RE: SB 94

I STRONGLY SUPPORT SB 94 TO INSTALL A 50 METER POOL AT BARLETTE H.S. IN ANCH. AT PRESENT NO SUCH SWIMMING POOL EXISTS IN ALASKA. ALL MAJOR COMPETITION "OUTSIDE" IS CONDUCTED IN SUCH A FACILITY. COMPETITIVE SWIMMING IN ALASKA IS PROGRESSING RAPIDLY, AND OUR COMPETITIVE SWIMMERS NEED THE OPPORTUNITY TO TRAIN IN A LONG COURSE (50METER) POOL IF THEY ARE TO BE COMPETITIVE IN "OUTSIDE" MEETS. WEST VALLEY H.S. IN FAIRBANKS SHARES THE SAME DISTINCTION AS BARTLETT H.S. IN THAT BOTH ARE THE ONLY H.S. IN THEIR RESPECTIVE CITIES WITHOUT A SWIMMING POOL. I WOULD VERY MUCH LIKE TO SEE A 50 METER POOL AT WEST VALLEY ALSO! I WILL LEAVE IT TO YOUR BEST JUDGEMENT AS TO WHETHER OR NOT TO PURSUE THE WEST VALLEY POOL AT THIS TIME.

I ENCOURAGE YOU TO SUPPORT SB 94.

SENATE BILL 94 - BARTLETT HIGH SCHOOL, 50 METER OLYMPIC-SIZE POOL

MARCH 2, 1981

- **OUT OF THE 6 HIGH SCHOOLS IN THE ANCHORAGE AREA, BARTLETT HIGH SCHOOL IS THE ONLY ONE WITHOUT A SWIMMING POOL.
 - **THE PRESENT BUILDING AT BARTLETT HAS BEEN DESIGNED FOR THE ADDITION OF A SWIMMING POOL.
 - **WHEN BUILT, THE POOL WOULD BE THE ONLY OLYMPIC-SIZE 50 METER POOL IN THE STATE.
 - **THE POOL WOULD PROVIDE COMMUNITY USE DURING NON-SCHOOL HOURS, A NEED THAT I HAVE BEEN MADE AWARE OF BY MANY PEOPLE OF THE COMMUNITY.
 - **WOULD PROVIDE FOR SCHOLASTIC SWIMMING TEAM PRACTICE UNDER IDEAL CONDITIONS.
 - **INCLUDED IN THE ANCHORAGE SCHOOL DISTRICT'S CIP REQUEST.
-

DISTRICT 8 PUBLIC HEARINGS FEBRUARY 21, 1981

- **THE HEARINGS WERE HELD IN THREE LOCATIONS: MOUNTAIN VIEW, MULDOON AND EAGLE RIVER. 160 PEOPLE ATTENDED THE HEARINGS. THERE WAS AN OVERWHELMING RESPONSE IN FAVOR OF THE CONSTRUCTION OF THE POOL. THE NEED WAS VOICED AGAIN AND AGAIN BY COMMUNITY LEADERS, AS WELL AS SCHOOL PRINCIPALS AND SWIM COACHES.
- **ATTACHED IS JUST ONE OF THE TELEGRAMS I HAVE RECEIVED IN SUPPORT OF SB 94.

From Anchorage School District Capital Program
 Legislative Request

<u>LOCATION/PROGRAM</u>	<u>CAPITAL ITEM</u>	<u>PRIORITY RANKING</u>	<u>DESCRIPTION</u>	<u>ESTIMATED COST</u>
Aurora Elementary	Re-roof the entire building	1	Roof leaks constantly and is repaired continually. Roofing crews have claimed that Aurora's roof is in the worst condition of any in the Anchorage School District.	300,000
<u>Bartlett/Regich High School</u>	(50-meter) Swimming Pool	1	Of the six (6) high schools in the district, four (4) currently have swimming pools and a fifth pool has been funded for construction at Service High. The building at Bartlett has been designed for the addition of a swimming pool. Its construction would enable Bartlett to add swimming instruction to its curriculum, to have interscholastic swimming teams practice under ideal conditions similar to other schools, and enable the community to have the use of the pool during non-school hours. If the State sells \$1,500,000 of bonds this total would be reduced by \$1,500,000.	7,000,000
Chitkok Elementary	Add a six (6) room addition to the existing building.	1	At the present time Chitkok Elementary has six (6) relocatable classrooms. These units have been here for the past six (6) years and by no standards are comparable to classrooms in the main school building. Students must come to the main building to get a drink of water and use toilet facilities. This poses a real problem during the cold winter months. Chitkok has maintained a population of over six hundred (600) students for the past six (6) years and all indications point to increased population growth in this area. An addition of six (6) classrooms would enhance the safety of the students, provide a better learning environment and add to the aesthetic appearance of the neighborhood.	700,000
Chugiak/Eagle River/Ikluatna Jr. High School	Board and community approved Junior High School for 800 - 1,000 students. Scheduled to open Fall 1982.	1	Additional funding requirements for the Junior High School currently under construction design. Bond funds insufficient to complete standard school specifications.	7,000,000
New Eagle River Area Elementary School	Acquire site - construct (see above) in Lake River Valley.	1	By 1986-87 all elementary schools in the Chugiak/Eagle River area except Birchwood School will be overcrowded. Chugiak, Eagle River and Homestead are forecast to be short 17 classrooms. It is imperative that provisions be made now to prevent anticipated space shortage.	6,700,000
Gladys Wood Elementary	Add a six (6) room addition to the existing building	1	At the present time Gladys Wood has one (1) relocatable classroom which has been there for several years. These units are by no standards comparable to classrooms in the main school building. Students must come to the main building to get a drink of water and use toilet facilities. This poses a real problem during the cold winter

SENATE BILL 94 - BARTLETT HIGH SCHOOL, 50 METER OLYMPIC-SIZE POOL

MARCH 2, 1981

**OUT OF THE 6 HIGH SCHOOLS IN THE ANCHORAGE AREA, BARTLETT HIGH SCHOOL IS THE ONLY ONE WITHOUT A SWIMMING POOL.

**THE PRESENT BUILDING AT BARTLETT HAS BEEN DESIGNED FOR THE ADDITION OF A SWIMMING POOL.

**WHEN BUILT, THE POOL WOULD BE THE ONLY OLYMPIC-SIZE 50 METER POOL IN THE STATE.

**THE POOL WOULD PROVIDE COMMUNITY USE DURING NON-SCHOOL HOURS, A NEED THAT I HAVE BEEN MADE AWARE OF BY MANY PEOPLE OF THE COMMUNITY.

**WOULD PROVIDE FOR SCHOLASTIC SWIMMING TEAM PRACTICE UNDER IDEAL CONDITIONS.

**INCLUDED IN THE ANCHORAGE SCHOOL DISTRICT'S CIP REQUEST.

DISTRICT 8 PUBLIC HEARINGS FEBRUARY 21, 1981

**THE HEARINGS WERE HELD IN THREE LOCATIONS: MOUNTAIN VIEW, MULDOON AND EAGLE RIVER. 160 PEOPLE ATTENDED THE HEARINGS. THERE WAS AN OVERWHELMING RESPONSE IN FAVOR OF THE CONSTRUCTION OF THE POOL. THE NEED WAS VOICED AGAIN AND AGAIN BY COMMUNITY LEADERS, AS WELL AS SCHOOL PRINCIPALS AND SWIM COACHES.

**ATTACHED IS JUST ONE OF THE TELEGRAMS I HAVE RECEIVED IN SUPPORT OF SB 94.

From Anchorage School District

Capital Improvement Program
legislative Request

<u>LOCATION/PROGRAM</u>	<u>CAPITAL ITEM</u>	<u>PRIORITY RANKING</u>	<u>DESCRIPTION</u>	<u>ESTIMATED COST</u>
Aurora Elementary	Reroof the entire building	1	Roof leaks constantly and is repaired continually. Roofing crews have claimed that Aurora's roof is in the worst condition of any in the Anchorage School District.	300,000
<u>Bartlett/Regich High School</u>	(50-meter) Swimming Pool	1	Of the six (6) high schools in the district, four (4) currently have swimming pools and a fifth pool has been funded for construction at Service High. The building at Bartlett has been designed for the addition of a swimming pool. Its construction would enable Bartlett to add swimming instruction to its curriculum, to have interscholastic swimming teams practice under ideal conditions similar to other schools, and enable the community to have the use of the pool during non-school hours. If the State sells \$1,500,000 of bonds this total would be reduced by \$1,500,000.	7,000,000
Chinook Elementary	Add a six (6) room addition to the existing building.	1	At the present time Chinook Elementary has six (6) relocatable classrooms. These units have been here for the past six (6) years and by no standards are comparable to classrooms in the main school building. Students must come to the main building to get a drink of water and use toilet facilities. This poses a real problem during the cold winter months. Chinook has maintained a population of over six hundred (600) students for the past six (6) years and all indications point to increased population growth in this area. An addition of six (6) classrooms would enhance the safety of the students, provide a better learning environment and add to the aesthetic appearance of the neighborhood.	700,000
Chugiak/Eagle River/Eklutna Jr. High School	Board and community approved Junior High School for 800 - 1,000 students. Scheduled to open fall 1982.	1	Additional funding requirements for the Junior High School currently under construction design. Bond funds insufficient to complete standard school specifications.	7,000,000
New Eagle River Area Elementary School	Acquire site - construct (see above) in Lake River Valley.	1	By 1986-87 all elementary schools in the Chugiak/Eagle River area except Birchwood School will be overcrowded. Chugiak, Eagle River and Ikroavik are forecast to be short 17 classrooms. It is imperative that provisions be made now to prevent anticipated space shortage.	6,700,000
Gladys Wood Elementary	Add a six (6) room addition to the existing building	1	At the present time Gladys Wood has one (1) relocatable classroom which has been there for several years. These units are by no standards comparable to classrooms in the main school building. Students must come to the main building to get a drink of water and use toilet facilities. This poses a real problem during the cold winter

April 8, 1981

Honorable Randy Phillips
Alaska State Legislature
Pouch V (MS 3100)
Juneau, Alaska 99811

Dear Randy:

This letter is in response to your request for information concerning a 50-meter swimming pool. The following information was received from Mr. Ed Nash, Alaska Administrative Chairman of the U. S. Swim Committee.

At the present time there are 19 registered Alaska swim teams, and these teams have from 12 to 110 members each. So that our youth can compete, we must have a facility that will allow training and competition for the many serious swimmers in the state. There are currently over 800 registered swimmers in the state with an additional 200 junior and senior high school swimmers competing. This state is sorely in need of a long-course pool that will meet the specifications of the United States Swimming Rules, Article 7, Section 1; that is, 50.025 meters in length and 22.885 meters wide with a minimum depth of 1.219 meters.

In addition, since Anchorage is at the airway crossroads, it would be ideal to have national and international events in Anchorage. Without an official size pool, this could not happen.

Currently, the technical rules of United States Swimming, which is the official national governing body for swimming under the 1978 Congressional Sports Act, specifies that all world records must be set in a 50-meter pool. All American records are listed as short course or long course (separate categories) records. The short course must be 25 yard or 25 meter. We are able to offer this half of the swim program in Alaska.

Rep. Randy Phillips
April 8, 1981
Page Two

The long course must be 55 yard or 50 meter. At the present time, there are no pools in Alaska capable of offering this half of the national program to the youth of this state.

If additional information is needed, please let me know.

Sincerely,

L. T. Freeman
Deputy Executive for
Business Management

TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

Assume:

1. No additional cost for the question concerning sectional division to be placed on the October 1982 REAA ballots.
2. One-time mapping cost of 25.0 for sectional maps to be prepared during FY 83.
3. Additional printing costs for separate sectional ballots beginning in FY 84 for the October 1983 REAA elections. (Currently 21 ballots; legislation would allow 62 separate ballots.) Formula for printing costs: 41 additional ballots x \$300/ballot = \$12,300.
4. 12% inflation for printing of additional ballots each year.
5. The absorption of other costs (advertising, staff time for ballot preparation, travel, etc.) within our detail budget requests.

Subject: SB 95

"I support SB 95 calling for the restructure of the election procedure of our REAA's by Sections. Because of our far flung region, when we see the polls in the Bering Straits School District we do not know of the character of those running. Therefore we have a situation where those on the ticket are elected by name identification alone - and not by record. It is far more reasonable to select members from a smaller area where you know a candidate - nothing else would be changed, but a far more equitable choice based on these smaller area elections. In the current procedure one village's choice is invalidated by the "at large vote".

SB 95 could overcome this situation, and protect a communities' popular choice."

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III,

Assume:

1. No additional cost for the question concerning sectional division to be placed on the October 1982 REAA ballots.
2. One-time mapping cost of 25.0 for sectional maps to be prepared during FY 83.
3. Additional printing costs for separate sectional ballots beginning in FY 84 for the October 1983 REAA elections. (Currently 21 ballots; legislation would allow 62 separate ballots.) Formula for printing costs: 41 additional ballots x \$300/ballot = \$12,300.
4. 12% inflation for printing of additional ballots each year.
5. The absorption of other costs (advertising, staff time for ballot preparation, travel, etc.) within our detail budget requests.

Telephone message March 31, 1981

Gerard Koonooka of Gambell, Alaska called to say that he supports SB 95,
and the concept of more local control in electing school board members.
Mr. Koonooka is a school board member for the B.I.A.

Unalakleet, Alaska 99684
March 10, 1982

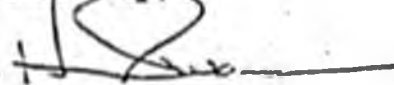

Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Parr:

We as active members of our local Advisory Education Committee (AEC) and/or Parent Advisory Committee (PAC) would like to encourage the passage of Senate Bill No. 95. This act would require regional board members be elected from sections instead of the area wide procedure now used. We think this would greatly enhance our community input by allowing us to vote for people we know.

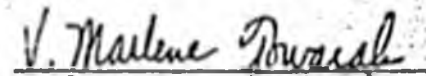

Thank you for your time.

Sincerely,

Henry Ivanoff, Chairman AEC/PAC

Marilyn Jackson, AEC

Marlene Towarak, AEC/PAC

Betsy Pleasant, PAC

Hazel Johnson, PAC

Kermit Oyoumick, PAC

2nd Session of 2nd Annual Conference
Unalakleet, Alaska
February 12-13, 1982

RESOLUTION NO. 35

A RESOLUTION urging that the Alaska State Legislature support Senate Bill 95 which calls for a change in the election procedure of REAA School Boards'

WHEREAS, the communities represented by the Northwest Mayors Conference have a right to proper and responsive representation on the REAA School Boards within their districts, and

WHEREAS, the voting regulations presently in affect allow district wide ballots to be cast for every school board seat do not allow individual villages and cities to effectively choose their own representatives, and

WHEREAS, each village and school has its own set of priorities and needs in delivering education to its citizens,

AND WHEREAS, qualified and willing individuals may garner the majority of votes in their own village and be denied the right to represent their local constituents because of votes cast in villages many hundreds of miles away, and

NOW THEREFORE BE IT RESOLVED BY THE NORTHWEST ALASKA MAYORS' CONFERENCE THAT: the Mayors of the Northwest Mayors Conference support all efforts to enact Legislation including Senate Bill 95 that will allow for effective and local choice for representative on REAA School Boards.

PASSED AND APPROVED BY THE 2nd Session of the 2nd Annual NORTHWEST ALASKA MAYORS' CONFERENCE THIS 12th day of February 1982.

SB 95 - Bob Green - School Board Assoc.
Position

2 parts to Bill

1. - Allow LEAA School District Decide by election whether School Board members are elected by section or elected only from that section - Designated seats - only section people vote for reps from that area rather than district wide
2. Cities would designate seats - Seems to solve some problems/mechanics.

position: 1 - Philosophical Problem -

We like school Board members to feel as though they represent whole district - rather than sectionship of representing only 1 section

This is tempered by the option in Bill to allow the District to vote on this (Whole District

Green about Sectionalism? Board Effectiveness

like Local Control

Part 2: Support - Some districts already have ~~requested~~ ^{requested} this - mechanical rather than anything else.

State Board Opposed because of
Part One —
But School Board Assoc
Believe in Voting option of Bill.

James W. Dalton

Jan. 30 1913 - May 9, 1977

James W. Dalton was born Jan. 30, 1913 in Seattle, Wash. He (like Senator Bob Bartlett) always regretted that he was not born in Cordova, the community where his parents resided. Reason for the Seattle birth: Cordova was just emerging as a port and terminus for the Kennicott Copper enterprise at McCarthy. There was no hospital, and there was no doctor. Jim's mother traveled to Seattle for the birth. She returned to Cordova when Jim was two weeks old. The family - which was increased in 1916 with the birth in Cordova of a daughter, Josephine - remained in Cordova for a period of approximately seven more years.

Parents: John (Jack) Dalton, who came to Alaska in 1882 and had prior to his Cordova ~~enterprise~~ and residence, had lived in Sitka, Juneau, Haines, Porcupine Creek (his history is pretty well documented in Dalton Trail historical writings).

Mother was Anna Theresa Krippaghne Dalton.

During early years (grade and highschool) Jim lived in Seattle and Yakima, Wash. He attended school in San Francisco at a boys boarding school, but I do not have the name of that academy at this time.

Jim Dalton attend college at Washington State at Pulman. He transferred to the University of Alaska at Fairbanks where he continued and completed his degree. His degree was in mining engineering. Graduated in 1937.

Between graduation and his enlistment in the U.S. Navy Seabees in 1942, Jim worked for F.E. Co (Fairbanks Exploration Company, a subsidiary of U.S. Mining, Refining and Smelting) and for various other gold mining interests. He spent those years principally in Fairbanks, working with F.E. (and other interests) on Fairbanks Creek, Cleary Mine, American Creek (near Tofty and Manley) and ~~and~~ Chena Hot Springs, the Circle District,

His intent, when he selected the Seabee ~~was to join that~~ service arm of the U.S. Navy, was to be able to participate in the Seabees 1945 venture into the Arctic. Naval Petroleum Reserve No. 4 (now National Petroleum Reserve - Alaska) would be explored over the next decade and he wanted to be part of that effort. He reasoned that his mining engineering degree in addition to his many years of practical experience in northern and Arctic engineering and mining would be a valuable asset to the Pet-4 operation. The Navy thought differently and assigned him to Dutch Harbor, San Francisco and even Hawaii.

As soon as he was able to get out of the Seabees in 1946, Jim was employed as a project engineer by Arctic Contractors, the consortium that was the execution contractor to the Office of Petroleum and Oil Shale Reserves. Arctic Contractors was composed of Greene Construction, Lytle Construction and other or another firm the name of which escapes me.

-2-

He managed to get into the NPR-4 project - a year or so after the Seabees began their exploratory program...AND as a civilian engineer instead of a Navy Seabee engineer.

He continued with Arctic Contractors until the completion of the NPR-4 project in the fall of 1953. He had been promoted through the years and ended as project superintendent.

In 1954 he conducted a study for the Alaska Development Board on the use of Gubik (Gubik is a petroleum structure east of Umiat on the Arctic Slope) gas. That was a comprehensive study of the possibilities of gas transmission lines to the Interior PLUS many other engineering and economic aspects of Gubik gas. Jim was conscripted by Puget Sound Drake Company for more duty at Barrow.

As relations with Russia and the United States deteriorated and the U.S. Dept. of Defense developed the DEW Line (Distant Early Warning Line) concept for electronic and radar detection, new military emphasis was put on Alaska. Jim was asked, and accepted, to be project superintendent of the Western sector construction of the DEW Line, headquarters in Barrow. It was December 1954 when he and Marion Nicholson went back to Barrow and began gathering local workers (almost 100% Eskimo to begin with) and opening a base camp. That project came to life and the DEW Line was built, completion about January 1958. It is worthy of note, perhaps, that the Western sector of the DEW Line was constructed for \$25 million less than estimated. The Canadian and Greenland legs went over considerably. Jim could have taken lots of credit for that, but he didn't. His nature was one of great personal modesty. He always ~~invariably~~ could find reason to applaud someone else for the many successes he was involved in. One thing he did point out on this particular issue was the local hire (Eskimos), the experienced Arctic hands (former Arctic Contractor personnel who had fought and won over the Arctic conditions in the past years on the NPR-4 project).

After 1958 Jim participated in numerous projects for oil, mineral exploration. He specialized in Arctic logistics, but, of course, his many years experience in on-site cold weather engineering put him in demand for many tough engineering problems that cropped up on the North Slope.

He did a considerable amount of work on a consulting (and on site) basis for Phillips Petroleum, Colorado Oil and Gas, Sinclair Oil and Gas. He also was available to many of the geophysical service companies that operated in a grid pattern across the North Slope for many, many years prior to the ARCO discovery in 1968.

There have been many, many winter trails ~~across~~ East and West and North and South that have been staked, plowed and used....planned by Jim Dalton. Winter freighting across roadless tundra was an established practice long before the State of Alaska authorized a winter trail from Hess Creek (north of Livengood) across the Yukon River and on to

The natural gas distribution system at Barrow was another major project Jim was involved in. He also helped plan and build the airport at Barrow.

Years prior to those modern improvements, Jim built many airstrips for winter use as well as constructing some permanent strips at places like Barter Island, Sagwon.

Sig Wien flew Jim and another person to Barter Island in 1947 in a float plane. A LST (landing craft) had gone in by sea with materials and equipment for constructing the first mat landing strip. The two tractors that were landed and then used for anchoring the landing craft were pulled into the salt water (freak mix up in orders to the man at the controls). They managed to float the equipment and get it back on shore. Drained the salt water out of the cylinders and hidden holes in the engine and got them running. That's quite a story in innovative problem solving in the Arctic and would take some paragraphs to tell...but not important here. It's an example, however, of the tough "poor boy" days in early exploration in the Arctic.

In the 1960's Jim did some planning work for the NORTH Commission and that group's dreams (mostly Wally Hickel's dreams) of laying out the route for a railroad to the North Slope. He also did some trail staking for later over-land winter roads to the Slope.

This is very general. I perhaps could elaborate on aspects of his many years in the Arctic if you need more specifics.
