which showed a gain of 10.2%. This tax was raised in 1981 from 3.5% to 5.75%. Gaming taxes declined 4%, due in part to new timing of payments and to an employee strike late in the year. Expenditures were kept at constant levels, predominantly because of a 10.7% decline in educational contributions caused by excessive payments in 1983. The end result of 1984 was the replenishment of the General Fund balance, up to a level of $81.5 million.

The economy of Nevada, not surprisingly, is dominated by the hotel and gaming industries, which comprise 28.1% of non-agricultural employment. Although under pressure from competition such as Atlantic City and other legalized gambling alternatives (e.g. lotteries), 1984 saw an increase in visitors (4%), conventions (10.2%) and casino winnings (11.36%). Although in an uptrend, this reliance on an industry facing a difficult competitive environment is an area of concern. More optimistic components of the State of Nevada include above average wealth, low debt ratios, and a population base which has been increasing much faster than the national average. These factors, combined with consistent and strong General Fund balances provide good security, and place the State as a Mid AA with a stable trend.

NEW HAMPSHIRE

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

The 1984 fiscal year was a solid turnaround year for the State of New Hampshire. This can be evidenced by a General Fund surplus of $1,300,000 in 1984, after the State posted a G.F. deficit of over $40,000,000 in 1983. The State has recently been rewarded by Moody's for the substantially improved results by having its rating raised to Aa from A1.

The improved financial results can be attributed to both the revenue and expenditure sides of the State's operations. On the revenue side, the State was aided by tax rate increases on business profits (largest revenue source) and real estate transfers. Coupled with the increased revenues, the State dedicated itself to expenditure controls, keeping the increase to 10.8% above 1983 levels. Preliminary '85 results show the State 8.5% ahead of revenue projections and in line with expenditure projections. General Fund balance expectations are for a level of approximately $40 million. Combining the State's diversified economy, low unemployment, moderate debt levels and strong population growth with both its willingness to adjust tax rates and control expenditures, New Hampshire has in a very short time turned itself around. The outlook for the future is that this trend should continue, with Shearson Lehman Brothers viewing New Hampshire as a Mid AA with a stable trend.

NEW JERSEY

Moody's: Aaa **SLB:** Mid AAA **S & P:** AAA
Trend: Stable

The State of New Jersey performed well in fiscal 1984, with revenues in the General Fund increasing at a rate of 12.6%, and expenditures at a rate of 6.6%. Sales tax revenues rose 24.8% for the year and corporate tax revenues, after an 11.9% decrease in 1983, rebounded sharply to show a 24.8% gain. The General Fund balance, which had slipped to $98.4 million, ballooned to $485.3 million. Due to an expected 10% increase in expenditures in 1985, and a slowing of revenues, the fund balance should remain at about the same level this year.

New Jersey has an economy marked by its diversification, and by the fact that the manufacturing sector has contracted 18.3% over the past 13 years, with the service sector expanding 61.5%. The State possesses very high personal wealth levels, low unemployment and a stable population base. Per capita debt is moderate, with specific revenue sources also pledged to payment. The overall picture of New Jersey, which includes diversity, wealth, a prime location and responsible financial operations supports a Mid AAA rating with a stable trend.

NEW MEXICO

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

In 1984, revenues of the State declined, due in large part to the fact that 1983 revenues included $260 million from a gross receipts tax settlement and 1984 Federal revenue sharing dollars were almost completely slashed. Recurring receipts in 1984 improved in all areas, with certain rate increases and tax implementations a partial reason. Income tax revenues increased 51.2% (30% rate increase), severance tax revenues were up 14.6% and sales tax revenues increased 19.9%. Expenditures for the year rose only 4.8%. The General Fund balance stabilized, ending the year at a level of $57 million.

The economy of New Mexico is reliant on a few specific areas, namely mining, tourism and government research. Gas and oil account for 89% of severance tax revenues, with both areas showing weakness since 1982. Severance tax bonds, the majority of New Mexico debt outstanding, are secured by a pledge of these revenues, and have had historical coverage figures of 2.32x. Debt ratios are moderate when severance tax bonds are included, but G.O. ratios are very low. The State has low wealth levels, but a population base which has been growing at double the U.S. average. Stabilized financial performance with conservative spending patterns, combined with the uncertainty surrounding the mining industry which leaves the State vulnerable to demand, places New Mexico as a Mid AA with a stable trend.

NEW YORK

Moody's: A **SLB:** Upper A **S&P:** A+
Trend: Stable

In the 1984 fiscal year, New York State improved its fund balance from a level of $0 to $51 million. Revenues increased 7.8%, led by personal income taxes (+14.5%) and sales taxes (+12.1%). Expenditures increased 7.1% over 1983 levels. Capital construction costs, which had jumped 29.8% in 1983, declined 14.2% in 1984. State operations were close to projections, with a favorable variance in receipts of $16 million and a favorable balance of $6.5 million in expenditures.

The economy of the State is well-spread out among all of the sectors, with a good portion in the service and other non-manufacturing industries, insulating the State somewhat from a recessionary period. Wealth levels are well above average, with unemployment rates below the national figures and a population base which has stabilized after a period of loss. The State possesses moderate debt levels (G.O. debt per capita of $215), although the amount of agency debt to which some commitment has been made is very large. The diversity of the economy and basic financial wealth of the State helps to offset agency responsibilities and inaction concerning the reduction of its deficit based on GAAP accounting. These factors place New York in our Upper A category with stable trend.

NORTH CAROLINA

Moody's: Aaa **SLB:** Mid AAA **S & P:** AAA
Trend: Stable

In the 1984 fiscal year, North Carolina accurately forecasted its revenues and expenditures, winding up with an overall favorable variance of $254 million. Receipts were right on target, with disbursements 4.4% below expected levels. Major sources of funds rose sharply, with income tax revenues up 15.9% and sales tax revenues up 21.4%. Total revenues rose 13.7%, with total disbursements up 9.4%. General government spending was slashed 6.9% as part of the plan to balance the budget. Overall, the General Fund balance increased to a level of $253 million.

The economy of the State is based primarily in manufacturing (textiles, furniture and electrical) and agriculture (tobacco), although gains in the service sector are expected. Currently, however, the State remains vulnerable to the ups and downs of the economy. Wealth levels are well below the national average, with unemployment near the average. Debt ratios are on the low side, and retirement of principal is fairly rapid. Given the State's long record of stable financial operations, low debt and an exhibited willingness to control expenditures, a Mid AAA rating is warranted.

NORTH DAKOTA

Moody's: Aa **SLB:** Upper AA **S & P:** AA
Trend: Stable

In the current biennium revenues are running slightly ahead of estimates, with major contributions being made by sales tax revenues and income tax revenues. An extension of the recent income tax rate increase has been approved. Expenditure levels are running slightly behind forecasted levels, with the largest differentials in general government spending and higher education. This performance has enabled the State to bring the cash balance back up to a level of $161 million, after dropping to $56 million at the end of the '81 biennium.

The economy of North Dakota is currently concentrated in the agriculture and mining sectors, making the State vulnerable to the cyclical swings of the economy. The service and government sectors have been expanding, with the manufacturing sector still approximately 1/4 the size of the national average. Due to the makeup of the economy, wealth levels have lagged behind the national average. Overall, the composition of outstanding debt (predominantly self-supporting), low debt levels, conservative financial operations and a willingness to raise tax rates in light of economic problems all combine to enable the State to maintain an Upper AA rating with a stable trend.

OHIO

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

Ohio ended the 1984 fiscal year with an improved financial position, showing a fund balance of $93 million. This is a substantial gain over past years ending balances, particularly 1981 when the final tally was $200,000. The gains can be attributed to two major factors, the first being an improved economy nationwide; and the second tax rate increases for personal income, corporate franchise and public utilities taxes. Between 1983 and 1984, income tax revenues increased at a 24.6% rate and corporate franchise revenues increased 36.9%.

The performance of the State, which has a large portion of its economy concentrated in durable goods manufacturing, was particularly hard hit by the 1980-1982 recession. The economic mix of Ohio has shifted somewhat in recent years, moving more towards non-manufacturing sectors. Wealth levels of the State are moderate, with unemployment, due to the large durable goods sector, above the U.S. average. Debt ratios are slightly above average, with over half the debt representing moral obligations of Ohio. The well developed economy of the State, and its willingness to take measures necessary to increase the revenue stream and control expenditures, places Ohio in the Mid AA category with a stable trend.

OREGON

Moody's: A1 **SLB:** Upper A **S&P:** A+
Trend: Stable

After returning to surplus operations in the 1983 fiscal year, Oregon continued the trend in 1984, widening the General Fund balance to $134.7 million. Revenues decreased slightly in 1984, although the major revenue sources showed gains. The jump in income and cigarette tax revenues can be traced to rate increases. Expenditures were kept at an increase of 8.1%. In fiscal 1985, preliminary projections call for an increase in the General Fund balance to approximately $171 million.

The Oregon economy is based predominantly in the wood products industries, exposing the State to the cyclical swings of the economy. Recently, however, some diversification has been evidenced, particularly in high technology. Wealth levels are average, with unemployment rates above average. Debt ratios are very high when the self-supporting Veterans Loan program is considered. Prospective cash flow problems have been addressed, and remedial actions have hopefully corrected the problem although a lawsuit initiated on behalf of the veterans has clouded the issue. While we do not believe the suit will be successful, its progress will be closely monitored. Overall, the State faces frequent initiative action, possesses a weak economy and uncertainty surrounding the Veterans bonds. Implementation of a 5% sales tax has recently been rejected (9/85). All of the above factors cause us to view the State as an Upper A with a stable trend.

PENNSYLVANIA

Moody's: A **SLB:** Mid A **S&P:** AA-
Trend: Upward

Aided by a temporary personal income tax increase, an improved overall national economy and tax accelerations, Pennsylvania moved from a large 1983 General Fund deficit to a surplus of $76.4 million. Income tax revenues increased at a 23.9% clip, sales tax revenues increased 14.6% and overall revenues were up 6.3%. At the same time, disbursements were kept at a low increase of 3.3%. These numbers compare favorably to the previous fiscal year when revenues were up only 3.3% and disbursements rose 5.6%.

The economy of the State is extremely reliant on manufacturing and mining (steel and coal), making it extremely sensitive to downturns in the economy. Employment in the service sector, up 55% since 1970, has helped to diversify the economy somewhat. Population has remained virtually the same since 1970, wealth levels are close to national averages, and unemployment has been well above the national average. The debt ratios of the State are moderate and have decreased in recent years, along with the level of short-term borrowing. The willingness of the State to control expenditures, and its attempt to diversify the economy and take measures to raise revenues, help to overshadow the heavy reliance on cyclical industries, and place Pennsylvania as a Mid A with an upward trend.

RHODE ISLAND

Moody's: Aa **SLB:** Mid AA **S & P:** AA-
Trend: Downward

Aided by an improved economy, the 1984 fiscal year saw Rhode Island improve its bottom line, with the General Fund balance increasing to a level of $32 million. Revenues were led by sales taxes (+15%), income taxes (+7.6%) and corporate taxes (+39%), with Federal revenues accounting for 24.4% of receipts. Tax revenues were strong in part because of rate increases. Overall, revenues rose 9.6% from the 1983 fiscal year. Expenditures were kept at a reasonable increase of 6.1%, with spending for mental health and hospitals rising 10%.

The economy of the State is extremely reliant on manufacturing in areas which are sensitive to the cyclical swings of the economy (e.g. textiles, rubber and plastic). This sector currently accounts for 32% of total employment. Unemployment rates have historically been above the national average, with the population base holding steady. On the negative side, the State has a heavy reliance on the Federal Government for revenues, a highly cyclical economy, and an income tax base which could be affected by any Federal tax changes. Positive factors, including moderate debt, conservative fiscal management and a willingness to increase taxes, combine with the negatives to place the State as a Mid AA with a downward trend.

Population (1984): 958,000

SOUTH CAROLINA

Moody's: Aaa **SLB:** Lower AAA **S & P:** AAA
Trend: Stable

The financial bottom line improved substantially in 1984, with revenues increasing at a rate of 13.1% and expenditures increasing 9%. The General Fund reserve balance increased to a level of $98.5 million in the 1984 fiscal year. The major sources of revenue for South Carolina include income taxes (+12.7%) and sales taxes (+15.5%). The largest expenditure, education, increased 9.1%. The General Reserve Fund, which must be maintained at between 3% and 5% (level subject to general assembly vote), provides a measure of stability for operations.

The South Carolina economy, which had previously been anchored by the agricultural sector has become more diversified, although textile manufacturing dominates. In the event of a recession, the State is somewhat vulnerable. Per capita income in the State is well below the national average, while unemployment has been slightly above. The debt ratios are below average, and short-term borrowing to cover cash flow shortages has not been used for the past 50 years. Overall, consistent financial performance, a constitutional limitation on debt issuance and a comfortable General Fund balance overshadow the current economic make-up, and cause us to view the State as a Lower AAA with a stable trend.

TENNESSEE

Moody's: Aaa **SLB:** Lower AAA **S & P:** AA+
Trend: Stable

In 1984, total revenues increased at a rate of 15.1% over 1983, compared to a 3.3% increase the year before. Sales and use taxes led the way increasing 15.6%, due in part to a temporary 1% increase in the rate. This source of income accounts for 55.6% of all tax revenues. Expenditures increased 10.1% over 1983 levels, led by increases in health, social services, and transportation. The fund balance of Tennessee expanded from 1983 levels, ending fiscal '84 at $163.7 million.

The economic picture of Tennessee is dominated by the manufacturing sector, which makes the State sensitive to the ups and downs of the business cycle. Wealth levels are below average, with the unemployment rate above average. Debt ratios are low and have declined in the past year with no new debt issued in 1984. Issuance of new debt is tied to the growth in personal income. Despite the sensitivity of the economy, low levels of debt, consistent operational surplus and stable General Fund balances help to support the prime rating.

TEXAS

Moody's: Aaa **SLB:** Mid AAA **S&P:** AAA
Trend: Stable

To summarize the past performance and future outlook for the State of Texas, it can be largely broken down to the areas of oil and gas. These two industries directly or indirectly account for approximately 20% of tax revenues in the State. Texas has been moving towards a more diversified economy. General Fund cash balance moved from a surplus of over a billion dollars in 1983 to an ending balance of $743 million in 1984, and has declined further in 1985 to a level of $232.5 million. Oil is currently priced at approximately $27 per barrel and is forecasted to drop to $24.15 by 1987. Every $1 drop in the price translates into a loss of tax revenue in the area of $100 million. Projections of many economists see a price for oil of under $20 per barrel within the next few years.

The 1984-1985 biennium should show a growth in revenues over the previous biennium, oil price weakness not withstanding, due in part to an increase in the State sales tax. Other tax legislation will effect an increase in motor fuels tax and motor vehicle sales tax. However, given a continued weakness in the price of oil, the future revenue stream remains cloudy. Even with the State cutting expenditures, the key is to find a replacement for lost oil and gas revenues. While implementation of an income tax is probably not a likely occurrence, other tax sources, such as a value added tax, could raise significant funds. The State has many positive areas, among them a high amount of self supporting general obligation debt, low debt ratios, low unemployment, high personal income, a diversifying economy and conservative financial operations. Although negative factors such as the continued and expected declines in the General Fund Cash balance, continued weakness in oil prices and lack of any strong revenue increasing legislation indicate a negative performance trend, the positive aspects indicate that the rating of Texas will remain stable.

UTAH

Moody's: Aaa **SLB:** Lower AAA **S & P:** AAA
Trend: Stable

1984 was an excellent year for Utah, with the General Fund balance expanding to a level of $159.6 million. Revenues, which were right on budgeted levels, were aided by increases in the State sales tax and the corporate income tax. Sales tax revenues increased 34.9%, with corporate tax revenues up 40.6%. Expenditures were approximately $40 million below budgeted levels.

The economy of Utah is concentrated outside of the manufacturing sector, with employment gains having been particularly strong in government and services. This helps to insulate the State somewhat from cyclical swings in the economy, and has helped to keep unemployment levels below the national average. Per capita income is below the national average, but population growth has been very strong. Debt levels, which had been on the rise have declined, and are below average. Overall the diversified economy, growing population base, low debt with rapid retirement, consistent General Fund balances and a willingness to raise the tax base help to support Utah's rating.

VERMONT

Moody's: Aa **SLB:** Mid AA **S & P:** NR
Trend: Downward

In fiscal 1984, total General Fund revenues for the State finished $8.7 million behind projected levels, with $5 million being added to the accumulated General Fund deficit. This weakness in receipts comes amid a series of tax rate increases, with personal income tax revenues and corporate income tax revenues hurt by Federal tax law changes. Expenditure limitations and tax rate increases were implemented in order to eliminate the deficit, which ended 1984 at $35 million.

The economy of Vermont is concentrated in the areas of manufacturing, tourism and agriculture, and has become less sensitive to the cyclical swings of the economy. Wealth levels are low compared to the national average, and very low compared to New England states. Population has shown some growth, with unemployment at low levels. The debt ratios of the State are high, but are expected to decrease at a fairly steady rate. While the implementation of a plan to erase the State deficit is a very positive step, Vermont remains extremely vulnerable to Federal tax law changes and economic slowdown. The uncertainty created by this situation causes us to view the State as a Mid AA with a downward trend.

VIRGINIA

Moody's: Aaa **SLB:** Mid AAA **S&P:** AAA
Trend: Stable

In fiscal 1984, Virginia achieved substantial gains in its General Fund balance, moving from a 1983 ending balance of $101.9 million to an '84 ending balance of $208 million. The improvement was due to the strong performance of the corporate income tax (+33%), sales tax (+15.3%) and personal income tax revenues (+14.1%), while expenditure increases were kept at a reasonable level (+7.9%).

The State possesses a triple A by both rating services, putting it into an elite group of eight states. Virginia is generally considered one of the best G.O. credits around. The State has not funded cash-flow deficiencies with short-term borrowing since 1969, debt ratios have been stable and low, no major tax increases have been implemented, and fiscal management has been strong. All of these factors combine with above average wealth levels, low unemployment, a growing population base and a diversified economy which has seen some shift away from the manufacturing sector, and includes mineral production, agriculture and tourism. We view the State as a Mid AAA with a stable trend.

WASHINGTON

Moody's: A **SLB:** Lower AA **S & P:** AA-
Trend: Downward

The 1984 fiscal year was marked by the austerity budget instituted by Washington, with total expenditures declining 1.7%. Combined with the increase in revenues of 6.1%, the General Fund balance moved from a level of $79.8 million to $66.5 million. One problem with the revenue stream of the State is the heavy reliance on sales tax revenues in the absence of any personal income taxes. In 1983 the sales tax rate was increased from 5.4% to 6.5%, along with increases in motor vehicle, tobacco and liquor sales taxes. Tax revenue projections for the current year have been sharply revised downward, with a General Fund balance of $0 expected by the end of the biennium. Passage of Initiative 464 (sales tax based on the value of an item minus trade-in value) should not have a large impact on State operations, but its effect will be monitored.

An economy reliant on cyclical and interest sensitive industries is the basis of the State's problems, with concentration primarily in forest products and aerospace. Wealth levels are above the national average but unemployment is consistently high, debt ratios are high, and short-term borrowing to cover cash flow deficits has become the norm. Talks are currently underway concerning potential tax increases. The negatives of Washington greatly outweigh the positive aspect of fiscal responsibility, and cause us to view the State as a Lower AA with a downward trend.

WEST VIRGINIA

Moody's: A1 **SLB:** Upper A **S&P:** AA-
Trend: Stable

During the 1984 fiscal year, General Fund receipts expanded over expenditures, allowing the General Fund balance to increase to a level of $142 million. The largest components of revenues are business and occupation taxes, sales taxes and income taxes. The major expenditure of the State is in the area of education. The method of taxing business has been redefined.

The West Virginia economy is extremely reliant on the coal industry, which has contributed to the above average unemployment levels as well as to the low levels of per capita wealth. There have recently been major job losses in the areas of construction, mining and manufacturing, which played a role in the S & P rating downgrade to AA-. Per capita debt, which is above average, has remained stable since the last report. Overall, the economic reliance on an industry which is vulnerable to the business cycle together with the presence of adequate fund balances cause us to view the State as an Upper A credit with a stable trend.

Population (1984): 1,953,000

WISCONSIN

Moody's: Aa **SLB:** Mid AA **S&P:** AA
Trend: Stable

The State of Wisconsin performed well above expectations in the '83-'84 fiscal year, moving from a General Fund deficit balance of close to $200 million, to a surplus of $360 million. The economic recovery hit the State in a big way, with income and sales taxes showing good gains, increasing 25.8% and 13.7% respectively. With total revenues increasing 6.4%, expenditures were kept at a 3.5% rise.

The manufacturing sector of the State, particularly durable goods has made it sensitive to economic downturns. The economy has been diversifying with manufacturing, still dominant, losing some ground while the service sector has been gaining. Wisconsin has been having trouble with its Veterans Bond program, but a restructuring has hopefully alleviated the problem. Per capita income figures are good, with unemployment very close to the national average. The debt ratios of the State are moderate, with a demonstrated willingness having been shown to increase the revenue stream while controlling expenses. All of the factors combine to place Wisconsin as a Mid AA with a stable trend.

STATE OF ALASKA

A Discussion of Lease Purchase Financing

SHEARSON LEHMAN BROTHERS

February 13, 1986

TABLE OF CONTENTS

Lease Purchase Financing

- What is lease purchase financing?
- How is the credit of the bond issue determined?
- How can municipal bond insurance or a letter of credit improve the security and lower interest costs?
- What other types of bonds can be issued besides traditional fixed-rate, long-term bonds?
- How can arbitrage on unexpended construction funds and on reserve funds lower the net cost?
- Can an issuer sell bonds before a project has been finalized or make lease payments before the project is completed?
- What services are provided by a senior managing investment banker?
- How quickly can lease purchase bonds be issued and what is the procedure?

Appendices

- Impact of the Tax Reform Proposal
- Recent case studies

1. What is tax-exempt lease purchase financing?

Lease purchase financing is an attractive alternative to general obligation financing and is being used extensively by state and local government across the country. Lease purchase revenue bonds differ most from general obligation bonds in their security features. General obligation bonds are secured by the full faith and credit of the government which issues them. The government's taxing powers are thus called upon to make the debt service payments on the bonds. Lease purchase revenue bonds, however, are secured by lease rental payments which flow from the government which uses the facility to the entity which issues the bonds. This entity acts as nominal owner and lessor of the facility, and the lease payments flow through the lessor to the bondholders. Thus, the lease payments, which result from annual or bi-annual appropriations by the government which uses the facility, are the security for lease purchase revenue bonds.

Although called a lease, the lease purchase agreement actually represents an installment sale arrangement which provides for the financing of a capital facility such as a state office building, prisons, courthouses or municipal parking facilities. Payments are made to the lessor over a period of time by the lessee or buyer (any government body, including a state, county or agency), while investors in the lease purchase revenue bonds provide the funds for construction. Lease payments must be divided into principal and interest components for the interest portion to be considered tax-exempt income by the parties providing the financing. To be eligible for tax-exempt financing, a lease purchase contract must meet requirements for tax exemption under Section 103 of the Internal Revenue Code. In brief, the lessee and final owner must be a public entity financing facilities in order to further the public interest.

The Lessee and the Lessor -- The government body, as lessee, enters into a lease purchase agreement with another municipal entity (either another government or a duly empowered body such as a public building authority or the Division of Bond Finance) or with a non-profit, IRS Ruling 63-20 corporation* acting as lessor. For this purpose the lessor is often simply an entity created by the government body for the purpose of issuing bonds on its behalf. In some cases the issuing entity is also empowered to operate and maintain the facilities under agreements with government departments. The financing can also be structured through a municipal leasing corporation or bank trustee which would act as nominal lessor and hold title to the facility, while tax exempt certificates of participation evidencing proportional interests in the lease payments are sold by an investment bank in the same manner as municipal bonds are sold.

---

* Corporation organized under the general non-profit corporation ("NPC") law of a state of county are deemed to be issuing bonds on behalf of a political subdivision when following the rules set forth in Revenue Ruling 63-20 of the IRS. Such entities can be created quickly by a state or local government or an existing NPC's charter could be changed for this purpose.

Procedure for Lease Purchase Financing -- Before construction of the facility began, the state or local government would enter into a lease purchase agreement with a lessor providing for a lease payments by the government body. An investment bank, acting as underwriter, would purchase the bonds from the issuer and sell them to investors whose investments would be secured by the lease payments due from the state or local government under the lease. The lease payments would be assigned to a trustee bank and would be paid to bondholders; the interest portion would be exempt from federal and state income taxes.

The same trustee would hold and disburse the proceeds from the sale of the bonds according to a construction schedule. Prior to drawdown, balances in the construction fund would be invested in taxable securities in order to produce interest earnings to help minimize the net cost of constructing the facility. At the end of the term of the lease, title to the facility would pass to the lessee (i.e., the state or local government). This contrasts with financings involving the private ownership of the facility and the capture of depreciation benefits, which would require a payment at the fair market value of the facility if the government wished to acquire the building.

Construction Risk -- Pursuant to the lease, lease payments from the government body could commence upon issuance of the bonds and not be contingent upon completion of the facility. In this scenario, construction risk is borne by the lessee as would be the case for general obligation financing. Such an arrangement accomodates bondholders who would expect timely and full payment of interest and principal due on the bonds. In general, investors in tax-exempt instruments are risk averse and are not willing to invest in a project when repayment of their investment is conditioned upon successful completion of construction and the resulting commencement of lease payments. Similarly, the lessor is typically not able to bear construction or completion risk in the financing, especially when it is an entity simply created to issue debt securities on behalf of the government body.

Successful lease purchase financing therefore requires the government body either to make lease payments before project completion or to obtain insurance against construction and completion risk by a third party, so that neither the government body, the bondholders nor the lessor bears this risk. A contractor, perhaps with the assistance of a financial institution, could cover any construction cost overruns and could also provide financing in the event of a delay (i.e., contracting for a guaranteed maximum price and a guaranteed completion date with per diem liquidated damages equal to the financing cost). Some extraordinary events are difficult to insure, for example, problems caused by natural disasters, war, breakdowns in the transportation system and strikes. However, adequate insurance of construction and completion risk can be obtained, if desired, especially in light of the straightforward nature of public building construction and the lack of technological complexity. The cost of insurance coverage (construction bonding) is usually passed on in a fixed price construction contract. Alternatively, the issuer might self-insure against the risks or the underwriter can sometimes assist the issuer in obtaining a bank letter of credit or municipal bond insurance.

Ownership of the Facility -- If the state or local government were to use lease purchase financing, title to the facility would usually be held in trust by a trustee bank for the benefit of the bondholders throughout the term of the lease in order to protect their investment. Together with call provisions on the bonds, the government body could have the option to purchase the facility prior to the termination of the lease for a payment equal to the outstanding principal component of the lease payments plus a premium. In the event that such an option were not exercised, title would pass to the lessee and the lessee would own the facility free and clear at the end of the term of the lease. For federal and state income tax purposes, a lease purchase transaction would be considered a conditional sale implying ownership by the government body. For this reason, no tax benefits such as depreciation or investment tax credit would be available to any private tax-paying entities involved in the financing. Conversely, the property would not be subject to real estate taxes, as the government body is the user.

Non-Appropriation Clause -- The lease and the subsequent financing provided by the lessor in most cases is not considered a debt obligation of the government body because the lease would be subject to annual appropriation (in some states such as Michigan and New Jersey, it is not considered to be debt even if there is a contractual obligation to make payments for the entire lease period). For this reason, lease purchase financing is often used in situations where governments are constrained by debt limitations or referendum requirements regarding the issuance of debt. Typical non-appropriation language, which would be included in the lease, would be similar to the following:

> Lessee reasonably believes that funds can be obtained sufficient to make all Lease Payments due during the term of the lease. Lessee hereby convenants that it will do all things lawfully within its power to obtain and maintain funds from which Lease Payments may be made, including making provisions for such payments to the extent necessary in each bi-annual or annual budget submitted for the purpose of obtaining funding, using its bona fide best efforts to have such portion of the budget approved, and exhausting all available review and appeals in the event such portion of the budget is not approved.
>
> In the event that the Lessee is unable to obtain funding for any renewal term, Lessee shall have the right to terminate this Lease at the conclusion of the then current term of the Lease and shall neither be obligated to make any Lease Payments due beyond the current term, nor to make any concluding payment whatsoever, and this lease shall terminate as to that leased facility. Provided, however, that in the event Lessee does not appropriate such funds, Lessee will use its good faith best efforts to acquire the necessary funding from other agencies or sources. Upon termination as provided for above, Lessor or its agents or assigns should have the right to take possession of the leased facility and Lessee shall be liable to return the leased facility to Lessor in full operational and good working order.

Accounting Treatment of the Lease Obligation -- Because the non-appropriation clause could permit the government body to stop making lease payments without defaulting under the lease, the obligation has often been treated as a current expense and has only been listed in the footnotes to the balance sheet. The National Council on Governmental Accounting's recent Statement 5 on accounting for leases recommends additional accounting disclosure of such obligations, including calculation of the present value of the lease obligation on the municipality's balance sheet. Accounting treatment of governmental lease obligations is expected to be clarified in the near future by the newly Government Accounting Standards Board.

Preservation of General Obligation Debt Capacity -- In most cases the government body's commitment under the lease would be conditioned upon appropriation. In contrast, financing through general obligation bond offerings requires the "full faith and credit" or tax-supported pledge of the government body. For this reason, lease purchase financing can be less of a strain on a state or local government's financial condition because it is, in effect, subordinated as a result of the non-appropriation clause and can preserve general obligation debt capacity for other needed projects. Lease purchase financing can be an attractive way to avoid excessive general obligation borrowing and to allow administrative flexibility under tax-supported debt restrictions.

Essential Use Facility/Bondholder's Security --- In assessing the security of investing in instruments backed by a lease purchase agreement, investors and rating agencies evaluate the possibility of an event of non-appropriation by the lessee. The nature of the facility which is being financed and its importance to the lessee's efforts to discharge its responsibility of providing essential services are pivotal. Lease purchase financing of non-essential public facilities, such as convention centers, is not as well received by investors as bonds backed by lease purchase agreements associated with the financing of more essential facilities. Correctional facilities, for example, represent an extreme in essential use because governments obviously must avoid closing down a correctional facility and releasing prisoners. Investors, for this reason, regard lease purchase financing involving such facilities as representing a strong and attractive credit. To formalize this situation, investors sometimes request the state or local government lessee to provide a letter setting forth the essential nature of the leased property.

Non-Substitution Clause -- Investors traditionally have been comforted by the inclusion of a non-substitution clause in the lease purchase agreement which would preclude the government body from acquiring the same or a similar facility for a period of time in the event of non-appropriation. This can reduce the risk of early termination of the lease for other than the legitimate absence of sufficient funds. Typical non-substitution language would read as follows:

> The Lessee agrees that in the event the Lessee exercise its right to terminate this Lease in accordance with the non-appropriation provisions contained herein, the Lessee will not purchase, lease, or rent other property for the purpose of performing the functions and projects which were to be performed by the leased facility for a period of one year from the date of termination of this lease.

Credit Ratings -- The rating agencies generally rate lease purchase one full grade below the general obligation rating of the lessee. For example, if a state or local government is rated AA, the lease purchase issue would generally be rated A. This rating policy stems from the risk of non-appropriation. Factors which could improve such a rating are: (i) extremely strong security features on the lease including a lengthy lease term, automatic lease renewals, a contractual requirement to make lease payments or a non-substitution clause; (ii) additional security backing (such as insurance or a bank letter of credit) or specific additional revenues pledged toward payment on the bonds; (iii) powerful evidence of the essentiality of the facility; and (iv) clear statutory authority for leasing and historical experience by the lessee in making appropriations for tax-exempt municipal leasing. As described below, the lower rating will usually cost between 1/4 and 3/4 of one percentage point in additional interest compared to the lessee's general obligation bonds. However, this increased coupon rate can be at least partially offset by the earnings on the debt service reserve fund which is only allowed with the lease purchase issue. If the state or local government has the choice for a given project of using either general obligation or lease purchase financing with equal annual payments, the impact of either on the government body's overall credit rating would be the same. When the lease purchase financing can be structured to cost less than general obligation financing, the lease purchase issue would have less of an impact on the government body's debt capacity and thus help to preserve the credit rating.

Cost Comparison -- The nominal interest cost on bonds backed by a "full faith and credit", or general obligation pledge is lower (generally 1/4 to 3/4 of one percentage point) than the interest rate charged for bonds backed by a lease purchase agreement. This differential reflects the added risk which the possibility of non-appropriation introduces into a lease purchase structure. In effect, the state or local government will have created subordinated debt with a slightly higher interest cost in contrast to the senior debt represented by its general obligation bonds. However, by employing a lease purchase structure, the government body can fund out of the bond proceeds a debt service reserve fund and a contingency reserve fund in order to provide reasonably required added security to the bondholders. The debt service reserve fund would cover a full year's lease payments on the facility while the contingency reserve fund could permit the government body to cover the cost of damage to the facility without having to turn to the legislative body for emergency funding. Furthermore, these funds together can be as large as 15% of the total size of the bond issue and can be invested in U.S. Government securities bearing higher, taxable long-term interest rates, thereby producing significant earnings during the life of the issue. The resulting arbitrage earnings generally bring the net cost of lease purchase financing near the cost of general obligation financing. General obligation bonds do not benefit from the arbitrage earnings which debt service reserve and contingency reserve funds provide because, according to tax law, their increased security eliminates the need for such reserve funds.

In addition, if a lease purchase transaction allows a faster receipt of funds and a quicker construction start, a government can avoid significant construction inflation costs and earn additional funds on invested proceeds during the construction period. Similar savings might be obtained if the transaction allows the government to avoid cumbersome construction contracting requirements that add major costs or delays to a project. The comparative costs will thus depend on the respective interest rates, timing, size of reserve funds, reserve fund investment rates and costs of issuance of the general obligation or lease purchase bonds. These will, of course, vary on a case-by-case basis.

Time Required for Implementation -- Legal documents for lease purchase financing are straight-forward and the basic structure is well established. As a result, funds for a facility can generally be obtained within 60 to 90 days of the decision to use lease purchase financing. In many cases, a government can save substantial amounts of money by avoiding construction cost increases during lengthy delays for referendum requirements of administrative procedures often associated with general obligation financing.

2. How is the credit of the bond issue determined?

The credit rating of the bond issue is determined by Moody's Investors Service and Standard & Poor's Corporation, the two major rating agencies upon which investors rely when they purchase bonds in the primary and secondary markets. A more secure credit will receive a higher rating, will be more favorably received in the marketplace, and result in substantially lower interest payments over the life of the bond issue. If the credit of the transaction is weak, it may be advisable to seek credit enhancement in the form of municipal bond insurance or a letter of credit. (Both are discussed at length in the next section.)

In working with the rating agencies and municipal bond insurers, we have been able to assemble the following list of general criteria they seek in municipal leasing transactions:

General Tax-Exempt Municipal Leasing Credit Criteria

- The lease debt should be evaluated with all the other outstanding debt of the issuer on an aggregate basis and on an annual debt service basis.
- The debt should be no longer than the useful life of the asset.
- As a proportion of the operating budget, the lease debt service, along with other debt service, should not exceed 15%.
- The essential nature of the project will be an important determinant of the rating and insurability because it affects the likelihood of the government to budget, appropriate and pay for the lease rentals.
- In certain cases, a feasibility study may be required.
- The documents must provide for legal validity and full insurance protection.
- With new construction projects, interest should be capitalized until the lease is initiated.
- An automatic renewal provision should be included in the lease. Any non-renewal would have to be accompanied by a 60-day notice before the commencement of the new fiscal year.
- A reserve fund is preferred as well as business interruption insurance to serve as additional protection in a period of insufficient funds or during abatement.
- The extent of representation with respect to non-appropriation will be scrutinized to the extent it may or may not be a prelude to an actual or technical event of default.

- The rating agency or bond insurer should have evidence that the trustee's leasehold interest in the property is perfected as security for the bondholder. Insurance levels will have to be judged adequate to cover the operations in the event of damage and destruction, public liability disturbances, and acts of god.

- Self insurance will be acceptable where the issuer has some claims-paying ability in the form of additional back-up blanket or umbrella policies.

- If the project is in a defined earthquake zone, the lease must provide for earthquake insurance, if commercially available, with deductibles that are the accepted standard.

- If the technology of the project is relatively new and innovative there should be some evidence of where this application has been used successfully in other empirical examples.

These criteria are those ideally expected in a tax-exempt purchase transaction. Those items that cannot be present in a given transaction are likely to result in a somewhat lower rating or higher insurance cost.

The following page from the October 22, 1984 edition of Standard & Poor's Creditweek discusses in greater detail the "essentiality" factor in credit analysis of lease purchase debt.

3. How can municipal bond insurance or a letter of credit improve the security and lower interest costs?

Municipal bond insurance provides a third party guarantee of timely payment of principal and interest on a tax-exempt bond issue. The insurance policy is given in exchange for a one time premium paid upon issuance and calculated as a percentage of total principal and interest payments over the life of the bonds. The insurance provides a AAA rating from one or both of the major credit rating agencies which can result in substantial savings after the cost of the insurance is taken into account.

Until a few years ago, tax-exempt leases which depended upon annual appropriations were not considered to be insurable. More recently, because of new entrants into the municipal bond insurance industry and more experience with annual appropriation risk, certain lease purchase transactions with strong security features have been eligible for such insurance. For example, a recent $32 million transaction Shearson Lehman underwrote for a Kentucky Authority achieved nearly $2 million in present value savings by raising the rating from a likely BBB to AAA. A number of past transactions of the Michigan State Building Authority have been insured, largely on the basis of a court-enforceable contractual obligation of the state to make annual appropriations to pay debt service.

Similarly, a letter of credit from a commercial bank provides a guarantee that substitutes the bank's credit for that of the issuer. The letter of credit, however, is provided in exchange for an annual fee expressed as a percentage of the principal amount of the bonds. The letter of credit is usually available for less than the life of a long-term bond issue and would have to be renewed (usually every five years) to remain in affect.

An issuer and its investment banker would first evaluate the potential costs and economic benefits of using either an insurance policy or a letter of credit for a given bond issue. This would be determined based on the interest cost savings of enhancing the credit rating after taking into account the price of the enhancement. The savings would be calculated on a present value basis. In general, a bond issue which would otherwise be rated A or lower will benefit from the use of insurance, while ratings lower than BBB- are not insurable. Next, the availability of such credit enhancement would have to be determined in the marketplace. This will often depend on the legal constraints on the issuer and the degree to which the issuer is willing to comply with the restrictive covenants the insuror or bank may require as prerequisites to an agreement. The investment banker would then negotiate with one or more firms providing credit enhancement to find the most advantageous terms.

4. What other types of bonds can be issued besides traditional long-term, fixed-rate bonds?

Today's financial markets provide issuers of tax-exempt securities many choices in terms of maturity, call provisions, interest rate and payment schedules for the securities they issue. Issuers are no longer limited to the "vanilla", 30-year, fixed-rate transaction, and many have utilized more sophisticated structures. The result is hundreds of thousands of dollars in savings to the issuer, and bond structures which meet the unique needs of each individual issuer. Two of the more popular structures being utilized today are put bonds which pay low, short-term interest rates and capital appreciation bonds, which may pay no interest until their final maturity. Both can be adapted for use with lease purchase revenue bonds.

Put Bonds

Put bonds usually have a variable interest rate which is tied to a short-term interest rate index. They derive their name from the feature that allows investors to put (sell) the bonds back to the issuer at a given time period's notice. The issuer usually has to maintain a line of credit with a major bank to buy any bonds which have been put and cannot be remarketed (resold). There are many types of put bonds, but all are meant to achieve the same result--a lower interest rate for the issuer. The risk associated with these bonds is that short term interest rates many increase to a point where the issuer would have been better off issuing fixed rate debt initially. Furthermore, some issuers are uncomfortable with the uncertainty of periodic fluctuations in the interest rate. However, as this market has matured, many devices have been developed to reduce the risk and uncertainty. These include municipal bond insurance, interest rate caps and interest rate swaps. Variable rate debt used to be considered unavailable for lease purchase transactions because of the difficulties of structuring how to appropriate a lease payment that varies over time. Shearson Lehman pioneered in the structuring of one of the first such floating rate lease transactions for an issue last year for the County of Los Angeles. This transaction is described on the following page. The Appendix section contains an article entitled "Risks and Rewards of Short Term Financing Techniques" which discusses variable rate debt issuance in greater detail.

Capital Appreciation Bonds

Capital appreciation bonds (CABs) are similar to zero coupon bonds which are bought at a deep discount and do not have any current interest payments. The interest payments are instead compounded at the yield to maturity on the bonds and are all paid on the retirement date of the bonds. As an example, an investor might pay $185 for a thirty-year CAB and receive $5,000 at the end of the thirty-year period. The par amount of CABs is considered to be the amount of the original proceeds ($185 in this example), as opposed to zero coupon bonds. Thus CABs actually describe the amount of money the issuer can expect to receive. This avoids the "sticker shock" an issuer experiences from issuing a par amount of bonds far greater than the proceeds he requires. Because CABs accelerate the payment of principal and have experienced a great deal of demand in the marketplace, their use can reduce overall debt service for many different types of issues.

Vol. 268 No. 26905 New York, N.Y. Friday, June 22, 1984

Jail Issue Uses Lease-Purchase Backing To Take Advantage of a Floating Rate

By Leslie Eaton

Los Angeles County has awarded an $18.4 million issue that the underwriter says may be the first to allow a municipality using lease-purchase backing to take advantage of a daily floating rate.

Shearson Lehman/American Express Inc., which developed the technique, expects it to become popular among the many issuers that use lease-purchase projects, including convention centers and parking garages, according to John W. Gillespie Jr., a correctional facilities finance specialist at the firm. Shearson Lehman has started a new program to provide financing for jails and prisons.

The award, which was made Tuesday, was for one of the first innovative financings for jail and prison projects, for which $4 billion to $6 billion in financing is now being planned by municipalities around the country, Mr. Gillespie said. The bonds have a put feature that allows holders to sell them back daily to Shearson Lehman.

Jails and prisons are generally financed through general obligation debt, although Mr. Gillespie said that in the last few years a number of counties have used lease-purchase financing.

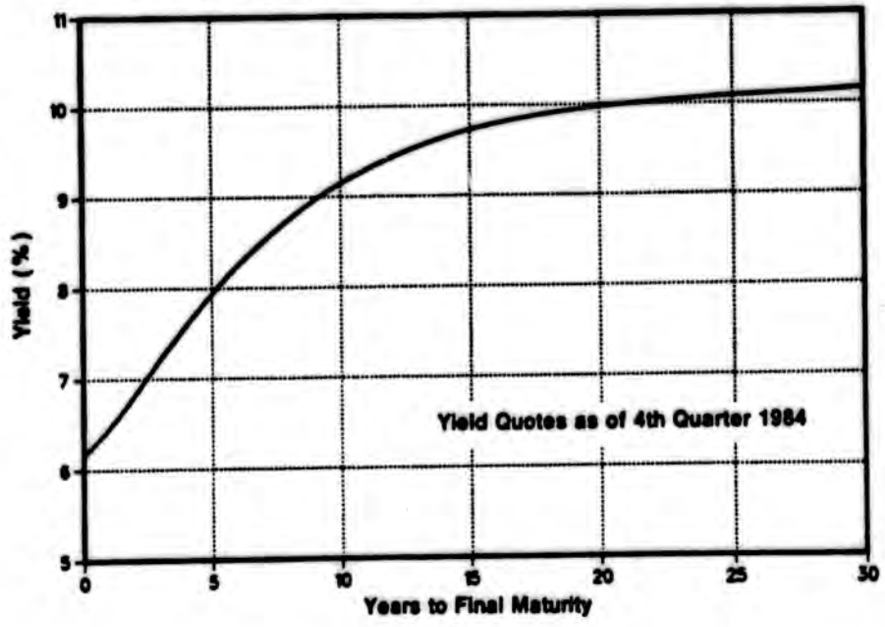
In a lease-purchase financing, a special municipal authority sells bonds that are backed by set rental payments from a local government. The structure is similar to that of industrial development bonds, except that the beneficiary is a municipality, which usually receives title to the project it has been renting when the bonds mature.

One of the difficulties in structuring a lease-purchase-backed issue with a floating rate, Mr. Gillespie said, is that since the rate on the bonds is to be adjusted, the municipality does not know how high to set the rental payment, which covers the interest payments on the bonds. The firm developed two ways to solve that problem, he said.

One method would be to put some of the bond proceeds into a special interest-bearing fund that would be used to cover additional payments if the rate on the bonds rises above the level anticipated by the municipality.

The other method, which was chosen by Los Angeles County, requires the municipality to set the rental payments assuming a high interest rate, and using any excess rental payments to prepay some of the bonds. The county will make rental payments to the authority assuming an interest rate of 12%, although the interest rate it is paying is currently about 5⅞%, said Richard Dixon, Los Angeles County treasurer. The excess should allow the county to retire the debt in about 15 years, although the bonds do not mature until 2014.

"We got two advantages from this structure that are related to each other: a very good rate and, associated with that, the economic savings from being able to retire our debt relatively early [and] lower our total debt service," Mr. Dixon said. The county's alternative, he added, would have been to sell 20-year fixed-rate lease-purchase bonds with a net interest cost of about 10%.



Other municipalities are likely to follow the county's lead in using that new structure, Mr. Dixon said, adding, "I know of one other city that almost stood at the end of the Xerox machine to get copies of our documents."

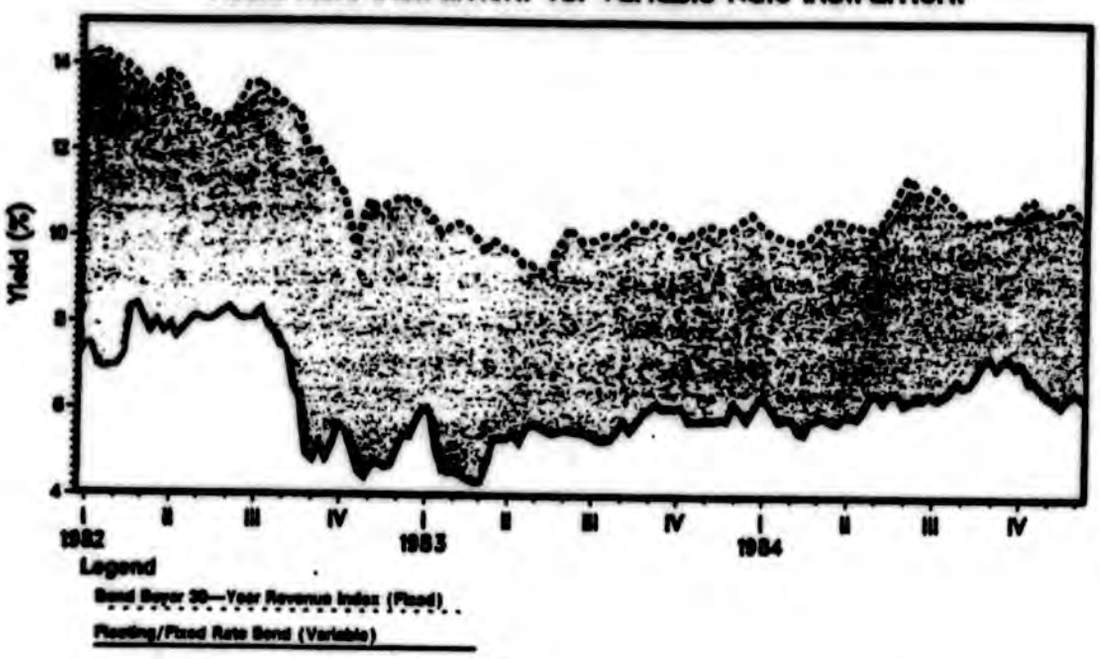
5. How can arbitrage on unexpended construction funds and on reserve funds lower the net cost?



State and local governments can achieve further cost savings by capital facilities with short-term debt during the construction period or with the use of variable rate securities. Because investors are more certain about inflation in the short-term than in the long-term, they are prepared to charge less interest for use of their money over a shorter period of time. The following chart shows how interest rates demanded by investors change depending on the term of the bond issue:

Interest Rate Yield Curve for Typical AA
Criminal Justice Facility Lease Purchase Revenue Issue

Investors are also willing to charge less interest for the use of their money in the short-term if the issuing governmental body is prepared to cover some of the risk associated with interest rate volatility. For state or local governments with good revenue-raising ability, a variable rate bond can be structured to provide investors with variable interest rates based on fluctuations in the market for similar bonds. Shearson Lehman recently sold an $18.4 million variable rate issue as the first portion of the County of Los Angeles' Jail Expansion Program. This lease purchase transaction involves bonds that offer a variable interest rate priced on a daily basis and entitle the County to convert the outstanding debt to a fixed long-term rate whenever there is a cost advantage to doing so. This issue obtained an initial interest cost of 5 7/8%. The following graph shows the difference in recent interest costs between variable rate and fixed rate debt:

Comparative Interest Rates
Fixed Rate Instrument vs. Variable Rate Instrument

Shearson Lehman is a major player in the short-term and variable rate tax-exempt markets and can tailor a program for your specific needs once the decision to finance has been made. Below is a brief description of the more popular financing instruments.

Variable Rate Demand Instruments

- short- or long-term maturity: from several months to 30 years
- optional put for redemption by investor
- may be callable by issuer
- low, short-term interest rate: fluctuates weekly, monthly or at some other set period in a band around a tax-exempt commercial paper index
- requires a bank or other committed source of stand-by liquidity support in the event investors demand principal and interest payments on a repricing date.

Floating/Fixed Rate Instruments

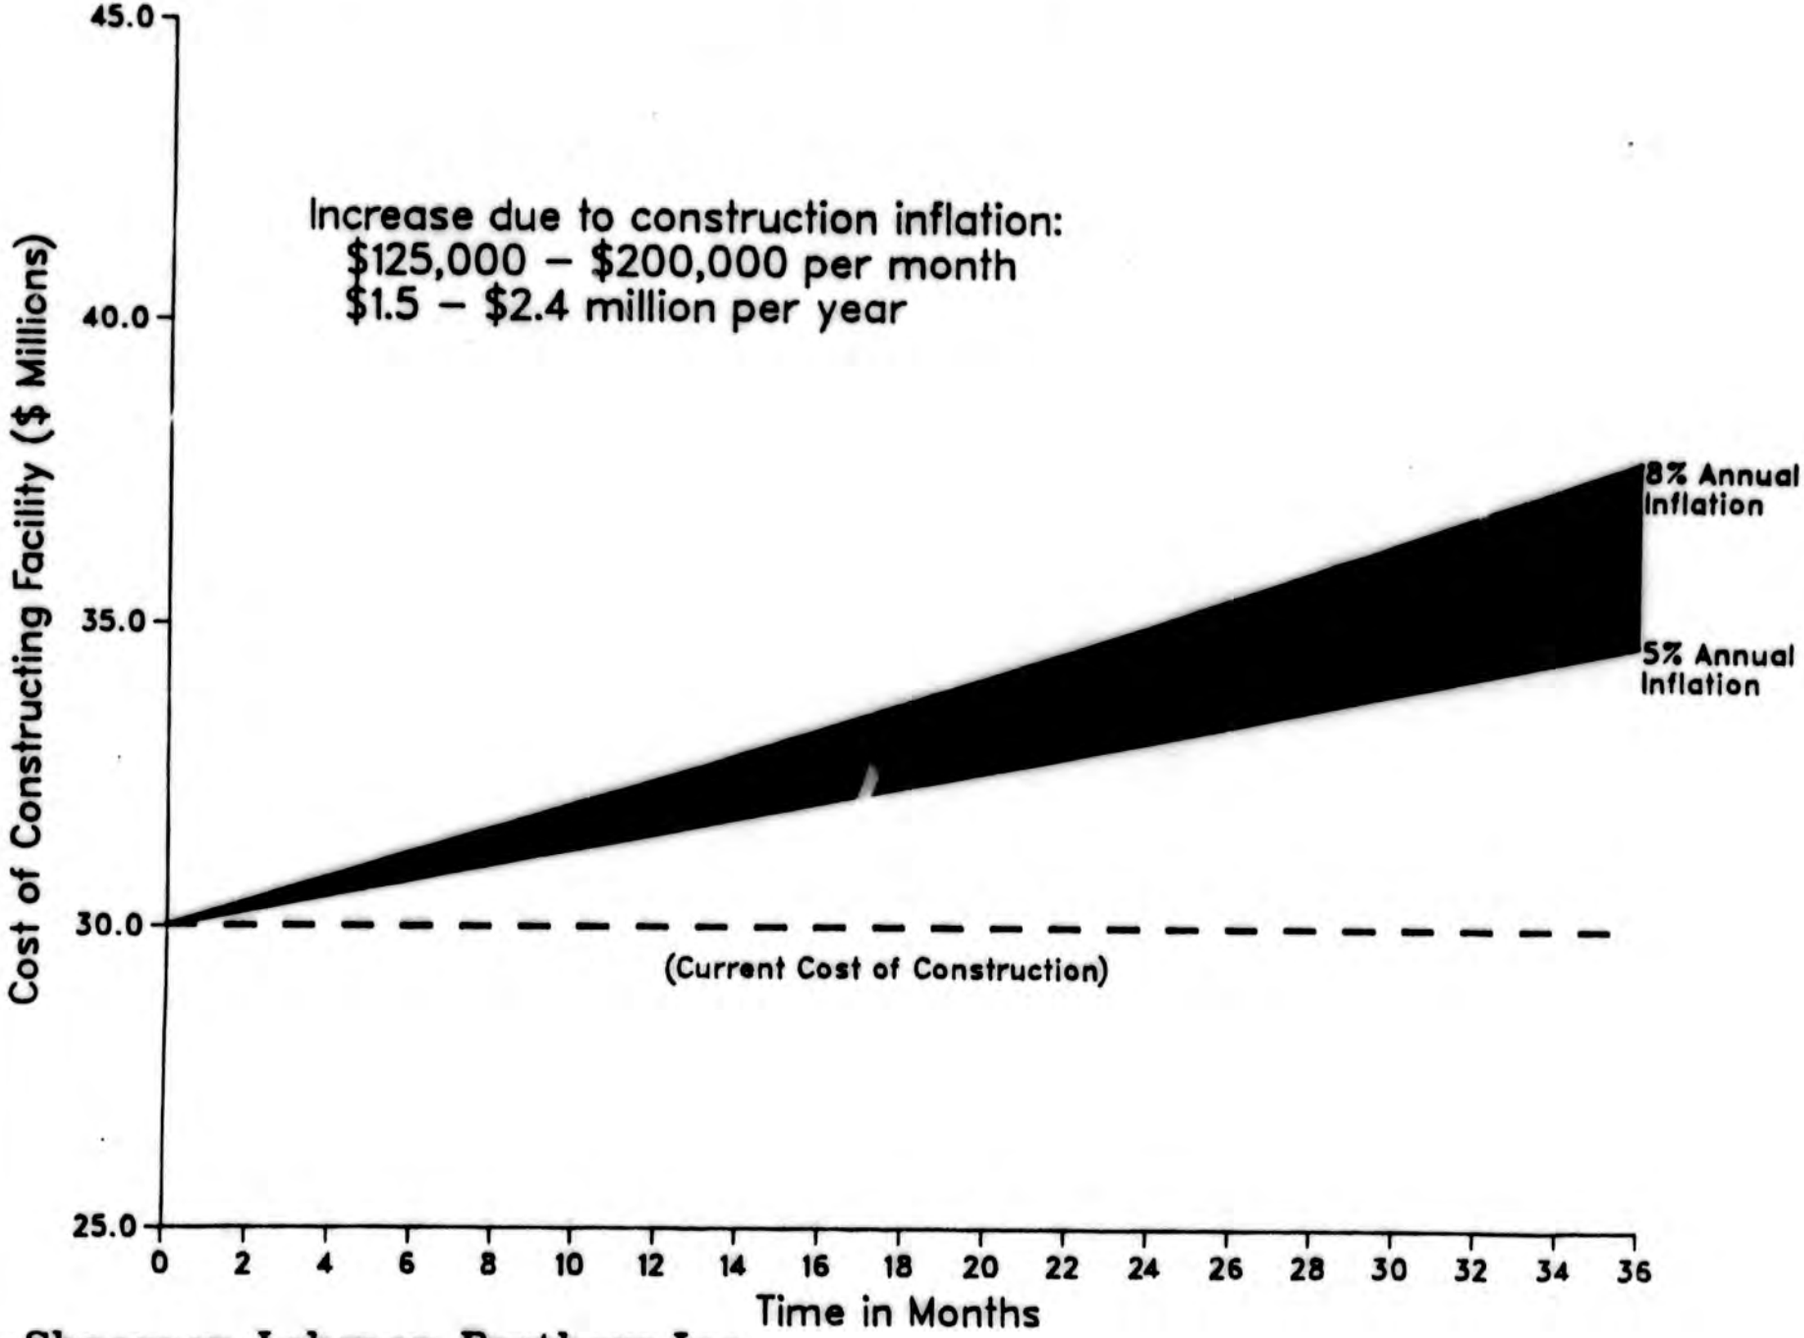
- long-term maturity: up to 30-40 years
- issuer has option to fix the rate: interest rate floats at a low, short-term rate until (optional) conversion to a fixed interest rate
- optional put for redemption by investor during variable rate period
- may be callable by issuer during variable rate period and beyond
- requires committed bank or other source of liquidity during variable rate period

Fixed-Rate Construction Notes

- o short-term maturity matches the construction period
- o ability to lock in low, short-term interest rate
- o permits much higher reinvestment earnings on unexpended portion of the Consrtruction Fund, therefore reducing the required bond size
- o may be secured by Construction Fund
- o allows long-term issuance after project completion

6. Can an issuer sell bonds before a project has been finalized or make lease payments before the project is completed?

In general, an issuer is able to wait until a construction project has been bid before it is necessary to obtain funds through a lease purchase bond issue. In some cases, in fact, it is a legal requirement that such bids and all construction costs be finalized to a bond issue so that the fair market rental value of the facility can be determined by an appraiser.



It is often prudent for the issuer to lock in lease purchase costs in advance with so-called Guaranteed Maximum Price and Guaranteed Date of Completion construction contracts. In such cases, the contractor is responsible for any cost overruns not resulting from change orders by the issuer and must make penalty payments ("liquidated damages") for any period of construction running beyond the agreed date of delivery. In such cases, the issuer knows in advance the amount of financing required.

In a few cases, however, it is economically advantageous to complete the financing before a project's full costs are finalized. For example, it can often help to increase interest earnings on unexpended construction funds by issuing earlier. By this means, the average maturity of the U.S. government securities in the construction fund can be longer and, in most instances, will bear higher rates of interest. Occasionally, an issuer will need substantial funds for such expenses as land acquisition, site preparation, architectural or engineering services or other development costs before it is possible to obtain final construction cost figures. Finally, a project may be able to be included as part of a larger package of projects in a bond issue even though it is not yet finalized. The issuer thus achieves cost of issuance savings by not waiting for a later separate issue.

Unless the authorizing statute or bond indenture specifically forbids the practice, it is usually possible to allow for completion bonds should the original bond issue not provide sufficient funds to finish the project. In projects involving extremely lengthy construction periods, uncertain final costs or a very large expense, it is often better to issue in two or more series of bond issues.

A similar issue arises in the question of whether the lessee can begin to make payments for the facility prior to the completion of construction. On the one hand, it makes excellent economic sense to do so -- the cost of capitalizing interest payments (issuing additional bonds to cover interest during construction) can add millions of dollars to the cost of even a small project. On the other hand, the practice would seem to violate the structure of the lease transaction if a government were, in effect, paying for the use of a building it was not yet able to occupy. As a result, the general practice has been to capitalize interest during the construction period and not to make payments from appropriations until the facility has been accepted and occupied by the lessee. The concept extends to periods in which the facility is rendered unoccupiable for whatever reason and the lessee stops making lease payments until the facility is re-occupied. Protection for the bondholders against this contingency usually requires rental interruption insurance. In cases where lease payments have been made prior to occupancy, they have sometimes been characterized as installment payments toward acquisition of the building or a lease payments on the portion of the facility that has been completed. Savings resulting from avoiding the need to capitalize interest can be significant and thus the legal situation regarding such avoidance should be explored.

COST OF DELAYING A $30 MILLION PROJECT

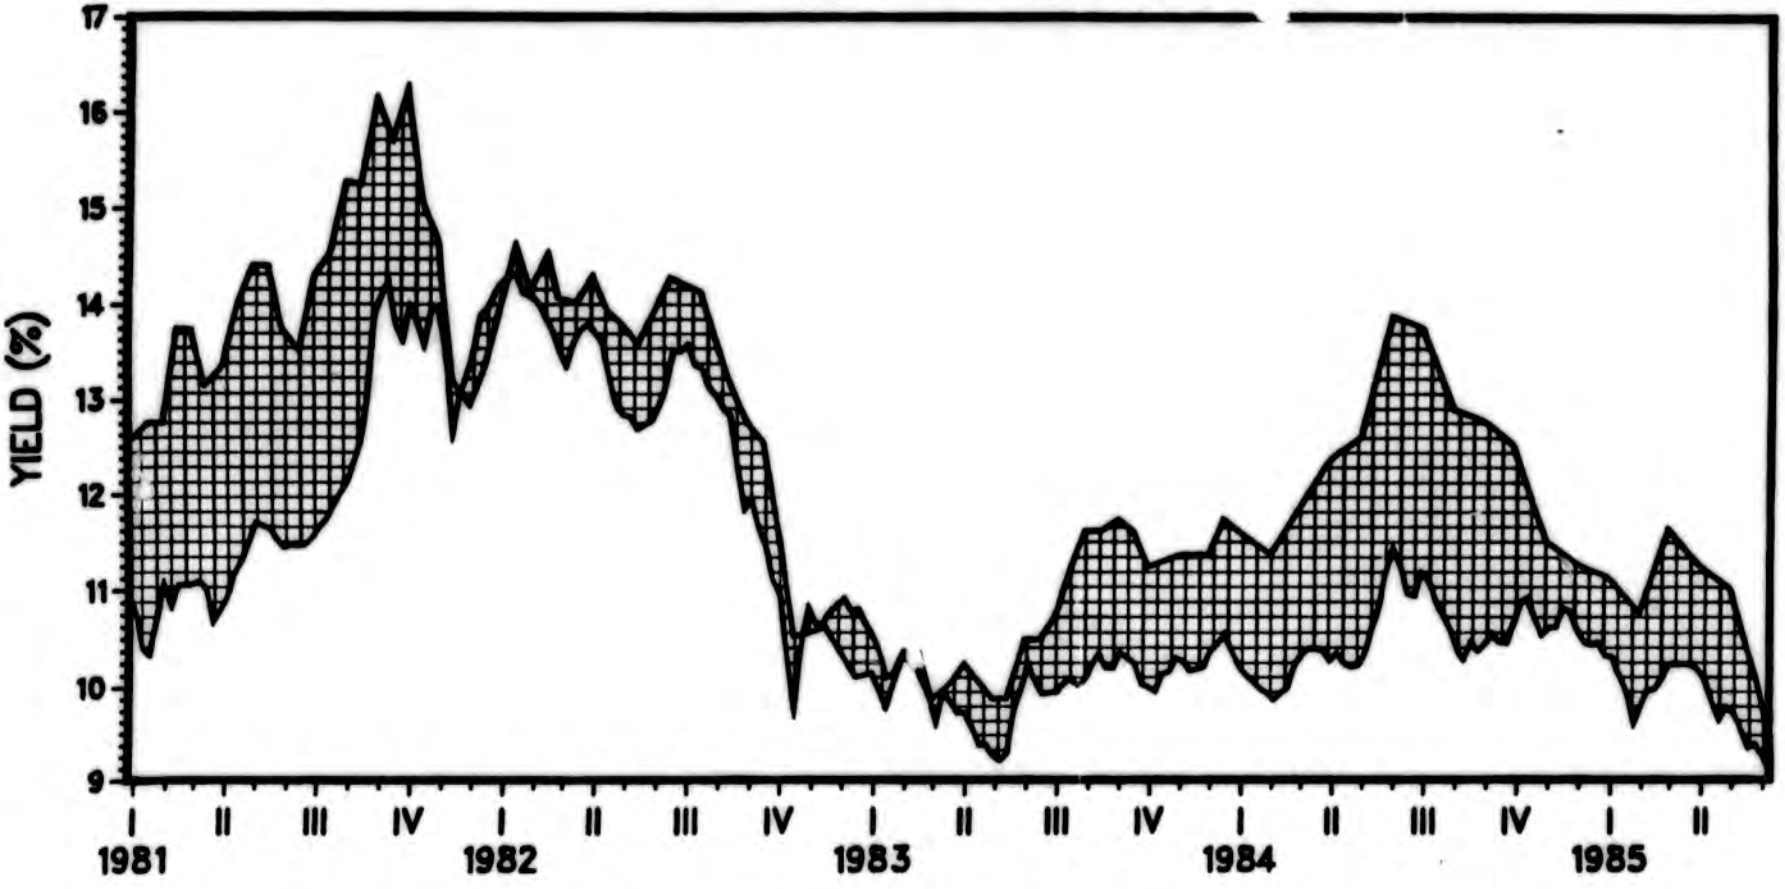
Shearson Lehman Brothers Inc

7. How can arbitrage on unexpended construction funds and on reserve funds lower the net cost to the state?

Arbitrage is simply the difference between the investment rate on the issuer's unexpended funds and the interest cost on the issuer's bonds. The issuer, of course, hopes to be able to invest unexpended funds at a rate higher than what he must pay the bondholders for the use of their money. In this case, the issuer benefits from "positive arbitrage". When the interest rate on the bonds is higher than the rate available on unexpended funds, the issuer loses, suffering from "negative arbitrage".

The two basic sources of potential arbitrage are the construction fund and the debt service reserve fund. If there is a capitalized interest fund, arbitrage may be earned on it in the same manner as on the construction fund.

In a project financing most of the proceeds of the bond issue are deposited with a trustee bank into the construction fund. Because draws are from the fund over time, the unexpended portion of the fund should be invested, usually in short-term government securities such as Treasury bills. This means that the original par amount of bonds issued can be reduced by the amount of projected investment earnings on the construction fund. This technique is commonly referred to as "net-funding" the construction fund. When the interest rates on short-term Treasury securities is high, it may be advantageous for the issuer to issue bonds before a project has been finalized in order to maximize the arbitrage on the construction fund. IRS regulations require that some monies be drawn from the construction fund within six months of the bond issue for "public-purpose" projects.



In contrast to the construction fund, which will be totally expended in the first few years of a bond program, the debt service reserve fund must be in place for the life of the bond issue to provide additional security to the bondholders. This fund is usually invested in longer-term government securities, which tend to bear a higher interest rate. Because the debt service reserve fund is outstanding for the life of the bond issue, the investment earnings on it are used to reduce the annual debt service payments. This reduction can be passed through in the form of lower annual rental payments.

The chart on the following page models arbitrage on a debt service reserve fund over the past five years. The Bond Buyer Revenue Index proxies for the interest rate on the bonds, and the five-year Treasury-note yield is the assumed investment rate on the debt service reserve fund. A variable rate issue could substantially increase this spread between the interest rates on the bonds and the invested funds.

Such arbitrage earnings may not be available after this year if the Reagan Administration's tax proposals are enacted into law. The material in the Appendix on the proposals affecting municipal bonds should be examined in this regard. Issuers may want to accelerate the financing of any projects that it can which would be harmed by such a provision and thus preserve the benefits of arbitrage profits this year.

8. What services are provided by a senior managing investment banker?

The key to a successful marketing program is the effective coordination of the successive stages of the financing from the earliest phases of planning through the management of the syndicate which markets the bonds. The following list of services has been compiled to show what Shearson Lehman typically provides in its role as senior managing investment banker for its lease purchase issuers and how these services relate to each other. Despite the sequential appearance of the list, the tasks will invariably overlap as a result of the need to accommodate the varying time schedules of the parties to the financing. The extent of the services we provide is limited only by the needs of the financing.

Services performed during the development of the program:

- Work with the issuer to develop a master facilities plan which is consistent with the issuer's anticipated needs;
- Assist the issuer in evaluating its plan for the projects by facilitating communications with Shearson Lehman clients and consultants who have dealt with similar projects;
- Assist the issuer in the analysis of financing alternatives through the use of cash flow projections based on various interest rate scenarios and other assumptions regarding size, timing and reinvestment of funds for the program;
- Review documentation regarding the issuer's outstanding and existing programs to prepare legal and quantitative analyses to assess the merits of various financing scenarios and the refunding of any previous debt; and
- Assist the issuer in establishing its role as the lessor for the proposed lease purchase financings.

Services performed during the development of the financing plan:

- Establish a list of duties of all parties in each financing with a projected schedule of events and dates leading up to the issuance of the securities;
- Provide the issuer with recommendations regarding the timing, pricing and sizing of the issue in view of prevailing market conditions;
- Develop and recommend specific elements of the structure of the financing, including bond amortization schedules, redemption prices, reserve and contingency funds, covenants and additional provisions as necessary;
- Review financing options with issuer staff based on defined objectives and constraints. Select most appropriate overall financing structure;

- In conjunction with issuer staff, select Trustee; and

- Negotiate with commercial banks to obtain services such as Issuing and Paying Agent and liquidity or credit support as appropriate.

Services performed during the preparation of legal documents:

- Work with the issuer's administrative staff, Counsel, Bond Counsel, Auditors and other advisors in the preparation of all legal instruments, resolutions and other documents required for the completion of each financing;

- Prepare preliminary and final Official Statements describing each financing and incorporating financial data, feasibility studies, descriptions of lending institutions, and legal opinions as required; and

- Coordinate the printing and distribution of the preliminary and final Official Statements, as required for each bond issue, to prospective underwriters and institutional investors.

Services performed during the stage of market development:

- Submit the bond issues to the appropriate rating agencies and work actively in the interest of the issuer to obtain the best possible credit rating;

- Work with Bond Counsel and other advisors and counsel to the issuer on arrangements for the sale of the debt;

- Monitor the condition of the bond market to detect changes which could influence the timing of the sales; and

- Arrange informational meetings at appropriate locations to provide marketing support for the bonds among institutional and retail investors.

Services performed while the bonds are being marketed:

- Continuously monitor market climate to determine the best marketing strategy for the securities and the most advantageous timing for placing them into the market;

- Determine the preliminary pricing of the securities by reviewing the current secondary market yields of bonds which are similar in rating, security, geographic location of issuer, type and other key factors; and

- Commence selling activity and adjust pricing as necessary while maintaining close communication between the issuer and the underwriter to prevent the bonds from becoming unattractive to either the issuer or the investor.

Services performed after the bond sale:

- Prepare a debt service payment schedule as appropriate;

- Prepare a schedule of recommended investment securities for the investment of funds required by the bond indenture and assist with the placement of such funds;
- Serve as Remarketing Agent for the bonds if variable rate securities are used;
- Act as underwriter for bonds if and when a decision is made to convert any variable rate securities to a fixed rate;
- Provide secondary market support for future trading of the securities;
- Continue to advise the issuer's staff of changes which may affect future capital formation and provide consultation and advice as requested, and
- Remain available to assist the issuer with any issues which affect the existing indebtedness or remaining debt capacity.

9. How quickly can the issuer issue bonds and what is the procedure?

A typical lease purchase transaction generally takes 60 to 90 days to complete once operating and administrative decisions have been made and the plans for the new facilities have been finalized. In addition, the rating agencies and bond insurers will need to be educated not only about the specific features of the initial bond issue, but also about the issuer's credit, its structure and the authorizing legislation. The timetable below shows the schedule of activities necessary to complete the financing on a tight time schedule once all relevant facilities-related and administrative decisions have been made.

Activity	Timing
Distribute time schedule and outline of process	Week One
Mail bank solicitation letters, if necessary (Including draft of bank agreements to be used)	Week One
Distribute first draft of: Authorization Resolution Bond Purchase Agreement Issuing and Paying Agent Agreement Trust Indenture Bank Agreement Lease Agreement	Week Two
Selection of Bank Trustee, Issuing and Paying Agent	Week Three
Receive comments on first draft of documents	Week Three
Distribute revised drafts of documents and first draft of Official Statement or Offering Memorandum	Week Four
Submit preliminary documents to the rating agencies	Week Four
Comments on revised drafts	Week Five
Meet with ratings agencies	Week Six
Distribute final drafts of documents and submit package to rating agencies	Week Six
Receive final approval by issuer	Week Six
Receive ratings	Week Seven
Document closing Pricing of Issue Sale of Bonds	Week Eight
Pre-closing Closing	Week Eleven

The following shows how the proceeds of the bond issue are used:

The underwriter takes his fee in the form of a discount -- he buys the bonds at an amount less than the par amount of the bonds. The discount is usually quoted as a percentage of par, e.g. 2.5% or as a dollar price per bond, e.g. $25 (per $1,000 bond).

The monies remaining after the underwriter takes his fee are the proceeds which are generally given to a trustee bank to hold and invest on behalf of the issuer. As specified in the trust indenture, the proceeds are deposited into various funds.

Construction Fund

The construction fund is invested in short-term securities which are scheduled to mature when the construction funds are needed. Both the interest income on this fund and the original fund balance are used to make construction expenditures.

Debt Service Reserve Fund

Most project financings require a reserve fund to provide security to the bondholders in the event that projected revenues are not available to make a debt service payment. In a leasing transaction, the reserve fund provides security against the risk of non-appropriation. The reserve fund is generally equal to the maximum annual debt service payment, although it can be as large as 15% of the bond issue size.

The debt service reserve fund is generally invested by the trustee bank for the life of the bond issue, and the earnings derived from it can be used to reduce debt service payments, and ultimately lease rental payments.

Capitalized Interest Fund

Most project financings do not generate any revenues until construction of the project is complete. In a leasing transaction, often times the lessee is prohibited from making lease payments until the facility is ready for occupancy. In either case, no funds are available to pay interest or principal on the bonds during the construction period. Principal payments can be delayed, but interest payments must be made. Therefore, it is necessary to issue additional bonds, the proceeds of which will make interest payments to the bondholders during the construction period. This fund can also be invested until the monies are needed.

Costs of Issuance Fund

Most often an issuer would like to finance the costs associated with the bond issue along with the project. Thus, additional bonds must be issued to pay costs of issuance, which include bond counsel fees and other expenses.

IMPACT OF TAX REFORM PROPOSAL ON

GENERAL OBLIGATION AND TRADITIONAL REVENUE BONDS

1. "Qualified governmental units" may issue tax-exempt bonds. This is intended to continue existing law. Thus States, political subdivisions and their constituted authorities under existing law are qualified governmental units under the bill. Also possessions of the United States and the District of Columbia.

2. Bill distinguishes between bonds for "essential governmental functions", which are not subject to volume restriction, the alternative minimum tax on individuals and corporations, and many other restrictions, and "non-essential function bonds", which are. The distinction actually is not on the basis of the function financed, but on the involvement of non-governmental persons in the use of proceeds of the bonds. The test: bonds are "non-essential function bonds" if (a) lesser of 10 percent or $10 million of proceeds is used in a trade or business of a person or persons other than a qualified governmental unit or (b) lesser of 5 percent or $5 million of bond proceeds is loaned to such a person or persons.

   A. Use in a trade or business is derived from the trade or business test for industrial development bonds under present law. Security interest test is dropped. Trade or business requirement is in effect dropped: any activity by any entity other than a natural person is a trade or business. Uses by two or more persons are aggregated. Use means use on a basis other than use by general public. Examples discussed in Committee Report, pp. 522-25.

   B. Loans to non-governmental persons is concept derived from consumer loan bonds provision of existing law. Includes substantive loans, despite form (may be finance lease or installment sale) and "deemed" loans: e.g., Committee Report excludes tax-assessment bonds.

3. Non-essential function bonds may nonetheless be tax-exempt as "exempt-facility bonds", "qualified veterans' mortgage bonds", "qualified mortgage bonds", "small-issue bonds", "section 501(c) (3) organization bonds", "qualified student loan bonds" or "qualified redevelopment bonds". "Exempt-facility bonds" may be used to finance airports, docks and wharves, mass commuting facilities, water facilities, solid waste disposal facilities, and qualified multi-family residential rental projects. All must meet public use test. All but multi-family residential rental projects and sewage and solid waste disposal facilities must be governmentally owned under federal income tax concepts (no waiver of tax benefits permitted). "Bad money" rule eliminated: "net proceeds" must go to exempt facility.

   "Functionally related and subordinate property" concept eliminated. Except for airports (excluding cargo storage facilities) and docks and wharves (excluding immediate storage facilities), exempt-facility bonds are subject to the volume cap.

4. "Non-governmental portion" of essential function bonds is also subject to the volume cap to the extent that it exceeds $1 million dollars in any issue. This means a trade or business use by or a loan to a non-governmental person of more than $1 million can render taxable an essential function bond issue.

5. Existing "general" arbitrage restrictions, tightened by the bill, apply to essential function bonds. Minor portion rule eliminated. "Acquired obligations" expanded to include any investment other than bonds exempt under section 103 or real or tangible personal property: e.g., deferred payment (annuity) contract. Rev. Ruls. 80-91, 80-92 codified re "reasonable expectations". Election to forego temporary period eliminated. Temporary periods restricted: Proceeds to be used for acquisition have 30 days. Proceeds to be used for construction have until earliest of (1) 90-percent completion date, (2) date when amount equal to amount of bonds has been spent on the property, and (3) three years after earlier of issuance of bonds or commencement of construction. State of Washington v. Commissioner reversed, so that issuance expenses will not be taken into account in determining yield on bonds.

6. "Additional" (IDB) arbitrage restrictions extended to all bonds (including essential function bonds).

   A. Rebate rules. Essentially, all arbitrage (including temporary period and reserve fund arbitrage) from investment of "gross proceeds" broadly defined), plus all investment income on such arbitrage, must be computed at least annually and at least 90 percent of the "rebate amount" must be paid to the Treasury at least every five years. Thirty days after maturity of last obligation of the issue, 100 percent of cumulative rebate amount must be paid. Exceptions: (1) If gross proceeds are expended within 6 months; (2) Bona fide debt service fund income of less than $100,000 per bond year, subject to election by issuer. Special rules for mortgage subsidy bonds.

   B. Investments in higher-yielding non-purpose investments restricted to 150 percent of bond debt service for the year. Does not apply to temporary period investments.

7. Only essential function bonds may be advance refunded. Unless refunded bonds are retired within 30 days of issuance, refunding bonds are advance refunding bonds.

   For advance refunding purposes, essential function bonds includes bonds issued before effective date of the bill which were not, when issued, IDBs, qualified mortgage bonds, qualified veterans' mortgage bonds, student loan bonds, private loan bonds, bonds to benefit section 501(c)(3) organizations, or comparable non-Code bonds. Advance refundings for essential function bonds are restricted as follows: (1) Original issue may be advance refunded only two times; (2) Unless present value of interest saving exceeds costs of issuance, aggregate amount of refunding bonds may not exceed 250 percent of amount of refunded (i.e., original) bonds; (3) Refunded bonds must be redeemed at earliest date at par or premium of 3 percent or less; (4) Any temporary period for refunding bond proceeds expires 30 days after issuance, and for refunded bonds, upon issuance of refunding bonds; and (5) To extent that non-governmental use of refunded bonds exceeds $1 million, refunding bonds are subject to volume cap.

8. Current refundings are governed by transition rules. With designated exceptions, set forth below, the new rules do not apply to current refundings of "qualified obligations", which means any obligation (other than a refunding obligation) issued before January 1, 1985 if the interest thereon is exempt under section 103 but would be taxable if the obligation were issued after December 31, 1985. The new rules that do apply to such a refunding are:

   A. Unified State volume cap. But see section 145(k) re refundings outside of cap.

   B. Public approval requirement.

   C. Arbitrage.

   D. Early issuance.

   E. Advance refunding.

9. Early issuance rule applies to all bonds, including essential function bonds. Bonds become taxable unless 5 percent of proceeds are spent within 30 days of issuance and all proceeds (other than reasonably required reserve or replacement fund) are spent within 3 years of issuance. IRS ruling can extend these periods.

10. Information reporting requirement is extended to all tax-exempt bonds, including essential function bonds. Secretary can vary information required from that on present forms for IDBs, qualified mortgage bonds, qualified veterans' mortgage bonds and bonds for section 501(c) (3) organizations.

CORRECTIONAL FACILITIES AND PUBLIC BUILDING LEASE FINANCE

Recent Case Studies

Shearson Lehman Brothers truly is a leader and innovator in the lease financing of correctional facilities and other public buildings. Within the Infrastructure Department, two bankers devote nearly 100% of their time to working with state and local governments to find innovative solutions to financing the construction and renovation of prisons, jails and other public buildings.

These two specialists, John W. Gillespie, Jr. and Valerie K. Spitler, are currently assisting the National Institute of Justice with a study of alternative methods of financing correctional facilities. In November and December of 1985 alone Shearson Lehman managed over one-quarter billion dollars in major lease purchase transactions for new state prison facilities in California, Louisiana and Rhode Island. Previously, Mr. Gillespie led the Firm's efforts in structuring the first variable rate, lease purchase certificate of participation transaction for a correctional facility. Miss Spitler and Mr. Gillespie co-structured a transaction for the Commonwealth of Kentucky which utilized not only lease purchase pooled jail financing but also a dedicated revenue stream. This bond issue will finance the construction and renovation of 23 county jails in Kentucky. Last fall Miss Spitler and Mr. Gillespie and other members of the Infrastructure Group successfully completed a $13.5 million private placement financing for the renovation of a school building in Baltimore. The certificates were placed with two institutional investors and all documentation was completed within two weeks. These and other recent transactions are summarized below.

Louisiana Prisons: $155.8 Million Lease Revenue Bonds

Shearson Lehman Brothers served as co-senior managing underwriter for $155,775,000 in lease purchase correctional facilities bonds for the State of Louisiana in December 1985. The bonds were issued through the Louisiana Correctional Facilities Corporation, a new entity created by the legislature in 1985, and will be used to construct three new state prisons and plan two additional facilities. The 20 year bonds carry a multi-mode, variable rate which can be set at a fixed rate at any time selected by the state. Because of threatened restrictions included in the federal tax reform act with an effective date of January 1, 1986, the bonds were sold within six weeks of the underwriter's selection. The state is estimated to save over $15 million in interest costs over the life of the bonds as a result of the variable rate structure and the issuance before year-end.

Rhode Island Prison: $30 Million Lease Purchase Bonds

In November 1985 the State of Rhode Island issued a $71,670,000 lease purchase bond issue, $30 million of which is to construct and equip a new medium security adult correctional facility in the city of Cranston, Rhode Island. A public ballot issue to allow issuance of a general obligation bond for the prison had previously failed. Shearson Lehman Brothers bankers worked with the State Department of Correction and Department of Administration staff for over 10 months on various analyses of the most practical and economical means of financing the facility. Following Shearson Lehman's recommendation, the state issued the bonds through the Rhode Island Public Buildings Authority. Initially, the bonds were going to be issued with a variable rate of interest. However, as result of the improvements in the long term, fixed rate markets during late October and early November, the State and its investment bankers decided to lock in an attractive fixed rate. Shearson Lehman co-managed this financing which was issued on a accelerated schedule to avoid restrictions included in the federal tax reform proposal.

California Prison: $104.4 Million Lease Purchase

The State of California issued $104,400,000 in lease purchase revenue bonds in December 1985 to finance two 500 bed maximum security facilities at the Southern Maximum Security Complex in Tehachapi, California. The project is part of California's $1.4 billion prison construction program and the first to use the lease purchase financing technique authorized by the legislature in its 1984 session. Shearson Lehman Brothers public finance bankers had worked with the California Department of Correction throughout 1984 while they studied financing alternatives and guided the authorizing bill through the State Legislature. Shearson Lehman Corrections Finance Specialist John Gillespie testified on behalf of the legislation and provided assistance in structuring the resulting transaction. The 15-year bonds, for which Shearson Lehman served as co-managing underwriter, were issued through the State Public Works Board and achieved a fixed interest rate of 8.45% in the longest maturity. The State plans to issue at least an additional $195 million in lease purchase bonds already authorized for the prison construction program and may seek legislation for additional lease purchase bonds.

Kentucky Jails: $32.3 Million Revenue Bonds

Shearson Lehman Brothers is proud of the pioneering work it did to structure a unique transaction for the Kentucky Local Correctional Facilities Construction Authority. The Authority was established to aid Kentucky counties with the funding of the construction or renovation of their local jails. At the same time the Authority was established, court costs were raised by $5 (and, by the time of the bond issue, by a total of $10); the earmarked funds are to be used by the Authority. This revenue source, as well as lease payments by some of the counties which needed to borrow from the Authority their share of the capital cost of their facilities, was pledged to paying principal and interest on the bonds.

The bonds were 30-year, fixed rate obligations, rated Aaa/AAA because they were insured by a major bond insurer. The bond insurer required the projected revenue stream to cover debt service on the bonds 1.3 times. Shearson Lehman Brothers structured a "super sinker" term bond which the Authority could redeem early with the revenues remaining after debt service had been paid. Early retirement of this bond will enable the Authority to issue traditional bonds sooner. Shearson Lehman Brothers' exceptional marketing capabilities to both institutional and retail obtained a very favorable interest rate on the "super sinker" for the Authority.

Trustees of the Loan and Guarantee Program: $26 Million Certificates of Participation

Shearson Lehman Brothers recently senior-managed a $26 million certificate of participation lease purchase transaction to finance the Rivoli Office Building Project in Baltimore. The City wished to complete the transaction by the end of 1985 to insure obtaining unrestricted yields on construction and reserve fund investments. The issue was the first lease purchase transaction involving the simultaneous defeasance of outstanding conditional purchase agreements for the property on which the new facility will be located. The issue was insured by FGIC and issued as fixed rate COP's in late December 1985.

The list beginning on the next page provides a selective sampling of Shearson Lehman Brothers' experience with lease purchase appropriation financings which are similar to that to be issued by the Texas Department of Correction.

MEMORANDUM

03/03/1986

TO: Rep. John Sund

FROM: J. Hartle, AA JH

RE: Today's Loans Committee Meeting

CSHB 579(Loans):
- Adds, per the Administration request (Gregg Baker, DCED), Timber processors and harvestors to the exemption from the Alaskan-only provision in CFAB statutes.

- Adds timber harvestors and processors to the findings.

- Removes the constitutionally doubtful language on Alaska hire in the original bill; replaces it with language from SB 410 by Zharoff.

JH rec: Pass it out to Resources (chaired by the sponsor...).

CSHB 519 (Loans):
- Adds amendments by the Administration (Revenue and Law) drafted in response to Loans Committee concerns

- Adds language stating that all lease-purchases must be approved by law.

-See handout by Revenue explaining changes and copy of amendment incorporated into bill.

JH rec: Hand out copies and briefing materials from the Administration, plan to pass out of Committee tomorrow.

CSHB 477(Loans)

- Adopts language from Senate Rescources CS for SB 338.

- Changes "Susitna project" to "Railbelt energy development"

JH rec: Hearings and amend HB 501 to create "Railbelt Energy Development Fund" in the General Fund, amend HB 477 to appropriate it to this new fund.

James
3/3/86

Original sponsor: Rules/governor

IN THE HOUSE BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

CS FOR HOUSE BILL NO. 519 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public finance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40.040 is amended to read:

Sec. 14.40.040. GENERAL POWERS OF THE UNIVERSITY. There is created and established a corporation to be called the University of Alaska. It may in that name

(1) sue and be sued;

(2) receive and hold real and personal property;

(3) contract and be contracted with;

(4) adopt, use and alter a corporate seal;

(5) borrow money, issue debt, or enter into long-term obligations for the purchase of facilities, goods, or services, which obligations secure, in whole or in part, debt issued by another party, as approved by the state bond committee under AS 37.15.770;

(6) do and have done all matters necessary for the purpose of any function set out [FORTH] in this chapter.

* Sec. 2. AS 14.40 is amended by adding a new section to read:

Sec. 14.40.255. LEASE-FINANCING. The Board of Regents may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the board intends to enter into an agreement under this subsection, the board shall provide notice to the

legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The board may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 3. AS 18.55.100(a)(15) is amended to read:

(15) acting as the Alaska State Building Authority arrange or contract for the financing or [, DESIGN, CONSTRUCTION AND] acquisition of public buildings designed by, constructed by, or whose acquisition has been approved by the Department of Transportation and Public Facilities for lease to the state in accordance with AS 18.55.010 - 18.55.290 and AS 37.15.770.

* Sec. 4. AS 18.55.140 is amended to read:

Sec. 18.55.140. ISSUANCE OF BONDS, NOTES, AND REFUNDING BONDS. The authority may issue bonds and notes from time to time in its discretion for any of its corporate purposes and may issue refunding bonds for the purpose of paying or retiring bonds previously issued by it. The authority may not issue bonds for public buildings until the state bond committee has approved the proposal for the issuance of debt under AS 37.15.770. Refinance? Add and by Law?

* Sec. 5. AS 18.55.140 is amended by adding a new subsection to read:

(b) Bonds issued by the authority for public buildings must be issued in the name of the Alaska State Building Authority and are subject to AS 18.55.010 - 18.55.290.

* Sec. 6. AS 18.55.288 is amended by adding a new paragraph to read:

(4) "bond" means any bond, note, interim certificate, debenture, or other obligation issued by the authority or the authority acting as the Alaska State Building Authority under AS 18.55.010 - 18.55.290;

* Sec. 7. AS 22.05.025 is amended by adding a new subsection to read:

(c) The supreme court may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the supreme court intends to enter into an agreement under this subsection, the supreme court shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The supreme court may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 8. AS 24.23 is amended by adding new sections to read:

ARTICLE 2. LEASE AGREEMENTS.

Sec. 24.23.100. LEASE OF SPACE. The Legislative Affairs Agency may lease necessary office space, and contract for the lease of space, for the use of the Alaska legislature and its employees.

Sec. 24.23.110. The Legislative Affairs Agency may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the agency intends to enter into an agreement under

this subsection, the agency shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The agency may not enter into an agreement under this section unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 9. AS 37.05.280 is amended to read:

Sec. 37.05.280. LEASES. The department shall lease necessary space, and contract for the lease of space, for the use of the state or an agency of the state, wherever it is necessary and feasible, subject to compliance with the requirements of AS 37.05.220 - 37.05.280. A [NO] lease or contract for a lease may not provide for a period of occupancy greater than 40 years. An agency of the state requiring office, warehouse, or other space shall lease the space through the department. [NO CONTRACT OR LEASE EXECUTED AFTER JANUARY 1, 1966, WHICH PROVIDES FOR A PAYMENT OR PAYMENTS BY THE STATE IN EXCESS OF $12,000 ANNUALLY IS VALID UNLESS THE USE OF THE SPACE TO BE PROVIDED FOR BY SUCH CONTRACT OR LEASE HAS BEEN EXPRESSLY APPROVED BY THE LEGISLATURE BY CONCURRENT RESOLUTION.]

* Sec. 10. AS 37.05 is amended by adding a new section to read:

Sec. 37.05.285. LEASE FINANCING. The department may enter into lease-financing agreements only with the Alaska State Housing Authority acting as the Alaska State Building Authority. A lease-financing agreement must provide that lease payments are subject to annual appropriation. If the department intends to enter into an agreement

under this subsection, the department shall provide notice to the legislature and to the state bond committee. The notice must include the anticipated annual lease payment, the anticipated principal amount of the debt to be issued by the Alaska State Housing Authority acting as the Alaska State Building Authority, and the anticipated total construction or acquisition cost of the project. The department may not enter into an agreement under this subsection unless the public building to be provided has been approved by law. An appropriation for the project does not constitute approval by law for purposes of this section.

* Sec. 11. AS 37.15.040 is amended to read:

Sec. 37.15.040. SALE OF BONDS. Before selling an issue or series of bonds, the state bond committee shall give notice inviting sealed bids in the [SUCH] manner [AS] it may prescribe. If satisfactory bids are received, the bonds offered for sale shall be awarded to the highest responsible bidder or bidders. If the state bond committee determines that the bids received are not satisfactory as to price or responsibility of the bidders, it may reject all bids received.

* Sec. 12. AS 37.15.110 is amended to read:

Sec. 37.15.110. CREATION AND MEMBERSHIP OF STATE BOND COMMITTEE. There is created within the Department of Revenue a committee known as the "state bond committee," the members of which are the commissioner of commerce and economic development, the commissioner of administration, and the commissioner of revenue. If a member of the committee is absent or otherwise unable to act, the member's designee [IN THE DEPARTMENT] shall act as a member of the committee in the member's place.

* Sec. 13. AS 37.15.130 is amended to read:

Sec. 37.15.130. OFFICERS, RECORDS AND PROCEEDINGS. The commissioner of commerce and economic development is the chairman of the state bond committee and the commissioner of revenue is the secretary. A majority of the members of the committee constitute a quorum. The committee shall keep a full, complete, and permanent record of its proceedings. All records and correspondence of the committee shall be kept in the office of the commissioner of revenue. For the purpose of this chapter and AS 44.62.310, public notice of 24 hours or more is adequate notice of a meeting of the committee at which the issuance of bonds is authorized.

* Sec. 14. AS 37.15.140 is amended to read:

Sec. 37.15.140. DUTIES OF STATE BOND COMMITTEE. The state bond committee shall adopt the resolution and prepare the documents necessary for the issuance, sale, and delivery of state general obligation bonds.

* Sec. 15. AS 37.15.140 is amended by adding new subsections to read:

(b) The state bond committee shall prepare an annual report to be submitted to the governor and legislature before March 31 of each year. The report must show

(1) all outstanding debt of debt-issuing entities of the state;

(2) the anticipated effect on the finances and credit of the state, including the effect on long-term debt capacity and creditworthiness, resulting from that debt;

(3) which long-term debt is state supported and which is supported only by revenue attributable to the project being financed by the debt;

(4) all long-term capital lease obligations of the state;

(5) the volume of short-term debt issued and retired during

the year by debt-issuing entities of the state;

(6) specific identification of each issue for which the state has pledged some form of indirect support for the debt, including any moral obligation of the state to support the debt;

(7) future bonding and debt capacity implications of legislation enacted in the previous legislative session; and

(8) the recommended debt issuance capacity of the state for the next two years following the year of the report.

(c) The state bond committee may develop written policies concerning debt of the state.

* Sec. 16. AS 37.15.150 is amended to read:

Sec. 37.15.150. STAFF AND [COMMITTEE MAY EMPLOY] SPECIAL SERVICES. The state bond committee may appoint an executive director who may, with approval of the committee, select and employ additional staff as necessary. Employees of the committee are in the partially exempt service under AS 39.25.120. If the [STATE BOND] committee considers it necessary and advisable, it may procure architectural or engineering, fiscal agent or municipal investment, legal, and other expert or specialized services at reasonable and customary fees to assist it in accomplishing the most advantageous sale of the bonds. The fees may be paid from the proceeds of the sale or advanced from the contingency fund in the Office [OFFICE] of the Governor [GOVERNOR] or otherwise.

* Sec. 17. AS 37.15.450(a) is amended to read:

(a) The bonds shall be sold in the manner, price or prices, [SUCH] amounts or series, and at the [SUCH] time or times [AS] determined by the committee at either public or private sale. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS IN SUCH MANNER AS IT MAY PRESCRIBE. IF SATISFACTORY BIDS

ARE RECEIVED, THE BONDS OFFERED FOR SALE SHALL BE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT THE BIDS RECEIVED ARE NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDERS, IT MAY REJECT ALL BIDS RECEIVED.] The bonds, or each series of them, shall be sold at such a price so that the effective interest rate over the life of the bonds does not exceed 11 percent per year or that rate of interest which is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest shall be payable annually or semiannually.

* Sec. 18. AS 37.15.460 is amended to read:

Sec. 37.15.460. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.450].

* Sec. 19. AS 37.15.650(a) is amended to read:

(a) The toll facilities bonds are sold in the <u>manner, price or prices,</u> amounts or series<u>,</u> and at the time as determined by the committee<u>, at either public or private sale</u>. [BEFORE SELLING A SERIES OF BONDS, THE COMMITTEE SHALL GIVE NOTICE INVITING SEALED BIDS. IF SATISFACTORY BIDS ARE RECEIVED, THE BONDS OFFERED FOR SALE ARE AWARDED TO THE HIGHEST RESPONSIBLE BIDDER. IF THE COMMITTEE DETERMINES THAT A

BID RECEIVED IS NOT SATISFACTORY AS TO PRICE OR RESPONSIBILITY OF THE BIDDER, THE COMMITTEE MAY REJECT THE BID RECEIVED.] Bonds, or a series of bonds, may not be sold if the effective interest rate over the life of the bonds exceeds 11 percent per year or that rate of interest that is 125 percent of the rate of the Bond Buyer Index of 20 Municipal Bond Average Yields for the week previous to the date of sale of the bonds, whichever is higher. Interest is payable annually or semiannually.

* Sec. 20. AS 37.15.660 is amended to read:

Sec. 37.15.660. BOND RESOLUTION. The committee is authorized and directed to adopt the bond resolution and prepare all other documents and proceedings necessary for the issuance, sale, and delivery of the bonds or any part or series of them. The bond resolution shall fix the principal amount, denomination, date, maturities, place or places of payment, rights of redemption, if any, terms, form, conditions, and covenants of the bonds or each series of them. The committee shall also determine and provide for the date and manner of sale of the bonds, and shall provide <u>where a</u> [WHETHER THE] notice of sale<u>, if any,</u> is to be published [ELSEWHERE IN ADDITION TO THE PUBLICATION REQUIRED BY AS 37.15.650].

* Sec. 21. AS 37.15 is amended by <u>adding new sections to read:</u>

ARTICLE 5. STATE-SUPPORTED DEBT.

Sec. 37.15.770. STATE AGENCY DEBT. (a) The state bond committee shall review proposals for the issuance of debt by or on behalf of

(1) the Alaska State Housing Authority acting as the Alaska State Building Authority for the purpose of providing public buildings; and

(2) the University of Alaska.

(b) The committee may review the general programs and financing

plans of the agency that proposes to issue the debt as well as the specific aspects of the proposed debt issue, including

(1) amounts;

(2) times;

(3) maturities;

(4) debt structure and security features;

(5) credit enhancements;

(6) use of proceeds;

(7) official documents;

(8) planned rating agency presentations; and

(9) selection, retention, or compensation of financial advisors, bond counsel, trustees, underwriters, and other professionals.

(c) The state bond committee shall consider approval of the amount and time of sale of the debt. The committee shall approve the issuance of the debt if, in its judgment, issuance of the debt is in the best interests of the state. The committee may limit approval of the issuance of debt upon compliance with terms established by the committee.

(d) At the time of sale of the debt, the state bond committee shall review the bids or pricing of the debt, including discounts, underwriting spreads, and interest rates. If the committee determines that the bids or prices are not satisfactory or that the bidders are not responsible, the agency may not sell the debt.

Sec. 37.15.790. MUNICIPAL SCHOOL DEBT. If, at any time, the state bond committee, in its judgment, determines that the amount or retirement of debt issued by municipalities and subject to reimbursement by the state under AS 14.11.100 is not in the best interest of the state, the committee may

(1) establish an amount or amounts, for any or all years before the maturity of all of that municipal debt, that may not be exceeded by the Department of Education in approving requests under AS 14.11.103; or

(2) establish, under AS 14.11.100(j)(3), a term required for the maturities of municipal debt authorized by local voters after March 31, 1986.

* Sec. 22. AS 39.25.120(c) is amended by adding a new paragraph to read:

(19) employees of the state bond committee.

* Sec. 23. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Renumber remaining bill sections accordingly.

NOTE H--LONG-TERM DEBT--Continued

Revenue Bonds--Continued:

The Water Utility issues of 1967 and 1968 require that water rates be maintained at a level which will produce revenue equal to at least 1.25 times the average amount annually required for debt service after payment of current expenses of such system.

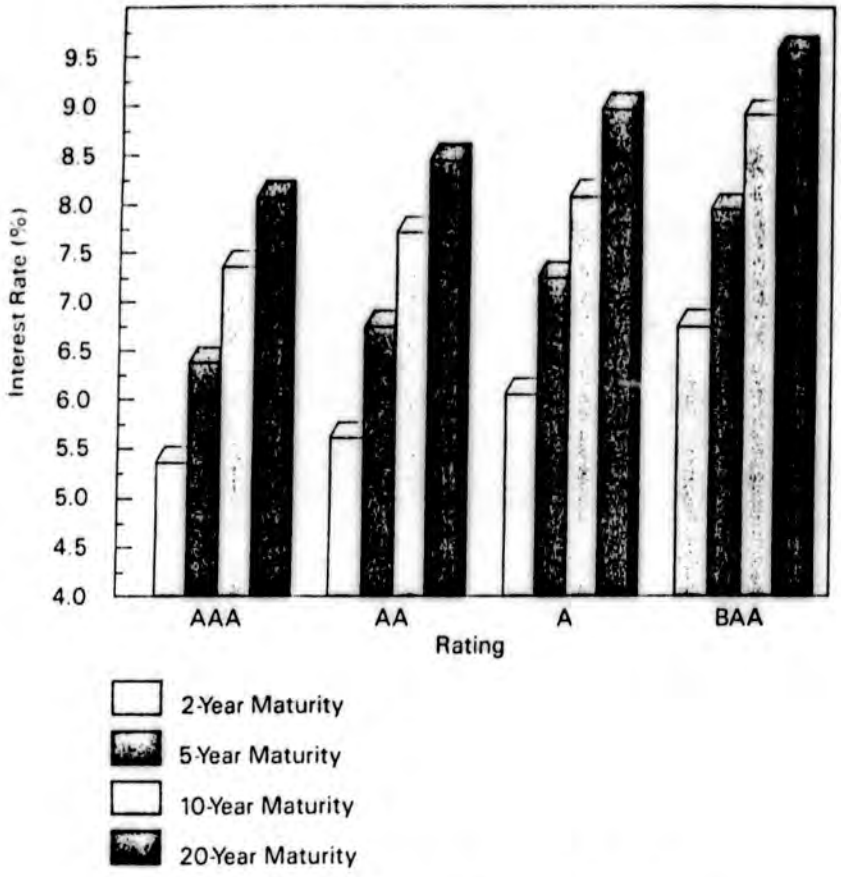
Revenue requirements of '967 and 1968 Water Utility issues are computed as follows:

	1985	1984
Net earnings (loss)	$(28,818)	$ 37,595
Less operating transfers from other funds		(57,323)
Add back:		
Depreciation	58,245	35,349
Interest on bonded debt	12,555	13,161
AVAILABLE FOR DEBT SERVICE	41,982	28,782
Requirement	29,193	29,193
EXCESS OF REVENUE OVER (UNDER) REQUIREMENT	$ 12,789	$ (411)

Debt Service Requirements: The annual debt service requirements of the general obligation bonds outstanding at June 30, 1985 are as follows:

Fiscal Year	Principal	Interest	Total Requirements
June 30, 1986	$ 220,000	$ 991,716	$ 1,211,716
1987	240,000	968,377	1,208,377
1988	265,000	943,091	1,208,091
1989	285,000	915,617	1,200,617
1990	305,000	886,046	1,191,046
1991 - 1995	2,005,000	3,930,747	5,935,747
1996 - 2000	2,955,000	2,797,430	5,752,430
2001 - 2005	3,715,000	1,133,975	4,848,975
2006 - 2010	130,000	91,250	221,250
2011 - 2015	165,000	55,500	220,500
2016 - 2020	120,000	12,000	132,000
	$10,405,000	$12,725,749	$23,130,749

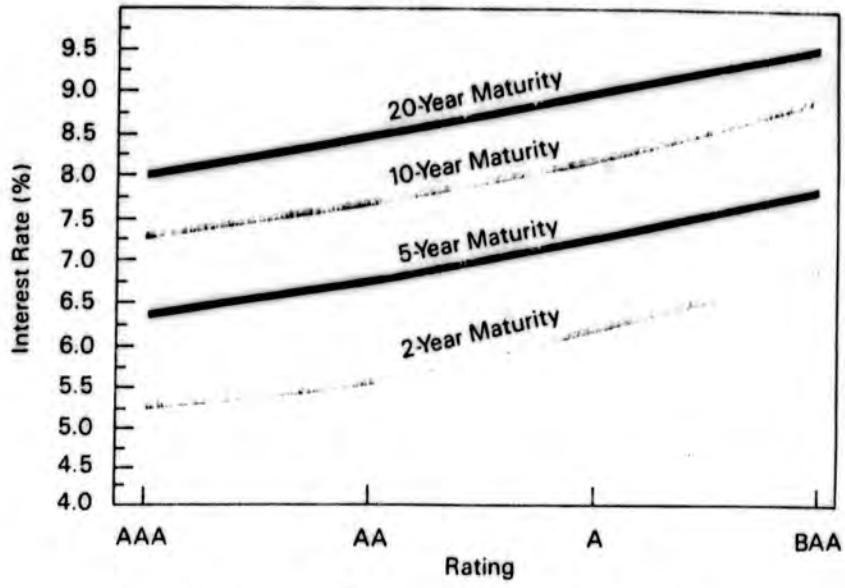
The Rating Agencies: The Importance of Economic Development to a Rating



DANIEL HEIMOWITZ
Associate Director—Municipal Ratings
Moody's Investors Service

Moderator: **ALBERT F. HAIBACK**
Managing Officer
Infrastructure Finance Group
Kidder, Peabody & Co., Inc.

ALBERT F. HAIBACK:



"The Importance of Economic Development to a Rating" is a subject of critical importance to practically every prospective issuer of bonds. This is because the rating that is assigned to a bond issue significantly affects both the eligibility of the bonds for purchase by certain investors, particularly institutional investors, and the interest rates and net interest costs which the bonds will derive at sale.

Case Study: The Town of Brookhaven, New York

I would like to discuss two case studies which I believe demonstrate how important the economic base of a state or town is to ratings and bond sale results. The first case study involves the town of Brookhaven, New York. As Financial Advisor to the town, Kidder, Peabody had a primary objective of aggressively seeking a AAA credit enhancement vehicle to support the town's bond issue. This was necessary because the community's bonds had recently been downgraded, and its credit was very complex.

By way of background, 28 percent of the town's total tax revenues were derived from the Long Island Lighting Company. Given this percentage, town officials were seriously concerned that the difficulties being experienced by the Lilco Shoreham Nuclear Plant, as well

as Lilco's refusal to pay its taxes, would reflect adversely on the town's credit. This would jeopardize the town's ability to successfully refinance $16 million in notes that were coming due within 60 days. The town also wished to increase its bond issue by approximately $20 million to undertake other capital improvements.

The legitimacy of the town officials' concerns was confirmed when Moody's downgraded the town of Brookhaven from an A rating to a Baa rating. At this point, Kidder, Peabody was retained as Financial Advisor to guide the town through its financing difficulties. After extensive quantitative study, Kidder, Peabody provided the town with the following findings:

1) the town's financial condition was quite favorable;

2) the town's economy was stable and experiencing growth, and there were substantial areas still available for development;

3) the town had a balanced budget, had experienced no revenue shortfalls, and had never defaulted on any debt;

4) unemployment was relatively low;

5) the median family income was relatively high;

6) the town's debt ratios, both on a per capita basis and as a percentage of property value, were well below the national median for municipalities of similar population size. Even when the resident share of county, school district, and special district taxes and debt were included, the overall debt ratios were close to the national median.

Kidder, Peabody's legal studies, done in cooperation with bond counsel, focused on another problem. Lilco had just previously announced that it would not pay the town $52 million in 1984 property taxes levied against the Shoreham plant. Based upon the legal study, we determined that under the legally-imposed mechanism for distributing tax revenues under the County Tax Act, the receiver of taxes was required to distribute tax revenues on a priority basis—first to the town, then to school districts, then to special taxing districts, and any balance remaining would be distributed to the county. Since the county's share of the town's tax revenues was less than the $52 million levied against the Shoreham plant, the town would receive its full tax revenues, and the county would incur a shortfall. We also determined that even if the Shoreham plant were abandoned, property

taxes for the average Brookhaven resident would rise only approximately eight percent. Based upon the average assessed value, this would translate into an annual property tax increase of only $170. Thus, by analytically demonstrating that the town's economic base could withstand the most adverse impact—the abandonment of the Shoreham plant—and that its other financial conditions were sound, we were able to secure bond insurance from AMBAC. This enabled us to gain a AAA bond rating despite the recent rating downgrade. As a result, the town received a very attractive interest cost for its bonds.

Case Study: The State of New Hampshire

The second case study involves the State of New Hampshire, which selected Kidder, Peabody as senior manager of a $52 million general obligation bond issue. In the case of New Hampshire, the objective was to pursue vigorously a rating upgrade on the state's outstanding and future debt.

By way of background, the state had received two downgrades from Moody's within an 18-month period, bringing its rating from AAA to A1. At that point, it had one of the lowest ratings of any state in the country. In 1983, the state chose Kidder, Peabody to assist it in promoting its strong credit features to rating agencies, underwriters, and prospective investors. In this way, it hoped to realize a successful negotiated sale of its $52 million in G.O. bonds.

To begin with, Kidder, Peabody's Municipal Research and Public Finance Departments, along with representatives of the state and the state's Financial Advisor, prepared a comprehensive study of the state's economy and finances. The results of the study indicated that New Hampshire's economic outlook was bright. Its economic growth was expected to exceed regional and national growth in terms of population, employment, personal income, and manufacturing income, and the gross state product and unemployment rates indicated a firm base for economic growth and state revenue growth. Manufacturing was New Hampshire's primary economic activity, especially durable goods. Many new electronic firms had moved into the state because of its favorable business climate. In 1982, the state's business climate was ranked number 5 nationally and number 1 in the

Northeast by *Inc.* magazine. One reason for this high ranking was that New Hampshire has no personal income tax and no general sales tax. Another key factor, which was sponsored and aggressively pursued by the Governor, was the implementation of strict controls over state revenues and expenditures.

Although the State of New Hampshire did not receive an improved rating from Moody's for the 1983 issue, it did achieve a AA- rating from Standard and Poor's. Through wide distribution of the study's favorable economic and financial findings, the state was able to obtain a highly successful sales result with lower rates than were achieved from comparably rated bonds sold on a competitive basis during that same time period. In addition, this work set the stage for future rating upgrades. We pursued this with the state and its Financial Advisor during 1984, in anticipation of a bond issue during 1985. By aggressively pursuing improved economic and financial results, the state has achieved the following:

1) an anticipated $45 million surplus in 1985;
2) an economic performance by the state that has surpassed that of the New England region and the U.S. in recent years;
3) an unemployment rate that was the lowest in the nation in 1983 and 1984;
4) a continuation of the state's low tax environment;
5) the demonstrated success of the Governor's fiscal management plan, which has resulted in reduced state spending, a cap on the number of state employees, and a return to on-line budgeting.

In January, 1985, New Hampshire general obligation bonds were upgraded by Moody's and Standard and Poor's to a AA rating. Kidder, Peabody was appointed again as senior manager for the state and successfully marketed a $54 million general obligation bond issue.

DANIEL HEIMOWITZ:

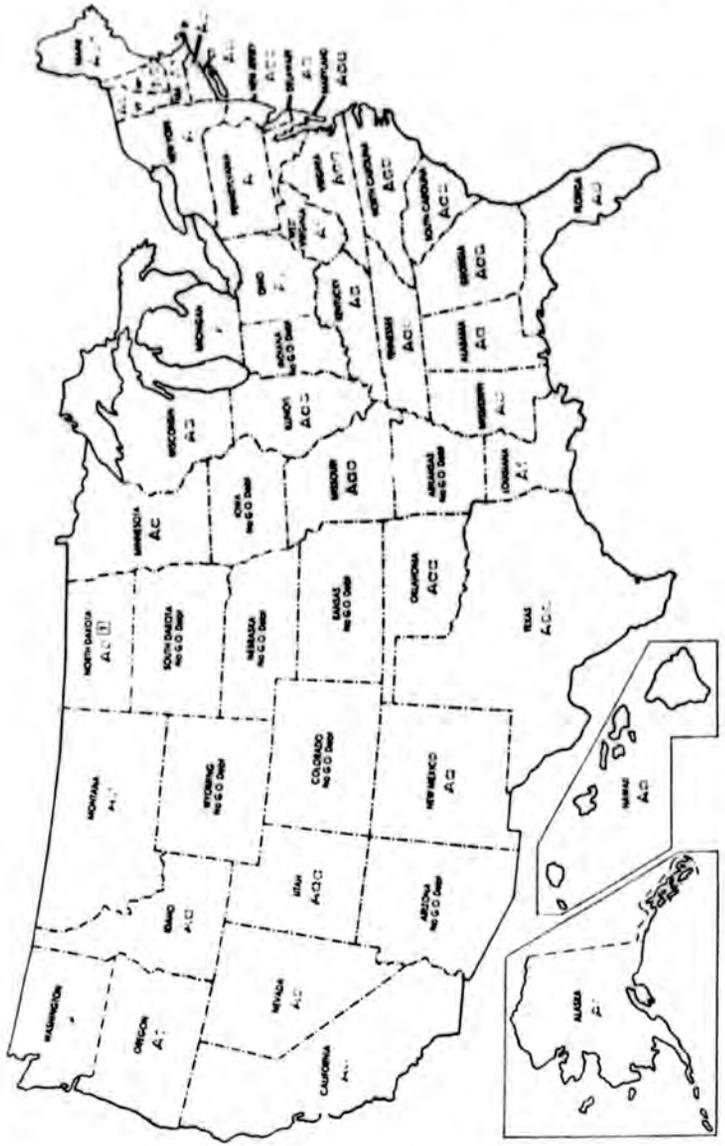
Key Trends that Have Affected the Rating Agencies' Analysis of Municipal Credit

To a great extent, credit quality evaluations are based on trends of long-term performance. There are eight distinct themes that have

guided the way that Moody's has looked at credits. These themes have expanded one upon the other, and their succession represents a growing sophistication among analysts, municipal issuers, and investors.

1) The Default by New York City

The overriding factor leading to the expansion of the municipal analytical function on Wall Street and to the expansion of Moody's own Municipal Department was the default by New York City. That default, followed on a somewhat less grand scale by Cleveland three years later, led to a startling realization that municipal credit is not bottomless and that real municipal risk does in fact exist. Until this time, defaults had been virtually unheard of in the post-Depression period. As a result of the New York experience, municipal bonds backed by the powers of taxation were no longer viewed as inherently gilt-edged.



2) The Migration to the Sun Belt

Following the default by New York City, analysts began a reexamination of credit, beginning with the major cities. This reexamination was undertaken within the context of a second theme as well—the shifting of population and economic activity away from the nation's older urban centers and toward the Sun Belt. These shifts left many communities with expanding budget commitments and dwindling resources. Even more burdensome was the fact that the local budgetary and tax policies that were adopted to compensate for this loss of activity were in fact accelerating the migration to the Sun Belt. The ratings of nine of the 13 largest Northeast and Midwest cities were downgraded by Moody's between 1975 and 1980, and by contrast the ratings of 11 of the 17 Southern, Western, and Southwestern cities were upgraded between 1970 and 1980.

3) New Burdens of Proof on Issuers

A third theme stemming from the examination of credit in the aftermath of the New York crisis was the requirement for more current financial information, for disclosure, and for more direct contacts among governments, analysts, and investors. Analysts and investors seeking to differentiate among credits and to avoid another

EXHIBIT 1-3
Moody's State General Obligation Bond Ratings

Source: Moody's Investors Service, June, 1985

New York placed the burden of proof on the communities that were issuing debt. Communities had to establish confidence that they were not in a declining position, and had to provide information on which rating analysts could rely. Renewed analytical focus on factors that had long been ignored, such as pension liabilities, substantially changed the scope of credit analysis.

4) The Shift to Revenue Bonding

The questioning of the unconditional strength of the general obligation bond led to a fourth dominant theme of credit analysis in the 1970s—the shift from the general obligation bond to the limited liability revenue bond. Between 1974 and 1984, the market reversed itself, shifting from one-third revenue bonds and two-thirds general obligation bonds to two-thirds revenue bonds and one-third G.O. bonding.

5) The Impact of Tax Revolts

One advantage of revenue bonding was that it enabled the issuer to ration more effectively the revenues derived from increasingly limited taxing powers. Tax revolts, highlighted by Proposition 13 in California and Proposition 2½ in Massachusetts, have played a dominant role in credit evaluation. There have been tax and expenditure limitations of various kinds on the ballot in more than 25 states, and in 15 of those states substantive measures have been approved. There were also numerous limitations, rollbacks, and defeated budgets in many localities throughout the country between 1978 and 1980. Whereas in the past we were most concerned about the issuer's economic capacity and ability to pay, suddenly we also had to focus on the issuer's political capacity to tax and the taxpayer's willingness to pay. These issues now shared an equal position in the rating analysis.

6) Double-Digit Inflation and the Recession

The next factors to influence credit ratings were double-digit inflation, stagflation, and the recession. Inflation drove up economically sensitive revenues, particularly sales tax revenues, but it also increased costs, including wages and the costs of certain social programs. High interest rates benefited those few communities with the

luxury of having cash balances to invest. Yet, for developing communities, the cost of borrowing needed funds was rising while the level of economic activity—particularly construction—was declining. Many Sun Belt communities unexpectedly experienced their first setbacks during this period. Many older communities, particularly those in the industrial Midwest, experienced permanent economic losses and in some cases became chronically depressed.

7) Innovative Financing Techniques

Rating downgrades in 1982, 1983, and 1984 outnumbered upgrades by more than 3-to-1. Faced with budget limitations and a high interest rate environment, borrowers increasingly have turned to innovative financing techniques in the last few years. The use of credit substitution, including bond insurance and letters of credit, and the development of instruments such as tax-exempt commercial paper and variable rate demand obligations are important elements of this trend. Generally, they promote better credit ratings by improving credit quality. For instance, long-term projects can be funded through short-term variable rate obligations which the market accepts as short-term credit and short-term risk. These vehicles enable an issuer to utilize its limited resources more effectively by obtaining the lowest possible interest rates in today's market.

8) Changes at the Federal Level

Recently, the dominant influence on the municipal finance industry has been the potential impact of federal budget cutbacks and tax reform proposals. Analysts are assuming that these proposals will eventually be passed in an amended form and that they will have a significant effect on municipal credit. The Treasury has pointed to the sound financial condition of state and local governments, particularly the large surpluses that many of them have accumulated, as sound justification to shift much of the burden of the federal budget deficit to the state and local levels. There are two components of the Administration's present tax reform plan that would have a significant effect on state and local governments: 1) the often repeated attempt, although this time possibly with more force and vigor, to eliminate the tax exemption for certain types of municipal bonds, and 2) an assault on the creditworthiness of state and municipal governments through the proposed elimination of the deductibility of state and local taxes. These two components must also be viewed in combination with direct cutbacks in the federal budget, including the proposed elimination of federal revenue sharing.

The Treasury's proposal to eliminate certain types of municipal bonds, namely industrial development revenue bonds and pollution control revenue bonds, would also eliminate certain types of revenue bonds issued for higher education, hospitals, airports, and housing. The Treasury claims these are "private purpose" bonds. Most of us in this room probably disagree.

There would be several immediate effects of these proposals, if implemented. The cost of borrowing by state and local government units would rise, and there would be enormous pressure placed on general obligation debt ceilings and on the revenues—namely property taxes—used to pay G.O. bonds. With fewer types of tax-exempt bonds at their disposal, issuers would have to compete more directly with the taxable market to attract investors. This would most definitely result in higher interest payments by municipalities. These higher rates could make many projects now financed by state and local governments economically unfeasible. Some of these projects could go by the boards entirely. This would mean a reduction in the scope of governmental services, as well as serious financial pressure either to raise current taxes to pay for these projects or to utilize G.O. bonding capacity further. This would place additional strain on both the interest rate paid and the debt ceiling. In any case, the restrictions on the types of debt considered to be tax-exempt are likely to have negative financial implications in at least the short run, and they may well lead to credit problems and rating downgradings in the long run.

The proposal to eliminate the deductibility of state and local taxes could have an even greater effect on state and local governments. This provision has the implication of penalizing those states with currently high tax burdens. Its adoption would most likely have serious consequences for the state and local credits that Moody's analyzes. At a time of increasing costs and decreasing assistance from the federal government, local governments would be penalized if they decided to make a greater local effort. This would directly lead to even higher tax burdens in many states that already have had high

taxes, and would seriously affect future economic growth and future funding of important social programs. Without sounding too pessimistic, I return to the earlier theme that taxpayers nationally have demonstrated their sensitivity to high taxes, and that we might expect the elimination of state and local tax deductibility to lead to future tax revolts.

Factors Examined by the Rating Agencies

Given the recent history of shifting economic fortunes and tax revolts, and given the scope of the Administration's tax reform proposals, it is important for communities to maintain their basic credit standings and to improve on these standings whenever possible. Strong underlying credit quality can support traditional infrastructure borrowing through general obligation bonding, and it enables the borrower to take advantage of new financing techniques. Strong credit quality allows government to leverage its resources as much as possible, and the stability that it provides can bring new economic growth to a community.

Management Record

To assess a community's basic credit position, Moody's first measures its ability to control and manage resources so that obligations are met in full and on time. Determining relative degrees of control is what the rating process is all about. The ideal level of control is that of a community with a prospering economy, unlimited power to raise funds, a great deal of discretion in determining service levels, and a proven track record of careful management which has enabled it to accumulate a surplus sufficient to deal with any unforeseen contingencies. Obviously, this is a difficult level to achieve. At the other end of the scale is the borrower whose finances are completely out of control and who lacks sufficient funds to meet an obligation that is due and payable immediately.

Economic Trends

Economic trends represent one of the most uncontrollable and unpredictable factors in our analysis. The recent recession has emphasized how little any individual community can do to buck the

EXHIBIT 1-4
General Obligation Bond Analysis

In general obligation bond analysis a great number of variables are present. Generally they may be classified under four headings: debt, finance, government, and economy.

Debt Analysis

1. Debt policy: the uses, purposes, and planning of debt issuance • the types of instruments used • debt limits.
2. Debt structure: adequacy of plans for debt retirement • the relation between rate of retirement and purpose of debt, resources of the community, existing and future debt needs.
3. Debt burden: gross and net debt related to resources and a comparison with other communities • overlapping debt and pyramiding.
4. Debt history and trend: the record as to defaults, refunding of maturing bonds and funding of operating deficits • rapidity of debt growth relative to purposes for which it has been incurred.
5. Prospective borrowing: authorized and unissued bonds • adequacy of capital programming • obsolescence or inadequacy of capital plant • existing debt structure.

Financial Analysis

6. The current account: the year-end relation of current liabilities to available cash • promptness of disposing of casual deficits • devices to keep deficits from accumulating • if accounting is revenue accrual, the adequacy of reserves for uncollectible accounts • the liquidity of current account cash and uncollected taxes should equal demand liabilities outstanding.
7. Revenue system: adequacy of property tax base • trend of assessed value, equalization ratio, levy, and collections • other components of revenue system—source, base, rates, yields • diversity, cyclical stability and adequacy of aid from other governments • limitations on revenue raising ability.
8. Expenditure analysis: vulnerability to mandated expenditures • relation of debt service to total expenditures.

EXHIBIT 1-4 *(continued)*

9. Budget analysis: adequacy of planning • appraisal of past performance on revenue and expenditure estimates • current trend of financial operations.
10. Financial administration: assessment practices • tax collection procedures • enforcement procedures • financial planning as evidenced by budgeting and reporting methods.
11. History of financial operations: long-term trend of revenues and expenditures • secular and cyclical patterns.

Governmental Analysis

12. Organization: diffusion of responsibility • degree of professionalism • sufficiency of powers to discharge functions.
13. Services: provision for essential services to perpetuate economic base.
14. Intergovernmental factors: the pyramid of governmental units, conflicts and duplications • cooperative efforts • other units which drain off resources or impede planning.
15. Administrative performance: conscientious administrators who promote confidence through standing and experience • availability of audits, budgets, annual reports, capital planning documents, land-use plans.

Economic Analysis

16. Identity and natural resources: geographic advantages • natural resources • size and land-use characteristics.
17. Population, wealth and labor factors: population characteristics • wealth level (family income and per capita full value) • housing characteristics • new construction values.
18. Economic structure and capital: types of employment, industry and occupations • major employers • relation to SMSA • evidence of industrial decline or demographic shifts • transportation and its relation to the economic structure.
19. Economic performance and prospects: the secular trend of the economy • the cyclical trend • seasonal and random variation.

Source: Moody's Investors Service

national economy. Recent economic volatility has taught us that even the most sophisticated econometric models are not very accurate in projecting the impact of a national economic depression on particular communities. Nevertheless, measures of relative economic control are very important to a rating analysis. In small communities especially, we examine the overall tax base, keeping an eye out for any overdependence on a single industry or the dominance of a single employer or taxpayer whose actions would have a major effect on the entire community. We also measure economic control in terms of how sensitive a community's financial condition is to the performance of its local economy. Sensitivity to the economy is often evidenced by declining sales tax revenues, greater property tax delinquency, and higher social costs, particularly those that rise in times of high unemployment.

Municipal Services and Revenue Potential

Once the analysts have looked at a community's economic base, they then determine what services the community should be expected to provide and what revenue-raising abilities they have to pay for those services. The growing complexity of municipal government requires analysts to take a number of factors into account. Among these are a municipality's organization and responsibilities, the degree of professionalism among its senior administrators, and the sufficiency of its power to perform necessary functions. Are powers vested in the chief executive or are they spread over many boards and different decision-making offices? What services does the government entity provide? Municipal governments vary widely across the United States. Even within states there is no uniform way of providing municipal services. At one extreme is New York City, which provides all of the services that are traditionally provided by a city, a county, and a school district, as well as additional services such as public transit, higher education, and the operation of 17 municipal hospitals. At the other extreme are municipalities in which even such basic services as police and fire protection are provided through separate service districts. Each of these districts has its own board and its own taxing powers, and there is little coordination among the districts. The tax burden and debt burden that arise are a conglomeration of those of the separate units, and there is little overall management.

In addition to understanding the scope of municipal services, it is important to understand the degree of flexibility that a community has in spending money on those services. Some proportion of expenditures is likely to be fixed, including debt service and other contracted obligations, such as employee pensions. Many communities are also affected by legally-mandated expenditure levels. The minimum length of a school year and the maximum ratio of students to teachers are two examples of mandates that can bind school districts to specific spending levels. Conversely, since communities also have programs that are desirable but not essential, it is important that they delineate in their budgets what items cannot be touched and what items are expendable if financial pressures come to bear.

An evaluation of revenue raising powers is also an essential element of our assessment of a community's financial control. Are there alternative ways of raising money locally, or are revenue options legally limited? Many governments do have broad powers to impose taxes and other fees, and this can provide a strong means of controlling their future financial condition.

Debt Control

Having examined a community's economic context, its administrative functions, and the powers it has, the analyst turns to actual municipal performance. Control of debt position is obviously a critical element in debt analysis. There are key indicators of debt performance that are commonly used. These include the relative level of indebtedness, which is the overall tax-supported debt relative to the value of the taxable base, and debt per capita, which is the amount of debt outstanding relative to the community's population. Moody's collects these indicators annually for the state and local governments that it rates. However, it does not rate a community simply by looking at debt burdens. Moody's also assesses the controllability of debt by measuring debt service as a percentage of the budget and the rate of debt retirement relative to tax base projections.

Short-term borrowing has been a major item in the market in recent years. These borrowings are generally for fixed maturities in anticipation of future receipts, and often they level out a problem in revenue flows. Typically, municipalities borrow for operating pur-

poses and in anticipation of taxes or other revenues or in anticipation of bond or grant proceeds. Moody's rates municipal notes through a separate rating system. The ratings are MIG 1, MIG 2, MIG 3, and MIG 4. Moody's also has a new system for variable rate demand obligations, with "V" placed in front of those ratings—VMIG 1, VMIG 2, VMIG 3, and so on.

In Moody's analysis of municipal notes, it reviews basic credit, paying particular attention to the timing of receipts and disbursements. This assures that the funds that are needed to pay short-term obligations will be available when they are needed. Questions of capital market access are asked to ensure that bond anticipation notes can be refinanced. The relative quality of short-term debt cannot readily be inferred from the long-term bond rating, and so Moody's urges investors and issuers to seek short-term credit ratings.

An overreliance on short-term debt can indicate reduced control of financial position. Most of the major problems that we have seen—New York City, Cleveland, the Chicago schools, and others—directly relate to an overreliance on short-term indebtedness. Future market acceptance of a debt issue is always associated with some vulnerability. Given possible shifts in the market as the result of tax law changes, analysts must look at least a bit skeptically on any pressing need to go to market 15 or 20 months from now. Our concern also extends to a heavy reliance on bond anticipation notes or the use of so-called blue maturities.

Through debt management and capital planning, a community can indicate to us exactly what its debt position is going to be. Another useful tool is the preparation of multi-year plans which outline project priorities, expected costs and benefits, and the probable means of financing. They have become a standard in the industry and are now expected of all sophisticated issuing communities.

Overall Financial Performance

Overall financial performance is the key to determining whether a government is operating on a sound basis. Using our assessment of a community's economic condition, its mandated spending levels, and its debt and other fixed costs, we can develop projections of future financial performance. Financial analysis for municipalities involves far more than a review of financial statements, however. Al-

though operation results and year-end positions are certainly important, they are not nearly as meaningful for a city or town as they are for a private corporation. Unlike corporations, municipalities are not profit-oriented. The key variable in determining actual financial condition is, of course, management. Budgetary planning and day-to-day spending controls are crucial ingredients. The actual level of financial resources is not nearly as important as the established trend of financial performance. Long-term financial trends demonstrate how administrators utilize their powers and adjust to changing conditions. The ability to consistently achieve budget targets, successfully implement cost control programs, increase productivity, and enhance revenues is what we look for in assessing a community's control over its financial operations. Large financial surpluses are not terribly impressive if they result from the community's inability to get planned new programs underway. Conversely, a planned drawdown of a surplus might not be viewed as a negative. In fact, sometimes building up too much of a surplus can be a negative factor. This was the case in California prior to Proposition 13, when the state's surplus fueled people's claims that the government was taxing its residents too heavily.

The goal of our financial analysis is to determine whether annually recurring resources are in fact available to meet ongoing spending requirements. Our analysts often find that under conditions of rising costs, high interest rates, and limited revenue-raising capabilities, projections of large deficits in the future are inevitable. In situations such as these, analysts gauge a community's alternative strategies and shortfall contingency plans. In this way, they can determine a community's commitment to maintaining fiscal integrity.

In this process, the adequate flow of information is vital. Financial statements should be understandable, and information should be presented on a timely basis. As an issuer, the point at which you can make the greatest impact on the entire rating process is in the provision of information, especially economic information. We use information from the U.S. Census Bureau and other federal and state sources, and we read newspapers, but we look to local officials to give us a flavor of what is happening in their community. For instance, we want to know about current downtown development and what is happening to major employers in your area.

Direct Contact with the Issuer

Our analytical process always includes direct contact with the issuer, often through meetings in our offices in New York. The contacts frequently occur prior to a debt offering, but we urge people to contact us regularly, as new information becomes available. The heated process of a bond offering is often not the best time to try to seek an upgrading. It is better to see us well in advance of a sale and discuss your plans and position at that time. We review our ratings regularly, not just at the time of the sale, and we issue revisions whenever it is appropriate.

Following the gathering of information, an analyst will speak with the issuer, obtain information from a number of other sources, and prepare a credit write-up. That credit write-up is reviewed by a senior analyst who is the supervising analyst for that particular area of the country. Together, the analyst and the senior analyst make a rating recommendation. The analysis and the rating recommendation are presented to a rating committee comprised of senior members of our department. We discuss, at times at great length and very heatedly, the pros and cons of a particular credit, and ultimately we come to a rating decision. New ratings are then communicated to the issuer. If the issuer has difficulty with the decision, we explain how we arrived at it. If the issuer feels it is unjust, particularly if the issuer feels that all of the facts did not come to light during the course of the analysis, we welcome additional information and a rehearing is possible. The day after the rating is released, our analysis and the rating are published in a municipal credit report which is issued to our subscribers. Among our subscribers are institutional investors, including major commercial and investment banks throughout the country.

In summary, in terms of economic development financing, we must be mindful of the context of budget cutbacks, tax reform, the past recession, and the like. We cannot overemphasize in our discussions with issuers the importance of maintaining a sound credit position now and in the future.

HOUSE FINANCE SUBCOMMITTEE ON
ADMINISTRATION, REVENUE
AND THE GOVERNOR'S OFFICE

To: Rep. John Sund
Chair, House Special Committee on State Loans
From: Rep. Rick Uehling
Subject: " HB 553, An Act making special appropriations to the Department of Community and Regional Affairs for senior citizen housing development grants; and for low cost and low income housing development; and providing for an effective date. "
Date: April 9, 1986

I have asked staff to prepare the following background and information regarding HB 553.

HB553 as written, appropriates $21,963,000 to the Department of Community and Regional Affairs for the development of senior housing projects throughout the State and $3,000,000 for the development of low cost and low income housing.

In developing the list of projects to be included in the legislation for Senior Housing, all projects for which applications were received by CR&A were included. The intent was to try to show that there was a need for Senior Housing throughout the State and not just in Anchorage.

In developing the amount for Low Income and Low cost Housing the amount of $3,000,000 was simply chosen. This program has never received a great deal of funding since its inception and is out of money.

It is obvious under the current revenue situation the outlook for funding of these two programs at the level proposed in the legislation is not probable. There are two ways that the Loans committee could attempt to reduce the amount of the appropriation.

First, with regard to Senior Housing, the committee could chose which projects to fund and include them in the bill or second, the Loans committee could take a dollar amount and appropriate it, letting the Department of Community and Regional Affairs decide who should receive funding. There is a draft committee substitute which takes the second approach. In the draft committee substitute, $7,000,000 is the amount appropriated to the Department for Senior Housing and 1,500,000 is the amount appropriated for Low income, Low cost Housing. The Department has a grant review committee which reviews the grant applications and awards the grants. The department is familar with the applicants and would be in the best situation to decide who should recieve funding. This would be the preferable approach.

1526 K STREET • ANCHORAGE, ALASKA 99501 • (907) 274-4256
P.O. BOX V • JUNEAU, ALASKA 99811 • (907) 465-4821

Sec. 44.47.610. Declaration of purpose. There exists in the state a serious shortage of decent, safe and sanitary residential housing available at low or moderate prices or rentals to persons 60 years of age or older. There also exists in the state organizations whose purposes are to provide the kinds of housing needed to alleviate this shortage. Development work to provide such housing involves substantial expense that is often beyond the resources of the organizations. (§ 51 ch 113 SLA 1982)

Sec. 44.47.620. Senior citizens housing development. (a) There is created in the department a senior citizens housing development fund. Subject to direct appropriation or through proceeds of a bond issue the department shall make grants to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501(c)(3) and (4) (Internal Revenue Code of 1954) for the purpose of developing senior citizen housing. A grant from the proceeds of a bond issue may be made only to municipalities.

(b) Application for a grant under (a) of this section shall be in the form prescribed by the department. The application shall demonstrate the need for senior citizen housing in the area to be served, the feasibility of the proposed project, and an adequate management plan that shall demonstrate the ability of the eligible recipient to sustain the proposed project.

(c) All projects under this section shall be in accordance with facility procurement policies developed under AS 35.10.160 — 35.10.200 and are public facilities under those sections.

(d) The department shall adopt regulations to carry out the purposes of this section. The provisions of the Administrative Procedure Act (AS 44.62) apply to regulations adopted under this section.

(e) In this section "senior citizen housing" means a specific work or improvement undertaken primarily to provide dwelling accommodations for persons 60 years of age or older, including but not limited to conventional housing, housing for the frail elderly, group homes, congregate housing, and other housing that meets special needs of the elderly; senior citizen housing includes the acquisition, construction, or rehabilitation of land, buildings, improvements, and other nonhousing facilities that are incidental or appurtenant to the housing. (§ 51 ch 113 SLA 1982)

Article 11. Low Cost and Low Income Multiple Family Housing Development Fund.

Section

630. Declaration of purpose
635. Low cost and low income multiple family housing development

Sec. 44.47.630. Declaration of purpose. There exists in the state a serious shortage of low cost multiple family residential rental housing, and owner-occupied housing, in the case of property acquired or to be acquired by the Municipality of Anchorage that was formerly the site of the S&S Apartments. There also exist in the state organizations whose purpose is to provide the housing needed to alleviate this shortage. Development work to provide this housing involves substantial expense that is often beyond the resources of the organizations. (§ 21 ch 102 SLA 1983; am § 8 ch 128 SLA 1984)

Effect of amendments. — The 1984 amendment substituted "rental housing, and owner-occupied housing, in the case of property acquired or to be acquired by the Municipality of Anchorage that was formerly the site of the S&S Apartments" for "housing available at low rentals" in the first sentence and "exist" for "exists" and "purpose is" for "purposes are" in the second sentence.

Sec. 44.47.635. Low cost and low income multiple family housing development. (a) There is created in the department a low cost and low income multiple family housing development fund. Subject to appropriation the department shall make grants to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501(c)(3) and (4) (Internal Revenue Code of 1954) for the purpose of developing low cost, low income multiple family housing.

(b) Application for a grant under (a) of this section shall be in the form prescribed by the department. The application shall demonstrate the need for low cost, low income multiple family housing in the area to be served, the feasibility of the proposed project, and an adequate management plan that shall demonstrate the ability of the eligible recipient to sustain the proposed project.

(c) All projects under this section shall be in accordance with facility procurement policies developed under AS 35.10.160 — 35.10.200 and are public facilities under those sections.

(d) The department shall adopt regulations to carry out the purposes of this section. The provisions of the Administrative Procedure Act (AS 44.62) apply to regulations adopted under this section.

(e) In this section "low cost and low income multiple family housing" means a specific work or improvement undertaken primarily to provide multiple family dwelling accommodations for low income persons. Low cost and low income multiple family housing includes the acquisition, construction, or rehabilitation of land, buildings, improvements, and other nonhousing facilities that are incidental or appurtenant to the housing. The Honorable Rick Uehling
Alaska State House
of Representatives
P.O. Box V
Juneau, AK 99811

Dear Representative Uehling:

Following a request from David Cobb of your staff, we are sending you the status of the Senior Citizen Housing Development Program and the State Assisted Rental Housing Program.

Senior Citizen Housing Development

FY 82, 83, 84 and 85

Total Appropriated	$44,000,000
Total Committed	43,803,651
Total Disbursed	29,202,757
Remaining balance to be paid	14,600,894
Held for Contingency	196,349
Total pending applications	$21,662,345

State Assisted Rental Housing Program

FY 84 and 85

Total Appropriated	8,580,000
Total Committed	8,580,000
Total Disbursed	7,415,000
Remaining balance to be paid	1,165,000
Available to Commit	-0-

We have attached a summary of the committed agencies for both programs and applicant request for Senior Citizen funding. Additionally, our Housing office telecommunicated the applicant request to you on January 30.

As you know, there was no funding appropriated for either of these programs in FY 86, and there is no funding in the budget for these two programs for FY 87.

21-P1LH

I hope this information will assist you at this time, but should you have any questions or desire additional information, please contact Clark Boston of the Housing Assistance Division.

Thank you.

Sincerely,

Emil Notti
Commissioner

Enclosure

POSITION PAPER

RE: House Bill 553

SPONSOR: Representatives Uehling, Goll and Boucher

Program Effects of the Bill:

HB-553 is an appropriations bill that provides funds for projects for which the Housing Assistance Division is responsible. The itemized projects are those which have planning completed but have not had construction funds awarded by the Division. This has been due to lack of appropriation for this purpose.

Comments:

This bill would cover all the pending project applications, however, all of the specified projects have not been approved as viable and necessary. Normally a development grant is awarded following a rigorous review by a selection committee. The committee makes recommendations based on 1) a demonstration of need for senior citizen housing in a community 2) a determination of the feasibility of any proposed project and 3) the establishment of a plan which shows the ability of the grant recipient to manage and sustain the project from construction or renovation through operation.

If this bill were to pass, all the listed projects would then become directly funded by a legislative appropriation and the Division would automatically fund these projects whether or not they met the above criteria.

If all the above projects were funded, they would eventually provide 241 units of Senior Citizen housing.

It would be preferred that funding be appropriated on the basis that funds be allocated only for projects that prove to be feasible following a review. The Department would prefer that normal safeguards be mandatory through the use of established guidelines.

ALASKA CHAPTER

NATIONAL ASSOCIATION OF SOCIAL WORKERS

March 11, 1986

Representative John Sund, Chair
House Special Committee on Loans
Pouch V
Juneau, Alaska 99811

MAR 14 1986

Dear Representative Sund,

The Alaska Chapter, National Association of Social Workers is writing to advise you of the strong support of our members for the provisions of Section 2 of HB553. The three million dollars proposed for appropriation to the low-income multiple family housing development fund would provide for badly needed low-income housing units in Alaska.

Since 1983, when AS44.47.635 was enacted, social workers around the State have endorsed the Program because our members must daily confront people's desperate needs for affordable housing. We are acutely aware of the housing shortages for people with moderate and low incomes.

As of February 28, 1986, the Alaska State Housing Authority office reported a waiting list of four-hundred ninety-seven families for the available low-income units which ASHA manages in Anchorage alone!! The need for additional affordable housing is obvious.

As oil revenues decline, the Legislature must prioritize spending for the State. Decent housing for all Alaskans should, we believe, be considered as one of the "basics" and identified as a priority for funding. We urge your support for the low-income, multiple family housing development fund appropriation contained in HB553.

Sincerely,

Cecilia Kleinkauf

Regarding House Bill No. 553

Please give your full support to Bill #553. There is a great need for Senior housing in Palmer.

Many Seniors live in up stair apartments. It gets more & more difficult for them to climb stairs.

Single Seniors find it very difficult to maintain a yard and would feel more secure in a housing project.

Sincerely

Mary & George McClure

Regarding House Bill No. 553

Dear Legislator

Iam concerned that 553 might be Cut. In Palmer we started on houses two or three years ago but could not get the Real estate until last fall. The survey at that time was a need for about thirty but it is now about Fourty.

Thank You

Floyd Davis
211 ANNA st.
Palmer.

P.S.
I would not qualify.

ALASKA HOUSING FINANCE CORPORATION

Veterans Mortgage Program

Information as of December 31, 1985

	Veterans Bonds Authorized	Issued	Balance Remaining
1982	$400.0 million	$400.0 million	
1983	$500.0 million	$405.0 million	$ 95.0 million
1984	$700.0 million	$452.5 million	$247.5 million

Loans Made:

FY 83	2,484	$ 54,376,200
FY 84	4,016	467,310,100
FY 85	2,507	289,507,600
FY 86	840	101,838,150
	9,847	$913,032,050

FY 86 through December 31, 1985

Total AHFC Loans	2,718	100%
AHFC Loans to Qualified Veterans	840	31%

Summary of Projected Veterans Mortgage Bond Issues

Calendar Year	Total Bond Issuance	1984 Authorization	1986 Authorization
1986	$302.5	$247.5	$ 55.0
1987	302.5		302.5
1988	242.5		242.5
	$847.5	$247.5	$600.0

Eligibility under the Veterans Mortgage Program is restricted by Federal requirements to those veterans who entered the service prior to January 1, 1977 and who have not been out of the service for more than 30 years.

In addition to the requirement for State authorization, Veterans Mortgage Bonds are subject to a Federally imposed calendar year cap of $302.5 million.

The tax proposal recently passed by the House and currently under review by the Senate places the Veterans Mortgage Bonds under a State ceiling of $200 million. The new ceiling would apply to Industrial Development Bonds, Qualified Mortgage (First Time Homebuyer) Bonds, Multifamily Housing Bonds, Qualified Non-Profit Agency Bonds, and Veterans Mortgage Bonds. Thus, housing bonds, including those for veterans, would be required to compete for their share of the $200 million State cap.

The uncertainties associated with the recent tax bill currently preclude the issuance of Veterans Mortgage Bonds.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 14, 1986

The Honorable Ted Stevens
United States Senate
522 Hart Building
Washington, DC 20510

Dear Senator Stevens:

The U.S. House of Representatives recently approved H.R. 3838, the Tax Reform Act of 1985, which has been sent to the U.S. Senate for consideration. The purpose of this letter is to inform you of how the provisions on tax-exempt bonding would affect the state of Alaska and to request your continued assistance to preserve the benefits of tax-exempt bond financing as an essential component of capital financing in Alaska.

Presently, the state has a federal bond ceiling of $702.5 million for three types of tax exempt bonds: industrial development bonds ($200 million), qualified mortgage bonds ($200 million), and veterans mortgage bonds ($302.5 million), plus an unlimited volume for other major types, such as multifamily housing bonds and qualified nonprofit agency bonds (e.g., hospitals). Under the House tax bill, the volume limit for all of these purposes (and certain others) would be $200 million. This is a decrease of over 70 percent. No other state is so severely impacted.

Without belaboring the point, it is clear that the House tax bill unfairly impacts Alaska in the tax-exempt bond provisions. However, we also realize that in the current fiscal environment, some sacrifices must be made, and our requests for assistance are made in that light.

With respect to the volume cap, we have two recommendations. First, we recommend that efforts be made to remove veterans mortgage bonds from the cap. This change would affect five states and a relatively small amount of bonds, as is shown on the attachment. While bond issues may primarily be a tax matter for the federal government, we believe that on a state-by-state basis this is a programmatic issue concerning men and women who have served their nation well. We have already received an indication that the other four affected states are willing to assist in a coordinated effort to remove veterans mortgage bonds from the volume cap. Please let us know if we can assist your office in this effort.

Second, we request your assistance in getting the volume floor for states with small populations raised from $200 million to $300 million. This change would affect 17 states and amounts to a total possible increase of about $1.5 billion in bonds. We believe this change would go a long way in minimizing the negative impacts of this tax bill on low-population states. Please note that even with such a modification, a low-population state would have a reduction in its maximum tax-exempt bond ceiling of over 25 percent.

We also ask your help in obtaining a transitional exemption from the bill for the Alaska Industrial Development Authority (AIDA) Red Dog project. AIDA applied last summer for a ruling from the Internal Revenue Service on the project and expects to receive shortly a favorable ruling treating the port portion of the project as qualifying for tax-exempt financing under existing law. The bill would not change the basic rule that ports of this type qualify for tax-exempt financing. The bill does, however, narrow the actual elements of the port that qualify. We would like to be able to carry out this financing under the law as now in effect and as dealt with in the ruling. A draft of language that would grant the exemption is attached for your consideration.

Finally, there is the matter of "sunset" provisions. In this case, the tax bill has one very positive provision in that it eliminates the December 31, 1986, sunset on "small issue" industrial development bonds. This specific provision is particularly helpful to Alaska, and we strongly urge you to see that it is retained. The other sunset date is for qualified mortgage bonds which are now due to sunset on December 31, 1987. This date is not changed by the tax bill. If total bond issuance is going to be as restricted as the tax bill mandates, then at least extension or elimination of this sunset should be granted to provide some relief.

If you would like any additional information, such as the number of homes financed, new investments generated, and so forth, please contact us. Thank you again for your past assistance and future efforts.

Sincerely,

Bill Sheffield
Governor

State/Federal Relations

PROPOSED TRANSITIONAL EXEMPTION FROM H.R. 3838

The amendments made by section 701 shall not apply to obligations substantially all of the proceeds of which are to be used to provide financing for a dock and directly related storage facilities which are part of a transportation project to which a State legislature appropriated, effective July 1, 1985, (1) $12,000,000 in money or marketable securities and (2) notes (or other evidence of debt) representing prior loans from the State or its instrumentalities to persons or business in the State with an aggregate unpaid principal balance in excess of $130,000,000. The aggregate face amount of obligations (exclusive of refunding obligations) to which this paragraph applies shall not exceed $175,00,000.

HB 533

BILL SHEFFIELD
GOVERNOR

1/31

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

1/30/86

The Honorable Ben Grussendorf
Speaker of the House
Alaska State Legislature
P.O. Box V
Juneau, AK 99811

Dear Representative Grussendorf:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that would place before the voters a bond proposition for the sale of up to $600,000,000 in state-guaranteed veterans' mortgage bonds. Federal law allows the sale of tax-exempt state-guaranteed mortgage revenue bonds for the purchase of residential mortgages made to qualified veterans. The use of tax-exempt bonds enables the Alaska Housing Finance Corporation to purchase qualified veterans' mortgages at a substantial savings to the state.

Similar bond propositions were presented to the voters in 1982, 1983, and 1984, and on each occasion the propositions were approved by substantial margins.

I recommend your prompt consideration and approval of this bill.

Sincerely,

Bill Sheffield
Governor

The attached bond proposition authorized the issuance of $600 million state-guaranteed revenue bonds by AHFC to purchase resdidential loans made to veterans. This proposition will enable the continuation of the Corporation's Veterans Mortgage Program implemented in 1983. A total of $1,257,000,000 State Guaranteed Veterans bonds have been issued by AHFC through calendar year 1985. The guarantee by the state of Alaska permitted by the favorable passage of bond proposition is necessary under federal law to sell the bonds in the tax-exempt market. Funding of the Veterans Mortgage Program in the tax-exempt market results in a reduction of the state subsidy related to the purchase of the veteran's mortgages by approximately 2/3rds.

It is assumed that the veteran's mortgage loans will be purchased by the Corporation irrespective of the receipt of the tax-exempt bond authorization. Accordingly, there is no fiscal impact on the operating budget.

CS FOR HOUSE BILL NO. 553 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making special appropriations to the Department of Community and Regional Affairs for senior citizen housing development grants and for low-cost and low-income housing development; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $7,000,000 is appropriated from the general fund to the senior citizens housing development fund in the Department of Community and Regional Affairs for the purpose of making grants under AS 44.47.620 for senior citizen housing development.

* Sec. 2. The sum of $1,500,000 is appropriated from the general fund to the low-cost and low-income multiple family housing development fund (AS 44.47.635) in the Department of Community and Regional Affairs for the purpose of developing low-cost, low-income multiple family housing.

* Sec. 3. The appropriations made by this Act are for capital projects and are subject to AS 37.25.020.

* Sec. 4. This Act takes effect July 1, 1986.

SECTIONAL ANALYSIS OF THE ALASKA STUDENT LOAN CORPORATION

*Section 1.

Sec. 14.42.100. ALASKA STUDENT LOAN CORPORATION. This paragraph creates the Alaska Student Loan Corporation. The corporation cannot be terminated while debt obligations are outstanding.

Sec. 14.42.110 PURPOSE OF CORPORATION. This paragraph establishes the purpose of the corporation to provide higher education opportunities for residents of Alaska.

Sec. 14.42.120. CORPORATION GOVERNING BODY. The Corporation shall be governed by an executive committee of five members made up from the thirteen members of the Alaska Commission on Postsecondary Education Board. The board members are made up of one member of the State Board of Education and four members are from the rest of the board excluding the two legislative members. Board members shall receive travel and per diem.

Sec. 14. 42.130. MEETING OF THE BOARD. A majority of the board constitutes a quorum for the organization. The board meetings may be conducted by electronic media. Any board meeting where bonds are authorized shall have a twenty-four hour notice.

Sec. 14.42.140. MINUTES OF MEETINGS. The board shall keep minutes of every meeting and shall send copies to the governor and legislative audit committee.

Sec. 14.42.150. ADMINISTRATION OF AFFAIRS. The board may pass by-laws and manage the affairs of the coporation and delegate supervision of the executive director.

Sec. 14.42.160. EXECUTIVE DIRECTOR. The coporation shall employ an executive director who is the executive director of the Commission on Postsecondary Education.

Sec. 14.42.170. EMPLOYMENT OF PERSONNEL. The executive director may hire employees in the exempt service. The board may appoint other officers and engage professionals.

Sec. 14.41.190. EXECUTIVE BUDGET ACT. The operating budget of the corporation is subject to the Executive Budget Act.

Sec. 14.41.200. EXECUTIVE POWERS. The coporation has the powers to sue and be sued, adopt an official seal, adopt bylaws, employ consultants, enter into contracts, receive and administer gifts or grants according to the terms and conditions of gift or grant, acquire an interest in real property, borrow money, pay finance charges and interest, invest money, collect from borrowers, gather information on loans, require an elegible institution to file

reports, service student loans, obtain information about students applying for loans, make or participate in making student loans, contract for purchase of student loans for sale, sell student loans, collect and pay reasonable fees as well as charges in connection with student loans, enter into agreements on student loans concerning federal student loans, enter into contracts with lenders about contracts on student loans, enter into contracts with institutions on student loans, administer federal money, consent to the modification of terms of the student loans, procure insurance against losses, provide advisory services to borrowers, do all acts necessary to carry out the powers implied in this chapter.

Sec. 14.42.210. STUDENT LOAN FUND. Creates a student loan fund inside the corporation to make student loans and secure bond issues the proceeds of which are used to make student loans.

Sec. 14.42.220. BONDS OF THE CORPORATION. The Corporation may borrow money and issue bonds secured by the income and receipts from student loans and other assets. The bonds are issued by resolutions. Each bond issue shall have a maturity of twenty years or less and be subject to the Uniform Commercial Code. The corporation cannot issue an amount of bonds more than $45 million a year. The corporation may enter into trust agreements to secure bond issues and create covenants as to investments, collections of loan payments, assignment of corporation interest, in terms and conditions under which additional bonds may be issued. The trustee shall be given the right to enforce these rights on behalf of the bond holders.

Sec. 14.42.240. CAPITAL RESERVE FUNDS AND CAPITAL RESERVE FUND REQUIREMENTS. This section creates the Capital Reserve Fund. These paragraphs create what is commonly know as the moral obligation of the State to repay these bonds.

Sec. 14.42.250. VALIDITY OF PLEDGE. Bonds issued under this chapter shall be valid and binding against all parties having claim of any kind from the corporation.

Sec. 14.42.260. NONLIABILITY OF BONDS. Members of the corporation are not subject to personal liability for issuance of the bonds. The bonds issued do not constitute liability for the State but are payable solely from the income and receipts of the corporation.

Sec. 14.42.270. PLEDGE OF STATE. The State pledges not to alter or limit the rights of bond holders interst when the bonds are outstanding.

Sec. 14.42.280. EXEMPTION FROM TAXATION. The real and personal property of the corporation are not subject to state or local tax.

Sec. 14.42.290. BONDS LEGAL INVESTMENTS FOR FIDUCIARIES. Bonds are legal investments for all fiduciaries and municipalities in the State.

Sec. 14.42.310. OPERATION OF CERTAIN STATUTES EXCEPTED. The corporation may not be considered or constitute a political subdivision for the purpose of lending it's credit. The corporation is not considered a municipal corporation under Title 29. The funds and real estate of the corporation are not considered property of the State.

Sec. 14.42.320. ANNUAL AUDIT. The coporation shall have an annual audit.

*Section 2.

Scholarship loans may not be made to students who attend an institution where the default rate on loans made to students to attend the institution exceeds the program default rate by more than 150%.

*Section 3.

This Act has an immediate effect date.

IN THE _____ BY_____

_____BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA
FOURTEENTH LEGISLATURE - SECOND SESSION
A BILL

For an Act entitled: "An Act relating to student loans; creating the Alaska Student Loan Corporation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.42 is amended by adding new sections to read:

ARTICLE 2. ALASKA STUDENT LOAN CORPORATION

Sec. 14.42.100. CREATION OF ALASKA STUDENT LOAN CORPORATION. There is created the Alaska Student Loan Corporation. The corporation is a public corporation and government instrumentality within the Department of Education but having a legal existence independent of and separate from the state. The corporation may not be terminated as long as it has bonds, notes or other obligations outstanding. Upon termination of the corporation, its rights and property pass to the state.

Sec. 14.42.110. PURPOSE OF CORPORATION. The purpose of the corporation is to improve higher educational opportunities of residents of Alaska in accordance with the provisions of this chapter.

Sec. 14.42.120. CORPORATION GOVERNING BODY. (a) The corporation shall be governed by a board of directors, selected by the governor, consisting of four individuals serving on the Commission of Postsecondary Education pursuant to AS 14.42.015(a)(1) - (2), (4)-(6) and (8), and one member appointed under AS 14.42.015(a)(3). Members of the board serve without compensation but are entitled to per diem and travel expenses as may be authorized by law for boards and commissions.

Sec. 14.42.130. MEETING OF THE BOARD. (a) The board shall elect a chairman from among the membership at its annual meeting each year. A majority of the members constitute a quorum for organizing the board, conducting its business and exercising the powers of the corporation. The board shall meet at the call of its chairman and at such other times as the board may determine in accordance with its regulations.

(b) The board may meet and transact business by electronic media if

(1) public notice of the time and locations where the meeting will be held by electronic media has been given in the same manner as if the meeting were held in a single location;

(2) participants and members of the public in attendance can hear and have the same right to participate in the meeting as if the meeting were conducted in person; and

(3) copies of pertinent reference materials, statutes, regulations, and audiovisual materials are reasonably available to participants and the public.

(c) A meeting by electronic media as provided in this

section has the same legal effect as a meeting in person.

(d) For purposes of AS 14.42.100 - 114.42.310, public notice of 24 hours or more is adequate notice of a meeting of the board at which the issuance of corporation bonds is authorized.

Sec. 14.42.140. MINUTES OF MEETINGS. The board shall keep minutes of each meeting and send a certified copy to the governor and to the Legislative Budget and Audit Committee.

Sec. 14.42.150. ADMINISTRATION OF AFFAIRS. The board shall manage the assets and business of the corporation and may prescribe, amend and repeal bylaws and regulations governing the manner in which the business of the corporation is conducted and the manner in which its powers are exercised in accordance with the administrative procedures act AS 44-160. The board shall delegate supervision of the administration of the corporation to the executive director of the corporation.

Sec. 14.42.160. EXECUTIVE DIRECTOR. The corporation shall employ an executive director, who may not be a member of the board. The executive director shall be the executive director of the Commission on Postsecondary Education appointed under AS 4:42.040a.

Sec. 14.42.170. EMPLOYMENT OF PERSONNEL. The board may appoint other officers and engage professional and technical advisors as independent contractors. The executive director may hire employees of the corporation and, subject to the approval of the board, engage professional and technical advisors under contract with the corporation. The board shall prescribe the duties and compensation of corporation personnel, including the executive director.

Sec. 14.42.190. EXECUTIVE BUDGET ACT. The operating budget of the corporation is subject to the Executive Budget Act (AS 37.07).

Sec. 14.42.200. EXECUTIVE POWERS. In addition to other powers granted in this chapter, the corporation may

(1) sue and be sued in its own name;

(2) adopt an official seal;

(3) adopt bylaws for the regulation of its affairs and the conduct of its business;

(4) employ fiscal consultants, attorneys, and such other consultants and employees as may be required in the judgment of the corporation, and fix and pay their compensation from money available to the corporation;

(5) make and execute agreements, contracts and other instruments necessary or convenient in the exercise of the powers and functions of the corporation under this chapter, including contracts with any person, firm, corporation, governmental agency or other entity;

(6) receive, administer, and comply with the conditions and requirements respecting any appropriation or gift, grant or donation of property or money;

(7) acquire real property, or any interest in real property, in its own name, by purchase, transfer or foreclosure, when the acquisition is necessary or appropriate to protect any loan in which the corporation has an interest; sell, transfer and convey any such property to a buyer; and, if the sale, transfer or

conveyance cannot be effected with reasonable promptness or at a reasonable price, rent or lease the property to a tenant pending the sale, transfer or conveyance;

(8) borrow money as provided in this chapter to carry out and effectuate its corporate purposes and issue its obligations as evidence of any such borrowing;

(9) include in any borrowing the amounts necessary to pay financing charges, interest on the obligations for a period not exceeding one year after the date on which the corporation estimates funds will otherwise be available to pay the interest, consultant, advisory and legal fees and such other expenses as are necessary or incident to this borrowing;

(10) invest or reinvest, subject to its contracts with noteholders and bondholders, any money or funds held by the corporation in any obligations or other securities authorized under AS 37:10:070.

(11) collect from a borrower amounts owed with respect to a student loan the corporation has purchased or made;

(12) gather information on loans available to residents of Alaska attending or planning to attend an eligible institution and disseminate the information to reasonably assure that qualified students are aware of financial resources available to those attending or desiring to attend an eligible institution;

(13) require an eligible institution or eligible lender to file reports with the corporation as the corporation considers necessary for the effective performance of its duties and publish the information form the reports or other sources as the corporation considers necessary;

(14) service student loans held by the corporation;

(15) except as specifically prohibited by law, obtain information from a state agency or instrumentality or other source to verify information submitted by or on behalf of a student applying for or receiving assistance from the corporation;

(16) make or participate in the making of and purchase or participate in the purchase of student loans;

(17) contract in advance for the purchase or sale of student loans;

(18) sell or participate in the sale, either public or private and on terms authorized by the board, or student loans to the Student Loan Marketing Association or to other purchasers;

(19) collect and pay resonable fees and charges in connection with the purchase, sale, and servicing of student loans,

(20) enter into agreements with the federal government (including guaranty agreements and supplemental guaranty agreements as described in the United States Higher Educaiton Act of 1965) as necessary to provide for the recipt by the corporation of administrative allowances and other benefits available under the United States Higher Education Act of 1965;

(21) enter into contracts with lenders upon terms and conditions agreed upon between the corporation and the lenders, which terms and conditions may reflect the requirements of the United States Higher Education Act of 1965;

(22) enter into contracts with institutions upon the terms and conditions agreed upon between the corporation and the

institutions, which terms and conditions may reflect the requirements of the United States Higher Education Act of 1965;

(23) administer federal money allotted to the state with respect to insured student loans and related administrative costs and other matters;

(24) consent to the modification of the rate of interest, time of payment of an installment of principal or interest, or other terms of a student loan made or purchased by the corporation;

(25) procure insurance against any loss in connection with the operation of its programs under this chapter;

(26) provide advisory services to borrowers and other participants in the corporation's programs under this chapter;

(27) do all acts and things necessary, convenient or desirable to carry out the powers expressly granted or necessarily implied in this chapter.

(28) Sec. 14.42.210. STUDENT LOAN FUND. (a) The student loan fund is established in the corporation. The student loan fund is a trust fund for the uses and purposes of AS 14.42.010-310. The student loan fund consists of money or assets appropriated or transfered to the corporation and other money or assets deposited in it by the corporation.

(b) Money and other assets of the student loan fund may be used to secure bonds of the corporation in the types of investments under AS 37.100.070 A or shall be used to make or purchase loans approved under AS.14.43.090-160.

Sec. 14.42.220. BONDS OF THE CORPORATION. (a) Subject to (g) of this section, the corporation may borrow money and may issue bonds, including but not limited to bonds on which the principal and interest are payable, (1) exclusively from the income and receipts or other money derived from the loans financed with the proceeds of the bonds, (2) exclusively from the income and receipts or other money derived from designated loans whether or not they are financed in whole or in part with the proceeds of the bonds, or (3) from its income and receipts or other assets generally, or a designated part or parts of them.

(b) Bonds shall be authorized by resolution of the authority, and be dated and shall mature more than 20 years from the date of its issue. Bonds shall bear interest at the rate or rates, be in the denominations, be in the form, either coupon or registered, carry the registration privileges, be executed in the manner, be payable in the medium of payment, at the place or places, and be subject to the terms of redemption which the resolution or a subsequent resolution may provide.

(c) All bonds, regardless of form or character, shall be negotiable instruments for all the purposes of the Uniform Commercial Code.

(d) All bonds may be sold at public or private sale in the manner, for the price or prices, and at the time or times which the corporation may determine.

(e) Before the issuance of any bonds, the corporation shall make provision by agreement or otherwise at least sufficient in the judgment of the corporation to pay the principal of and interest on the bonds as they become due and to create and maintain the reserves therefor as the corporation considers necessary or

desirable and to meet all obligations in connection with the agreement and all costs necessary to service the bonds unless the agreement provides that the obligations are to be met or costs are to be paid by a party other than the corporation.

(f) The superior court shall have jurisdiction to hear and determine suits, actions or proceedings relating to the corporation, including suits, actions or proceedings brought to foreclose or otherwise enforce a mortgage or other security interest or brought by or for the benefit of a holder of its bonds or by a trustee for or other representative of the holders.

(g) The corporation may not issue bonds during any fiscal year in an amount greater than $100,000,000 unless the legislature, by law, approves issuance of a greater amount..

Sec. 14.42.230. TRUST INDENTURES AND TRUST AGREEMENTS. In the discretion of the corporation, an issue of bonds may be secured by a trust indenture or trust agreement between the corporation and a corporate trustee (which may be a trust company, bank, or national banking association, with corporate trust powers, located inside or outside the state) or by a secured loan agreement or other instrument or under a resolution giving powers to a corporate trustee (hereinafter in this section referred to as "trust agreement") by means of which the corporation may:

(1) make and enter into any and all the covenants and agreements with the trustee or the holders of the bonds which the corporation may determine to be necessary or desirable, including, without limitation, covenants, provisions, limitations and agreements as to

(A) the application, investment, deposit, use and disposition of the proceeds of bonds of the corporation or of money or other property of the corporation or in which it has an interest;

(B) the fixing and collection of loan payments and other consideration for, and the other terms to be incorporated in, a student loan;

(C) the assignment by the corporation of its rights in a student loan or in a mortgage or other security interest created with respect to a student loan to a trustee for the benefit of bondholders;

(D) the terms and conditions upon which additional bonds of the corporation may be issued

(E) the vesting in a trustee of rights, powers, duties, funds or property in trust for the benefit of bondholders, including, without limitation, the right to enforce payment, performance and all other rights of the corporation or of the bondholders, under a student loan or a security interest created with respect to a student loan;

(2) pledge, mortgage or assign money, agreements, property, or other assets of the corporation either presently in hand or to be received in the future, or both; and

(3) provide for any other matters of like or different character which in any way affect the security or protection of the bonds.

SEC. 14.42.240. CAPITAL RESERVE FUNDS AND CAPITAL RESERVE FUND REQUIREMENTS. (a) For the purpose of securing one or more issues of its bonds, the corporation may establish one or more

special funds, called "capital reserve funds", and shall pay into those capital reserve funds the proceeds of the sale of its bonds and other moneys which may be made available to the corporation from other sources for the purposes of the capital reserve funds. A capital reserve fund may be established only if the corporation determines that the establishment of the fund would enhance the marketability of the bonds. Money in a capital reserve fund, except as provided in this section, may be used as required only for (1) the payment of the principal of, and interest on, bonds or of the sinking fund payments with respect to those bonds; (2) the purchase or redemption of the bonds, or (3) the payment or a redemption premium required to be paid when the bonds are redeemed before maturity. However, money in a capital reserve fund may not be withdrawn if the withdrawal would reduce the amount in the capital reserve fund to les than the capital reserve fund requrement, except for the purpose of making payment, when due, of principal, interest redemption premiums on the bonds, and sinking fund payments when other money of the corporation is not available for the payments. Income or interest earned by, or increment to, a capital reserve fund, from the investment of all or part of the fund, may be transferred by the corporation to other funds or accounts of the corporation if the transfer does not reduce the amount of the capital reserve fund below the capital reserve fund requirement.

(b) If the corporation decides to issue bonds secured by a capital reserve fund, the bonds may not be issued if the amount in the capital reserve fund is less than the capital reserve fund requirement, unless the corporation, at the time of issuance of the bonds, deposits in the capital reserve fund from the proceeds of the bonds to be issued or from other sources, an amount which, together with the amount then in the fund, is not less than the capital reserve fund requirement.

(c) In computing the amount of a capital reserve fund for the purpose of this section, securities in which all or a portion of the fund is invested shall be valued by a reasonable method established by the corporation by resolution. Valuation shall include the amount of interest earned or accrued as of the date of valuation.

(d) The chairman of the corporation shall annually, no later than January 2, certify in writing to the governor and the legislature the amount, of any, required to restore a capital reserve fund to the capital reserve fund requirement. The legislature may appropriate to the corporation the amount certified by the chairman of the corporation. The corporation shall deposit the amounts appropriated under this subsection during a fiscal year in the proper capital reserve fund. Nothing in this section created a debt or liability of the state.

(e) In this section, "capital reserve fund requirement" means the amount required to be on deposit in the capital reserve fund as of the date of computation as determined by resolution of the corporation.

(f) The corporation may establish reserve funds, other than capital reserve funds, to secure one or more issues of its bonds. The corporation may deposit in a reserve fund established under this subsection the proceeds of sale of its bonds and other

money which may be made available from any other source. A reserve fund established under this subsection must comply with (a) - 9c) of this section. The corporation may allow a reserve fund established under this subsection to be depleted without complying with (d) of this section.

Sec. 14.42.250. VALIDITY OF PLEDGE. It is the intention of the legislature that a pledge made in respect of bonds shall be valid and binding from the time the pledge is made; that the money or property so pledged and thereafter received by the corporation shall immediately be subject to the lien of the pledge without physical delivery or further act; and that the lien of the pledge shall be valid and binding as against all parties having claims of any kind in tort, contract or otherwise against the corporation irrespective of whether the parties have notice. Neither the resolution, trust agreement nor any other instrument by which a pledge is created need be recorded or filed under the provisions of the Uniform Commercial Code to be valid, binding or effective against the parties.

Sec. 14.42.260. NONLIABILITY ON BONDS. (a) Neither the members of the corporation nor a person executing the bonds are liable personally on the bonds or are subject to personnel liability or accountability by reason of the issuance of the bonds.

(b) The bonds issued by the corporation do not constitute an indebtedness or other liability of the state or of a political subdivision of the state, except the corporation, but shall be payable solely from the income and receipts or other funds or property of the corporation. The corporation may not pledge the faith or credit of the state or of a political subdivision of the state (except the corporation) to the payment of a bond and the issuance of a bond by the corporation does not directly or indirectly or contingently obligate the state or a political subdivision of the state to applyh money from, or levy or pledge any form of taxation whatever to the payment of the bond.

Sec. 14.42.270. PLEDGE OF STATE. The state pledges to and agrees with holders of bonds issued under this chapter that the state will not limit or alter the rights and powers vested in the corporation by this chapter to fulfill the terms of a contract made by the corporation with the holders or in any way impair the rights and remedies of the holders until the bonds, together with the interest on them with interest on unpaid installments of interest, and all costs and expenses in connection with an action or proceeding by or on behalf of the holders, are fully met and discharged. The corporation is authorized to include this pledge and agreement of the state in a contract with the holders.

Sec. 14.42.280. EXEMPTION FROM TAXATION. The real and personal property of this corporation and its assets, income and receipts are declared to be the property of a political subdivision of the state and devoted to an essential public and governmental function and purpose, and the property, assets income, receipts, and other interests of the corporation shall be exempt from all taxes and special assessments of the state or a political subdivision of the state, including, without limitation, all boroughs, cities, municipalities, school districts, public utility districts and other

taxing units. All bonds of the corporation are declared to be issued by a political subdivision of the state and for an essential public and governmental purpose and to be a public instrumentality, and the bonds, and the interest on them, the income from them and the transfer of the bonds, and all assets, income and receipts pledged to pay or secure the payment of the bonds, or interest on them, shall at all times be exempt from taxation by or under the authority of the state, except for inheritance and estate taxes and taxes on transfers by or in contemplation of death. Nothing in this section affects or limits an exemption from license fees, property taxes, or excise, income or any other taxes provided under any other law, nor does it create a tax exemption with respect to the interest of any business enterprise or other person, other than the corporation, in any property, assets, income, receipts, or other interests.

SEC. 14.42.290. BONDS LEGAL INVESTMENTS FOR FIDUCIARIES. The bonds of the corporation are securities in which all public officers and bodies of the state and all municipalities and municipal subdivisions, all insurance companies and associations and other persons carrying on an insurance business, all banks, bankers, trust companies, savings banks, savings associations, including savings and loans associations anmd building and loan associations, investment companies and other persons carrying on a banking business, all administrators, guardians, executors, trustees and other fiduciaries, and all other persons whatsoever who are now or may hereafter be authorized to invest in bonds or other obligations of the state, may properly and legally invest funds including any other provisions of law, the bonds of the corporation are also securities which may be deposited with and may be received by all public officers and bodies of this state and all municipalities and municipal subdivisions for any purpose for which the deposit of bonds or other obligations of the state is now or may hereafter be authorized.

Sec. 14.42.310. OPERATION OF CERTAIN STATUES EXCEPTED.

(a) The corporation shall not be considered or constitute (1) a political subdivision of the state as the term is used in AS 37.10.085, (2) a municipal corporation or political subdivision of the state as the terms are used in AS 29, or (3) except as provided in AS 14.42.330, a state agency as the term is used in AS 37, but for all other purposes the corporation constitutes a political subdivision and an instrumentality of the state as provided in this chapter.

(b) The funds, income or receipts of the corporation shall not be considered or constitute money of the state, nor shall real property in which the corporation has an interest be considered land owned in fee by the state or to which the state may become entitled or in any way lands belonging to the state, or state lands referred to in Art. VIII of the Alaska Constitution.

Sec. 14.42.320. ANNUAL AUDIT. The corporation shall have its financial records audited annually by the legislative auditor or by a certified public accountant approved by the legislative auditor. The legislative auditor may prescribe the form and content of the financial records of the corporation and shall have access to

these records at any time.

Sec. 14.42.330. OPERATING BUDGET. The operating budget of the corporation is subject to the Executive Budget Act (AS 37.07).

Sec. 2. 14.43.120(d) is amended to read:

(d) scholarship loans may not be made to a student

(1)for more than five years of undergraduate study;

(2)for more than five years of graduate study;

(3)for more than a total of eight years of undergraduate and graduate study;

(4)<u>to attend an institution for which the default rate on loans made to students to attend the institution exceeds the program default rate by more then 150%</u>.

Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

Senator Frank Ferguson
State of Alaska
P.O. Box V
Juneau, Alaska 99811

Dear Senator Ferguson:

We have run several different scenarios as to the level of bonds that can be financed on a sustained basis versus the terms on the loans and have found the following results:

Leaving the Student Loan Program exactly like it is with a 5% interest rate and forgiveness clause allows us to sell $40 million worth of bonds per year on a sustained basis assuming there are $80 milllion in loans to be funded each year.

If the interst rate is raised from 5% to 8%, $45 million of bonds can be sold with a $35 million equity contribution to the general fund.

If the state abolishes forgiveness on the student loans, the ratio is $48 million of bonds and $32 million of appropriation.

If the state abolishes both the forgiveness clause and charge 8%, $55 million in bonds could be financed with a $25 million general fund contribution.

Yours Truly,

JOHN NUVEEN & CO. INCORPORATED

EFFECTS OF CSSB 65
ON RURAL/URBAN
DESIGNATIONS

The following lists communities affected by CSSB 65. This list assumes that the Department considers rural those communities with only parttime road maintenance.

Communities currently URBAN which will be RURAL under CSSB 65:

Alexander	Eyak	Skwentna
Beluga	Halibut Cove	Sunset
Chelatna Lodge	Kustatan	Susitna
China Poot Bay	Ladd	Tabona
Cordova	McDougall	Tatitlek
Ellamar	Port Crawford	Tyonek

Communities currently RURAL which will be URBAN under CSSB 65:

Anderson	Dempsey	Mentasta
Big Delta	Dot Lake	Nabesna
Black Rapids	Ferry	Nenana
Border City	Gakona	North Nenana
Broad Pass	Gardner Creek Camp	Northway Junction
Browne	George Lake Lodge	Paxson
Cantwell	Gulkana	Rex
Cathedral Rapids	Healy	Slana
Chena Hot Springs	Hufmans	Sourdough
Chitina	Julius	Sportsman Lodge
Christochina	Kenny Lake	Suslota
Clear	Lignite	Tetlin Junction
Colorago	Lower Tonzina	Tok
Delta Junction	McKinley Park	Usibelli

These changes take effect immediately upon enactment of CSSB 65.

SECTIONAL ANALYSIS CS SB 65(FIN)

SECTION ~~1~~ 2. TRANSFERS THE URBAN NONCONFORMING HOUSING LOAN PROGRAM FROM THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS TO THE ALASKA HOUSING FINANCE CORPORATION AND GIVES THE COROPORATION THE AUTHORITY TO DEVELOP REGULATIONS TO IMPLEMENT THE PROGRAM.

SECTION ~~2~~ 1. CLEAN UP LANGUAGE TO CHANGE THE NAME OF THE NORTHWEST INUPIAT HOUSING AUTHORITY BACK TO ORIGINAL NAME OF "NORTHWEST ALASKA NATIVE ASSOCIATION."

SECTION 3. PROVIDES FOR THE DEPOSIT OF INTEREST PAYMENTS BACK INTO THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS HOUSING ASSISTANCE LOAN FUND.

SECTION 4. CHANGES THE DEFINITION OF THE WORD "RURAL" BACK TO THE 1982 DEFINITION THEREBY ALLOWING THE NEW NONCONFORMING HOUSING LOAN PROGRAM UNDER AHFC TO SERVE ALL OTHER AREAS OF THE STATE.

SECTION 5. REPEALS AS 44.47.385 THAT PROVIDES FOR 20% ALLOCATION OF THE CURRENT HOUSING LOAN PROGRAM IN DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS TO URBAN AREAS OF THE STATE. THIS IS REPEALED IN LIEU OF THE NEW PROGRAM BEING CREATED UNDER AHFC.

REPEALS AS 44.47.460(D) THAT PROVIDES FOR THE DEPARTMENT TO ENTER INTO AGREEMENTS TO PAY FINANCIAL INSTITUTIONS HIGHER THAN A ONE PERCENT LOAN SERVICE AND ORIGINATION FEES IN RURAL COMMUNITIES.

SECTION 6. PROVIDES FOR AN IMMEDIATE EFFECTIVE DATE.

POSITION PAPER

RE: CSSB 65 (Finance)

SPONSORS: Senator Kerttula

The Department strongly supports the Committee Substitute for Senate Bill 65 (Finance), an Act relating to housing loan programs. The following provides a section-by-section analysis to substantiate our support.

Section 1

Section 1 brings the State statute back into accordance with the Federal government's formal recognition of Regional Native Housing Authorities for the purposes of funding. A 1984 amendment to AS 18.55.996, which was effective July 1, 1984, substituted "Inupiat Housing Authority" for "Alaska Native Association." During implementation of this amendment, the housing authority found that the federal agency, Housing and Urban Development (HUD), would not recognize the new name, as they had formally recognized NANA as the Regional Native Housing Authority. This provision in CSSB 65 (Finance) returns AS 18.55.996 to its form prior to 1984, and again allows conformity to the Federal regulations.

Section 2

Section 2 enables the transfer of the urban Nonconforming Housing Loan Program from the Housing Assistance Division of the Department of Community and Regional Affairs to the Alaska Housing Finance Corporation. Through the transfer, this provision would bring all urban housing loan programs under the jurisdiction and administration of the AHFC. The Department considers this consolidation of programs important for more efficient administration of housing loan programs, for both the Department and the AHFC.

Section 3

Section 3 anticipates declining State revenues by including interest in the calculation for repayment on loans. We believe this provision will reduce the need for large general fund appropriations to the Housing Assistance Loan Fund in the future.

Section 4

Section 4 repeals the existing definitions for the purposes of rural housing loans, bringing the definitions back to their original form as enacted by the legislature in 1982. This section bases the criteria for "rural" on population figures and on inaccessibility by road or rail to Anchorage or Fairbanks. This definition does not differentiate between incorporated or unincorporated communities. It would also enable "suburbs" of non-rural communities to be included in the program, if there are population figures for the "suburb" alone, ie., Saxman, outside of Ketchikan, has a separate population of 343 people. Further, under Section 4, the term "community" could include as many people as 4,500 and as few as one. In this instance, isolated rural homes would be able to participate in the rural housing loan program.

Section 5

This section repeals AS 44.47.385 and AS 44.47.460(d). With the transfer of the nonconforming program to the AHFC, there is no longer a need for the regional allocations provided by AS 44.47.385 for the nonconforming program.

Under AS 44.47.460(d), the Housing Assistance Division of the Department of Community and Regional Affairs is obligated to pay a portion of the higher service fees for loans made for nonconforming housing. To date, the Division has never allowed homes to have the higher service fees, simply because money was never appropriated to HAD to supplement the fees. The Division has negotiated agreements with seller/servicers that provide for 1/2 percent service fees versus the AHFC 3/8 percent service fees.

Jeff Smith
Acting Commissioner

LETTER OF INTENT

HOUSE SPECIAL COMMITTEE ON STATE LOANS

HCS CS SB 65 (Loans)

It is the intent of the Legislature that the Department of Community and Regional Affairs, Housing Assistance Division, and the Alaska Housing Finance Corporation work together to provide housing loans under the Nonconforming Housing program. It is further the intent of the Legislature that the agencies work together to make a recommendation for the second session of the Fourteenth Legislature, concerning which communities in the state should be classified as "rural" and served by DC&RA and which communities should be classified as "urban" and served by AHFC. In making this recommendation, the agencies shall consider the programmatic effects of such classifications as well as the practical problems of access to urban banks. In defining "rural" for the purposes of this legislation, it is not the intent of the legislature to make this specific definition apply to or set a precedent for other programs.

Rep. John Sund, Chairman

CS FOR SENATE BILL NO. 65 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to housing programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.55.996(a) is amended to read:

(a) The following associations are given the authority specified in (b) of this section:

(1) Arctic Slope Native Association (Barrow and Point Hope)

(2) Bering Straits Association (Seward Peninsula, Unalakleet, St. Lawrence Island)

(3) Northwest Alaska Native Association [INUPIAT HOUSING AUTHORITY] (Kotzebue)

(4) Association of Village Council Presidents (southwest coast of Alaska including all villages in the Bethel area and all villages on the Lower Yukon River and Lower Kuskokwim River)

(5) Tanana Chiefs Conference (Koyukuk, the middle and upper Yukon River villages and the upper Kuskokwim and Tanana River villages)

(6) Cook Inlet Tribal Council (Kenai, Tyonek, Eklutna and Seldovia)

(7) Bristol Bay Native Association (Dillingham, Upper Alaska Peninsula)

(8) Aleut League (Aleutian Islands, Pribilof Islands and that part of the Alaska Peninsula which is in the Aleut League)

(9) North Pacific Rim Native Corp. (Cordova, Tatitlek, Port

COMMITTEE COPY

Graham, English Bay, Valdez, Seward, Eyak and Chenega)

(10) Tlingit-Haida Central Council or Alaska Native Brotherhood (Southeastern Alaska including Metlakatla)

(11) Kodiak Area Native Association (all villages on and around Kodiak Island)

(12) Copper River Native Association (Copper Center, Glennallen, Chitina and Mentasta)

(13) Alaska Federation of Natives, Inc.

(14) Sitka Community Association (Baranof and Japonski Island).

* Sec. 2. AS 18.56 is amended by adding a new section to read:

Sec. 18.56.106. NONCONFORMING HOUSING LOAN PROGRAM. (a) There is established in the corporation the nonconforming housing loan program to assist persons to purchase housing that does not conform to minimum building standards under any state or federal program that provides for housing purchases.

(b) The corporation shall adopt regulations under this section that establish conditions and terms for nonconforming housing loans including terms and conditions relating to owner and nonowner occupancy, the number of loans that may be made to a single borrower, and borrower eligibility requirements.

* Sec. 3. AS 44.47.380 is amended to read:

Sec. 44.47.380. HOUSING ASSISTANCE LOAN FUND. There is created in the department, as a revolving loan fund, the housing assistance loan fund consisting of money appropriated to it by the legislature and repayments of principal <u>and interest</u> on loans made or purchased from the assets of the fund. The director shall administer the housing assistance loan fund in accordance with AS 44.47.360 - 44.47.560 and shall use the money in the housing assistance loan fund to

originate, purchase, or participate in the purchase, or

(1) nonconforming and rural housing mortgage loans;

(2) loans made for building materials for nonconforming and rural housing;

(3) loans made for renovations or improvements to nonconforming and rural housing;

(4) loans made for the construction of owner-occupied nonconforming and rural housing other than loans to builders or contractors or loans that compensate an owner for the owner's labor or services in constructing the owner's own housing.

* Sec. 4. AS 44.47.560 is repealed and reenacted to read:

Sec. 44.47.560. DEFINITIONS. In AS 44.47.360 - 44.47.560,

(1) "director" means the director of the division of housing assistance;

(2) "division" means the division of housing assistance;

(3) "housing" means owner-occupied, single-family housing and owner-occupied duplexes;

(4) "nonconforming housing" means housing that does not conform to minimum building standards under any state or federal program that provides loans for housing purchases;

(5) "rural" means

(A) a community in the second, third, or fourth judicial district of the state with a population of 4,500 or less that is not connected by road or rail to Anchorage or Fairbanks; or

(B) a community in the first judicial district of the state with a population of 4,500 or less;

(6) "rural housing" means housing whether or not it is nonconforming housing that is located in a rural area of the state.

* Sec. 5. AS 44.47.385 and 44.47.460(d) are repealed.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

SENATE

LETTER OF INTENT

ON

CS FOR SENATE BILL NO. 65(Fin)

IT IS THE INTENT OF THE LEGISLATURE THAT WHEN THE URBAN NON-CONFORMING LOAN PROGRAM IS TRANSFERRED FROM THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS TO THE ALASKA HOUSING FINANCE CORPORATION THAT THE ALASKA HOUSING FINANCE CORPORATION ADOPT EMERGENCY REGULATIONS TO INCORPORATE THOSE DCRA LOAN CONDITIONS IN FORCE FOR RURAL PROGRAMS.

LOAN APPLICATION WHICH WERE IN PROGRESS PRIOR TO THE 4:30 P.M., JANUARY 22, 1985, DEADLINE ARE TO BE CONSIDERED UNDER THE SAME CRITERIA IN EFFECT BEFORE THAT DATE.

ADOPTED BY THE SENATE, MAY 3, 1985.

SCOMM
#50:38

Section 1. It amends AS 45.94.020 to restate the purpose of the loan guarantee program as described above. The amendment drops out the provisions in the existing law dealing with the purchase of stock which were designed to deal specifically with the KPC situation.

AS 45.94.030 and .040 are left unchanged by the bill. Section .030 outlines the powers and duties of the department and the commissioner. Section .040 states income from investment of the fund is to go to the general fund.

Section 2. This section amends AS 45.94.050(a) to include the requirement in paragraph (2) of subsection (a) that the loan be commercially reasonable. It also requires that a con rolling interest in the business be held by Alaska residents. The Commissioner of Revenue is given discretion to waive this requirement. Section 2 also requires that the business maintain its offices and operating facilities exclusively in the state unless engages in the export of forest products in which case offices and facilities overseas would be permitted. It also requires that a majority of employees of the business be residents of the state. The section further requires that the business be organized for profit. A subsection (5) is added requiring that the loan further the maintaining or increasing of production and employment in the forest products business in the state. A new subsection (6) requires that the portion of the loan not guaranteed by the state be held by a financial institution which meets the approval of the Commissioner.

Section 3. AS 45.94.050(b) is amended by this section to increase the guarantee from 50% to 80% but to limit that guarantee to $6 million per borrower. The current law sets a $30 million limit. As with the existing statute, the Department of Revenue would not be permitted to guarantee the payment of annual interest on the guaranteed portion of the loan. This conforms with other loan programs in the state.

Section 4. This section amends AS 45.94.050 by adding a new subsection (a) to require the charging of a user fee by the Department of Revenue not to exceed 1/4 of 1% for loans guaranteed under this chapter.

Section 5. Section 5 makes a small change in AS 45.94-.060 which is the definitions section. The change is to add to the definition of forest products business that it be organized under the laws of the state.

Section 6. This section provides for an effective date immediately in accordance with AS 01.10.070(c). This is the standard effective date provision.

TESTIMONY OF JAMES F. CLARK
ON THE FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM
SET FORTH IN THE HOUSE SPECIAL LOANS COMMITTEE WORK DRAFT
OF THE HOUSE CS FOR SENATE BILL NO. 78

My name is Jim Clark. I represent the Alaska Loggers Association (ALA), which very strongly supports Sections 30-34 of the House Special Loans Committee Work Draft of the House CS for Senate Bill No. 78 (hereinafter "the proposed legislation"). The ALA is made up of loggers, mill owners and their suppliers throughout Alaska and has more than 100 members.

It should be emphasized that the guarantee program proposed by the legislation does not constitute a call on new funds. It would continue to segregate funds in the rainy day account which had been segregated by the Legislature last year for the Forest Products Business Loan Guarantee Program. That program was enacted to provide employees of the Ketchikan Pulp Corporation a loan guarantee fund as part of a proposed employee stock-ownership plan (ESOP) to purchase the Ketchikan Pulp Company. Those funds will lapse on June 30, 1985 if the employees do not exercise their option to purchase the mill. The employees decided months ago not to purchase the mill, and thus this fund has not been, and will not be, utilized.

Last year's loan program was the first ever proposed for the forest industry. While other industries have received financial assistance, there has been no State program for the timber industry. In summary on this point, the proposed

legislation does not create a new fund. It uses the existing fund to make a loan guarantee program available to all firms within the industry.

Please understand that this is not a low interest loan program or subsidy program. Under the proposed legislation, the Department of Revenue would guarantee loans made by the banking community to Alaska owned forest products business for up to 80% of a given loan, and not more than $6 million per borrower. There would be a 1% user fee for the loan guarantee to compensate the State for taking the risk. The loan must be fully collateralized and must be commercially reasonable. The 20% for which the banks will be liable will provide a strong incentive on each bank's part to make certain that those loans which are guaranteed are good loans.

The 50% guarantee of the existing legislation has been increased to 80%. In the ESOP situation, the concept was that the employees were to purchase the mill from Louisiana Pacific Corporation. Louisiana Pacific Corporation had no guarantee prior to the legislation and thus was happy with any guarantee. Banks, on the other hand, require a guarantee in the range described in the proposed legislation before they are interested in making the loan. The 80% figure has been discussed with Alaska banks and Administration officials who agree that it is reasonable for the purposes intended here. Please also note that the Small Business Administration (SBA) loan guarantee program

provides for a 90% guarantee and the Alaska Industrial Development Authority (AIDA) program provides for an 80% guarantee.

In the event of a default, as under the existing law, payments received to satisfy the debt are allocated between the lender and the guarantee fund according to the guaranteed percentage of the loan. The lender does not get a first position.

The question arises why, if these loans are good loans to begin with, is a State loan guarantee program necessary? The short answer is that we are trying to improve the quality and diversity of our products to penetrate the Alaska markets and expand our export markets. In most cases, the sawmills we are trying to help do this are constrained by State budgetary constraints in putting up long term timber sales and the limited line of credit of Alaska banks. The loggers we are trying to help are faced with large up front expenditures as a result of the failure of the Federal government to build roads and State and Federal bonding policies.

There are two main groups that will benefit from this bill: (1) sawmills, and (2) loggers. It is our objective to penetrate the existing State forest products market of 110 million board feet per year (which is primarily located along the railbelt area) and to enhance our products for export. We want to create a more diverse product line, which has better quality

control. To do these things, existing sawmills need to make major capital expenditures in planers, kiln driers and creosote or pressure plants in order to produce the full array of products used in the Alaska market and needed to enhance our products for export. We have never been able to take advantage of the preference for State timber products set forth in AS 36.15.010 and 36.15.020 because our products are rough cut, not moisture stabilized and often not precision cut. By purchasing planers and kilns to reduce the moisture of the wood, Alaska sawmill owners could produce timber products which would qualify for use in State contracts and State financed projects as well as private construction in Alaska. In addition, if our sawmills are able to install creosote or pressure plants, we would be able to supply the State railroad tie and the piling market. The Timber Task Force estimates that all of the above will increase our share of this market from its 5-10% to 60%.

It is difficult to obtain commercial funds for such loans at the present time. In Southcentral, Kodiak and the Interior, most mills are having difficulty obtaining a long term wood supply. Thus, the mills are unable to assure a bank that they have sufficient timber committed to their mill for the period over which the loan is made. In large part this is because the Department of Natural Resources does not have the funds available to lay out a long term plan of intermediate term timber sales to local mills. This does not mean that the mills

have been unable to obtain the wood on a year by year basis. Rather, the problem is that the mills are unable to show a banker a long term supply of wood. Without this guarantee, the bankers are reluctant to make loans. We are trying to resolve this problem by substituting the guarantee of a long term supply with the proposed State loan guarantee.

Mr. Chairman, these mill owners have been long term providers of jobs in Alaska. They are good businesses with a good commercial record. The loans will be repaid. It is our estimate that none of them will default.

The loggers will also benefit from this program. Bonds are required of them by State and Federal timber sale contracts. The bonds must cover the timber to be logged, and the roads to be built. These bonds are very expensive and difficult to obtain. A loan guarantee program would supply the funds necessary to obtain the bonds.

Road building requires a large up-front capital investment upon which there will be no return for at least one to two years following the construction of the road. The loan guarantee program would provide loggers the ability to secure loans to purchase timber sale contracts requiring road building. Many of the existing mills in Southcentral, Kodiak and the Interior would be able to purchase larger timber sales.

The "cost of road building" problem is particularly acute in Southeast Alaska where the Forest Service has made

available in 1984 only 56% of the preroading money promised by the Government under the Alaska Natural Interest Lands Conservation Act (ANILCA). Attached to this testimony is a letter that the Congressional Delegation has recently sent to the Forest Service on this subject which documents this point. If the ANILCA funds for preroading were available, this loan guarantee program would not be so badly needed for the timber sale contracts in Southeast which require road building.

In addition, those who log on the National Forests in Alaska are unable to take advantage of a privilege enjoyed by loggers in every other state. That is the opportunity to have a timber sale purchaser elect to have the Forest Service build roads. (See Section 14(i) of the National Forest Management Act.) There is a proviso in Section 14(i) which excludes Alaskans from participating in this program. While the Timber Task Force has asked the assistance of the Governor and the Congressional delegation to get this changed, it has not been changed yet, and will take some time. Thus, the loan guarantee program proposed here would be of great assistance during the interim during which we are attempting to increase ANILCA funding and get the 14(i) proviso changed.

In conclusion Mr. Chairman, what the proposed legislation would provide is the means by which existing funds earmarked for the Ketchikan ESOP program would be used by the entire industry with special emphasis on upgrading and diversifying the

products produced by Alaska sawmills, so that Alaska timber could be used in the Alaska market and provide Alaskan jobs, and to assist loggers throughout the State.

We would certainly appreciate your support for the proposed legislation.

IN THE SENATE

BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

HOUSE CS FOR CS FOR SENATE BILL NO. 78 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making miscellaneous amendments to state loan programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 16.10.310(a) is amended to read:

(a) The department may

(1) make loans to

(A) individual commercial fishermen who have been state residents for a continuous period of two years immediately preceding the date of application for a loan under AS 16.10.300 - 16.10.370 and have had a crewmember or commercial fishing license under AS 16.05.480 or a permit under AS 16.43 for the year immediately preceding the date of application and any other two of the past five years, and who actively participated in the fishery during those periods, for the purchase of entry permits;

(B) an individual for the repair, restoration, or upgrading of existing vessels and gear, for the purchase of entry permits and gear, and for the construction and purchase of vessels, if the individual [AN INDIVIDUAL WHO] has been a state resident for a continuous period of two years immediately preceding the date of application for a loan under AS 16.10.300 - 16.10.370, and either [WHO]

(i) because of lack of training or lack of employment opportunities in the area of residence does not have occupational opportunities available other than

commercial fishing; or

(ii) is economically dependent on commercial fishing for a livelihood and for whom commercial fishing has been a traditional way of life [FOR THE INDIVIDUAL] in Alaska [, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF ENTRY PERMITS AND GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS;

(C) CORPORATIONS, PARTNERSHIPS, OR JOINT VENTURES, 100 PERCENT OF WHICH ARE OWNED BY INDIVIDUAL COMMERCIAL FISHERMEN WHO HAVE BEEN STATE RESIDENTS FOR A CONTINUOUS PERIOD OF TWO YEARS IMMEDIATELY PRECEDING THE DATE OF APPLICATION FOR A LOAN UNDER AS 16.10.310(a)(1)(B) AND HAVE HAD A CREWMEMBER OR COMMERCIAL FISHING LICENSE UNDER AS 16.05.480 OR A PERMIT UNDER AS 16.43 FOR THE YEAR IMMEDIATELY PRECEDING THE DATE OF APPLICATION AND ANY OTHER TWO OF THE PAST FIVE YEARS, AND WHO ACTIVELY PARTICIPATED IN THE FISHERY DURING THAT PERIOD, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS];

(2) designate agents and delegate its powers to them as necessary;

(3) adopt regulations necessary to carry out its functions;

(4) establish amortization plans for repayment of loans, which may include extensions for poor fishing seasons or for adverse market conditions for Alaskan products;

(5) enter into agreements with private lending intuitions, other state agencies, or agencies of the federal government, to carry out the purposes of AS 16.10.300 - 16.10.370;

(6) enter into agreements with other agencies or organizations to create an outreach program to make loans under AS 16.10.300 -

16.10.370 in rural areas of the state;

(7) allow an assumption of a loan if

(A) the applicant has been a state resident for a continuous period of two years immediately preceding the date of the request for an assumption; and

(B) approval of the assumption would be consistent with the purposes of AS 16.10.300; an applicant for a loan assumption may not be disqualified because the applicant does not meet the loan eligibility requirements of (1) of this subsection;

(8) prequalify loan applicants for a limited entry permit loan and charge a fee not to exceed $200 for prequalification.

* Sec. 2. AS 16.10.310 is amended by adding a new subsection to read:

(c) In determining whether an individual commercial fisherman is reasonably likely to be able to repay a loan made under AS 16.10.300 - 16.10.370, the commissioner shall consider the individual commercial fisherman's income from commercial fishing and from all other sources.

* Sec. 3. AS 16.10.315 is amended to read:

Sec. 16.10.315. ALLOCATION OF LOANS. The department shall allocate at least 10 percent of the money that is appropriated for a state fiscal year to make loans under AS 16.10.310 for loans of $35,000 or less made under AS 16.10.310(a)(1)(B) [AND (C)]. An allocation made under this section terminates on April 15 of the state fiscal year for which the allocation is made.

* Sec. 4. AS 16.10.320(a) is amended to read:

(a) Except as permitted in (h) of this section, a [A] loan under AS 16.10.300 - 16.10.370 [16.10.310 - 16.10.370]

(1) may not exceed a term of 15 years, except for extensions under AS 16.10.310(a)(4);

(2) may not bear interest exceeding 10-1/2 percent;

(3) must [SHALL] be secured by a first priority lien and appropriate security agreement; and

(4) may not exceed 90 percent of the appraised value of the collateral used to secure the loan[, EXCEPT THAT A LOAN GRANTED UNDER AS 16.10.333 FOR THE PURCHASE OF AN ALASKA LIMITED ENTRY PERMIT MAY NOT EXCEED AN AMOUNT DETERMINED IN ACCORDANCE WITH (f) OR (h) OF THIS SECTION].

* Sec. 5. AS 16.10.320(d) is amended to read:

(d) The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(A) may not exceed [A TOTAL OF] $300,000. The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)] may not exceed [A TOTAL OF] $100,000. [A LOAN TO AN ASSOCIATE OF THE BORROWER IS CONSIDERED TO BE A LOAN TO THE BORROWER. FOR THE PURPOSES OF THIS SECTION, "ASSOCIATE OF THE BORROWER" MEANS

(1) A CORPORATION OR OTHER ORGANIZATION OF WHICH THE BORROWER IS AN OFFICER, DIRECTOR OR PARTNER, OR IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE ON ANY CLASS OF EQUITY SECURITIES;

(2) A PERSON WHO IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE OF ANY CLASS OF EQUITY SECURITIES OF THE BORROWER;

(3) A TRUST OR OTHER ESTATE IN WHICH THE BORROWER HAS A SUBSTANTIAL BENEFICIAL INTEREST OR AS TO WHICH THE BORROWER SERVES AS TRUSTEE OR IN A SIMILAR FIDUCIARY CAPACITY.]

* Sec. 6. AS 16.10.320(e) is amended to read:

(e) Two or more individual commercial fishermen who each satisfy the requirements specified in AS 16.10.310(a)(1)(B) may jointly, whether operating as a corporation, partnership, joint venture, or

otherwise, obtain a commercial fishing loan for the repair, restoration, or upgrading of an existing vessel and gear, for the purchase of gear, and for the construction [OF A FISHING VESSEL] or the purchase of a [AN EXISTING] fishing vessel. Loans granted under this subsection

[(1)] may not exceed the amount specified in (d) of this section multiplied by the number of qualified commercial fishermen applying for the loan [;

(2) MAY NOT EXCEED A TERM OF 15 YEARS;

(3) SHALL BE SECURED BY A FIRST PRIORITY LIEN AND APPROPRIATE SECURITY AGREEMENT;

(4) MAY NOT BEAR INTEREST EXCEEDING 10-1/2 PERCENT; AND

(5) MAY NOT EXCEED 90 PERCENT OF THE APPRAISED VALUE OF THE COLLATERAL USED TO SECURE THE LOAN].

* Sec. 7. AS 16.10.320(i) is amended to read:

(i) If a loan is made to a borrower under AS 16.10.310(a)(1)(A), a subsequent loan may not be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(B) [OR (C)]. If a loan is made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)], a subsequent loan may be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(A) if the total of the balances outstanding on loans received by the borrower [OR THE ASSOCIATE] under AS 16.10.310 does not exceed $300,000.

* Sec. 8. AS 16.10.333(a) is amended to read:

(a) Loans under AS 16.10.310(a) [AS 16.10.320(a)] may be made to an individual commercial fisherman for the purchase of a limited entry permit upon certification by the commission that the fisherman is a person who qualifies as a transferee for the permit under AS 16.43 and

the regulations adopted by the commission.

* Sec. 9. AS 16.10.335 is amended to read:

Sec. 16.10.335. DEFAULT AND FORECLOSURE. (a) If the debtor defaults upon a note for which a limited entry permit has been pledged as security under AS 16.10.333 or [UNDER AS] 16.10.338, the commissioner shall provide the debtor, by both [REGISTERED OR] certified and first class mail sent to the debtor's last known address on file with the commissioner, with a notice of default that [WHICH] includes

(1) a description of the security given for the note including the number assigned to the pledged permit by the commission;

(2) the date upon which the default occurred;

(3) the amount of arrearages as of the date of the notice, the total amount remaining on the note less unearned interest, and the amount of daily interest;

(4) a statement that the debtor may, within 15 days after [OF] the postmark date of the notice, request a hearing to submit evidence showing the debtor has not defaulted;

(5) a statement that the note may be reinstated if brought current within 60 days after [FROM] the postmark date of the notice;

(6) a statement that the note may be paid in full less unearned interest within 120 days after [FROM] the postmark date of the notice;

(7) the place where reinstatement or payment in full may be made; and

(8) a notice in at least 10-point bold type stating: "IMPORTANT: YOUR FAILURE TO REINSTATE OR PAY THIS NOTE IN FULL BY THE DATE SPECIFIED WILL RESULT IN A FORFEITURE OF ALL RIGHTS TO THE PERMIT AND THE POSSIBILITY OF LEGAL ACTION BEING INSTITUTED AGAINST YOU."

(b) In each case of a limited entry permit being pledged as

security under AS 16.10.333 or 16.10.338, the debtor shall maintain on file with the department an address where notice of default is to be sent, if necessary, and where that notice will be timely received by the debtor.

(c) Upon presentation of evidence of mailing in accordance with (a) of this section, the receipt of the notice of default by the debtor will be presumed for all purposes. This presumption is rebuttable by presentation of evidence sufficient to demonstrate lack of receipt of notice through no fault of the debtor. Upon presentation of evidence sufficient to prove lack of receipt of notice through no fault of the debtor, the notice is a nullity.

(d) Upon good cause shown, the commissioner may waive any of the time limits in (a) of this section, if the department receives from the debtor or the debtor's representative a request for the waiver before the expiration of the time limit for which the waiver is sought.

(e) Except as otherwise provided in (c) and (d) of this section, upon [UPON] the debtor's failure to satisfy the note within the time specified in (a)(6) of this section, the debtor's interest in the permit is terminated by operation of law without further notice. Any entry permit cards issued to the debtor under the permit must [SHALL] be cancelled immediately upon receipt by the commission of a certificate of termination containing a copy of the notice required by (a) of this section issued by the commissioner.

* Sec. 10. AS 16.10.339 is amended to read:

Sec. 16.10.339. REGULATIONS. The [COMMISSION, WITH THE APPROVAL OF THE] department [,] shall adopt regulations to implement AS 16.10.-333 - 16.10.337.

* Sec. 11. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.355. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.300 - 16.10.370 or former AS 16.10.650 - 16.10.720. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years, but may not be by lease.

* Sec. 12. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.507. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the fisheries enhancement revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 16.10.520 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 13. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.555. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.500 - 16.10.620. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 14. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.085. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that

serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 15. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.095. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the Alaska World War II veterans' revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 26.15.040 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 16. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the mining loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 27.09.010 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 17. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 18. AS 41.35.180 is amended to read:

Sec. 41.35.180. DUTIES OF COMMITTEE. The committee shall

(1) develop criteria for the evaluation of state monuments and historic sites and all real and personal property which may be considered to be of historic, prehistoric or archeological significance as would justify their acquisition and ownership by the state;

(2) cooperate with the department in formulating and administering a statewide historic sites survey under 16 U.S.C. 470-470n (P.L. 89-665, National Historic Preservation Act of 1966);

(3) review those surveys and historic preservation plans that may be required, and approve properties for nomination to the National Register as provided for in 16 U.S.C. 470-470n (P.L. 89-665, National Historic Preservation Act of 1966);

(4) provide necessary assistance to the governor and the legislature for achieving balanced and coordinated state policies and programs for the preservation of the state's historic, prehistoric and archeological resources;

(5) consult with local historical district commissions regarding the establishment of historical districts under AS 29.48.108 and 29.48.110 and the approval of project alterations under AS 45.98.-040; recommend, if appropriate, the formulation of additional criteria for the designation of historical districts under AS 29.48.110(b); approve plans for and evaluate the suitability of specific structures for purposes of loan eligibility and continuance under the historical <u>property</u> [DISTRICT] revolving loan fund (AS 45.98); and consult with the Department of Commerce and Economic Development relative to the adoption of regulations for historical <u>property</u> [DISTRICT] loans under AS 45.98.

* Sec. 19. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.242. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the child care facility revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 44.33.245 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 20. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.272. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 44.33.240 - 44.33.275. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 21. AS 44.81.210(a) is amended by adding a new paragraph to read:

(23) make a loan to a person, regardless of residency, if the board of directors of the bank determines that the loan is necessary to preserve the value of property held by the bank as security for a loan that was made under (a)(1) of this section and that is in default.

* Sec. 22. AS 45.87 is amended by adding a new section to read:

Sec. 45.87.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the bulk fuel revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may

expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under this chapter or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 23. AS 45.87 is amended by adding new sections to read:

Sec. 45.87.040. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.87.060. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 24. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established, as a special account within the revolving loan fund established under AS 45.88.010, the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.88.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 25. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortiza-

tion of payments over a period of years.

* Sec. 26. AS 45.89 is amended by adding a new section to read:

Sec. 45.89.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the residential energy conservation fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.89.030 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 27. AS 45.89 is amended by adding new sections to read:

Sec. 45.89.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.89.070. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 28. AS 45.90 is amended by adding a new section to read:

Sec. 45.90.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the tourism revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.90.020 or to defray expenses incurred during fore-

closure proceedings after a default by an obligor.

* Sec. 29. AS 45.90 is amended by adding a new section to read:

Sec. 45.90.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 30. AS 45.94.020 is amended to read:

Sec. 45.94.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may use money in the fund to guarantee a loan <u>to a forest products business</u> for the purpose of financing the purchase of <u>equipment and facilities that will increase employment in a forest products business</u> [35 PERCENT OR MORE OF THE STOCK OR ASSETS OF A FOREST PRODUCTS BUSINESS BY, ON BEHALF OF, OR FOR THE BENEFIT OF THE EMPLOYEES OF THAT BUSINESS], as provided in AS 45.94.050.

* Sec. 31. AS 45.94.050(a) is amended to read:

(a) The dep. rtment may guarantee a loan under this chapter if

(1) the term of the loan does not exceed 10 years;

(2) the loan is <u>commercially reasonable and</u> secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan is originated with and serviced by a state or federally chartered financial institution; [AND]

(4) the loan is made to <u>a</u> [THE EMPLOYEES OF THE] forest products business <u>and</u>

<u>(A) a majority interest of the business is held by Alaska residents;</u>

(B) the business maintains offices and operating facilities exclusively in the state unless the business is engaged in the export of forest products;

(C) a majority of the employees of the business are residents of the state; and

(D) the business is organized for profit;

(5) the loan will increase or maintain production and employment in the forest products business; and

(6) the portion of the loan not guaranteed by the state is held by the originating financial institution or another financial institution approved by the commissioner [, TO AN EMPLOYEE STOCK OWNERSHIP TRUST, OR TO ONE OR MORE CORPORATIONS OR OTHER BUSINESS ASSOCIATIONS OR ENTITIES IN WHICH THE CONTROLLING INTEREST IS HELD BY STATE RESIDENTS WHO ARE EMPLOYEES OF THE FOREST PRODUCTS BUSINESS].

* Sec. 32. AS 45.94.050(b) is amended to read:

(b) The department may provide a guarantee from the fund for up to 80 [50] percent of a loan, but may not guarantee [LESS THAN $5,000,000 OR] more than $6,000,000 [$30,000,000] per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

* Sec. 33. AS 45.94.050 is amended by adding a new subsection to read:

(d) The department shall charge a user fee not to exceed one percent for a loan guarantee under this chapter.

* Sec. 34. AS 45.94.060 is amended to read:

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed under

the laws of the state for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 35. AS 45.95 is amended by adding a new section to read:

Sec. 45.95.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 36. AS 45.95 is amended by adding a new section to read:

Sec. 45.95.065. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the small business revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.95.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 37. AS 45.98.010 is amended to read:

Sec. 45.98.010. CREATION OF HISTORICAL PROPERTY [DISTRICT] REVOLVING LOAN FUND. There is created in the Department of Commerce and Economic Development a historical property [DISTRICT] revolving loan fund.

* Sec. 38. AS 45.98 is amended by adding a new section to read:

Sec. 45.98.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the historical property re-

volving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under this chapter, or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 39. AS 45.98.020 is amended to read:

Sec. 45.98.020. HISTORICAL PROPERTY [DISTRICT] LOANS. Upon endorsement and plan approval by a local historical landmark or district commission established under AS 29.48.108 and the recommendation of a majority of the members of the Historic Sites Advisory Committee, the Department of Commerce and Economic Development may make loans to a person, firm, business or municipality subject to applicable laws for the restoration, improvement, rehabilitation, or maintenance of an historic [A] structure, building, site, or object that [WHICH] is

(1) within the boundaries of a historical district established under AS 29.48.110;

(2) identified as important in state or national history as provided for in AS 29.48.110(b); and

(3) another building or structure within a historical district, and suitable for superficial modification so that it can conform to the period or motif of the surrounding buildings or structures that are the reason for the area's designation as a historical district.

* Sec. 40. AS 45.98.020 is amended by adding a new subsection to read:

(b) The department may make a loan under this section for a project that is not within the boundaries of a historical district with the approval of a majority of the members of the Historic Sites

Advisory Commission.

* Sec. 41. AS 45.98.040 is amended to read:

Sec. 45.98.040. LIMITATIONS ON LOANS. Loans made under this chapter are subject to the following limitations:

(1) state participation in all loans in the aggregate, for any one historical district qualifying under this chapter may not exceed $1,500,000;

(2) state participation in a loan for the restoration, improvement, rehabilitation or maintenance of any one building or structure qualifying under this chapter may not exceed $250,000;

(3) the loans shall be secured by acceptable collateral and the total of all loans may not exceed 85 percent of the appraised value of the collateral offered as security;

(4) the rate of interest may not exceed seven and one-half percent a year on the unpaid balance of the state's share of the loan;

(5) a participating financial institution shall administer and service the loan for a reasonable fee not exceeding one-quarter of one percent;

(6) the state has a lien on the property accepted as collateral to the extent of its portion of the loan [; WHEN THE LIEN OR NOTICE OF THE LIEN IS PROPERLY RECORDED IT IS SUPERIOR TO ALL OTHER LIENS EXCEPT THOSE FOR TAXES AND SPECIAL ASSESSMENTS; A LIEN OF THE PARTICIPATING FINANCIAL INSTITUTION, TO THE EXTENT OF ITS PORTION OF THE LOAN AFTER IT IS PROPERLY RECORDED, IS SUPERIOR TO ALL OTHER LIENS EXCEPT LIENS FOR TAXES, SPECIAL ASSESSMENTS, AND THE LIEN OF THE STATE].

* Sec. 42. AS 45.98 is amended by adding a new section to read:

Sec. 45.98.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development

shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 43. AS 45.98.070 is amended to read:

Sec. 45.98.070. SHORT TITLE. This chapter may be cited as the Historical Property [DISTRICT] Loan Act.

* Sec. 44. AS 16.10.310(b), 16.10.320(f), and 16.10.333(f) are repealed.

* Sec. 45. This Act takes effect July 1, 1985.

FISCAL NOTE ANALYSIS

Personal Services:

Processing of an additional 600 applications for assumptions and approval of 400 of those applications per year will create a marked increase in the workload of the division's Anchorage and Juneau regional offices. Two additional loan examiners and two loan closers would be required to handle the increased load and would be spread between the two regional offices. One time expenses would be incurred for equipment.

Consideration of these applications would also require significantly more meetings of the department's loan committees. This fiscal note assumes that this additional burden would be absorbed.

PERSONNEL COSTS

Two Loan Examiners II, Range 17A; one each in Anchorage and Juneau:

Salary	$34,740		
Benefits	$10,486		
TOTAL Personal Services		$45,226	
Travel		$ 3,950	
Contractual		$ 3,000	
Commodities		$ 300	
Equipment		$ 4,750	
Total per employee		$57,226	
Subtotal for two Loan Examiners II			$114,452

Two Loan Closers II, Range 12A; one each in Anchorage and Juneau:

Salary	$24,864		
Benefits	$ 8,281		
TOTAL Personal Services		$33,145	
Travel		$ -0-	
Contractual		$ 3,000	
Commodities		$ 300	
Equipment		$ 4,250	
Total per employee		$40,695	
Subtotal for two Loan Closers II			$ 81,390

Estimates for other line items assume that the new employees required for this new loan program will require support at levels similar to that actually being incurred by the division on other loan programs.

JUSTIFICATION

Processing of an additional 600 applications for assumptions and approval of 400 of those applications per year will create a marked increase in the workload of the division's Anchorage and Juneau regional offices. Two additional loan examiners and two loan closers would be required to handle the increased load and would be spread between the two regional offices. On time expenses would be incurred for equipment.

Consideration of these applications would also require significantly more meetings of the department's loan committees. This fiscal note assumes that this additional burden would be absorbed.

Estimates for the 200-500 lines items assume that the new employee required for this new loan program will require support at levels similar to that actually being incurred by the division on other loan programs.

Official Business

SENATE
Letter of Intent

CSSB 78 (L&C)

It is the intent of the Legislature that when implementing the Commercial Fishing Loan Act, the Department of Commerce and Economic Development shall:

(1) utilize maximum flexibility in dealing with loan assumption requests with the understanding that the credit worthiness of the applicant shall be of paramount importance in the decision-making process.

(2) relinquish the original borrower's obligation under the loan agreement whenever the applicant for the assumption has demonstrated credit worthiness to the satisfaction of the Department.

(3) allow individuals to pre-qualify for a loan. This pre-qualification status would apply only to loans authorized for the purchase of limited entry permits.

Adopted by the Senate April 29, 1985.

CSSB 78 (Fin) April 26, 1985

TECHNICAL AMENDMENTS TO DCED LOAN PROGRAMS: FISCAL NOTE

In order for Division of Investments to administer this legislation as it relates to commercial fishing loan assumptions, the Division of Accounting & Collections must be staffed to provide minimally adequate service to Investments. While we originally estimated a need for two additional positions within the Division of Accounting & Collections, we have streamlined our operation within the past six months since the original fiscal note was drafted, and we believe we can service Division of Investments' requirements through overtime effort.

The overtime funding requested will provide for records management (filing) effort as well as accounting effort to process refinanced repossessions and assumptions through the loan accounting system.

	TOTAL	$10,784.00

REVENUE ANALYSIS

1. Assumes an estimated 250 applicants and 200 approvals of assumptions per year, with an average assumed balance of $67,500:

   a. Nonrefundable application fee $50 x 250 = $12,500/year

   b. Assumption Fee (one-time) of ½% of the assumed balance
   $67,500 x .005 x 200 = $67,500/year

2. Assumes an estimated 25 prequalification applicants per year:

   a. Nonrefundable application fee $200 x 25 = $5000/year

3. Assumes 90% recovery of losses on commercial fishing loans due to the ability to finance and reamortize repossessed vessels and other collateral.

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

78

January 22, 1985

The Honorable Don Bennett
President of the Senate
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Bennett:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill that amends or supplements various state loan programs. The bill performs a number of different functions.

In sec. 1, the bill deletes AS 16.10.310(a)(1)(C), which provides that commercial fishing loans can be made to fisherman-owned corporations, partnerships, or joint ventures for vessels and gear. However, under both the current AS 16.10.320(e) and as that subsection is amended in sec. 3 of the bill, loans may be made to commercial fishermen who join together in a joint operation; these loans can be in the amount of the standard loan limits for an individual multiplied by the number of fishermen applying. Thus the individuals operating as corporations, partnerships and joint ventures will all be treated in the same manner as individual fishermen.

The bill also deletes AS 16.10.310(b) (sec. 1 of the bill) and amends AS 16.10.339 (sec. 6 of the bill), relating to the adoption of regulations for the commercial fishing loan program. Under this bill, the Department of Commerce and Economic Development will be given the authority to adopt regulations necessary to implement its own loan programs. Under existing statutes, the department is required to consult with the Department of Fish and Game for all commercial fishing loan regulations, and the Commercial Fisheries Entry Commission must adopt any regulations which affect loans secured by limited entry permits. These particular amendments recognize that these programs are loan programs, and the expertise required for implementation of the programs lies with the Department of Commerce and Economic Development, which must be given the authority to control its own functions.

In sec. 1, the bill also provides that the Department of Commerce and Economic Development may take a more flexible and creative approach to protecting the state's security interests and to financing and disposing of repossessed collateral. It will permit commercial fishing loans to be assumed if the applicant meets the two-year residency requirement and assumption of the loan is determined to be consistent with the purposes of the commercial fishing loan program. In addition, for all of the department's loan programs, the bill provides, in secs. 7 -- 16 and 19, that the department may offer alternative financing, including amortized payments, whenever it disposes of property acquired through default proceedings. Under existing law, the department is frequently required to offer repossessed collateral for sale only for cash, which results in the state taking a large loss. If alternative financing could be offered, a much higher sales price often could be obtained. The bill amends 11 state loan programs (commercial fishing, fisheries enhancement, veterans, mining, child care facilities, bulk fuel, alternative energy, residential energy conservation, tourism, small businesses, and historical districts) to permit this flexible disposal of repossessed collateral if the disposal method selected is in the best interests of the state.

The last amendment made by sec. 1 is to relocate to a new subsec. (c) in AS 16.10.310 language that is now in AS 16.10.333(f) (deleted by sec. 4 of the bill), dealing with consideration of an individual's ability to repay a loan. The current provision is applicable only to loans made for purchase of a limited entry permit. As relocated, that language will apply to all commercial fishing loans made under AS 16.10.300 -- 16.10.370.

Section 3 of this bill amends AS 16.10.320(a)(1) to clarify that the department may extend the term of a commercial fishing loan beyond 15 years if the extension is necessary due to poor fishing seasons or adverse market conditions for fishing products.

AS 16.10.320(d) is also clarified in sec. 3. Under existing language, it is unclear whether an individual borrower who has repaid a commercial fishing loan may be granted a new loan. This bill amends that subsection to clarify that new or additional loans may be made to a fisherman, as long as the total outstanding balance of all commercial fishing loans to that individual does not exceed the statutory limit.

Section 5 of the bill will permit the Department of Commerce and Economic Development to take a more flexible approach in dealing with persons who are technically in default on their commercial fishing loans in specific cases where the forfeiture of an individual's limited entry permit is neither desirable nor advantageous to the state. If a commercial fisherman is able to show that he or she never received notice of default under the loan, that person would be able to present evidence to the department that he or she failed to receive the notice and the department would then dismiss the default proceedings. Also, if an individual fisherman contacts the department to state that he or she is unable, for financial or other reasons, to make payment in accordance with the default statute, but does not wish to sacrifice his permit and truly wants to cooperate with the department, the department would be able to negotiate with the individual to attempt to work out some alternative satisfactory to both the fisherman and the state.

The amendment to AS 16.10.335(a) requires the notice of the default to be sent to the debtor by both certified and first class mail, rather than by just registered or certified mail. The new language in AS 16.10.335(b) requires each fisherman to keep a current address on file with the department.

New AS 16.10.335(c) provides that if the department follows the procedures of (a) of that section, the department and, after that, the courts will presume that the debtor received the default notice, and it will be the debtor's responsibility to prove otherwise. Absent evidence that the debtor did not receive the notice, the department would still be able to continue with its default proceedings. However, if such evidence is presented, the default proceedings could be terminated.

New AS 16.10.335(d) gives the department the right to waive the time limits provided in AS 16.10.335(a) (15 days to request a hearing, 60 days to bring the note current, and 120 days to pay the note in full), if a request for a waiver is made by the debtor to the department before the expiration of the relevant time limit. Thus, this bill will allow fishermen who have defaulted on their loans to avoid forfeiture of their permits if exceptional circumstances warrant their retention of the permit.

The bill also makes technical changes to the historical district loan program to clarify its scope. Section 18 of

the bill.

For each loan program administered by the Department of Commerce and Economic Development, the bill establishes a special account, entitled the foreclosure expense account (secs. 8 -- 17 of the bill). Money in this account may be used to pay expenses incurred in protecting the state's security interest in collateral for loans made under the particular loan program. The language for these sections is taken from AS 16.10.342, which already provides for a foreclosure expense account for the commercial fishing loan program.

In addition, the bill fills an apparent statutory omission regarding the bulk fuel revolving fund and the residential energy conservation loan fund programs, by granting statutory authority to the Department of Commerce and Economic Development to adopt regulations necessary for these programs (secs. 12 and 14 of the bill, respectively).

This bill makes a number of significant improvements to the state loan programs, particularly the state commercial fishing loan program. I urge your support of and prompt action on this measure.

Sincerely,

Bill Sheffield
Governor

MEMORANDUM May 1, 1985

SUBJECT: Sectional analysis of CSSB 78 (Finance)

TO: Representative John L. Sund
Chairman,
House Special Committee on State Loans

FROM: Keith B. Levy KBL
Legislative Counsel

You have requested a sectional analysis of CSSB 78 (Finance). The bill amends a number of state loan programs administered by the Department of Commerce and Economic Development and the Commercial Fishing and Agriculture Bank.

Section 1 amends the commercial fishing loan program (AS 16.10.310(a)) to allow loans for the repair and upgrading of vessels and gear and the purchase of entry permits. To qualify for a loan an individual must either not have other occupational opportunities available or must be dependent on commercial fishing for a livelihood as a traditional way of life. This section also allows assumption of a loan if the applicant has been a resident for two years and the assumption would be consistent with the purposes of the loan program. An applicant for assumption may not be disqualified solely because the applicant does not meet the existing eligibility requirements. Finally, section 1 allows DCED to prequalify loan applicants for limited entry permit loans and charge a fee not to exceed $200 for prequalification.

Section 2 requires DCED to consider a commercial fisherman's income from all sources in determining the fisherman's ability to repay a loan.

Sections 3 and 4 make technical amendments to AS 16.310.315 and AS 16.10.320(a) to conform to other amendments made in the bill.

Section 5 provides that limits on the amount of loans in existing law apply to the total outstanding balance on the loans rather than the total amount of the initial loans. This section also repeals existing provisions under which loans to an associate of the borrower count towards the borrower's loan limits.

Section 6 amends AS 16.10.320(e) to allow two or more commercial fishermen to obtain a loan jointly under the same terms as individual loans.

Sections 7 and 8 make technical amendments to AS 16.10.320(i) and AS 16.10.333(a) to conform to other amendments in the bill.

Section 9 requires a borrower who uses a limited entry permit as security for a loan to maintain an address on file with the department where notice of default may be received by the borrower. If the department mails a notice of default to the borrower, receipt of the notice is presumed, but may be rebutted by the borrower. The department may waive the statutory time limits related to default if the borrower shows good cause and notifies the commissioner before the expiration of the time limit.

Section 10 amends AS 16.10.339 to provide that the department, not the Commercial Fisheries Entry Commission, must adopt regulations to implement the statutory provisions.

Section 11 gives DCED the power to dispose of property acquired through foreclosure of a fishing loan in a manner that serves the best interests of the state. The disposal may include amortization of payments over a period of years, but may not be by lease.

Sections 12 - 19, 21 - 31, and 33 create foreclosure expense accounts within certain loan funds. The accounts are created to protect the state's security interest in collateral on the loans and to pay the expenses of foreclosure on the loans. These sections also give DCED the power to dispose of property acquired through foreclosure of loans in a manner that serves the best interests of the state. These provisions apply to the fisheries enhancement revolving loan fund (secs. 12 and 13), the Alaska World War II veterans' revolving loan fund (secs. 14 and 15), the mining loan fund (secs. 16 and 17), the child care facility

revolving loan fund (secs. 18 and 19), the bulk fuel revolving loan fund (secs. 21 and 22), the alternative energy revolving loan fund (secs. 23 and 24), the residential energy conservation fund (secs. 25 and 26), the tourism revolving loan fund (secs. 27 and 28), the small business revolving loan fund (secs. 29 and 30), and the historical district revolving loan fund (secs. 31 and 33).

Section 20 gives CFAB the power to make a loan to a person regardless of residency, if the loan is necessary to protect the value of property held by the bank as security for a loan that is in default.

Section 32 of the bill amends the historical district loan program to provide that to be eligible for a loan, a structure must be within a historical district and either identified as important in state or national history, or suitable for modification to conform to the period or motif of the surrounding buildings. Under existing law, a structure must meet all three of these requirements.

Section 34 repeals AS 16.10.310(b), 16.10.320(f) and 16.10.333(f), related to commercial fishing loans.

Section 35 provides for a July 1, 1985, effective date.

KBL:lmb
L4/083

To go on 195

May 10th

*Sec. 1.

(a) All right, title, and interest in loans of the type described in (b) of this section, and all right, title and interest in all mortgages, notes and other instruments of security made in connection with those loans, are transferred and appropriated to the fund (AS 45.93.010) of the Forest Products Business Loan Guarantee Program; provided however that payment of principal and interest from the said loans to the Forest Products Business Loan Guarantee Fund (AS 45.93.010) shall continue to be paid into the general fund until June 30, 1986, after which time payments into the Forest Products Business Loan Guarantee Fund shall commence. If the amount in unpaid principal of the loans exceeds $25,000,000 on July 1, 1986, only loans and instruments of security totaling $25,000,000 in unpaid principal are transferred and appropriated under this section.

(b) This section transfers and appropriates

(1) small business loans acquired or made under AS 45.95; and

(2) tourism loans acquired or made under AS 45.90.

*Sec. 2. The unexpended and unobligated portion of the appropriation made herein shall lapse into the general fund on June 30, 1987.

*Sec. 3. Money obligated hereunder for the purpose of guaranteeing the forest products business loan guarantee

fund shall be reappropriated to the general fund as the principal of the guaranteed loan is paid, in amounts equal to the percentage of the loan guarantee multiplied by the payments on the principal of the loan.

4. The Commissioner of Commerce and Economic Development may not ~~guarantee~~ obligate more funds than are in the forest products business loan guarantee fund.

To go on SB 78 May 10th

*Sec. _____. AS 45.94 is repealed.

*Sec. _____. AS 45 is amended by adding a new chapter to read:

Sec. 45.93.010. ESTABLISHMENT OF FOREST PRODUCTS BUSINESS LOAN GUARANTEE FUND. The forest products business loan guarantee fund is established in the Department of Commerce and Economic Development.

Sec. 45.93.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may use money in the fund to guarantee a loan to a forest products business for the purpose of financing the purchase of depreciable assets and roads that will maintain or increase employment in an existing forest products business, as provided in AS 45.93.050.

Sec. 45.93.030. POWERS AND DUTIES OF THE DEPARTMENT. (a) The commissioner may

(1) designate agents and delegate powers necessary to implement this chapter;

(2) adopt regulations to implement this chapter;

(3) make and execute contracts and other instruments to implement this chapter;

(4) acquire real or personal property by purchase, transfer, or foreclosure when the acquisition is necessary to protect an interest in the fund.

(b) The commissioner shall require that a loan guaranteed by the fund be secured by adequate collateral, and that the net cash flow from the forest products business provides

adequate coverage for the debt service on the loan. The applicant shall provide an economic and financial feasibility analysis prepared by a firm acceptable to the department.

Sec. 45.93.040. INVESTMENT OF THE FUND. Money in the fund that is not being used for loan guarantees under this chapter shall be invested as provided for the investment of state treasury surplus under AS 37.10.070. Income from investment and interest on loans in the fund shall be transferred to the general fund.

Sec. 45.93.050

(a) The department may guarantee a loan under this chapter if

(1) the term of the loan does not exceed 10 years;

(2) the loan is commercially reasonable and secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan is orginated with and serviced by a state or federally chartered financial institution;

(4) the loan is made to a forest products business and

(A) a majority interest of the business is held by Alaska residents;

(B) the business maintains offices and operating facilities exclusively in the state unless the business is engaged in the export of forest products; and

(C) a majority of the employees of the business are residents of the state.

(5) the loan will increase or maintain production and employment in the forest products business and is for either depreciable assets which will enance the value of the product sold by the borrower or for a road or roads to be constructed by the borrower in connection with a timber sale.

(6) the portion of the loan not guaranteed by the state is held by the originating financial institution or another financial institution approved by the commissioner.

(b) The department may provide a guarantee from the fund for up to 80 percent of a loan for up to $6,000,000 per borrower for depreciable assets which will enhance the value of the prouducts sold by the borrower and for up to $2,000,000 per borrower for road construction. The department shall not guarantee loans to refinance existing debt. At no time shall the department provide guarantees for loans aggregating more than $31,250,000 of the principal amount. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

(c) After a default by a borrower, the maximum liability of the fund for a loan guarantee under this chapter is equal to the amount then in default multiplied by a percentage equal to the guaranteed percentage of the loan. Payments received toward satisfaction of a default shall be allocated between the lender and the fund according to the guaranteed

percentage of the loan until the principal balance has been repaid.

(d) The department shall charge a user fee not to exceed one percent of the principal balance of the loan guarantee at the inception of the loan which is guaranteed under this chapter, which shall be paid into the general Fund.

Sec. 45.93.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.93.060. SPECIAL ACCOUNT ESTABLISHED.

(a) There is established as a special account within the forest products business guarantee loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.93.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

Sec. 45.93.070. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of commerce and economic development;

(2) "department" means the Department of Commerce and

Economic Development;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed under the laws of the state for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund;

(5) "depreciable asset" means a kiln, chipping facility, creosote or pressure plant, planer, equipment for precision sawyering, similiar equipment approved by the commissioner designed to enhance the value of timber prouducts for the Alaska, domestic and export markets, and related facilities.

Rep. Pourchot

HCS CSSB 78 (Finance)

FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM

The proposal amends the existing Forest Products Business Loan Gurantee Program which was enacted to allow the employees of the Ketchikan Pulp Corporation to purchase an interest in the pulp mill owned by Louisiana Pacific Corporation. The employees have now decided not to purchase the mill; thus the program is of no further use.

In the meantime, the Governor's Timber Task Force was created with the mission of finding ways to improve the health of the timber industry in Southeast Alaska and to enchance the industry in the Railbelt Area. Only 5-10% of the 110 million board feet annual market for wood products in the Railbelt Area is provided by Alaska wood products. The Task Force estimates that up to 60% of that market could be captured by the Alaska industry if the quality of the products coming from Alaska's sawmills is improved. Pacific Rim purchasers have stated that they will buy more sawn products from Alaska if the quality of the products is improved. In each case the products must be: 1) precision sawn; 2) moisture stabilized; and 3) planed.

This proposal would allow the guarantee of loans made for the purchase of "depreciable assets" and roads. "Depreciable assets" are defined to limit the loans guaranteed under the program to loans for planers, kilns, chippers, precision sawing equipment, and similiar equipment to improve the quality of the sawn products. The loans cannot be made to refinance debt or to purchase assets that could otherwise be financed (such as fork lifts, trucks and other more conventional equipment). In addition, loggers are helped by allowing guarantees to build roads in connection with a timber sale. In short, the loan gurantees are designed to upgrade the products produced by Alaska's saw mills.

There has been a strong effort made to assure that the loans made are commerically reasonable and unlikely to result in default. Under the program, as amended by this bill, the Department of Commerce and Economic Development would be able to guarantee loans for up to 80%, but not more than $2 million per borrower for depreciable assets and $1 million per borrower for road construction. Thus the banks will have a stake in making certain that only good loans are made. The Commissioner gets a second review of the likelihood of repayment when he or she decides whether to provide a guarantee. A 1% fee for the loan quarantee is required.

The following is a section-by-section description of the bill:

SECTION-BY-SECTION

Section 30. This section amends AS 45.94.020 to state that the purpose of the loan guarantee program is to finance depreciable assets and roads. The amendment drops out the provisions in the existing law dealing with the purchase of stock which were specfically for the Ketchikan Pulp Company situation.

Section 31. AS 45.94.030 outlines the powers and duties of the Department of Commerce and Economic Development and the Commissioner. A new subsection (c) has been added to prohibit the Department from making loan gurantees in excess of the unobligated cash in the fund.

AS 45.94.040 is repealed because it is unnecessary in the opinion of the Department of Commerce and Economic Development.

Section 32. This section amends AS 45.94.050(a) to include the requirement in subparagraph (a)(2) that the loan be commercially reasonable. It also requires that a controlling interest in the business be held by Alaska residents. Subparagraph (a)(1) requires that the business maintain its offices and operating facilities exclusively in the State unless it engages in the export of forest products. It also requires that a majority of employees of the business be residents of the State. A new subsection (5) is added requiring that the guarantee be limited to loans for depreciable assets or roads in connection with a timber sale and that the guranteed loans maintain or increase production and employment in the forest products business in the State. A new subsection (6) requires that the portion of the loan not guaranteed by the State be held by a financial institution which meets the approval of the Commissioner.

Section 33. AS 45.94.050(b) is amended by this section to increase the guarantee from 50% to 80% but to limit that guarantee to $2 million per borrower for depreciable assets and $1 million per borrower for roads. The current law sets a $30 million limit. The Department would not be permitted to guarantee loans to refinance debt or to pay interest on the guaranteed portion of the loan. The Department would in no case be able to make loan guarantees in excess of $10,000,000. A new subsection (c) was added to state that the Department may not make loan guarantees in excess of funds available

Section 34. This section amends AS 45.94.050(c) to require that the ratio of the guarantee to the outstanding loan principal stay the same over the term of the loan. This means as the principal amount of the loan goes down so does the amount which the State has guaranteed. Any payment

received after default will be split between the State and the bank in proportion to the guaranteed portion of the loan guaranteed by each.

Section 35. This section adds a new subsection (d) to AS 45.94.050 which charges the borrower a fee not to exceed 1% of the principal balance of the loan guarantee at the inception of the loan. The purpose of subsection (d) is to provide the State a portion of the anticipated lower interest rate resulting from the guarantee.

Section 36. This section adds the standard provisions allowing the Department to dispose of property it acquires as a result of default and establishes a special account to protect the State's security in collateral on guaranteed loans.

In additon, "depreciable asset" is defined in the definition section of AS 45.94.060 to include a kiln, chipping facility, creosote or pressure plant, planer, or precision sawing equipment. This is to make certain the loans are used to further the purpose of the program which is to upgrade the quality of sawn products.

Finally, the program is transferred from the Department of Revenue to the Department of Commerce and Economic Development by changing the definitions in subsections (1) and (2) of AS 45.94.060(1) and (2).

SB 78: Sectional Analysis

Section 1) Makes both technical and policy changes to the present Commercial Fisheries Loan Program. The first substantive change occurs on line 11 of page 2 which repeals subsection pertaining to loans made to "corporations, partnerships, and joint venturers". Section 3 would allow individual fisherman who qualify for loans under 16.10.310 (a) (1) (B) to obtain loans jointly "whether operating as a corporation, partnership, joint venture, or otherwise"

Section also provides statutory authority to permit assumption of loans and repeals language which required consultation between the Dept of F&G and the DCED for all commercial fishing loan regulations.

Also adds language which grants the commissioner authority to consider all sources of a fishermans income when determining a fishermans ability to repay a loan. Currently the commissioner has that authority only with respect to loans for entry permits.

Section 2) Deletes references to "corporations, partnerships, or joint ventures (16.10.310 (a) (1) (C)" consistent with that deletion in section 1).

Section 3) Changes the "Limitations on Loans" section and provides for extensions on the term of loans because of a poor fishing season or adverse market conditions.

Language is also added which changes the loan limits from a "total dollar amount" to a borrower to the total "balances outstanding" to a borrower.

Further, deletes language regarding loans to "associates of the borrower" as all loans will be made to individuals.

Section 4) Currently, the department is able to consider fishing and all other sources of income of an applicant who applies for an entry permit loan under 16.10.310 (a) (1) (A). This bill would extend that authority to "consider all sources of income" for Commercial Fishing Loans

Section 5) Changes the requirements of notification when a debtor defaults on a note which has a permit pledged as security for the note. The mailing notice of default is changed from registered and certified mail to certified and first class mail. Changes the "countdown" provisions for notice of default and adds an additional day for each notice.

Requires that when a permit is pledged to secure a loan the borrower must maintain a current mailing address on file with the Department. Further states that upon evidence of mailing, the receipt of the notice of default by the debtor will be "presumed". This presumption is rebuttable by presentation of evidence by the debtor that the notice was not received and proof of lack of receipt nullifies the notice.

Section also grants the commissioner authority to waive any of the time limits if the department receives a request from the borrower or his representative before the expiration of the time limit for which the waiver is sought.

Section 6) Deletes the provision that the Commercial Fisheries Entry Commission, with the approval of the Department, adopt regulations for the limited entry permit sections of this bill.

Section 7) Provides statutory authority for the department to dispose of property acquired after default or foreclosure of a Comm Fish Loan.

Section 8) Establishes a special "foreclosure" expense account within the fisheries enhancement revolving loan fund. The account is established as a reserve from fund equity and this section also allows the department to dispose of property acquired thru default.

Section 9) Establishes a special foreclosure account for the Alaska WW II veterans revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 10) Establishes a special foreclosure account for the mining loan fund, and allows the department to dispose of property acquired thru default.

Section 11) Establishes a special foreclosure account for the childcare facility revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 12) Establishes a special foreclosure account for the bulk fuel revolving loan fund, and allows the department to dispose of property acquired thru default. Also permits the department to adopt regs to implement this chapter.

Section 13) Establishes the special foreclosure account for the Alternative Energy Revolving Loan Fund, and allows the department to dispose of property acquired thru default.

Section 14) Establishes the special foreclosure account for the Residential Energy Conservation Fund, and allows the department to dispose of property acquired thru default. Also allows the department to adopt regs to implement this program.

Section 15) Establishes a special foreclosure account for the tourism revolving fund, and allows the department to dispose of property acquired thru default.

Section 16) Establishes a special foreclosure account for the small business revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 17) Establishes a special foreclosure account for the historical district revolving loan fund.

Section 18) Makes grammatical changes and defines the scope of the historical district loan program.

Section 19) Provides the state with authority to dispose of property acquired thru default or foreclosure from the historical district loan program.

Section 20) July 1, 1985 effective date.

HOUSE CS FOR CS FOR SENATE BILL NO. 78 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making miscellaneous amendments to state loan programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 16.10.310(a) is amended to read:

(a) The department may

(1) make loans to

(A) individual commercial fishermen who have been state residents for a continuous period of two years immediately preceding the date of application for a loan under AS 16.10.300 - 16.10.370 and have had a crewmember or commercial fishing license under AS 16.05.480 or a permit under AS 16.43 for the year immediately preceding the date of application and any other two of the past five years, and who actively participated in the fishery during those periods, for the purchase of entry permits;

(B) <u>an individual for the repair, restoration, or upgrading of existing vessels and gear, for the purchase of entry permits and gear, and for the construction and purchase of vessels, if the individual</u> [AN INDIVIDUAL WHO] has been a state resident for a continuous period of two years immediately preceding the date of application for a loan under AS 16.1 16.10.370, <u>and either</u> [WHO]

(i) because of lack of transportation or lack of employment opportunities in the area of residence does not have occupational opportunities available other than

commercial fishing; or

(ii) is economically dependent on commercial fishing for a livelihood and for whom commercial fishing has been a traditional way of life [FOR THE INDIVIDUAL] in Alaska [, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF ENTRY PERMITS AND GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS;

(C) CORPORATIONS, PARTNERSHIPS, OR JOINT VENTURES, 100 PERCENT OF WHICH ARE OWNED BY INDIVIDUAL COMMERCIAL FISHERMEN WHO HAVE BEEN STATE RESIDENTS FOR A CONTINUOUS PERIOD OF TWO YEARS IMMEDIATELY PRECEDING THE DATE OF APPLICATION FOR A LOAN UNDER AS 16.10.310(a)(1)(B) AND HAVE HAD A CREWMEMBER OR COMMERCIAL FISHING LICENSE UNDER AS 16.05.480 OR A PERMIT UNDER AS 16.43 FOR THE YEAR IMMEDIATELY PRECEDING THE DATE OF APPLICATION AND ANY OTHER TWO OF THE PAST FIVE YEARS, AND WHO ACTIVELY PARTICIPATED IN THE FISHERY DURING THAT PERIOD, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS];

(2) designate agents and delegate its powers to them as necessary;

(3) adopt regulations necessary to carry out its functions;

(4) establish amortization plans for repayment of loans, which may include extensions for poor fishing seasons or for adverse market conditions for Alaskan products;

(5) enter into agreements with private lending institutions, other state agencies, or agencies of the federal government, to carry out the purposes of AS 16.10.300 - 16.10.370;

(6) enter into agreements with other agencies or organizations to create an outreach program to make loans under AS 16.10.300 -

16.10.370 in rural areas of the state;

(7) allow an assumption of a loan if

(A) the applicant has been a state resident for a continuous period of two years immediately preceding the date of the request for an assumption; and

(B) approval of the assumption would be consistent with the purposes of AS 16.10.300; an applicant for a loan assumption may not be disqualified because the applicant does not meet the loan eligibility requirements of (1) of this subsection;

(8) prequalify loan applicants for a limited entry permit loan and charge a fee not to exceed $200 for prequalification.

* Sec. 2. AS 16.10.310 is amended by adding a new subsection to read:

(c) In determining whether an individual commercial fisherman is reasonably likely to be able to repay a loan made under AS 16.10.300 - 16.10.370, the commissioner shall consider the individual commercial fisherman's income from commercial fishing and from all other sources.

* Sec. 3. AS 16.10.315 is amended to read:

Sec. 16.10.315. ALLOCATION OF LOANS. The department shall allocate at least 10 percent of the money that is appropriated for a state fiscal year to make loans under AS 16.10.310 for loans of $35,000 or less made under AS 16.10.310(a)(1)(B) [AND (C)]. An allocation made under this section terminates on April 15 of the state fiscal year for which the allocation is made.

* Sec. 4. AS 16.10.320(a) is amended to read:

(a) Except as permitted in (h) of this section, a (A) loan under AS 16.10.300 - 16.10.370 [16.10.310 - 16.10.370]

(1) may not exceed a term of 15 years, except for extensions under AS 16.10.310(a)(4);

(2) may not bear interest exceeding 10-1/2 percent;

(3) must [SHALL] be secured by a first priority lien and appropriate security agreement; and

(4) may not exceed 90 percent of the appraised value of the collateral used to secure the loan[, EXCEPT THAT A LOAN GRANTED UNDER AS 16.10.333 FOR THE PURCHASE OF AN ALASKA LIMITED ENTRY PERMIT MAY NOT EXCEED AN AMOUNT DETERMINED IN ACCORDANCE WITH (f) OR (h) OF THIS SECTION].

* Sec. 5. AS 16.10.320(d) is amended to read:

(d) The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(A) may not exceed [A TOTAL OF] $300,000. The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)] may not exceed [A TOTAL OF] $100,000. [A LOAN TO AN ASSOCIATE OF THE BORROWER IS CONSIDERED TO BE A LOAN TO THE BORROWER. FOR THE PURPOSES OF THIS SECTION, "ASSOCIATE OF THE BORROWER" MEANS

(1) A CORPORATION OR OTHER ORGANIZATION OF WHICH THE BORROWER IS AN OFFICER, DIRECTOR OR PARTNER, OR IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE ON ANY CLASS OF EQUITY SECURITIES;

(2) A PERSON WHO IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE OF ANY CLASS OF EQUITY SECURITIES OF THE BORROWER;

(3) A TRUST OR OTHER ESTATE IN WHICH THE BORROWER HAS A SUBSTANTIAL BENEFICIAL INTEREST OR AS TO WHICH THE BORROWER SERVES AS TRUSTEE OR IN A SIMILAR FIDUCIARY CAPACITY.]

* Sec. 6. AS 16.10.320(e) is amended to read:

(e) Two or more individual commercial fishermen who each satisfy the requirements specified in AS 16.10.310(a)(1)(B) may join, whether operating as a corporation, partnership, joint venture, or

otherwise, obtain a commercial fishing loan for the repair, restoration, or upgrading of an existing vessel and gear, for the purchase of gear, and for the construction [OF A FISHING VESSEL] or the purchase of a [AN EXISTING] fishing vessel. Loans granted under this subsection

[(1)] may not exceed the amount specified in (d) of this section multiplied by the number of qualified commercial fishermen applying for the loan [;

(2) MAY NOT EXCEED A TERM OF 15 YEARS;

(3) SHALL BE SECURED BY A FIRST PRIORITY LIEN AND APPROPRIATE SECURITY AGREEMENT;

(4) MAY NOT BEAR INTEREST EXCEEDING 10-1/2 PERCENT; AND

(5) MAY NOT EXCEED 90 PERCENT OF THE APPRAISED VALUE OF THE COLLATERAL USED TO SECURE THE LOAN].

* Sec. 7. AS 16.10.320(i) is amended to read:

(i) If a loan is made to a borrower under AS 16.10.310(a)(1)(A), a subsequent loan may not be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(B) [OR (C)]. If a loan is made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)], a subsequent loan may be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(A) if the total of the balances outstanding on loans received by the borrower [OR THE ASSOCIATE] under AS 16.10.310 does not exceed $300,000.

* Sec. 8. AS 16.10.333(a) is amended to read:

(a) Loans under AS 16.10.310(a) [AS 16.10.320(a)] may be made to an individual commercial fisherman for the purchase of a limited entry permit upon certification by the commission that the fisherman is a person who qualifies as a transferee for the permit under AS 16.43 and

the regulations adopted by the commission.

* Sec. 9. AS 16.10.335 is amended to read:

Sec. 16.10.335. DEFAULT AND FORECLOSURE. (a) If the debtor defaults upon a note for which a limited entry permit has been pledged as security under AS 16.10.333 or [UNDER AS] 16.10.338, the commissioner shall provide the debtor, by both [REGISTERED OR] certified and first class mail sent to the debtor's last known address on file with the commissioner, with a notice of default that [WHICH] includes

(1) a description of the security given for the note including the number assigned to the pledged permit by the commission;

(2) the date upon which the default occurred;

(3) the amount of arrearages as of the date of the notice, the total amount remaining on the note less unearned interest, and the amount of daily interest;

(4) a statement that the debtor may, within 15 days after [OF] the postmark date of the notice, request a hearing to submit evidence showing the debtor has not defaulted;

(5) a statement that the note may be reinstated if brought current within 60 days after [FROM] the postmark date of the notice;

(6) a statement that the note may be paid in full less unearned interest within 120 days after [FROM] the postmark date of the notice;

(7) the place where reinstatement or payment in full may be made; and

(8) a notice in at least 10-point bold type stating: "IMPORTANT: YOUR FAILURE TO REINSTATE OR PAY THIS NOTE IN FULL BY THE DATE SPECIFIED WILL RESULT IN A FORFEITURE OF ALL RIGHTS TO THE PERMIT AND THE POSSIBILITY OF LEGAL ACTION BEING INSTITUTED AGAINST YOU."

(b) In each case of a limited entry permit being pledged as

security under AS 16.10.333 or 16.10.338, the debtor shall maintain on file with the department an address where notice of default is to be sent, if necessary, and where that notice will be timely received by the debtor.

(c) Upon presentation of evidence of mailing in accordance with (a) of this section, the receipt of the notice of default by the debtor will be presumed for all purposes. This presumption is rebuttable by presentation of evidence sufficient to demonstrate lack of receipt of notice through no fault of the debtor. Upon presentation of evidence sufficient to prove lack of receipt of notice through no fault of the debtor, the notice is a nullity.

(d) Upon good cause shown, the commissioner may waive any of the time limits in (a) of this section, if the department receives from the debtor or the debtor's representative a request for the waiver before the expiration of the time limit for which the waiver is sought.

(e) Except as otherwise provided in (c) and (d) of this section, upon [UPON] the debtor's failure to satisfy the note within the time specified in (a)(6) of this section, the debtor's interest in the permit is terminated by operation of law without further notice. Any entry permit cards issued to the debtor under the permit must [SHALL] be cancelled immediately upon receipt by the commission of a certificate of termination containing a copy of the notice required by (a) of this section issued by the commissioner.

* Sec. 10. AS 16.10.339 is amended to read:

Sec. 16.10.339. REGULATIONS. The [COMMISSION WITH THE APPROVAL OF THE] department [,] shall adopt regulations to implement AS 16.10.-333 - 16.10.337.

* Sec. 11. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.355. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.300 - 16.10.370 or former AS 16.10.650 - 16.10.720. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years, but may not be by lease.

* Sec. 12. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.507. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the fisheries enhancement revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 16.10.520 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 13. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.555. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.500 - 16.10.620. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 14. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.085. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that

serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 15. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.095. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the Alaska World War II veterans' revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 26.15.040 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 16. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the mining loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 27.09.010 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 17. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 18. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.242. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the child care facility revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 44.33.245 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 19. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.272. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 44.33.240 - 44.33.275. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 20. AS 44.81.210(a) is amended by adding a new paragraph to read:

(23) make a loan to a person, regardless of residency, if the board of directors of the bank determines that the loan is necessary to preserve the value of property held by the bank as security for a loan that was made under (a)(1) of this section and that is in default.

* Sec. 21. AS 45.87 is amended by adding a new section to read:

Sec. 45.87.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the bulk fuel revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under this chapter or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 22. AS 45.87 is amended by adding new sections to read:

Sec. 45.87.040. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.87.060. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 23. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established, as a special account within the revolving loan fund established under AS 45.88.010, the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.88.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 24. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that

serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 25. AS 45.89 is amended by adding a new section to read:

Sec. 45.89.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the residential energy conservation fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.89.030 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 26. AS 45.89 is amended by adding new sections to read:

Sec. 45.89.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.89.070. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 27. AS 45.90 is amended by adding a new section to read:

Sec. 45.90.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the tourism revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans

partnership, corporation or other business organization formed under the laws of the state for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 34. AS 45.95 is amended by adding a new section to read:

Sec. 45.95.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 35. AS 45.95 is amended by adding a new section to read:

Sec. 45.95.065. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the small business revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.95.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 36. AS 45.98 is amended by adding a new section to read:

Sec. 45.98.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the historical district revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when

necessary to protect the state's security interest in collateral on loans made under this chapter, or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 37. AS 45.98.020 is amended to read:

Sec. 45.98.020. HISTORICAL DISTRICT LOANS. Upon endorsement and plan approval by a local historical district commission established under AS 29.48.108 and the recommendation of a majority of the members of the Historic Sites Advisory Committee, the Department of Commerce and Economic Development may make loans to a person, firm, business or municipality subject to applicable laws for the restoration, improvement, rehabilitation, or maintenance of

(1) a structure which is [(1)] within the boundaries of a historical district established under AS 29.48.110 and [;]

[(2)] identified as important in state or national history as provided for in AS 29.48.110(b); or [AND]

(2) a [(3) ANOTHER] building or structure within a historical district, that is [AND] suitable for superficial modification so that it can conform to the period or motif of the surrounding buildings or structures that are the reason for the area's designation as a historical district.

* Sec. 38. AS 45.98 is amended by adding a new section to read:

Sec. 45.98.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 39. AS 16.10.310(b), 16.10.320(f), and 16.10.335(f) are repealed.

* Sec. 40. This Act takes effect July 1, 1985.

DRAFT

MEMORANDUM

TO: John Hartle

FROM: Joe Darnell

RE: Forest Products Business Loan Guarantee Program Amendments Bill

DATE: April 265, 1985

Pursuant to your request, the following is a description of the amendments we have proposed to the Forest Products Business Loan Guarantee Program.

The amendments being proposed essentially take the existing Forest Products Business Loan Guarantee Program which was enacted to provide employees of the Ketchikan Pulp Corporation with a loan guarantee fund to back up part of a loan to purchase an interest in the pulp mill owned by Louisiana Pacific Corporation in Ketchikan. Since passage of that act in 1984, Louisiana Pacific Corporation has decided to not sell the mill to its employees; thus the purpose of the program as enacted by the Legislature is outdated.

The changes made in the existing Forest Products Business Loan Guarantee Program are designed to convert that program from a one-purpose program to a general business loan guarantee program available to all Alaskan forest products businesses. The loans under this program are to be used for financing the purchase of equipment and facilities that will increase or maintain employment in a forest products business. The intent of the program as drafted is to make it available only to Alaska forest products businesses which are businesses organized for profit and which a majority of the employees of the business are residents of Alaska.

The program would be based on the existing $25 million appropriation made last year from the rainy day account in the general fund to the Forest Products Business Loan Guarantee Fund. Under the program, as amended by this bill, the Department of Revenue may provide a guarantee from the fund for up to 80% of the loan, but it may not guarantee more than $6 million per borrower. A ~~1/4 of~~ 1% user fee for the loan guarantee is provided for in the bill. We recommend that the fee be increased to 1%.

The following is a section-by-section description of the bill as drafted for introduction by Representative Sund:

Section 1. It amends AS 45.94.020 to restate the purpose of the loan guarantee program as described above. The amendment drops out the provisions in the existing law dealing with the purchase of stock ~~and so forth~~ which were designed to deal specifically with the KPC situation.

AS 45.94.030 and .040 are left unchanged by the bill. Section .030 outlines the powers and duties of the department and the commissioner. Section .040 states income from investment of the fund is to go to the general fund.

Section 2. This section amends AS 45.94.050(a) to include the requirement in paragraph (2) of subsection (a) that the loan be commercially reasonable. It also requires that a controlling interest be held by Alaska residents. The Commissioner of Revenue is given discretion to waive this requirement. Section 2 also requires that the business maintain its offices and operating facilities exclusively in the state unless the business engages in export of forest products in which case offices and facilities overseas would be permitted. It also requires that a majority of employees of the business be residents of the state. This adopts one of the major objectives of the bill which is to develop employment in the forest timber industries in Alaska. The section further requires that the business be organized for profit. This points to the other major goal of the bill which is to provide a means for commercially viable timber operations to expand and flourish in the state. A subsection (5) is added which follows up on a purpose behind the legislation that the loan further the maintaining or increasing of production and employment in forest products businesses in the state. A new subsection (6) requires that the portion of the loan not guaranteed by the state be held by a financial institution which meets the approval of the Commissioner.

Section 3. AS 45.94.050(b) is amended by this section to increase the guarantee from 50% to 80% but to limit that guarantee to $6 million per borrower from the $30 million currently provided in the law. As with the existing statute, the Department of Revenue would not be permitted to guarantee the payment of annual interest on the guaranteed portion of the loan. This conforms with other loan programs in the state.

Section 4. This section amends AS 45.94.050 by adding a new subsection (a) to require the charging of a user fee by the Department of Revenue not to exceed 1/4 of 1% for loans guaranteed under this chapter. Section 4 makes a small change in AS 45.94.060 which is the definitions section. The change is to add

to the definition of forest products business that it be organized under the laws of the state. Again, this is to ensure that the business be an Alaska business.

Section 6. This section provides for an effective date immediately in accordance with AS 01.10.070(c). This is the standard effective date provision which provides that the actual effective time for enactment is the day after it is signed by the Governor or the day after the Governor's veto is overridden or on the day after expiration of the period allowed for gubernatorial action by Art. II, §17 of the Alaska Constitution.

Representative Adelheid Herrmann
District 26
Alaska State Legislature
Pouch V (M.S. 3100)
Juneau, Alaska 99811

Dear Representative Herrmann:

We understand you are going to introduce legislation to limit the amount of collateral required by the Department of Commerce and Economic Development for a commercial fishing loan.

This has been a concern of ours for some time also, that some individuals have been required to pledge their limited entry permits as additional collateral for a vessel loan. We understand that the state investment must be protected in the event of a default, but requiring collateral worth $218,000.00 (assuming a vessel valued at $100,000.00 and the latest State Bristol Bay Salmon Drift gillnet evaluation of $118,000.00) for a $90,000 vessel loan seems excessive. In many areas of rural Alaska a permit is the only negotiable collateral people own, but it is also the only means by which these people can support their families.

Therefore we support your efforts to set maximums on the amount of collateral the State requires for boat loans.

Sincerely,

BRISTOL BAY NATIVE ASSOCIATION

(Mrs.) May E. Larson

Chapter 130

AN ACT

Making a special appropriation to the forest products business loan guarantee fund; reappropriating money from the forest products business loan guarantee fund; and providing for an effective date.

Section 1. The sum of $25,000,000 is appropriated from the reserve for emergency operating expenses account in the general fund (AS 37.05.159) to the forest products business loan guarantee fund (AS 45.94).

Sec. 2. Money from the appropriation made by sec. 1 of this Act that is allocated for the purpose of guaranteeing a forest products business loan is reappropriated to the emergency operating expenses account in the general fund (AS 37.05.159) as the principal of the guaranteed loan is paid, in amounts equal to the percentage of the loan guarantee multiplied by the payments on the principal of the loan.

Sec. 3. The unexpended and unobligated portion of the appropriation made by sec. 1 of this Act lapses into the emergency operating expenses account in the general fund (AS 37.05.159) on the earlier of the following dates:

(1) one year from the effective date of this Act;

(2) the date of a proclamation issued by the governor under AS 37.05.159(b)(1) requiring that money in excess of the balance in the emergency operating expenses account be used for operating expenses of state government; the lapse provisions of this paragraph apply only to the amount of the difference between the amount required by the governor's

proclamation and the balance of the emergency operating expense

* Sec. 4. This Act takes effect on the effective date of

establishes a forest products business loan guarantee program.

HOUSE BILL NO. ___

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending a special appropriation to the forest products business loan guarantee fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. Sections 2 and 3, Ch. 130, SLA 1984, are repealed.

*Section 2. This Act takes effect on the effective date of an Act that amends the forest products business loan guarantee program.

IN THE HOUSE BY _____

HOUSE BILL NO. ___

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending the forest products business loan guarantee program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 45.94 is amended to read:

Sec. 45.94.010. ESTABLISHMENT OF LOAN GUARANTEE PROGRAM. The forest products loan guarantee fund is established in the Department of Revenue.

Sec. 45.94.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may use money in the fund to guarantee a loan <u>to a forest products business</u> for the purpose of financing [THE PURCHASE OF 35 PERCENT OR MORE OF THE STOCK OR ASSETS OF A FOREST PRODUCTS BUSINESS BY, ON BEHALF OF OR FOR THE BENEFIT OF THE EMPLOYEES OF THAT BUSINESS,] <u>the purchase of equipment and facilities which will increase employment in the production of a forest products business,</u> as provided in AS 45.94.050.

Sec. 45.94.030. POWERS AND DUTIES OF THE DEPARTMENT.

(a) The commissioner may

(1) designate agents and delegate powers necessary to implement this chapter;

(2) adopt regulations to implement this chapter;

(3) make and execute contracts and other instruments to implement this chapter;

(4) acquire real or personal property by purchase, transfer, or foreclosure when the acquisition is necessary to protect an interest in the fund.

(d) The commissioner shall require that a loan guaranteed by the fund be made by a financial institution authorized to make such loans, that the loan be secured by adequate collateral, and that [THE] net cash flow from the forest products business provides adequate coverage for the debt service on the loan. The applicant shall provide an economic and financial feasibility analysis prepared by a firm acceptable to the department.

Sec. 45.94.040. INVESTMENT OF THE FUND. Money in the fund that is not being used for loan guarantees under this chapter shall be invested as provided for the investment of state treasury surplus under AS 37.10.070. [INCOME FROM INVESTMENT] Fees earned under AS 37.10.050(d) shall be transferred to the emergency operating expenses account of the general fund (AS 37.05.159).

Sec. 45.94.050. CONDITIONS OF LOAN GUARANTEES. (a) The department may guarantee a loan under this chapter if

(1) the term of the loan does not exceed 10 years;

(2) the loan is a commercially reasonable loan, secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan is originated with and serviced by a state or federally chartered financial institution; [AND]

(4) the loan is made to [THE EMPLOYEES OF THE] a forest products business[, TO AN EMPLOYEE STOCK OWNERSHIP TRUST, OR TO ONE OR MORE CORPORATIONS OR OTHER BUSINESS ASSOCIATIONS OR ENTITIES IN WHICH THE CONTROLLING INTEREST IS HELD BY STATE RESIDENTS WHO ARE EMPLOYEES OF THE FOREST PRODUCTS BUSINESS.]; and which meets the following standards:

(A) a controlling interest is held by Alaska residents throughout the term of the loan, unless such requirement shall be waived by the Commissioner;

(B) maintain offices and operating facilities exclusively in this State and transacts business in this State, unless the business is engaged in the export of forest products;

(C) a majority of its employees are residents of Alaska; and

(D) the business is organized for profit.

(5) the loan will increase or maintain the production and employment of the forest products business; and

(6) The portion of the loan not guaranteed by the State shall be held by the originating financial institution throughout

the term of the loan or held by another financial institution approved by the Commissioner.

(b) The department may provide a guarantee from the fund of not more than 80 [FOR UP TO 50] percent of a loan, but may not guarantee [LESS THAN $5,000,000 OR] more than $6,000,000 [$30,000,000] per borrower. The department [MAY] shall not guarantee the payment of annual interest on the guaranteed portion of a loan.

(c) [AFTER A] Upon default by a borrower, the maximum liability of the fund for a loan guarantee under this chapter is equal to the amount then in default multiplied by a percentage equal to the guaranteed percentage of the loan. Payments received toward satisfaction of a default shall be allocated between the lender and the fund according to the guaranteed percentage of the loan until the principal balance has been repaid.

(d) The department shall charge a commercially reasonable user fee for the loan which shall not exceed one-quarter of one percent and the proceeds from which shall be transferred to the emergency operating expenses account of the general fund (AS 37.05.159).

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization [FORMED] <u>incorporated under Alaska law</u> for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

Sec. 2. This Act takes effect immediately in accordance with AS 01.10.070(c).

MEMORANDUM

TO: Representative Rick Uehling

FROM: Jack Kreinheder JK
Research Staff

RE: Set Net Fisheries and Shore Fisheries Leases
Research Request 83-113

Bill Lovell of your staff asked us to provide information on set net fisheries and the shore fisheries leasing program administered by the Department of Natural Resources. This information was to include:

- the number of permit holders in each set net fishery;
- an explanation of the shore fish leasing program, including problems which have occurred with shore fish leases, and proposed changes to the regulations governing the program; and
- average sale prices for set net sites and leases.

Number of Permits

In 1982, there were a total of 4,178 limited entry permits issued for all set net fisheries in Alaska. This figure amounts to about 40 percent of the permits issued for all limited fisheries, including salmon and herring. Table 1 on the following page shows the distribution of set net permits throughout the state and the number and percentage of permits held by residents of Alaska.

The largest set net fisheries in terms of commercial landings are the Bristol Bay and Cook Inlet fisheries. These areas also have the largest number of shore fisheries leases. The only areas which have been opened by the Department of Natural Resources for shore fisheries leases are Bristol Bay, Cook Inlet and Kodiak. The last five fisheries in Table 1 are collectively known as the Arctic-Yukon-Kuskokwim fisheries. These fisheries generally combine commercial and subsistence harvests, and no shore fisheries leases have been issued there.

TABLE 1

SALMON SET GILLNET PERMITS ISSUED IN 1982

Fishery	Total Number of Permits	Number of Permits Held by Alaska Residents	Percentage of Permits Held by Alaska Residents
Yakutat	164	145	88%
Prince William Sound	30	27	90%
Cook Inlet	744	693	93%
Kodiak	186	139	75%
Alaska Peninsula	109	97	89%
Bristol Bay	916	708	77%
Subtotal	2,149	1,809	84%
Upper Yukon	72	71	99%
Kuskokwim	831	829	99%
Kotzebue	219	216	99%
Lower Yukon	707	704	99%
Norton Sound	200	199	99%
Subtotal	2,029	2,019	99%
TOTAL	4,178	3,828	92%

The Shore Fisheries Leasing Program

Shore fish leasing was established by regulation in 1964 (a copy of the regulations is attached). Minor revisions to the regulations were made in 1978. The program is administered by the Division of Land and Water Management in the Department of Natural Resources. In August 1982, the issuance of new leases was suspended pending revision of the program regulations.

Summary of Program[1]

A shore fisheries lease is a lease of tidelands or submerged lands from the State for commercial fishing purposes, including clam digging and set netting for salmon and herring. The lease conveys only a "limited possessory right" in the site being leased. This means that the lease holder can only prevent other people from entering the lease site when he or she is fishing and when other people would interfere with the fishing operation. The main purpose of the lease is to establish the right to fish a particular site.

Shore fisheries leases are not required in order to engage in set net fishing, and most set net fishermen do not have these leases. About 600 leases have been issued, with another 300 applications on file. This compares to the 2,149 permits which have been issued for the main commercial set net fisheries.

When a fisherman applies for a lease, the division staff check land status, determines the tract boundaries, and issues instructions for a survey. Neighboring fishermen and the public are notified of the lease application. If no objections are received, the division issues the lease. If objections or competing claims to the same site occur, the director of the division bases his decision to award the lease on several factors, including:

- the length of time the applicant has been engaged in set netting;
- the proximity of past fishing sites to the land to be leased; and
- the fisherman's present ability to make effective use of the location (must be physically able to fish);

---

[1] Most of the information in this section was obtained from Tom Hawkins, Director of the Division of Land and Water Management. (Telephone 276-2653)

Under the present program, leases have a term of 10 years. In order to retain the lease, the lessee must pay an annual fee of $60, install and maintain a site marker, fish the site at least every other year, and comply with the terms of the lease and Fish and Game regulations.

Problems Associated with Shore Fisheries Leasing

One of the biggest problems with the current shore fisheries leasing program is the backlog of lease applications. At the time applications were suspended in August 1982, there was a backlog of 353 lease applications. Because leases are not required, most lease applications are made because a site conflict has arisen. Therefore, most applications are protested and require extensive research to resolve. The division's budget included only one staff member to process these applications, and this staffer was able to complete only 50-60 leases per year. Thus, the 300 pending applications represent a six year wait for a shore fisheries lease, under the current budget level.

The shorelines on some beaches erode very quickly during storms and change from year to year. As a result, the area that is described in the lease may be submerged and unfishable because it is too far from the current beach. Also, it is very difficult to locate a lease site and resolve boundary disputes, because so little of the coast has been comprehensively surveyed. Although surveys are required for the leases, there are few reference points for surveyors to tie into.

There is much confusion among fishermen and others about the rights of a lease and the enforcement of its provisions. Some people are under the mistaken impression that the shore fishery lease gives them full possession of their site and that they can restrict access to or across the site. Some lessees also assume that they can legally set their nets anywhere on their site, as the lease provisions do not indicate otherwise. However, under ADF&G regulations, a lessee is fishing illegally if his or her nets are set closer than the minimum distance (600 feet in Cook Inlet) to a fishermen already fishing on adjacent unleased land.

Resolution of boundary disputes and "site jumping" is difficult. Officially, the State Troopers and Fish and Wildlife Protection Officers will not interfere in a dispute except with a court order. In practice, their responses vary from a "hands off" policy to direct mediation.

The problems cited above have been most severe for Bristol Bay, because shore fisheries leases have only recently become common there. In Cook Inlet, most of the current leases were approved by the late 1970s.

Proposed Changes to the Leasing Program

In response to the increasing backlog of lease applications and the other leasing problems cited above, the division decided to revise and streamline the shore fisheries leasing program. Applications and the issuance of new leases were suspended as of August 1982, while new regulations for the program were developed. Because of controversy over the new regulations and the change in administrations, the regulations are still in the draft stage and have not been officially proposed or adopted.

The most important changes which would be made by the draft regulations, if adopted, are the following:

- The term of the leases would be reduced from ten years to one year;
- The lessee would be required to personally fish the site for a certain number of fishing periods each year, rather than every other year as under the current program;
- The application and approval process would be simplified. Site surveys would no longer be required, and the applicant would be responsible for providing notice of his application to others. Leases would be issued if no objection is received within 120 days after the site is staked. The process for resolving competing site claims would remain the same as under the current regulations.
- An additional provision would be added specifying that no commercial fisheries activities on unleased lands may interfere with commercial fishing on a shore fishery lease site.

The division has circulated about 2,500 copies of the draft regulations to fishermen, managers and others for comment. There have been a number of comments, but in general, most fishermen who already have leases favor the existing leasing program, while those who would like to obtain a lease tend to prefer the new approach in the draft regulations. Some lease applicants who have already paid for a survey of their fishing sites are displeased that the survey requirement would be dropped under the new regulations.

Value of Set Net Sites

The value of set net sites ranges from nearly zero for the most marginal fishing sites to over $115,000 for the best fishing areas. It was not

possible to determine any fishery-wide average within the time available for this request. Also, the value of sites can fluctuate considerably depending on the strength of the fishery from year to year, just as permit values do. I spoke with two Cook Inlet set netters and an ADF&G biologist for the area to get a general idea of the range of site values in the Inlet.

As you are probably aware, the east shore of Cook Inlet is the most lucrative fishing location, particularly in the Kenai-Clam Gulch area. One fisherman I spoke with has been offered $440,000 for three set net sites near Kenai, not including gear. Three entry permits were included in this price; the permits are currently valued at about $15,000 each. Three sites near Clam Gulch were recently sold as a package for nearly $400,000, again including permits, but no gear.

On the other end of the scale, another fishermen who was contacted paid about $7,500 each for three sites on the west side of Cook Inlet. The valuation method used by fishermen in selling or buying sites differs, but often the average gross earnings over the last five years are used as the major factor.

I hope this information is useful. If you have any questions or would like additional research, please let us know.

11 AAC 64.010. SHORT TITLE. This chapter applies to leasing tide and submerged lands of the state for the purpose of shore fisheries development. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.020. PARTICIPATION IN SHORE FISHERY. No person is required to lease tide and submerged lands to participate in a shore fishery. However,

(1) upon written or verbal notification by a lessee holding a valid shore fishery lease issued under this chapter, a set gill netter shall remove any net or nets from the site or tract of the lessee if the lessee personally begins to commercially fish the lease site; and

(2) no set gill net may be set at less than the minimum distance established by Department of Fish and Game commercial finfish regulations set out in 5 AAC 03 – 5 AAC 39, from a net currently in use by a lessee holding a valid shore fishery lease issued under this chapter. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

11 AAC 64.030. OWNERSHIP. Repealed 3/30/85.

11 AAC 64.040. ADVISORY COMMITTEES. The director will, in his or her discretion, accept recommendations from recognized associations or groups whose members are engaged in the practice of set gill net fishing, or establish an advisory group to recommend resolutions involving application conflicts or protests. (Eff.

4/18/64, Reg. 16; am 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.050. TIDE AND SUBMERGED LAND AVAILABLE FOR LEASING. The director will, in his or her discretion, classify for leasing, under 11 AAC 55, all unappropriated tide and submerged land where set gill net fishing is allowed by the Alaska Department of Fish and Game. After the director designates an area as open to leasing, the director will publicly invite lease applications for all or specific portions of the open areas. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.060. PERMANENT IMPROVEMENTS DISALLOWED. No lessee may erect a permanent installation, building, structure, fixture, or facility upon a lease tract or site. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.061. STAKING AND FILING PERIOD. An applicant may stake a set gill net site or tract, and may file an application for a shore fishery lease, annually from May 1 to September 1. The director will extend, close, suspend, or otherwise modify the period for staking and filing an application if the director determines in writing that it is in the best interests of the state to do so. (Eff. 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.070. SIZE OF LEASE TRACTS. (a) If an applicant has more than one set gill net site, and the area between individual sites is not claimed by another person for set gill net purposes, the applicant may include all such set gill net sites in one lease tract if

(1) the maximum number of set gill net sites included in one tract does not exceed that number allowed by 11 AAC 64.080;

(2) the maximum distance between set gill net sites does not exceed twice the minimum distance, minus one foot, allowed between nets by Department of Fish and Game commercial finfish regulations, set out in 5 AAC 03 – 5 AAC 39, for the local area, unless otherwise determined by the director;

(3) the maximum distance of the tract side line from the nearest set gill net site within the tract does not exceed one-half the distance allowed between set gill net sites by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 – 5 AAC 39; and

(4) the maximum distance between the seaward end line of a tract and the landward end line of an offshore tract is not greater than one-half the distance from the seaward end of the nearest set gill net as determined by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 03 – 5 AAC 39.

(b) In establishing the size and proper location of a tract, the director will, in his or her discretion, require the applicant to survey the tract. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.080. MAXIMUM NUMBER OF NET SITES AND LEASE TRACTS. Except as provided otherwise in this section, the maximum number of sites allowed one applicant is that number established under Department of Fish and Game commercial finfish regulations set out in 5 AAC 03 – 5 AAC 39, except for Cook Inlet, where the maximum is three sites. The sites may be contained in one, two, or three tracts. In an area where, under established custom, the applicant has or currently uses the same set gill net and other gear for high and low water sites, the director will, in his or her discretion, lease additional set gill net sites, if the applicant submits proper justification. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)
Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.090. STAKING OF SITES AND TRACTS. Before submitting an application under 11 AAC 64.260, an applicant must stake each tract by placing the stake at the net anchor point. The location stake must be at least three feet above ground level and must support a sign showing the applicant's name, mailing address, limited entry permit number, and date of staking. For a low water tract, the location stake

may be co-located with the high water stake. The sign on the low water stake must contain the information contained on the high water sign and must be labeled across the top as a low water site with the distance and bearing to the shoreward end of the net or net anchor point noted on the sign. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.100. DISTANCE BETWEEN NET SITES. Repealed 3/30/85.

11 AAC 64.110. PUBLIC RIGHT-OF-WAY. Repealed 8/19/77.

11 AAC 64.120. MULTIPLE LAND USE. Repealed 8/19/77.

11 AAC 64.130. RESTRICTIONS AND RESERVATIONS. Repealed 8/19/77.

11 AAC 64.140. DAMAGES. Repealed 8/19/77.

11 AAC 64.150. MATERIALS. Repealed 8/19/77.

11 AAC 64.160. HERRING SPAWN COVENANT. Repealed 8/19/77.

11 AAC 64.170. WASTE AND INJURY TO LAND. Repealed 8/19/77.

11 AAC 64.180. REASONABLE UTILIZATION. (a) Except as otherwise provided by (b) of this section, reasonable utilization of a site or tract means personally fishing each site or each leased tract for at least four legal fishing periods during the commercial fishing season.

(b) The lessee may refrain from fishing upon any one or all leased tracts for one year, but not for two consecutive years. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.190. FORFEITURE OF PART OR ALL OF LEASE TRACT. Repealed 3/30/85.

11 AAC 64.200. CLOSED AREA. The director will not issue a lease in an area closed to commercial fishing by the Department of Fish and Game. The closure of an area by the Department of Fish and Game will not result in the termination of a lease for failure of reasonable utilization. The closure of an area will not extend the term of an issued lease. The lessee may, however, request an extension of a current valid lease as provided for under 11 AAC 64.391, if the area is reopened to commercial fishing. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.210. CLOSURE OF AREA AFTER LEASE IS ISSUED. Repealed 3/30/85.

11 AAC 64.220. HARDSHIP CLAUSE; WAIVER OF RENTAL. The director will, in his or her discretion, waive the annual rental in the case of substantial injury, illness, call to military service, or legal closure of the fishery. An application for a waiver must be postmarked at least 30 days before the date the annual rental is due. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.230. QUALIFICATIONS OF APPLICANT. An applicant for a lease is qualified if the applicant

(1) is a citizen of the United States and is at least 18 years of age; and

(2) holds a valid limited entry permit or interim-use salmon set net permit for the area within which a lease is requested. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.240. TRUSTEESHIP FOR MINORS. The director will, in his or her discretion, issue a lease in trust for the benefit of a minor who is 10 years of age or older if the minor is otherwise qualified to lease under 11 AAC 64.230. The trust automatically terminates upon the date of the minor's 18th birthday. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.250. APPOINTMENT OF TRUSTEE. A person who is qualified under the laws of Alaska to act as a trustee may apply for approval to act as a trustee for a shore fishery lease on behalf of a minor. The director will issue the lease in the name of an approved trustee, subject to other provisions of this chapter. The trustee does not acquire any rights in the leased area by virtue of this trusteeship. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.260. APPLICATION. (a) An applicant shall file a shore fishery lease application with the department within 30 days after staking a shore fishery lease site. The filing date is determined by the postmark date of the application.

(b) A nonrefundable filing fee, as established by the department's approved fee schedule, must accompany each application.

(c) A shore fishery lease application must contain the following information:

(1) the applicant's name, mailing address, and birthdate;

(2) if the applicant is a minor, the name and mailing address of the trustee;

(3) the applicant's limited entry permit or interim-use salmon set net permit number;

(4) the date the site was staked;

(5) the number of seasons the applicant has commercially fished the site;

(6) the number of years the applicant has participated in a shore fishery;

(7) a description of the lease tract sufficient to locate the tract and sites on the ground and including the township, range, and protracted section in which the site is located, as well as the site's distance and bearing from the shoreward end of the net or net anchor point to a known fixed point, such as a permanent building, monument, or fixed natural feature;

(8) a U.S.G.S. map of not more than 1:63,360 scale showing the location of the site;

(9) a statement that the applicant intends to personally fish the site;

(10) a statement that the applicant has complied with the staking requirements of 11 AAC 64.090 and that the applicant is within legal net distances as established by Department of Fish and Game Commercial Finfish regulations set out in 5 AAC 04 – 5 AAC 39; and

(11) the names and addresses of adjacent right, left, shoreward and seaward set net neighbors; if any.

(d) Upon acceptance of a shore fishery lease application, the division will send the applicant further instructions for completing a shore fishery diagram.

(e) Within 90 days after receipt of the instructions, the applicant shall provide the division with a completed and signed shore fishery diagram.

(f) If an applicant is unable to comply with any of the instructions for completing the shore fishery diagram, the applicant shall submit a notarized affidavit attesting to the reason or the cause for failing to comply. The affidavit will be made part of the lease document.

(g) Failure to provide the information required by this section constitutes grounds for denying the shore fishery lease application. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.270. MOST QUALIFIED APPLICANT. Repealed 8/19/77.

11 AAC 64.280. PROOF OF QUALIFICATION. In addition to the information submitted with the application, the director may request such additional proof of qualification as is deemed necessary to help effect an equitable assignment of the disputed area. Failure to comply with any request for proof of qualification or additional information shall be

reason for the disqualification of an applicant. (Eff. 4/18/64, Reg. 16)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.290. DETERMINATION BY LOT. Repealed 8/19/77.

11 AAC 64.300. TERM OF LEASE. Repealed 8/19/77.

11 AAC 64.301. TERM OF LEASE. Upon the successful completion of all requirements of this chapter, and the resolution of any protest filed, the director will issue a lease for a period not to exceed 10 years. In determining the term of a lease, the director will consider the stability of the beach within the area, as well as any other applicable considerations or factors. (Eff. 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.310. NOTICE AND POSTING. Repealed 8/19/77.

11 AAC 64.320. DEPOSITS. Repealed 8/19/77.

11 AAC 64.330. RIGHTS PRIOR TO LEASING. The filing of an application for a lease shall not in any way vest any right in the applicant to a lease. (Eff. 4/18/64, Reg. 16)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.340. CONDITIONAL USE. Repealed 3/30/85.

11 AAC 64.350. ISSUANCE OF LEASE. Repealed 3/30/85.

11 AAC 64.360. PROPER LOCATION BY THE LESSEE. Repealed 3/30/85.

11 AAC 64.370. ANNUAL RENTAL. Annual rental shall be an approved proprotionate share of the cost of administration of the total of the shore fishery development leasing costs, as determined by the director and concurred in by the commissioner. Annual rental shall be paid in advance of April 15, unless otherwise approved by the director, and shall be prorated from the 15th day of the month in which issued to the 15th day of April of the following year. All leases shall stipulate that the annual rental shall be subject to adjustment by the director at five year intervals and such adjustment is to be based on the administration costs involved, and shall in no way reflect the value of the leasehold. (Eff. 4/18/64, Reg. 16)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.380. RECEIPT OF ANNUAL RENTAL. The first year's rental shall be receipted on the lease; thereafter the director shall immediately issue receipts for all rents paid. (Eff. 4/18/64, Reg. 16)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.390. RENEWAL OF LEASE. Repealed 8/19/77.

11 AAC 64.391. EXTENSION OF LEASE. 90 days before the expiration of a valid lease, the lessee may request an extension of the lease. The director will, in his or her discretion, extend the lease for a period of up to 10 years if no changes in site or tract location have occurred, the beach has remained stable, the lease is in good standing with the department, the lessee remains qualified under 11 AAC 64.230, and no protest of the extension is received. A nonrefundable filing fee, as established by the department's approved fee schedule, must accompany a request for an extension. (Eff. 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.400. REFERENCE TO LEASE. Repealed 8/19/77.

11 AAC 64.410. LEASE TERMINATION. (a) The department will, in its discretion, terminate a lease if

(1) the lessee fails to pay the annual rental;

(2) the director determines that the site is not being used for the purpose for which the lease was issued;

(3) the lessee misrepresented facts or made an error with respect to a material fact in the shore fishery lease application;

(4) the lessee fails to properly locate his tract and sites or fails to properly situate in the tract when commercially fishing;

(5) the lessee fails to maintain a valid limited entry permit or interim-use salmon set net permit; or

(6) utilization of the tract or sites is not in accordance with 11 AAC 64.180;

(b) The director will notify a lessee in writing of the department's intention to terminate a lease under this section. The director will send the notice of termination to the last address provided to the department by the lessee. The notice is considered delivered when deposited in the mail.

(c) A lease termination is effective 30 days after the date of the notice, unless stayed by the commissioner in conjunction with an appeal filed by the lessee under 11 AAC 64.460. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.420. NOTICE OF DEFAULT. Repealed 3/30/85.

11 AAC 64.430. ASSIGNMENT. A lessee may assign a lease to another if

(1) the lease rental payments are current;

(2) the assignee is qualified under 11 AAC 64.230 or 11 AAC 64.240 and holds a valid limited entry permit or interim-use salmon set net permit for the fishery;

(3) the assignee does not currently lease the maximum allowed sites for the fishery;

(4) approval of an assignment will not result in the assignee holding leases for more than the maximum allowable number of sites;

(5) the lessee and assignee complete the required assignment of lease form; and

(6) the director approves the assignment. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.440. SUCCESSION TO APPLICANT'S INTEREST. A person who is legally assigned all rights to another person's lease application succeeds to all rights and privileges of the original lease applicant under this chapter if the assignee submits

(1) a notarized statement setting out the name of the lease applicant, the lease applicant's address of record, the location of the site or sites, the date of lease application acquisition, and the name and address of each of the adjacent site holders, if any; and

(2) a notarized statement by the lease applicant stating the length of time the lease applicant has personally operated the site or sites, and stating that the lease applicant has relinquished to the assignee all rights to and interest in the site or sites. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.450. PROTEST. (a) A person may protest an application for or the location of a shore fishery lease site by mailing a statement of protest to the applicant and to the director. The protest may be filed from the time a site has been staked until the last date for filing a protest, as determined and published in writing by the department. The postmark date of the statement of protest constitutes the date of protest. If a protest is filed, the director will not issue a lease until resolution of the protest.

(b) A statement of protest must be in writing, must be signed by the protester, and must contain

(1) the protester's name and mailing address;

(2) the protester's limited entry permit number or interim-use salmon set net permit, if any;

(3) the applicant's name and address as shown on the staking sign;

(4) a brief statement of reasons why the protester believes that the lease site location is invalid or that the protester is more qualified to fish at the lease site; affidavits may be included to support the reasons set out in the statement; and

(5) a brief statement of the relief requested, which may be either denial of the lease site location, or a determination that the protester is more qualified to fish from the lease site and more entitled to lease the site than is the applicant.

(c) The applicant shall prepare a brief written response rebutting the protester's statement. The applicant shall mail the response to the protester and to the director within 30 days after receiving the statement of protest. Affidavits may be included to support the facts set out in the response.

(d) The director will base a decision resolving a protest on the criteria contained in AS 38.05.082 and on the protest, response, supporting affidavits, and hearing, if one is conducted. The decision constitutes the final departmental action unless it is appealed. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.460. APPEAL. An action, order, or decision made by the director may be appealed to the commissioner. The appeal must

(1) be made in writing;

(2) be filed within 30 calendar days after notice of the director's action;

(3) specify the action or actions to be reviewed by the commissioner; and

(4) specify the grounds urged for the reversal or modification of the decision. (Eff. 4/18/84, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.470. FINALITY OF DECISION. The commissioner will, within 45 calendar days after receipt of the appeal, render a final decision. This final decision is not a bar to any other remedy available to the appellant. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.480. COMMISSIONER'S REJECTION. Repealed 3/30/85.

11 AAC 64.490. DISPUTES OF BOUNDARY LINE LOCATION. In a dispute concerning one or more leased tract locations, the protesting party may request that the director establish or reestablish, by survey, the boundary lines of the tract or tracts in question. The director will, in his or her discretion, require that a survey be performed to determine the location of the boundary lines in dispute. The party or parties at fault shall pay the cost of the entire survey. The department will, in its discretion, terminate the lease of the party or parties at fault if they do not pay the survey costs. (Eff. 4/18/64, Reg. 16; am 3/30/85, Reg. 93)

Authority: AS 38.05.020
AS 38.05.082

11 AAC 64.500. GENERAL PLAT REQUIREMENTS. Repealed 3/27/80.

11 AAC 64.510. PAPER PLAT PROCEDURE AND REQUIREMENTS. Repealed 3/27/80.

11 AAC 64.520. SURVEY REQUIREMENTS. Repealed 3/27/80.

11 AAC 64.530. PRELIMINARY PLAT REQUIREMENTS. Repealed 3/27/80.

11 AAC 64.570. DEFINITIONS. In these regulations, the following terms shall have the meaning indicated unless the context clearly requires a different meaning:

(1) repealed 3/30/85;

(2) "adjacent" means touching or lying in close proximity, as opposed to "contiguous" which requires a common boundary;

(3) "boundary lines" means lines having a course and distance that enclose one tract;

(4) repealed 3/30/85;

(5) repealed 3/30/85;

(6) "commercial fishing" means the taking, fishing for, or possession of fish, with the intent of disposing of them for profit, or by sale, barter, or in commercial channels;

(7) "commercial fishing season" means the locally recognized commercial fishing season opened by field announcement by the Alaska Board of Fish and Game;

(8) "commissioner" means the Commissioner of the Department of Natural Resources, State of Alaska;

(9) "department" means the Department of Natural Resources, State of Alaska;

(10) "director" means the Director of the Division of Lands;

(11) "division" means the Division of Lands within the Department of Natural Resources;

(12) "endline" means that boundary line of any lease tract that is parallel or nearly so with the shoreline;

(13) repealed 3/30/85;

(14) repealed 3/30/85;

(15) "lease" means a surface lease for shore fisheries development issued or held pursuant to these regulations;

(16) repealed 3/30/85;

(17) repealed 3/30/85;

(18) repealed 3/30/85;

(19) "monument" means a natural, physical, artificial, or record monument, as customarily used to appropriately define or mark an area;

(20) "neighbor" means an adjacent commercial fisherman who is to be designated as right or left side, or seaward or shoreward neighbor;

(21) "offshore" means those submerged lands lying seaward from the line of mean low tide;

(22) repealed 3/30/85;

(23) repealed 3/30/85;

(24) repealed 3/30/85;

(25) repealed 3/30/85;

(26) repealed 3/30/85;

(27) repealed 3/30/85;

(28) "site" means set net site, individual set net location, set net fishing site, and set gill net site;

(29) repealed 3/30/85;

(30) "tidelands" are those lands that are periodically covered by tidal waters between the elevation of mean high and mean low tides;

(31) "tract" means a parcel of tidelands leased under this chapter and may include one, two, or three set gill net sites;

(32) repealed 3/30/85;

(33) repealed 3/30/85;

(34) repealed 3/30/85;

(35) "party at fault" means the lessee or lessees who, following a dispute over tract or site boundaries or locations, is determined by the director to be in error;

(36) "permanent" means not capable of being readily dismantled or removed from a site or tract within the 24 hours after notification, without destroying the object dismantled or removed or damaging the site or tract, and does not include set net anchors;

(37) "shore fishery diagram" means a graphic depiction of an applicant's or lessee's site which indicates the relationship of the site to local landmarks and adjacent or neighboring sites.

11 AAC 65.010. APPLICABILITY. This chapter applies to the issuance of personal use cabin permits for unauthorized cabins placed on state land before August 1, 1984. Cabins built on state land after August 1, 1984 will not be authorized. A permit under this chapter does not convey an interest in state land or establish a preference right for the lease or purchase of state land. It is the express intent of this chapter to phase out the use of unauthorized cabins on state land, and where appropriate, convert them to public use. (Eff. 12/16/84, Reg. 92)

Authority: AS 38.04.035 AS 38.05.020
AS 38.04.900 AS 41.21.020

11 AAC 65.020. APPLICATIONS. (a) An application for a permit to use an existing cabin on state land must

(1) be received by the department during a 60-day application period established by the department and announced by public notice; the application period will be open for one time only by geographic location;

(2) be made on a form provided by the department;

(3) be complete and correct to the best of the applicant's knowledge;

(4) contain a description of the cabin and site;

(5) contain a description of the proposed use of the cabin and site;

(6) be signed and dated by the applicant or, in the case of a group of applicants, by the applicant's authorized agent.

(b) An application made under this section must include the following:

(1) a $25 application fee;

(2) identification of the cabin site on a United States Geological Survey map at 1:63,360 scale (1" to 1 mile) or its equivalent;

(3) a photograph (print) of the cabin taken within the past year;

(4) documentation demonstrating historic use and occupancy;

(5) documentation of any prior investments in the cabin; and

(6) any other information required by the director. (Eff. 12/16/84, Reg. 92)

Authority: AS 38.04.035 AS 38.05.020
AS 38.04.900 AS 41.21.020

11 AAC 65.030. APPLICATION FEE. The application fee required by 11 AAC 65.020 is not refundable. However, if the department determines that an application made under this chapter should have been made under a different chapter, the application fee may be applied to an application made under another chapter. (Eff. 12/16/84, Reg. 62)

Authority: AS 38.04.035 AS 38.05.020
AS 38.04.900 AS 41.21.020

11 AAC 65.040. RENEWALS. (a) Application for renewal of a permit must be made in writing at least 90 days, but not more than 180 days, before the expiration of the permit.

(b) A permit will be renewed if the continued use complies with 11 AAC 65.050 – 11 AAC 65.900.

(c) A permit issued and renewed under this chapter is valid only during the lifetime of the original holder of that permit. (Eff. 12/16/84, Reg. 92)

Authority: AS 38.04.035 AS 38.05.020
AS 38.04.900 AS 41.21.020

Section
85. Term of lease
87. Forest Service permittees' leasing preference
90. Removal or reversion of improvements upon termination of leases
95. Subleases
97. Exemption from rental payments on land leased by nonprofit organizations
98. Senior citizens exemption
102. Lessee preference
103. Rights of holder of security interest
105. Periodic rent adjustments

Cross references. — For reservation to which contracts for sale, lease or grant of state land and deeds to state land, properties or interest to state land are subject, see AS 38.05.125.

Sec. 38.05.070. Generally. (a) Land, including tide, submerged or shoreland, to which the state holds title or to which it may become entitled, may be leased, except for the extraction of natural resources, in the manner provided in AS 38.05.070 — 38.05.105.

(b) The director, with the approval of the commissioner, shall determine the land to be leased and the limitations, conditions and terms of the lease. The director shall preserve reasonable and traditional access to state land and water. If the appraised value of the transaction is $5,000 a year or less the director may negotiate a lease for a period not to exceed 10 years, and on the limitations, conditions and terms that the director considers are in the best interests of the state. A lease negotiated under this subsection is not eligible for a preference under AS 38.05.102.

(c) A lease may be issued for a period up to 55 years, if the commissioner determines it to be in the best interests of the state. The commissioner shall consider the useful life of any improvements proposed and approved under AS 38.05.075 in determining the term of the lease. If the commissioner determines that the land or a part of it which is the subject of a grazing lease is not being used for the purpose issued the lease may be declared void. (§ 1 art V ch 169 SLA 1959; am § 21 ch 113 SLA 1981; am §§ 27, 28 ch 152 SLA 1984)

Effect of amendments. — The 1981 amendment added the third sentence of subsection (b).

The 1984 amendment, in subsection (b), inserted the second sentence and, in the third sentence, substituted "$5,000" for "$250," "10" for "5," and "that the director" for "which he" and deleted "without advertisement" following "lease"; and, in subsection (c), substituted "the commissioner determines it to be in the best interests of the state" for "it appears to be in the best interests of the state and if the commissioner approves" in the first sentence, inserted the second sentence, and deleted the former last sentence, which read "However, a nonrenewable lease for school lands may be issued for a period not to exceed 99 years."

NOTES TO DECISIONS

Adjudicatory provisions of the Alaska Administrative Procedure Act (AS 44.62) do not apply to the termination of grazing leases by the state division of lands. McCarrey v. Commissioner of Natural Resources, Sup. Ct. Op. No. 1088 (File No. 2075), 526 P.2d 1353 (1974).

There is no indication in subsection (c), or other provisions which apply to state grazing leases, that requires application of the procedures of the Administrative Procedure Act (AS 44.62). McCarrey v. Commissioner of Natural Resources, Sup. Ct. Op. No. 1088 (File No. 2075), 526 P.2d 1353 (1974).

But state must afford notice and hearing before termination. — While the adjudicatory provisions of the Administrative Procedure Act (AS 44.62) are not applicable, due process considerations lead to the conclusion that it is incumbent upon the state to afford notice and a hearing to ensure due process before a state grazing lease may be terminated for noncompliance. McCarrey v. Commissioner of Natural Resources, Sup. Ct. Op. No. 1088 (File No. 2075), 526 P. 2d 1353 (1974).

Terminating state grazing leases without affording the lessee notice and hearing would undermine both the policy evinced by Alaska Const., art. VIII, and the explicit due process guarantee provided by Alaska Const., art. I, § 7. McCarrey v. Commissioner of Natural Resources, Sup. Ct. Op. No. 1088 (File No. 2075), 526 P.2d 1353 (1974).

Procedure required by due process prior to termination of grazing lease. — See McCarrey v. Commissioner of Natural Resources, Sup. Ct. Op. No. 1088 (File No. 2075), 526 P.2d 1353 (1974).

Quoted in Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Collateral references. — 63 Am. Jur. 2d, Public Lands, §§ 108 to 116; 72 Am. Jur. 2d, States, Territories and Dependencies, §§ 66-70.

73A C.J.S., Public Lands, § 197; 81A C.J.S., States, § 150.

Sec. 38.05.075. Leasing procedures. (a) Except as provided in AS 38.05.087 and this section, leasing shall be made at public auction to the highest qualified bidder as determined by the commissioner. An aggrieved bidder may appeal to the commissioner within five days for a review of the determination. The leasing shall be conducted by the commissioner and the successful bidder shall deposit at the auction the first year's rental or that portion of it that the commissioner requires in accordance with the bid. The commissioner shall require qualified bidders to deposit a sum equal to any survey or appraisal costs reasonably incurred by another qualified bidder acting in accordance with the regulations of the commissioner. If a bidder making a deposit of survey or appraisal costs is determined by the commissioner to be the highest qualified bidder under this subsection, the deposit shall be paid to the unsuccessful bidder who incurred those costs. Any survey or appraisal costs reasonably incurred by a qualified bidder under the regulations of the commissioner or deposited under this subsection must be credited under the first and then subsequent years' rentals. All costs for survey and appraisal shall be approved in advance in writing by the commissioner. The commissioner shall immediately issue a receipt containing a description of the land or interest leased, the price bid, terms

of the lease, and the amount of any credit for survey and appraisal costs to the successful qualified bidder. If the receipt is not accepted in writing by the bidder under this subsection, the commissioner may offer the land for lease again under this subsection. A lease, on a form approved by the attorney general, shall be signed by the successful bidder and by the commissioner within 30 days after the auction.

(b) When a valid existing federal grazing lease is cancelled to allow state selection of the area under lease, the lessee of the land has the preference right to lease the land without competitive bidding for a term equal to that originally granted in the cancelled federal lease and upon terms as favorable to the lessee as those contained in the cancelled federal lease.

(c) The owner or lessee of land that fronts on tide or submerged land of the state is entitled to acquire a lease for the tide and submerged land without competitive bidding if the director determines that

(1) the lease of the tide or submerged land is necessary to facilitate water transportation of goods, services, or resources to or from the owned or leased upland or for another water-dependent purpose;

(2) the proposed use of the tide or submerged land is compatible with the classification of the land and with any applicable land use plan adopted under AS 38.04.065; and

(3) issuance of the lease to the tide or submerged land will not interfere with prior existing rights to the leased land.

(d) If the commissioner issues a lease under (c) of this section, the right of access to the tide and submerged land shall be nonexclusive in the lessee unless the commissioner grants the lessee the exclusive right to use the tide and submerged land.

(e) The commissioner may require prequalification of bidders for a lease to be issued under AS 38.05.070. If the commissioner determines to require prequalification, the procedures established by this section and the notice including pre-qualification requirements required to be given under AS 38.05.945 shall be completed within 75 days of the receipt of the first lease application unless the commissioner grants additional time for the completion of the procedures. Within the 75-day period or the additional time granted by the commissioner, the commissioner shall complete

(1) classification under AS 38.05.300;

(2) the procedures required by AS 38.05.035(e);

(3) any other action required by law for the disposal of the lease to a bidder except survey, appraisal, and the auction.

(f) The commissioner may issue a lease without competitive bidding at the approved, appraised market value of the land determined under AS 38.05.840 if, after completion of the procedures required by (e) of this section, the commissioner determines that there is only one qualified bidder. The commissioner may establish terms and conditions for entry to the land pending survey and appraisal of the land. The

commissioner shall issue the lease as soon as is practicable following the survey and appraisal of the land subject to the provisions of AS 38.05.035(e).

(g) Notice of an auction required under this section shall be made by certified mail to all prequalified bidders.

(h) A person aggrieved by a decision of the commissioner under this section may appeal to the commissioner within five days of the prequalification decision. The decision of the commissioner under this subsection or under AS 38.05.035(e) may be appealed to the superior court. (§ 2 art V ch 169 SLA 1959; am § 10 ch 61 SLA 1960; am § 3 ch 74 SLA 1961; am § 2 ch 26 SLA 1963; am § 1 ch 84 SLA 1965; am § 1 ch 106 SLA 1966; am §§ 29, 30 ch 152 SLA 1984)

Effect of amendments. — The 1984 amendment added subsections (b)-(h) and, in subsection (a), deleted the former third sentence, relating to when a valid existing federal grazing lease was cancelled, inserted the fourth through seventh sentences, and rewrote the remaining language.

NOTES TO DECISIONS

Importance of land resources recognized by constitution. — Alaska Const., art. VIII, reflects the framers' recognition of the importance of Alaska's land resources and of the concomitant necessity for observance of legal safeguards in the disposal or leasing of state lands. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Adherence to legal procedures concerning leasing of state lands. — This section, which accords an aggrieved bidder the right of an administrative appeal, is evidence of the legislature's awareness of the necessity that adherence to legal procedures concerning the leasing of state lands must be insured. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Determinations subject to judicial review. — Determinations of the director of the division of lands and the commissioner of natural resources made under this section of the Alaska Land Act, and regulations promulgated thereunder, are subject to judicial review. This conclusion is reached in light of the text of Alaska Const., art. VIII, § 10, which prohibits leasing of state owned lands unless made pursuant to public notice and other limitations imposed by law. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

The judicial review portions of the Administrative Procedure Act govern leasing procedures conducted by the division of lands under the Alaska Land Act. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Aggrieved bidder has standing to obtain judicial review. — It is consonant with the intent of constitution and with legislative intent that an aggrieved bidder, under this section, have standing to obtain judicial review of alleged violations of his protected interest, as well as to vindicate the public interest in the lawful leasing of Alaska's lands. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Extent of review available. — The provisions of this section pertaining to an aggrieved bidder's right of appeal do not manifest a clear intent that an administrative appeal was intended to be the full extent of review available to an aggrieved bidder. Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Sec. 38.05.076. Leases for pipeline purposes. [Repealed, § 31 ch 3 FSSLA 1973.]

Sec. 38.05.077. Classification and disposal of remote parcels. [Repealed, § 7 ch 103 SLA 1983. For current law see AS 38.09.]

Sec. 38.05.078. Purchase of land in a remote parcel. [Repealed, § 7 ch 103 SLA 1983. For current law see AS 38.09.]

Sec. 38.05.079. Remote cabin permit. (a) After September 1, 1980, the commissioner may issue a permit for the use of remote state land in a municipality for a cabin site if the land was classified for that purpose under former AS 38.05.047(a)(5)(B). After September 1, 1981, the commissioner may issue a permit for the use of remote state land outside a municipality for a cabin site if the land is classified for that purpose under the procedures required by AS 38.05.300 and 38.05.945.

(b) The fee for a remote cabin permit is $100 a year. The commissioner shall establish regulations which specify the application procedures for and the terms and conditions of a remote cabin permit. A permit must be for a term of not less than 25 years, and may be assigned by the original permittee during the term of the permit.

(c) A remote cabin permit may be terminated by the commissioner before the expiration of the term of the permit if a permittee fails to use the land under permit in the manner required by the terms of the permit. After termination of a remote cabin permit, improvements or personal property on the land subject to the permit shall be managed in the same manner as required by AS 38.05.090.

(d) If land subject to a remote cabin permit is offered for sale or long-term lease, the commissioner shall first offer to sell or lease the land to the permittee or the assigns of the permittee. The land shall be sold for its fair market value. (§ 32 ch 85 SLA 1979; am § 98 ch 6 SLA 1984)

Effect of amendments. — The 1984 amendment made a series of technical and internal reference changes throughout subsection (a).

Sec. 38.05.080. Rejection of bids. Before the director signs the lease, the commissioner may reject all bids for leases when the best interest of the state justifies this action. (§ 2 art V ch 169 SLA 1959; am § 10 ch 61 SLA 1960; am § 3 ch 74 SLA 1961)

NOTES TO DECISIONS

Quoted in Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Sec. 38.05.082. Leases for shore fisheries development. (a) The director, with the approval of the commissioner, may lease tide and submerged land for fisheries development. Fisheries development

includes the utilization of shore gill nets or set nets for the taking of fish. Every lease issued under this section shall reserve to the public a right-of-way for access to navigable waters and other tide and submerged land.

(b) The director may classify land as subject to leases for fisheries development, and publicly invite applications for lease of the selected areas. Each application shall be accompanied by an affidavit to the effect that the applicant presently intends to personally utilize the leased area for fishing purposes the following season. If two or more applications are received for the same shore area, the director shall award the lease to the most qualified applicant. In determining the qualifications of applicants, the director shall consider the length of time during which the applicant has been engaged in set netting, the proximity of the past fishing sites of the applicant to the land to be leased, the present ability of the applicant to utilize the location to its maximum potential, and other factors relevant to the equitable assignment of the disputed area. If the director cannot determine a preference between conflicting applicants for the same lease site on the basis of qualifications, the director shall select between the applicants by lot. An aggrieved applicant may appeal to the commissioner within five days for a review of the director's determination.

(c) A lease for set net fishing may be issued for any period not exceeding 10 years. If the commissioner determines that the land is not being utilized for the purpose for which the lease is issued, the lease may be declared void. The director shall establish a reasonable rental for the lease, equal to the administrative costs involved in processing the leasehold applications.

(d) Subleasing and renewals of leases are governed by AS 38.05.095 and 38.05.102.

(e) The lease of submerged land conveys no interest in the water above the land or in the fish in the water. (§ 2 ch 93 SLA 1963; am § 99 ch 6 SLA 1984)

Effect of amendments. — The 1984 amendment changed the internal reference in subsection (d).

Opinions of attorney general. — This section, which authorizes shore fishery leases, does not create an exclusive right of fishery and therefore is not unconstitutional under § 15, art. VIII, of the state constitution. 1983 Op. Att'y Gen. No. 03.

This section can be amended to limit the issuance of state tidelands leases for fisheries development to residents of Alaska. 1983 Op. Att'y Gen. No. 03.

Sec. 38.05.085. Term of lease. (a) The lease shall provide that

(1) for the initial 25-year period of the lease, the lessee shall pay the state a fixed base annual rent to be agreed upon by the parties in compliance with the provisions of this chapter;

(2) the fixed base annual rent to be paid by the lessee shall be readjusted when the initial 25-year period of the lease has expired and, thereafter, every 10 years; and

(3) the readjusted annual rent may not exceed 10 per cent of the value of the property as determined in (b) of this section or 50 per cent more than the amount paid each year during the initial period or the preceding 10-year period, whichever is lower.

(b) When it becomes necessary to determine the fair market value of property as required by (a) of this section, the director shall have the property appraised by a qualified appraiser. If the lessee disagrees with the appraisal obtained by the director, the lessee may appoint a qualified appraiser to make an appraisal of the property in question. If the two appraisers agree upon the fair market value, the determination is binding on the parties. In the event the two appraisers are unable to agree, they shall appoint a third qualified appraiser who shall then make an appraisal of the property in question. When the third appraisal is completed, the two of the three appraisals which are nearest each other in their determination of the fair market value shall be averaged and the resultant sum shall be the fair market value of the property in question and absolutely binding on the parties. All costs incurred in making the appraisals provided for in this subsection shall be borne by the state and the lessee equally.

(c) The lessee shall make advance payments of the annual rent or portion of it as the director, with the approval of the commissioner, may require.

(d) A preference right lessee of grazing or forest land may follow the payment schedule established in the cancelled federal lease or grazing permit if the lessee so desires.

(e) Notice of all actions by the department affecting the rights of a lease or lessee shall be given to the lessee.

(f) A violation of a provision of this chapter or of a term or provision of a lease subjects the lessee to appropriate legal action, including, but not limited to, a forfeiture of the lease.

(g) In this section,

(1) "annual rent" means the amount of rent paid annually determined by multiplying the fair market value by the rental rate computed at the time of the initial 25-year period of the lease or of each subsequent 10-year period of the lease;

(2) "qualified appraiser" means a senior member of the American Institute of Real Estate Appraisers, the Society of Real Estate Appraisers, a person meeting the requirements for certification as an appraiser II by the division of personnel, Department of Administration, or a person qualified according to regulations adopted by the commissioner under the Administrative Procedure Act (AS 44.62);

(3) "rental rate" means the rate, expressed as a percentage of fair market value, which a comparable class of privately owned property would bring in the open market with the same conditions of lease as offered by the state. (§ 3 art V ch 169 SLA 1959; § 11 ch 61 SLA 1960; § 4 ch 74 SLA 1961; am § 9 ch 138 SLA 1977; am §§ 8, 9 ch 182 SLA 1978)

Revisor's notes. — This section was reorganized in 1984 to place the defined terms in alphabetical order.

NOTES TO DECISIONS

Quoted in Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Sec. 38.05.087. Forest Service permittees' leasing preference. (a) Before offering to the public any land for lease which is subject to a valid existing United States Forest Service permit in effect in a state-selected area on the day before the area was tentatively approved for patent to the state, the director shall offer the land for leasing to the permittee at not less than its fair appraised market value before offering it to the general public.

(b) When not in conflict with this section, the provisions of AS 38.05.070 — 38.05.105 apply to leases under this section. (§ 1 ch 26 SLA 1963; am § 3 ch 26 SLA 1979)

Sec. 38.05.090. Removal or reversion of improvements upon termination of leases. (a) Improvements owned by a lessee on state land shall, within 60 days after the termination of the lease, be removed by the lessee if removal will not cause injury or damage to the land. The director may extend the time for removing improvements in cases where hardship is proven. The retiring lessee or permittee may, with the consent of the director, sell improvements to the succeeding lessee or permittee.

(b) If improvements or chattels, or both, having an appraised value exceeding $10,000 as determined by the director are not removed within the time allowed, the improvements or chattels or both shall, upon notice to the lessee, be sold at public sale under the direction of the director. The proceeds of sale inure to the lessee who placed the improvements or chattels on the land after paying to the state all rents due and expenses incurred in making the sale. If there are no other bidders at the sale, the director may bid in the name of the state. The bid money shall be taken from the fund to which the land belongs and the fund shall receive all money or other value subsequently derived from the sale or leasing of the improvements or chattels. The state acquires all the rights that any other purchaser could acquire by reason of the purchase.

(c) If improvements or chattels, or both, having an appraised value of $10,000 or less, as determined by the director, are not removed within the time allowed, they revert to the state and absolute title vests in the state. The preference right lessees of grazing or forest land may follow the provisions for removal of improvements upon termination of the lease as authorized in the cancelled federal lease or permit.

(d) Improvements of the lessee which have become fixtures of the land shall be purchased by the subsequent purchaser or lessee of the land if the improvements were authorized in the former lease or by permit from the director. Upon the termination of a lease, and at additional times which may be necessary, the value of the authorized fixtures remaining on the land shall be set by agreement between the former lessee and the director or, if agreement cannot be reached, by an independent appraisal made at cost to the former lessee.

(e) A notice or offer by the state to sell or lease formerly leased land shall state

(1) the value of the authorized fixtures remaining on the land;

(2) that the purchaser or lessee will be required, as a condition of the sale or lease, to purchase the fixtures from the former lessee for an amount equal to the value specified. (§ 4 art V ch 169 SLA 1959; § 12 ch 61 SLA 1960; § 5 ch 74 SLA 1961; am § 1 ch 140 SLA 1966)

NOTES TO DECISIONS

Cited in Swindel v. Kelly, Sup. Ct. Op. No. 812 (File Nos. 1416, 1418), 499 P.2d 291 (1972).

Collateral references. — 63 Am. Jur. 2d, Public Lands, § 28.
73A C.J.S., Public Lands, § 25.

Sec. 38.05.095. Subleases. (a) Except as provided in (b) of this section, a lessee may sublease or assign the leased land or a portion of it if, after application to the director, the director issues a permit. The director may issue a permit upon a finding that it is in the best interests of the state to do so.

(b) A nonprofit organization that is exempted from paying rent on state land under AS 38.05.810 may not sublease or assign the land or a portion of it on which it has a lease. (§ 5 art V ch 169 SLA 1959; am § 10 ch 182 SLA 1978; am § 29 ch 113 SLA 1981)

Effect of amendments. — The 1981 amendment changed the statutory reference in subsection (b)."

Sec. 38.05.097. Exemption from rental payments on land leased by nonprofit organizations. (a) A nonprofit organization using state land leased by it under AS 38.05.070 — 38.05.105 and 38.05.810 for a youth encampment or similar recreational purpose is exempt from lease rental payments on that land. The nonprofit organization shall meet all other terms and conditions of the lease specified under AS 38.05.070 — 38.05.105 and 38.05.810.

(b) In this section, "nonprofit organization" means nonprofit corporations, associations, clubs, or societies organized and operated exclusively for charitable, religious, scientific, or educational purposes or for the promotion of social welfare and which have received an exemption from the payment of federal income tax.

(c) A nonprofit organization which satisfies the requirements of this section that is using land under a lease in effect before July 1, 1978 may convert its lease to a new lease with terms exempting it from the payment of rent by submitting a written request to the director. (§ 11 ch 182 SLA 1978; am § 30 ch 113 SLA 1981)

Effect of amendments. — The 1981 amendment added "and 38.05.315" (now 38.05.810) preceding "for a youth encampment" in the first sentence of subsection (a).

Sec. 38.05.098. Senior citizens exemption. (a) The real property occupied as a permanent place of abode by a resident 65 years of age or over and leased by that resident from the state in accordance with AS 38.05.070 — 38.05.105 is exempt from the payment of annual lease rent. Only one exemption may be granted for the same property, and, if two or more persons are eligible for an exemption for the same property the parties shall decide between or among themselves which shall receive the benefit of the exemption. An exemption may not be granted for a portion of the leased real property which is used for a purpose other than as the permanent place of abode of the leaseholder.

(b) An exemption may not be granted under this section unless a written application for the exemption on a form provided for by the commissioner is submitted. The leaseholder must submit the application not later than 60 days before the anniversary date of the lease, and shall file a separate application for each lease year for which the exemption is sought. If an application is submitted within the required time and is approved by the commissioner, the commissioner shall allow a rental exemption for the lease year commencing on the anniversary date. The commissioner may at any time require proof of the right to an exemption claimed under this section. (§ 32 ch 85 SLA 1979)

Revisor's notes. — In rewriting subsection (b) to remove personal pronouns, the phrase "in the form he considers necessary" was deleted from the last sentence. AS 38.05.020 gives the commissioner authority to prescribe the form and extent of proof required under this section.

Sec. 38.05.100. Renewal of lease. [Repealed, § 15 ch 257 SLA 1976.]

Sec. 38.05.102. Lessee preference. If land within a leasehold created under AS 38.05.070 — 38.05.105 is offered for sale or long-term lease at the termination of the existing leasehold, the director may, upon a finding that it is in the best interest of the state, allow the

holder in good standing of that leasehold to purchase or lease the land for its appraised fair market value at the time of the sale or long-term lease. (§ 2 ch 36 SLA 1976; am § 7 ch 257 SLA 1976; am § 31 ch 113 SLA 1981; am § 100 ch 6 SLA 1984)

Revisor's notes. — AS 38.05.102 was added by both sec. 2, ch. 36, SLA 1976, and sec. 7, ch. 257, SLA 1976. Since ch. 257 had a later effective date, and contained inconsistent provisions, it was treated as an amendment to the section enacted by ch. 36.

Effect of amendments. — The 1981 amendment substituted "its appraised fair market value at the time of the sale or long-term lease" for "the amount of the high bid received at public auction" near the end of the section.

The 1984 amendment made technical and internal reference changes in the section.

Editor's notes. — AS 38.05.100, referred to at the beginning of the section, was repealed by § 15, ch. 257, SLA 1976.

Sec. 38.05.103. Rights of holder of security interest. (a) If there is a breach or default of a term of a lease or of the provisions of this chapter relating to a lease, the division shall provide written notice of the breach or default by personal service or by registered or certified mail to the lessee and to any holder of record having a security interest in the leased property. The notice shall also make demand upon the lessee to cure or remedy the breach or default within 60 days from the date of receipt of the notice and demand. If a lessee fails to cure or remedy the breach or default within 60 days, or within the additional time which the division may allow for good cause, the state may, subject to (b) of this section, exercise any right which it may have at law or as set out in the lease.

(b) If a lessee fails to cure or remedy a breach or default within the time allowed in (a) of this section, a holder of a security interest who has received notice under (a) of this section may cure or remedy the breach or default if the breach or default can be cured by the payment of money or, if this cannot be done, by performing or undertaking in writing to perform the terms, covenants, restrictions and conditions of the lease capable of performance by the holder. The holder shall act within 60 days from the date of receipt of notice under (a) of this section, or within an additional period as the director may allow for good cause. (§ 10 ch 138 SLA 1977)

Sec. 38.05.105. Periodic rent adjustments. (a) Each lease shall stipulate that at the conclusion of the initial 25-year period of the lease and at intervals of 10 years thereafter the annual rent payment is subject to adjustment. Charges or adjustments shall be based primarily on an adjusted fair market value. However, if the director determines that single-family residential development is the best use of the land, the reappraisal period may be lengthened or the readjustment waived in accordance with regulations adopted by the department. Before a waiver of rent adjustment is issued, the land shall have a current reappraisal. A waiver is valid only if single-family residential

development actually occurs. The regulations adopted under this section shall ensure that the state receives a fair return from the land.

(b) The provisions of AS 38.05.085(b) are applicable to reappraisals of leases required by this section, except that, in determining an adjusted market value,

(1) subject to the provisions of (c) of this section, changes in property value due to governmental actions, including zoning reclassifications, shall be included; and

(2) changes in property value due to private improvements made to the property or other privately owned or leased property since originally entering into the lease shall be excluded.

(c) Changes or adjustments of annual rent on land under lease and used for single-family residential purposes in an area zoned for commercial or other nonresidential uses shall be based on an adjusted fair market value determined by reference to the actual use of the property and not by reference to the other uses permissible under the zoning ordinance. (§ 7 art V ch 169 SLA 1959; am § 1 ch 44 SLA 1964; am § 8 ch 257 SLA 1976; am § 1 ch 267 SLA 1976; am § 11 ch 138 SLA 1977; am §§ 12, 13 ch 182 SLA 1978)

Revisor's notes. — AS 38.05.105(a) was amended by both § 8, ch. 257, SLA 1976, and § 1, ch. 267, SLA 1976. Since the two amendments appear to be inconsistent, and ch. 257 is superseded by ch. 267, only the later enactment has been given effect here.

NOTES TO DECISIONS

Applied in Wessells v. State, Dep't of Hwys., Sup. Ct. Op. No. 1402 (File No. 2834), 562 P.2d 1042 (1977).

Quoted in Alyeska Ski Corp. v. Holdsworth, Sup. Ct. Op. No. 406 (File No. 620), 426 P.2d 1006 (1967).

Sec. 38.05.107. Compensation relating to easements or rights-of-way across state leases. [Repealed, § 1 ch 203 SLA 1975.]

Article 4. Disposal of Timber and Materials.

Section

110. Sale of timber and materials
115. Limitations and conditions of sale
118. Negotiated timber sales in areas of high unemployment
120. Disposal procedure

Sec. 38.05.110. Sale of timber and materials. The commissioner shall provide for cruises of timber and appraisals of other materials in or upon state land and shall assess the supply of and current markets for timber on and other materials in privately owned land in close proximity to state land to determine

(1) the timber and other materials that should be offered for sale, and

(2) the terms of sale of the timber or other materials. (§ 1 art VI ch 169 SLA 1959; am § 31 ch 152 SLA 1984)

Effect of amendments. — The 1984 amendment in the introductory language, substituted "commissioner" for "director" and "state land and shall assess the supply of and current markets for timber on and other materials in privately owned land in close proximity to state land to determine" for "lands and transmit this data to the commissioner, together with his recommendations with respect to" and substituted "that" for "which" in paragraph (1).

NOTES TO DECISIONS

Collateral references. — 63 Am. Jur. 2d, Public Lands, §§ 18, 19.
73A C.J.S., Public Lands, §§ 13 to 16.

Sec. 38.05.115. Limitations and conditions of sale. (a) The commissioner shall determine the timber and other materials to be sold, and the limitations, conditions and terms of sale. The limitations, conditions and terms shall include the utilization, development and maintenance of the sustained yield principle, subject to preference among other beneficial uses. The commissioner may negotiate sales of timber or materials without advertisement and on the limitations, conditions, and terms that are considered to be in the best interests of the state. However, not more than 500 M.B.M. or equivalent other measure of timber or more than 25,000 cubic yards of materials may be sold by nonadvertised, negotiated sale to the same purchaser within a one-year period.

(b) Negotiated sales not exceeding 50 M.B.M. or the equivalent other measure of timber or 2,500 cubic yards of materials are exempt from the provisions of AS 34.15.150.

(c) The limitations of this section are not applicable to timber which becomes state property under the provisions of AS 45.50.210 — 45.50.235. (§ 2 art VI ch 169 SLA 1959; am § 1 ch 66 SLA 1969; am § 9 ch 257 SLA 1976; am §§ 2, 3 ch 73 SLA 1978; am § 32 ch 152 SLA 1984)

Effect of amendments. — The 1984 amendment, in subsection (a), deleted "upon recommendation of the director" following "commissioner" in the first sentence and "subject to the approval of the commissioner" at the end of the third sentence and substituted "commissioner" for "director" and "that are considered to be" for "which he considers are," also in the third sentence.

IN THE HOUSE BY SUND

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the forest products business loan guarantee program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.94.020 is amended to read:

Sec. 45.94.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may use money in the fund to guarantee a loan to a forest products business for the purpose of financing the purchase of equipment and facilities that will increase employment in a forest products business [35 PERCENT OR MORE OF THE STOCK OR ASSETS OF A FOREST PRODUCTS BUSINESS BY, ON BEHALF OF, OR FOR THE BENEFIT OF THE EMPLOYEES OF THAT BUSINESS], as provided in AS 45.94.050.

* Sec. 2. AS 45.94.050(a) is amended to read:

(a) The department may guarantee a loan under this chapter if

(1) the term of the loan does not exceed 10 years;

(2) the loan is commercially reasonable and secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan is originated with and serviced by a state or federally chartered financial institution; [AND]

(4) the loan is made to a [THE EMPLOYEES OF THE] forest products business and

(A) a ~~controlling~~ interest of the business is held by

Alaska [~~residents unless the commissioner waives this requirement;~~]

(B) the business maintains offices and operating facilities exclusively in the state unless the business is engaged in the export of forest products;

(C) a majority of the employees of the business are residents of the state; and

(D) the business is organized for profit;

(5) the loan will increase or maintain production and employment in the forest products business; and

(6) the portion of the loan not guaranteed by the state is held by the originating financial institution or another financial institution approved by the commissioner [, TO AN EMPLOYEE STOCK OWNERSHIP TRUST, OR TO ONE OR MORE CORPORATIONS OR OTHER BUSINESS ASSOCIATIONS OR ENTITIES IN WHICH THE CONTROLLING INTEREST IS HELD BY STATE RESIDENTS WHO ARE EMPLOYEES OF THE FOREST PRODUCTS BUSINESS].

* Sec. 3. AS 45.94.050(b) is amended to read:

(b) The department may provide a guarantee from the fund for up to 80 [50] percent of a loan, but may not guarantee [LESS THAN $5,000,000 OR] more than $6,000,000 [$30,000,000] per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

* Sec. 4. AS 45.94.050 is amended by adding a new subsection to read:

(d) The department shall charge a user fee not to exceed [~~one-quarter of~~] one percent for a loan guarantee under this chapter.

* Sec. 5. AS 45.94.060 is amended to read:

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship,

partnership, corporation or other business organization formed under the laws of the state for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

IN THE SENATE BY THE FINANCE COMMITTEE

CS FOR SENATE BILL NO. 78 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making miscellaneous amendments to state loan programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 16.10.310(a) is amended to read:

(a) The department may

(1) make loans to

(A) individual commercial fishermen who have been state residents for a continuous period of two years immediately preceding the date of application for a loan under AS 16.10.300 - 16.10.370 and have had a crewmember or commercial fishing license under AS 16.05.480 or a permit under AS 16.43 for the year immediately preceding the date of application and any other two of the past five years, and who actively participated in the fishery during those periods, for the purchase of entry permits;

(B) an individual for the repair, restoration, or upgrading of existing vessels and gear, for the purchase of entry permits and gear, and for the construction and purchase of vessels, if the individual [AN INDIVIDUAL WHO] has been a state resident for a continuous period of two years immediately preceding the date of application for a loan under AS 16.10.300 - 16.10.370, and either [WHO]

(i) because of lack of training or lack of employment opportunities in the area of residence does not have occupational opportunities available other than

COMMITTEE COPY

commercial fishing; or

(ii) is economically dependent on commercial fishing for a livelihood and for whom commercial fishing has been a traditional way of life [FOR THE INDIVIDUAL] in Alaska [, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF ENTRY PERMITS AND GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS;

(C) CORPORATIONS, PARTNERSHIPS, OR JOINT VENTURES, 100 PERCENT OF WHICH ARE OWNED BY INDIVIDUAL COMMERCIAL FISHERMEN WHO HAVE BEEN STATE RESIDENTS FOR A CONTINUOUS PERIOD OF TWO YEARS IMMEDIATELY PRECEDING THE DATE OF APPLICATION FOR A LOAN UNDER AS 16.10.310(a)(1)(B) AND HAVE HAD A CREWMEMBER OR COMMERCIAL FISHING LICENSE UNDER AS 16.05.480 OR A PERMIT UNDER AS 16.43 FOR THE YEAR IMMEDIATELY PRECEDING THE DATE OF APPLICATION AND ANY OTHER TWO OF THE PAST FIVE YEARS, AND WHO ACTIVELY PARTICIPATED IN THE FISHERY DURING THAT PERIOD, FOR THE REPAIR, RESTORATION OR UPGRADING OF EXISTING VESSELS AND GEAR, FOR THE PURCHASE OF GEAR, AND FOR THE CONSTRUCTION AND PURCHASE OF VESSELS];

(2) designate agents and delegate its powers to them as necessary;

(3) adopt regulations necessary to carry out its functions;

(4) establish amortization plans for repayment of loans, which may include extensions for poor fishing seasons or for adverse market conditions for Alaskan products;

(5) enter into agreements with private lending intuitions, other state agencies, or agencies of the federal government, to carry out the purposes of AS 16.10.300 - 16.10.370;

(6) enter into agreements with other agencies or organizations to create an outreach program to make loans under AS 16.10.300 -

COMMITTEE COPY

16.10.370 in rural areas of the state;

(7) allow an assumption of a loan if

(A) the applicant has been a state resident for a continuous period of two years immediately preceding the date of the request for an assumption; and

(B) approval of the assumption would be consistent with the purposes of AS 16.10.300; an applicant for a loan assumption may not be disqualified because the applicant does not meet the loan eligibility requirements of (1) of this subsection;

(8) prequalify loan applicants for a limited entry permit loan and charge a fee not to exceed $200 for prequalification.

* Sec. 2. AS 16.10.310 is amended by adding a new subsection to read:

(c) In determining whether an individual commercial fisherman is reasonably likely to be able to repay a loan made under AS 16.10.300 - 16.10.370, the commissioner shall consider the individual commercial fisherman's income from commercial fishing and from all other sources.

* Sec. 3. AS 16.10.315 is amended to read:

Sec. 16.10.315. ALLOCATION OF LOANS. The department shall allocate at least 10 percent of the money that is appropriated for a state fiscal year to make loans under AS 16.10.310 for loans of $35,000 or less made under AS 16.10.310(a)(1)(B) [AND (C)]. An allocation made under this section terminates on April 15 of the state fiscal year for which the allocation is made.

* Sec. 4. AS 16.10.320(a) is amended to read:

(a) Except as permitted in (h) of this section, a [A] loan under AS 16.10.300 - 16.10.370 [16.10.310 - 16.10.370]

(1) may not exceed a term of 15 years, except for extensions under AS 16.10.310(a)(4);

(2) may not bear interest exceeding 10-1/2 percent;

COMMITTEE COPY

(3) must [SHALL] be secured by a first priority lien and appropriate security agreement; and

(4) may not exceed 90 percent of the appraised value of the collateral used to secure the loan[, EXCEPT THAT A LOAN GRANTED UNDER AS 16.10.333 FOR THE PURCHASE OF AN ALASKA LIMITED ENTRY PERMIT MAY NOT EXCEED AN AMOUNT DETERMINED IN ACCORDANCE WITH (f) OR (h) OF THIS SECTION].

* Sec. 5. AS 16.10.320(d) is amended to read:

(d) The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(A) may not exceed [A TOTAL OF] $300,000. The total of balances outstanding on loans [LOANS] made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)] may not exceed [A TOTAL OF] $100,000. [A LOAN TO AN ASSOCIATE OF THE BORROWER IS CONSIDERED TO BE A LOAN TO THE BORROWER. FOR THE PURPOSES OF THIS SECTION, "ASSOCIATE OF THE BORROWER" MEANS

(1) A CORPORATION OR OTHER ORGANIZATION OF WHICH THE BORROWER IS AN OFFICER, DIRECTOR OR PARTNER, OR IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE ON ANY CLASS OF EQUITY SECURITIES;

(2) A PERSON WHO IS, DIRECTLY OR INDIRECTLY, THE BENEFICIAL OWNER OF 10 PERCENT OR MORE OF ANY CLASS OF EQUITY SECURITIES OF THE BORROWER;

(3) A TRUST OR OTHER ESTATE IN WHICH THE BORROWER HAS A SUBSTANTIAL BENEFICIAL INTEREST OR AS TO WHICH THE BORROWER SERVES AS TRUSTEE OR IN A SIMILAR FIDUCIARY CAPACITY.]

* Sec. 6. AS 16.10.320(e) is amended to read:

(e) Two or more individual commercial fishermen who each satisfy the requirements specified in AS 16.10.310(a)(1)(B) may jointly, whether operating as a corporation, partnership, joint venture, or

COMMITTEE COPY

otherwise, obtain a commercial fishing loan for the repair, restoration, or upgrading of an existing vessel and gear, for the purchase of gear, and for the construction [OF A FISHING VESSEL] or the purchase of a [AN EXISTING] fishing vessel. Loans granted under this subsection

[(1)] may not exceed the amount specified in (d) of this section multiplied by the number of qualified commercial fishermen applying for the loan [;

(2) MAY NOT EXCEED A TERM OF 15 YEARS;

(3) SHALL BE SECURED BY A FIRST PRIORITY LIEN AND APPROPRIATE SECURITY AGREEMENT;

(4) MAY NOT BEAR INTEREST EXCEEDING 10-1/2 PERCENT; AND

(5) MAY NOT EXCEED 90 PERCENT OF THE APPRAISED VALUE OF THE COLLATERAL USED TO SECURE THE LOAN].

* Sec. 7. AS 16.10.320(i) is amended to read:

(i) If a loan is made to a borrower under AS 16.10.310(a)(1)(A), a subsequent loan may not be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(B) [OR (C)]. If a loan is made to a borrower under AS 16.10.310(a)(1)(B) [OR (C)], a subsequent loan may be made to the borrower [OR AN ASSOCIATE OF THE BORROWER] under AS 16.10.310(a)(1)(A) if the total of the balances outstanding on loans received by the borrower [OR THE ASSOCIATE] under AS 16.10.310 does not exceed $300,000.

* Sec. 8. AS 16.10.333(a) is amended to read:

(a) Loans under AS 16.10.310(a) [AS 16.10.320(a)] may be made to an individual commercial fisherman for the purchase of a limited entry permit upon certification by the commission that the fisherman is a person who qualifies as a transferee for the permit under AS 16.43 and

the regulations adopted by the commission.

* Sec. 9. AS 16.10.335 is amended to read:

Sec. 16.10.335. DEFAULT AND FORECLOSURE. (a) If the debtor defaults upon a note for which a limited entry permit has been pledged as security under AS 16.10.333 or [UNDER AS] 16.10.338, the commissioner shall provide the debtor, by both [REGISTERED OR] certified and first class mail sent to the debtor's last known address on file with the commissioner, with a notice of default that [WHICH] includes

(1) a description of the security given for the note including the number assigned to the pledged permit by the commission;

(2) the date upon which the default occurred;

(3) the amount of arrearages as of the date of the notice, the total amount remaining on the note less unearned interest, and the amount of daily interest;

(4) a statement that the debtor may, within 15 days after [OF] the postmark date of the notice, request a hearing to submit evidence showing the debtor has not defaulted;

(5) a statement that the note may be reinstated if brought current within 60 days after [FROM] the postmark date of the notice;

(6) a statement that the note may be paid in full less unearned interest within 120 days after [FROM] the postmark date of the notice;

(7) the place where reinstatement or payment in full may be made; and

(8) a notice in at least 10-point bold type stating: "IMPORTANT: YOUR FAILURE TO REINSTATE OR PAY THIS NOTE IN FULL BY THE DATE SPECIFIED WILL RESULT IN A FORFEITURE OF ALL RIGHTS TO THE PERMIT AND THE POSSIBILITY OF LEGAL ACTION BEING INSTITUTED AGAINST YOU."

(b) In each case of a limited entry permit being pledged as

COMMITTEE COPY

security under AS 16.10.333 or 16.10.338, the debtor shall maintain on file with the department an address where notice of default is to be sent, if necessary, and where that notice will be timely received by the debtor.

(c) Upon presentation of evidence of mailing in accordance with (a) of this section, the receipt of the notice of default by the debtor will be presumed for all purposes. This presumption is rebuttable by presentation of evidence sufficient to demonstrate lack of receipt of notice through no fault of the debtor. Upon presentation of evidence sufficient to prove lack of receipt of notice through no fault of the debtor, the notice is a nullity.

(d) Upon good cause shown, the commissioner may waive any of the time limits in (a) of this section, if the department receives from the debtor or the debtor's representative a request for the waiver before the expiration of the time limit for which the waiver is sought.

(e) Except as otherwise provided in (c) and (d) of this section, upon [UPON] the debtor's failure to satisfy the note within the time specified in (a)(6) of this section, the debtor's interest in the permit is terminated by operation of law without further notice. Any entry permit cards issued to the debtor under the permit must [SHALL] be cancelled immediately upon receipt by the commission of a certificate of termination containing a copy of the notice required by (a) of this section issued by the commissioner.

* Sec. 10. AS 16.10.339 is amended to read:

Sec. 16.10.339. REGULATIONS. The [COMMISSION, WITH THE APPROVAL OF THE] department[,] shall adopt regulations to implement AS 16.10.-333 - 16.10.337.

* Sec. 11. AS 16.10 is amended by adding a new section to read:

COMMITTEE COPY

Sec. 16.10.355. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.300 - 16.10.370 or former AS 16.10.650 - 16.10.720. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years, but may not be by lease.

* Sec. 12. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.507. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the fisheries enhancement revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 16.10.520 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 13. AS 16.10 is amended by adding a new section to read:

Sec. 16.10.555. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under AS 16.10.500 - 16.10.620. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 14. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.085. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that

COMMITTEE COPY

serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 15. AS 26.15 is amended by adding a new section to read:

Sec. 26.15.095. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the Alaska World War II veterans' revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 26.15.040 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 16. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the mining loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 27.09.010 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 17. AS 27.09 is amended by adding a new section to read:

Sec. 27.09.055. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

COMMITTEE COPY

* Sec. 18. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.242. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the child care facility revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 44.33.245 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 19. AS 44.33 is amended by adding a new section to read:

Sec. 44.33.272. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under AS 44.33.240 - 44.33.275. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 20. AS 44.81.210(a) is amended by adding a new paragraph to read:

(23) make a loan to a person, regardless of residency, if the board of directors of the bank determines that the loan is necessary to preserve the value of property held by the bank as security for a loan that was made under (a)(1) of this section and that is in default.

* Sec. 21. AS 45.87 is amended by adding a new section to read:

Sec. 45.87.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the bulk fuel revolving loan fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under this chapter or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 22. AS 45.87 is amended by adding new sections to read:

Sec. 45.87.040. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.87.060. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 23. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established, as a special account within the revolving loan fund established under AS 45.88.010, the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.88.020 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 24. AS 45.88 is amended by adding a new section to read:

Sec. 45.88.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The Department of Commerce and Economic Development shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that

COMMITTEE COPY COMMITTEE COPY engrossed

serves the best interests of the state, and may include the amortization of payments over a period of years.

* Sec. 25. AS 45.89 is amended by adding a new section to read:

Sec. 45.89.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the residential energy conservation fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans made under AS 45.89.030 or to defray expenses incurred during foreclosure proceedings after a default by an obligor.

* Sec. 26. AS 45.89 is amended by adding new sections to read:

Sec. 45.89.050. DISPOSAL OF PROPERTY ACQUIRED BY DEFAULT OR FORECLOSURE. The department shall dispose of property acquired through default or foreclosure of a loan made under this chapter. Disposal shall be made in a manner that serves the best interests of the state, and may include the amortization of payments over a period of years.

Sec. 45.89.070. REGULATIONS. The department shall adopt regulations to implement this chapter.

* Sec. 27. AS 45.90 is amended by adding a new section to read:

Sec. 45.90.015. SPECIAL ACCOUNT ESTABLISHED. (a) There is established as a special account within the tourism revolving fund the foreclosure expense account. This account is established as a reserve from fund equity.

(b) The commissioner of commerce and economic development may expend money credited to the foreclosure expense account when necessary to protect the state's security interest in collateral on loans

SB 78: Sectional Analysis

Section 1) Makes both technical and policy changes to the present Commercial Fisheries Loan Program. The first substantive change occurs on line 11 of page 2 which repeals subsection pertaining to loans made to "corporations, partnerships, and joint venturers". Section 3 would allow individual fisherman who qualify for loans under 16.10.310 (a) (1) (B) to obtain loans jointly "whether operating as a corporation, partnership, joint venture, or otherwise"

Section also provides statutory authority to permit assumption of loans and repeals language which required consultation between the Dept of F&G and the DCED for all commercial fishing loan regulations.

Also adds language which grants the commissioner authority to consider all sources of a fishermans income when determining a fishermans ability to repay a loan. Currently the commissioner has that authority only with respect to loans for entry permits.

Section 2) Deletes references to "corporations, partnerships, or joint ventures (16.10.310 (a) (1) (C)" consistent with that deletion in section 1).

Section 3) Changes the "Limitations on Loans" section and provides for extensions on the term of loans because of a poor fishing season or adverse market conditions.

Language is also added which changes the loan limits from a "total dollar amount" to a borrower to the total "balances outstanding" to a borrower.

Further, deletes language regarding loans to "associates of the borrower" as all loans will be made to individuals.

Section 4) Currently, the department is able to consider fishing and all other sources of income of an applicant who applies for an entry permit loan under 16.10.310 (a) (1) (A). This bill would extend that authority to "consider all sources of income" for Commercial Fishing Loans

Section 5) Changes the requirements of notification when a debtor defaults on a note which has a permit pledged as security for the note. The mailing notice of default is changed from registered and certified mail to certified and first class mail. Changes the "countdown" provisions for notice of default and adds an additional day for each notice.

Requires that when a permit is pledged to secure a loan the borrower must maintain a current mailing address on file with the Department. Further states that upon evidence of mailing, the receipt of the notice of default by the debtor will be "presumed". This presumption is rebuttable by presentation of evidence by the debtor that the notice was not received and proof of lack of receipt nullifies the notice.

Section also grants the commissioner authority to waive any of the time limits if the department receives a request from the borrower or his representative before the expiration of the time limit for which the waiver is sought.

Section 6) Deletes the provision that the Commercial Fisheries Entry Commission, with the approval of the Department, adopt regulations for the limited entry permit sections of this bill.

Section 7) Provides statutory authority for the department to dispose of property acquired after default or foreclosure of a Comm Fish Loan.

Section 8) Establishes a special "foreclosure" expense account within the fisheries enhancement revolving loan fund. The account is established as a reserve from fund equity and this section also allows the department to dispose of property acquired thru default.

Section 9) Establishes a special foreclosure account for the Alaska WW II veterans revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 10) Establishes a special foreclosure account for the mining loan fund, and allows the department to dispose of property acquired thru default.

Section 11) Establishes a special foreclosure account for the childcare facility revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 12) Establishes a special foreclosure account for the bulk fuel revolving loan fund, and allows the department to dispose of property acquired thru default. Also permits the department to adopt regs to implement this chapter.

Section 13) Establishes the special foreclosure account for the Alternative Energy Revolving Loan Fund, and allows the department to dispose of property acquired thru default.

Section 14) Establishes the special foreclosure account for the Residential Energy Conservation Fund, and allows the department to dispose of property acquired thru default. Also allows the department to adopt regs to implement this program.

Section 15) Establishes a special foreclosure account for the tourism revolving fund, and allows the department to dispose of property acquired thru default.

Section 16) Establishes a special foreclosure account for the small business revolving loan fund, and allows the department to dispose of property acquired thru default.

Section 17) Establishes a special foreclosure account for the historical district revolving loan fund.

Section 18) Makes grammatical changes and defines the scope of the historical district loan program.

Section 19) Provides the state with authority to dispose of property acquired thru default or foreclosure from the historical district loan program.

Section 20) July 1, 1985 effective date.

IN THE SENATE BY THE RESOURCES COMMITTEE

CS FOR SENATE BILL NO. 479 (Resources)

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to a forest products business loan guarantee program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45 is amended by adding a new chapter to read:

CHAPTER 94. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM.

Sec. 45.94.010. ESTABLISHMENT OF LOAN GUARANTEE FUND. The forest products business loan guarantee fund is established in the Department of Revenue.

Sec. 45.94.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may, in conformity with AS. 45.94.050., use money in the fund to guarantee a loan for the purpose of [financing the purchase of 35 percent or more of the stock or assets of a forest products business by, on behalf of, or for the benefit of the employees of that business, as provided in AS. 45.94.050.] acquiring an interest in a forest products business in the state.

Sec. 45.94.030. POWERS AND DUTIES OF THE DEPARTMENT.

(a) The commissioner may

(1) designate agents and delegate powers necessary to implement this chapter;

(2) adopt regulations to implement this chapter;

(3) make and execute contracts and other instruments to implement this chapter;

(4) acquire real or personal property by purchase, transfer, or foreclosure when the acquisition is necessary to protect an interest in the fund;

(5) receive, and protect against disclosure of, trade secrets or other confidential information reasonably necessary to conduct the review necessary under AS 45.94.050.

(b) The commissioner shall require that a loan guaranteed by the fund be secured by adequate collateral, and that the net cash flow from the forest products business provides adequate coverage for the debt service on the loan. The applicant shall provide a proposed operating plan and an economic and financial feasibility analysis prepared by a firm acceptable to the department.

Sec. 45.94.040. INVESTMENT OF THE FUND. Money in the fund that is not being used for loan guarantees under this chapter shall be invested as provided for the investment of state treasury surplus under AS 37.10.070. Income from investment shall be transferred to the general fund.

Sec. 45.94.050. CONDITIONS OF MAKING A LOAN GUARANTEE.

(a) The department may guarantee a loan under this

chapter [if] under the following conditions:

(1) the term of the loan [does] may not exceed 10 years;

(2) the loan [is] must be secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan [is orginated] must originate with and be serviced by a state or federally chartered financial institution; and

(4) [the loan is made to the employees of the forest products business, to an employee stock ownership trust, or to one or more corporations or other business associations or entities in which the controlling interest is held by state residents who are employees of the forest products business.] The commissioner finds that:

(A) the persons acquiring a legal or beneficial [the] interest are residents of the state and qualified to operate and manage the business;

(B) the interest acquired is not less than 35 percent of the stock or assets of the business; and

(C) the acquisition is necessary for the continued operations of the business; and

(D) on the basis of the financial and feasibility analysis and proposed operating plan submitted under AS 45.94.030(b), the acquisition will materially increase the likelihood of success of the business, and that

the additional debt service will be offset by beneficial operation, cost or management changes;

(b) The department may provide a guarantee from the fund for up to 50 percent of a loan, but may not guarantee less than $5,000,000 or more than $30,000,000 per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

(c) After a default by a borrower, the amount of the maximum liability of the fund for a loan guarantee under this chapter is the percentage of the amount in default specified by the department in the guarantee agreement, multiplied by the amount then in default. Payments received toward satisfaction of a default shall be allocated between the lender and the fund according to the percentage specified by the department in the guarantee agreement until the principal balance has been repaid.

Sec. 45.95.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

Sec. 2. This Act takes effect immediately in accordance with AS. 01.10.070(c).

* Sec. A. Section 1, ch. 171, SLA 1980 is amended to read:

Section 1. The sum of $\underline{\$325,000,000}$ [$350,000,000] is appropriated from the general fund to the Department of Revenue for the reserve for emergency operating expenses account (AS 37.05.159(a)).

* Sec. B. The sum of $25,000,000 is appropriated from the general fund to the Depatment of Revenue for the forest products business loan guarantee fund (AS 45.94).

* Sec. C. The unexpended and unobligated portion of the appropriation made to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act is transferred to the reserve for emergency operating expenses account (AS 37.05.159) on the date of a proclamation issued by the governor under AS 37.05.159(b)(1) to the extent that the amount set out in the governor's proclamation exceeds the amount of money in the reserve for emergency operating expenses account.

* Sec. D. The unexpended and unobligated portion of the appropriation made to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act is transferred to the reserve for emergency operating expenses account (AS 37.05.159).

* Sec. E. Money appropriated to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act that is obligated for the purpose of guaranteeing a loan is transferred to the reserve for emergency operating expenses account when principal payments on the loan are paid. The amount of the transfers shall be the percentage guaranteed as specified by the Department of Revenue in the loan guarantee agreement multiplied by the amount of principal paid.

* Sec. F. Sections A, B, C, and E of this Act take effect on the effective date of an Act entitled "An Act relating to a forest products business loan guarantee program; and providing for an effective date."

* Sec. G. Section D of this Act takes effect one year after the effective date of an Act entitled "An Act relating to a forest products business loan guarantee program, and providing for an effective date."

* Sec. A. Section 1, ch. 171, SLA 1980 as amended by section 4, ch. 34, SLA 1982 is amended to read:

Section 1. The sum of $225,000,000 [$250,000,000] is appropriated from the general fund to the Department of Revenue for the reserve for emergency operating expenses account (AS 37.05.159(a)).

* Sec. B. The sum of $25,000,000 is appropriated from the general fund to the Depatment of Revenue for the forest products business loan guarantee fund (AS 45.94).

* Sec. C. The unexpended and unobligated portion of the appropriation made to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act is transferred to the reserve for emergency operating expenses account (AS 37.05.159) on the date of a proclamation issued by the governor under AS 37.05.159(b)(1) to the extent that the amount set out in the governor's proclamation exceeds the amount of money in the reserve for emergency operating expenses account.

* Sec. D. The unexpended and unobligated portion of the appropriation made to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act is transferred to the reserve for emergency operating expenses account (AS 37.05.159).

* Sec. E. Money appropriated to the forest products business loan guarantee fund (AS 45.94) by sec. B of this Act that is obligated for the purpose of guaranteeing a loan is transferred to the reserve for emergency operating expenses account when principal payments on the loan are paid. The amount of the transfers shall be the percentage guaranteed as specified by the Department of Revenue in the loan guarantee agreement multiplied by the amount of principal paid.

* Sec. F. Sections A, B, C, and E of this Act take effect on the effective date of an Act entitled "An Act relating to a forest products business loan guarantee program; and providing for an effective date."

* Sec. G. Section D of this Act takes effect one year after the effective date of an Act entitled "An Act relating to a forest products business loan guarantee program, and providing for an effective date."

(4) the loan is made to the employees of the forest products business, to an employee stock ownership trust, or to one or more corporations or other business associations or entities in which the employees of the forest products business hold an interest that is equal to or greater than the interest held by the seller of the forest products business.

(b) The department may provide a guarantee from the fund for up to 50 percent of a loan, but may not guarantee less than $5,000,000 or more than $30,000,000 per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

(c) Upon default by a borrower, the amount of the maximum liability of the fund for a loan guarantee under this chapter is the

percentage of the amount in default specified by the department in the guarantee agreement.

Sec. 45.94.055. ADDITIONAL GUARANTEES. Not less than 30 days after the department enters into a contract to guarantee a loan to a borrower under this chapter, the department may enter into a contract to guarantee another loan to that borrower under this chapter.

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU, ALASKA 99811
907 465 3800

MEMORANDUM February 27, 1984

SUBJECT: Sectional analysis of SB 479

TO: Senator Jalmar Kerttula

FROM: Linn H. Asper
Legislative Council

You have asked for a sectional analysis of SB 479, relating to a forest products business loan guarantee program.

*Section 1 establishes the forest products business loan guarantee program and sets conditions for the loan guarantees.

Sec. 45.94.010 establishes the forest products business loan guarantee fund in the Department of Revenue

Sec. 45.94.020 allows the Department of Revenue to use fund money to guarantee a loan for the purchase of 35 percent or more of the stock or assets of a forest products business by the employees of that business.

Sec. 45.94.030 grants the department the powers necessary to administer loan guarantees under the forest products business loan guarantee program, and requires that a loan guaranteed must be secured by adequate collateral.

Sec. 45.94.040 directs the department to invest money from the loan guarantee fund that is not being used to guarantee loans in investments allowed under AS 37.10.070.

Sec. 45.94.050 establishes conditions on a loan guarantee, including maximum and minimum amounts that may be guaranteed, terms of loans guaranteed, security for guaranteed loans, state financial institution participation in the guaranteed loan, and other terms applicable to guaranteed loans.

Sec. 45.94.055 allows the department to guarantee additional loans for a borrower under the terms of the chapter.

Sec. 45.94.060 provides definitions of terms used in the chapter.

Section 2 of the Act provides an immediate effective date.

Re: SB 479

Dear John:

Although I recognize the captioned bill is somewhat controversial, and although I further recognize that Sealaska, for reasons not known or made clear to me, has expressed moderate disapproval of the legislation, I would still appreciate it very much if you could give my boys a day in court, so to speak, by scheduling the bill for a hearing on the merits.

I am told they can hold their running time to no more than 20 minutes.

Obviously, since the livelihoods of some 3,000 to 3,500 people are affected, the legislation does carry a considerable potential impact.

Regards,

Robert H. Ziegler, Sr.

Amendments
to
CS SB 479 (Resources)

1. Add a new section amending AS 45.92.010 to read:

"Sec. 45.92.010. Establishment of Fund. The fishery and forest product revolving loan guarantee fund is established in the Department of Revenue."

2. Add a new section amending AS.45.92.040 to read:

"Sec. 45.92.040. Investment of the Fund. Money in the fund that is not being used for loan guarantees [UNDER THIS CHAPTER] shall be invested as provided for the investment of state treasury surplus under AS 37.10.070. Income from investment shall be transferred to the general fund."

3. Add a new section amending AS 45.92.050(b) to read:

"(b) The department may provide a guarantee from the fund for up to 50 percent of a loan, but may not guarantee more than $15,000,000 per loan or $30,000,000 per borrower under this chapter. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan."

4. Add a new section amending AS 45.92.060(6) to read:

"(6) "fund" means the fishery and forest product revolving loan guarantee fund."

5. Delete sections 45.94.010 and 45.94.040.

6. Amend Sec. 45.94.030(b) to read:

"(b) The commissioner shall require that a loan guaranteed by the fund under this chapter be secured by adequate collateral and that the net cash flow from the forest products business provide adequate coverage for the debt service on the loan. The applicant shall provide an economic and financial feasibility analysis prepared by a firm acceptable to the department."

7. Amend Sec. 45.94.050(b) to read:

"(b) The department may provide a guarantee from a fund for up to 50 percent of a loan, but may not guarantee less than $5,000,000 or more than $30,000,000 per borrower under this chapter. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan."

8. Amend Sec. 45.94.060(4) to read:

"(4) "fund" means the fishery and forest product [S BUSINESS] revolving loan guarantee fund."

Amendments
to
CS SB 479 (Resources)

9. Renumber section 2 as section 3 and add a new section 2 to read:

"Sec. 2. Section 1 of this Act takes effect on the effective date of amendments to sections 2 and 3, ch. 34, SLA 1982."

C.S. SENATE BILL NO. 479

IN THE LEGISLATURE OF THE STATE OF ALASKA

THIRTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to a forest products business loan guarantee program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45 is amended by adding a new chapter to read:

CHAPTER 94. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM.

Sec. 45.94.010. ESTABLISHMENT OF LOAN GUARANTEE FUND. The forest product business loan guarantee fund is established in the Department of Revenue.

Sec. 45.94.020. FOREST PRODUCTS BUSINESS LOAN GUARANTEE PROGRAM. The department may use money in the fund to guarantee a loan for the purpose of financing the purchase of 35 percent or more of the stock or assets of a forest products business by, on behalf of, or for the benefit of the employees of that business, as provided in AS 45.94.-050.

Sec. 45.94.030. POWERS AND DUTIES OF THE DEPARTMENT. (a) The commissioner may

(1) designate agents and delegate powers necessary to implement this chapter;

(2) adopt regulations to implement this chapter;

(3) make and execute contracts and other instruments to implement this chapter;

(4) acquire real or personal property by purchase, transfer, or foreclosure when the acquisition is necessary to protect an

interest in the fund.

(b) The commissioner shall require that a loan guaranteed by the fund be secured by adequate collateral, AND THAT THE NET CASH FLOW FROM THE FOREST PRODUCTS BUSINESS PROVIDE ADEQUATE COVERAGE FOR THE DEBT SERVICE ON THE LOAN. THE APPLICANT SHALL PROVIDE AN ECONOMIC AND FINANCIAL FEASIBILITY ANALYSIS PREPARED BY A FIRM ACCEPTABLE TO THE DEPARTMENT.

1.

Sec. 45.94.040. INVESTMENT OF THE FUND. Money in the fund that is not being used for loan guarantees under this chapter shall be invested as provided for the investment of state treasury surplus under AS 37.10.070. Income from investment shall be transferred to the general fund.

Sec. 45.94.050. CONDITIONS OF LOAN GUARANTEES. (a) The department may guarantee a loan under this chapter if

(1) the term of the loan does not exceed 10 years;

(2) the loan is secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

2.

(3) the loan is originated with and serviced by [the Alaska Commercial Fishing and Agriculture Bank, or by a state or federally chartered financial institution located in the state]; and

(4) the loan is made to the employees of the forest products business, to an employee stock ownership trust, or to one or more corporations or other business associations or entities in which

3. CONTROLLING INTEREST IS HELD BY STATE RESIDENTS WHO ARE

the employees of the forest products business [hold an interest that is equal to or greater than the interest held by the seller of the forest products business].

(b) The department may provide a guarantee from the fund for up to 50 percent of a loan, but may not guarantee less than $5,000,000 or more than $30,000,000 per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

4. AT ANY TIME FOLLOWING

(c) ~~Upon~~ default by a borrower, the amount of the maximum liability of the fund for a loan guarantee under this chapter is the

percentage of the amount in default specified by the department in the guarantee agreement., multiplied by the amount then in default. Any amounts received in satisfaction of a default shall be share between the lender and the fund according to the percentage specified by the Department in the guarantee agreement until all principal has been repaid.

5. [Sec. 45.94.055. ADDITIONAL GUARANTEES. Not less than 30 days after the department enters into a contract to guarantee a loan to a borrower under this chapter, the department may enter into a contract to guarantee another loan to that borrower under this chapter.]

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

(2) the loan is secured by the real or personal property, inventory or accounts receivable of the forest products business, or by other collateral acceptable to the department;

(3) the loan is originated with and serviced by a state or federally chartered financial institution; and

(4) the loan is made to the employees of the forest products business, to an employee stock ownership trust, or to one or more corporations or other business associations or entities in which the controlling interest is held by state residents who are employees of the forest products business.

(b) The department may provide a guarantee from the fund for up to 50 percent of a loan, but may not guarantee less than $5,000,000 or more than $30,000,000 per borrower. The department may not guarantee the payment of annual interest on the guaranteed portion of a loan.

(c) After a default by a borrower, the amount of the maximum liability of the fund for a loan guarantee under this chapter is the percentage of the amount in default specified by the department in the guarantee agreement, multiplied by the amount then in default. Payments received toward satisfaction of a default shall be allocated between the lender and the fund according to the percentage specified by the department in the guarantee agreement until the principal balance has been repaid.

Sec. 45.94.060. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of revenue;

(2) "department" means the Department of Revenue;

(3) "forest products business" means a sole proprietorship, partnership, corporation or other business organization formed for the purpose of harvesting or processing timber or other forest resources;

(4) "fund" means the forest products business loan guarantee fund.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Department of Commerce & Economic Development / POSITION PAPER

Revised in latter part

TESTIMONY CONCERNING SB 479
SENATE LABOR AND COMMERCE COMMITTEE
MARCH 1, 1984

SB 479: "An Act relating to a forest products business loan guarantee program; and providing for an effective date."

I. We share with you the deep concern over the grave situation facing all aspects of the Southeast timber industry. We are aware the larger mills must operate in order for the economics of the small operators to function. We have evidenced our concern by:

   A. Meeting with involved parties and participating in their presentations.

   B. Meeting with other departments and agencies of the State attempting to arrive at mutually agreeable and reasonable environmental controls.

   C. Causing to be performed overview studies focused on the Southeast timber situation. More studies and solution alternatives will be offered.

II. Our view on this bill is that it offers a solution, but it may not be aimed at the right problems.

   A. The problems of the larger mills' operation appear to be:

      1. Markets for their product both as to volume price and stability.

      2. Raw material supply.

      3. Environmental and operating regulations.

      4. Labor costs and efficiency.

III. This bill offers a means of transfer of ownership, but that may be only a transfer of the problems from one group to another.

Our view is that the State's assets should be used to solve economic problems to the benefit of our citizens. But before we put our citizens and the State more at risk by freezing staff assets in a guarantee, we should perhaps assist in applying the State's assets in solving the major problems.

J. Vincent O'Reilly, Deputy Commissioner

Portland, Oregon 97204

Attention: Mr. Harry A. Merlo, President

Re: Ketchikan Pulp Company
Kenai Lumber Company

Gentlemen:

This letter of intent is to confirm the basic terms and conditions of an agreement in principle between the KPC-Employees ESOT Study Committee, Inc., on behalf of an Employee Stock Ownership Trust (the "ESOT") to be established by Ketchikan Pulp Company ("KPC") and Louisiana-Pacific Corporation ("LP").

The agreement in principle is that LP will sell and the ESOT will purchase five-ninths (5/9) of the outstanding capital stock of KPC (the "ESOT-KPC Stock") on the following terms and conditions:

1. Price. The price for the ESOT-KPC Stock shall be $50-million.

2. Payment. The ESOT will pay for the ESOT-KPC Stock as follows:

a.	Cash at closing	$40,000,000
b.	Public Offering Note	5,000,000
c.	Subordinated Note	5,000,000

3. Financing.

a. It is anticipated that the $40-million payable at closing will be financed by the ESOT from the

proceeds of the senior debt (the "Senior Debt") consisting of loans to the ESOT from commercial banks or other financial institutions. On or before May 1, 1984, the ESOT shall have obtained from a commercial bank or banks or other financial institutions, binding commitments to provide (i) the Senior Debt; (ii) a working capital line of credit for KPC in the amount of $20-million, with amortization, interest rates and other terms acceptable to the ESOT; and (iii) a standby credit in the amount of $5-million to assure timely payment of the Public Offering Note.

b. The Senior Debt shall be secured by security interests granted by the ESOT and KPC with respect to all assets of KPC except its inventories and accounts receivable. KPC's working capital line of credit in effect from time to time shall be secured solely by security interests granted by KPC in its inventories and accounts receivable.

c. Subject to whatever restrictions exist in connection with the Senior Debt, KPC shall have the right from time to time to increase its working capital line of credit.

4. The Public Offering Note. The Public Offering Note shall not bear interest and shall be payable in full on December 31, 1984. The Public Offering Note may be prepaid without penalty at any time in whole or in part and will be secured by security interests granted by the ESOT and KPC to LP with respect to all assets of KPC, which security interests shall be subordinate to (a) the security interests to be granted to holders of the Senior Debt; (b) the security interests to be granted by KPC to lenders under its working capital line of credit in inventories and accounts receivable; (c) the security interests to be granted to LP to secure the unpaid balance of the Subordinated Note (the "LP Note"); and (d) the security interest heretofore granted by KPC in connection with Alaska Industrial Development Authority ("AIDA") Pollution Control Project as defined in a financing agreement dated October 1, 1983 between AIDA and KPC.

5. The LP Note.

a. For a period of 10 years the LP Note will bear interest at a rate per annum equal to the lesser of the average prime rate of Bank of America National Trust and Savings Association ("B of A") during the 90-day period ending on the closing date plus 3 percent, or 15 percent. Except as provided in subparagraph c herein, no principal or interest will be payable on the LP Note during the first 10 years of its term. On the tenth anniversary date of the LP Note, the principal amount of the LP Note shall become an amount equal to $5 million plus the amount of deferred interest (not compounded) theretofore accrued on the LP Note less the amount of any prepayments thereon pursuant to subparagraph c herein. The recomputed principal amount of the LP Note will bear interest at a rate per annum equal to the lesser of (i) the average prime rate of B of A during the 90-day period ending on such anniversary date plus 1 1/2 percent; or (ii) 14 percent, and shall be payable in 20 equal semi-annual payments including interest. Such payments shall be due and payable on the 31st day of December and the 30th day of April in each year, commencing December 31, 1994.

b. The prime rate of B of A shall be defined to mean the rate of interest publicly announced from time to time by B of A in San Francisco, California, as its prime rate, with any change in such prime rate to take effect on the day specified in the public announcement of such change.

c. The LP Note may be prepaid without penalty in whole or in part at any time. In addition, the ESOT shall be obligated to prepay on the LP Note the amount, if any, by which the proceeds from the public offering described in paragraph 6 hereof exceed $5 million. Any prepayment upon the LP Note shall be applied first to accrued interest and then to principal and shall reduce proportionately each of the semi-annual payments of principal and interest payable on the LP Note subsequent to the date of prepayment.

d. The LP Note will be secured by security interests granted by the ESOT and KPC to LP with respect to all assets of KPC, which security interests shall be subordinate to (i) the security interests to be granted to holders of the Senior Debt; (ii) the security interests to be granted by KPC to lenders under its working capital line of credit in its inventories and accounts receivable; and (iii) the security interest heretofore granted by KPC in connection with Alaska Industrial Development Authority ("AIDA") Pollution Control Project as defined in a financing agreement dated October 1, 1983 between AIDA and KPC.

6. Public Offering. As soon as practicable but conditioned upon the consummation of the ESOT's purchase of the ESOT-KPC Stock, one-ninth (1/9) of the KPC Stock will be made the subject of a registration statement with the Securities and Exchange Commission or, at KPC's option, its intrastate Alaska counterpart, pursuant to which the KPC Stock so registered ("Public KPC Stock") will be offered for sale by the ESOT at a price at least equal to the price per share paid by the ESOT for the KPC Stock purchased from LP. All expenses of the offering, including underwriting expenses, will be paid by KPC. On or before the 15th day of each month during the public offering period, the proceeds from the sale of Public KPC Stock during the preceding calendar month will be remitted to LP and applied first to the payment of the Public Offering Note and the proceeds remaining, if any, shall be applied as a prepayment against the LP Note.

7. Disposition of KPC Stock by LP.

a. LP may at any time or from time to time sell all or any portion of the KPC Stock retained by it (the "LP-KPC Stock") in accordance with any applicable securities or other regulations; provided however, (i) that any single purchaser (including affiliates) of one-third (1/3) or more of the LP-KPC Stock agrees to be bound by the undertakings herein contemplated, and (ii) the ESOT or its nominee or other purchaser designated by it shall have a right of first refusal to purchase KPC Stock so offered by LP except in the case of a public offering of such stock by LP.

b. The ESOT and LP agree that on two occasions (the first of which shall in no event occur earlier than 18 months following the closing date), LP may require KPC to register all or a portion of the LP-KPC Stock at LP's sole cost and expense, to qualify LP's KPC Stock for sale in those jurisdictions requested by LP at a time determined by LP. In addition, at LP's sole cost and expense, KPC will undertake to file one additional registration statement for the balance of LP's shares of KPC Stock as shall not theretofore have been registered. The foregoing notwithstanding, LP may not make such a request pursuant to the foregoing for any number of shares which represents less than 25 percent of the KPC shares then held by it.

8. Voting Agreement. The ESOT and LP will at closing enter into a Voting Agreement, each commiting the other, with respect to all shares of KPC Stock held by each (unless either party's holdings directly or indirectly represent less than 20 percent of the total outstanding KPC Stock) to vote their shares to elect nine directors, three of which will be nominated by LP and six of which will be nominated by the ESOT which will include the Chief Executive Officer of KPC, two salaried and three hourly employees of KPC.

9. Standstill Agreement. The ESOT and LP will at closing enter into an agreement to the effect that for a period of 20 years, LP will not directly or indirectly acquire or reacquire from any source additional shares of KPC Stock nor will it seek, accept or exercise any voting or proxy rights with respect to additional KPC Stock. The foregoing notwithstanding, if (a) the ESOT defaults upon the Senior Debt and if (b) holders of the Senior Debt declare the Senior Debt due and payable or initiate foreclosure pursuant to the terms of the Senior Debt undertakings, and if (c) such default is not cured or waived on terms acceptable to KPC's board of directors, then LP shall have the right, but not the obligation, to assume the Senior Debt (i) by surrender to the ESOT and cancellation of the LP Note; and (ii) by payment to the ESOT of a sum equal to the amount of Senior Debt principal payments theretofore made by the ESOT, less an amount (Reduction Amount) calculated by multiplying such Senior Debt principal payments by the ratio obtained by dividing the number

of ESOT-KPC shares theretofore distributed to ESOT participants by the original number of ESOT-KPC shares less the number of such shares theretofore sold to the public, and (iii) by offering to purchase from ESOT participants ESOT-KPC shares theretofore distributed to and held by them at a price per share calculated by dividing the Reduction Amount by the number of ESOT-KPC shares theretofore distributed to ESOT participants. In consideration of such Senior Debt assumption the ESOT will assign to LP all of the undistributed ESOT-KPC shares. If such Senior Debt assumption shall occur as herein provided, then upon its occurrence, the Standstill Agreement shall terminate.

10. Marketing. Between the date hereof and closing, KPC and LP will discuss and negotiate in good faith to determine the role (if any) and terms upon which LP should or could play in the post-closing marketing of products produced by KPC.

11. Preclosing Operating Plan. On or before March 15, 1984, LP and KPC shall agree to a preclosing operating plan. The operating plan will specify the levels of receivables; log, chip, pulp and other inventories; accounts payable; intercompany accounts and other current assets and liabilities.

12. Establishment of the ESOT. The Committee will cause the ESOT to be formed on or before May 1, 1984. The ESOT shall meet the requirements of the Internal Revenue Code and the Employee Retirement Income Security Act.

13. Definitive Agreement.

a. On or before May 1, 1984, LP and the ESOT will enter into a definitive agreement containing the terms and conditions included in this letter of intent and other covenants, warranties, representations, terms and conditions to which the parties shall agree. Counsel for LP shall prepare the initial draft of the definitive agreement.

b. The definitive agreement shall provide for the assignment by LP to KPC, all of the outstanding stock of Kenai Lumber Company.

14. Opinion. On or before the closing date, the ESOT shall have received an opinion from Salomon Brothers Inc satisfactory to the ESOT regarding (a) fairness to the ESOT, from a financial point of view, of the consideration to be paid by the ESOT; and (b) the financial viability of KPC as an independent company following consummation of the transaction.

15. Disclosure Statement. On or before June 1, 1984, (a) the Committee shall prepare a disclosure statement describing the transaction and related matters; and (b) the disclosure statement shall be distributed to the KPC employees and any required vote by KPC employees with respect to any part of the transaction or any related matter shall be completed. The disclosure statement shall be subject to approval by LP, which approval shall not be unreasonably withheld.

16. Other Conditions.

a. Regulatory Approvals. Prior to closing, all required governmental, regulatory and lender approvals shall have been obtained.

b. Compensation Expenses. Effective not later than the closing date, there shall have been implemented reductions in annual wage and compensation expenses as may be necessary in order to obtain a firm Senior Debt commitment (which reduction is currently anticipated to be not less than $6,700,000). Such reduction shall have been accomplished and approved in compliance with applicable collective bargaining laws and agreements.

17. Closing. The closing of the transaction contemplated by this letter of intent shall take place in Seattle, Washington on June 30, 1984, or on such other date as shall be agreed upon by the parties (the "closing date").

It is understood that this letter reflects an agreement in principle only and, unless and until the transaction contemplated hereby is evidenced by a definitive agreement between LP and the ESOT which has been duly authorized by the Committee, the trustees of the ESOT and the board of the directors of LP, neither the Committee, the ESOT nor LP shall have any legal obligations hereunder. The date by which any action is to be accomplished pursuant to this letter may be changed by agreement between the parties.

If the foregoing accurately expresses the basic terms and conditions of our agreement in principle, please so indicate by signing and returning the enclosed copy of this letter.

Very truly yours,

KPC - EMPLOYEES ESOT STUDY COMMITTEE, INC.

CS SB 479 (Res)

1. Department of Revenue amendment to require that an applicant show it can service a loan.

2. The original language referencing the Commercial Fishing and Agriculture Bank was pulled from current statute on Fish-Pac financing. It is not appropriate in this bill.

3. Clarifies that the controlling interest in corporations that apply for a loan guarantee must be held by state residents.

4. Department of Revenue amendment clarifying how the State's investment is protected in case of default by the borrower.

5. Deletes the provision regarding subsequent guarantees.

March 21, 1984

The Honorable Bill Sheffield
Governor of the State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

Sealaska Corporation has been following with keen interest the progress of HB 627 and SB 479, which establish a "forest products business loan guarantee program" in the Department of Revenue. As you know, this legislation is in specific response to the decision of Louisiana Pacific Corporation to close its operations in Alaska, and its attempt to sell a controlling interest in its Alaska subsidiary (LPK) to an Employee Stock Ownership Trust (ESOT). If this stock sale does not occur, Louisiana Pacific would close its facilities, which would cause severe hardship to Ketchikan.

Presently, the entire forest products industry in Alaska is suffering. World markets are soft, the strong dollar and high interest rates doubly hurt exporters of Alaska forest products, and we find it increasingly difficult to operate profitably in a world commodity market against foreign and domestic competition. The Alaska dissolving pulp industry is hurt not only by these factors, but also by the fact that the market for that product is a mature (some say declining) market, and that recent entry by large subsidized foreign competition has fundamentally changed the economic viability of facilities like Alaska's. Louisiana Pacific has realized this to the extent that they have made the decision to close their Alaska facilities. Alaska Lumber & Pulp Company, and with them the cities of Sitka and Wrangell, are also laboring under very tenuous circumstances. Certainly they require the State's financial assistance as desperately as does Louisiana Pacific.

We empathize strongly with LPK employees and with the people of Ketchikan, and applaud their courageous actions and hard work in attempting to fashion a transaction to keep LPK's facilities operating, paying local taxes, and employing one-third of Ketchikan's workforce. We sincerely hope that they can successfully purchase the mills and run them at a profit where Louisiana Pacific has failed.

Nevertheless, the proposed involvement of the State as an equity loan guarantor does raise some fundamental philosophical public policy questions, many of which have concerned Sealaska Corporation in the past when we questioned State involvement in private industry through the Alaska Resources Corporation and other programs.

Whenever government becomes involved in specifically underwriting a single or limited portion of an industry, it can unknowingly affect the competitive balance in that industry in some largely unforeseen ways. The State's negotiated timber sale to Schnabel Lumber Company in 1979 had significant and unexpected effects on subsequent U.S. Forest Service timber sales in the year following, for example. Is it possible, we wonder, for the State to apply its financial power for the benefit of one participant in an industry and still maintain a balanced industry over the long term?

Secondly, whenever the government applies its financial strength to aid one segment of an ailing industry, it often discovers that it has only scratched the surface. Fairness and the proper maintenance of competitive balance invariably demand further and greatly expanded intervention to assist other businesses involved. Has the State consciously and carefully investigated and determined the possible impacts to other existing businesses and the long-term restructuring of the timber industry?

Third, legislation such as has been proposed often constitutes merely a "quick fix" -- the treatment of a symptom with inadequate consideration of the generic and underlying problems. Will a simple transfer of controlling ownership strengthen a company in trouble, or merely weaken its financial condition by adding debt service burdens that were not present before? We would hope that the State would delve deeper into the source of Louisiana Pacific's business problems, and of the problems facing all major participants in Alaska forest industries.

Most analyses of Alaska's forest products industry suggest a number of weaknesses, some of which may be solvable by the industry with the State's help, and others of which can only be endured. Markets, raw material supply questions, costs related to harvest practices, environmental and other resource management requirements, exchange and interest rates and subsidized foreign competition are such problems. Injections of public capital can sometimes alleviate these for a time, but how fundamental or lasting is the "cure"?

Other problems are more amenable to policy-level solutions. The State has labored mightily to achieve EPA variances for Alaska's two pulp mills. Without such variances, few believe the mills can long survive. Antitrust problems, essentially brought upon themselves by elements of the industry, can be solved by federal natural resource policy changes and with the help of recent federal legislation. But should the State assist a company whose

recent past performance under antitrust laws is still questionable? Weaknesses in marketing due to currency exchange and interest rates, and the high cost of the large working capital and infrastructure requirements inherent in Alaska operations could be aided by a State Export-Import Bank, which we have suggested in the past, and by more State construction and ownership of public roads and docks available for industry use. Restricted timber supply and overly costly production methods dictated by the U.S. Forest Service could be improved upon by simple policy changes in that agency.

We hope that the State is considering the whole potential range of fundamental public policy initiatives to assist the forest products industry in addition to the proposed non-traditional involvement in a loan guarantee for a single company.

Sealaska Corporation has several questions more specifically applicable to the individual transaction the legislation is designed to subsidize. The loan guarantee may or may not make sense if the State does decide to thus underwrite a specific commercial transaction. However, we feel that the public record to date is not adequate to make that decision.

For example, does the administration have a thorough analysis of the risk of the intended loan? Is the request for a loan guarantee a "need" integral to effecting financing of the LPK/ESOT transaction or is it a "want"? What is the most likely ability of the company to service its proposed new debt? What measure or analysis has been made with respect to the chance of success for this transaction in the face of the yet undetermined Environmental Protection Agency ruling and the Weaver Committee questions regarding the U.S. Forest Service long-term contracts and the 450 mmbf per year commitment? Is the Forest Service going to approve necessary cost savings measures recently advanced by the industry? What is the U.S. Forest Service position on this transaction? Is it good public policy to risk such a large sum of money based upon the analysis of an investment banker paid by the seller, retained by the buyer and with a vested interest in closing the transaction; especially when this analysis is yet to become part of the public record? There have been no representations that the loan is unattainable without a guarantee. If there were such representations, what would they imply regarding the strength of the proposed credit? If the unthinkable were to happen and the ESOT were to default, who would be the real beneficiary of the State's loss, given that the guaranteed loan proceeds would be used to "take out" an equity investment already made by Louisiana Pacific? Should the State consider guaranteeing loans to other parties wishing to purchase the 11% of shares to be offered to the general public? Is the State going to change its post-ARC policy, and once again underwrite loans of capital that will not be reinvested in the State? What collateral, specifically, will be available to secure a loan taken for the purchase of equity? If the project does default, is it possible that the State then is in a position

of having to throw good money after bad?

Satisfactory answers to these and other important questions may be available now but we must in good conscience question whether a public commitment of such magnitude should be considered before such facts are spread on the record.

Sealaska Corporation's interest in these major policy questions is sincere and important. Native ownership and operations involve more than one-third of Alaska's entire forest products industry, and employs more than 1,200 Alaskans. We have never been subsidized in our business activities, and are critically concerned over the future of our industry. As is the case with the non-Alaskan participants in our industry, we have also been squeezed hard over the past three years. We have operated when our return-to-stump has been marginal at best, and have been forced to curtail our production and marketing this year despite our large capital investment.

Native timber owners operate capital facilities (eg: Klawock Island Dock Company) similar to those the State has traditionally publicly financed. Several of our smaller corporations have had perennial difficulties securing credit facilities, despite their large and continuing equity investments.

Our future is inextricably tied to the future of Alaska's forest products industry, so we are understandably concerned lest the State, in honestly attempting to treat a single segment of the timber industry symptom, cause a ripple of unforeseen effects that may actually compound the underlying problems we all face.

If the State is intent on setting aside normal public policy constraints to attempt to revitalize a portion of the timber industry, we strongly urge you to consider the rest of the industry -- and the industry as a whole -- as well. If State underwriting of a transfer of existing equity of LPK is only an initial step in a broad, major State program to support the entire forest products industry, we can accept it. But as part of that acceptance we want assurance and support as well, this session, for other segments of the industry in similar, and just as serious, circumstances.

Finally, let me reiterate that it is not Sealaska Corporation's intent or desire to bring further economic hardship to the residents of Ketchikan. Louisiana Pacific Corporation made the decision to close its Alaskan operations permanently and it is ultimately Louisiana Pacific Corporation and its shareholders who will most directly benefit from the proposed State action. It is in Sealaska's business interest that the Ketchikan pulp mill remain in operation and we will support any responsible effort to see that it does. However, the proposed loan guarantee raises

such fundamental questions of public policy that we are compelled to present this letter.

Sincerely,

SEALASKA CORPORATION

Byron I. Mallott

KETCHIKAN DAILY NEWS March 27, 1984

Local Natives surprised by Sealaska stand

By DAVID S. KIFFER
Daily News Staff Writer

Sealaska's decision to oppose a state loan guarantee for the Louisiana Pacific-Ketchikan Division employee buy out took local Sealaska shareholders by surprise, according to a local Native leader.

Georgia Skannes, a Sealaska shareholder and a member of the Ketchikan City Council, said she was disappointed in Sealaska's position.

"As a shareholder, I feel we should have been consulted," she said. "There is a local Sealaska advisory board here and, to my knowledge, it was not consulted before Byron (Mallot) released his position statement."

Mallot, the chief executive officer of Sealaska — the southeast regional Native corporation — recently sent a lengthy letter to Gov. Bill Sheffield opposing a proposal to have the state guarantee half of a loan the L-P employees hope to receive to purchase the division.

"The percentage of Sealaska shareholders that work at L-P is so high, it upsets me that Sealaska would take this position," Ms. Skannes said this morning. L-P comptroller Martin Pihl said 30 percent of the division workforce are Sealaska shareholders.

"This isn't showing any unity among the Native people," she said. "LPK has tried several times to open communication with Sealaska, but Sealaska has not responded."

She said she and former Sealaska board member Ray Demmert of Ketchikan will meet Wednesday to discuss the situation and work out a plan to "get the L-P side of the issue out to the Native people."

This morning, Pihl released a lengthy LPK response to Sealaska's letter to the governor. The response pointed out economic differences between LPK's export of cants and Sealaska's export of round logs.

"We recognize there is a good deal of factual information in Sealaska's letter about conditions and the status of the Alaska Forest Products industry," Pihl said. "Particularly in the segments which are required to domestically process the logs before export. Unfortunately, Sealaska fails to acknowlege the market and competitive advantages which it has in the export of round logs and the impact those round log imports have had on the market for domestically processed cants."

Pihl said L-P has sought to work together with Sealaska and other parts of the forest products industry, but that Sealaska does not "have receptive ears." He said L-P will continue to press for cooperation because it will "result in an improved market for pulp logs, most of which Sealaska has left in the woods."

"Sealaska's comments that the loan guarantee bill is special interest for a single limited portion of the industry is not correct in our view," Pihl said. "The guarantee bill would be available for any employees purchase of any company in the forest products industry."

He said two things are needed for the loan guarantee — legislative action and the setting aside of $20 million "in the unlikely event of a call on the guarantee."

Pihl said the chief benefit from the guarantee is low interest rates for the purchase and a thoroughly studied proposal.

"The employees are not looking for a quick fix (as Mallot had asserted in his letter)." He added that the lending institutions are also keeping a close watch on the proposal.

"The alternatives (to the employee buy out) are very grim," Pihl said. "A projection by the state Department of Labor indicated that, should a Ketchikan closure occur, the draw on unemployment benefits in the first year alone would be $20 million. That is just about the amount of the requested loan guarantee and one half of the employee purchase price."

Re: SB 479.

Dear Mr. Mallott:

I find it hard to believe you personally wrote the letter concerning the captioned bill to the Governor dated March 21st.

It's also difficult for me to believe that it wasn't written by your Mr. Loescher who has been a pretty faithful attendant at the various meetings which have been held on SB 479.

In my opinion, you have made some unwarranted assumptions concerning the employee stock ownership trust, and in the process of so doing have perhaps potentially and severely impacted the economic livelihoods of several hundred of your shareholders.

Sealaska and Louisiana Pulp are not truly competitive and your actions have distressed me personally.

Very truly yours,

Robert H. Ziegler, Sr.

April 3, 1984

Mr. Byron I. Mallott
President and Chief Executive Officer
Sealaska Corporation
One Sealaska Plaza
Juneua, Alaska 99801

Dear Mr. Mallott:

This letter is intended to formalize a response which becomes incumbent on us to the Sealaska Letter to Governor Sheffield dated March 21, 1984, regarding the "Forest Products Business Loan Guarantee Bill HB627 and SB479 and broader issues facing the forest products industry. This will supplement the responsive statements we have given to requests from the news media.

We were of the belief that most of the questions and concerns of Sealaska had been addressed in discussions with Sealaska representatives on February 29, and by the testimony of the three-man KPC ESOT representation before Senate and House Committee hearings on SB479 and HB627 which were attended by Sealaska representatives, and other meetings with State Administration officials.

As you know, the Sealaska letter was met by substantial shock reaction in the Ketchikan-Prince of Whales area and including many of Sealaska's own members. We recognize that you have issued follow-up clarifying and somewhat modifying statements such as reported by the Ketchikan Daily News on Wednesday March 28. The damage was, however, already done. Our response follows.

We would first emphasize our disappointment in finding objection to the Ketchikan Pulp employees as people trying to help themselves. We are talking about 800 direct employees, many of which have invested 20 to 30 years in pioneering the timber industry in Southeast Alaska. We as employees, have committed to take a substantial reduction in

pay and benefits as a primary step in restoring economic viability. The ESOT purchase study by employees has covered all aspects of operations, economics and viability including markets, resource base, raw material costs, environmental and regulatory matters, and plants and asset base as well as wage and benefit levels. The Ketchikan employee purchase is not a "quick fix". The employees are not interested in merely buying their jobs for a few years. This purchase is designed to be a viable, bankable transaction subject to regular bank standards of credit review and showing of purchase debt capacity.

We do recognize that there is a good deal of factual comment in the Sealaska letter about the condition and status of the forest products industry. These factors are particularly true and more accutely affect the segments of the forest products industry which are required to domestically process logs before export. Unfortunately, Sealaska fails to acknowledge the market and competitive advantage which it has in export of round logs and the impact round log exports has had on the market for domestically processed cants. Ketchikan Pulp (LPK) has long seen the need for Alaska's Forest Products Industry to work together and not oppose each other in the market place. We initiated a number of discussions two to three years ago with Sealaska Timber and more recently Sealaska in Juneau. We maintain a willingness and commitment to work together. Logs and cants can be marketed together, and our working together will result in improved overall economics and price available for pulp logs which export-logging operations leave a high percentage in the woods. Prices we have offered for pulp logs have consistently exceeded the economic return to the log from pulp sales and operations. The combined log and cant exports from Alaska to Japan and other Pacific Rim Countries represents only about ten percent of a total of more than three billion board feet annually off the West Coast including Washington and Oregon. Hence, neither Sealaska, KPC nor ALP (nor combined) set, or in any way control, the market for logs and cants.

The Loan Guarantee Bill does not "specifically underwrite a single or limited portion of an industry". The guarantee would be available for any qualifying employee purchase of any company in forest products. We may be first, but others may follow. We have often found this to be true. Two things are necessary to effectuate the loan guarantee; first, enabling legislation and secondly, a transfer or set aside of regularly invested state funds in the highly unlikely event of a call on the guarantee. There is no grant or direct loan of funds.

The forest products industry has not, to date, called on the State of Alaska for assistance such as we have seen in many instances for fisheries and tourism. The one exception

involves the Haines sawmill which we understand Sealaska supported in the final stages. The State can assist and make more assured the financing of the Ketchikan employee purchase at a lower interest rate benefiting all concerned.

The alternative to the Ketchikan employee effort is grim indeed. Projections by the Alaska Department of Labor indicate that, in the event of closure or shutdown, the draw on unemployment benefits in the first year alone would approximate $20 million. This amount alone approximates the amount of the requested loan guarantee and about one-half of the employee purchase price. We believe about 30 percent of the jobs we are seeking to maintain are Alaska Natives and Sealaska members.

We would very much appreciate your support and joining efforts to maintain and improve Alaska's Forest Products Industry. Our employee purchase will Alaskanize the ownership of Ketchikan Pulp Company. We invite you to join us as a shareholder. On request, we ask that this letter be shared with the Sealaska Board of Directors.

Sincerely,

M. R. Pihl

Re: Alaska Timber Industry

Dear Mr. Salazar:

The Southeast Alaska timber industry continues to be in a severe depression. This condition has created sharp unemployment, shut down of manufacturing facilities and logging operations throughout the region. The impacts to the social, economic and political life of each of our communities has been detrimentally affected - and there is no foreseeable end in sight.

There comes a time when all elements of the community - citizens, private landowners, industry, environmentalists and government officials - must come together and face head on the calamities of the day. For the timber industry, in our opinion, this time has come if we are to see any positive change.

Many efforts by many people are being promoted on singular bases. But the problems appear to be larger then they seem and a more comprehensive approach to identifying and finding solutions to industry problems may be in order.

With this in mind, I would like to advance to the Southeast Conference a draft resolution and an outline of draft legislation calling upon Governor Sheffield and the Legislature to establish and fund an Alaska Timber Review Commission. I would urge your consideration of this proposal. I believe that with the support and recognition of the Southeast Conference that this legislation could pass this session.

Additionally, with the interest and participation of all segments of industry, government and citizens, I believe that such an effort will find lasting solutions to timber industry problems that can benefit the total community and can establish an economic foundation for the future.

Sincerely,

SEALASKA CORPORATION

Re: Alaska Timber Industry

Dear Mr. Salazar:

The Alaska Loggers' Association (ALA) has worked closely with Sealaska Corporation in forging the Alaska Timber Review Commission proposed in Mr. Mallott's letter of this date. The proposed Commission will provide a vehicle for the timber industry to focus its efforts in an attempt to come up with a comprehensive, creative approach to the problems that beset it. We particularly welcome the opportunity to review the Forest Service policies "that materially offset the economic health of the industry" (Section .050(2)), as we believe a thorough review is needed in this area. We would appreciate the active support of this proposal by the Southeast Conference.

Yours very truly,

James F. Clark

JFC:sd

Mill buyout faces fight over loan guarantee

by Dean Fosdick
Associated Press

Juneau — Agreement was reached Wednesday on an employee buyout plan for the estimated $90 million in Alaska assets of Louisiana-Pacific Ketchikan, but legislation that would guarantee half the $45 million loan needed to float the deal is facing a "major uphill battle," a sponsor says.

Louisiana Pacific Corp., a Fortune 500-listed company based in Portland, Ore., initiated the buyout proposal in September with L-PK employees.

The division's assets include a hemlock mill in Metlakatla, a chip mill in Seward, a spruce mill in Ketchikan, the huge Ward Cove pulp mill, some logging camps and long-term timber contracts.

The division is the largest employer in the Ketchikan area with a work force of about 800 people and a $23 million annual payroll.

Wally Kubley, a Capitol lobbyist for L-PK and the 28-member panel which is handling the purchase under an Employee Stock Ownership Plan (ESOP), said agreement awaits a feasibility study from a Wall Street investment firm.

"If they say it's not a good deal, then they won't buy it," Kubley said.

Under terms of the proposal, employees will own and control 55 percent of the company and have five of seven people on the board, he said. The remaining two would be from Louisiana-Pacific.

"A $45 million loan from one state and four large outstate banks will be the up-front payment for L-P," he said. "The loan will be backed by approximately $90 million in assets.

"We're asking that the state guarantee 50 percent of the $45 million loan," Kubley said, adding that it would make it a more "viable deal."

"It would make the loan more salable and they might get it at a rate of 1 percent less with the state guarantee," he said.

ESOP leader and L-PK Controller Martin Pihl said the committee feels pretty good about the $90 million deal.

"There was not unanimous approval, but very near," he said.

Among the many concerns is a tentative denial by the federal Environmental Protection Agency on L-PK's request for a variance from new waste water treatment standards. L-PK has estimated that the cost of complying with EPA requirements will exceed $10 million.

EPA Regional Administrator Ernesta Barnes said during a visit to Ketchikan last week that a final ruling will come in late May.

A sponsor of one of two bills that would establish a "Forest Products Business Loan Guarantee Fund," Sen. Bob Ziegler, D-Ketchikan, said Wednesday he believes the odds are against passage.

"From talking to colleagues and scouting around, it looks like it's going to be a major uphill battle and I'm not optimistic," Ziegler said. "We'll keep trying.

"The whole thing is highly complex and a lot of people don't seem to grasp it," he said. "We're not looking for a raid on the treasury, we're looking for a guarantee."

Ketchikan, Alaska 99901

Dear Mr. Pihl:

Sealaska Corporation has not found objection as your April 3, 1984 letter erroneously asserts "to the Ketchikan Pulp employees as people trying to help themselves." Quite the contrary is true. Sealaska Corporation in its March 21, 1984 letter raised issues which in our judgment merit attention if HB627 or SB479 is to stand any meaningful chance of enactment. Neither does Sealaska need to be reminded by anyone of its obligation to its shareholders and I personally resent that inference in your letter.

Now, my friend; you, me, Senator Ziegler and others can continue this sort of negative dialogue or we can sit down together as your letter and mine suggest and try to work for the good of industry. Sealaska is prepared to do that and I look forward to the meeting which we will have April 16, 1984.

Sincerely,

SEALASKA CORPORATION

Byron I. Mallott
President and Chief
Executive Officer

DRAFT RESOLUTION FOR SOUTHEAST CONFERENCE

WHEREAS, Southeast Alaska's timber industry is in a severe and lasting financial depression; and

WHEREAS, The industry is being restructured internally as a result of pressures wrought by this depression; and such restructuring is or has the potential to significantly disrupt the financial and social fabrics of Southeast Alaska communities; and

WHEREAS, The causes of the industry's present problems are many and complex, and arise both from State and Federal government policies and from national and international financial and competitive factors; and

WHEREAS, The financial health and well-being of the citizens of Southeast Alaska is and historically have been greatly dependent upon the well-being of the region's timber industry; and

WHEREAS, The industry can be strengthened over the long-term only through actions based on a detailed analysis of all aspects of the industry as they are affected by government policies and the interaction of world economics; and

WHEREAS, Such an analysis, and any recommendations for public policy or statutory initiatives that might result from it, can be accomplished only with the full involvement, cooperation and expertise of all participants in the industry acting together for the good of the industry as a whole;

NOW, THEREFORE, BE IT RESOLVED THAT

(1) The Southeast Conference urges the Governor and the Alaska State Legislature to establish and fund immediately an Alaska

Timber Review Commission.

(2) The Alaska Timber Review Commission should be composed of representatives of companies engaged in producing forest products from Southeast Alaska lands and relevant State and Federal government officials.

(3) The Alaska Timber Review Commission should be charged with completing a thorough analysis of the present situation in the Southeast Alaska timber industry, and with recommending policy and statutory changes that would strengthen the industry as a whole over the long-term.

(4) The Alaska Timber Review Commission should be funded by a combination of private and public funds, and should be administered as a private commission and chaired by a member from the private sector.

DRAFT LEGISLATION (OUTLINE)

An Act entitled: An act creating the Alaska Timber Review Commission and appropriating funds for its operations.

Sec. 1: Findings: The legislature finds that

1. A combination of public policies and world financial and market factors has weakened Alaska's forest products industry in recent years.

2. The industry is critically important to the economy of Alaska.

3. Improvement can be accomplished only with a better understanding of the industry as a whole and of world financial and competitive factors.

4. Such an analysis and recommendations will be of value only if they are accomplished by the industry itself with the assistance of the State of Alaska.

Sec. 2. Purpose: The purpose of the act is to:

Establish the ALASKA TIMBER REVIEW COMMISSION for a period of 10 months to analyze the Alaska timber industry as it is presently structured and as it relates to existing statutes and governmental policies and to world financial and competitive factors, and to recommend to the Governor and the Legislature any changes in policies or statutes and regulations it deems appropriate.

Sec. 3. A.S. _____ is amended by adding a new chapter to read:

Chapter ____: ALASKA TIMBER REVIEW COMMISSION. Sec.

Ø1Ø. There is established in the Office of the Governor the Alaska Timber Review Commission. The commission is a study and review commission with a limited existence to accomplish the purposes set out in this chapter.

Sec. Ø2Ø: Membership: (a) The commission shall be composed of 13 Commissioners, appointed by the Governor. The Commissioner of Natural Resources, Commerce, and Revenue or their designees, shall sit as ex officio members on the commission. The commission shall be comprised of: one member of the Alaska State Senate, one member of the Alaska House of Representatives, the U.S. Department of Agriculture Regional Forester for Alaska, the Director of the Office of Management and Budget, one member representing environmental interests, and nine members representing the Alaska forest products industry.

(b) The Governor shall appoint one commissioner as chairman of the commission.

Sec. Ø3Ø. Compensation of Commissioners: The members of the commission shall serve without compensation.

Sec. Ø4Ø. Employment of Personnel: The commission may retain through contract an Executive Director. The Executive Director may, with the approval of the Commission, retain through contracts individuals or firms to accomplish work under this chapter.

Sec. Ø5Ø. Responsibilities: The commission shall

(1) Analyze the Alaska forest products industry as it is presently structured;

(2) Analyze State and Federal policies that materially affect the economic health of the industry;

(3) Analyze world market and financial factors that materially affect the economic health of the industry;

(4) Make recommendations to the Governor and the Alaska Legislature no later than January 15, 1985 for: 1) changes in State policies, statutes and regulations that would benefit the industry and the public interest, 2) changes in Federal policies, statutes and regulations that would benefit the industry; and 3) new public institutions, appropriations or policies that would stabilize and enhance the industry as a whole and serve the public interest.

Sec. 060. POWERS. The commission may

(1) Conduct or contract for research to accomplish its responsibilities under this chapter.

(2) receive contributions of money from the State or from persons.

(3) establish an office in the State and otherwise incur expenses incidential to the performance of its duties;

(4) establish bank accounts for the transaction of its business.

Sec. 070. APPROPRIATION. There is appropriated to the Office of the Governor $500,000 for the purpose of funding the Alaska Timber Review Commission.

Sec. 080. Termination of the Alaska Timber Review Commission. This chapter shall terminate upon the submission of the report by the commission to the Governor and the Legislature.

SENATE BILL NO. 186

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act authorizing the governor to lend up to $3,400,000 from the disaster relief fund for a breakwater failure on St. Paul Island; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The governor is authorized to lend up to $3,400,000 to the Department of Administration, division of risk management, from the assets of the disaster relief fund (AS 44.19.048) to alleviate the effects of a breakwater failure on St. Paul Island.

* Sec. 2. A loan made under the authority of sec. 1 of this Act shall be made on the condition that the Department of Administration, division of risk management, repay to the disaster relief fund the proceeds of insurance payments received as a result of the breakwater failure on St. Paul Island. ON OR BEFORE ~~DEC 31,~~ July 1, 1986

* Sec. 3. The authority given by sec. 1 of this Act terminates June 30, 1985.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Estimate to repair damage to Phase I of the St Paul Breakwater:

$4,000,000
- 600,000 ($300,000 deductible per occurrence x 2 occurrences)
$3,400,000

SB 186: St Paul Breakwater

The purpose of this legislation is to provide for a loan from the Disaster Relief Fund to the Division of Risk Management to alleviate the effects of a breakwater failure on St. Paul Island. During Mid November and again in early December, the phase I construction of the St Paul Breakwater was subjected to 2 major winter storms which caused significant damage.

This project is covered by insurance from both the Division of Risk Management and the contractor and the loan of $3.4 million will be repaid from the proceeds of the insurance settlement.

This temporary loan will enable repairs to be made to phase I of the breakwater project and insure that valuable construction time will not be lost waiting for the insurance settlement. Passage of this bill will allow the project to proceed within the 1985 construction "window" and preserve a $2.5 million dollar federal EDA grant for the construction of the dock. This federal grant is conditioned upon portions of the project being completed by June 30th. Additionally, as a condition of the loan, the City of St Paul has agreed to relinquish all claims to the insurance settlement thus insuring that the money will be repaid to the disaster relief fund.

The presence of a harbor in the Bering Sea is of vital concern for the economic development of the region and will also expedite the development of the worlds greatest whitefish resource.

SB 184

MEMORANDUM

State of Alaska

TO: Anselm Staack
Deputy Commissioner
Administrative Management
Department of Administration

THRU: William R. Snell
Acting Deputy Commissioner
Central Region
Department of Transportation
and Public Facilities

FROM: John B. Olson, P.E.
Director, Design & Construction
Central Region

DATE: February 6, 1985

FILE NO: 220C

TELEPHONE NO: 266-1500

SUBJECT: Involvement of Risk Management with St. Paul Breakwater

The events leading up to the Department of Transportation and Public Facilities' (DOT&PF) contact with Risk Management focused primarily on the assessment of damage. Technical analyses to determine why the Breakwater failed were critical, in view of the fact that the City of St. Paul had opened bids for Phase II construction and was scheduled to award the contract in mid-December. Tetra Tech, Inc., was hired to perform the technical analysis.

Following the decision to have the City of St. Paul cancel the contract award for Phase II, the Department and the City began to explore ways to fund the restoration of Phase I of the Breakwater.

During the week of January 14, 1985, Risk Management was asked to assist the Department in exploring its options with regard to Phase I. Several conversations followed and an exchange of information took place. On January 29, 1985, Brad Thompson of Risk Management met with representatives of the City of St. Paul and DOT&PF to determine the best way to proceed to restore the Breakwater to its pre-storm condition.

It was decided that the Division of Risk Management through DOT&PF would solicit an estimate to reconstruct the facility to its pre-storm condition. The Department has identified a list of potential consultants to prepare this estimate.

The initial estimate given to DOT&PF to restore the Breakwater is $4.0 million. A more specific estimate will be developed as a result of comprehensive field investigation.

APPENDIX A

ST. PAUL HISTORY

The significant events surrounding the construction of the St. Paul Breakwater the storm damage and the time frame of reconstruction.

DATE	EVENT
	Construction contract awarded to Calista Corp.
	Problems arose in production of large armor stone, construction temporarily halted.
	Construction proceeded with modified (berm) breakwater design.
	Completion of Phase 1 construction was accepted for payment.
10/15/84	Breakwater began to show signs of readjusting to a moderate wave climate.
11/13/84-11/14/84	Breakwater was subjected to a major storm which significantly damaged the outer 350'.
11/19/84	City of St. Paul contacted DOT&PF for assistance on confronting the problem.
11/30/84	DOT&PF signed an agreement with Tetra Tech Inc., using an existing Term Contract, to conduct an assessment of the damage and determine the probable cause(s) of failure.
12/07/84-12/08/84	The breakwater was subjected to a second major storm which destroyed an additional 150'-200'. At this time the head portion of the breakwater had receeded from an original station 9+00 to station 4+25.
12/31/84	First draft of final Tetra Tech Inc report was received for review.
01/14/85	DOT&PF contacted Risk Management to ascertain the States insurance alternatives for reconstruction of the breakwater.

01/21/85	Final Tetra Tech Inc. report was delivered to DOT&PF.
	City of St. Paul contracted with DePue & Associates to develop alternative dock designs.
	City of St. Paul contracted with Tetra Tech Inc. to develop alternative designs and estimates for reconstructing the breakwater and continuation of phase 2 construction.
01/29/85	DOT&PF, City of St. Paul, and Risk Management met to discuss the current status of the breakwater and determine what involvements between the agencies is necessary to meet the critical time frame for construction and preservation of the EDA grant.

TENTATIVE SCHEDULE TO MEET 1985 CONSTRUCTION WINDOW AND FULFILL GRANT REQUIREMENTS.

02/15/85	Select from alternative designs of breakwaters and docks.
02/28/85	Contract for A/E services to develop final design, drawings, and specifications for breakwater and dock.
03/01/85-03/15/85	Field investigations (detailed bathymetry, geotech, etc.)
03/15/85-04/30/85	Hydraulic Model Studies
03/01/85-04/15/85	Develop final design, construction, and bid documents
04/16/85-06/01/85	Advertise and award
06/15/85	Begin construction
11/15/85	Complete construction

FEB 4 1985 / 80

TETRA TECH, INC.

4 February 1985

Mr. Vern McCorkle
City Manager
City of St. Paul
St. Paul, Alaska

Dear Mr. McCorkle:

The following is a summarization of our analysis of the Saint Paul Harbor Project:

1. Estimated Costs to Re-build Phase I

		w/o contingencies E&D and S&A	w/contingencies E&D and S&A
a)	to Norgaard's Original Design	$4.02 million	$4.74 million
b)	Norgaard's A-B Design	3.40 million	4.01 million
c)	to Tetra Tech's Preliminary Design	4.95 million	5.84 million

Basis of costs are shown on the attached sheets for (a) and (b). Unit prices are from Phase 2 bid summaries and quantity estimates assume that existing material from damaged section can be incorporated into the core. We have added the costs for mob/demobs, camps and have road maintenance which were not included in our original $3 million estimate.

2. Extent of $9.0 Million Breakwater Project

Using Tetra Tech's preliminary x-section, breakwater repairs and extension to about STA 14+00 can be accomplished for $9 million. A head section incorporating 30-ton concrete dolos armor units and a trunk section using 14-ton stone on a 1:4 slope were used in this estimate. A project of this magnitude could protect a 200-foot barge dock while providing a 20' draft along the berth. Dredging of the harbor for the removal of washed out breakwater material would be required. Wave heights of about four feet along the berth would be expected several times per year during storm conditions. The evaluation of using a concrete caisson for the head section instead of the 30-ton dolos units may substantially affect the total possible breakwater length. Model testing of the caisson and our preliminary design for the trunk section is also required. We are presently investigating

the caisson alternative, but a precise construction cost estimate will be difficult. In summary, we are confident that a 1200- to 1500-foot breakwater can be constructed with a $9.0 million budget. Estimated construction time for this project is seven months.

3. Estimated Costs for Re-build to Original Phase I/Phase II Project

Using Tetra Tech's preliminary design x-section and extending the project to STA 20+50 as shown in the Phase II construction drawings would cost about $12.63 million in construction. Including a 5% contingency and allowances for engineering and design and supervision and administration would necessitate a $14.9 million project budget. Estimated construction time for this project is 13 months, hence a two-season construction program would be needed.

4. Alternative X-Section Designs

We have examined six alternative cross-sections plus Norgaard's trunk and head section designs. Based on the 25-foot design wave, Norgaard's original design would expect considerable damage (about 20% or more). The other six designs are expected to sustain about 0 to 5% damage on an annual basis, but model tests of some alternatives are necessary to verify this damage estimate. We are presently evaluating a caisson section for use as the breakwater head. This may be similar in cost to a rubblemound dolos protected head section but afford an additional 50 feet of breakwater length. See attached table for a summary of x-sections examined.

I would like to emphasize that some of our designs can only be verified by scale model testing. We have preliminary sections drawn, along with a plan of the project to STA 14+00, which can be made available for your use if you feel they would be of any assistance. Once Tetra Tech, or possibly some other firm, is given a notice to proceed with the development of detailed plans and specifications, it will take approximately four weeks to have them ready for bid. Also, if the dock facilities are to be incorporated in this project, a subsoil investigation of the harbor bottom must be completed. Tetra Tech would be pleased to act as St. Paul's agent for this work, or if you desire to contract directly for this work we will recommend firms specializing in this type of work.

If you have any questions, please don't hesitate to give me a call at 564-8144.

Sincerely,

TETRA TECH, INC.

the person appointed under AS 44.19.040 succeeds directly to the office of acting governor until successors to the respective offices are elected in a special election. (§ 5 ch 174 SLA 1959)

Revisor's notes. — Formerly AS 44.19.150. Renumbered in 1980.

Cross references. — As to condition and time of calling special election, see AS 15.40.230.

Article 3. Disaster and Emergency Relief Funds.

Section	Section
48. Disaster relief fund	50. Definition
49. Grants and loans to municipalities damaged by natural disaster	52. Fuel emergency fund

Revisor's notes. — In 1980, the sections of this chapter were extensively renumbered. For derivations of current sections and current disposition of former sections consult the parallel reference table at the beginning of this title and the Table of Sections Amended, Etc. in binder no. 8.

Sec. 44.19.048. Disaster relief fund. (a) There is in the Office of the Governor a disaster relief fund. The Department of Revenue is custodian of the fund.

(b) Subject to the restrictions of (d) and (e) of this section, the governor may, without additional legislative authorization, expend not more than $1,000,000 of the assets of the disaster relief fund for the following purposes:

(1) to implement provisions of law relating to disaster relief in the case of a disaster as defined in AS 44.19.050 occurring after October 11, 1967;

(2) to alleviate the effects of a disaster as defined in AS 44.19.050 occurring after October 11, 1967, by making loans or grants to persons or municipalities on terms the governor considers appropriate or by other means the governor considers appropriate.

(c) Subject to the restrictions of (d) and (e) of this section, the governor may, without additional legislative authorization, expend for any fiscal year not more than $500,000 of the assets of the disaster relief fund to prevent or minimize the effects of an event which occurs in any part of the state after October 11, 1967 and which, in the determination of the governor, poses a direct and imminent threat of resulting in a disaster of sufficient magnitude and severity to justify state action.

(d) Expenditures authorized by the legislature to alleviate effects of the natural disaster occurring on August 14, 1967 shall be reimbursed to the general fund from the disaster relief fund before any other expenditures may be made from the disaster relief fund.

Statutes

(e) The governor shall present to the legislature an annual accounting of money expended from the disaster relief fund. (§ 1 ch 25 FSSLA 1967; am §§ 4, 5 ch 104 SLA 1977; am § 10 ch 116 SLA 1980)

Revisor's notes. — Formerly AS 44.19.171. Renumbered in 1980.

Cross references. — As to the Alaska Disaster Act, see AS 26.23.010 et seq.

Sec. 44.19.049. Grants and loans to municipalities damaged by natural disaster. (a) Grants and loans for urban renewal shall be made available to municipalities damaged by disasters occurring in the state after August 1, 1967 in order to match federal funds under federal urban renewal programs. A grant or loan of state funds to a municipality for an urban renewal program under this section may not exceed 25 percent of the aggregate of the net project costs of the urban renewal project. Funds shall be made available to a municipality to match federal funds only if the urban renewal project is made necessary by the disaster.

(b) The funds for the grants or loans under this section shall come from the disaster relief fund provided for in AS 44.19.048 — 44.19.050.

(c) No urban renewal project costing over $30,000,000 is eligible for grants or loans under this section.

(d) The governor shall determine the eligibility of a municipality for a grant and loan of funds to match federal funds for urban renewal. In making the determination the governor shall consider the following standards:

(1) the amount of participating money available from the United States government for urban renewal;

(2) the amount and availability of funds from other sources to meet the municipality's required contribution of matching funds;

(3) whether or not the urban renewal project was made necessary by a disaster;

(4) the needs of other municipalities damaged by the disaster for funds to match federal funds for urban renewal projects, and the urgency of the needs of other communities as compared with the community under consideration;

(5) the cost of the urban renewal project;

(6) the general welfare of the state and its inhabitants.

(e) A report of activity under this section shall be made to the legislature each year.

(f) The governor shall determine the terms and conditions of a loan made under this section.

(g) In this section "disaster" means a disaster proclaimed by the President of the United States. (§ 1 ch 20 FSSLA 1967; am § 1 ch 171 SLA 1970; am §§ 7-10 ch 104 SLA 1977)

Sec. 44.19.050. Definition. In AS 44.19.048 and 44.19.049, "disaster" means the occurrence or imminent threat of widespread or severe damage, injury, or loss of life or property resulting from any natural or man-made cause including, but not limited to, fire, flood, earthquake, landslide, avalanche, wind-driven water, weather condition, tsunami, oil spill or other water contamination requiring emergency action to avert damage, volcanic activity, epidemic, air contamination, blight, infestation, explosion, or riot. (§ 1 ch 25 FSSLA 1967; am § 6 ch 104 SLA 1977)

Revisor's notes. — Formerly AS 44.19.175. Renumbered in 1980.

Sec. 44.19.052. Fuel emergency fund. There is established in the Office of the Governor the fuel emergency fund. When the governor determines that a shortage of fuel is sufficiently severe to justify state assistance the governor may make a grant from the fuel emergency fund to a city or borough, or to a village or unincorporated community, to purchase emergency supplies of fuel. LETTER OF INTENT

HOUSE SPECIAL COMMITTEE ON STATE LOANS

Senate Bill 186 - "An act authorizing the governor to lend up to $3,400,000 from the disaster relief fund for a breakwater failure on St. Paul Island; and providing for an effective date."

It is the Intent of the Legislature that, in order to ensure that all money will be repaid to the State of Alaska, Disaster Relief Fund, and the Division of Risk Management for the States' insurance deductible, as a condition of this loan for reconstruction of the Saint Paul Breakwater, the City of Saint Paul must agree to subrogate, up to a total of four million dollars, all claims to any insurance settlements from the breakwater failure.

Alaska HOUSING FINANCE CORPORATION

April 24, 1986

The Honorable John L. Sund
Alaska State Representative
House of Representatives
Post Office Box V
Juneau, AK 99811

Dear Representative Sund:

The purpose of this letter is to provide comments on CS SB 281 (FIN) am, which is now in the House Special Committee on Loans. As you know, this bill would increase the interest rate on all loans (except student loans) made by the state, or instrumentalities of the state, by one-half percent per year until the loans are at market rates or cost of funds. With respect to AHFC, it is not entirely clear how this would apply, as is explained in Attachment II.

In any case, the eventual effect of the bill would clearly be to by and large eliminate AHFC as a viable source of home financing in Alaska. Before proceeding I think it is useful to note that during its existence AHFC has helped over 65,000 families buy homes, and has provided over $5 billion worth of home financing including over $2.5 billion worth of new home construction. Further, AHFC has generally functioned as a "shock absorber", in that the Corporation has protected Alaskan homebuyers from extremely high interest rates and the resultant decrease in equity and inability to purchase homes caused by high rates.

It is important to realize that it is quite possible that the negative impacts of this bill will be felt immediately, rather than some time off in the future. The reason for this is that both insurers and investors must look at a financial transaction over a long time period, rather than just basing their decisions on current situations. Furthermore, they have to consider what happens in the "worst case", rather than assuming that favorable trends, such as low interest rates, will continue on into the future. In general, the points that are discussed below deal with the effects on the confidence of insurers and investors. Since there are no absolute relationships in measuring confidence, it is impossible to predict with certainty what the impact of SB 281 will be. However, all of the possible consequences discussed below should be viewed as strong possibilities.

The first effects considered will be on mortgage insurance. All mortgage loans made by AHFC that have a loan-to-value ratio in excess of 80% must have mortgage insurance, either private mortgage insurance (P.M.I.) or government mortgage insurance provided by the Federal Housing Administration (FHA) or the Veterans Administration (VA). I believe any negative effects are much more likely to impact the P.M.I. companies, and so will focus on them.

Telephone (907) 276-5599
235 East 8th Avenue
Third Floor
P.O. Box 101020
Anchorage, Alaska 99510

If SB 281 is passed, AHFC will be taken out of the market. No longer could a P.M.I. company depend upon AHFC to provide a shock absorber against a rapid increase in interest rates, and the resultant decrease in the value of a home because of the higher interest rates. (A person with a median income for Anchorage, $44,000, can afford a $96,000 house at 10%, versus a $82,000 house at 12%). As a result, the P.M.I. companies may be much less willing to provide insurance on loans in Alaska, particularly those loans with high loan-to-value ratios. This is especially important here, since we have the highest proportion of low downpayment loans anywhere in the nation. The national average of loans with a loan-to-value ratio in excess of 90% is about 40%, whereas in Alaska it is over 75%. Furthermore, all of this needs to be viewed in the context of a housing market that is less than robust, to say the least. The worst thing that could happen with respect to private mortgage insurance would be the departure of the four remaining companies from the Alaskan market, or their agreeing to only insure loans with a loan-to-value ratio of 80% or less (the effect is the same). An intermediate possibility is to only insure loans with a 90% or less loan-to-value ratio. On our average loan of about $120,000, this means downpayments ranging from $6,000 (95% loan), to $12,000 (90% loan), up to $24,000 (80% loan). Clearly many potential buyers would be pushed out of the market if such higher downpayments were required.

It is far less likely that either FHA or VA would change their underwriting policies in Alaska since they, like AHFC, have a commitment to assist home financing beyond a strictly financial interest. However, all is not necessarily assured with FHA. Federal allocation authority for FHA will run out very shortly. Congress is in the process of passing a new authorization, but the President may veto it, leaving FHA with no authority to insure new loans until next October (see Attachment I). Also, the President has a proposal to restrict future FHA loans to borrowers earning no more than $40,000 per year, and in fact the Administration is trying to make this change, and others, effective immediately. The point of all this is that relying too heavily on FHA for mortgage insurance is quite risky, both because of the uncertainty of their allocation authority, and because the program may soon become too restrictive to be of use to most Alaskans.

The next effects considered deal with potential impacts on major secondary market agencies, such as the Federal National Mortgage Association (FNMA), the Government National Mortgage Association (GNMA), and the Federal Home Loan Mortgage Corporation (FHLMC). Although these agencies can perform a variety of functions, in the context of this letter it is best to consider them as guarantors of bonds issued to provide financing for home loans. When AHFC purchases a home loan from a local lender, this loan is converted to either a FNMA or a GNMA security. These securities are then pooled, and bonds are sold based upon these FNMA and GNMA securities, which assist in AHFC receiving AAA bond ratings and subsequent low interest rates.

GNMA securities are applied to loans that have government mortgage insurance, i.e., FHA and VA insured loans. GNMA is not likely to pull out of Alaska despite what happens to AHFC. However GNMA has the same allocation uncertainty that plagues FHA. Currently GNMA is out of commitment authority until October. (See Attachment I).

FNMA securities are applied to loans that either have private mortgage insurance, or a loan-to-value ratio of 80% or less. FNMA is not a government agency (though it has close ties with the federal government). As such, FNMA has much more flexibility with respect to whether or not it does business in Alaska, and also with respect to the terms under which it does business. FNMA has already required more restrictive terms on AHFC loans then it previously had. Whether or not it would become even more restrictive (e.g., no 95% loans) or cease doing business up here is unknown. FNMA personnel have been in Alaska recently voicing their concerns about the current market situation. Elimination of AHFC by passage of SB 281 can only intensify their concerns.

Although AHFC does not do business with FHLMC, other lenders in Alaska do. It is likely that its response would be similar to FNMA.

The other major group involved can be loosely classified as the investment community. This would include the rating agencies (Moodys and Standard and Poors), credit providers, and actual bond purchasers. Once again, it is difficult to predict specific reactions, since any effects will result from a change in investor's confidence regarding the financial health of AHFC and the Alaska housing market. However, it should be noted that because of a high level of investor confidence, AHFC has recently been able to provide the lowest (to our knowledge) fixed rate unsubsidized loans in the nation. For example, our last bond sale carried a very unusual provision, a 15 year letter of credit. This provision allowed us to access the much cheaper rates of the Japanese market. This provision is extremely unusual in that letters of credit are rarely written for longer than 7 or 8 years. Our ability to get such a long term agreement, for such a large amount ($100 million) was based upon the confidence that the letter of credit bank had in AHFC. Without such a high degree of confidence, AHFC, and of course, Alaskan home buyers, would have to pay higher interest rates for home financing.

Next, what about the argument that if AHFC is eliminated, the "private marketplace" will then provide all home financing, albeit at higher interest rates. First, if the private mortgage insurance companies become more restrictive or indeed, even cease doing business in Alaska, that will affect all applicable loans, not just loans sold to AHFC. And of course the possible cut-off and new restrictions on FHA mortgage insurance will also affect all lenders. Hence, the potential problems discussed above, such as the requirement of a 10% or even 20% downpayment, would affect all home loans, not just AHFC loans.

Furthermore, even in the best of circumstances other lenders will not replace specialized AHFC programs, such as the State Veterans preference program, the Home Ownership Assistance program (HOF), and the Mobile Home loan program. These latter two programs in particular provide the only feasible approach for many individuals to purchase their own home.

Finally, the question needs to be asked as to why AHFC should be eliminated. Although it is true the state has, in the past, provided considerable resources to AHFC (in excess of $1 billion), it is also true that AHFC has made good use of these resources (over $5 billion in loans). More importantly, AHFC has now reached the point that many had hoped for at the outset, in that AHFC is now self-supporting and does not intend to ever come back to the State for additional funding. Further, since AHFC has not requested any funds this year (or last year), no revenue will be gained by passage of this bill.

In fact, the only immediate effect of passage of this bill will be to further disrupt an already slow housing market. And it should be noted that anything that affects a potential purchaser's ability to buy (e.g. increased down-payment) also affects a present owners ability to sell. Hence, even present homeowners would be negatively impacted by passage of this bill.

I apologize for the length of this letter, however this is a complicated, important subject. Purchase of a home generally involves the largest investment and the largest monthly payment for most people, and any action that has a significant effect on home ownership, as this bill will, must be taken most seriously.

If you would like any additional information, please advise me.

Sincerely,

Ron Lehr

House Approves Bill to End Suspension Of Securities Guarantees by Ginnie Mae

By JOANN S. LUBLIN
Staff Reporter of THE WALL STREET JOURNAL

WASHINGTON—The House passed a bill that would end the current suspension of new Government National Mortgage Association guarantees of mortgage-backed securities.

The measure, approved by voice vote, also would prevent the anticipated temporary shutdown next week of the Federal Housing Administration's popular mortgage-insurance program. The Reagan administration opposes the legislation, but the Senate is expected to endorse the House action anyway, possibly this week.

Growing numbers of home purchases and mortgage refinancings, spurred by falling interest rates, have overwhelmed the two Housing and Urban Development Department agencies with business. Two weeks ago, Ginnie Mae had to stop making new guarantees of securities backed by mortgages insured by the FHA and the Veterans Administration because it reached its $65.3 billion statutory ceiling for guarantees in fiscal 1986, which ends Sept. 30.

The FHA's mortgage-insurance program faces a similar shutdown as it approaches its $57.2 billion credit limit for the fiscal year. The House bill, drafted by Rep. Chalmers Wylie (R., Ohio), would raise the Ginnie Mae ceiling to $100 billion for fiscal 1986 and boost the FHA's credit limit to $95 billion.

About $225 billion in mortgage-backed securities outstanding have been guaranteed by Ginnie Mae. The agency helps finance virtually all home loans backed by the FHA and the VA. The cutoff of new Ginnie Mae guarantees already has driven up mortgage rates for government-insured loans. Housing industry leaders warn that by next month, the suspension could severely reduce the supply of these mortgages.

Veto Is Possible

Mr. Reagan might veto the House-approved Ginnie Mae and FHA ceilings on the ground they're too high, however. The House vote came before the administration could formally submit its own legislative proposal, but officials have suggested raising the ceilings to $87 billion for Ginnie Mae and to $81 billion for the FHA.

The administration also wants Congress to impose immediately on the FHA various restrictions that President Reagan previously had suggested for next fiscal year. These include limiting the agency to insuring mortgages for families with annual incomes of $40,000 or less. In addition, the administration would disallow FHA-insured loans for property investors and owners of vacation homes. It also would increase home buyers' mortgage-insurance premiums to 5% from 3.8% of the amount insured.

ATTACHMENT II

Implementation of SB 281 at AHFC

As noted in the letter, it is unclear as to how SB 281 would actually be implemented at AHFC, as there are a number of different ways to interpret the bill. To demonstrate this uncertainty, two possible interpretations will be provided in this attachment. In both cases the following assumptions will be used:

1. Assume the bill has been in effect for two years, hence the decrease in subsidy is 1%; and

2. Market rates/cost of funds for AHFC is 11 1/2%, 1 1/2% above AHFC's "base level" of 10%.

A. "Top Down" Approach

By present law, AHFC can subsidize up to 3%, as long as the loan rate to the borrower is not less than 10%. (Actually, the subsidy only applies to the first $90,000 of a loan, so for simplicity assume all loans are $90,000 or less). Using a "top down" interpretation, which I believe is the most common interpretation, the decrease in subsidy applies to AHFC's maximum subsidy, i.e., the 3% figure. In this case, the 1% decrease from the 3% would mean the maximum subsidy would be decreased to 2%. However, this would still permit AHFC to subsidize the 11 1/2% cost of funds down to a 10% loan rate, since this would only be a 1 1/2% subsidy.

B. "Bottom Up" Approach

Again, same assumptions, except that the 1% reduction is now applied directly to the amount that can be subsidized. In this case, rather than subsidizing 1 1/2% to get down to 10%, the "base level" of 10% would effectively be increased by the amount of the decrease in subsidy. Hence the 1 1/2% subsidy is reduced to 1/2%, such that the interest rate to the borrower would be 11%.

Other interpretations are also possible, however the above should indicate that if the bill were to be passed, some clarification would be needed.

Alaska bankers go south to keep capital coming north

By JIM ERICKSON
Daily News business reporter

The skittishness of Outside investors about Alaska's economic stability has local bankers worried whether money will be available to fund large private construction projects in the state.

A delegation of state bankers, businessmen and politicians visited Seattle this week to urge their counterparts to keep the faith in Alaska. A second trip to the Pacific Northwest is planned May 5.

"I had a good friend of mine at United Bank in Tacoma throw a newspaper down on a desk in front of me and say, 'What the hell is this?' " said Earl Miller, president of United Bancorporation Alaska Inc. The headline on a story from a Seattle paper read, "Is Alaska Headed For a Depression?"

"I don't disagree that the question should be asked, explored," Miller said. "But a lot of people never get past the headline."

Widely circulated newspaper stories about Alaska's economic predicament have made some important Outside investors leery about lending money for new commercial projects here, according to local bankers.

Businessmen here fear the insurance companies, mortgage companies, pension funds and correspondent banks will write the state off as a bad risk amid concerns that the oil-based economy is on the verge of a big fall.

"There's been a kind of a knee-jerk reaction by a lot of the major lenders in the secondary markets," said Scott Hawkins, economist for Alaska Pacific Bank.

Although bank officials won't talk publicly about specific projects, some bankers confide privately that they know of commercial developments that have been scrubbed recently because potential lenders had second thoughts. Others that had the green light are being reassessed in light of

See Back Page, OUTSIDE

OUTSIDE INVESTORS: Alaskans seek to dispel notions of tottering state economy

Continued from Page A-1

the oil price crash.

"There are some projects that were slam dunks, and now are not slam dunks," Hawkins said.

"It's not only insurance companies and money-center banks, but quasi-governmental lenders like Fannie Mae (Federal National Mortgage Association) and FHA (Federal Housing Administration)," Hawkins said. "They've had more people up here on fact-finding missions in the last three weeks than they have in the last three years."

FHA and Fannie Mae are the main insurers of Alaska home loans.

The new caution threatens to make worse problems in getting funding for office buildings, retail centers and other commercial projects.

Most Alaska banks historically have been relatively cash poor. The state's small population means the pool of depositor funds available for financing is shallow, so bankers must find partners among their larger brethren Outside to share financing.

The largest loan ever made by Alaska banks reportedly was a $22 million package to help former Wien Airlines owner James Flood pay off creditors in that company's bankruptcy last year. The deal required the participation of four Alaska banks — no single bank could make the loan on its own and stay within federal lending restrictions.

Yet $22 million would barely cover the cost of the Dimond Center shopping mall expansion now nearing completion.

To assure a steady source of private funding, bankers here have labored for years to erase the "igloo factor," misconceptions about the state that makes many Outside investors uncomfortable about lending money for projects in a remote part of the world.

"Even at the peak of the boom, we had a major education problem," Hawkins said. In 1983, local banks courted West Coast savings and loan associations, inviting them to the state to see first-hand the boom that was going on.

"They got off the plane and said, 'Wow, you've got concrete foundations.' "

Now, the bad news about falling oil prices, oil industry layoffs and the state's $1 billion revenue shortfall is threatening to undo all the efforts.

"It takes a long time to get an investor comfortable with Alaska," Miller said. "If we lose them entirely, we'll have to start all over to build their confidence back up again."

However, an official for one large Seattle bank said concern about falling oil prices and the effect on the Alaska economy is but one small factor in a decision to curtail lending here.

"Were not as active in Alaska as we were four years ago, but it's not because we're doing less marketing there," said David McCormick, vice president for Seattle-based PeoplesBank.

"We see things slowing down in Alaska apart from oil, plus we see our own bank's growth is slowing down," he said. The overbuilt real estate market means potential projects, especially retail centers or office buildings that do not have guaranteed tenants, are not being approved as they might have been when demand was high, he said. His bank is also changing its overall strategy to adjust to banking deregulation, he said.

Oil prices "have an influence," he said. "Some of our board members are asking if we shouldn't be taking an even more conservative stance . . . but oil price may be just one small factor in that decision."

Some trepidation on the part of lenders is justified, both Miller and Hawkins said. Alaskans are facing hard times as government tries to rein in profligate spending patterns of the past, at a time when the economy has already begun to stagnate.

But they believe Alaska is being unnecessarily "lumped into the same basket as Texas or Oklahoma," where lower oil prices are shutting down wells and throwing thousands of people out of work, Hawkins said.

Because of the markedly different structure of the oil industry here and because of large state savings accounts like the Alaska Permanent Fund, the state is in a far better position to cope.

"I don't really believe in my gut that 'depression' is an accurate analysis of what will happen in Alaska," Hawkins said.

Attempts to prevent the red-lining of the state already are under way. Groups of Alaska business leaders and politicians are joining ranks to speak to chambers of commerce, newspaper editorial boards, correspondent banks and other lenders in the Pacific Northwest.

On Monday, Gov. Bill Sheffield told a Seattle audience not to give up on the state. His comments came in a speech delivered during a day-long conference on Alaska sponsored by the Greater Seattle Chamber of Commerce.

The same day, Miller, Hawkins, Mike Burns, president of Alaska Pacific Bank, and Harold Heinze, president of ARCO Alaska Inc., met with officials of at least two Seattle banks.

Another swing through Seattle, Portland and Tacoma is planned for early May. Hawkins said Anchorage Mayor Tony Knowles, Assemblyman Dave Walsh and Ken Calhoon, vice president of the Anchorage Chamber of Commerce, may be part of the "speaking squad."

"I just think it's important that the Chamber of Commerce present a realistic picture as to the business climate in Anchorage. Even if it's not exactly optimistic, at least we can dispel some myths that retailers, banks and service industries are in severe financial distress," Calhoon said.

SB 281 - Interest Rate on State Loans

SECTIONAL ANALYSIS

SB 281 would affect all loan programs administered by the state or an instrumentality of the state.

Under the bill, interest rates would rise 1/2 percent per year until they equalled:

(1) the prevailing market rate or
(2) the cost of borrowing money if the loan program is financed by the sale of bonds or other indebtedness.

Effective date is October 1, 1986.

SB 281

News
4-10-86

Tightening the belt

Senators seeking ways to balance the budget have returned to the idea of raising interest rates on state loans. The Senate's latest proposal is contained in a bill passed Wednesday that gradually would raise the interest rates on state loans — except housing and student loans — until they match market rates.

It's a good idea, although only one of many steps needed to meet Alaska's tightened budget restrictions. The state's loan program is among the most liberal in the nation. And the low interest provisions have been especially generous. It's not unfair in this time of declining revenues to reduce the state subsidy by gradually raising the rates.

The state, as Sen. Rick Halford pointed out, is no longer in a position to act as financier for all Alaskans. The House should act swiftly on the Senate's proposal.

Federation's Role in our Enterprise Economy

April 13, 1985

Senator Rick Halford
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Halford,

We are pleased to write this letter in support of SB 281.

We understand that the bill will raise interest rates on all State loan programs by one-half percent per year until they reach the going market rate for commercial loans.

The AWC FREE Committee's Tax and Economic Development subcommittee has completed a two year study of the State loan programs and recently published the enclosed position paper.

Passage of SB 281 would achieve three of our recommendations:

- Strive for reduction and eventual elimination of State dollar contributions to loan programs,

- Refine present programs to make them self supporting and revolving,

- Eliminate interest subsidies.

Indirectly, the bill would affect our other recommendations.

One of the positive aspects of SB 281 is the bill's equitable treatment of all State loan programs. This feature recognizes the decline in State revenues and the effect of less available funding for all loan programs. We realize that loan recipients are not equally divided among the programs and that the AHFC program services the largest share of recipients.

P.O. Box 4-2955 • Anchorage, Alaska 99509
A committee of the GFWC Anchorage Woman's Club

The AHFC program should be able to continue without subsidy. AHFC has been structured to become self supporting and has received diminishing appropriations for interest subsidies. Elimination of subsidies in a gradual manner should improve AHFC's ability to operate independently. As AHFC's interest rates approach market rates, demand will increase for other housing loan programs. Increased competition in the housing loan market should result in lower market interest rates.

The subcommittee has produced a twenty minute video entitled "Decisions for the 90's" reviewing the loan programs of Alaska and presenting the FREE Committee's recommendations. We are enclosing it for presentation as testimony at hearings concerning SB 281.

If we can be of further assistance, please contact Sarah Schierhorn (279-5305) or Pam Lambe (349-6531) co-chairmen of the committee responsible for the position paper.

Sincerely,

Pauline Martens

Pauline Martens, Chairman
AWC FREE Committee

STATE SUBSIDIES

$49,446.5: Subsidy for the following loan funds.

Student
Teacher Scholarship
Commercial Fishing
Child Care Facilty
Bulk Fuel
Power Project
Rural Electrification
Alternative Energy
Fisheries Enhancement
Historical District
Mining Loan
Residential Energy Conservation
Power Development
Agriculture
Grain Reserve
Housing Assistance

(See Attachment 1. Source: OMB)

$26 million: AHFC loans are currently at market rate. If the market rate were to rise and AHFC loan interest rates were to increase 1/2 percent, as provided in the bill, the state would save $26 million per 1/2 percent increase.

(See Attachment 1. Source: AHFC April 1985 comparison of loan program as modified by SB 281).

1983 GOVERNOR'S TASK FORCE RECOMMENDATIONS (See Attachment 2):

In a report published in January 1983, the Loans Task Force made 26 recommendations toughening up the state loan system. Of particular interest to this bill is the narrative for Recommendation # 17:

> "It was also felt that subsidies should be used rarely and mostly for social purposes rather than for economic development.
>
> "This is because subsidies may have unintended effects, may promote an economy dependent on unrealistically cheap money, and may encourage a high debt structure which would make the economy more vulnerable if the programs were cut." (emphasis added)

Other Task Force recommendations regarding subsidies:

Recommendation # 14:

> "The Task Force recommends...that it is the policy of the State not to subsidize the interest rates on loans to borrowers...unless the decision to do so is stated explicitly and is based on social and/or economic development objectives."
>
> "The Task Force felt that there was no explicit policy concerning subsidized interest rates...Subsidies developed in recent years as market rates rose above statutorily fixed loan rates...No general policy of the state is apparent."

Recommendation # 15:

> "The Task Force recommends that any explicit decision to subsidize the interest rates on loans under any program be reconsidered at least once every two years and either be rescinded or reaffirmed."

Recommendation # 16:

> "The Task Force recommends that programs which include a State subsidy, either through lower loan rates or deferred paymens, should continue to report annually an estimate of the cost of the subsidy."
>
> "The Task Force felt that it is wise to state explicitly reasons for a subsidy and estimated costs of the subsidy in order to monitor the continued appropriateness of the subsidy. Requiring that subsidies be reconsidered every two years would avoid the possibility of unintended program effects resulting from a lack of review."

Recommendation # 17 would tie interest rates on loans funded by appropriations to the U.S. Treasury yield curve.

(Source: Loans Task Force, A Report on Organizational and Policy Issues for Governor William J. Sheffield, January 1983).

A LOOK AT LOAN PROGRAMS TODAY:

1. There are 33 state loan programs. (See Attachment 3).

   21 are active (presently making or servicing loans)
   12 are inactive (no money appropriated this quarter).

2. Delinquency and Default rates. (Delinquency: loans that are more than one day past due. Default: turned over to counsel.) 1st Quarter, FY86. (See Attachment 4).

Mining Loan Fund:	57.6%	($11,303.0)
Agriculture RLF:	34.6%	(18,505.8)
Small Business RLF:	34.4%	(12,190.0) Inactive
Bulk Fuel RLF:	31.8%	(320.0)
Scholarship RLF:	16.1%	(38,217.4)
Commercial Fishing RLF:	14.7%	(11,358.0)
Veterans RLF:	10%	(8,381.0) Inactive

3. Money outstanding: $6,686,786,814 (See Attachment 5)

Housing:	5,502,516.9
Economic Development:	$710,378.2
Education:	$236,718.9
Muni assist/misc:	186,586.2
Energy:	50,585.5

4. Seventeen of the 21 active programs are financed by state appropriation. AHFC, AIDA, Medical Facility Authority, Municipal Bond Bank Authority are financed by bonds.

5. The largest number of all loans outstanding is for Education. The greatest dollar amount of all loans outstanding is for Housing.

The Honorable William J. Sheffield
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Sheffield:

It is a pleasure to submit to you the attached report of the Loans Task Force. We have evaluated the organizational and policy issues on which you asked that we focus, and have offered several recommendations.

While we hope that each of the recommendations will be helpful, we wish to emphasize the consensus of opinion regarding subsidization and privatization. We believe that subsidization as a general rule is not wise, but should be made only for explicitly stated social and/or economic development purposes. We also believe that the State should avoid competition with private financial institutions. We suggest that alternatives be investigated which not only will shift the burden of servicing to the private sector, but also will shift default risk.

The work of the Task Force has been individually challenging and interesting. The issues are complex and affect the economy of the State. The Task Force members wish to thank you for the opportunity to serve you and the citizens of the State, and would individually welcome the opportunity to assist you in the implementation of these recommendations.

Sincerely,

Dave Chatfield, Chair
Loans Task Force

INTRODUCTION

GOVERNOR'S CHARGE

On January 20, 1983, Governor Sheffield accepted the recommendation of the Business Management Task Force, and created the Loans Task Force.

The Governor requested that the Loans Task Force submit recommendations on several organizational and policy issues. In particular, the Governor listed the following five questions to be dealt with by the Task Force:

I. Which loan programs should be consolidated into the Department of Commerce and Economic Development (DCED), and which programs should not?

II. What should be the organization structure dealing with loans within the DCED?

III. What should be the relationship of lending agencies to the DCED?

IV. What should be the involvement of the private sector in public lending programs?

V. What should be the State policy toward the use of subsidized loan rates?

The Loans Task Force accepted the Governor's charge, and committed itself to recommending solutions to the Governor's five questions, while not limiting itself to those questions.

Summary of Recommendations

The following statements represent summarized recommendations of the Loans Task Force as discussed in detail in the body of the report. They are offered primarily for quick review. The numbers do not correspond to the numbers of the recommendations. Appropriate recommendation numbers are cited in parentheses.

1. The administration of almost all loan progams should be placed within the Department of Commerce and Economic Development. The two major exceptions are the Scholarship Revolving Loan Fund and the Housing Assistance Loan Fund (#1, 2).

2. Accounting and collection functions of all noncorporate direct loan programs should be consolidated (#3).

3. Loan programs with the Department of Commerce and Economic Development should be placed within a Division of Investment for administrative control and coordination, and a Division of Finance and Economics should be created to be a central resource unit for planning, research, program evaluation, and bonding (#4, 5).

4. The executive directors of public corporations should report to the commissioner of the appropriate department and serve at the pleasure of the Governor. Boards of directors should be replaced by one Loans Advisory Board of Directors (#6, 7, 8).

5. The State should avoid direct lending programs and competition with private financial institutions whenever possible (#9, 10).

6. The State should sell loans in its portfolio to private institutions and should discourage a public corporation from taking an ownership position in a private enterprise (#11, 12).

7. Alternatives to current program financing should be considered which may shift some default risk to the private sector. Alternatives include guarantee funds and privately placed CD's (#13).

8. The policy of the State should be not to subsidize loan rates in loan programs except for explicit social and/or economic development objectives. Subsidies should be reconsidered every two years and their estimated cost reported annually (#14, 15, 16).

9. Statutorily fixed loan rates in direct loan programs should be abolished. Loan rates should be tied to the U. S. Treasury yield curve plus an adjustment for risk and administrative costs (#17).

10. HAD/CRA should develop a Home Ownership Assistance Program, eliminate distinctions between urban and rural areas and develop an outreach program to serve all State loan programs (#18, 19, 25).

11. All agricultural lending should be done through one program in the Department of Commerce and Economic Development. Only qualified persons should be awarded agricultural land by the Department of Natural Resources, and the agricultural loan program should be for development only (#20, 21).

12. Changes in the Scholarship Revolving Loan Fund should include an increase in the loan rate and adaption of financial need criteria (#22).

13. Procedural and operational audits on programs not regularly audited should be conducted immediately and annually hereafter (#23, 24).

14. Any public officials' code of ethics regarding loan programs should prohibit any attempt to influence a program administrator's decision on loan applications and/or collections (#26).

I. -Which loan programs should be consolidated into the Department of Commerce and Economic Development, and which programs should not?

(Recommendation #1-#3)

Recommendation #1

The administration of the following loan programs are recommended to remain in their current departments:

a. Scholarship Revolving Loan Fund (APEC, Department of Education)
b. Memorial Scholarship RLF (APEC, Department of Education)
c. Housing Assistance Loan Fund (HAD, Department of Community and Regional Affairs)
d. Disaster Relief Fund (Office of the Governor)
e. Outdoor Recreation Open Space (Division of Parks, Department of Natural Resources)
f. Relocation Loan Fund (all agencies; inactive)

Recommendation #2

I. The following loan programs are recommended to be transferred to the Department of Commerce and Economic Development:

a. Ag. Revolving Loan Fund (DNR)
b. Ag. Land Sales (DNR, Division of Land and Water Management)
c. Alaska Housing Finance Authority (Department of Revenue)
d. Alaska Municipal Bond Bank (Department of Revenue)
e. Fishery Prod. Rev. Loan Guar. Fd. (Department of Revenue, Division of Treasury)
f. Alaska Gas Pipeline Authority (Department of Revenue)
g. Alaska Med. Facility Auth. (Department of Revenue)

II. The following loan programs, within the DCED, are recommended to be transferred to the Division of Loans (DCED):

a. Ag. Land Clearing Loans (DCED, AAAC)
b. Medical Malpractice Liability (DCED, Division of Insurance)

Recommendation #3

A centralized accounting and collections division should be created in the Department of Commerce and Economic Development to perform the accounting and collections functions for the direct lending programs in that and other departments.

Narrative for Recommendations #1 - #3

The Task Force identified 30 loan programs in 6 departments administered by 17 divisions or agencies. Most of the programs are in the DCED already. Under the current organization there are 12 programs in 5 departments administered by 11 divisions or agencies which are not in the DCED.

It is the opinion of the Task Force that the State would benefit from a consolidation of all lending programs within the DCED unless there are compelling reasons not to consolidate a program. There are several in-

strumentalities and a loan guarantee program in the Department of Revenue that should be in the DCED. The largest of these instrumentalities are the Alaska Housing Finance Corporation and the Alaska Municipal Bond Bank. There is no compelling reason for these instrumentalities to be in the Department of Revenue. Their activities are linked closely to economic development, and consolidation into the DCED would bring into the same department all of the large bond issuing programs related to economic development. In the opinion of the Task Force this should allow for increased coordination between programs, and for sharing a common base of expertise for planning, research, and evaluation.

A particular need to consolidate agricultural lending programs is apparent. The Task Force noted that agricultural development planning is being conducted in the DCED while agricultural development lending is in the Department of Natural Resources (DNR). As a result, persons may acquire agricultural land in the DNR lottery and may obtain a land clearing loan from the Alaska Agricultural Action Council (AAAC), but may not obtain farm development loans from the Agricultural Revolving Loan Fund (ARLF) in the DNR. This can be solved by bringing the ARLF into the DCED in order to match planning and financing, and by ceasing the land clearing lending function of the AAAC. Thus, all of the agricultural lending would be done by the ARLF, and only persons who qualify for a development loan would qualify for a land clearing loan. The DNR would retain control of the lottery awards, but should have to coordinate with the ARLF to ensure that winners of the lottery can qualify for loans before finalizing the award. The land sales contract can be administered by the ARLF.

Of the 5 loan programs (excluding the Relocation Loan Fund) not recommended for transfer to the DCED, the largest are the Scholarship Revolving Loan Fund and the Housing Assistance Loan Fund. The Task Force found that there were solid reasons for leaving the administration for the lending functions of these programs in their respective departments. The Alaska Postsecondary Education Commission (APEC) can best coordinate the Scholarship Revolving Loan Fund with other student financial aid programs, and is also involved in determining the definition of a student and a program. The Housing Assistance Loan Fund should remain in the Department of Community and Regional Affairs due to that department's ability to act as a delivery system for the program. The Task Force recommends expanding the DCRA's role as a delivery system in recommendation #25 in the section with general recommendations.

However, while the Task Force recommends that their lending functions not be moved, it does recommend that the accounting and collections functions be consolidated into a Division of Accounting and Collections in the DCED. The Division of Loans and Veterans' Affairs in the DCED already has accounting and collections capabilities, as does the APEC in the Department of Education. Administrators of the Scholarship Revolving Loan Fund, the Housing Assistance Loan Fund, and the ARLF indicated interest in the idea of consolidating the accounting and collections functions. Along with its recommendation the Task Force cautions that this consolidation will require expert computer programers to develop, and that the capability of the Division of Accounting and Collections must be developed prior to the transfer of responsibilities.

After the recommended reorganization, the 30 programs would be in 5 departments and 12 agencies or divisions. However, more would be concentrated in the DCED compared to the current organization with only 5 programs in 4 agencies or divisions in 4 other departments. The changes might be made more clear by reviewing Tables I through XIII which diagram the loan programs in the departments both currently and after the recommendations are implemented. Tables I through VI diagram the current organization, while Tables VII through XIII reflect the recommendations of the Task Force.

II. What should be the organization structure dealing with loans within the Department of Commerce and Economic Development?

(Recommendation #4 - #5)

Recommendation #4

The Task Force recognizes the right of each commissioner to shape his or her department as he or she thinks best. With that understanding, the Task Force recommends that, under a deputy commissioner in the DCED, there be created three divisions:

a. The Division of Finance and Economics would be a central resource unit for planning, research, program evaluation, and bonding.

b. The Division of Accounting and Collections would be a central accounting and collection facility for all direct lending programs in the DCED, and for those in other departments where appropriate.

c. The Division of Investment would be an umbrella division containing all of the loan programs in the DCED.

Recommendation #5

The Task Force recommends that the Division of Loans and Veterans' Affairs be renamed the Division of Loans, with three subdivisions:

a. Agricultural Loans

ARLF (from DNR)
AAAC Land Clearing
Ag. Land Sales (From DNR)

b. Commercial and Industrial Loans

Commercial Fishing RLF
Fisheries Enhancement RLF
Mining Loan Fund
Alt. Technology & Energy RLF
Fishery Product Rev. Loan Guar. Ed. (From Dept. of Rev.)

Residential Energy Conservation RLF
Child Care Facilities RLF
Bulk Fuel RLF
Historical District RLF
Medical Malpractice Liability (From Div. of Insurance)

Narrative for Recommendations #4 and #5

An organization chart reflecting the Task Force recommendations is shown on Table VIII above. The rationale for a Division of Accounting and Collec-

tions is outlined in Recommendation #3 and its narrative, and need not be repeated here.

The Division of Finance and Economics is recommended to accomplish several objectives. It would be a central resource group for the department for financial and economic analysis of its programs. It would develop a framework to provide a common direction for department programs. Working with the Division of Strategic Planning in the Office of Management and Budget it could develop action plans to achieve development objectives, and could monitor the programs' progress in meeting objectives. It could also be a source of supplemental staff support with bonding expertise for department agencies which issue bonds and for the State Bond Committee.

This division could collect and analyze industry data, and could work with development advocates within the DCED to develop action plans for the State's development. The financial expertise is a crucial part of any action plan. The program evaluation responsibility is crucial to monitor the effectiveness of a State-supported program. The Task Force recommends that program evaluation be an ongoing process rather than periodic efforts. Therefore, this Task Force is not recommending the addition or the elimination of programs. Rather, it recommends that this division perform an ongoing program of evaluation, and make suggestions for program changes.

The Task Force realizes that the Division of Investment is not an ordinary division because it is an umbrella division that includes lending groups which are themselves divisions. The Task Force believes that the person who fills the director position should be generally well-founded in banking and/or investment principles, and should be strong in management and coordination skills. This person would be an important resource for the commissioner and the deputy commissioner. Therefore, it is recommended that the DCED be flexible in determining the salary range for this position. In addition to being well-informed about the activities of each agency and program, the director should increase cooperation and coordination between programs, perhaps through regular group meetings of all directors and executive directors. This director probably should be located in Anchorage since most of the lending groups in the division are headquartered there.

The Task Force recommends the name change for the Division of Loans and Veterans' Affairs to the Division of Loans for the sake of simplicity. The Division of Loans would receive the Medical Malpractice Liability Revolving Loan Fund, the Fishery Product Revolving Loan Guarantee Fund and the agricultural lending responsibilities from other departments or divisions. However, the Task Force recommends that the agricultural subdivision of the Division of Loans continue to be located in Wasilla where it can work closely with the DNR and with its borrowers.

III. What should be the relationship of lending agencies to the Department of Commerce and Economic Development?

(Recommendation #6 - #8)

Recommendation #6

The Task Force recommends that the boards of directors of the following instrumentalities be eliminated:

a. Alaska Housing Finance Corporation
b. Alaska Industrial Development Authority
c. Alaska Municipal Bond Bank
d. Alaska Power Authority
e. Alaska Gas Pipeline Authority (inactive)
f. Alaska Medical Facility Authority
g. Alaska Resources Corporation

Recommendation #7

The Task Force recommends that the Executive Directors of the agencies listed in recommendation #6 serve at the pleasure of the Governor and report to the Commissioner of the Department of Commerce and Economic Development as illustrated in Table VIII.

Recommendation #8

The Task Force recommends that the Governor appoint one Loans Advisory Board of Directors not to exceed seven persons, serving staggered terms, drawn from the private sector for diversity and expertise.

Narrative for Recommendations #6 through #8

The State has several public corporations and authorities attached by statute to certain departments. These public corporations and authorities issue bonds and make economic development decisions without a clear line of command between them and the departments to which they are attached. This would remain true even after the agencies are consolidated into the DCED as suggested in the section dealing with program consolidation.

The Commissioner of the DCED is only one of several board members on the boards of the Alaska Housing Finance Authority, the Alaska Industrial Development Authority, the Alaska Resources Corp., and the Alaska Gas Pipeline Authority (inactive). He is not on the board of the Alaska Municipal Bond Bank Authority or the Alaska Medical Facility Authority.

Being but one of several board members blurs the line of command and accountability from the Commissioner to the head of the agency. To the extent that this may allow agencies to become independent of the departments, several problems arise. First, bonding decisions, which may affect the State's credit and access to the bond markets, may be made outside of the control of the department. Second, economic development decisions may be made outside of the executive department of State Government. Finally, it is difficult for a commissioner to hold an agency head accountable when the commissioner is an active board member, and it is difficult to define the accountability of a commissioner when he or she is but one of several board members.

In order to clarify the chain of command and to improve control and accounta-

bility, the Task Force recommends that instrumentalities within departments not have controlling boards of directors. Rather, the head of the agency should report to the commissioner in such manner as the commissioner may determine. In order to provide the executive directors and the commissioner with advice and consultation on operations and control, the Task Force recommends that the Governor appoint from the private sector one advisory board of directors for all of the loan programs within the DCED. The Task Force members generally felt that the number of directors should be limited to seven, serving staggered terms and representing a broad range of expertise in lending, investments, computer automation, management, and control. It was felt also that the board of directors should receive travel expenses plus per diem, plus an honorarium of $250 - $400 per day of service. Finally, it was suggested that the Governor might request recommendations for appointment from appropriate professional associations in the State.

IV. - What should be the involvement of the private sector in public lending programs?

(Recommendation #9 - #13)

Recommendation #9

The Task Force recommends that the State express a policy to the effect that it is the policy of the State not to compete with private financial institutions in its lending programs.

Recommendation #10

The Task Force recommends that, in accordance with the policy statement in recommendation #9, direct lending by State programs should not be encouraged, and should be utilized for social and/or economic development goals only when private sources of financing are not available under reasonably similar terms and conditions.

Narrative for Recommendations #9 and #10

The Task Force felt that State-supported loan programs should utilize the private sector for loan origination and servicing as much as possible. Also, it was felt that a direct loan program should follow a policy that it would not finance a borrower unless that borrower could not obtain reasonable private financing. However, it is recommended that this be carried out by policy directive which can be flexible rather than by statutory restrictions. Such a policy statement would require that alternatives to direct lending be considered and explicitly discarded before initiating a new direct lending program. These Task Force recommendations would support an investigation of contracting out to private firms the servicing of current loans held in the State's portfolio. However, it was felt that unless the State can contract out substantially all of the loan servicing it may not be economically feasible to contract out a portion due to high fixed costs the State would incur in servicing the remaining loans.

Recommendation #11

The Task Force recommends that private institutions be encouraged to purchase unpledged loans held in the State's direct lending portfolio under terms and conditions to be negotiated at the time between the private institution and the commissioner of the appropriate department.

Narrative for Recommendation #11

The Task Force felt that there are many instances where an applicant is considered too risky by a private lender, due perhaps to the lack of a credit or operating history. Once the borrower can demonstrate a favorable history on the loan, a private lender may be interested in purchasing the loan to gain access to a geographic area or to gain a future good customer. It would be advantageous to the State to sell its loans to a private lender to encourage private financial services to be made available everywhere, and to obtain a source of funds for new lending.

Recommendation #12

The Task Force recommends that the State express a policy to the effect that it is the policy of the State to discourage a State-supported agency or program from taking an equity (ownership) position in a private enterprise, except as a last resort to protect the State's existing investment in that enterprise.

Narrative for Recommendation #12

Members of the Task Force agreed that it is not desirable for a government agency to own or to have ownership of a private enterprise. Agencies which have the autnority to acquire ownership interest should do so only as a last resort. Those agencies are encouraged to utilize flexible debt arrangements and royalty agreements to a large extent, and to avoid ownership.

Recommendation #13

The Task Force recommends that, where feasible, alternatives to direct lending by current programs be considered. These alternatives should attempt to shift default risk to the private sector as well as loan servicing responsibilities. Two such alternatives are discussed in the narrative.

Narrative for Recommendation #13

The Task Force felt that available evidence suggests that State direct and indirect lending have driven private financial institutions out of the Alaskan market. This is reflected generally in a decline in the loan/asset ratio and in a rise in the ratio of cash and investments to assets of private financial institutions. The Task Force also felt that simply using the private sector for origination and servicing is not preferable to developing a system which encourages the private sector to assume its traditional role of a profit-motivated risk taker. Even if the private sector originated and serviced all of the loans made by State-supported programs, it would not be raising and putting at risk its own capital.

The Task Force identified two alternatives to current programs that might be considered further. The first alternative would be to eliminate all lending programs and to replace them with loan guarantee funds similar to the Fishery Product Revolving Loan Guarantee Fund. If the State decides to subsidize the interest rate on a loan, it could do so by appropriating the difference between the interest that the borrower pays and the interest that the institution charges. The benefits of the procedure are that the private sector is raising the loan funds and lending them, and pressure on appropriations may be reduced.

If the fund guarantees less than 100% of the loan, the private sector shares the default risk with the State. While the Task Force does not recommend 100% guarantees, even if the fund were to guarantee 100% of the loan and would have to have an appropriation equal to the principal amount of the loans, the pressure on the State's budget would be eased in the long run unless all of the loans defaulted.

The Task Force identified some problems to be resolved. First, if subsidy payments are made to the private institution, it may create taxable income to the borrower. The Department of Law would have to clarify that. Second, any system that relies on the private sector to deliver the programs to the public must consider the delivery system to geographic areas not well served by private institutions. This may be solved by expanding the role of the Department of Community and Regional Affairs to be the main delivery system in rural areas as suggested in Recommendation #25. Finally, the private sector may not be able to offer long-term loans or flexible repayment schedules that are required in some circumstances.

The second alternative for consideration is that the State might devise a new system of financing loan programs. Rather than appropriating money to fund a loan as is now done in direct lending programs, it might be possible to appropriate money to fund the purchase of negotiated certificates of

deposit which private institutions could utilize as a funding source for the loans. The CD's would be dedicated for certain purposes with certain restrictions. Ownership of the loans would be held by the private sector which would also service them.

If the program requires deferred loan payments (such as the Mining Loan Fund), then interest payments on the CD would also be deferred. In addition, if the State desires, the CD could be pledged to guarantee a portion of the principal amount of the loan. In that case, the private sector would share a portion of the default risk with the State. For example, if the CD is pledged to guarantee 70% of the principal amount of the loan, in case of default, the institution would repay only 30% of the original CD less any previous principal payments. Essentially, the State would have to enter into a contractual agreement with private financial institutions whereby they would agree to make certain types of loans with certain terms. The institution would agree to pay the State the loan rate less a discount to cover administrative costs and profit.

The benefits of this alternative are that private institutions retain their sharp competitive edge since they retain default risk, and that the State provides a long-term source of funds for long-term loans. Other than the delivery system problem mentioned above, the primary proolem identified by the Task Force is that it is possible that private institutions would be unwilling to enter into reasonable contracts. If that were the case, the State would have to continue its direct lending programs, but would do so with the assurance that there is no viable alternative.

V. What should be the State policy toward the use of subsidized loan rates?

(Recommendation #14 - #17)

Recommendation #14

The Task Force recommends that the State express a policy to the effect that it is the policy of the State not to subsidize the interest rates on loans to borrowers through State-supported programs unless the decision to do so is stated explicitly and is based on social and/or economic development objectives.

Narrative for Recommendation #14

The Task Force felt that there was no explicit policy concerning subsidized interest rates in State loan programs. An examination of historical data suggested that most programs were created with loan rates that were at or above the U. S. Treasury yields. Subsidies developed in recent years as market rates rose above statutorily fixed loan rates. While a subsidy has been institutionalized in the programs of the Alaska Housing Finance Corporation, no general policy of the State is apparent.

Recommendation #15

The Task Force recommends that any explicit decision to subsidize the interest rates on loans under any program be reconsidered at least once every two years and either be rescinded or reaffirmed.

Recommendation #16

The Task Force recommends that programs which include a State subsidy, either through lower loan rates or deferred payments, should continue to report annually an estimate of the cost of the subsidy.

Narrative to Recommendations #15 and #16

The Task Force felt that it is wise to state explicitly reasons for a subsidy and estimated costs of the subsidy in order to monitor the continued appropriateness of the subsidy. Requiring that subsidies be reconsidered every two years would avoid the possibility of unintended program effects resulting from a lack of review.

Recommendation #17

With respect to the interest rates on loans in the programs funded only by appropriations the following recommendations are made:

a. Abolish statutorily fixed loan rates and replace them with rates that are tied to the U. S. Treasury yield curve.

b. The unsubsidized loan rate on a loan would be the prior month's six-month moving average of U. S. Treasury interest rates for the approximate maturity length of the loan, plus an additional 200 basis points for risk adjustment and for administrative costs.

c. When the unsubsidized loan rate equals 10% or less, the program loan rate shall be equal to it unless an exception is explicitly stated and the social purpose defined.

d. Loan programs which for economic reasons offer loans with deferred loan payments should accrue interest on those loans.

Narrative for Recommendation #17

The Task Force was in agreement that generally it is the availability of money which is more important than its cost. It was also felt that subsidies should be used rarely, and mostly for social purposes rather than for economic development. This is because subsidies may have unintended effects, may promote an economy dependent on unrealistically cheap money, and may encourage a high debt structure which would make the economy more vulnerable if the programs were cut.

Statutorily fixed loan rates are clear, but are cumbersome to change and can have unintended policy effects due to shifts in market rates. Tying loan rates to market rates would eliminate the need to statutorily adjust them to the market each year. A six-month moving average is recommended because it will smooth out fluctuations in market rates. Also, during periods of declining rates, borrowers will have an incentive to turn to the private sector, whereas when interest rates are rising, State programs will be more attractive. This would give State programs a counter cyclical effect which would be beneficial.

It is recommended that the unsubsidized loan rate equal the Treasury rate plus 200 basis points. This will partly adjust for risk, but not entirely. It was noted that the November bond issue of AHFC was priced about 150 basis points over the Treasury yield. The balance of 50 basis points is designed to cover program administrative costs. The Task Force felt that, since only borrowers directly benefit from a State-supported program, the borrowers should pay toward the administrative costs of the program.

Finally, the Task Force felt that there should be no subsidies when loan rates are at or below 10% unless they are for specific social purposes such as the proposed Home Ownership Assistance Program in the Housing Assistance Loan Fund mentioned in Recommendation #18.

VI. Some program-specific recommendations are made.

(Recommendation #18 - #22)

Recommendation #18

The Task Force recommends that the Housing Assistance Division, Department of Community and Regional Affairs, develop a Home Ownership Assistance Program adapted with appropriate modifications from a similar program offered by the Alaska Housing Finance Corporation.

Recommendation #19

The Task Force recommends that the distinction between urban and rural nonconforming housing loans be eliminated, and that the definition of a rural area be reconsidered for the rural owner-occupied and nonowner-occupied housing programs in the Housing Assistance Loan Fund.

Narrative for Recommendations #18 and #19

The Task Force felt that the benefits of home ownership were not being offered to low-income persons as effectively as they are through AHFC. It was felt that the primary justification for different loan rates between programs should be based on appropriate family income differences. The Task Force also felt that market demand should determine the urban/rural composition of nonconforming housing loans. Finally, the definition of a rural area in the second through fourth judicial districts should be reconsidered. The Task Force felt that an area can be clearly rural in nature and still have road or rail access to Anchorage or Fairbanks.

Recommendation #20

The Task Force recommends that it be made clear that agricultural lending, to be consolidated in the Division of Loans, DCED, is for the purpose of farm development and not intended to replace private and other sources of financing for agriculture. As part of the loan application package, a plan should be developed which outlines how and when the borrower shall cease using the Division of Loans as a source of financing.

Narrative for Recommendation #20

Members of the Task Force felt that is was important to recognize the State's program as a development tool, but that it should not be a source of continuing subsidized financing. Only by developing a plan which will gradually move the borrower toward other sources of financing at market rates can the State develop a healthy, properly financed agricultural sector.

Recommendation #21

The Task Force recommends that the Department of Natural Resources, Division of Land and Water Management, work with the Department of Commerce and Economic Development to develop a system which will ensure that only persons who will qualify for farm financing will be awarded agricultural land in the land disposal program.

Narrative for Recommendation #21

The Task Force felt that it made no economic sense to award persons agricultural land and give them a loan to clear it if they were not qualified to obtain a farm development loan. One solution would be to have the finalization of the land award dependent on qualifying for a farm loan, and having all clearing and development loans made through one program.

Recommendation #22

The Task Force recommends that the Alaska Postsecondary Education Commission adopt the following changes to the Scholarship Revolving Loan Fund:

a. The loan rate should be set in accordance with Recommendation #17.

b. The APEC should develop Alaska-specific financial need criteria to determine:

(1) how much the unsubsidized loan rate may be reduced; and,

(2) whether interest payments during the study term may be deferred or forgiven.

c. Any qualified borrower should be able to apply for one-half of the current loan limit ($6,000 per year for undergraduate and $7,000 per year for graduate study). The APEC should develop Alaska-specific financial need criteria for use as a guideline for applicants requesting to borrow in excess of one-half of the current loan limit.

Narrative for Recommendation #22

The Task Force felt that the primary reason for the explosive growth of the Scholarship Revolving Loan Fund is that its terms are too attractive and that there are no financial need criteria used. This situation has resulted in many students borrowing from the fund, even when they have funds of their own, in order to earn arbitrage income between the loan rate and market interest rates. By setting the loan rate for this fund the same as is recommended (#17) for other funds, and then requiring Alaska-specific need criteria to be used to lower the loan rate, the State can ensure that only students who have financial need are obtaining loans.

The Task Force felt that only after such alternatives are considered in order to reduce demand pressure on the loan fund should consideration be given to alternative mechanisms for financing the fund. Such alternative mechanisms may include those discussed in the narrative for Recommendation #13 or may include bonding. However, if bonding is considered, the Task Force recommends soliciting proposals from several sources including the Student Loan National Marketing Association.

VII. Some general recommendations are made.

(Recommendation #23 - #26)

Recommendation #23

The Task Force recommends that a certified "entry" audit of all loan programs be conducted by an independent auditing firm. This audit would exclude programs which already regularly are the subject of an audit by an independent auditing firm, and have received such a certified audit within the past 12 months.

Recommendation #24

Using the "entry" audit in #23 as a starting point, the Task Force recommends that there be annual procedural and operational audits of all loan programs not already regularly audited.

Narrative for Recommendations #23 and #24

The Task Force felt that an audit of operations and procedures of loan programs should coincide with the entry of a new administration. Further, the Task Force felt that annual audits should be conducted on loan programs not already subject to an annual audit. The Task Force sugested that the annual audits might be conducted either by the Division of Banking & Securities, DCED, or by the Division of Management, Office of Management and Budget.

Recommendation #25

The Task Force recommends that the State expand its efforts to serve all parts of the state by increasing the role of the Department of Community and Regional Affairs in an outreach program of information, explanation, and education for all State-supported loan programs.

Narrative for Recommendation #25

The Task Force noted that the primary reason for having the housing loan program within DCRA was to utilize their presence in the rural areas as a delivery system. In addition, it was noted that the DCRA does do some information work for the State's commercial fishing loan program in western Alaska. It is the opinion of the Task Force that the rural presence of the DCRA should be utilized formally as a central source of information and education in an outreach program serving all State-supported loan programs.

Recommendation #26

The Task Force recommends that any policy statement on ethics regarding public officials and loan programs should include a provision to the effect that legitimate concerns of constituents and constituent inquiries are protected, but officials making such inquiries should not attempt to influence program administrators in their decisions on loan applications and/or collections.

Narrative for Recommendation #26

Members of the Task Force considered it to be an abuse of power by a public official to attempt to influence the administrator of a loan program in decisions on applications and/or collections. Inquiry is legitimate, but coercion is not. The Task Force felt that a public official's ethics statement should cover this topic.

INTRODUCTION

The implementation of the Special Mortgage Loan Purchase Program had a dramatic and profound effect upon the economy and housing markets of the State of Alaska. Pursuant to the 1980 Legislation, the program offers interest rates below current interest rates offered in the traditional secondary mortgage markets.

Through the varied programs offered by AHFC, a large segment of the population's housing needs are being met. Not only is AHFC providing affordable housing for the citizens of the State of Alaska, the benefits are disbursed to a much larger segment of the population. The tradesmen, suppliers, realtors, builders, appraisers, bankers and retailers benefit either directly or indirectly from AHFC's participation in the mortgage market of the State of Alaska.

Although the Corporation's activities now constitute a significant portion of the Alaskan residential mortgage market, AHFC does not lend funds directly. Rather, the Corporation is a secondary market for mortgage loans originated by private lenders. The majority of the funds used to purchase the mortgage loans are generated through the issuance of taxable and tax-exempt bonds. Additionally, the Corporation has received direct appropriation from the Legislature that has allowed AHFC to purchase mortgages that bear interest rates below the national average.

The Corporation purchased $836.2 million in loans in FY '85 and received bond authorization for up to $1.5 billion of which $605 million was utilized. The Capital Budget for FY '85 appropriated $16 million in cash to the Alaska Housing Finance Revolving Fund. This appropriation was recinded during the 1985 legislative session. The Corporation has not requested an appropriation for FY '86 but will fund the operations of its programs from amounts available in the Revolving Fund.

The Corporation enjoys substantial financial support from the State of Alaska which, to date, has appropriated $747,871,000 in cash (exclusive of $16,000,000 FY '85 appropriation subsequently recinded) and $286,000,000 in mortgage loans to the Corporation to support its various programs. AHFC has also borrowed $45,070,000 from the State for various purposes. Through December 31, 1985, the Corporation has issued $1,752,000,000 taxable bonds and notes and $3,365,505,000 tax-exempt bonds.

In 1981, legislation was enacted which significantly impacted the method of determining mortgage interest rates. The legislation eliminated the previously "fixed" interest rates of 10 percent on the first $90,000 of the mortgage loan (9 percent if the loan was made to an eligible State veteran) and replaced it with a "sliding" rate to reflect the increased cost of funds to the Corporation. The "sliding" rate is designed to keep the interest rate on the first $90,000, the amount subsidized by the State, to within 3 percent of the cost of funds to the Corporation.

Disruption and volatility in the capital markets during 1981 and 1982 caused mortgage interest rates to increase from the previously fixed rate of 10 percent to 12-3/8 percent on the first $90,000 of the loan and from 12.29 percent to 19.411 percent on the balance of the loan in excess of $90,000. In response to the increasing rates, AHFC implemented the Alaska Building Equity (ABE) Mortgages on June 1, 1982. The ABE Mortgage enhanced the Corporation's ability to access the shorter-term and less expensive capital markets.

The interest rate on an ABE mortgage remains fixed for the entire life of the mortgage, and the monthly payments are amortized on a 30-year level payment basis. However, beginning in years four through nine, the monthly payment is increased by 5 percent each year with the increased portion of the monthly payment applied directly to the outstanding principal of the mortgage loan. As a result, the loan is fully repaid within 16 to 18 years, depending on the interest rate, and the amount of total interest paid during the life of the mortgage is approximately half of that paid if the same loan was repaid over a 30-year period.

The ABE structured mortgage applies to all of the Corporation's programs, with the exception of the Mobile Home Loan Purchase Program and the Second Mortgage Loan Program.

Due to AHFC's significant role in providing affordable housing to the citizens of the State of Alaska and AHFC's commitment to keep the public and elected officials informed, we offer this guide as a reference for your use in reviewing AHFC's programs and activities.

Appropriations		
Mortgage Purchases		6,500,000*
Title Insurance Fund		130,000
Mortgage Insurance Fund		325,000

**In FY 85 the legislature appropriated $16 million to the Alaska Housing Finance Revolving Fund. This appropriation was rescinded the following year.

(continued on Page 2)

ALASKA HOUSING FINANCE CORPORATION

SUMMARY OF STATE FINANCIAL SUPPORT
(continued)

Home Ownership Assistance Program ("HOF" Fund)*

FY 81		
Appropriation		
Mortgage Loans	$ 50,000,000	
Cash	2,500,000	
FY 82	43,000,000	(1)
FY 83	45,000,000	(2)
FY 84	42,250,000	(2)

State Mortgage Insurance Fund	Total Appropriated	Appropriation Requested and Received
Prior to FY 80	7,100,000	7,125,000
FY 80	6,000,000**	3,000,000
FY 81	12,500,000	6,640,000

** Total Appropriation	$ 6,000,000
Less Amount Unavailable from Veterans Revolving Loan Fund	2,000,000
Less Amount for Mobile Home Insurance Funds Only	1,000,000
	$ 3,000,000

Other State Loans

Loan for Multi-Family Project	($4,420,000 at 3.47%)
Loan for Rural Mortgages	($5,250,000 at 6.00%)
Loans to Fund Capital Reserve Requirement for Insured Mortgage Bond Program	($12,800,000) (3)

(1) Home Ownership Assistance Program appropriation to be utilized to purchase mortgages as follows:

Mobile Home Loans	$18,000,000
Rural	20,000,000
Rural Non-Owner Occupied	5,000,000

(2) To be utilized to purchase Mobile Home loans.

(3) Interest rates on loans are equal to the earnings of the investments made with the loans.

* On June 30, 1984 the SAM Fund, HOF Fund and direct appropriated mortgage loan program amounts were consolidated into the Alaska Housing Finance Revolving Fund.

ALASKA HOUSING FINANCE CORPORATION

Summary of Program Information

State Fiscal Year	Bonds Issued	Bond Authorization	Appropriations	Mortgage Commitments (All Programs)	Operating Budget	Full-Time Staff Positions
FY 81	$614,400,000	N/A	$562,955,000	$ 755,258,150	$1,800,000(1)(3)	31
FY 82	$802,000,000	$ 802,000,000	$265,000,000	$ 765,189,300	$2,276,200(3)	43
FY 83	$760,000,000	$ 980,000,000	$150,000,000	$1,137,970,700	$3,441,000(3)	45
FY 84	$980,000,000*	$ 980,000,000	$ 49,051,000	$1,239,963,225	$2,713,000(2)(3)	45
FY 85	$604,935,000*	$1,500,000,000	0-	$ 674,750,543	$2,913,900(2)	46

(1) AHFC was not under the Executive Budget Act for the State's fiscal year. The Corporation's fiscal year did not coincide with that of the State. The $1.8 million is an estimate based upon actual expenses for the period 7-1-80 through 6-30-81.

(2) Does not include Trustee fees previously included in operating budget. Beginning in FY 84 these fees are included in the Capital Budget.

(3) Actual annual operating expense amounts.

* Does not include $175 million and $125 million collateral notes committed sold directly to FNMA during FY 87.

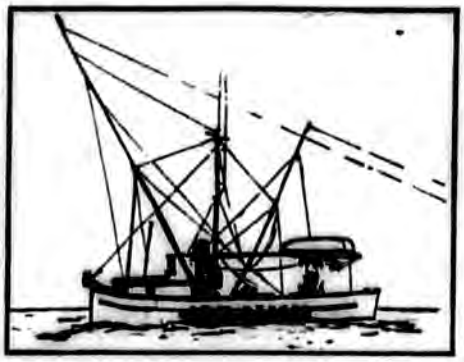
MEMORANDUM

TO: REPRESENTATIVE JOHN SUND
Chairman, House Special Committee on Loans
FROM: Representative Jack Fuller
DATE: April 18, 1986
SUBJECT: CSSB 281(Fin) am

I would like to see the state's commercial fishing loans, AS 16.10.300 - 700, exempted from the provisions of CSSB 281(Fin) am. This bill would raise the interest on state loan programs by one half percent per year until they are competitive with loans available from private lending institutions.



As you are aware, commercial fishing loans are a unique part of the state's loan programs. Private lending institutions are not able to make loans for the purchase of limited entry permits. Banks cannot take the permits as collateral.

I have worked for many years on the part (B) loans. First enacted as the Fishermen's Mortgages and Note Fund, this program was designed to assist primarily rural fishermen who were just getting into commercial fisheries. It has enabled many new entrants to participate in the developing herring and small boat halibut fisheries in Western Alaska. The program originally began as state loan guarantees to private banks, but that was found to be unworkable as banks simply were not interested in making relatively small loans to applicants with poor credit ratings. It has since been incorporated under the state loan program. If included in CSSB 281(Fin) am, I am fearful that these types of loans would soon disappear.

Commercial fishing loans serve a very valuable role in keeping Alaska residents in the fisheries. Indeed, the loans are one of the very few ways that Alaskans can "have a leg up" on outsiders. Continuation of the state fisheries loan programs is extremely important to Alaskans all over the state.

I support the April 14 memorandum to you from the House Special Committee on Fisheries, and hope you will carefully consider this exemption.

4/21/86

Representative John Sund, Chairman
House Special Committee on Loans
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Senate Bill No. 281, "An Act relating to the interest rate on State loan programs".

Dear Representative Sund:

The Alaska Trollers Association is very concerned about the potential negative consequences to the above-cited Bill should it pass as written. I have had the opportunity to see Representative Goll's memorandum to you on the subject dated April 14, 1985, and concur entirely in his analysis and recommendations.

The Alaska power troll fleet has one of the highest residency rates of any of Alaska's limited entry fisheries. Power trolling is a mainstay industry throughout rural Southeast Alaska. The existance of the State loan program has been an important factor in maintaining this high resident participation level in our fishery - a fact we are proud of. Let's face it, many rural residents simply don't have ready access to other financing sources. The "edge" that the State program gives to Alaskans helps keep jobs and earnings here. This vital program should not be curtailed! In this time of diminishing economic activity, we should do all we can to encourage Alaskan small businesses. The fishing loan programs do exactly that. If anything, these programs need improvement and expansion.

Sincerely,

for

Earl E. Krygier

(907) 842-5257

April 21, 1986

Representative Adelheid Herrmann
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Representative Herrmann,

The Bristol Bay Native Association is extremely concerned about the proposed Senate Bill 281. The Bill would raise interest rates on State loans by one-half percent annually, until the rates were identical to private banking rates. This policy would be detrimental to Bristol Bay fishermen and, in the long run, to the State of Alaska.

The State of Alaska loan programs have provided residents of rural Alaska, and Bristol Bay in particular, the opportunity to enter into or increase participation in the fishing industry. Commercial fishing loans made to residents by the State for boats and permits have enabled our people to stay competitive and increase production. The success of resident fishermen is important to the local economies. Increased individual earnings positively impact the villages and regional centers through increased sales and employment. There are almost 250 Bristol Bay Commercial fishing loans with the State of Alaska. Those loans represent many individuals that would not have been able to receive a loan for a boat or permit if it were not for the State program. Many village residents do not qualify for bank or CFAB loans because they do not have the proper collateral. Rural residents have only recently transitioned from a full time subsistence lifestyle to a cash economy and do not own the homes, airplanes, land, etc. that are often used as collateral by applicants from Alaskan cities or outside of the State. There are few, if any, winter jobs for these residents and many have had only their permits to use as collateral. The use of a low interest loan is imperative to rural residents as a mechanism to build their income and earning power to a point where their earnings and credit history would enable them to apply for private banking loans if they were needed.

The increase in interest rates and the possibility of the loan programs being eliminated altogether would be disastrous to the Bay area. Instead of increasing employment, economic self sufficiency and local business development, this change in the loan programs would lead to an increase in the number of permits leaving the Bay and the State. A local person's inability to obtain a loan and pay relatively low interest on that loan would endanger their success in the industry. The fact that fish will not be canned in Bristol Bay in 1986 indicates the

changing trends in the fisheries. The fresh frozen market makes different demands on its fishermen and their equipment needs have, and will continue, to change in order to deliver better quality fish. This is evidenced by the fact that the increase in the fresh frozen market meant that fishermen had to replace wood boats with fiberglass vessels in the early 80's when buyers determined that paint chips from wood boats were detrimental to fish destined to be sold whole. If local fishermen are going to remain current in this industry, and the profits from this great renewable resource are to stay in Alaska, rather then be spent in Washington or Oregon, then we need to continue this program and maintain it in such a way that Alaskans are encouraged to develop their business. The Commercial Fishing Loan Program keeps people working in Bristol Bay. Certainly a loan which is paid back is more beneficial to the State than the subsidies which are paid out (and never re-couped) to individuals who are unemployed and in poverty.

The Bristol Bay Native Association urges you and your colleagues to carefully consider Senate Bill 281 and the long term negative affect it may have on the Bristol Bay economy. If nothing else, perhaps the Fishing Loan programs could be exempted until further research is done. The Association understands the importance of cutting State expenditures. We are concerned, however, that the decisions made this year (especially those that deal with private sector economic development) do not end up making us more, not less, dependent on our State resources.

Thank you for your consideration.

Sincerely,

BRISTOL BAY NATIVE ASSOCIATION

Special Committee on Fisheries

M E M O R A N D U M

April 14, 1986

TO: Representative John Sund
Chairman
House Special Committee on Loans

FROM: Representative Peter Goll
Chairman
House Special Committee on Fisheries

SUBJECT: CSSB 281(Fin) am

As I understand the intent behind SB 281, it is intended to get the state out of the loan business by gradually raising the interest on the loan programs until they are competitive with loans available from private lending institutions. The theory is that Alaskans will turn to the private sector once the rates are identical.

While this goal is laudable in today's changing revenue picture, I believe that there are over-riding public policy reasons for exempting the state's commercial fishing loans from this legislation.

The goal of the Commercial Fishing Loan Act [AS 16.10.300-370] is to help foster the development of resident-dominated commercial fisheries.

The Commercial Fisheries Entry Commission (CFEC) reports that non-residents gained 105 permits by the 1985 from the number of permits originally issued. Non-residents were initially issued 2,431 permits or 19.2 percent of the total; by the end of last year the number had climbed to 2,536 or 20.3 percent of the total.

Testimony by state experts before the House Special Committee on Fisheries indicates the state loan program played a major factor in helping hold the line on resident participation in Alaska's salmon fisheries. The loan program provides the only legal method for the state to discriminate between Alaskans and non-residents in the commercial fisheries.

With the exception of the financially troubled Commercial Fishing and Agriculture Bank (CFAB), no private lending institutions are allowed to make loans for the purchase of limited entry permits. Alaskans have gained a significant advantage over non-resident fishermen through their ability to secure lower interest loans, using the permit itself as collateral.

Since the fishing industry provides the largest source of non-government related employment in Alaska, I believe continuation of the loan program is vital to the state's economic base. This is particularly the case since CFAB's loan terms are significantly stricter than those available from the state or private lending institutions.

A "typical" permit loan by CFAB carries a 14.75 percent interest rate on a five-seven year note covering 70 percent of the permit value. A "typical" state permit loan has a 10.5 percent interest rate on a 10-year note covering 90 percent of the permit value.

Of the 3,877 limited entry permits sold through the end of 1985, transfer surveys by CFEC show 895 of these or 23 percent of total sales were financed under the state loan program, while only 37 or 1 percent were financed by CFAB. The transfer surveys also indicate that rural residents have an even heavier dependence upon the state loan program, since 32.9 percent of permit sales by rural residents (nearly all of which went to other Alaskans) were financed under the state loan program, while 1.4 percent were financed by CFAB.

Studies have revealed some very troubling trends in the transfer of limited entry permits from rural areas which are heavily dependent upon fishing. CFEC figures show that rural Alaskans hold 644 fewer permits than originally issued by the end of 1985, for an "outmigration" rate of 11.5 percent. A 1984 CFEC study revealed that permit ownership by Alaska Natives had declined by 13.8 percent since limited entry was first imposed.

These figures raise concerns about the ability of future generations of rural Alaskans to participate in the only significant source of cash income in their areas of residence.

Under AS 16.10.310 (a) (1) (B), Alaskans who live in areas dependent upon commercial fishing and who do not qualify for loans under other public or private programs are eligible to receive a state loan for purchases of vessels, gear and limited entry permits. This program is designed to ensure that Alaskans who live in fishing-dependent areas and lack adequate financial resources have the ability to enter the commercial fisheries. Loss of the "section B" loans could greatly exacerbate the permit outmigration trends in rural Alaska.

Experience with the "section B" loans show very little interest from private banks. The program was first established as loan guarantees by the state to private banks, but it was incorporated under the state loan program after it was determined that private banks simply were not interested in loaning to applicants who lack strong credit ratings.

After extensive hearings on the issue of permit outmigration from rural Alaska, the House Special Committee of Fisheries concluded in 1985 that the "section B" loans probably provided the best method of addressing the situation.

In summary, the Commercial Fishing Loan Act provides the only realistic source of financing available to Alaskans to purchase limited entry permits, and the state loan program is critical to the economic future of rural Alaska communities. On behalf of Alaska's commercial fishing community, I urge you to exclude the AS 16.10.300-370 from CSSB 281(fin) am.

Department of Commerce & Economic Development / POSITION PAPER

CSSB 281 (FIN): "An Act relating to the interest rate on state loan programs."

Department position: support with amendments.

This bill would amend AS 37.05.035 to increase the interest rate for state loan programs (with the exception of student loans) by one-half percent each year until the interest rate is equal to the prevailing market rate or the cost of funds for each type of loan.

The department would like to offer an alternative approach to this bill. These comments are directed solely to the loan programs which this department administers and are funded by General Fund appropriations rather than bond sales. It is suggested that the market-tied formula approach to interest rates proposed in House Bill 109 be utilized for this bill. With this approach, the statutorily fixed interest rate could be eliminated and replaced with a formula that would move with the market over time. The formula is as follows:

1. a base rate (the U.S. Treasury rate for the comparable maturity of the loan);

2. plus a risk adjustment (of 125 basis points);

3. plus an administrative fee (of 75 basis points); and

4. minus a subsidy (of 300 basis points).

The net effect of this would be a loan rate of 1.0%, or 100 basis points below the Treasury rate. Then, the subsidy may be reduced by 50 basis points per year for six years until it is reduced to zero as suggested in Senate Bill 281.

The department believes that this suggestion would reduce the potential criticisms of Senate Bill 281. First, the administrative cost of Senate Bill 281 would be substantial since every loan program would have several different interest rates for each type of loan (for example: boat, gear and permit loans could all be different). Second, there is no "prevailing market rate" for some loans (such as Section B commercial fishing loans and loans with permits as collateral). Third, it would be difficult to determine prevailing market rates since a financial institution's rate depends on borrower's specific criteria, and they would be reluctant to share this with us due to the question of competitive confidentiality. Finally, Senate Bill 281 only provides for the loan rate to rise and does not address the situation which could arise when the market rate falls below the loan rate.

The suggested approach would solve all of these criticisms for the following reasons:

1. The base (or Treasury) rate is easily obtainable at little cost.

2. The rate moves up and down with the market (base) and the formula maintains the relationship between the loan rate and the market. Note that the rate is fixed for the term of the loan, but the program's rate changes over time with the market.

3. Gradually, the identified subsidy would be eliminated and the loan rate would move with the market at 200 basis points above the Treasury rate.

4. For some programs, interest rates would rise slightly over current loan rates and be a net revenue raiser.

5. Over a period of a few years, the borrowers would begin to pay for all of the administrative costs of our lending and accounting divisions which is appropriate since they benefit from the loans.

6. The suggested formula would set a loan rate in each program approximately the same in its relation to the market as when the program was created. The one exception, the Child Care loans, could be adjusted by setting its initial subsidy at 400 basis points rather than 300.

7. Because the loan rate would be maintained at a constant relationship to the market, unintended subsidies and penalties could not occur due to market fluctuations. This would make loan demand more steady and predictable.

GFWC
ALASKA FEDERATION OF WOMEN'S CLUBS

Box 90763
Anchorage, Alaska 99509

MEMORANDUM

April 17, 1986

TO: The members of the House Special Committee on Loans and House Finance Committee

FROM: GFWC Alaska Federation of Women's Clubs

RE: SB 281, an act relating to the interest rates on state loan programs; and providing for an effective date

The Alaska Federation of Women s Clubs, at their State Convention, passed a special resolution supporting SB 281 which will raise interest rates on State loan programs to market rates or the cost of funds.

The AFWC is a federation of Women's Clubs throughout Alaska, representing several hundred members. The Free Committee, which is a subcommittee of the Anchorage Woman's Club and a national GFWC program, recently completed a study on Alaska State Loan Programs. The Alaska Federation of Women's Clubs endorses their recommendations:

1. Strive for a reduction and eventual elimination of State dollar contributions to loan programs.

   a. reword the State spending limit.
   b. refine present programs to make them self-supporting and revolving.
   c. eliminate interest subsidies.
   d. institute strict collection procedures.

2. Implement adequate statutory review of programs.

   a. use review to evaluate programs.
   b. base continued support of programs on evaluation.

3. Recognize that the market will limit bonded indebtedness of debt issuing entities of the State.

Passage of SB 281 would achieve these recommendations. One of the positive aspects of SB 281 is the bill's equitable treatment of all State loan programs. This feature recognizes the decline in State revenues and the effect of less available funding for all loan programs.

We urge you to pass this bill.

Respectfully,

Michelle Cassano

Michelle Cassano, President
Alaska Federation of Women's Clubs

ALASKA MORTGAGE BANKERS ASSOCIATION
P.O. BOX 4-2691 / ANCHORAGE, ALASKA 99503

April 16, 1986

Honorable John Sund, Chairman
Committee on State Loans
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Sund:

The Alaska Mortgage Bankers Association has reviewed SB 281. We are concerned specifically about the effect passage of the bill would have on the Alaska Housing Finance Corporation.

AHFC has fulfilled several purposes, including stabilization of the housing market during times of rapid interest rate changes.

The Corporation is in a position to continue operating indefinitely without additional appropriation of state funds. Although interest rates are lower now than they have been since 1979, we should not assume the rates will remain low. AHFC's programs and procedures are in place and working; retaining the Corporation's ability to step in when needed is extremely important.

We urge exemption of AHFC from this Act.

Sincerely,

Lucille Stietz
Vice President

Anchorage, Alaska 99501
(907) 279-6519

Representative John Sund, Chairman
House Committee on Loans
Alaska State Legislature
Pouch V.
Juneau, Alaska 99811

April 18,1986

Dear Representative Sund:

A memorandum from Representative Goll to you was recently brought to my attention. The memorandum concerned CSSB 281 (Fin) am. I would like to comment on Representative Goll's remarks and to add some information on the importance of the fishing loan program.

Bering Sea Fisherman's Association offers the fishermen of western Alaska assistance and advocacy in the development and perpetuation of their fisheries. Our concern is with the small, primarily Alaska-Native operated fisheries.

For the past year, I have been researching the various programs - public and private - that are available for financing vessel, gear and permit purchases for these small fisheries. I have found that the State Fisherman's Loan Program is the only assistance that is practically available to most of these fishermen. As Representative Goll points out, section (B) of the loan program is available to fishermen who would not otherwise qualify for loans. Virtually all the fishermen of rural western Alaska fall within this category.

From recent conversations with personnel at the Division of Investments and from looking at loan statistics and legislative intent for the program it has become apparent that section (B) of this program is an extremely valuable - but under utilized - opportunity. Apparently various other organizations have drawn the same conclusions. As a result there has been a tremendous outreach effort to publicize the program and offer assistance to applicants. Bering Sea Fisherman's Association, Nunam Kitlutsisti in Bethel, the Governor's office in Kotzebue and the Division of Investments itself have all taken part in this effort. The response is indicative of the crucial need for the program. During the past month I alone have received no fewer than twenty requests for loan applications from the AYK area.

I can not emphasize enough the importance of the fisheries in the AYK area, and the potential value of the loan program. As you probably know, areas of coastal western Alaska have no local economy other than their fisheries, so the economic survival of much of the area depends on these fisheries. Although residents of the area have been subsistance fishing for years, the conversion from subsistance to commercial use requires investments that are beyond the resources of the individual fishermen. Also, as Representative Goll pointed out, there is a trend of limited entry permits moving from resident and local ownership to non-local and non resident. Young people who would like to stay in the region and fish salmon cannot hope to buy a permit without financial assistance.

Section (B) of the State Fisherman's Loan Program, more than any other State program, has the potential of contributing to the self-reliant economic stability of rural western Alaska. Through recent outreach efforts the program shows promise of realizing this potential. By reducing the need for various social programs, the dollar invested in the fisherman's loan is more than returned to the State in savings.

In conclusion, while there is a need for cutbacks in State programs, the fisherman's loan exemplifies the foresighted employment-producing sort of program on which the State should concentrate. For the fishermen of western Alaska, it is the only alternative to watching the fisheries that could bring them some degree of economic independance be developed and exploited by outside fishermen. Eliminating the program would result in a lost opportunity to provide a solid economic foundation in rural western Alaska.

Respectfully,

Lee Goodman
Extension Specialist

MEMORANDUM

TO: Representative Adelheid Herrmann

ATTN: Eric Myers

FROM: Jay Livey
Legislative Analyst

RE: Impact of Higher Interest Rates on State Loan Programs
Research Request 86-021

Your office asked that we answer the following questions concerning HB 378, a bill that would gradually increase interest rates on State loan programs until they matched the market rate. Specifically, we were asked:

- What is the current difference between interest rates for State-sponsored loans and comparable loans obtained through alternative financing?
- Are there any State-sponsored loan programs that would be unattractive investments for alternate lenders assuming reasonable loan terms and conditions?
- What would be the impact on borrowers of higher interest rates and changes in loan conditions and terms, assuming that State-sponsored programs were either replaced by alternative lenders or the State programs assumed market lending practices?

Summary

Because interest rates for almost all State-sponsored loan programs are subsidized to some degree, HB 378 would affect virtually all of the State loan programs. Increasing the interest rate on State-sponsored loan programs to the prevailing market rate could eventually lead to a phaseout of most State loan programs. Economic theory suggests that the prevailing interest rate would be reached when a borrower was indifferent as to borrowing from the State program or an alternative lender.

Alternatives to the State-sponsored programs exist for urban housing loans, fishing loans, agriculture loans and student loans. However, alternative programs generally feature loan terms and conditions that are less favorable than those offered by current State programs. In the private sector, borrowers would generally face higher debt service payments, stricter collateral requirements, and, for programs which base loan amounts on the ratio of payments to income, less capital availability. Clearly, these differences would eliminate some borrowers that could have obtained a loan from a comparable State program.

Two State loan funds, the Mining Loan Fund and the Housing Assistance Loan Fund, do not have readily identifiable substitutes. Generally, commercial banks consider mining too risky for conventional loans. Rural housing loans are difficult to secure because many houses do not conform to traditional structural requirements and banks do not have the facilities in rural areas to service loans.

Most State loan programs are designed to accomplish specific social or economic policy objectives. The forgiveness feature of State student loans provides an incentive for graduates to return to the State while fishing and agricultural loans are structured to encourage individuals to enter those industries. Alternative lenders do not necessarily share these policy goals. Commercial lenders make loans to established farmers and fishermen primarily to make a profit; they do not generally make loans to beginning farmers and fishermen or to implement policy. Consequently, if State loan programs are phased out, State policy makers must recognize that the public policy objectives related to those loan programs will also be affected.

Introduction

House Bill 378 proposes to increase interest rates on loan programs sponsored by the State (or instrumentalities of the State) by one-half percent annually until they reach either the prevailing market rate for each type of loan or the true cost of funds if the loans are financed through bond sales. However, the bill does not define the term "prevailing market rate."

Economic theory suggests that the prevailing interest rate would be reached when a borrower was indifferent as to borrowing from the State program or an alternative lender. Because the market interest rate is determined by the combination of all the terms and conditions that affect a loan--down payment, collateral, payment schedule, loan term, etc.--it is very difficult to determine at what point interest rates for Alaska-sponsored loan programs would cause borrowers to be indifferent as to the source of loan.

For example, the State student loan programs offers loan forgiveness based on the number of years the borrower works in Alaska after graduation. Nationally offered student loan programs do not have this feature. The market rate for each individual would depend on the likelihood of returning to Alaska after graduation. As the interest rate on State loans reaches rates available under other programs, students that are uncertain about returning to Alaska will shift to alternative sources of funds. Students who plan to return to the State would be willing to pay higher interest rates for a State loan because the forgiveness provision offsets the higher stated interest rate. The only way to determine at what point the Alaska student loan program reached the market rate would be to raise the interest rate to the point that borrowers would be indifferent as to whether they borrowed from the State or from alternate lending sources. At this point of indifference, the State student loan program--or any State-sponsored loan program--would have no policy impact.

It is possible, however, for the State to continue to offer loans at a market rate that is below the commercial rate for a comparable loan. For example, the Alaska Housing Finance Corporation can sell tax-exempt bonds and establish interest rates below the rates established by lending agencies whose cost of funds is greater. However, because tax-exempt bond sales are limited in both quantity and purpose by the federal government, this method of raising loan capital would not provide an alternative to establishing the prevailing market rate at the corresponding commercial rate.

In the rest of this memorandum, we will examine the impact of HB 378 on specific State lending programs, concentrating on the differences between existing State loan programs and alternatives that may exist. The impact of higher interest rates as well as eventual phaseout of the State-sponsored programs will be examined.

Student Loans

Currently, Alaska residents can borrow up to $6,000 for undergraduate and $7,000 for graduate education at 5 percent interest. In addition, the State will forgive 10 percent of this loan (up to 50 percent of the principal amount) for every year that the borrower works in Alaska after graduation. Because of this forgiveness feature, the effective interest rate for Alaska student loans can be significantly lower than the nominal rate of 5 percent.

The most prominant alternative to the State student loan program is the federally sponsored Guaranteed Student Loan Program (GSL). These loans are made through private lending institutions but are sponsored by the U.S. Department of Education. This program allows an individual to

borrow up to $2,500 for undergraduate and $5,000 for graduate expenses in any one academic year. The current interest rate is 8 percent and there are no forgiveness provisions. In addition, the GSL program is needs based. The borrower's income is factored into a formula that is used to calculate the amount of loan for which the student is eligible.

The GSL program is not nearly as attractive as the State student loan program. Interest rates are higher, the student can borrow less and there is no forgiveness. For example, a student borrowing $5,000 for 10 years would have a GSL monthly payment of about $60 while the State program payment would be approximately $53, assuming that no forgiveness credit is awarded. Over the life of the loan, this difference totals $840. Forgiveness credits can reduce the average monthly payment on the Alaska loan to $26.50.

Generally, in Alaska, the GSL loan program is used by students who cannot meet the residency requirements for State loans or else by students who borrow from both the federal and State programs. If the State program were phased out, the combination of higher rates, reduced loan amounts and no forgiveness would certainly discourage some Alaska students from applying for loans and attending school.

The income restrictions of the GSL would also eliminate some potential borrowers, although the degree of this problem was disputed. Representatives of the Alaska Commission on Postsecondary Education (ACPSE) suggested that as many as 65 percent of those applicants currently receiving State loans would be ineligible to receive Guaranteed Student Loans. However, loan officers that work with the GSL program did not see income ineligibility as such a serious problem. They note that the income guidelines could eliminate some borrowers the first year because their previous year's income would be factored in to the expected contribution from the student and ultimately subtracted from the loan award. Because of variations in school costs, it is difficult to specify an income level beyond which a student would be ineligible, but financial aid representatives at the University of Alaska, Juneau, suggested that a single individual earning between $30,000 and $35,000 the previous year would not be eligible for a GSL loan.

Another potential impact resulting from radical change in or elimination of the Alaska student loan program is a reduction in enrollments at the University of Alaska. Because such a high percentage of students attending the various branches of the University receive student loans, it was suggested that enrollment of full-time students could be reduced by twenty to thirty percent. One contributing factor to this projection is the small amount that can be borrowed under the GSL program. Currently, only $2,500 per academic year can be borrowed. In some cases, it is likely that students would have to work part-time rather than going to school full-time.

Currently, only a few financial institutions in the State offer loans through the federal program. However, if the GSL program became more popular, other financial institutions would probably offer the loans. One bank representative did say, however, that his bank would not be enthusiastic about offering the loans because of the paperwork involved and the high delinquency rates of student borrowers.

Agriculture Loans

The Agriculture Revolving Loan Fund (ARLF) currently makes loans to farmers at 8 percent interest. Peter Probasco, loan officer for the ARLF, estimates that the State holds about 90 percent of all the loans outstanding to farmers in Alaska. Depending on the type of loan, ARLF can make loans of up to 30 years in duration.

One loan alternative to the ARLF is the Alaska Commercial Fishing and Agricultural Bank (CFAB). CFAB, which lends money that it borrows from the Spokane Bank for Cooperatives, has a current interest rate of 13.75 percent plus a 10 percent stock charge which increases the effective interest rate to 15.5 percent. The maximum term for CFAB loans is 15 years.

A second alternative to the ARLF is loans from private commercial banks. Interest rates on these loans will vary depending on the prime rate; rates are currently between 11 and 13 percent.

The Farmers Home Administration (FmHA) is a federal agency that finances agriculture in Alaska as well as the rest of the United States. The FmHA offers loans for land purchase and operations, but the loans offered in Alaska mirror the types of loans offered nationwide so no special programs are available (such as clearing loans) for Alaska. Interest rates are currently between 10 and 11 percent and loan terms are 40 years for land purchase loans and 7 years for operating loans. Maximum loan amounts are between $200,000 and $300,000, depending on the type of the loan.

According to Ron Abbot of the FmHA office in Palmer, the loans he has to offer are not a good substitute for the ARLF for several reasons. First of all, FmHA is limited in the amount of dairy loans that it can offer to beginning farmers. Because government programs subsidize the price of dairy products, there is no incentive for the government to encourage the entry into the industry of more producers.

Secondly, many Alaska farmers have loans from the ARLF that currently exceed the FmHA loan limits. Additional loans could not be made unless loan amounts were reduced or unless additional collateral were available to cover new loans.

A third problem arises because some farmers in Alaska retain their land through agriculture rights rather than fee simple title. Mr. Abbot notes that the FmHA does not believe that agriculture rights land offers the same security for loans as does fee simple land. Therefore, loans made on land that is not fee simple would require more collateral for the same amount of loan.

Finally, there is some doubt concerning the future availability of funds for FmHA loans. Because of the current farm credit problems in the United States, some federal policy makers are questioning the current financial aid structure for farmers. Mr. Abbot feels that the farm debt crisis coupled with budget deficits may result in a substantially less active federal role in farm financing in the future.

An additional alternative to the ARLF is the Federal Land Bank (FLB) which is a part of the Cooperative Farm Credit System. The FLB makes 30-year loans for land purchase and 3-year loans for operating expenses. Interest rates depend on the price of bonds that are sold by the system; with current rates of 12.25 percent.

According to representatives of the FLB, loans are analyzed similarly to criteria used by commercial banks. The borrower must demonstrate financial stability over time which may eliminate some farmers that are just entering the industry. In fact, representatives of the FLB stated frankly that some borrowers from the state would not meet their loan criteria. However, the FLB does not differentiate between land retained through agricultural rights and land owned through fee simple title.

In comparing the loan programs available to Alaska farmers, clearly the ARLF offers loans at more attractive terms. Interest rates are lower and the term of the loan can be longer, which helps to reduce the size of the payments. A five-year, $50,000 operating loan at the ARLF interest rate of 8 percent would have monthly payments of $1,013 assuming that the interest and principal payments were amortized over the length of the loan. A similar loan at 12.5 percent interest would result in amortized payments of $1,125 per month. Assuming a 30-year, $500,000 development loan, the amortized monthly payments total $3,668 at the current ARLF interest rate of 8 percent and $5,239 at the commercial rate of 12.25 percent. If the loan length is reduced to 15 years at 12.25 percent, the amortized monthly payments are $6,081.

Beyond the financial differences among agricultural loan programs, representatives of commercial lenders as well as the ARLF pointed out fundamental differences between the lending philosophy of the State and the other lenders. Banks are generally more conservative in making loans than is the State. In fact, the purpose of many of the State loan programs was to provide loans to borrowers that could not secure other funds. This conservatism of other lenders means that farm loans

from them will generally require more collateral and a stronger indication of an ability to repay than will State loans. In many cases, this means that borrowers of these funds will have to demonstrate a continued ability to be financially sucessful as well as having collateral that is not pledged to previous loans.

This lending policy would likely eliminate some borrowers that desire to enter the farming industry as well as others that are just developing their operations. Several representatives of commercial lenders noted that commercial banks would not replace the ARLF in financing the development of an agriculture industry in Alaska unless that objective corresponded to the banks investment guidelines. Considering the high delinquency and default rates currently present among agriculture loans, the loan representatives did not think this very likely in the near future.

According to Peter Probasco of the ARLF, the immediate effect of an increase in interest rates would be to put additional pressure on the cash flow of farm borrowers at a time when many State farm loans are already delinquent or in default. Although it difficult to predict the number of farmers that would be forced out of business by such an action, certainly debt service payments on future loans would be more burdensome. If the State continued increasing interest rates and eventually phased out the ARLF, the growth of the agriculture industry in the State would probably be slowed. Other lenders would limit the availabilty of capital for developing farms.

Fishing Loans

The State of Alaska currently sponsors two loan programs related to the fishing industry: the Commercial Fishing Loan Program and the Fisheries Enhancement Loan Program. Commercial Fishing loans are made to individuals for the purchase of limited entry permits and the purchase or repair of vessels and gear and to partnerships and corporations for the purchase of vessels and gear. The State interest rate cannot exceed 10.50 percent and the maximum loan term is 15 years.

Alternatives to the State's loan program include the Commercial Fishing and Agricultural Bank and private lenders. CFAB makes fishing loans for gear, boats and limited entry permits, but at interest rates that are 2.5 to 3 percent higher than the State rates. In addition, CFAB requires three years tax returns to be submitted with the loan application to verify that the borrower has been a successful fisherman in the past. This policy would preclude many loans to starting fisherman who are attempting to enter the industry, including borrowers that are currently targeted under AS 16.10.310(B) of the current State program. Representatives of CFAB also expressed a general unwillingness to make many

small loans to the rural areas of the state. These loans are difficult to service and are considered riskier because of the remote location of the pledged assets if the loan was to go into default.

Representatives of commercial banks expressed the same general loan policy as CFAB. These lenders are also reluctant to make loans to fishermen that have not exhibited previous financial stability, making it difficult for beginning fishermen to find capital to enter the industry. Also, commercial lenders generally require a lower loan to asset ratio than does the State. This means that less money can be borrowed on similar collateral from private lenders than from the State program.

A major difference in lending policy exists between CFAB and other commercial lenders. Like the State loan program, CFAB can accept limited entry permits as collateral on loans. Other commercial lenders are prohibited by law from doing this. This means that fishermen requesting loans from lenders other than CFAB must pledge more collateral to secure the loan. However, even if permits could be accepted as collateral, representatives of commercial banks expressed reluctance at doing this. The value of limited entry permits may fluctuate depending upon changes in the limited entry law. This makes the asset less secure than other tangible assets.

An increase in interest rates by the Commercial Fishing Loan Program from the current 10.50 percent rate to the commercial rate of 13 percent would increase monthly amortized debt service payments by about $80 on a 15-year, $50,000 loan. Over the life of the loan, the debt service increase would total about $22,000. One commercial fisherman noted that the increase in interest rates would certainly not be welcome but would not be critical as long as the required down payments, payback schedules and loan term were tailored to the needs of the fishermen.

However, the elimination of the State-sponsored loan program would have greater impact on the fishing industry. First, alternate loan programs would not replace the State's loans to beginning fishermen and fishermen in rural areas of the state. Secondly, the loans that would be made would likely require more collateral. Third, commercial lenders cannot accept limited entry permits as security for their purchase. This would reduce access to capital for those fishermen that do not nave alternative collateral to pledge on the loan. It has been suggested that this could encourage the purchase of permits by non-Alaska buyers who have access to other sources of capital.

The State also lends money through the Fisheries Enhancement Revolving Loan Fund for the development of salmon hatcheries by nonprofit regional associations. The fund lends money for periods of up to 30 years at an interest rate that is not to exceed 9.5 percent. Loans are repaid by

selling fish from the hatchery and by assessments on commercial fishermen that benefit from the enhanced resource. Interest on the loan principal does not accrue during the initial period of the loan, which is defined as a period of time betweeen 6 and 10 years from the date that the loan is made.

Based on our interviews with commercial lenders, it is not certain that any alternatives would exist if the Fisheries Enhancement program were eliminated. Several lenders mentioned that they were not prohibited from making these loans, but noted that the financial viability of hatcheries recently begun under the State loan program is still unknown. Additionally, collateral poses a problem because in some cases the hatcheries are located in remote areas of the state. Also, hatchery cash flow, upon which the ability to make debt service payments is based, is dependent on the uncertainty of the biological process of fish returning as well as the price of those fish. Finally, loans to hatcheries would have to be structured so that repayment matched the development of the resource.

Mining Loans

The State of Alaska's Mining Loan Fund (MLF) makes loans of up to $5,000,000 at 10 percent interest for mining activities in the state. The loan terms can be up to 15 years with payback on the principal deferred until one year after production begins or within five years of the date the loan is made, whichever is sooner.

One alternative to the MLF is commercial banks. However, commercial bank representatives noted several problems in loaning for mining operations. First, commodity price fluctuations make the mining industry unpredictable, increasing the riskiness of loans. To offset this risk, lenders may require loan security that is unrelated to the actual mining operation. A related problem is the remote location of some mining operations. These locations make it difficult for lenders to repossess collateral that is pledged against the loan. For this reason, banks tend to favor pledged assets such as movable equipment that can be sold if the borrower defaults.

Another alternative to the MLF is privately raised venture capital. Under this system, borrowers contact investors or syndicates of investors to secure long-term capital. However, several miners expressed doubt that this method of raising capital would increase significantly in the future. They noted that many outside investors are reluctant to lend in Alaska because of the uncertainty over mining regulations, particularly those relating to the environment.

Most individuals with whom we talked concerning the mining loan program suggested that mining loans from other sources would be difficult to secure if the State program were eliminated. This is especially true for the small to medium-sized operations that have limited collateral with which to secure the loan. Even if loans were available, some miners questioned the ability of lenders to structure loans to match mining operations. For example, the MLF defers payments on principal until production from the operation begins or for five years, whichever is less. Loans from commercial lenders that did not recognize the delayed cash flow aspect of mining would increase the financial risk associated with the mining operation.

Housing Loans

The major housing lender in Alaska is the Alaska Housing Finance Corporation (AHFC). AHFC provides a variety of housing loans including single family and duplex mortgages, subsidized loans for low-income buyers, loans for mobile homes and loans for multifamily structures. Loan funds are raised through bond sales and legislative appropriations. AHFC interest rates are tied to the cost of funds to the corporation, but rates are subsidized with the size of the subsidy dependent on the borrower's income. Interest rates are blended depending on the size of the loan. Currently, the rate on the first $90,000 is 10 percent for nonveterans and 9 percent for veterans while the cost of funds to AHFC was 11 percent of tax-exempt bonds and 12 percent for taxable bonds.

The major alternative to AHFC is the Federal National Mortgage Association (Fannie Mae) which currently offers 30-year mortgage loans at 12.25 percent. Depending on the debt to income ratio, these loans, like those of AHFC, can be made with a 5 percent down payment. One attractive feature of Fannie Mae is that the loan is assumable. This makes resale easier if interest rates rise in the future. Currently, AHFC loans are not assumable but the corporation is contemplating a change in policy to add this feature to future loans.

According to Ron Lehr, Director of the AHFC, eliminating the interest rate subsidy would have three major effects. First, low and moderate income borrowers that receive interest rate subsidies under the HOF program would probably be ineligible at the higher rates. A low-income home buyer that currently is eligible for a 30-year, 6 percent, $90,000

mortgage loan would have amortized monthly payments of $539.[1] The amortized monthly payments on this same loan at 12.25 percent interest would be $943.

Secondly, veterans rates would increase to the tax-exempt cost of funds. Based on current rates, this increase would be from 9 percent to 11 percent. The resulting increase in amortized monthly payments on a $90,000, 30-year loan would be about $130.

Third, the interest rates for all other AHFC home buyers would increase from 10 percent to 12.25 percent (based on current rates). Amortized monthly payments on a $90,000 loan would increase $150 as a result of the increased interest rate. Increased debt service payments would also reduce the amount that home buyers could borrow as loan limits are based on income to debt service ratios. AHFC officials estimate that these increased rates and the subsequent decrease in borrowing limits could reduce the price of a house in Alaska by an average of $20,000.

Mr. Lehr also noted that increasing AHFC interest rates to the market rate (the cost of funds) would ultimately cause the phaseout of the corporation. If rates are established at the cost of funds, borrowers could obtain the same interest rates from Fannie Mae loans but for terms of 30 years rather than AHFC's 15 years. There would be no incentive for individuals to borrow from AHFC. If this occurred, there would probably be no source of funds for mobile home loans as other lenders are reluctant to make these loans.

Another State-sponsored housing loan program, the Housing Assistance Loan Fund (HALF), was established to make housing loans available in rural areas of the state. Loans are made for both single-family homes and duplexes and can be either owner and nonowner occupied. The interest rate charged depends on the type of loan. Nonconforming housing loans charge an interest rate that is one-fourth of one percent higher than the latest AHFC sale of taxable bonds. The Rural-Owner Occupied program charges interest that is one percent less than the latest sale of AHFC taxable bonds. Loans made under the rural nonowner occupied

---

[1]These examples are designed to compare changes in debt service cost to similarly structured loans that result from increased interest rates. To do this, we have assumed that interest and principal payments are amortized over the length of the loan. AHFC loans calculate total debt service cost as if the loan were for thirty years, but compress the payment schedule to 16-19 years depending on the type of loan. It should also be noted that because the AHFC interest rate subsidies only apply to the first $90,000 borrowed, the monthly payment differential will not increase as loans exceed $90,000.

housing program are charged 10.5 percent interest. In addition, the HALF offers subsidized loans at 6 percent interest to low and moderate-income individuals for the purchase of single family homes.

Increasing interest rates to market levels would have the largest impact on individuals eligible to participate in the loan subsidy program and in the rural nonowner-occupied housing programs. For owner-occupied homes, the jump from the subsidized 6 percent rate to market rates of 12 percent would surely eliminate many rural resident from mortgage eligibilty. Resulting increases in debt service payments would be similar to those encountered under the AHFC subsidy program. Like the AHFC program, the increase in debt service would reduce the amount of money that could be borrowed as loan limits are determined by income to debt service payment ratios. Although exact estimates are not available, Hank Hodge, loan officer with the HALF, notes that a significant number of rural residents that would qualify for 6 percent loans would be excluded by 12 percent interest rates.

Interest rate increases under the nonowner occupied housing loan program would be in the range of 1.5 to 2 percent based on AHFC recent bond sales. Because this program is designed for investors rather than individual purchasers, interest rate increases of this size would probably not have a serious effect on lending activities, Mr. Hodge estimated that about 6 percent of HALF borrowers utilize this program. The other HALF programs currently charge interest rates that are linked closely to the AHFC market rate and would only be marginally affected by charging the market rate.

Elimination of the HALF program would have a serious impact in many rural areas of the state. In the past, private mortgage lenders have been unwilling to make loans in some rural areas of the state. This is for two reasons. First, commercial lenders maintain that these loans are difficult to service. Several lenders expressed interest in making loans in the larger rural communities in which branches of their bank are located, but not in other rural communities. Secondly, many homes in the rural areas of the state are nonconforming due to the lack of conventional sewer and water systems. Consequently, Fannie Mae loans would probably not be universally available in these areas. However, AHFC could make these loans if it chose to do so.

If the availibility of loans to rural areas were restricted, the immediate impact would be an increase in the price of rural homes financed with assumable HALF loans. Because other loans would be difficult to obtain and, if available, charge higher interest rates, the demand for homes with assumable loans would bid up their price.

Over time, this initial price effect would diminish somewhat, but the lack of subsidized interest rates would still put housing prices out of the reach of some rural residents.

In addition to mortgage loan programs, the State of Alaska also sponsors several home improvement loan programs related to energy conservation. The Alternative Technology and Energy Revolving Loan Fund makes loans of up to $30,000 for the installation of energy saving devices such as centralized multi-fuel heating systems. Interest rates are 5 percent on the first $15,000 and 15 percent on the balance of the loan. The Residential Energy Conservation fund lends up to $5,000 at 5 percent interest for energy conservation imnprovements in homes.

Commercial lenders make home improvement loans that could be used for the type of projects eligible through these two State programs but at interest rates that are currently about 12 percent. One bank representative also noted that the collateral required by private lenders would probably be stricter than currently required by the State. He also mentioned that his bank would be reluctant to make a home improvement loan that was a second loan behind a large mortgage loan held by another lender.

Higher interest rates and stricter collateral requirements would surely reduce the number of energy-related home improvement loans in Alaska. Increasing the interest rate from 5 to 12 percent would discourage some projects as the increased debt service payments would offset some of the savings from the improvement.

I hope you find this information useful. If you have any questions, or would like additional information, please contact us.

MEMORANDUM

TO: Representative John Sund
House Loans Committee

FROM: Senator Jack Coghill

RE: CSSB 405

I have introduced SB 405, a bill that will extend the Alaska Grain Reserve Program through 1987 at the request of the Department of Natural Resources. The original intent in setting up the Grain Reserve was to set up a base so that farmers would be able to participate in the Federal Grain Reserve Program. The oversight in the sunset of the original Grain Reserve made this impossible for all farmers to make the base acreage requirements and the non-standard varieties of barley grown in Alaska do not meet present Federal eligibility requirements No monies will have to be allocated for this program since there are funds available within the program to make new loans.

The Grain Reserve allows Alaskan farmers to market grain in an orderly manner by providing loans to the farmer once the crop is harvested. The farmer can pay planting and harvesting expenses without selling all of the crops at harvest, a time when prices are generally their lowest point for the year. Another reason this is advantageous to the farmer is that with the in state market often times he cannot sell all of the corp at harvest because the market is saturated. As the crop is sold the loan is paid back along with interest computed at 8%.

The program so far has been successful and it does help farmers pay back other loans on time. The grain is graded and inspected. The amount loaned for the grain is based on the grade. For example #2 or better barley could yield a $97.00 per ton loan amount. A lower quality barley would qualify for a lesser amount. Loans are made for a period of up to three years. If after the three year period the loan is not repaid the state will take ownership of any remaining grain.

MEMORANDUM

TO: Representative John Sund
Chairman - House Special Committee on Loans

FROM: Senator Fred F. Zharoff

DATE: May 9, 1986

RE: SB 453, "An Act relating to memorial scholarship revolving loans, creating the A.W. (Winn) Brindle memorial scholarship loan; and providing for an effective date."

The State of Alaska currently has four memorial scholarship loan accounts inside its Memorial Scholarship Revolving Loan Fund. The purpose of the memorial scholarships is to pay tribute to the memory of distinguished Alaskans by allowing Alaskans to pursue educations in specific professions.

SB 453 would establish a new memorial scholarship account specifically for Alaskan residents who wish to participate in a certificate or degree program in fisheries, fishery science, fishery management, seafood processing, food technology, or other closely related field (Sec. 4). The bill would help encourage Alaskans to pursue careers in the management and production of our fisheries resource.

The Brindle scholarship account would be set up differently than the other memorial scholarship accounts. Repayments of loans made from the Brindle account would be deposited into the regular student loan program (Sec. 2).

SB 453 is tied closely to House Bill 58, "An Act relating to the fisheries business tax...." The main funding mechanism for the Brindle scholarship is in the Senate Finance CS for HB 58, which would allow fisheries businesses to obtain limited tax credits for donations to the Brindle scholarship account.

If HB 453 were to pass without HB 58, the Brindle account still would be established and would be open to anyone who wished to make donations to it.

Dedication

This year's Annual Report is dedicated to A. W. "Winn" Brindle, who passed away July 4, 1977, at Red Salmon Packing Company in Naknek. This dedication reflects our sincerest gratitude for the valuable contributions Winn made to Alaska's fishing industry and for his wise counsel and keen interest in the affairs of the bank.

Winn served the bank as a director for over 40 years. He first became a director of the Miners and Merchants Bank of Ketchikan in 1934. When that bank and five others consolidated as the National Bank of Alaska in 1960, he was elected to the original Board of Directors, a position held until his death.

Winn came to Alaska as a young child in the early 1900's and was educated in the Ketchikan school system, and attended the University of Washington. Although Winn was noted primarily for his contributions to and accomplishments in the fishing industry, he had a diversity of other business interests. Together with other business associates he developed the Northland Transportation Company, a marine transportation company, which served the major ports of Southeastern Alaska and which was eventually purchased by the Alaska Steamship Company. In the 1930's he was involved with a tugboat and mining venture on Prince of Wales Island. In 1934 he was named director of the Miners and Merchants Bank of Ketchikan. Shortly thereafter he became a major stockholder and became active in the operation of the Tongass Trading Company of Ketchikan.

Winn first became actively involved in the fishing industry when as a young man, with his brother Harold, he purchased a seine boat. In 1928 he and Harold bought the Wards Cove Cannery. From that beginning he expanded to cannery operations thoughout Alaska. In 1977 Winn and his associated companies had fishing operations in Ketchikan, Excursion Inlet, Port Bailey, Alitak, Naknek, Chignik, Hoonah, Kenai, Kodiak, Ekuk, Egegik, Koggiung, Libbyville, Craig, Moser Bay, Petersburg, George Inlet, Port Otto, and Ouzinkie, comprising the largest salmon processing organization in Alaska.

In 1969 the Alaska State Chamber of Commerce named him the "Outstanding Alaskan." In further recognition of his diversity of interests the Holy Catholic Church of Ketchikan named one of their school buildings Brindle Hall.

During World War II, Winn was awarded the Legion of Merit while serving in the Aleutian campaign and attained the rank of Major in the U. S. Army.

His wisdom and experience contributed much to the development of all of his associates. The success of Alaska's fishing industry to which he dedicated his career, are monuments to his strength of character, his dedication and personal integrity. The country that he served, the fishing industry that he loved, and his associated companies share a distinguished heritage. He will be sorely missed.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y · STATE CAPITOL
JUNEAU, ALASKA 99811
907 465-3800

MEMORANDUM May 6, 1986

SUBJECT: HCS CSSB 468 (Loans)
(Creating the Railbelt Energy Council)

TO: Representative John Sund
Chairman, House Special Committee on State Loans

FROM: Teresa B. Cramer TBC
Legislative Counsel

You have asked whether the Railbelt energy council created by HCS CSSB 468 (Loans) would violate the separation of powers doctrine of the state constitution because its membership includes members of the legislative and executive branches of state government. Because the council's powers are limited to recommending and reporting, in my opinion there is no constitutional problem.

The Alaska Supreme Court has held that the state constitution recognizes the separation of powers doctrine. Bradner v. Hammond 553, P.2d 1, 5 (1976). Accordingly, the legislature is prohibited from intervening in an executive function. Conversely, the executive branch may not exercise legislative functions. The issue is whether the Railbelt energy council is empowered to exercise legislative or executive functions. Since the council is not assigned power to administer the laws or to enact laws, it is neither executing nor legislating.

The legislature has established other groups that included members of the executive and legislative branches as well as public members to consider matters and make recommendations, though typically these groups have been established by resolution rather than by a bill. The Alaska Railroad Transfer Advisory Commission, consisting of members from the executive branch, legislative branch and public members, was created by ch. 128, SLA 1982 to advise the legislature and the governor about issues concerning the transfer of the Alaska Railroad to non-federal ownership.

If I may be of further assistance, please advise.

IN THE SENATE

BY THE HOUSE SPECIAL COMMITTEE ON STATE LOANS

HOUSE CS FOR CS FOR SENATE BILL NO. 468 (Loans)

IN THE LEGISLATURE OF THE STATE OF ALASKA

FOURTEENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act creating the Railbelt energy council; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that

(1) state energy policy should change from a policy of the state assuming responsibility for providing electric power to a policy of the state assisting the private sector and public utilities to provide adequate electric power at reasonable cost;

(2) state funds available for energy development should be used to assist in financing projects that utilities cannot finance themselves;

(3) utilities should be encouraged to assume the responsibility of regional power generation and transmission rather than relying on the state;

(4) energy planning and financing must be efficient and cost-effective;

(5) the Railbelt energy fund should be used if necessary to develop power projects that will meet market investment criteria;

(6) the Railbelt area generally consists of the region of the state extending from Fairbanks to Homer and served by the Golden Valley Electric Association, the Fairbanks Municipal Utilities System, the Matanuska Electric Association, the Chugach Electric Association, Anchorage Municipal Light and Power, the Seward Electric System, and the Homer Electric Association utilities.

* Sec. 2. COUNCIL CREATED. (a) The Railbelt energy council is

established to

(1) recommend the best options for planning, financing, cc structing, and managing electric power facilities in the Railbelt area;

(2) examine all alternatives and recommend the best method f meeting projected Railbelt electrical energy demand;

(3) recommend alternative financing plans for assisting t private sector and public utilities to meet the future energy needs of t Railbelt area;

(4) determine whether a regional generation and transmissi utility organization can operate to the best interests of utility cc sumers;

(5) cooperate with the Alaska Power Authority to examine t feasibility and desirability of energy projects.

(b) Membership on the council consists of two members appointed the governor; two senators appointed by the president of the senate; t members of the house of representatives appointed by the speaker of t house; and one representative from each of the seven Railbelt utilities.

(c) By February 15, 1987, the council shall report its recommen tions to the legislature.

* Sec. 3. This Act is repealed June 30, 1987.

* Sec. 4. This Act takes effect immediately in accordance with AS 0 10.070(c).

BILL SHEFFIELD
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 24, 1986

Mr. Lee Nunn
Chairman
Alaska Power Authority
6311 Habicht Court
Anchorage, AK 99504

Dear Lee:

It's my understanding that the Board of Directors of the Alaska Power Authority will be meeting in Juneau soon, and even though I've had meetings with you and other members of the Board on different occasions, I thought perhaps it would be appropriate at this time to reiterate my thoughts on APA and Railbelt energy.

As we have discussed previously, it is my suggestion that during the next six-to-nine months, APA:

-- undertake a complete review and examination of all potential alternative sources of electrical energy for meeting Railbelt requirements; this review shall include coal, Cook Inlet natural gas, North Slope natural gas, hydroelectric, alternative sources of renewable and non-renewable energy and energy conservation;

-- simultaneously, contract to update and bring current the feasibility and economic studies of a hydroelectric project at Devil Canyon.

When this work is completed, at the end of six-to-nine months, APA would then turn the data over to Railbelt user groups, assuming the Railbelt utilities were formed together, even loosely, in some kind of an organization that could evaluate the data and use it for its own planning purposes. It remains my hope that those utility groups will be looking into the formation of such a group during the time APA is completing and updating its studies. As I have

indicated before, I believe there needs to be a formal organization of some kind bringing the utilities together if they ever hope to finance any major project to serve the energy needs of Railbelt residents.

Once the data is turned over to the Railbelt user groups, it seems to me that APA has largely completed that portion of the task it was created to do. If you have any questions regarding my position on these matters, please don't hesitate to contact me.

Sincerely,

Bill Sheffield
Governor

cc: APA Board Members

MAY 2, 1986

SECTIONAL ANALYSIS (COMPOSITE)

CS FOR SENATE BILL NO. 476 (Finance) am, an Act relating to hydroelectric projects

Section 1. Contains findings about the cost of Susitna studies and the conclusion reached by these studies. Criticizes the performance of the APA in this project.

Section 2. States the intent of the legislature that as a component of any feasibility study for a power project, the APA provide for an independent comparative analysis of all reasonable alternatives to the project.

This section states additional intent that OMB comply with the law which requires it to review the feasibility study and plan of finance for any project, that OMB submit its recommendations to the legislature by next April 15th, and that the APA not submit a FERC license application for Devil Canyon until the legislature has approved the project as required by law.

Section 3. This section is amended to include the conditional power sale agreement as an element of the plan of finance. A conditional power sale agreement would provide hard evidence to the Legislature that the utilities understood the plan of finance and its impact on their rates and would therefore allow the Legislature to make a better informed decision as to whether to continue to appropriate funds for further project development.

Section 4. This section is amended to explicitly prohibit the APA from submitting a FERC license application until the Legislature approves the project on the basis of a feasibility study, plan of finance, conditional power sale agreements, and an independent cost estimate. APA and AG have argued in the past that the current statute is ambiguous on this point. The prohibition is logical and timely in that the FERC license application should not be submitted unless the Legislature intends to construct the project. Applying for a FERC license without that commitment is analogous to starting a 1000 mile voyage with only a 100 mile supply of fuel and could result in needless expenditure of funds for the licensing process.

Section 5. This section must be amended if AS44.83.325 is repealed as noted in Section 10 below. The revised section does that as well as clarifying that a Susitna project must follow the approval process required of all other new projects before start of construction.

Section 6. Requires the APA to prepare an annual report on the status of any Susitna River hyroelectric project which has been approved by the legislature as required by law. (The present law refers to "the" Susitna project, implying only the two-dam project.)

Section 7. Further describes the study of power alternatives that will be financed in SB 477. This section calls

for a study of alternatives that can be incorporated into the feasibility study required by law, calls for preliminary plan of finance for the best alternative, and calls for the completion of a reconnaissance study when submitting the other studies to the governor and legislature. Finally, it requires the APA to regularly report to the Budget and Audit Committee on its implementation of these requirements.

Section 11 gives this section an effective date when funds are appropriated to the APA for reviewing Railbelt power alternatives, e.g., upon the effective date of SB 477.

Section 8. Because of previous reconnaissance studies done on Susitna River hydro sites, this section exempts a future project located at any of these sites from undergoing another such study.

Section 9. Approval of the Watana phase should be repealed now in order to clear the books and in view of the withdrawal of the FERC license application. This would allow any new project to follow the approval process without potential complications due to Watana dam authorization.

Section 10. This section should be repealed as it has caused considerable confusion over the years. It is not logical to allow construction of the Susitna project within one year of the approval of a preliminary report by the Legislature and which is inferior to a feasibility study. AS44.83.320 had called for submittal of two preliminary reports to the Legislature by March 30, 1981 and again by April 30, 1982. APA submitted both of these, however, the Legislature never got around to approving the latter one as contemplated in this section. Finally, there is no reason for the Susitna project not to follow the approval process established for all other new projects.

Section 11. See Section 7 above.

Section 12. Gives all sections of the Act except Section 7 an immediate effective date.

MEMORANDUM

TO: Senator Jan Faiks
Alaska State Legislature

FROM: Kurt S. Dzinich KSD
Senior Advisor

DATE: March 31, 1986

SUBJECT: Devil Canyon Project

In response to our discussion of March 27, 1986, I have reviewed the activities related to the Susitna Hydroelectric Project to include the APA Board action of March 26, 1986, which resulted in Resolution 1986-04. I believe that the course of action adopted in Resolution 1986-04 is not prudent nor in the best long-term interest of Alaska for the reasons outlined below.

Since 1979 the State has spent $145 million on Susitna related studies and FERC licensing activities. The cost of federal studies by the Bureau of Reclamation, Alaska Power Administration and the Corps of Engineers between 1950 and 1979 are not available. Three things stand out. First of all, the studies conclude that Susitna option represented the best long-term solution to the Railbelt energy needs. Second, the written audit trail of project development and decision making by APA, such as it is, is difficult to follow or non-existent. Third, the coordination and cooperation between APA and utilities leaves much to be desired. The second deficiency is of major significance and is all the more exasperating when it is realized that the statutory requirements for project development have not been complied with. Specifically, these requirements for each proposed project are:

1. AS 44.83.177 Reconnaissance study
2. AS 44.83.179 Review of Reconnaissance study by OMB
3. AS 44.83.181 Feasibility study and Plan of Finance
4. AS 44.83.183 Review of feasibility study and finance plan by OMB with recommendation to the Governor and Legislature.
5. AS 44.83.185(a) Submission to the Legislature of the Feasibility Study and Plan of Finance.

In addition following statutory requirements apply only to the Susitna Project:

6. AS 44.82.320(a) Preliminary report by March 30, 1981

7. AS 44.83.320(b) Preliminary report by March 30, 1982

8. AS 44.83.325 Legislative approval of Preliminary report referenced in item 7 above.

As best as I have been able to ascertain, written record indicates that only items 6 and 7 have been officially accomplished. I should add that the Susitna specific requirements are confusing while the requirements of item 1 and 2 seem redundant since the Corps of Engineers had started feasibility level studies when the APA took over the project in 1979.

In view of APA Resolution 1986-04, of major significance is the requirement AS 44.83.181(b)(3) which states that a feasibility study shall include "a comparative analysis of all reasonable alternatives to construction or the proposed project; and". Item 5. on page 2 of that resolution calls for a review and examination of all potential alternative sources of electrical energy for meeting the Railbelt requirements. In other words, the APA Board decision is to ignore numerous studies covering a period of almost 7 years and costing $145 million to date. Further, after completion of the APA review, there will still exist the requirement to prepare a feasibility study and a plan of finance.

Based on the draft Plan of Finance, and second opinion by Prudential-Bache, the two-dam Susitna option does not appear to be financable i.e. the State cannot afford the commitment of funds that would be required to make the two-dam Susitna energy rates marketable in the early years. Since factors leading to that conclusion are not forecasted to change in the foreseeable future, I believe the decision to withdraw the two-dam FERC license application and conclude all work associated with that option is correct. I believe that the prudent course to follow now would be to ascertain whether a smaller Susitna option exists that is both feasible and financable (that was the course being followed by APA until around March 15 when inexplicably all discussion on Devil Canyon dam option was terminated). If no, then the Susitna option can be laid to rest properly. If yes, I would expect the 1987 Legislature to make a decision as to whether APA should submit the new FERC license application for the Devil Canyon stand-alone dam project. The scenario would be as follows:

1. APA completes a feasibility study and a plan of finance in cooperation with the utilities and in accordance with AS 44.83.181. As a major component of the feasibility study, the APA should conduct a cooperative analysis of all reasonable alternatives as required specifically by statutes. This part of the study can be accomplished by an independent expert. The feasibility study contains all information that is required for a FERC license application.

2. APA and utilities conclude conditional power sale agreements by March 15, 1987. These agreements should constitute an essential part of the plan of finance.

3 APA submits the feasibility study and plan of finance to the Legislature by March 15, 1987, and in accordance with AS 44.83.185(a).

4. OMB reviews above documents in accordance with AS 44.83.183 and submits its recommendation to the Legislature and Governor by April 15, 1987.

5. Based on above documents, the 1987 Legislature decides whether to approve the project in accordance with AS 44.83.185(c) thereby allowing APA to submit a new FERC license application. If the feasibility study and plan of finance conclude that the Devil Canyon is not the best long-term alternative, or that even the smaller project is not affordable, the 1987 Legislature will have to consider other options for meeting the Railbelt energy needs.

My rough estimate is that of the $145 million spent to date 40% was related to the Devil Canyon site and 60% to the Watana site. The reason for the difference is due to such factors as Watana dam being larger, of earthfill construction, more geotechnical work, larger area inundated by water, etc. In other words if we were starting today we could have expected to pay about $60 million for submitting a FERC license application. In view of the data we have already, I estimate that completion of a feasibility study/FERC license application, a plan of finance/conditional power sale agreements, legal, and APA costs would total about $1 million in FY 86 and about $4 million in FY 87 assuming that work is allowed to proceed within the next 30 to 60 days. In summary, a $60 million effort can be obtained for no more than $5 million. If the decision is made in 1987 to submit a new FERC license application, there would most likely be some additional costs associated with the licensing process.

Since the FERC licensing process is lengthy and costly, APA should ascertain if there is any way of obtaining an exemption. In my opinion, the only possibility would be thru Congressional legislation as I do not believe that FERC has the authority to waive the licensing requirements.

In order to implement the above scenario it will be necessary to amend existing statutes, appropriate FY 87 funds, clarify use of FY 86 remaining funds, and issue a letter of intent. Following are proposed:

1. Repeal sec 10, Chapter 169 which authorized the Watana Dam phase of the Susitna River Project.

2. AS 44.83.325 is repealed.

3. AS 44.83.330 is amended to read:

> Construction, maintenance and operation of project. [Within one year after approval of its preliminary report submitted under AS 44.83.320(b),] The authority may enter into a

contract for the construction of a [the] Susitna River Hydroelectric Project in a manner consistent with the purpose of the project as described in AS 44.83.310. and only after approval of the project by the Legislature in accordance with AS 44.83.185.

4. New Section: In view of the extensive and numerous studies of the Susitna River Hydroelectric sites the provisions of AS 44.83.177-44.83.179 do not apply to the Devil Canyon dam project.

5. AS 44.83.181(a) is amended to read:

Unless the reconnaissance study has been disapproved by the office of management and budget under AS 44.83.179, the authority shall complete a feasibility study and a plan of finance which includes conditional power sale agreements with the appropriate utilities for each proposed project.

6. AS 44.83.185 (b) is amended to read:

The authority may not proceed with work on the engineering or final design phase, or may not submit a FERC license application [of] for a proposed new project for which legislative approval is required until the legislature approves the proposed new project. However, the authority may proceed with the engineering or design work necessary to meet the requirements for submission of a license application for the proposed new project to the Federal Energy Regulatory Commission without obtaining legislative approval of the proposed new project.

7. New Section: A sum of $4,000,000 is appropriated to the Alaska Power Authority from the Railbelt Energy Fund for the purpose of preparing a feasibility study and a plan of finance for the Devil Canyon dam project in accordance with AS 44.83.181.

Appropriation bill

8. New section: Standard effective date clause.

In terms of how best to proceed for the remainder of FY 86, the Legislature had set a limit of $24,109,000 on APA for what could be used for Susitna project activities from the Power Development Fund. It appears now that there would be around $8 million left over due to the decision to stop the two-dam Susitna project. APA could use one million dollars of those funds to start work on the Devil Canyon dam documents for the remainder of FY 86 although a Budget and Audit Committee approval might be required.

Attached is a Letter of Intent and a specific sectional analysis. The purpose of the letter of intent is to clarify and amplify to the Alaska Power Authority exactly what it is that the Legislature desires to be accomplished.

Please let me know if there are any questions.

PRELIMINARY BUDGET ESTIMATE

Railbelt Alternatives Study
(Thousands of Dollars)

Tasks	Personal Services and Contractor Overhead		Direct Costs*
A. Review Utility System Data Base	$ 20.0		$ 5.0
B. Load Forecast (Incl. ISER and Battelle)	60.0		10.0
C. Power Supply Alternatives			
1. Gas Price Forecasts	80.0		6.0
2. Gas Supply	10.0		5.0
3. Gas Plant Characteristics	10.0		3.0
4. North Slope Natural Gas	40.0		12.0
5. Coal Price Forecasts	50.0		6.0
6. Coal Plant Characteristics	40.0		5.0
7. Oil Price Forecasts	40.0		5.0
8. Non-Susitna Hydro	60.0		10.0
9. Other Alternatives	30.0		6.0
10. Conservation	80.0		12.0
11. Devil Canyon	10.0		5.0
D. Financial Evaluations	10.0		2.0
E. Supply Plans			
1. Inflation, Interest, Discount	20.0		5.0
2. Methodology	30.0		10.0
3. Develop plan	80.0		20.0
F. Related Issues	10.0		6.0
G. Progress Meetings	40.0		20.0
H. Final Report Production/Printing	40.0		5.0**
