WE URGE THE PASSING OF THE BILL FOR A NEW PIONEER HOME AT
KETCHIKAN. WE ARE FOUR GENERATIONS LIVING IN KETCHIKAN.
ALSO THERE ARE APPROXIMATELY 800 LONGIVITY PIONEERS HERE.
A HOME WOULD BE A BLESSING FOR MANY OLD TIMERS WHO HAVE
FRIENDS AND RELATIVES HERE, ESPECIALLY IN THEIR LATER YEARS
WHEN THEY NEED THE LOVE OF THOSE CLOSE, RESPECTFULLY.

WILLIAM J FULLAN, CERTIFIED PUBLIC ACCOUNTANT

February 17, 1975

Representative Susan Sullivan
Pouch "V"
State Capitol
Juneau, Alaska 99801

Dear Mrs. Sullivan,

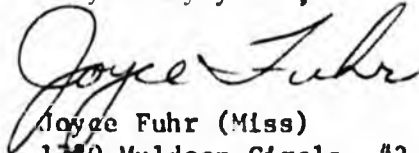

I'm Writing to you to ask for your support of House Bill No. 129, which was introduced by Representative Mike Miller of Juneau.

As a non-smoker, I am very much in favor of this bill as it would insure my right to clean, fresh air indoors as well as outdoors. We have many laws governing the outside air, but none to govern the inside air. I have a great deal of trouble when I go out, especially to meetings and other public places.

I will appreciate your efforts on behalf of this bill.

Thank you.

Very truly yours,

Joyce Fuhr (Miss)
1720 Muldoon Circle, #3

David Freer, Admin. Officer
Dept. of Health & Social Services
Pouch H
Juneau, Alaska 99801

Dear Mr. Freer:

We have, in the Health Education and Social Services Committee, HB 104 This bill concerns the Ketchikan Pioneers Home proposition and we hope to have it on our agenda in the next few weeks.

We would appreciate any background information that you feel would be relevant in our meetings.

Thank you for your attention to these matters.

Sincerely,

Susan Sullivan

Susan Sullivan, Chairperson

MEMO February 12, 1975
FROM SENATOR ZIEGLER
TO REPRESENTATIVE SULLIVAN
RE KETCHIKAN PIONEERS HOME

It is my understanding you are going to be holding public hearings in the near future on the House bill which is the counterpart of Senate Bill 25, pertaining to the construction of a Pioneers Home in Ketchikan. That's good.

I am enclosing many petitions which are indicative of the fact that a great many people who reside in Ketchikan think the idea is an excellent one and that the need exists.

RHZ/pkz

ALASKA STATE LEGISLATURE

7530 MARGE COURT
ANCHORAGE, ALASKA 99504
333 6412

POUCH V
JUNEAU, ALASKA 99801
465-3797
RESIDENCE 586-8159

HOUSE OF REPRESENTATIVES

May 20, 1975

Robin Taylor; President
Greater Ketchikan Chamber of
Commerce
P.O. Box 2637
Ketchikan, Alaska 99811

Dear Mr. Taylor:

Thank you for your letter of March 6 in which you address three issues currently before the Legislature.

The first of these relates to House Bill 104, "Bond of \$5,000,000 for Ketchikan Pioneer's Home". Our committee showed strong support for this bill, passing it on to the Finance Committee with a unanimous "do pass" recommendation. As it has yet to go to the Senate, it is very unlikely that HB 104 will be enacted this session. I will, however, follow its progress closely, and do whatever I can to expedite its passage.

Senate Bill 8 which pertains to the second issue you discussed, appropriation for a bridge to the Ketchikan Airport, is still in Senate Committee. It will, therefore, probably not be taken up by the House until next year. As this bill does not relate closely to Health, Education, and Social Services, I doubt that it will be sent to our committee, but will take your letter into consideration when it comes to the House.

As you have no doubt heard, the bill to increase workmen's compensation benefits, Senate Bill 146, was passed into law despite the Governor's veto.

Again, thank you for your letter as it has been most helpful to me in assessing public opinion in the Ketchikan area.

Yours truly,

Susan Sullivan

Susan Sullivan, Chairwoman
House HESS Committee

March 6, 1975

WILLIAM L. BAKER
General Manager

Honorable Susan Sullivan
State House of Representatives
State Capitol Building Pouch V
Juneau, Alaska 99811

Dear Representative Sullivan:

Our Chamber is planning its annual visitation to Juneau in a short time and hopes to discuss some matters of mutual interest with you. In the meantime, we hope you will consider some items of immediate interest and their possible effect on Greater Ketchikan.

Some of our civic leaders testified before the House Committee on Health, Education and Social Affairs requesting a Pioneers' Home for this area. This project has been under study for several years and there are 800 or more persons over 60 who might qualify, so we do need the Pioneer Home Legislation and the unanimous "do pass" vote from the House Committee. It is hoped you will support this Legislation on its way through the session.

Senators Robert Ziegler and Pete Meland have offered a measure to start planning the designing of a bridge to connect the new international airport on Gravina Island with the city of Ketchikan, which is located across Tongass Narrows. Its construction would lead to development of Pennock Island, which lies between Gravina and Ketchikan as well as Gravina itself near the airport. The bridge would eliminate a costly and expensive airport ferry service operated by the Gateway Borough and speed up the flow of traffic to and from the airport. The State Highway Department has prepared studies on four proposed routes.

A pending measure on Workmen's Compensation, which would average the payroll income from all Alaskans, would work a hardship on existing industry in Southeastern Alaska. Existing operators and those coming onto the scene from native corporations have a high-cost, high freight rate barrier that excludes them from most stateside markets in some fields, including lumber. The chief

KETCHIKAN RAINBIRD

Page 2 March 6, 1975 Susan Sullivan

buyer of lumber products in recent years, Japan, is suffering from galloping inflation, high fuel costs and high interest rates. Some 3,000 people depend on the timber industry in our area for jobs and the past few months have seen unemployment increasing rapidly due to the depressed market. Anything that can sustain employment in these industries will reduce unemployment costs, keep many Alaskans in a self-supporting situation and maintain schools, utilities and other public services needed in the area. By increasing the cost of doing business in Alaska, we make our basic industry less able to compete for the markets of similar industry down south.

Most coastal towns in Alaska depend on seafoods for major income and with consumers unable to afford king or tanner crab or even canned salmon, any artificial increase in costs of producing these products deals Alaskans a costly blow. The crab fleet has taken a real beating this year due to the falling demand. Prices paid to fishermen in our area must go down as a result of this depressed market. It can hardly be called a wise move to hitch costs of timber and seafood production to a booming demand for oil and natural gas. As a matter of record, Alaskans last fall voted to use part of the petroleum royalty income to help restore waning salmon stocks and even improve timber stands, to assure a varied economy throughout Alaska and a stable continuity for our renewable resource industry.

Since you Legislators are working for a better statewide economy, I know you will consider these factors before reaching decisions on the matters discussed herein. It is better to sustain the industry we have than to contribute to its demise. By averaging in the huge inflated wages of pipeline workers with those of the depressed areas, the depressed industries will suffer. We hope you will vote against this further burden on our renewable resource industries.

Sincerely yours,

Robin Taylor

JUNEAU ALASKA

Alaska State Legislature House

HESS COMMITTEE MEETING

2-19-75

Members Present:

Beirne	Ostrosky
Davis	Parr
Hackney	Sullivan
Ost	Swanson
Osterback	

Chairman Sullivan called the meeting to order at 3:00.

The first order of business was HB 107.

Mary Beth Hilbourne-Office of Drug Abuse

Ms. Hilbourne passed out a Departmental Position Paper concerning the bill. This same bill has been introduced in previous years. We have been trying to get the Uniform Control Substance Act in its updated form. We have a complete list of the 'substances' as they now stand. Alcohol is a depressant and should be included in any mentioning of depressant drugs. It is not on this list. We feel that this may be the time to introduce a much more constructive bill to revamp the entire Title 16.

Parr Concerning this Uniform Control Substance Act, we don't now adopt it by reference, is alcohol listed there?

Hilbourne No it is not and should be.

Gruening As stated in Title 17 can't the Commissioner of Health & Social Services set alcohol under this list by regulations?

Hilbourne I believe that he has to bring it before the Legislature a number of weeks before and hold hearings also before doing so.

Swanson What is it that you would suggest to amend line 16?

Hilbourne You could take out some of the wording but actually what is needed here is the total revamping of Title 17. It is an old bill and a new list of the Uniform Substance Act is badly needed for the whole Title 17.

Mr. Brenton - Div. of Corrections

Only here to answer questions as far as the effect of this bill on our department.

HESS MEETING

Page Two

2-19-75

Hackney I think we should hear from the Attorney General's office before acting on this bill.

Ostrosky I would like to direct a question to the sponsors of this bill and that is what exactly was meant by the wording of this bill, what were the intentions?

Ose I can't really say.

Hackney I don't feel that the intent was to make it a mandatory decision on the part of the courts.

Swanson I don't believe it is mandatory. Line 23 or 24 says 'probably' which removes it from being mandatory.

Parr The line above that has the word 'is' which makes that statement a definite fact.

Chairman Sullivan appointed Rep. Ostrosky to work as a subcommittee and research this bill further. She also asked that the Attorney General's opinion on this matter be taken into consideration.

Announcements:

Going to Anchorage for H & SS Hearings the first week in March will be:
Sullivan
Beirne
Osterback

On the first and second of March there will be meetings at the Eagle River Facility and also the MacClaughlin Youth Center. Sullivan, Beirne and Parr will be in attendance.

9:00 on Friday there will be a Joint Hearing for the HESS Committees with the Executive Board of the Alaska State School Board of Education.

Meeting Adjourned.

POSITION PAPER
ON
HOUSE BILL NO. 107

"An Act relating to possession of depressant, hallucinogenic and stimulant drugs."

Pharmacologically, alcohol is a depressant drug (sedative-hypnotic) and it may cause some legal problems if a second offense alcohol possession on public or private schools or at some school or community sponsored activity attended by persons less than 19 years of age results in a felony charge. It is equitable but probably will not receive great community support if enforcement is stringent.

Recommendation: Consideration of the Uniform Controlled Substance Act in place of this legislation.

Department of Public Safety would have to prepare a fiscal note.

Recommended by: Kelly Murrain February 7, 1975
Mary Beth Hilburn, Coordinator

Approved by: F. S. Williamson Feb. 12, 1975
F. S. Williamson, Commissioner date

file HB 107

1041 Pedro Street
Fairbanks, Alaska 99701
February 24, 1975

TO: HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE
ALASKA STATE HOUSE
SUSAN SULLIVAN, CHAIRMAN

RE: HOUSE BILL # 107
An act relating to the possession of depressant, hallucinogenic and stimulant drugs.

Since alcohol is the most damaging of the depressant drugs, and nicotine the most deadly of the stimulant drugs, it would seem fair and righteous to include these drugs in the felonious definition of minors. That would mean the law would define as a felon a high school kid with a Lucky Strike in his pocket or an Oly in his locker.

The Act is ridiculous, of course--as are most of the present laws dealing with "drugs". Dishonest and discriminatory are two of the kinder terms applicable to the present drug laws.

We hope this Legislative Body will have the courage to ^{be} honest about the regulations concerning all drugs we use for pleasure and relaxation, instead of condoning some while condemning others.

Please ignore House Bill # 107 as being too dishonest to be worthy of your time or consideration.

Sincerely yours,

Donald M. Hering

Dear Ms. Sullivan:

Thank you for your letter of February 4, 1975 relative to HB 107 and HB 111.

In order for you to obtain background information on HB 111, it is felt it would be best for you to contact Dr. F. S. Honsinger, DVM, State Veterinarian, Department of Natural Resources, Juneau.

Simultaneous with your response, the Office of Drug Abuse and the Division of Corrections testified before your Committee concerning HB 107; however, if you feel there is further information that the Department can provide, please do not hesitate to request this.

Sincerely,

Francis S.L. Williamson

HESS COMMITTEE MEETING

April 1, 1975

Members Present:

Davis	Ostrosky
Hackney	Parr
Ose	Sullivan
Osterback	Swanson

Chairman Sullivan called the meeting to order at 3:00pm.

HB 111

Romana Kelley was the prime sponsor of the bill. Gave a briefing of bill. This bill sets a flat fee. Did not include an appropriation to the bill as it would be better to pass the bill as it now stands first. The revenues from the bill would be approximately \$43,000. The financial statement along with this bill was not correct because it did not take this particular bill into consideration. For example, in Anchorage last year there were 700 - 900 animals put to sleep per month because of the inability of the pounds to care for all the animals turned over to them. All inoculation shots would also be included in the spay fee of \$18.

Hackney What is the present situation? Are they spaded by the clinics now?

Kelley No, they are put to sleep after a weeks time and no one claims the animal. They don't have the facilities to keep them any longer than that.

Sullivan If, by chance, when a person was getting a dog from the pound, under this bill it would be feasible for the keeper to suggest the animal be spaded.

Kelley The only opposition I have heard pertaining to this bill is by veterinarians. I have recieved a considerable amount of correspondence in favor of such legislation. Presently, to have an animal spaded, the cost is anywhere from \$45 to \$115. In this bill it is only \$18. Many more people will be able to afford this service.

Ose I move this bill out of Committee with a 'do pass'.

Swanson Second the motion.

Chairman Hearing no objection, so orderd.

MEMORANDUM

2416
State of Alaska

DEPARTMENT OF NATURAL RESOURCES
OFFICE OF THE COMMISSIONER

DATE: March 7, 1975

TO: Chairman
HESS Committee
State House of Representatives

FILE NO:

TELEPHONE NO:

FROM: Fred S. Honsinger, D.V.M. *FHS*
State Veterinarian

SUBJECT: Department of Natural Resources -
Agriculture - Position Analysis on
HB 111

HB 111 in the Ninth State Legislature is identical to HB 336 in the Eighth State Legislature and HB 637 in the Seventh State Legislature.

Our position on HB 111 remains the same as the testimony presented on the two identical previous bills, and that is that we recognize the overpopulation animal problem in many areas of the State, primarily the urban areas.

Spay clinics will be a partial solution to the areas served, however, as only a percentage of the animals in any given area served will be neutered, there still will remain a large percentage of untreated animals in the area to continue the problem.

We are not aware of any State sponsoring a Statewide Spay Clinic concept. There are, however, throughout the lower 48 States an increasing number of municipal sponsored local Spay Clinic Programs.

In past testimony, we have recommended this type of local concept be followed in Alaska as outlying areas have questioned their tax dollars paying for selected areas receiving the Service.

It might be that local communities could work something out with the local veterinary practitioners for a subsidized clinic program as the four communities mentioned in amending Section 2 AS 03.25.020 have available practitioners and clinic facilities.

Ms. Charlotte Calhoun
Box 927
Homer, Alaska 99603

Dear Ms. Calhoun:

Thank you very much for your letter pertaining to HB 111, in which you suggest that the proposed spay clinic be expanded to service rural as well as urban areas.

I agree that the dog population is a problem statewide, and that both rural and urban communities require means with which to alleviate it. Our limitation, however, is budgetary, with resistance being offered to the bill even as it presently reads.

For this reason, you would probably do best to write to Hugh Malone, Chairman of the House Finance Committee, Pouch V, Juneau, stressing the rural need. HB 111 is presently in this committee.

I hope that your efforts meet with success, and again express my appreciation for your letter.

Yours truly,
Susan Sullivan

Representative Susan Sullivan
Alaska House of Representatives
Pouch V
Juneau, Alaska 99801

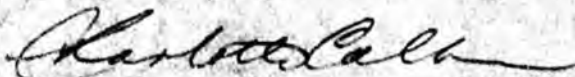

Dear Ms. Sullivan,

I understand that House Bill 111 which provides for spay clinics for cats and dogs has been referred to your Health, Education and Social Services committee. I noticed in reading the bill that the clinics are to be are to be in Anchorage, Fairbanks, Juneau and Ketchikan, at least four times a year. I realize this is proposed this way because of the population concentrations, however, there is none-the-less a very real need for such clinics in the rural communities many of which do not have any veterinary services at all, consequently the dog and cat population continues to grow at a high rate.

I would like to recommend that the bill be amended to provide that the clinic be sent to other communities, if the local governing body should request it. I realize cost could be a problem and possibly it should be required that the community pay the transportation costs to get the clinic to their area. I believe allowing this clinic to get into the rural areas would be doing a great service for them, and I believe the local Council's would be willing to pay such travel expenses to have such a service available. I have heard the Homer Council discuss the need for spay clinics more than once.

I certainly hope this legislation receives favorable action by the legislature. It is badly needed.

Yours truly,

Charlotte Calhoun

HB 413?

Anchorage, Alaska
February 10, 1975

State Legislators
State Office Building
Juneau, Alaska 99801

Dear Legislator:

I am writing to ask you to enact or support legislation to require Distemper shots for domestic dogs and cats in much the same way that Rabies shots are required. As Distemper is an airborne virus it is imperative that all dogs and cats be inoculated in order to lessen if not end this disease that affects so many animals.

Also, will you please support House Bill No. 111, introduced by Representative Kelley to operate spay clinics in Anchorage, Fairbanks, Juneau and Ketchikan for the spaying of domestic dogs and cats of private owners, the fee for which may not exceed \$18 an animal; the fee shall include inoculations against distemper and rabies, etc. Many people would be more than glad to have their animals spayed but cannot afford the exorbitant charges for this service.

Any support you can give will be much appreciated.

Sincerely,

Fay W. Malone

Dear Ms. McKean:

Your mailgram requesting information regarding the Los Angeles City public low cost Spay and Neuter Clinic program reached my desk this morning for response.

I am enclosing our 1974¹ progress report, the latest we have compiled on the program. I am also enclosing two more recent press releases providing statistics relative to the program.

The press release, dated September 4, 1974 provides late statistics--the latest I have compiled--on the impoundment and destruction of animals since the inception of the spay-neuter clinic program.

We have five veterinarians working in the three city clinics. Each veterinarian averages ten surgeries per day. The number of fatalities is less than one per cent. The animals are thoroughly examined and must be in good physical condition before they are accepted for surgery.

All necessary inoculations pertinent to the operation are included in the cost of surgery--\$17.50 for spaying and \$11.50 for neutering. Type of inoculations: See enclosed brochure.

Cost factors, as they developed last year, are cited in the 1974 Progress Report.

The clinics are considered to be very successful. They are not financially self-sustaining at this date, but are providing a needed service for city pet owners who can not pay the higher fees charged by private veterinarians. Because of public participation at the public clinics, there are less unwanted stray dogs and cats to be impounded and eventually destroyed.

--2--

The ultimate hope of the Los Angeles City Department of Animal Regulation is to have a spay-neuter clinic at each of its six animal shelters. Our next step involves the expansion of one of the existing clinics in a new animal shelter which will replace an outmoded shelter.

From the inception of the clinic program February 17, 1971 (when the first of three clinics was established) 23,020 cats and dogs have been altered. Following the opening of the first clinic in 1971, two other clinics were opened in May and June of 1973.

I hope the enclosed information assists you in your planning.

Very truly yours

James McNamara

REPRESENTATIVE SUSAN SULLIVAN
Pouch V
State Capitol Building
Juneau, AK 99801

Dear Mrs. Sullivan:

We are a group of concerned citizens who urgently advise a favorable consideration of House Bill No. 111, state operated spay clinics for dogs and cats.

At the present time, the GAAB Animal Shelter exterminates an average of 1200 animals per month. These animals are deserted, or a product of an unwanted litter. We strongly feel that if the spay charge was a reasonable dollar figure, more people would have their pets spayed and therefore dilute the over population of these creatures.

With the projected increase of population, we can assume the problem will increase with unwanted pets as well. House Bill No. 111 would be a preventative measure against this. Please, vote for the passage of this bill.

JUNEAU ALASKA

Alaska State Legislature House

HESS COMMITTEE MEETING

2-25-75

Members Present:

Beirne	Sullivan
Davis	Swanson
Hackney	
Osterback	

Chairman Sullivan called the meeting to order at 11:00 am. The first bill up for consideration is HB 29.

HB 29 - School Tax On Oil

Mr. Swanson is the sponsor of this bill and gave a briefing of his bill. We are allowed to do this by Chapters 57 and 58. By law the revenue will go into the general fund. This is not a dedicated bill. With a tax of this type, a per barrel tax, as the production grows, the returns increase. The revenue goes right along with it. This bill deals with the future more than with the immediate time. It will add \$6 million annually to our treasury by the passage of this bill. Also it will be very easy to amend it if our costs are much higher.

Hackney On page 2, line 10. What is the meaning of this applying only on intra state oil?

Swanson Intrastate is the feeder line that we have control of, we have no control of the Interstate Pipeline.

David Walker Legislative Affairs

The meaning of this is that when you're talking about the transportation of oil, the oil transported within the state pertains to this bill. The rates are set by the Commission.

Beirne I am questioning the concept or content of this bill. We're dealing with proposing another small tax, it would seem to me, on how we tax our greatest resource. The big issue here is how much the oil companies put into the state. This might complicate it. Is there any other need for this bill, we already have a school tax which doesn't really go strictly for schools?

Swanson Putting tax on oil hoping it will go into the general fund. We shouldn't every top an industry, everyone can argue this but I don't have any sympathy for an industry that makes such an overwhelming profit from the state.

Davis What percent are we talking of, pertaining to Intrastate Oil?

Swanson 125 Million up to 620 Million barrels. (see attached sheet)

Hackney This would tax all the oil moving within the state where there's pipeline action?

Swanson Yes, this is the only defense we have in dealing with interstate situations. We can tax, by this bill, any feeder line.

Beirne The only oil at this time is out of the Kenai area and its being taxed right out of existence. I'm insulted that you would ask to send this important bill out of committee with no more testimony than we have here.

Hackney I'm inclined to agree with Dr. Beirne, I think its a crime to treat such an important bill in this manner.

Davis I move we pass this bill out of committee with individual recommendations.

Chairman Sullivan Without hearing objection, so ordered.

Meeting Adjourned until 3:00 pm. this afternoon.

Chairman Sullivan recalled the committee at 3:00 to take up HB 113.
Mr. Ose was the only one absent

HB 113 Dr. Beirne is the sponsor of this bill. This is the same bill as was introduced in 1974 session (HB 201) At that time we had considerable hearings in Anchorage area. Dr. Fritz was the co sponsor at that time. Right now we have some considerations and amendments to add to this bill at its present state.

Charles Smith - Dept. Public Safety
We held meeting on this and proposed legislation in the Attorney General's office requiring periodic inspection programs to the state only relating to highway vehicles. We would suggest to incorporate some type of check on snow machines through motor vehicles registration. This would require certain controls on them at the time of registration.

Beirne Would you propose the section of motor vehicles be changed? Or reflect?

Smith This would reflect our regulations. At the present time there are nuisance regulations. And if motorcycles are used on the highways they are under our control.

Hackney Are you aware of any case of conviction of a nuisance case?

Smith No, not to my knowledge.

Commissioner Mueller - Dept. Environmental Conservation
If the primary thrust of this Legislation is for motor vehicles, then it should be under the Public Safety section. Our Dept. has an Environmental Advisory Board. A question we have is that this legislation speaks to motor vehicles and snow machines, would the Committee consider air craft boats etc. or do they come under this catagory? There would also seem to be a problem of enforcement, particularly the control on motor vehicles. Regulations should be developed, if the vehicle was sold after a certain year, it should have noise control devices on them at the time of sale and it would be illegal to modify or remove after point of sale.

Page Three
HESS Meeting
2-25-75

Osterback You mentioned boats and planes. I don't see how you could do this. To muffle an engine on a boat would ruin the engine. I think this bill should exempt boats and planes.

Parr Are there any municipalities to date that you know of that have a noise control ordinance?

Commissioner We have had some correspondence from Anchorage on these matters, you have some of the information in the pamphlet before you.

Parr Although the intent of this bill is good, I wonder if we're trying to do a little much here. For example comparing the noise of the City of Anchorage with the noise of a village.

Beirne The actual intent of this bill is to the decible of noise which is going to effect the health. It is not to address itself only to snow machines or motor vehicles but to building materials, architectural designs, road construction and boarders to reflect sound etc. It addresses itself to all areas of noise detrimental to health also to the psychological health of the individual.

Swanson I don't believe it is necessary to impose this regulation on country people. They couldn't afford to put control mechanisms on all their machinery.

Parr I have an objection to the Advisory Council or standards set by the department. Sec. 400 pg 3 reads to me that if you don't put the control at the local level it would be unreasonable and too costly to be regulated this way.

Beirne In terms of costs, in the big industries it will be cheaper in the long run to take these precautions rather than face the suits that are now beginning to take place.

Hackney Commissioner are you saying that OSHA would be in a better position to take care of contractors etc.?

Commissioner Not necessarily, the impingment on the individual workers should be handled by them, and construction operations.

Mr. Weeden - Dir. Div. Policy & Planning

I would only like to add that it seems that the section in the duties of the Council which speak of the education involved are the most criticle. And we would ask that the local governments be allowed to take up their own positions.

Swanson Are you comparing the noise of the typewriter with a caterpillar? In the same bill?

Beirne Every law is subject to a reasonable mans knowledge. At a decible level this could address itself to any noise making device going over the level of safety to the individual health.

Smith The biggest problem is where equipment is altered. There is a National Control Board and Federal Standards already in affect. Alaska isn't subject to the Federal Standards because it lacks the motor vehicle laws at this time.

Page Four
HESS Meeting
2-25-75

Swanson I don't think there is anything we could pass here that would control automobiles that isn't already in effect.

Canterbury - Communicative Disorders Program.

This program is responsible for hearing testing in field work. We see a broad range of hearing loss throughout the state. A lot of this loss is because of the style of living, activities etc. The most important aspect is that hearing loss can be prevented. (Showed Committee Audiogram Chart) The OSHA standards recognize 90 DB of noise for a normal working day. I believe this bill has some good facets. We would rather see a comprehensive plan to the program by educating people as to its importance, when and why they should wear ear plugs etc.

Swanson It seems to me we are dealing in two areas. Operators who have hearing hazard, and the nuisance hazard which probably has more pressure on a person mentally and physically.

Canterbury I'm speaking of physical damage. If you have the right education program it would help a lot. It's amazing how many people just don't realize that their hearing is going. They really take it for granted.

Parr Isn't there a certain amount of hearing loss with advanced age?

Canterbury Sure, progressive hearing loss exists in the elderly. What really disturbs me is the amount of hearing loss with teenagers.

Mr. Bridges Architect from Anchorage

The bill as proposed is a step in the right direction. We would hope that an architect be considered for the Advisory Council. The construction of buildings could be an important factor in adding the decibel range subject to individuals.

Chairman Sullivan recalled the meeting at 7:00 pm. to take up CSSB 28.

Rep. Ose was the only member not present for this meeting.

Chairman Sullivan asked Judge Stewart how he would interpret the proposed amendment.

Judge Stewart I'm not sure I know.

Hackney If that part were deleted, what would your interpretation be?

Stewart You have to make judgments on any issue like this by considering what is in the best interest of the minor. So, consider if this marriage was or evidence was to be in the best interest of the involved minor. An example of the evidence would be to bring in a psychiatric specialist to state that this is the case.

Chairman The competency and maturity of the minor, is this what you would judge your decision on?

Stewart Yes, that's what I had in mind when I used the phrase, best interest of the minor.

Page Five
HESS Meeting
2-25-75

Hackney Would a Judge call the parents?

Stewart Yes, the parents would certainly be able to come in and testify as to whether it would be good or bad.

Hackney Would the child need to have legal council?

Stewart Not necessarily, unless there is some question here about the Childrens Code.

Parr It seems that I don't understand why everyone in the family must be petitioned into court, why can't they meet informally in the judges chambers?

Stewart They must have records in the court unless you write statutes into the Childrens Laws (Title 47) to cover this.

Sullivan The whole subject here is concerned with section 3 and the amendment we have talked about, this is where the trouble will occur in courts?

Stewart Yes, what are extra ordinary circumstances?

Beirne Perhaps if we insert "in the best interests of the minor" this will comply with the childrens code.

Sullivan I think we should consider Judge Stewarts amendment: after the word "may" insert the words, "where it is in the best interest of the minor".
Another amendment I'm interested in, would you say that there are many 12 and 13 year olds in this situation? I'm wondering about setting absolute doors to the age limit.

Stewart No, but then those cases wouldn't come my way.

Sullivan I've heard this is happening and I'm very concerned.

Stewart That might be so in cases of pregnancy.

Parr This was originally an equalizer bill.

Swanson I move for the passage of these two amendments (see attached)

Chairman So ordered.

Swanson I move and ask unanimous consent to pass bill out of committee as amended.

No Objection.

Meeting Adjourned

POSITION PAPER

ON

HOUSE BILL No. 113

An Act relating to noise pollution control.

House Bill No. 113 is intended to create a Noise Control Council within the Department of Environmental Conservation, with the purpose of assisting that Department in an advisory capacity in formulating regulations for the control of excessive environmental noise levels.

Excessive exposure to intense levels of noise does have a deleterious effect upon the health, safety, and welfare of the residents of Alaska. This specifically manifests itself as an irreversible hearing loss which first affects high frequency responses, and thereafter encroaches into the frequency range of sounds which are vital to human communication. Numerous research studies have documented the detrimental effects of high intensity noise.

Excessive noise exposure is a major hazard in certain work environments and in connection with some recreational activities. In addition to loss of hearing sensitivity, noise may provoke physical and mental distress; hinder or complicate performance capability, and disrupt relaxation and sleep. The potential cost of compensation for hearing loss due to industrial noise could be very large.

Alaskans are exposed to an inordinate amount of high intensity noise originating from snowmobiles, rifle fire, light aircraft, and motor boats. In a recent study of the hearing acuity of the entire population of new students from the BIA High School at Mt. Edgecumbe, approximately 13% showed some degree of auditory nerve damage. This is the type of hearing loss resultant from excessive exposure to loud noise. Hearing conservation programs established in many sections of the United States have successfully coped with this problem. The control of excessive noise need not be an expensive undertaking for the State. In most cases minor architectural change, public education, and ear protection are satisfactory to control the problem. To be maximally effective, a Noise Control Program should include the following components:

1. Evaluation of excessive noise levels.
2. Reduction of excessive noise levels at the source.
3. A hearing testing program.
4. Individualized ear protection against noise.
5. Health education with regard to the dangers of noise induced hearing loss.

The Communicative Disorders Program of the Department of Health and Social Services has an active program underway in the last three of the five listed. Through extension of responsibilities of the Communicative Disorders Program staff, it could function cooperatively with the Noise Control Council on service delivery aspects of all five components. The Communicative Disorders Program is the only program within the State of Alaska which has the expertise and the instrumentation necessary to perform the required technical service.

The Department suggests the following modifications to the bill:

- (1) At least 1 of the 13 members of the Noise Control Council should be an individual who is familiar with the intricacies of the measurement of noise.
- (2) Section 46.03.390 pertaining to noise levels of snowmobiles should be deleted along with other references to specific sources of noise pollution.
- (3) In accordance with the recommendations of the Comprehensive Health Advisory Council, that all new councils relating to the health services be incorporated as committees under the State-wide Health Coordinating Council, the Noise Control Council's responsibility should be as a committee under the State-wide Health Coordinating Council, and not in the Department of Environmental Conservation.

The Department supports the bill with changes recommended above.

Dear Ms. Sullivan:

I am enclosing a copy of a letter sent to the Honorable Helen Beirne relating to H. B. 113, which you co-sponsored. I believe the information contained therein may prove useful to you.

ISIA extends its offer of full cooperation and assistance to you on this and all other snowmobile-related matters.

Sincerely,

**Derrick A. Crandall
Director, Government Affairs**

The Honorable Helen Beirne
Member, House of Representatives
State of Alaska
Box 4-BB
Spennard, Alaska 99503

Dear Ms. Beirne:

We note with interest your introduction of House Bill 113, "An Act Relating to Noise Pollution Control." The new proposed section 46.03.390, establishing snowmobile noise limits, of course has great significance for the snowmobile industry.

We further note the changes incorporated into this legislation as compared with your H.B. 201 of last session. Despite the incorporation of the revised date for establishing a 73 dBA level, we continue to view portions of the proposed language as at variance with similar requirements in other states.

The prohibition on the sale or offering for sale is tied in virtually all other states with a date of manufacture. As an example, I cite legislative wording of the current Massachusetts law: (Mass. Laws, Chapter 90B, Section 24):

"No snow vehicle manufactured after July 1, 1972, shall be sold, offered for sale, or operated that produces a sound pressure level of more than 82 dBA. No snow machine manufactured after July 1, 1975, shall be sold, offered for sale, or operated that produces a sound pressure level of more than 78 dBA."

Otherwise, sale of used machines as well as machines held by dealers for sale would be in violation of the law according to our interpretation.

Massachusetts, and at least seven other states currently require that certification of compliance with this provision be

The Honorable Helen Beirne
Page two
February 11, 1975

established. Currently, several states are acting to further insure compliance through independent certification by a qualified testing laboratory. In this way, the sound level reduction necessary for the public welfare is achieved without imposing additional and substantial enforcement burdens upon the state. At this time, some 90% of the entire snowmobile production is voluntarily tested for compliance with a 78 dBA maximum sound emission, as tested under SAE J192(a) under a program administered by the Snowmobile Safety and Certification Committee, Inc.

Maine has already formalized this requirement by regulation. A copy of the provision is enclosed for your information and possible use.

Additional information on the aforementioned SSCC program is enclosed. We should be delighted to answer any inquiries on this matter and/or refer you to the appropriate parties involved.

Finally, I would make mention of recent actions commenced by the U. S. Environmental Protection Agency as mandated by the 1972 Noise Pollution Control Act. In light of the preemptive nature of EPA's forthcoming regulation, a large number of states have not specified sound level reductions beyond 1975, to 78 dBA. We would support the inclusion of the 78 dBA level with a recognition of imminent Federal requirements as an amendment to your proposed legislation.

If we may be of some further assistance to you, please feel free to call upon us at any time.

Sincerely,

M. B. Doyle
President & Chief
Executive Officer

NOTICE OF RULEMAKING

Pursuant to Title 12 M.R.S.A. §1979 and after notice and hearing as required therein the following regulation is hereby adopted:

Regulation No. 4

Pursuant to the provisions of Title 12 M.R.S.A. §1972, Subsection 6, no snowmobile manufactured after February 1, 1975 may be sold or offered for sale by any manufacturer, distributor or dealer in the State of Maine unless such snowmobile is constructed so as to limit total vehicle noise to not more than 78 decibels of sound pressure at 50 feet on the A scale as measured by the SAE Standards J-192a and proof of compliance with the foregoing requirement in the form of either (i) an "SSCC" label conspicuously attached showing certification by the Snowmobile Safety Certification Committee, Inc. that such snowmobile meets the State's minimum noise standards or (ii) by a letter with test results submitted to the Commissioner of Inland Fisheries and Game showing an evaluation of the noise levels by a competent independent testing laboratory and showing or certifying that such snowmobile meets the State's minimum noise standards.

MAYNARD F. MARSH

Commissioner

Department of Inland
Fisheries & Game

A True Copy. Attest:

February 25, 1975

There are considerable differences of opinion as to how to define "objectionable" noise. Although sound levels can be measured, human psychological responses generally cannot. What may be annoying to one person will not necessarily be so for another. However, there is general agreement that noise exposures of over 90 db(A) for an eight-hour period will cause damage to the human ear, and one of the State and National Occupational Safety and Health Standards is established at this level. Other standards have been established at 115 db(A) for a 15-minute exposure, while the allowable instantaneous noise exposure limit is set at 140 db(A).

Federal Noise Control Act of 1972

Public Law 92-574, the Noise Control Act of 1972, focuses its regulatory thrusts at controlling noise at federal facilities, and at certain classes of "products distributed in commerce." The Act requires the Administrator of the U. S. Environmental Protection Agency to "...publish proposed regulations, meeting the requirements of subsection (c), for each product--(A) which is identified (or is part of a class identified) in any report published under section 5(b)(1) as a major source of noise, (B) for which, in his judgment, noise emission standards are feasible, and (C) which fall in one of the following categories: (i) Construction equipment. (ii) Transportation equipment (including recreational vehicles and related equipment.) (iii) Any motor or engine (including any equipment of which an engine or motor is an integral part). (iv) Electrical or electronic equipment." EPA released its first set of regulations for noise control on October 22, 1974. The regulations covered in-use interstate motor carriers. At the same time, EPA issued proposed noise standards for new medium and heavy duty trucks and portable air compressors. A copy of information materials which EPA issued regarding these regulations is attached for your review.

Comments on HB 113

The Department of Public Safety will present the bulk of the Administration's comments on HB 113. We would like to focus our comments on Section 46.03.440. The Department believes the establishment of a Noise Control Council is an excellent idea, but we suggest that the public members of the Council should be members of the Department's Environmental Advisory Board. There are nine members on the Board, including the Commissioner who serves as chairman. The public members of the Board represent a broad spectrum of interests and would undoubtedly do an excellent job.

We believe the duties of the Council in Section 46.03.450 are good and will be of great assistance in fulfilling legislative intent of the bill. However, we suggest that the word "department" be replaced by "Department of Public Safety" and "Department of Environmental Conservation."

The Honorable Susan Sullivan 3

February 25, 1975

The Department will have representatives present at the Committee hearing on HB 113 today. If the Department may be of any further assistance to you, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Ernst W. Mueller". The signature is written in a cursive style with a large initial "E".

Ernst W. Mueller
Commissioner

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, Governor

POUCH 0-- JUNEAU 99801

February 25, 1975

The Honorable Susan Sullivan
Chairperson
Health, Education and Social
Services Committee
Alaska State House
Pouch V
Juneau, Alaska 99811

Dear Madame Chairperson:

The Department of Environmental Conservation has reviewed HB 113 relating to noise pollution control. We would like to present our comments on the bill, and present additional information which may be of use to the Committee in its deliberations. For ease of review, we shall present our comments in three categories: 1) background information regarding noise pollution, 2) information regarding the Federal Noise Control Act of 1972, and 3) specific comments on HB 113.

Background Information On Noise Pollution

Noise pollution is frequently referred to as the "other pollution" and has been shown to be a hazard to public health if high decibel (db) levels are reached. The standard unit of measurement of noise is the decibel which is based on a logarithmic function of the noise energy. Therefore, a sound level of 90 decibels has ten times more energy than one of 80 decibels, or one hundred times more energy than one of 70 decibels. An increase of three decibels in measured sound levels represents a doubling of the sound energy. A sound level of 110 decibels is 50 decibels higher than normal conversation levels, but the energy of the 110 decibels noise is 1,000,000 times greater than that of conversation sound levels. Because sound energy is transmitted in a wide range of frequencies and the human ear reacts differently to these frequencies, a "weighting" scale (A) typically is used to describe decibel levels.

SUMMARY OF THE INTERSTATE MOTOR CARRIER NOISE STANDARDS

Applicability: These regulations apply to motor vehicles over 10,000 pounds GVWR engaged by motor carriers in interstate commerce.

Pass-by Performance Standards: No motor vehicle shall exceed 86 dB (A) at 50 feet at speeds under 35 mph. No motor vehicle shall exceed 90 dB (A) at 25 feet at speeds over 35 mph.

Stationary Run-up Test Standard: No motor vehicle powered by an engine with a governor shall generate more than 83 dB (A) at 50 feet when accelerated from idle to wide open throttle with the transmission in neutral.

Visual Exhaust System Inspection: No motor vehicle shall be operated that is not equipped with an exhaust system that is in constant operation and properly maintained.

Visual Tire Inspection: No motor vehicle shall be operated on tires having a tread pattern composed primarily of cavities that are not vented to the shoulder of the tire (pocket tread tires) unless such tires can be shown to comply with the performance standard.

FINAL NOISE EMISSION REGULATIONS FOR INTERSTATE MOTOR CARRIERS

The Environmental Protection Agency has announced the issuance of regulations for the control of noise emissions from vehicles operated by interstate motor carriers. The proposed regulations were published in the Federal Register on July 27, 1973, as required under Section 18 of the Noise Control Act of 1972. Final regulations will be published in the Federal Register within the next few days. This is the first final standard-setting action by the Agency under authority of the Act.

The new standards, which apply to all vehicles over 10,000 lb. gross vehicle-weight rating or gross combination weight rating by interstate motor carriers, take into account the best available noise reduction technology and the cost of compliance within the one-year time period for conformance with the standard by interstate carriers.

This regulation is the first significant Federal step in a series of actions to reduce highway noise. This standard, applicable to in-use vehicles operated by interstate carriers, will have an impact within one year on reducing highway traffic noise. In conjunction with the more stringent new medium and heavy-duty truck noise control regulations just proposed by the Agency (see fact sheet on Noise Emission Standards Proposed for New Trucks), further traffic noise reduction will be accomplished in a systematic time phased manner to permit application of available technology while keeping the costs to meet the standards as low as reasonably possible.

The standards are expressed in A-weighted decibels. A decibel is a numerical expression of the relative magnitude of sound. "A-weighting" is a method of numerical adjustment to reflect impact of noise on the range of human hearing.

As new control retrofit technology is developed and can be applied at reasonable cost, the interstate motor carrier regulations will be revised accordingly. Further revision of

State and local jurisdictions may not adopt or enforce noise control regulations of the noise sources covered by this interstate motor carrier regulation unless such State or local regulations are identical to the Federal regulations. Federal preemption for interstate motor carrier noise control regulations (Section 18 of the NCA, 1972) is significantly different from the preemptive Federal authority for newly manufactured trucks (Section 15 of the NCA, 1972) which leaves to State and local jurisdictions the authority to establish and enforce controls on levels of noise emissions resulting from the operations of such new trucks. However, States and localities are strongly urged to adopt regulations applicable to interstate motor carriers that are identical to the Federal standards and to participate, through their enforcement capabilities, in achieving an effective nationwide enforcement program. It is recognized, however, that in some areas standards or controls on levels of environmental noise, or on the operation, maintenance, or use of any motor vehicle, or movement of any motor vehicle to which these regulations are applicable may be necessary or desirable based on special local conditions, as long as such action is determined not to be in conflict with the Federal regulations. In these cases, application shall be made to the Administrator for such determination. The procedures for applying for such determination will be published in the Federal Register within the next four months.

ENFORCEMENT

Under the law, the Secretary of Transportation, after consulting with the Administrator of EPA, is responsible for assuring compliance with these standards. State and local jurisdictions employing identical standards, are encouraged to act as independent enforcement agencies.

NOVEMBER 1974

PROPOSED NOISE EMISSION STANDARDS FOR NEW MEDIUM AND HEAVY TRUCKS

The Environmental Protection Agency proposes to establish a regulation limiting noise emission from newly manufactured medium and heavy trucks. Notice of the proposed rule making will appear in the Federal Register within the next few days.

BACKGROUND

The Congress passed the Noise Control Act in 1972 as a result of their findings that (1) inadequately controlled noise presents a growing danger to the health and welfare of the Nation's population; (2) the major sources of noise fall into four categories of which construction equipment, transportation equipment, and aircraft are the most significant; and (3) while primary responsibility for the control of noise rests with State and local governments, certain major sources in commerce require national uniformity of treatment and therefore Federal action is essential.

Under the provision of the Act, the EPA is to identify the major sources of noise and issue regulations designed to reduce and limit such noise. The EPA has identified new medium and heavy trucks as major sources of noise in the transportation equipment category.

THE STANDARDS

The proposed regulation would require that new medium and heavy truck noise emissions not exceed, when measured at a distance of 50 feet (15.24 meters) from the center line of the test track, the following for the vehicle model-years shown:

<u>Date</u> <u>(Model Year)</u>	<u>Low Speed,</u> <u>High Acceleration Test</u>
1977 thru 1980	83 dB(A)
1981 thru 1982	80 dB(A)
1983 and subsequent	75 dB(A)
