3 IN THE LEGISLATURE OF THE STATE OF ALASKA

4 THIRTEENTH LEGISLATURE - FIRST SESSION

5 A BILL

6 For an Act entitled: "An Act limiting the adjustment of retirement bene-
7 fits; and providing for an effective date."

8 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

9 * Section 1. AS 14.25.173 is amended by adding a new subsection to
10 read:

11 (b) An adjustment that requires repayment of benefits may not be
12 made under this section if

13 (1) the incorrect benefit was first paid two years or more
14 before the member or teacher or beneficiary was notified of the change
15 or error; and

16 (2) the change or error was not caused by the member or
17 teacher or beneficiary.

18 * Sec. 2. AS 39.35.520 is amended by adding a new subsection to read:

19 (b) An adjustment that requires repayment of benefits may not be
20 made under this section if

21 (1) the incorrect benefit was first paid two years or more
22 before the employee or beneficiary was notified of the change or
23 error;

24 (2) the change or error was not caused by the employee or
25 beneficiary; and

26 (3) the change or error relates to the employee's credited
27 service with the state and does not relate to credited service with
28 another participating employer.

ALASKA STATE LEGISLATURE

SENATE STATE AFFAIRS COMMITTEE

SENATOR VIC FISCHER, CHAIRMAN

POUCH V, JUNEAU 99811

(907) 465-4954

Sectional Analysis CSSB57 State Affairs

April 18, 1983

Prepared by: Suzanne Tryck,
Senate State Affairs Committee

Section 1: Adds a two year statute of limitations for the state to collect overpayment of retirement benefits to TRS.

Section 2: makes the same provisions for PERS. Paragraph (3) states that other participating employers are not responsible for the payments due to the recipient because of errors made by the state.

Section 3: provides an immediate effective date.

CSSB 57 State Affairs does not contain the retroactive clause included in the original bill as there are no longer any outstanding cases where the state is trying to collect overpayment from recipients under TRS and PERS.

The other changes are minor, technical alterations.

February 16, 1983

The Honorable Vic Fischer
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Fischer:

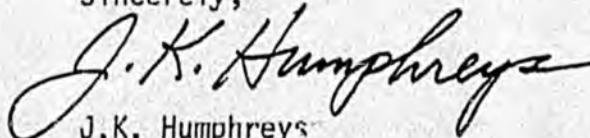

At the February 8 meeting of the Senate State Affairs Committee on SB 57, I was asked to provide information on appeals for a waiver of adjustment in the Public Employees' Retirement System (PERS) and the Teachers' Retirement System (TRS) over the last few years. The enclosed chart gives basic information on the seven appeals for waiver of overpayment that have come before the boards since July 1, 1979.

As you can see, more than two years had elapsed in every case before the error was discovered and in every case except one the board waived the adjustment of the overpayment. None of these errors occurred after 1976.

I have also been asked to prepare a draft committee substitute which would address the division's main concerns and still preserve the primary intent of SB 57. I have enclosed such a draft but suggest that the committee might wish to delay action briefly to provide members of the two retirement boards an opportunity to comment.

Please let me know if you have any further questions or would like more information.

Sincerely,

J.K. Humphreys
Director

IN THE LEGISLATURE OF THE STATE OF ALASKA

4

THIRTEENTH LEGISLATURE - FIRST SESSION

5

A BILL

6

For an Act entitled: "An Act relating to government interests in intellectual work products developed at the expense of the state."

7

8

9

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

10

* Section 1. AS 39 is amended by adding a new chapter to read:

11

CHAPTER 52. INTELLECTUAL PROPERTY DEVELOPED

12

AT THE EXPENSE OF THE STATE.

13

Sec. 39.52.010. RIGHT TO INTELLECTUAL WORK PRODUCT. (a) Except

14

as provided in AS 39.52.040 and AS 14.40.345, all right, title, and

15

interest in and to an intellectual work product of any kind that is

16

subject to the trademark, copyright, or patent laws of the United

17

States or this state or any foreign country that is developed by a

18

public officer or employee or a person under contract with the state

19

is the property of the state if developed *wholly in substantial part*

20

(1) during working hours;

21

(2) with the contribution of the state beyond what is

22

available to the public in general in the form of facilities, equip-

23

ment, materials, money, or information, or of time or services of

24

another public officer or employee in the course of state employment

25

or another person under contract with the state; or

26

(3) in connection with the official duties of the public

27

officer or employee or the person under contract, including but not

28

limited to circumstances in which the public officer or employee or

29

the person is employed or assigned to

- 1 (A) produce or improve an intellectual work product;
2 (B) conduct or perform research, development work, or
3 both;
4 (C) supervise, direct, coordinate, or review state
5 financed or conducted research, development work, or both; or
6 (D) act in a liaison capacity among governmental or
7 nongovernmental agencies or individuals engaged in such work.

8 (b) If a public officer or employee or a person under contract
9 with the state develops an intellectual work product that is the
10 property of the state, the developer is obligated to

11 (1) fully and promptly disclose the intellectual work
12 product to the Alaska Council on Science and Technology (AS 44.21.-
13 241);

14 (2) assign to the state the entire right, title, and inter-
15 est in and to the intellectual work product if not already waived by *(only if related to the reason for their employment)*
16 signing of a general waiver upon commencement of employment in accor-
17 dance with AS 39.05.160 or as part of a contract for services; and

18 (3) upon request by the council, execute and reasonably
19 assist in the prosecution of an application for a trademark, copy-
20 right, or patent.

21 (c) If the state has a right to an intellectual work product
22 under (a) of this section but the council decides that it is inadvis-
23 able to prosecute an application for trademark, copyright, or patent,
24 the council, on behalf of the state, may, after consultation with
25 affected state agencies,

26 (1) waive all right, title, and interest in and to the
27 intellectual work product; or

28 (2) waive all right, title, and interest in and to a trade-
29 mark, copyright, or patent but reserve a nonexclusive, irrevocable,

1 royalty-free license in the intellectual work product with power to
2 grant licenses for all ^{Alaska} governmental purposes.

3 Sec. 39.52.020. COUNCIL AUTHORIZED TO GRANT MONETARY RECOGNITION
4 FOR CREATION OF INTELLECTUAL WORK PRODUCT. (a) The council ^{in accordance with AS 39.52.010} is autho-
5 rized to give monetary ^{or other} recognition to a public officer or employee who
6 develops an intellectual work product that is the property of the
7 state and who discharges the obligations set out in AS 39.52.010.

8 (b) The council shall determine the guidelines, terms, and
9 conditions, as well as amount, source, distribution, and manner of
10 payments under (a) of this section. The council shall consider the
11 actual or potential value of the intellectual work product in terms of
12 revenue or reduced operating costs to the state. ^{1% of gross or net revenue or both? 10%?}

13 Sec. 39.52.030. ARBITRATION OF DISAGREEMENTS. (a) Disagree-
14 ments between a public officer or employee or a person under contract
15 with the state and the council pertaining to ownership of an intellec-
16 tual work product or obligations of the respective parties shall be
17 disposed of by

18 (1) voluntary arbitration of all relevant issues, if the
19 disagreeing parties agree to be bound by the decision upon arbitra-
20 tion;

21 (2) compulsory arbitration if that is provided for in any
22 applicable contract between the disagreeing parties; or

23 (3) recourse to the court if arbitration cannot be resorted
24 to.

25 (b) The council is authorized to make contracts for compulsory
26 arbitration on behalf of the state.

27 (c) If arbitration is used to settle disagreements, the provi-
28 sions of AS 09.43 (Uniform Arbitration Act) shall govern.

29 ^{(d) [below]} Sec. 39.52.040. EXCEPTIONS. The provisions of this chapter do

* (d) ~~Disagreements pertaining to the ownership of intellectual work product SB 59~~
or obligations of the respective parties are not subjects of collective bargaining,
and disagreement are not subject to resolution by means other than those provided
in this section.

Can they
arbitrate or
litigate the issue
of monetary
recognition on
joint property, etc.
and award?

Resolution
1 not apply to a public officer or employee associated with or a person
2 under contract with the University of Alaska. Those persons shall be
3 governed by the provisions of AS 14.40.345. The provisions of this
4 chapter do not apply to a member of the legislature.

5 Sec. 39.52.050. ADOPTION OF RULES. The council may adopt rules
6 implementing the provisions of this chapter in accordance with the
7 Administrative Procedure Act (AS 44.62).

8 Sec. 39.52.099. DEFINITIONS. As used in this chapter, unless
9 the context otherwise requires,

10 (1) "council" means the Alaska Council on Science and Tech-
11 nology established in AS 44.21.241;

12 (2) "intellectual work product" means any product of the
13 mind including but not limited to the following:

14 (A) discovery, invention, or idea;

15 (B) process, system, or method;

16 (C) machine, manufacture, or product;

17 (D) composition of matter;

18 (E) design or composition in letters, art, or graph-
19 ics;

20 (F) literary, dramatic, musical, educational, or
21 artistic work;

22 (G) certification mark, trademark, patent, or copy-
23 right.

24 * Sec. 2. AS 14.40 is amended by adding a new section to read:

25 Sec. 14.40.345. INTELLECTUAL PROPERTY DEVELOPED AT THE EXPENSE
26 OF THE UNIVERSITY. All right, title, and interest in and to an intel-
27 lectual work product developed by a public officer or employee asso-
28 ciated with or a person under contract with the University of Alaska
29 is the property of the university in accordance with a general policy

1 established by the university. The policy adopted by the University
2 of Alaska may provide for ownership, control, management, and disposal
3 of intellectual work products by an independent foundation created for
4 the purpose of obtaining intellectual work products, receiving gifts,
5 administering or disposing of interests in intellectual work products,
6 and promoting research.

7 * Sec. 3. AS 39.05 is amended by adding a new section to read:

8 ARTICLE 5. WAIVER OF RIGHT TO INTELLECTUAL PROPERTY.

9 Sec. 39.05.160. WAIVER OF RIGHT TO INTELLECTUAL PROPERTY. (a)
10 A public officer or employee of the state, before engaging in the
11 duties of the office or employment, shall sign a waiver of all right,
12 title, and interest in and to an intellectual work product that may be
13 developed by the officer or employee at the expense of the state as
14 set out in AS 39.52.

15 (b) Notwithstanding the requirement in (a) of this section, the
16 state, in accordance with AS 39.52.020, may share a portion of the
17 resulting revenue with or grant a cash award for resulting reductions
18 in operating costs to a public officer or employee who develops an
19 intellectual work product at the expense of the state.

20 (c) A public officer or employee may be required to sign, before
21 engaging in the duties of the office or employment, an acknowledgement
22 that the public officer or employee will not receive a share of the
23 revenue or reduction in operating costs attributable to an intellec-
24 tual work product developed as a duty of the office or employment.

25 (d) The waiver under (a) of this section and the acknowledgement
26 under (c) of this section are not considered terms and conditions of
27 employment that are subject to negotiation for purposes of collective
28 bargaining under the Public Employment Relations Act (AS 23.40).

29 * Sec. 4. AS 44.21.242(b) is amended by adding new paragraphs to read:

1 (9) consistent with the provisions of AS 39.52, retain,
2 assign, license, transfer, sell, or otherwise dispose of, in whole or
3 in part and upon terms that the council may direct, any and all rights
4 to, interests in, or income from intellectual work products acquired
5 by the council under AS 39.52;

6 (10) adopt rules implementing the provisions of AS 39.52.

7 * Sec. 5. AS 37.12.070(9) and AS 46.12.110(10) are repealed.

BLUE RIBBON COMMISSION ON THE
STATE PERSONNEL ACT

Senator Bill Ray, Chairman

Pouch YG
Mail Stop 3123
Juneau, Alaska 99811
(907) 465-4442

M E M O R A N D U M

January 25, 1983

TO: Senate State Affairs Committee

FROM: Teresa B. Cramer *Teresa B. Cramer*
Administrative Assistant

SUBJECT: Senate Bill 57 - Limiting the Adjustment of Retirement Benefits

On several occasions the Blue Ribbon Commission has heard testimony about problems created by overpayments of retirement benefits. Retired state employees may have substantial difficulties if they are required to repay retirement benefits improperly received because of errors made by the Division of Retirement and Benefits or because of a change in law. The commission is proposing legislation to limit the authority of the division to collect amounts paid improperly through no fault of the beneficiary or retired person if the error is not corrected within two years.

One woman testified to the commission that before she retired she asked the division to verify her years of credited service. Several years later a court-ordered change in retirement regulations reduced the number of years for which she received credit. Her employment with the University of Alaska could no longer be counted as credited service in PERS. As a result she had received more than \$5000 in benefits to which she was not entitled. The division reduced her benefit to the correct amount and began withholding an additional \$100 per month to be applied to the overpayment. She appealed to the Public Employees Retirement Board asking that collection of the overpayment be waived.

Both the Public Employees' Retirement Board and the Teachers' Retirement Board have authority to waive collection of overpayments, but the uncertainty of an appeal can cause considerable stress to people on fixed incomes. Both boards are required to determine whether there would be undue hardship imposed by requiring repayment. AS 14.25.175 and AS 39.35.522. In establishing whether there is financial hardship, the entire family financial situation is considered, not just the resources of the petitioner.

The commission recommends that a two-year statute of limitations be placed on the collection of overpayments which resulted from errors which were not caused by the retired state employee. Two years provides ample opportunity for the division to audit its records and correct any errors. After that period, a retired person should not be required to repay benefits erroneously received if he or she did not cause the error. The division would still correct the amount of future benefits paid to the retired person.

Bill Analysis

- Page 1 The first section of the proposed legislation adds the
Line 7 two-year statute of limitations to the Teachers' Retirement System.
- Line 18 The second section adds the same provision to the Public Employees' Retirement System. The amendment to PERS is applied only to state employees because the Blue Ribbon Commission considered that requiring other participating employers to pay for errors made by the state was inappropriate.
- Line 29 The third section makes the bill effective retroactively to July 1, 1979, in order to apply to those individuals whose situations came to the commission's attention.
- Page 2 The fourth section of the bill contains an immediate
Line 2 effective date clause.

ACTION NARRATIVE

TAPE# 1 of 02/08/83, Side 1 SB 57
Recording
Number 802

Senator V. Fischer: This bill was before the committee last year. Passed to finance where it died.

Number 812

Terry Cramer of the Blue Ribbon Commission: This bill addresses overpayments to retired employees. We now have the option to waive collection. But going through a hearing can be stressful for retirees. This bill allows the state only 2 years to make corrections and collect arrearages. The bill also applies to municipalities covered under PERA.

Number 849

Senator Ray: Relates a real life story of someone who was traumatized by the state collecting on a benefit error.

Number 866

Senator Sturgulewski: Are there other cases? (End of Side 1. Turn tape over)

Number 001

Senator Ray: Don't know of other cases recently. (Senator Ray excuses himself for a dentist's appointment)

Number 068

Senator Kelly: Wants to amend the bill by adding language which would deny excess

- benefits even after 2 years if person had knowledge of overpayment.
- Number 086 Cherie Shelley of APEA: Testifies strongly in favor of bill. Retirees often have no representation. Hearings are ordeals for old folks. Doesn't recommend intent language.
- Number 158 Senator Rodey: Intent is hard to prove. Have to have involved administrative hearings.
- Number 168 Rapid discussion on several related topics.
- Number 176 Ken Humphries, Director of the Division of Retirement Benefits: The Department of Administration has not yet formulated a position on this issue. Not sure he understands the retroactive provisions. The bill doesn't have a great fiscal impact. Bill doesn't provide any kind of oversight. Most, if not all, old overpayments have been waived. Necessary to show extreme hardship which is easy to prove in most cases. He prefers the board to make individual decisions based on the circumstances.
- Number 331 Senator Sturgulewski: Is the existing mechanism adequate?
- Number 350 Ken Humphreys: Answer: Existing mechanism is adequate.
- Number 400 Senator Sturgulewski: What is the magnitude of the problem?
- Number 416 Ken Humphries: Can provide data on number of overpayment cases and disposition.
- Number 433 Senator V. Fischer: Will hold the bill over.

ALASKA STATE LEGISLATURE

SENATE STATE AFFAIRS COMMITTEE

SENATOR VIC FISCHER, CHAIRMAN

(907) 465-4954

Sectional Analysis CSSB57 State Affairs

April 18, 1983

Prepared by: Suzanne Tryck,
Senate State Affairs Committee

Section 1: Adds a two year statute of limitations for the state to collect overpayment of retirement benefits to TRS.

Section 2: makes the same provisions for PERS. Paragraph (3) states that other participating employers are not responsible for the payments due to the recipient because of errors made by the state.

Section 3: provides an immediate effective date.

CSSB 57 State Affairs does not contain the retroactive clause included in the original bill as there are no longer any outstanding cases where the state is trying to collect overpayment from recipients under TRS and PERS.

The other changes are minor, technical alterations.

MEMORANDUM

January 25, 1983

TO: Senate State Affairs Committee

FROM: Teresa B. Cramer *Teresa B. Cramer*
Administrative Assistant

SUBJECT: Senate Bill 57 - Limiting the Adjustment of Retirement Benefits

On several occasions the Blue Ribbon Commission has heard testimony about problems created by overpayments of retirement benefits. Retired state employees may have substantial difficulties if they are required to repay retirement benefits improperly received because of errors made by the Division of Retirement and Benefits or because of a change in law. The commission is proposing legislation to limit the authority of the division to collect amounts paid improperly through no fault of the beneficiary or retired person if the error is not corrected within two years.

One woman testified to the commission that before she retired she asked the division to verify her years of credited service. Several years later a court-ordered change in retirement regulations reduced the number of years for which she received credit. Her employment with the University of Alaska could no longer be counted as credited service in PERS. As a result she had received more than \$5000 in benefits to which she was not entitled. The division reduced her benefit to the correct amount and began withholding an additional \$100 per month to be applied to the overpayment. She appealed to the Public Employees Retirement Board asking that collection of the overpayment be waived.

Both the Public Employees' Retirement Board and the Teachers' Retirement Board have authority to waive collection of overpayments, but the uncertainty of an appeal can cause considerable stress to people on fixed incomes. Both boards are required to determine whether there would be undue hardship imposed by requiring repayment. AS 14.25.175 and AS 39.35.522. In establishing whether there is financial hardship, the entire family financial situation is considered, not just the resources of the petitioner.

The commission recommends that a two-year statute of limitations be placed on the collection of overpayments which resulted from errors which were not caused by the retired state employee. Two years provides ample opportunity for the division to audit its records and correct any errors. After that period, a retired person should not be required to repay benefits erroneously received if he or she did not cause the error. The division would still correct the amount of future benefits paid to the retired person.

Bill Analysis

- Page 1
Line 9 The first section of the proposed legislation adds the two-year statute of limitations to the Teachers' Retirement System.
- Line 18 The second section adds the same provision to the Public Employees' Retirement System. The amendment to PERS is applied only to state employees because the Blue Ribbon Commission considered that requiring other participating employers to pay for errors made by the state was inappropriate.
- Line 29 The third section makes the bill effective retroactively to July 1, 1979, in order to apply to those individuals whose situations came to the commission's attention.
- Page 2
Line 2 The fourth section of the bill contains an immediate effective date clause.

REPORT OF THE
BLUE RIBBON COMMISSION ON THE
STATE PERSONNEL ACT
TO THE
TWELFTH ALASKA STATE LEGISLATURE
FIRST SESSION.

Senator Bill Ray
Chairman

February, 1981

SB 195

SB 57

SENATE BILL 195: LIMITING THE ADJUSTMENT OF RETIREMENT BENEFITS.

PURPOSE

This bill remedies a problem which the commission was advised of in testimony from a retired state employee. When the employee retired in 1976, she had been advised on four separate occasions by the staff of the Division of Retirement and Benefits that she was eligible for more than nine years of credited service with the state. Shortly after she retired the legislature amended the retirement laws and she was told that she would receive credit for an additional three years because of her military service. She began receiving retirement benefits on that basis.

In 1979 the division wrote to advise her that their original computations had been in error and that her years of employment with the University of Alaska could not be included in her credited service. Therefore, she had received over \$5000 in benefits which she would have to repay. They reduced the amount of her check by \$100 to be credited towards that overpayment, in addition to reducing the check to the amount she was actually entitled to receive. The basis for denying credit for the employee's period of service with the University of Alaska was a regulation adopted by the Division of Retirement and Benefits in 1978 -- two years after she had retired.

The employee appealed to the Public Employee Retirement Board, which can waive collection of overpayments in cases of hardship. In

determining whether there would be hardship to the employee, the board considered her family's financial situation and found that she was not entitled to the waiver.

Commission members discovered that this was not an isolated instance. A number of retired state employees have undergone similar experiences. They relied on assurances from the division of retirement and benefits only to discover a considerable time later that errors had been made and that their benefits would be reduced.

The commission recommends that a two-year statute of limitations be placed on the collection of overpayments. Two years gives the Division of Retirement and Benefits ample time to audit its records and find and correct any errors made. After that period of time, a retired person should be freed from the burden of having to pay back the state for mistakes of the state's employees. This protection should be available only in cases where the retired person did not contribute to causing the error. It should not apply to persons working for employers other than the state, since those employers may not be in a financial position to absorb the cost of errors made by state employees.

SECTION BY SECTION ANALYSIS

Section 1. AS 14.25.173 is amended by adding a new subsection to read:

(b) An adjustment which requires repayment of benefits may not be made under this section if

(1) the incorrect benefit was first paid two years or more before the member or teacher or beneficiary was notified of the change

or error; and

(2) the change or error was not caused by the member or teacher or beneficiary.

Comment

This section amends the Teachers Retirement System by prohibiting the Division of Retirement and Benefits from decreasing benefits in order to collect for a previous overpayment if two conditions are met. The first condition is that the overpayment began two years or more before the division told the retired teacher of the error. The second condition is that the teacher did not cause the error.

Sec. 2. AS 39.35.520 is amended by adding a new subsection to read:

(b) An adjustment which requires repayment of benefits may not be made under this section if

(1) the incorrect benefit was first paid two years or more before the employee or beneficiary was notified of the change or error;

(2) the change or error was not caused by the employee or beneficiary; and

(3) the change or error relates to the employee's credited service with the state and not with another participating employer.

Comment

This section amends the Public Employee Retirement System in the same way that section 1 amends the TRS. However, in this section there is an additional condition. The error in computation must relate to the employee's credited

service with the state, and not with another participating employer.

Sec. 3. This Act is retroactive to July 1, 1979.

Sec. 4. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Comment

Section 3 makes the Act retroactive in order to include the retired person who testified before the commission. Section 4 provides that the Act takes effect immediately in order to address the hardship to retired state employees.

The Honorable Vic Fischer
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Senator Fischer:

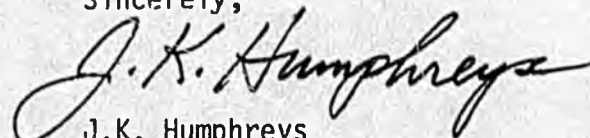

At the February 8 meeting of the Senate State Affairs Committee on SB 57, I was asked to provide information on appeals for a waiver of adjustment in the Public Employees' Retirement System (PERS) and the Teachers' Retirement System (TRS) over the last few years. The enclosed chart gives basic information on the seven appeals for waiver of overpayment that have come before the boards since July 1, 1979.

As you can see, more than two years had elapsed in every case before the error was discovered and in every case except one the board waived the adjustment of the overpayment. None of these errors occurred after 1976.

I have also been asked to prepare a draft committee substitute which would address the division's main concerns and still preserve the primary intent of SB 57. I have enclosed such a draft but suggest that the committee might wish to delay action briefly to provide members of the two retirement boards an opportunity to comment.

Please let me know if you have any further questions or would like more information.

Sincerely,

J.K. Humphreys

Sec. 39.35.510. Voluntary waiver of benefits. A retired employee may, in writing, request the administrator to suspend, for any period of time, payment of all or part of the benefits to which he is entitled. The administrator shall grant the request and may not require the retired employee to disclose his reason for desiring the suspension. Amounts which are suspended pursuant to the request are forfeited. The retired employee may subsequently terminate the suspension by filing a written notice with the administrator which states his desire to revoke the suspension. Upon receipt of the notice, the administrator shall authorize resumption of the retired employee's regular pension payments. (§ 40 ch 143 SLA 1960; am § 49 ch 128 SLA 1977)

Effect of amendment. — The 1977 amendment substituted "administrator" for "board" throughout the section.

Sec. 39.35.520. Adjustments. When a change or error is made in the records maintained by the system, or an error is made in computing a benefit, and as a result an employee or beneficiary receives from the system more or less than he would have been entitled to receive had the records been correct or had the error not been made, (1) the records or error shall be corrected and (2) as far as practicable, future payments shall be adjusted so that the actuarial equivalent of the pension or benefit to which the employee or beneficiary was correctly entitled shall be paid. If no future payment is due, a person who was paid any amount to which he was not entitled is liable for repayment of that amount, and a person who was not paid the full amount to which he was entitled shall be paid the balance of that amount. (§ 42 ch 143 SLA 1960; am § 4 ch 81 SLA 1976)

Effect of amendment. — The 1976 amendment added the second sentence.

Sec. 39.35.522. Waiver of adjustments. (a) Upon appeal by an affected member or beneficiary under (b) of this section, the board may waive an adjustment or any portion of an adjustment made under AS 39.35.520 if

(1) the adjustment or portion of the adjustment will, in the opinion of the board, cause undue hardship to the member or beneficiary;

(2) the member is retired or has submitted notification of impending retirement to his employer to be effective no later than 180 days after the adjustment was made, or the beneficiary was eligible to receive or was receiving benefits under this chapter before the adjustment;

(3) the adjustment will result in a loss of eligibility for benefits for the member or beneficiary or result in a reduction of benefits being received by the member or beneficiary of \$50 per month or more;

Sec. 39.35.510. Voluntary waiver of benefits. A retired employee may, in writing, request the administrator to suspend, for any period of time, payment of all or part of the benefits to which he is entitled. The administrator shall grant the request and may not require the retired employee to disclose his reason for desiring the suspension. Amounts which are suspended pursuant to the request are forfeited. The retired employee may subsequently terminate the suspension by filing a written notice with the administrator which states his desire to revoke the suspension. Upon receipt of the notice, the administrator shall authorize resumption of the retired employee's regular pension payments. (§ 40 ch 143 SLA 1960; am. § 49 ch 128 SLA 1977)

Effect of amendment. — The 1977 amendment substituted "administrator" for "board" throughout the section.

Sec. 39.35.520. Adjustments. When a change or error is made in the records maintained by the system, or an error is made in computing a benefit, and as a result an employee or beneficiary receives from the system more or less than he would have been entitled to receive had the records been correct or had the error not been made, (1) the records or error shall be corrected and (2) as far as practicable, future payments shall be adjusted so that the actuarial equivalent of the pension or benefit to which the employee or beneficiary was correctly entitled shall be paid. If no future payment is due, a person who was paid any amount to which he was not entitled is liable for repayment of that amount, and a person who was not paid the full amount to which he was entitled shall be paid the balance of that amount. (§ 42 ch 143 SLA 1960; am § 4 ch 81 SLA 1976)

Effect of amendment. — The 1976 amendment added the second sentence.

Sec. 39.35.522. Waiver of adjustments. (a) Upon appeal by an affected member or beneficiary under (b) of this section, the board may waive an adjustment or any portion of an adjustment made under AS 39.35.520 if

(1) the adjustment or portion of the adjustment will, in the opinion of the board, cause undue hardship to the member or beneficiary;

(2) the member is retired or has submitted notification of impending retirement to his employer to be effective no later than 180 days after the adjustment was made, or the beneficiary was eligible to receive or was receiving benefits under this chapter before the adjustment;

(3) the adjustment will result in a loss of eligibility for benefits for the member or beneficiary or result in a reduction of benefits being received by the member or beneficiary of \$50 per month or more;

SUBJECT: Senate Bill 57 - Limiting the Adjustment of Retirement Benefits

On several occasions the Blue Ribbon Commission has heard testimony about problems created by overpayments of retirement benefits. Retired state employees may have substantial difficulties if they are required to repay retirement benefits improperly received because of errors made by the Division of Retirement and Benefits or because of a change in law. The commission is proposing legislation to limit the authority of the division to collect amounts paid improperly through no fault of the beneficiary or retired person if the error is not corrected within two years.

One woman testified to the commission that before she retired she asked the division to verify her years of credited service. Several years later a court-ordered change in retirement regulations reduced the number of years for which she received credit. Her employment with the University of Alaska could no longer be counted as credited service in PERS. As a result she had received more than \$5000 in benefits to which she was not entitled. The division reduced her benefit to the correct amount and began withholding an additional \$100 per month to be applied to the overpayment. She appealed to the Public Employees Retirement Board asking that collection of the overpayment be waived.

Both the Public Employees' Retirement Board and the Teachers' Retirement Board have authority to waive collection of overpayments, but the uncertainty of an appeal can cause considerable stress to people on fixed incomes. Both boards are required to determine whether there would be undue hardship imposed by requiring repayment. AS 14.25.175 and AS 39.35.522. In establishing whether there is financial hardship, the entire family financial situation is considered, not just the resources of the petitioner.

The commission recommends that a two-year statute of limitations be placed on the collection of overpayments which resulted from errors which were not caused by the retired state employee. Two years provides ample opportunity for the division to audit its records and correct any errors. After that period, a retired person should not be required to repay benefits erroneously received if he or she did not cause the error. The division would still correct the amount of future benefits paid to the retired person.

Dear Suzanne:

Thank you for your request regarding ways that business and other states define who owns intellectual work products developed by employees. As we discussed by phone, enclosed is a copy of an article found in The New York Times which might be of interest to you, and copies of relevant sections of employment contracts from IBM and Bell Laboratories. I hope this information will be helpful.

I would also suggest that you obtain a copy of the Report to the Legislature Pursuant to Sec. 45, Ch. 143, SLA 1982 from your Code Revision Commission which deals with laws relating to computer crime, privacy, and intellectual property.

I am expecting a copy of an Illinois statute enacted in 1983 which partly concerns protection of work products. As soon as I receive this statute, I will forward it to you.

If we can be of further service, please contact us.

Sincerely,

Michelle Glastetter

The New York Times/Terrance McCarthy

Robert Spinner, a lawyer in California's Silicon Valley and author of "Who Owns Innovation?," said overly strict legal measures restricting new technological companies might work against the national interest.

Spinoff Suits Mount In Silicon Valley

By ROBERT MZINHOLD

Special to The New York Times

PALO ALTO, Calif., Jan. 1 — Last April 22, two engineers at the International Business Machines Corporation's research center in nearby San Jose were summarily dismissed after I.B.M. discovered they planned to start their own company to make the same kind of product they were working on. The same day, I.B.M. sued them, charging theft of trade secrets and breach of fiduciary duty.

And, two weeks ago, to the astonishment of this center of high technology innovation — better known as Silicon Valley — I.B.M. also sued the men's lawyers: Mosher, Pooley, Sullivan & Henderson, a prominent Palo Alto firm that specializes in protecting trade secrets. The suit charged that the firm had disclosed — to an I.B.M. competitor, the Control Data Corporation — I.B.M. secrets obtained confidentially in defending the suit against the engineers.

The case is an example of a grow-

ing tendency of companies to sue to halt what they see as the hemorrhage of vital technology and secrets when trusted employees leave to form new companies.

Such suits are not new, but lawyers say they are proliferating because a flood of new capital has given birth to many new spinoffs and because the frantic pace of technical innovation makes it all the more crucial to protect proprietary information.

The companies argue that such suits are meant merely to deter the misappropriation of trade secrets. But lawyers for new companies contend that many suits are designed to frighten off new competition.

There is some irony in all this, for many of the major firms that are suing today themselves started as tiny spinoffs from tolerant companies. And some here feel that the mounting litigation might threaten the risk-taking spirit of the valley, where new companies formed by creative spirits, unhappy with the

Spinoff Suits Mount In Silicon Valley

By ROBERT REINHOLD

Special to The New York Times

PALO ALTO, Calif., Jan. 1 — Last April 22, two engineers at the International Business Machines Corporation's research center in nearby San Jose were summarily dismissed after I.B.M. discovered they planned to start their own company to make the same kind of product they were working on. The same day, I.B.M. sued them, charging theft of trade secrets and breach of fiduciary duty.

And, two weeks ago, to the astonishment of this center of high technology innovation — better known as Silicon Valley — I.B.M. also sued the men's lawyers: Mosher, Pooley, Sullivan & Henderson, a prominent Palo Alto firm that specializes in protecting trade secrets. The suit charged that the firm had disclosed — to an I.B.M. competitor, the Control Data Corporation — I.B.M. secrets obtained confidentially in defending the suit against the engineers.

The case is an example of a grow-

ing tendency of companies to sue to halt what they see as the hemorrhage of vital technology and secrets when trusted employees leave to form new companies.

Such suits are not new, but lawyers say they are proliferating because a flood of new capital has given birth to many new spinoffs and because the frantic pace of technical innovation makes it all the more crucial to protect proprietary information.

The companies argue that such suits are meant merely to deter the misappropriation of trade secrets. But lawyers for new companies contend that many suits are designed to frighten off new competition.

There is some irony in all this, for many of the major firms that are suing today themselves started as tiny spinoffs from tolerant companies. And some here feel that the mounting litigation might threaten the risk-taking spirit of the valley, where new companies formed by creative spirits, unhappy with the

Over all, she concluded, "We are looking at some pretty big numbers for the fourth quarter." Townsend-Greenspan is forecasting that profits after taxes could exceed \$149 billion at a seasonally adjusted annual rate, up 32 percent from a year earlier. The increase is not limited to year-to-year comparisons, paced by healthy rains from automobile manufacturers, retailers and other consumer goods companies, after summer goods should rise more than 12 percent from the third quarter, said Joseph M. Abraham, an economist at Data Resources Inc. and other analysts say the economy is even healthier than the first quarter. "We are forecasting a prediction of 32 percent jump gains." That is reflected in bottom-line year they are getting the benefit, and points drawn, usually reduced, this consulting firm. "With break-even Greenspan & Company, the economic growth vice president at Townsend-Greenspan, said M. Kathryn Eickoff, ex-cited about their financial survival. In 1982, "companies were very concerned about their financial survival and took many measures to reduce costs," said M. Kathryn Eickoff, executive vice president at Townsend-Greenspan & Company, the economic consulting firm. "With break-even points drawn, usually reduced, this year they are getting the benefit, and that is reflected in bottom-line gains."

Silicon Valley's Spinoff Suits

Continued From First Business Page
Trimedia find venture capital, let a representative from Control Data, a recognition accorded by bigger companies or thirsting for instant riches, have traditionally been a leading source of innovation.

The nature of computer research has rendered meaningless much of the existing patent law, leaving a murky gray area that case law has yet to define.

"It is extremely difficult to distinguish between an employee's general knowledge and proprietary information," said Robert Spanner, a young lawyer with Beckford, Spanner & Kelley of Palo Alto. Mr. Spanner, author of a new book, "Who Owns Innovation?", argues that overly strict legal measures to restrict new technological companies might work against the national interest.

"They Work for Intel"

Traditionally lax about security, many companies here are clamping down. A leader has been the Intel Corporation of Santa Clara, which makes semiconductors and microprocessors. In addition to signing the normal nondisclosure statement on hiring, Intel employees are annually required to define the proprietary part of their work. This is done again when the employee leaves. Intel also informs new employers and venture capitalists backing new companies of the departed employees' legal obligations to Intel.

"We are trying to make our employees aware that they work for Intel, that they cannot carve two masters," said Intel's spokesman, James

Intel alumnus, Aryeh Finegold. Jarrett. To reinforce the message, Intel has sued and won a settlement with one breakaway group, Seeq Technology of San Jose and its financial backers, and has threatened to sue 17 employees who resigned from Intel's microprocessing installation in Portland, Ore., on the same day last January to start a competing company, called Sequent.

The I.B.M. case offers a glimpse of the fierce competitiveness of doing business in Silicon Valley. The two employees who were sued, Atel El-trukhy and Mohammed S. Shaikh, had been working for less than two years for I.B.M., developing a new process for depositing a thin film of magnetic material on disks used to store computer information. Together, they decided to strike out on their own and drew up a business plan, giving it to a freelance typist. According to their lawyer, James H. Pooley of the Mosher, Pooley firm, the typist's husband was an I.B.M. manager and he showed it to his employer.

That plan, I.B.M. charged, showed the two men illegally planned to exploit confidential information on thin-film technology. Ultimately, an out-of-court settlement was reached whereby an independent monitor inspects the new company, called Trimedia, to be sure it is not using I.B.M. techniques.

I.B.M. Disclosed Secrets

But in the course of negotiating that settlement, I.B.M. had to disclose certain trade secrets to Trimedia's lawyer, Mr. Pooley. The Santa Clara County Superior Court ordered those secrets be held in confidence.

In its suit against the lawyer, I.B.M. said Mr. Pooley, while helping

potential investor, see a confidential document. Mr. Pooley acknowledged that, but said it was inadvertent, and partly because I.B.M. transmitted the document improperly.

Mr. Pooley, author of a widely used handbook titled "Trade Secrets," said Trimedia, in which his firm has invested, settled simply to avoid the enormous costs of fighting the suit.

Mr. Pooley said plaintiffs may be motivated by factors other than protection of secrets—to exact revenge, to stifle competition or to find a scapegoat for managerial problems.

Stephen Quigley, spokesman for I.B.M. at its headquarters in Armonk, N.Y., said I.B.M. goes to court only to protect patentable trade secrets. "We seek legal recourse solely to protect our legitimate interests," he said. "It's absolute nonsense to assert we do so for any other purpose."

The irony in Intel's new stance lies in its formation in 1968 by two renegades from the Fairchild Instrument and Camera Corporation, Gordon E. Moore and Robert N. Noyce, now chairman and vice chairman of Intel. But according to Mr. Jarrett, the Intel spokesman, Mr. Moore and Mr. Noyce left Fairchild because that company was not interested in integrated circuits, and they pioneered in that new technology rather than duplicate Fairchild's work.

Mr. Jarrett said numerous spinoffs enjoy friendly relations with Intel. For example, Allen H. Michels formed Convergent Technologies of Santa Clara to build microcomputer systems Intel was uninterested in. They are now good customers of Intel, as is Daisy Systems of Sunnyvale, builders of computer-aided design equipment, formed by another

Car Production Up 33.6% in '83

DETROIT, Jan. 2 (AP) — Domestic auto makers built more cars in 1983 than in any other year since 1979, Ward's Automotive Reports said in its current edition.

The trade journal said auto makers assembled 6,778,993 cars last year, 33.6 percent more than the 5,073,214 built in 1982, which was a 23-year low. The 1983 production was the most since 8,422,074 cars were built in 1979, Ward's said.

The General Motors Corporation produced 3,974,301 cars, a 38.6 percent share of the total domestic industry output, compared with 3,173,145 in 1982, or 62.5 percent. The Ford Motor Company built 1,348,878 cars, or 22.8 percent of the total, compared with 1,104,075, or 21.8 percent, in 1982. The Chrysler Corporation built 902,859 cars, or 13.3 percent of the total, compared with 600,502 in 1982, or 11.8 percent.

The American Motors Corporation built 200,672 cars, or 3 percent of the market, compared with 109,748, or 2.2 percent, in 1982. Volkswagon of America Inc. built 98,611 cars, or 1.5 percent of the market, compared with 84,246, or 1.7 percent, in 1982.

Honda of America Manufacturing Inc. produced 35,474 cars at its Marysville, Ohio, plant, an eighth-tenth of 1 percent share of industry output in its first full year of production in the United States.

Southern Pacific Company

Agreement Regarding Confidential Information and Intellectual Property

In consideration of my employment by IBM or my continued employment at will by IBM, and the payment to me of the salary or other compensation that I shall receive during my employment, I agree as follows:

1. I will not, without IBM's prior written permission, disclose to anyone outside of IBM or use in other than IBM's business, either during or after my employment, any confidential information or material of IBM or its subsidiaries, or any information or material received in confidence from third parties by IBM or its subsidiaries. If I leave the employ of IBM, I will return all IBM property in my possession, including all confidential information or material such as drawings, notebooks, reports, and other documents.

Confidential information or material of IBM or its subsidiaries is any information or material:

- (a) generated or collected by or utilized in the operations of IBM or its subsidiaries that relates to the actual or anticipated business or research and development of IBM or its subsidiaries; or
 - (b) suggested by or resulting from any task assigned to me or work performed by me for or on behalf of IBM; and which has not been made available generally to the public.
2. I will not disclose to IBM, use in IBM's business, or cause IBM to use, any information or material which is confidential to others.
 3. I will comply, and do all things necessary for IBM and its subsidiaries to comply, with the laws and regulations of all governments under which IBM does business, and with provisions of contracts between any such government or its contractors and IBM or its subsidiaries that relate to intellectual property or to the safeguarding of information.

4. I hereby assign to IBM my entire right, title and interest in any idea, invention, design of a useful article (whether the design is ornamental or otherwise), computer program and related documentation, and other work of authorship (all hereinafter called "Developments"), hereafter made or conceived solely or jointly by me, or written wholly or in part by me, whether or not such Developments are patentable, copyrightable or susceptible to other forms of protection, and the Developments:
 - (a) relate to the actual or anticipated business or research or development of IBM or its subsidiaries; or
 - (b) are suggested by or result from any task assigned to me or work performed by me for or on behalf of IBM.

In the case of any "other work of authorship," such assignment shall be limited to those works of authorship which meet both conditions (a) and (b) above.

The above provisions concerning assignment of Developments apply only while I am employed by IBM in an executive, managerial, product or technical planning, technical, research, programming or engineering capacity (including development, product, manufacturing, systems, applied science, and field engineering). Excluded are any Developments that I cannot assign to IBM because of prior agreement with

[e.g. name of a prior employer]

_____ which is effective until

_____ (Give name and date or write "none").

I acknowledge that the copyright and any other intellectual property right in designs, computer programs and related documentation, and works of authorship, created within the scope of my employment, belong to IBM by operation of law.

5. In connection with any of the Developments assigned by Paragraph 4:
 - (a) I will promptly disclose them to IBM Patent Operations or IBM management as appropriate; and
 - (b) I will, on IBM's request, promptly execute a specific assignment of title to IBM, and do anything else reasonably necessary to enable IBM to secure a patent, copyright or other form of protection therefor in the United States and in other countries.
6. IBM and its subsidiaries and their licensees (direct and indirect) are not required to designate me as author of any design, computer program or related documentation, or other work of authorship assigned in Paragraph 4 when distributed publicly or otherwise, nor to make any distribution. I waive and release, to the extent permitted by law, all my rights to the foregoing.
7. I have identified on the back hereof all Developments not assigned by Paragraph 4 in which I have any right, title or interest, and which were previously made or conceived solely or jointly by me, or written wholly or in part by me, but neither published nor filed in any patent office.

If I do not have any to identify, I have written "none" on this line: _____
(It is in your interest to establish that any of the above were made, conceived or written before your employment by IBM. You should not disclose them in detail, but identify them only by the titles and dates of documents describing them. If you wish to interest IBM in any of them, you may contact External Submissions at Corporate Headquarters, which will provide you with instructions for submitting them to IBM.)

AGREEMENT FOR ASSIGNMENT OF INVENTIONS

Code Number

IN CONSIDERATION of my employment by Bell Telephone Laboratories, Incorporated, during such time as may be mutually agreeable to that Corporation and myself, I hereby assign and agree to assign to said Corporation, its successors and assigns, all my rights to inventions which, during the period of my employment by said Corporation or by its successors in business, I have made or conceived or may hereafter make or conceive, either solely or jointly with others, in the course of such employment or with the use of said Corporation's time, material or facilities, or relating to any subject matter with which said Corporation is or may be concerned; and I further agree, without charge to said Corporation, but at its expense, to execute, acknowledge and deliver all such further papers, including applications for patents, as may be necessary to obtain patents for said inventions in any and all countries and to vest title thereto in said Bell Telephone Laboratories, Incorporated, its successors or assigns.

WITNESS

ACK - SEND TO TERRY CRAMER

THE ALASKA COUNCIL ON SCIENCE AND TECHNOLOGY

November 19, 1982

Senator Bill Ray, Chairman
Blue Ribbon Commission on
the Personnel Act
Alaska State Legislature
Pouch YG
Juneau, Alaska 99811

Dear Senator Ray,

Based upon discussions held at our November 17, 1982 meeting, I am sending suggestions for consideration for the draft legislation entitled "An Act Relating to Government Interests in Intellectual Work Products Developed at the Expense of the State."

The Council suggests that this act be written similarly to the statutes adopted by the federal government. These statutes differ somewhat according to application for specific agencies, but generally all follow the same general philosophy, particularly related to patents. Also, the University of Alaska has an existing policy that works well and has stood the test of time, having been in effect for more than a decade. A general state policy might consider the university approach as well.

These various federal and university policy statements or statutes contain several key elements and philosophical tenets which may be helpful to you. In summary these are:

1. Recognition that patentable inventions produced in the line of work duty may be primarily owned by the sponsoring agency, but that, depending upon the specific circumstances, the originator might rightfully have a partial ownership interest, or at least that it is in the public welfare to award such partial ownership;
2. Recognition that in accepting ownerships of a potential invention, the government or agency accepts responsibility to pursue patenting and management of the patent in a fashion that promotes its usefulness to society;
3. Recognition that in order to promote employee intellectual pursuit, to avoid infringement upon individual freedom, to avoid unnecessary litigation, and to avoid much needless work on the part of agency personnel, that the policy statements or statutes are

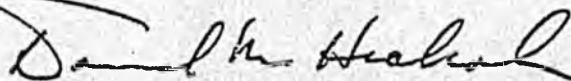

written to pertain strictly to patentable inventions. (We suggest that the existing wording in the draft bill, specifically the wording "intellectual work product" and its definitions as given in Section 39:52.099 are too broad to be effective and may well be challengeable on Constitutional grounds. The proposed statute, we suggest, should pertain to patentable inventions only.); and

4. Recognition, also that for every "idea" that eventually leads to a patent deemed desirable for agency ownership, there are dozens that do not. (Hence, we suggest that the state needs an inexpensive, effective mechanism to weed out ideas of an unpatentable nature or which, if patented, have no economic value to the state. Examination of established procedures will show that the process must start as close to the inventor as possible--specifically, within the agency wherein the employee works. Determination of patentability and/or desirability of patentability should be conducted within the employee's agency. Determination of desired state ownership should be made by the employer's agency acting in conjunction with the Attorney General's office. It may be appropriate to specify in the proposed bill that the ACST would act as a participant in the decision regarding appropriate share of state ownership, once desirability of patenting has been determined.)

A useful guide to framing a patent regulation for Alaska may be the enclosed copy of patent regulations used by the U.S. Department of Interior. Additionally, as earlier stated, another useful guide could be the patenting policy of the University of Alaska. The process used there involves initial internal determination of patentability, followed by a review made by a specialized non-profit patenting organization which then takes a percentage of ownership in payment for its services should all agree that the pursuit of a patent is desirable. In this case the shares in the ownership of the patent between the non-profit corporation, the university, and the inventor are negotiated.

We trust these comments are useful to you. As this bill proceeds in the legislation process we would be pleased to offer further information for your consideration or testify upon your request.

Sincerely,

David M. Hickok
Chairman

DMH/sw
Enclosure

§ 5.2

National Park Service will be granted by the head of the Service or his authorized representative in his discretion and on acceptance by the applicant of the conditions set forth in paragraph (d) (3) of this section.

(d) *Form of application.* The following form is prescribed for an application for permission to make a motion picture, television production, or sound track on areas administered by the United States Fish and Wildlife Service or the National Park Service:

Date _____
 To the head of the _____
 Service, Department of the Interior (Area)

- (1) Permission is requested to make, in the area mentioned above, a _____
- (2) The scope of the filming (or production or recording) and the manner and extent thereof will be as follows _____
 Weather conditions permitting, work will commence on approximately _____ and will be completed on approximately _____

(An additional sheet should be used if necessary.)

(3) The undersigned accepts and will comply with the following conditions:

- (i) Utmost care will be exercised to see that no natural features are injured, and after completion of the work the area will, as required by the official in charge, either be cleaned up and restored to its prior condition or left, after clean-up, in a condition satisfactory to the official in charge.
- (ii) Credit will be given to the Department of the Interior and the Service involved through the use of an appropriate title or announcement, unless there is issued by the official in charge of the area a written statement that no such courtesy credit is desired.
- (iii) Pictures will be taken of wildlife only when such wildlife will be shown in its natural state or under approved management conditions if such wildlife is confined.
- (iv) (Deleted)
- (v) Any special instructions received from the official in charge of the area will be complied with.
- (vi) Any additional information relating to the privilege applied for by this application will be furnished upon request of the official in charge.

SOURCE: 29 FR 260, Jan. 10, 1964; 29 FR 6498, May 19, 1964, unless otherwise noted.

Subpart A—Inventions by Employees

6.1 Definitions.

As used in this subpart:

- (a) The term "Department" means the Department of the Interior. (b) The term "Secretary" means the Secretary of the Interior. (c) The term "Solicitor" means the Solicitor of the Department of the Interior, or anyone authorized to act for him. (d) The term "Commissioner" means the Commissioner of Patents, or any Assistant Commissioner who may act for the Commissioner of Patents.

(e) The term "invention" means any new and useful art, process, method, machine, manufacture, or composition of matter, or any new and useful improvement thereof, or any new variety of plant, or any new, original and ornamental design for an article of manufacture, which is or may be patentable under the laws of the United States.

(f) The term "employee" as used in this part includes a part time consultant, a part time employee or a special employee (as defined in 18 U.S.C. 202) of the Department insofar as inventions made during periods of official duty are concerned, except when special circumstances in a specific case require an exemption in order to meet the needs of the Department, each such exemption to be subject to the approval of the Commissioner.

(g) The term "governmental purpose" means the right of the Government of the United States (including any agency thereof, state, or domestic municipal government) to practice and have practiced (made or have made, used or have used, sold or have sold) throughout the world by or on behalf of the Government of the United States.

(h) The "making of the invention" means the conception or first actual reduction to practice of such invention.

§ 6.2 Report of invention.

(a) Every invention made by an employee of the Department shall be reported by such employee through his supervisor and the head of the bureau or office to the Solicitor, unless the invention obviously is unpatentable. If the invention is the result of group work, the report shall be made by the supervisor and shall be signed by all employees participating in the making of the invention. The original and two copies of the invention report shall be furnished to the Solicitor. The Solicitor may prescribe the form of the report.

(b) The report shall be made as promptly as possible, taking into consideration such factors as possible publication or public use, reduction to practice, and the necessity for protecting any rights of the Government in the invention. Although it is not necessary to withhold the report until the process or device is completely reduced to practice, reduction to practice assists in the preparation of a patent application and, if diligently pursued, protects the interests of the Government and of the inventor. If an invention is reduced to practice after the invention report is filed, the Solicitor must be notified forthwith.

(c) For the protection of the rights of the Government and of the inventor, invention reports and memoranda or correspondence concerning them are to be considered as confidential documents.

(d) An invention report shall include the following:

- (1) A brief but pertinently descriptive title of the invention;

Title 43—Public Lands: Interior

§ 6.3

(2) The full name, residence, office address, bureau or office and division, position or title, and official working place of the inventor or inventors;

(3) A statement of the evidence that is available as to the making of the invention, including information relative to conception, disclosures to others, and reduction to practice. Examples of such information are references to signed, witnessed and dated laboratory notebooks, or other authenticated records pertaining to the conception of the invention, operational data sheets, analysis and operation evaluation reports pertaining to a reduction to practice, and visitor log books, letters and other documents pertaining to disclosures to others. These need not be submitted with the report, only the identifying data is required, e.g., volume and page number in a laboratory notebook;

(4) Information concerning any past or prospective publication, oral presentation or public use of the invention;

(5) The problem which led to the making of the invention;

(6) The objects, advantages, and uses of the invention;

(7) A detailed description of the invention;

(8) Experimental data;

(9) The prior art known to the inventor(s) and the manner in which the invention distinguishes thereover;

(10) A statement that the employee:

(i) Is willing to and does hereby assign to the Government;

(a) The entire rights (foreign and domestic) in the invention;

(b) The domestic rights only, but grants to the Government an option to file for patent protection in any foreign country, said option to expire as to any country when it is decided not to file thereon in the United States, or within six months after such filing;

(ii) Requests, pursuant to § 6.2(e), a determination of the respective rights of the Government and of the inventor.

(e) If the inventor believes that he is not required by the regulations in this subpart to assign to the Government the entire domestic right, title, and interest in and to the invention, and if he is unwilling to make such an assignment to the Government, he shall, in

his invention report, request that the Solicitor determine the respective rights of the Government and of the inventor in the invention, and he shall include in his invention report information on the following points, in addition to the data called for in paragraph (d) of this section:

(1) The circumstances under which the invention was made (conceived, actually reduced to practice or constructed and tested);

(2) The employee's official duties, as given on his job sheet or otherwise assigned, at the time of the making of the invention;

(3) The extent to which the invention was made during the inventor's official working hours, the extent use was made of government facilities, equipment, funds, material or information, and the time of services of other government employees on official duty;

(4) Whether the employee wishes a patent application to be prosecuted under the Act of March 3, 1883, as amended (35 U.S.C. 266), if it should be determined that he is not required to assign all domestic rights to the invention to the Government; and

(5) Whether the employee would be willing, upon request, to voluntarily assign foreign rights in the invention to the Government if it should be determined that an assignment of the domestic rights to the Government is not required.

§ 6.3 Action by supervisory officials.

(a) The preparation of an invention report and other official correspondence on patent matters is one of the regular duties of an employee who has made an invention and the supervisor of such employee shall see that he is allowed sufficient time from his other duties to prepare such documents. The supervisor shall ascertain that the invention report and other papers are prepared in conformity with the regulations of this part; and, before transmitting the invention report to the head of the bureau or office, shall check its accuracy and completeness, especially with respect to the circumstances in which the invention was developed, and shall add whatever com-

Subtitle A—Office of the

ments he may deem to be desirable. The supervisor shall file whatever information he has concerning the commercial value of the invention.

(b) The head of the bureau shall make certain that the report is as complete as possible. He shall report information may be available from any agency concerning the commercial value of the invention and the foreign countries in which the invention is most useful and would have the greatest commercial value.

(c) If the employee invents that the Solicitor determines in the invention, the bureau or office shall state its position with respect to such invention.

(d) The head of the bureau shall indicate whether the invention is in the public interest, and shall set out the facts supporting his determination whenever the employee report does not contain information on this point.

§ 6.4 Action by Solicitor.

(a) If an employee invents pursuant to paragraph (a) of this section that such determination, the Solicitor shall determine the rights of the employee in the invention and to the Government in and to the invention. His determination shall be reviewed by the Commission under Executive Order 10930 and the regulations issued by the Commission. The approval of the President is required.

(b) If the Government obtains the entire domestic right and interest in and to the invention made by an employee, the Solicitor, upon request, may take such action as he deems advisable to protect the invention in the United States.

§ 6.5 Rights in invention.

(a) The rules prescribed in this subpart shall be applied to the respective rights of the Government and of an employee

report, request that the terminate the respective Government and of the he invention, and he shall is invention report infor- following points, in ad- data called for in para- this section:

circumstances under which was made (conceived, ac- ced to practice or con- tested);

employee's official duties, as each sheet or otherwise as- the time of the making of in;

extent to which the inven- sion during the inventor's king hours, the extent use of government facilities, funds, material or infor- d the time or services of rment employees on offi-

by supervisory officials.

preparation of an invention and other official correspond- patent matters is one of the titles of an employee who has invention and the supervisor employee shall see that he is sufficient time from his other prepare such documents. The or shall ascertain that the in- report and other papers are in conformity with the regu- of this part; and, before trans- the invention report to the the bureau or office, shall s accuracy and completeness. y with respect to the circum- in which the invention was de- and shall add whatever com-

ments he may deem to be necessary or desirable. The supervisor shall add to the file whatever information he may have concerning the governmental and commercial value of the invention.

(b) The head of the bureau or office shall make certain that the invention report is as complete as circumstances permit. He shall report whatever in- formation may be available in his agency concerning the governmental and commercial value of the invention, and the foreign countries in which it is likely that the invention would be most useful and would have the great- est commercial value.

(c) If the employee inventor requests that the Solicitor determine his rights in the invention, the head of the bureau or office shall state his conclusions with respect to such rights.

(d) The head of the bureau or office shall indicate whether, in his judg- ment, the invention is liable to be used in the public interest, and he shall set out the facts supporting his conclusion whenever the employee's invention report does not contain sufficient in- formation on this point.

§ 6.4 Action by Solicitor.

(a) If an employee inventor requests pursuant to paragraph (e) of § 6.2, that such determination be made, the Solicitor shall determine the respec- tive rights of the employee and of the Government in and to the invention. His determination shall be subject to review by the Commissioner in proper cases under Executive Orders 10096 and 10930 and the rules and regula- tions issued by the Commissioner with the approval of the President.

(b) If the Government is entitled to obtain the entire domestic right, title and interest in and to an invention made by an employee of the Depart- ment, the Solicitor, subject to review by the Commissioner in proper cases, may take such action respecting the invention as he deems necessary or ad- visable to protect the interests of the United States.

§ 6.5 Rights in inventions.

(a) The rules prescribed in this sec- tion shall be applied in determining the respective rights of the Govern- ment and of an employee of the De-

partment in and to any invention made by the employee.

(b)(1) Except as indicated in the suc- ceeding paragraphs, (b)(1)–(4), of th' section, the Government shall obtain the entire domestic right, title, and in- terest in and to any invention made by an employee of the Department (i) during working hours, or (ii) with a contribution by the Government of facilities, equipment, materials, funds, or information, or of time or services of other government employees on of- ficial duty, or (iii) which bears a direct relation to or is made in consequence of the official duties of the inventor.

(2) In any case where the contribu- tion of the Government, as measured by any one or more of the criteria set forth in paragraph (b)(1) of this sec- tion, to the invention is insufficient equitably to justify a requirement of assignment to the Government, or the entire domestic right, title, and inter- est in and to such invention, or in any case where the Government has in- sufficient interest in an invention to obtain the entire domestic right, title, and interest therein, although the Government could obtain same under paragraph (b)(1) of this section), the Solicitor, subject to the approval of the Commissioner, shall leave title to such invention in the employee, sub- ject, however, to the reservation to the Government of a nonexclusive, irrevoc- able, royalty-free license in the inven- tion with power to grant sublicenses for all governmental purposes, such reservation, in the terms thereof, to appear, where practicable, in any patent, domestic or foreign, which may issue on such invention.

(3) In applying the provisions of paragraphs (b)(1) and (2) of this sec- tion to the facts and circumstances re- lating to the making of any particular invention, it shall be presumed that any invention made by an employee who is employed or assigned (i) to invent or improve or perfect any art, machine, manufacture, or composition of matter, or (ii) to conduct or perform research, development work, or both, or (iii) to supervise, direct, coordinate, or review Government financed or conducted research, development work, or both, or (iv) to act in a liaison capacity among governmental or non-

governmental agencies or individuals engaged in such work, falls within the provisions of paragraph (b)(1) of this section and it shall be presumed that any invention made by any other employee falls within the provisions of paragraph (b)(2) of this section. Either presumption may be rebutted by a showing of the facts and circumstances in the case and shall not preclude a determination that these facts and circumstances justify leaving the entire right, title and interest in and to the invention in the government employee, subject to law.

(4) In any case wherein the Government neither (i) obtains the entire domestic right, title, and interest in and to an invention pursuant to the provisions of paragraph (b)(1) of this section, nor (ii) reserves a nonexclusive, irrevocable, royalty-free license in the invention, with power to grant sublicenses for all governmental purposes, pursuant to the provisions of paragraph (b)(2) of this section, the Solicitor, subject to the approval of the Commissioner, shall leave the entire right, title, and interest in and to the invention in the employee, subject to law.

(c) In the event that the Solicitor determines, pursuant to paragraph (b) (2) or (4) of this section, that title to an invention will be left with an employee, the Solicitor shall notify the employee of this determination and promptly prepare, and preserve in appropriate files, accessible to the Commissioner, a written signed, and dated statement concerning the invention including the following:

(1) A description of the invention in sufficient detail to identify the invention and show the relationship to the employee's duties and work assignment;

(2) The name of the employee and his employment status, including a detailed statement of his official duties and responsibilities at the time the invention was made; and

(3) A statement of the Solicitor's determination and reasons therefor. The Solicitor shall, subject to considerations of national security, or public health, safety, or welfare, submit to the Commissioner a copy of this written statement. This submittal in a case

falling within the provisions of paragraph (b) (2) of this section shall be made after the expiration of the period prescribed in § 6.6 for the taking of an appeal, or it may be made prior to the expiration of such period if the employee acquiesces in the Solicitor's determination. The Commissioner thereupon shall review the determination of the Solicitor and the Commissioner's decision respecting the matter shall be final, subject to the right of the employee or the Solicitor to submit to the Commissioner within 30 days (or such longer period as the Commissioner may, for good cause, shown in writing, fix in any case) after receiving notice of such decision, a petition for the reconsideration of the decision. A copy of such petition must also be filed by the inventor with the Solicitor within the prescribed period.

§ 6.6 Appeals by employees.

(a) Any employee who is aggrieved by a determination of the Solicitor pursuant to § 6.5(b) (1) or (2) may obtain a review of the determination by filing, within 30 days (or such longer period as the Commissioner may for good cause shown in writing, fix in any case) after receiving notice of such determination, two copies of an appeal with the Commissioner. The Commissioner then shall forward one copy of the appeal to the Solicitor.

(b) On receipt of a copy of an appeal filed pursuant to paragraph (a) of this section, the Solicitor shall, subject to considerations of national security, or public health, safety, or welfare, promptly furnish both the Commissioner and the inventor with a copy of a report containing the following information about the invention involved in the appeal:

(1) A copy of a statement containing the information specified in § 6.5(c), and

(2) A detailed statement of the points of dispute or controversy, together with copies of any statements or written arguments that may have been filed, and of any other relevant evidence that the Solicitor considered in making his determination of Government interest. Within 25 days (or

such longer period as the Commissioner may, for good cause in any case) after the receipt of a copy of the Solicitor's report, the employee, the employee's representative, or the Solicitor, shall file one copy of the appeal with the Solicitor.

(c) After the time for filing a reply to the Solicitor's report has expired and if the employee has not appeared in his appeal, the Commissioner, upon request of the employee or the Solicitor, may cause a hearing to be held by an attorney (or other person whom he designates) and the Solicitor shall be otherwise notified. The hearing shall be otherwise open to the public and shall be limited to thirty minutes. The employee need not appear in person, but may be represented by an attorney or other person. The employee need not secure full consideration of his arguments, but the Commissioner shall give such consideration as he deems appropriate. The Commissioner when he determines to intend to file a reply report.

(d) After a hearing is held, the Commissioner shall, upon request of the employee or the Solicitor, issue a decision on the appeal. The decision shall be final, subject to reconsideration for asking reconsideration or modification of the original decision. Any request for reconsideration or modification must be filed within 30 days of the date of the original decision. Such an extension of time may be granted by the Commissioner. The original period of the Commissioner's decision shall be extended after consideration of the facts in the employee's report, and the Commissioner, in his discretion and with due regard for the rights and convenience of the employee and the Solicitor, may require the employee to submit statements on specific facts or may require the Commissioner to hold hearings on specific positions on specific

§ 6.8

(1) Description of the invention in sufficient detail to permit a satisfactory review;

(2) Name of the inventor and his employment status;

(3) Statement of the Solicitor's determination and reasons therefor.

The Commissioner, may, if he determines that the interest of the Government so requires and subject to considerations of national security, or public health safety, or welfare, bring the invention to the attention of any Government agency to whose activities the invention may be pertinent, or cause the invention to be fully disclosed by publication thereof.

§ 6.8 Foreign filing.

(a) *By Government.* (1) In every case where the employee has indicated pursuant to § 6.2(d)(10), his willingness to assign the domestic patent rights in the invention to the Government, or where it has been determined pursuant to § 3.5 that the Government shall obtain the entire domestic patent rights, the Government shall reserve an option to acquire assignment of all foreign rights including the rights to file foreign patent applications or otherwise to seek protection abroad on the invention.

(2) The Government's option shall lapse as regards any foreign country:

(i) When the Solicitor determines after consultation with the agency most directly concerned, not to cause an application to be filed in said foreign country or otherwise to seek protection of the invention, as by publication;

(ii) When the Solicitor fails to take action to seek protection of the invention in said foreign country (a) within six months of the filing of an application for a United States patent on the invention, or (b) within six months of declassification of an invention previously under a security classification, whichever is later.

(b) *By Employee.* (1) No Department employee shall file or cause to be filed an application for patent in any foreign country on any invention in which the Government has acquired the entire (foreign and domestic) patent rights, or holds an unexpired option to acquire the patent rights in

Title 43—Public Lands: Interior

said foreign country, or take any steps which would preclude the filing of an application by or on behalf of the Government.

(2) An employee may file in any foreign country where the Government has not exercised its option acquired pursuant to § 6.2(d)(10), to do so, or determines not to do so.

(3) The determination or failure to act as set forth in § 6.8(a)(2) shall constitute a decision by the Government to leave the foreign patent rights to the invention in the employee, subject to a nonexclusive, irrevocable, royalty-free license to the Government in any patent which may issue thereon in any foreign country, including the power to issue sublicenses for governmental purposes or in furtherance of the foreign policies of the Government or both.

§ 6.9 Publication and public use of invention before patent application is filed.

(a) Publication or public use of an invention constitutes a statutory bar to the granting of a patent for the invention unless a patent application is filed within one year of the date of such publication or public use. In order to preserve rights in unpatented inventions, it shall be the duty of the inventor, or of his supervisor if the inventor is not available to make such report, to report forthwith to the Solicitor any publication or use (other than experimental) of an invention, irrespective of whether an invention report has previously been filed. If an invention report has not been filed, such a report, including information concerning the public use or publication, shall be filed at once. If an invention is disclosed to any person who is not employed by the Department or working in cooperation with the Department upon that invention, a record shall be kept of the date and extent of the disclosure, the name and address of the person to whom the disclosure was made, and the purpose of the disclosure.

(b) No description, specification, plan, or drawing of any unpatented invention upon which a patent application is likely to be filed shall be published, nor shall any written descrip-

Subtitle A—Office of Invention

tion, specification, plan such invention be furnished other than an employer or a person working with the Department on the invention, unless the Solicitor in his opinion that the interest of the Government will not be served by such action. If any publication of the invention, not approved by the Solicitor, comes to the attention of the inventor, it shall be the duty of the inventor to report such information to the Solicitor.

§ 6.10 Publicity concerning invention after patent application is filed.

In order that the public interest be protected to the greatest possible extent, the Department shall be publicized as to the inventions in which the Government has transferable interests. The Department shall be publicized as to patent applications filed with the Department, by the division in which the inventor is employed, or by the inventor himself in his own industry in which the invention may be useful. Regulation shall be utilized to the greatest extent possible. In the event of the inventor being advised of the patent assigned to the Government, he shall take steps towards licensing the invention as available for license.

§ 6.11 Condition of employment.

(a) The regulations concerning the invention shall be a condition of employment for all employees of the Department. These regulations shall be effective as to all employees of the Department from the date of their entry into the Department without regard to future contracts to be entered into by any employee of the Department with any person of the Government.

(b) If a patent application is filed upon an invention made by an employee of the Government under circumstances in which the Government has the right, title and interest in the invention, but will

—Public Lands: Interior

entry, or take any steps to preclude the filing of an application on behalf of the

employee may file in any form where the Government has exercised its option acquired under § 6.2(d)(10), to do so, or to do so.

Termination or failure to comply with § 6.8(a)(2) shall constitute a condition by the Government for the assignment of foreign patent rights to the employee, subject to the Government's right to issue thereon in any form, including the power to grant licenses for governmental use in furtherance of the foreign policy of the Government or

the promotion and public use of inventions when a patent application is filed.

Section 6.8(a)(2) constitutes a statutory bar to the issuance of a patent for the invention if a patent application is filed within one year of the date of the invention or public use. In the event that the employee shall be the duty of the employee or his supervisor if the invention is available to make such report forthwith to the Solicitor of the Interior (or the Secretary) of an invention, if it has not previously been filed. If an application has not been filed, the report, including information on the public use or publication, shall be filed at once. If an invention is assigned to any person who is not an employee of the Department or is not in cooperation with the Department upon that invention, a copy shall be kept of the date and time of disclosure, the name and address of the person to whom the disclosure was made, and the purpose of the disclosure.

The description, specification, and drawing of any unpatented invention on which a patent application is to be filed shall be published in any written descrip-

Subtitle A—Office of the Secretary of the Interior

§ 6.52

tion, specification, plan, or drawing of such invention be furnished to anyone other than an employee of the Department or a person working in cooperation with the Department upon that invention, unless the Solicitor is of the opinion that the interests of the Government will not be prejudiced by such action. If any publication disclosing the invention, not previously approved by the Solicitor, comes to the attention of the inventor or his supervisor, it shall be the duty of such person to report such publication to the Solicitor.

§ 6.10 Publicity concerning the invention after patent application is filed.

In order that the public may obtain the greatest possible benefit from inventions in which the Secretary has transferable interests, inventions assigned to the Secretary upon which patent applications have been filed shall be publicized as widely as possible, within limitations of authority, by the Department, by the originating agency, by the division in which the inventor is employed, and by the inventor himself in his contacts with industries in which the invention is or may be useful. Regular organs of publication shall be utilized to the greatest extent possible. In addition, it shall be the duty of the Solicitor, upon being advised of the issuance of any patent assigned to the Secretary, to take steps towards listing the patent as available for licensing, where feasible.

§ 6.11 Condition of employment.

(a) The regulations in this subpart shall be a condition of employment of all employees of the Department and shall be effective as to all their inventions. These regulations shall be effective without regard to any existing or future contracts to the contrary entered into by any employee of the Department with any person other than the Government.

(b) If a patent application is filed upon an invention which has been made by an employee of the Department under circumstances that entitle the Government to the entire domestic right, title and interest in and to the invention, but which has not been

reported to the Solicitor pursuant to the regulations in this subpart, title to such invention shall immediately vest in the Government, as represented by the Secretary, and the contract of employment shall be considered an assignment of such rights.

Subpart B—Licenses

§ 6.51 Purpose.

It is the purpose of the regulations in this subpart to secure for the people of the United States the full benefits of Government research and investigation in the Department of the Interior (a) by providing a simple procedure under which the public may obtain licenses to use patents and inventions in which the Secretary of the Interior has transferable interests and which are available for licensing; and (b) by providing adequate protection for the inventions until such time as they may be made available for licensing without undue risk of losing patent protection to which the public is entitled.

[31 FR 10706, Aug. 13, 1966]

§ 6.52 Patents.

Patents in which the Secretary of the Interior has transferable interests, and under which he may issue licenses or sublicenses, are classified as follows:

(a) *Class A.* Patents, other than those referred to in paragraph (c) of this section, which are owned by the United States, as represented by the Secretary of the Interior, free from restrictions on licensing except such as are inherent in Government ownership;

(b) *Class B.* Patents in which the interest of the United States, as represented by the Secretary of the Interior, is less than full ownership, or is subject to some express restriction upon licensing or sublicensing (including patents upon which the Secretary of the Interior holds a license, patents assigned to the Secretary of the Interior or as trustee for the people of the United States, and patents assigned to the Secretary of the Interior upon such terms as to effect a dedication to the public);

§ 6.53

(c) *Class C.* Patents and patent rights acquired by the Secretary of the Interior pursuant to the Act of April 5, 1944 (58 Stat. 190; 30 U.S.C. 321-325), and any amendments thereof.

[29 FR 260, Jan. 10, 1964, as amended at 31 FR 10796, Aug. 13, 1966]

§ 6.53 Unpatented inventions.

The Secretary of the Interior may also have transferable interests in inventions which are not yet patented. In order to protect the patent rights of the Department, for the eventual benefit of the public, a license may be granted with respect to such an invention only if (a) a patent application has been filed thereon; (b) the invention has been assigned to the United States, as represented by the Secretary of the Interior, and the assignment has been recorded in the Patent Office; and (c) the Solicitor of the Department is of the opinion that the issuance of a license will not prejudice the interests of the Government in the invention. Such licenses shall be upon the same terms as licenses relating to patents of the same class, as described in § 6.52.

§ 6.54 Use or manufacture by or for the Government.

A license is not required with respect to the manufacture or use of any inventor, assigned or required to be assigned without restrictions or qualifications to the United States when such manufacture or use is by or for the Government for governmental purposes. A license or sublicense may be required, however, for such manufacture or use in the case of Class B patents or patent rights when the terms under which the Secretary of the Interior acquires interests therein necessitate the issuance of a license or sublicense in such circumstances.

[31 FR 10796, Aug. 13, 1966]

§ 6.55 Terms of licenses or sublicenses.

(a) No license or sublicense shall be granted under any patent in which the Secretary of the Interior has transferable interests, except as set forth under these regulations, the terms and conditions of which shall be expressly

Title 43—Public Lands: Interior

stated in such license and sublicense. The terms of licenses and sublicenses issued under this subpart shall not be unreasonably restrictive.

(b) To the extent that they do not conflict with any restrictions to which the licensing or sublicensing of Class B patents and unpatented inventions may be subject, all licenses and sublicenses relating to Class A and Class B patents and unpatented inventions shall be subject to the following terms and provisions, and to such other terms and conditions as the Solicitor may prescribe:

(1) The acceptance of a license or sublicense shall not be construed as a waiver of the right to contest the validity of the patent. A license or sublicense shall be revocable only upon a finding by the Solicitor of the Department that the terms of the license or sublicense have been violated and that the revocation of the license or sublicense is in the public interest. Such finding shall be made only after reasonable notice and an opportunity to be heard.

(2) Licenses and sublicenses shall be nontransferable. Upon a satisfactory showing that the Government or public will be benefited thereby, they may be granted to properly qualified applicants royalty-free. If no such showing is made, they shall be granted only upon a reasonable royalty or other consideration, the amount or character of which is to be determined by the Solicitor. A cross-licensing agreement may be considered adequate consideration.

(3) Licensees and sublicensees may be required to submit annual or more frequent technical or statistical reports concerning practical experience acquired through the exercise of the license or sublicense, the extent of the production under the license or sublicense, and other related subjects.

(4) A licensee or sublicensee manufacturing a patented article pursuant to a license or sublicense shall give notice to the public that the article is patented by affixing thereon the word "patent", together with the number of the patent, or when, from the character of the article, this cannot be done, by fixing to it, or to the package in

Subtitle A—Office of

which it is enclosed, a such notice.

(c) Licenses and sub to Class C patents ar shall be granted upon conditions as may be p ant to sections 3 and April 5 1944, and a thereof.

[29 FR 260, Jan. 10, 1964, FR 10796, Aug. 13, 1966]

§ 6.56 Issuance of licens

(a) Any person desir lating to an invention Secretary of the In patent or patent righ the Solicitor of the De Interior an applicatio stating:

such license and sublicense. of licenses and sublicenses for this subpart shall not be overly restrictive.

to the extent that they do not contain any restrictions to which the granting or sublicensing of Class B and unpatented inventions is subject, all licenses and sublicenses relating to Class A and Class B and unpatented inventions are subject to the following terms, conditions, and to such other conditions as the Solicitor deems appropriate:

(a) Acceptance of a license or sublicense shall not be construed as a waiver of the right to contest the validity of the patent. A license or sublicense shall be revocable only upon a finding by the Solicitor of the Department of the Interior that the terms of the license or sublicense have been violated and that the revocation is in the public interest. Such revocation shall be made only after reasonable notice and an opportunity to be heard.

(b) Licenses and sublicenses shall be granted royalty-free. Upon a satisfactory showing that the Government or its agents will be benefited thereby, they may be granted to properly qualified persons on a royalty-free basis. If no such showing is made, they shall be granted on a reasonable royalty or fee basis. In consideration of the amount of royalty or fee which is to be determined by the Solicitor. A cross-licensing arrangement may be considered appropriate.

(c) Licenses and sublicensees may be required to submit annual or more frequent technical or statistical reports concerning practical experience gained through the exercise of the license or sublicense, the extent of the work done under the license or sublicense, and other related subjects.

(d) Licenses and sublicensees may be required to submit annual or more frequent reports to the public that the article is being affixed thereon the word "patented" together with the number of articles, or when, from the character of the article, this cannot be done, to the package in

Subtitle A—Office of the Secretary of the Interior

§ 7.2

which it is enclosed, a label containing such notice.

(c) Licenses and sublicenses relating to Class C patents and patent rights shall be granted upon such terms and conditions as may be prescribed pursuant to sections 3 and 5 of the Act of April 5 1944, and any amendments thereof.

(29 FR 260, Jan. 10, 1964, as amended at 31 FR 10796, Aug. 13, 1966)

§ 6.56 Issuance of licenses.

(a) Any person desiring a license relating to an invention upon which the Secretary of the Interior holds a patent or patent rights may file with the Solicitor of the Department of the Interior an application for a license, stating:

(1) The name, address, and citizenship of the applicant;

(2) The nature of his business;

(3) The patent or invention upon which he desires a license;

(4) The purpose for which he desires a license;

(5) His experience in the field of the desired license;

(6) Any patents, licenses, or other patent rights which he may have in the field of the desired license; and

(7) The benefits, if any, which the applicant expects the public to derive from his proposed use of the invention.

(b) It shall be the duty of the Solicitor, after consultation with the bureau most directly interested in the patent or invention involved in an application for a license, and with the Evaluation Committee if royalties are to be charged, to determine whether the license shall be granted. If he determines that a license is to be granted, he shall execute on behalf of the Secretary, an appropriate license.

§ 6.57 Evaluation Committee.

At the request of the Solicitor, an Evaluation Committee will be appointed by the Secretary to recommend royalty rates with respect to any patents or inventions for which royalties may be charged.

APPENDICES

APPENDIX A--Digest and Analysis of State Legislation Relating to Computer Technology by John C. Lautsch from JURIMETRICS JOURNAL, Vol. 20, Number 3, Spring 1980.

APPENDIX B--General Alaska Statutes on Telecommunications: AS 44.21.150 to 44.21.170 on central control of data processing; AS 44.21.241 to 44.21.255 on the Alaska Council on Science and Technology; AS 44.21.256 to 44.21.290 on the Public Broadcasting Commission; AS 44.21.300 to 44.21.330 on the Divisions of Telecommunications Services and Systems; AS 44.20.020 to 42.20.340 on civil and criminal offenses re eavesdropping, wiretapping, misuse of party lines, and other miscellaneous conduct relating to communications.

APPENDIX C--The Alaska and Federal Public Information Law and Federal Privacy Act of 1974: AS 09.25.110 to 09.25.120; 5 U.S.C. § 522; 5 U.S.C. § 552a.

APPENDIX D--Regulations Implementing the "Freedom of Information Act": 6 AAC 95.010 to 6 AAC 95.900 (AS 09.25.110--09.25.120) and Transmittal Letter.

APPENDIX E--Alaska Justice Information System Law and Regulations: AS 12.61, AS 44.19.110 to 44.19.122; AJIS Regulations--6AAC 60; selected pages from the AJIS Manual; Federal Regulations 28 C.F.R., Sec. 20.1 to 20.20.

APPENDIX F--Computer Privacy Act (from 1978 Suggested State Legislation of the Council of State Governments).

APPENDIX G--Uniform Information Practices Code, National Conference of Commissioners on Uniform State Laws, 1980.

APPENDICES (cont'd)

APPENDIX H--Privacy Act (from 1978 Suggested State Legislation of Council of State Governments).

APPENDIX I--Records, Computers and the Rights of Citizens, Report of the Secretary's Advisory Committee on Automated Personal Data Systems, Department of Health, Education and Welfare, 1973.

APPENDIX J--Report of the Federal Privacy Protection Commission, 1977.

APPENDIX K--Law and Computer Privacy in the States of the USA, by J. Lautsch, from 1 Information Privacy 100.

APPENDIX L--A DP Management Guide to Privacy Legislation, Auerbach Publishers, Inc., Pennsauken, New Jersey 08109.

APPENDIX M--State Protection of Copyrights to Musical Works: AS 45.50.330 to 45.50.460.

APPENDIX N--Guidelines for Development of Computer Crime Legislation with a Sample Computer Crime Bill by NASIS Standing Committee on Security, Privacy and Confidentiality.

APPENDIX O--HB 419--Twelfth Legislature, First Session on COMPUTER CRIME.

APPENDIX P--State Computer Crime Statutes: Alaska Statute 11.46.985; California Penal Code Section 502; Colorado Criminal Justice Code Sections 18-5.5-101, 102; Delaware Code Section 858; Florida Sections 815.01-815.07; Georgia Codes Annotated Chapter 16-9 Sections 90-95; Illinois Criminal Code Sections 15-1, 16-9; Michigan Section 28,529; Minnesota Sections 609.87-609.89; Missouri Sections 570.085 RSmO; Montana Sections 45-1-205, 45-2-101, 45-2-103, 45-2-104, 45-6-310, 45-6-311; New Mexico Criminal Offenses 30-16A-1 to 30-16A-4; North Carolina Sections 14-453 to 14-457; Ohio Sections 2901.01, 2913.01; Rhode Island Criminal Offenses 11-52-1 to 11-52-4; Utah Criminal Code 76-6-701 to 76-6-704; Virginia Sections 18.02-98.1; Wisconsin Section 943.70.

APPENDIX Q--Article on "Computer Crime" from Encyclopedia of Crime and Justice by Stein Schjolberg and Donn B. Parker.

APPENDIX R--Scenarios of Possible Computer Crime or Misuse of State Computers prepared by Carl Krefting, Deputy Director, Division of Data Processing, Department of Administration.

APPENDICES (cont'd)

APPENDIX S--The Spreading Danger of Computer Crime,
Business Week, April 20, 1981.

APPENDIX T--"Executive Summary" and Table of Contents
from Computer Crime, A Criminal Justice Re-
source Manual, Bureau of Justice Statistics,
U.S. Department of Justice.

APPENDIX U--H.R. 1092, 98th Congress, a bill for a
"Federal Computer Systems Protection Act of
1983", Summary and Computer Crime Fact Sheet.

APPENDIX V--Tampering with Public Records and Misuse of
Public Informtion: AS 11.56.820 and AS 11.-
56.860.

REPORT TO THE LEGISLATURE
PURSUANT TO SEC. 45, CH. 143, SLA 1982

Introduction

In the last days of the 1982 legislative session, the following floor amendment to HCS CSSB 535 (2d Jud) am H, offered by Representative Brian Rogers, was adopted and became part of ch. 143, SLA 1982:

Sec. 45. The Alaska Code Revision Commission shall, after consultation with the Department of Law and the Division of Telecommunications Systems, conduct a comprehensive study of laws relating to computers and telecommunications systems. The Commission shall make recommendations to the First Session of the Thirteenth Legislature concerning offenses involving computer equipment, offenses against intellectual property, and privacy implications of computer and telecommunications uses.

This report is in response to the quoted section.

I. STUDY OF LAWS RELATING TO COMPUTERS AND TELECOMMUNICATIONS SYSTEMS.

The first sentence of the section calls for a comprehensive study of laws relating to computers and telecommunications systems. Fortunately for the limited resources the commission had to conduct a study, there is a comprehensive review of state laws in this field printed in Jurimetrics Journal, Volume 20, Number 3, Spring 1980. This "Digest and Analysis of State Legislation Relating to Computer Technology" authored by John C. Lautsch, Appendix A to this report, is brought up to date with our additions. It is supplemented by copies of the principal Alaska laws referred to in this study. Some are in other appendices according to subject matter. Some of the more general laws on telecommunications are grouped together in Appendix B. Copies of the texts of laws from other states that we obtained for this study generally are not forwarded with this report but are available for review and copying in the office of the code revision commission, Room No. 5, 110 Seward Street, Juneau.

Although some rudimentary understanding of existing and potential future federal law is useful toward determining what, if any, Alaska legislation should be enacted, an exhaustive study of federal law is beyond the scope of this study. Existing federal statutes that may be pertinent to the study are listed in Appendix K, at page 17.

One potential future federal law in the subject area of this report is a "Federal Computer Systems Protection Act". It is HR 1092 in the 98th Congress, known as "the Nelson bill" for its sponsor, Representative Bill Nelson of Florida. Since it would make a federal crime of various acts relating to computers, it is discussed in a section on computer crime later in this report. (See Appendix U)

Laws making computer crime a separate category of state crime have been enacted in some sixteen states. They are discussed in the general survey of state laws (Appendix A); the texts are appended as Appendix P to the separate section of this report on computer crime.

In the Lautsch study (Appendix A) a question is raised about Alaska's having placed central control over all state computers in the Department of Administration, an agency of the executive branch of government. Cases are there discussed dealing with constitutional separation of powers issues raised in other states. Appendix A, pages 204-207; see especially, Opinion of the Justices to the House of Representatives, 309 N.W.2d 476 (Mass. 1974). There being obvious advantages to centralization, the legislature should at least be aware that the central control provided in AS 44.21.150--44.21.170 (included in Appendix B) may be challenged on constitutional grounds.

Beyond this, the Lautsch study shows Alaska's adoption of various computer-related statutes in comparison to the other states and does not single out Alaska as noteworthy.

Since Appendix A, these notes, and related appendices, comprise the general study called for by the first sentence of sec. 45, ch. 143, SLA 1982, this report proceeds to what is called for by the second sentence of that section.

II. PRIVACY.

"Privacy implications of computer and telecommunications uses" is a broad subject or a relatively narrow one depending upon one's focus.

Here we briefly treat the broad concept of privacy and then go to more specific applications of the right to privacy as it applies to computers and telecommunications.

The law on privacy in Alaska starts with Article I, Section 22 of the Alaska Constitution:

The right of the people to privacy is recognized and should not be infringed. The legislature shall implement this section.

The right has been construed by the state supreme court in several decisions, generally in ways not related to computers and telecommunications. (The section is fully annotated in Volume I of Alaska Statutes and citations are not repeated here. Citations are also set out in Appendix A at pages 223-224.) The court's decision in State v. Glass, 585 P.2d 514 (Alaska, 1978), should be noted especially. That case involved use in evidence of a recording of a telephone conversation made by investigators with the consent of only one of the participants to the conversation, the court holding the other participant's constitutional right to privacy was abridged. Since the telephone is the primary telecommunication device, whether it is used in voice transmission or in nonverbal communication with a computer, the case has broad application. Alaska's "right to privacy" covers commercial privacy as well as individual privacy: It protects the privacy of certain business information, the disclosure of which would advantage a competitor. Woods and Rohde v. State Dept. of Labor, 565 P.2d 138 (Alaska, 1977).

The constitutional right to privacy, specific in the Alaska Constitution, implied in the U.S. Constitution (see Harlan concurrence in Katz v. United States, 389 U.S. 347 (1967), the reasoning adopted for Alaska in Glass, supra) is not absolute. In the case of public records there is continuous tension between the right to privacy and the public information laws. Confidentiality of certain information is required by numbers of Alaska statutes. Records that are protected as confidential include certain vital statistics, medical, tax, employment security, social services, state loans, oil and gas, educational and criminal justice records. But the public's "right to know" is a countervailing interest, a right that often collides with the right to privacy. The Alaska and federal public information law, AS 09.25.110--09.25.120 and 5 U.S.C. § 552 and the Privacy Act of 1974, 5 U.S.C. § 552a, are attached as Appendix C.

The conflict between privacy and openness is explored in several opinions of the Attorney General, copies of which are retained and available in the files of the code revision commission.

Regulations were adopted in 1982 on procedures that apply under the state's freedom of information act, AS 09.25.110--09.25.120. The regulations, 6 AAC 95.010--6 AAC 95.900, deal in part with the conflict between laws that protect privacy and those that promote openness in government. Generally, the same regulations apply to information whatever its form. However, 6 AAC 95.140 contains special provisions on information that must be decoded or otherwise converted. The section puts the burden on the requestor to decode or convert. By its terms the section could apply to any record in a computer or on a magnetic tape, since the record must be converted to be read. According to Assistant Attorney General Tom Jahnke, however, the section is not intended to apply to a record in a computer or on tape if the record can be printed out without decoding. Jahnke's

section analysis of the regulations and the regulations themselves are attached as Appendix D. We invite attention to Jahnke's explanation of 6 AAC 95.140.

The freedom of information act, AS 09.25.110--09.25.-120, as distinguished from the regulations that implement it, does not deal specially with records in computer storage and apparently requires the state to call up a requested record from storage for inspection no matter what means of storage is used. Therefore, although our focus here is on privacy rather than on public access, we note that a question might be raised about validity of the restrictions on access in 6 AAC 95.140.

Computers are central to the Alaska Justice Information System (AJIS), and nowhere in the state's regulations is the tension between privacy and public access to information in computers more thoroughly dealt with than in AJIS regulations. The system with its computer access to criminal history record information and the broader category of criminal justice information is the subject of AS 12.62 and regulations 6 AAC 60. AJIS is overseen by the Governor's Commission on the Administration of Justice and its functionary, the Alaska justice information coordinator, as provided in AS 44.19.122. These statutes and regulations are attached for reference. Appendix E.

In most states privacy in relation to computers and telecommunications is considered largely a practical problem of implementing existing law on what information is to be kept confidential. It is possible to construct a separate system of requirements for businesses and governmental units that keep personal data in their computer memory banks, of course. An example is the Computer Privacy Act included in 1978 Suggested State Legislation of the Council of State Governments (Appendix F).

Since 1978 when that broad Act was suggested, the mini-computer has come into common use. The headnote to the Computer Privacy Act is a good resume of the registration and reporting

requirements of that act. From it we can judge whether the act is practical given the proliferation of computer use. Even before the explosion in minicomputers often with ties to larger business computers, voices were raised warning that the pervasive regulation provided by such statutes was an inflationary pressure hard to quantify and isolate, and urging relative simplicity in the legislative scheme to protect against invasion of privacy. (Appendix A, p. 210)

Attached is a Uniform Information Practices Code drafted as proposed uniform legislation by the National Conference of Commissioners on Uniform State Laws in 1980 (Appendix G). No states have adopted the uniform law.

Also attached is a Privacy Act included in 1978 Suggested State Legislation of the Council of State Governments (Appendix H). The various model and uniform acts overlap each other and cover some ground already covered by Alaska and other states' laws.

An explanation precedes each of these model and uniform acts in the appendices, drafted in a way favorable to the Act in each instance.

As noted, there are attached as appendices three information practices codes, one from the National Conference of Commissioners on Uniform State Laws and two from the Council of State Governments. Although there are differences between the codes and differences especially in the scope of their coverage, they have a common ancestry in federal studies published in 1973 and in 1977. The 1973 Report of the Secretary's Advisory Committee on Automated Personal Data Systems, Department of Health, Education and Welfare, entitled "Records, Computers and the Rights of Citizens" is attached as Appendix I. This report resulted in enactment of the U.S. Privacy Act of 1974, PL 93-579, 5 U.S.C., § 552a, to regulate the computerized personnel record keeping of federal agencies. The 1973 report was followed in 1977 by the

report of the federal Privacy Protection Study Commission, attached as Appendix J. The history and influence of these studies is set out in J. Lautsch, "Law and Computer Privacy in the States of the USA," 1 Information Privacy 100, at 101-102, attached as Appendix K.

The basic parts of this "information-practices" approach to computer privacy, contained in each of the codes are:

- (1) the establishment of notice (disclosure) requirements;
- (2) the establishment of standards for the use of personal information;
- (3) legislating specific record keeping rules for accounting for and access to personal information;
- (4) the establishment of a right of inquiry; and
- (5) a right of inspection and challenge.

Lautsch (Appendix K, at pp. 101-102) explains each of these concepts and follows with acknowledgment of their usefulness as social policy but criticises their enactment into detailed state statutory requirements. According to Lautsch in his computer privacy article (Appendix K at p. 101), the concepts of the influential 1973 report to the secretary were never intended to be lifted out in total to form statutory enactments. However, that has been the result in some states. Lautsch in his general survey (Appendix A, at p. 216), includes Alaska's law on security and privacy in the Criminal Justice Information System among the laws of sixteen states where some aspects of the "information practices" approach is adopted. He also lists AS 18.23.030 in this category, but that categorization is scarcely justified. And so far Alaska has not seen fit to enact anything comparable to the general information practices codes, Appendices F, G, and H.

Principal federal laws on information privacy are listed in Lautsch, "A DP Management Guide to Privacy Legislation",

a publication of Aurbach Publishers, Inc. (Appendix L, at p. 17). The collected federal citations are followed by citations to selected state laws. That publication is included in the report for an excellent discussion of the constitutional basis for a federal right to privacy, as well as for an overview of pertinent federal statutes.

III. INTELLECTUAL PROPERTY.

This study is to include "recommendations . . . concerning offenses against intellectual property" (sec. 45, ch. 143, SLA 1982).

The subject will be further treated as part of "computer crime", a later section of this report. However, since one immediately associates intellectual property with copyright law, some mention is made of copyrights.

In outline the recommendation is simple: No good reason appears for the state to legislate on copyrights.

It is a field regulated by Congress under the commerce clause. If copyrighting in relation to computer and telecommunications is not a field preempted by Congress, it is all but preempted, and the chance of an unconstitutional state enactment is great. A statutory expression of this preemption is in 17 U.S.C. § 301(a). It declares that as to rights covered by the 1976 Copyright Act " . . . no person is entitled to any such right or equivalent right in any such work under the common law or statutes of any State." The 1976 Copyright Act, Pub. L. 94-553, 90 Stat. 2572, 17 U.S.C. § 101, et seq., resulted after decades of effort to modernize copyright law. Even so, it leaves open some questions on computer technology, apparently for future federal legislation, by the following section:

Sec. 117. Scope of exclusive rights: Use in conjunction with computers and similar information systems.

Notwithstanding the provisions of sections 106 through 116 and 118, this title does not

afford to the owner of copyright in a work any greater or lesser rights with respect to the use of the work in conjunction with automatic systems capable of storing, processing, retrieving, or transferring information, or in conjunction with any similar device, machine, or process, than those afforded to works under the law, whether title 17 or the common law or statutes of a State, in effect on December 31, 1977, as held applicable and construed by a court in an action brought under this title.

Reed C. Lawlor, a California patent attorney, summarizes the "prevailing views under the old 1909 law and under the new 1976 law" ("CONTU" in the following quotation means the Commission on New Technological Use of Copyrighted Works, a presidential commission):

1. It is generally agreed that computer programs are copyrightable under the old law, at least in written or printed form. There is hardly any question that this is also the case under the new law.
2. There are some who argue that when a program is in a machine-readable form it is not protected under the old copyright law. But under the new law programs in machine-readable form are protected, if such protection is constitutional.
3. There is a general belief that copying of a computer program that is in machine-readable form does not constitute copyright infringement under the old law. But it is generally agreed that, except for a constitutional question, making a machine-readable copy of a machine-readable program constitutes copyright infringement under the new law. This should also apply to loading program into a computer memory. At one point CONTU seems to interpret the law to mean that copying of a program into computer memory is a 'use' under present Section 117 (CONTU Report page 30). But it also makes a strong statement to the contrary. (CONTU Report page 31)
4. There is little question that a proprietor of a computer program had a common law right to treat the program as a trade secret under the old law and to license or lease the program as a trade secret and to receive payment in terms of the execution time of the program, as well as on a weekly or monthly basis, or possibly in other ways.

5. But under Section 117, the protection remains almost the same as under the old law as far as program execution is concerned, whatever that is.

Lawlor, "A Proposal for Strong Protection of Computer Programs Under the Copyright Law," *Jurimetrics Journal*, Fall 1979, at 18-29.

Lawlor, in his article, outlines proposals for revision and extension of the 1976 Copyright Act made by CONTU, the commission appointed by President Ford in 1975 that worked for three years on the subject. Lawlor also outlines his own different proposals. At the heart of the issue is the traditional common law limitation on copyright--the concept that ideas are in the public domain, free for use by anyone. It is only the way in which they are expressed that may be protected by copyright.

It is on the national level that these issues over technological property must be worked through, and the influence of Alaskans should be expressed through the routes available in the federal system.

There is little in existing Alaska law on intellectual property, except as noted in the following section on computer crime. Perhaps the single exception is AS 45.50.330--45.50.430 on protection of copyrighted musical compositions. (Appendix M) It is old law carried over from ACLA 1949. We have been unable to determine whether there have been prosecutions under the anti-monopoly provision of the law, or what the level of compliance is with the filing requirements of the law, but we find there are some current filings under it.

IV. COMPUTER CRIME.

"A computer crime is defined as any illegal act for which knowledge of computer technology is essential for its perpetration, investigation, or prosecution (U.S. Department of Justice, 1979). Computer crime can be divided into two main

categories. In the first category, the computer is a tool of a crime, such as fraud, embezzlement, and theft of property; or it can be used to plan or manage a crime. In such crimes, the criminal offense is clear: The perpetrator is directly gaining money or property for himself or another and uses the computer in the act. In the second category, the computer is the object of a crime, such as sabotage, theft or alteration of computerized data, and theft of computer services. In the latter category, data represent money directly, for instance in Electronic Fund Transfer Systems, or indirectly in the costs of replacing erased or altered data or the costs represented by the loss if data are disclosed or used without authorization. Thus, underlying the definition of computer crime is the concept that data represent money." (Extract from Appendix Q)

A growing number of states have concluded that special computer crime legislation in one form or another is needed (see Lautsch report, Appendix A). Some have adopted legislation patterned after the model proposed by the National Association for State Information Systems (NASIS). Its "Guidelines for Development of Computer Crime Legislation", a 1979 publication with sample bill attached is Appendix N. The Alaska bill in the Twelfth Legislature, HB 419 (Appendix O), is a somewhat oversimplified version of that model bill. (The NASIS model was also included in 1981 Suggested State Legislation of the Council of State Governments.)

Attached as Appendix P are computer crime statutes of the states that have enacted statutes in the category.

Although no one denies there is computer crime, its relative incidence is disputed. Director of the National Computer Crime Data Center Jay Becker, one of the authorities in the field, asserts that

Non-reporting represents a serious problem
in the area of computer crime--far more
than is even the case with white-collar

crime in general. IBM and the U.S. Chamber of Commerce estimate that no more than 15% of all computer crime is reported. Several reasons appear to lie at the base of this non-reporting. A primary one is the fear on the part of businesses that admitting their computer's fallibility will have a severe effect on their customers' confidence in the business operations. Additionally, businesses may well assume that local law enforcement agencies do not have the expertise to deal with computer crimes. The third possible factor is the absence of the usual 'old boy' networks through which company security personnel might become familiar with local law enforcement officers who are interested and experienced in investigating computer crime cases.

A good overview of the problems to be met by enacting computer crime statutes--as well as some analysis of existing state laws--is a paper prepared for an International Commercial Crime Conference, October 1981, by Dom Parker of SRI International, Appendix Q. It is a guide to the kinds of computer abuses that criminal laws seek to control.

Bringing a local focus to these problems, Carl Krefting, Deputy Director of the Division of Data Processing in the Alaska Department of Administration, has put together scenarios--computer abuses that can occur, and in some instances have occurred, in use of the state's computers (Appendix R).

Any number of articles in the popular press have covered certain spectacular computer crimes and attempted computer crimes. A sample from Business Week, April 20, 1981, pp. 81-92 is enclosed as Appendix S. It includes discussion of such popular subjects as the \$21.3 million embezzlement by computer from Wells Fargo Bank. But for the purpose of our study, the following in its discussion of encryption (scrambling) is more striking:

Some vendors have had more luck selling encryption to security-minded oil companies, possibly because the only known tap on a data line involved information on oil lease bids that was stolen during transmission from an oil company's computer in Texas to its terminal in Alaska. The victimized company, which private investigators refuse to identify, became suspicious when it

was narrowly outbid at many lease sales. It commenced an investigation that turned up a wiretap a few miles down the road from its Alaska terminal.

Television, too, has had its share of spectaculars about computer crime. One is a well done NOVA program on PBS, a transcript of which is retained and available upon request of the code revision office.

The amount of material available on computer crime makes selection difficult. However, if one is seeking a single guide a 1979 Criminal Justice Resource Manual on Computer Crime, published by the Bureau of Justice Statistics, U.S. Department of Justice, is a suitable single source. The "Executive Summary and Guide" and table of contents of its 400 pages are attached as Appendix T. The volume is retained for use through the code revision office, Juneau, and additional copies are readily available.

Near the start of this report we mention the "Nelson Bill", HR 1092 in the 98th Congress, a bill that would create a "Federal Computer Systems Protection Act of 1983". The bill and the materials used by Representative Nelson of Florida in explaining the purpose of the bill are Appendix U. In a hearing on HR 3970, an earlier version of the bill, in September 1982, there was only luke warm support for it. At that hearing, Representative Nelson asserted that studies dealing with the need for federal legislation on computer crime are requested of the Library of Congress and the Office of Technology Assessment. We have asked for copies of the studies when they are available, and we will be mailed a copy of the hearing transcript when it is printed. When received, these things will be retained and available in the code revision commission office as a part of this study.

Generally Alaska's criminal laws relating to information do not deal with information in computers as a separate

species. The crime of tampering with public records (AS 11.56.-820, Appendix V) is general without special reference to computers. As noted later in this report, any state records are confidential. However, computer storage of and access to these records has not brought about special statutes. The misuse of public records is a general crime (AS 11.56.860, also in Appendix V) and misuse of confidential records is also made a crime in the various statutes relating to specific confidential records. But computerized records are not separately covered, with the exceptions noted below.

Although it is mentioned in the section on privacy earlier in this report, we refer again to the Alaska Justice Information System (AJIS) and note that it establishes both civil and criminal penalties for breaching the privacy provisions of AS 12.62. (Reference Appendix E, especially AS 12.62.010)

Existing Alaska criminal law especially directed toward computers includes AS 11.46.985:

Sec. 11.46.985. DECEIVING A MACHINE. In a prosecution under this chapter for an offense that requires 'deception' as an element it is not a defense that the defendant deceived or attempted to deceive a machine. For purposes of this section, 'machine' includes a vending machine, computer, turnstile, or automated teller machine.

A part of the general criminal code revision that took effect in 1980, it is unique among state laws. Its effectiveness has not been tested.

Perhaps more significant is an amended definition of intangible property in ch. 143, SLA 1982. As revised the definition that applies throughout the criminal code, AS 11, is:

Sec. 11.81.900(b)(44) 'property' means an article, substance, or thing of value, including money, tangible and intangible personal property including data or information stored in a computer program, system, or network, real property, a credit card, a domestic pet or livestock regardless of value,

choses-in-action, and evidence of debt or of contract: [,] a commodity of a public utility such as gas, electricity, steam, or water constitutes property but the supplying of such a commodity to premises from an outside source by means of wires, pipes, conduits, or other equipment is considered a rendition of a service rather than a sale or delivery of property; (The 1982 insertions and deletions are shown.)

Although the amendment seems no more than a clarification of existing law, its effect is to evoke possible prosecutions of computer-related property crimes that might not have been successfully prosecuted under the former definition.

A printout of the many criminal statutes that are affected by this amendment to the definition of "property" is retained in the code revision commission office, and it may be readily duplicated on the legislature's computer and provided to a user of this report. For a ready concept of the pervasiveness of property crimes that can be "computer crimes" by virtue of AS 11.81.900(b)(44), following are the titles of the code sections affected by the revised definition:

Sec. 11.41.510.	ROBBERY IN THE SECOND DEGREE.
Sec. 11.41.520.	EXTORTION.
Sec. 11.41.530.	COERCION.
Sec. 11.46.100.	THEFT DEFINED.
Sec. 11.46.110.	CONSOLIDATION OF THEFT OFFENSES: PLEADING AND PROOF.
Sec. 11.46.120.	THEFT IN THE FIRST DEGREE.
Sec. 11.46.130.	THEFT IN THE SECOND DEGREE.
Sec. 11.46.140.	THEFT IN THE THIRD DEGREE.
Sec. 11.46.150.	THEFT IN THE FOURTH DEGREE.
Sec. 11.46.160.	THEFT OF LOST OR MISLAID PROPERTY.
Sec. 11.46.180.	THEFT BY DECEPTION.
Sec. 11.46.190.	THEFT BY RECEIVING.
Sec. 11.46.200.	THEFT OF SERVICES.
Sec. 11.46.210.	THEFT BY FAILURE TO MAKE REQUIRED DISPOSITION OF FUNDS RECEIVED OR HELD.
Sec. 11.46.220.	CONCEALMENT OF MERCHANDISE.
Sec. 11.46.230.	REASONABLE DETENTION AS DEFENSE.
Sec. 11.46.260.	REMOVAL OF IDENTIFICATION MARKS.
Sec. 11.46.270.	UNLAWFUL POSSESSION.

Against these two Alaska criminal statutes--AS 11.46.-985 and AS 11.81.900(b)(44)--and their effect upon other Alaska criminal statutes one can juxtapose the nearest thing to a "model" law on computer crime. It is contained in a 1979 report of the Standing Committee on Security, Privacy and Confidentiality of the National Association for State Information Systems. The re-

port, called "Guidelines for Development of Computer Crime Legislation" has been referred to earlier in this section and is Appendix N.

This sample law, modeled after the Florida Computer Crimes Act, Fla. Stat. Ann., §§ 815.01--815.07 (West Supp.), is a suitable prototype for Alaska, assuming, after a study of the foregoing report, a finding by the legislature that there is a need in Alaska for legislation making crimes of

(1) misconduct involving the intellectual property that is in a computer (like confidential or secret information) or used with a computer (like a program),

(2) misconduct involving computer equipment or supplies (damaging, sealing, modifying it),

(3) misconduct involving computer usage.

The model (NASIS) act makes separate crimes of misconduct in these three areas.

It is the tentative view of the code revision commission that a statute like the NASIS sample is desirable to fill gaps in Alaska's criminal law. However, this report has not yet been circulated. We believe the report will best serve a useful purpose if it leaves questions open until more persons actively involved in the subject areas of the report have been heard from.

Should the legislature so direct, the code revision commission can circulate the report for review and written comment during the interim between sessions and provide what is received to an appropriate committee of the legislature as it convenes in 1984.

It is likely, too, that more helpful material on computer crime will become available during the interim. Due late in the summer or in early fall is a report being prepared by Jay BloomBecker, Director of the National Center for Computer Crime Data, for the U.S. Senate Judiciary Committee. It will

list the experience of the various states with their computer crime statutes, and should be relevant to Alaska's legislative decision-making. The studies being done for the U.S. House Judiciary Committee, earlier referred to, may also be completed before the second session of our Thirteenth Legislature. Legislatures, state and national, are feeling their way. As more evidence comes in, we will provide it.

Introduced: 1/18/83
Referred: State Affairs and
Judiciary

BY THE RULES COMMITTEE BY
REQUEST OF THE LEGISLATIVE
COUNCIL (for the Blue
Ribbon Commission on the
State Personnel Act)

SENATE BILL NO. 59

3

IN THE LEGISLATURE OF THE STATE OF ALASKA

4

THIRTEENTH LEGISLATURE - FIRST SESSION

5

A BILL

6

For an Act entitled: "An Act relating to government interests in intellec-
7 tual work products developed at the expense of the
8 state."

8

9

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

10

* Section 1. AS 39 is amended by adding a new chapter to read:

11

CHAPTER 52. INTELLECTUAL PROPERTY DEVELOPED

12

AT THE EXPENSE OF THE STATE.

13

Sec. 39.52.010. RIGHT TO PATENTABLE INVENTIONS (a) Except

14

as provided in AS 39.52.040 and AS 14.40.345, all right, title, and
15 interest in and to an intellectual work product of any kind that is
16 subject to the trademark, copyright, or patent laws of the United
17 States or this state or any foreign country that is developed by a
18 public officer or employee or a person under contract with the state
in the capacity of Research
EMPLOYER DO RESEARCH. is the property of the state if developed

18

19

(1) during working hours;

20

(2) with the contribution of the state beyond what is

21

available to the public in general in the form of facilities, equip-
22 ment, materials, money, or information, or of time or services of
23 another public officer or employee in the course of state employment
24 or another person under contract with the state; or

23

24

25

26

(3) in connection with the official duties of the public
27 officer or employee or the person under contract, including but not

27

28

limited to circumstances in which the public officer or employee or
29 the person is employed or assigned to

29

- 1 (A) produce or improve an intellectual work product;
- 2 (B) conduct or perform research, development work, or
- 3 both;
- 4 (C) supervise, direct, coordinate, or review state
- 5 financed or conducted research, development work, or both; or
- 6 (D) act in a liaison capacity among governmental or
- 7 nongovernmental agencies or individuals engaged in such work.
- 8 (b) If a public officer or employee or a person under contract
- 9 with the state develops an intellectual work product that is the
- 10 property of the state, the developer is obligated to
- 11 (1) fully and promptly disclose the intellectual work
- 12 product to the Alaska Council on Science and Technology (AS 44.21.-
- 13 241); *(or supervisor),*
- 14 (2) assign to the state the ~~entire~~ right, title, and inter-
- 15 est in and to the intellectual work product if not already waived by
- 16 signing of a general waiver upon commencement of employment in accor-
- 17 dance with AS 39.05.160 or as part of a contract for services; and
- 18 (3) upon request by the council, execute and reasonably
- 19 assist in the prosecution of an application for a trademark, copy-
- 20 right, or patent.
- 21 (c) If the state has a right to an intellectual work product
- 22 under (a) of this section but the council decides that it is inadvis-
- 23 able to prosecute an application for trademark, copyright, or patent,
- 24 the council, on behalf of the state, may, after consultation with
- 25 affected state agencies,
- 26 (1) waive all right, title, and interest in and to the
- 27 intellectual work product; or
- 28 (2) waive all right, title, and interest in and to a trade-
- 29 mark, copyright, or patent but reserve a nonexclusive, irrevocable,

1 royalty-free license in the intellectual work product with power to
2 grant licenses for all governmental purposes.

3 Sec. 39.52.020. COUNCIL AUTHORIZED TO GRANT MONETARY RECOGNITION
4 FOR CREATION OF INTELLECTUAL WORK PRODUCT. (a) The council is autho-
5 rized to give monetary recognition to a public officer or employee who
6 develops an intellectual work product that is the property of the
7 state and who discharges the obligations set out in AS 39.52.010.

8 (b) The council shall determine the guidelines, terms, and
9 conditions, as well as amount, source, distribution, and manner of
10 payments under (a) of this section. The council shall consider the
11 actual or potential value of the intellectual work product in terms of
12 revenue or reduced operating costs to the state.

13 Sec. 39.52.030. ARBITRATION OF DISAGREEMENTS. (a) Disagree-
14 ments between a public officer or employee or a person under contract
15 with the state and the council pertaining to ownership of an intellec-
16 tual work product or obligations of the respective parties shall be
17 disposed of by

18 (1) voluntary arbitration of all relevant issues, if the
19 disagreeing parties agree to be bound by the decision upon arbitra-
20 tion;

21 (2) compulsory arbitration if that is provided for in any
22 applicable contract between the disagreeing parties; or

23 (3) recourse to the court if arbitration cannot be resorted
24 to.

25 (b) The council is authorized to make contracts for compulsory
26 arbitration on behalf of the state.

27 (c) If arbitration is used to settle disagreements, the provi-
28 sions of AS 09.43 (Uniform Arbitration Act) shall govern.

29 Sec. 39.52.040. EXCEPTIONS. The provisions of this chapter do
