MEMORANDUM

April 4, 1989

TO: Rep. Dave Doniey

FM Rep. Red Boucher
Chairman, Subcommittee on Solid Waste Utilities

RE: Comments on Minority Report of March 30, 1989

This is a critique of the three points raised in the Minority Report that purport to rebutt the Majority Report of March 23, 1989.

The first point deals with whether or not A.S. 42.05.720 (4)(F) is intended to include solid waste utilities within the APUC's regulatory scheme. The minority report suggests that the APUC should be left to its own determination of legislative intent despite the clear language in the statute:

"utility includes every corporation...that owns, operates, manages or controls any plant or system for (F) furnishing collection and disposal service for garbage, refuse, trash or other waste material;

Despite this unambiguous citation (which should be read in conjunction with AS 42.05.221(a)) the minority report would have us believe that regulation of waste utilities is somehow a new twist of interpretation. The objective situation testifies that waste utilities have been regulated since the statute went into effect... regulation is the status quo. To contend that deregulation is the intent of the statute when deregulation is the result of having no statute at all is ridiculous.

As to whether or not a legal opinion should be sought as to the intent of the statute, the legislature is its own and the ultimate arbiter of legislative intent. Also, the language and facts are too clear to ask for a legal opinion when there is no purpose other than fishing for obtuse angles for debate.

The second point of rebuttal in the minority report involves whether or not prospective competitors in a deregulated market are concerned about economies of scale. The minority misses the point. It is not whether prospective competitors are concerned about economies of scale; the point is that the advantages of scale are good for the public because the public pays less for a utility service that is a compulsory cost to citizens about which they do not have a choice to spend or not to spend. Our society deems it prudent not to have competition and redundant investment in utility services where costs are mandated to the public. That is the rationale for regulation.

The third point in the minority report is that public health and environment are not the concerns of APUC. The reality of the situation is that protection of public health, safety and environment costs money and requires investment in expensive trucks, incinerators and a related equipment. Utilities are deserving of a return on their investment which must be part of their rate base and tariff structure approved by the APUC. Public and environmental health are an integral part of the "Standards of Service and Facilities" requirements of the APUC statute (A.S. 42.05.291). To suggest that inspections by OSHA, Health and Social Services or DEC are a substitute for regulatory, economic incentives that have worked in the U.S. for more than a hundred years is a misreading of regulatory powers.

*Draft LHC
Resolution*

Alaska State Legislature

House of Representatives
COMMITTEE ON STATE AFFAIRS

March 23, 1989

TO: Rep. Dave Donley
Chairman, Committee on Labor and Commerce

FM: Rep. H.A. "Red" Boucher
Rep. Loren Leman
Rep. Ann Spohnholz

RE: Subcommittee on Solid Waste Utilities

The Subcommittee on Solid Waste Utilities has met to consider two questions.

I. Should solid waste utilities be deregulated by the APUC.

II. Should the Committee introduce legislation regulating recovery and recycling of solid waste.

Regarding Question I, the subcommittee has reviewed the past and current record on the issue of deregulating refuse utilities. Appendix One to this memorandum contains the legislative history of bills introduced in the eleventh legislature. There is no bill in the current legislature concerning deregulation of refuse utilities.

In addition, the subcommittee members met with representatives of the refuse industry, and also with Susan Knowles of the APUC, to ascertain their views on this issue.

The subcommittee has concluded that current statute requires the APUC to regulate refuse utilities (A.S. 42.05.720(F)). The fact that the legislature has considered and declined to change the statute affirms the prescribed public policy for APUC to follow.

The subcommittee is disconcerted by information from the refuse utilities that the APUC is de facto deregulating refuse utilities by encouraging applicants to apply for "certificates of public convenience

and necessity" in areas where existing refuse utilities are operating. This practice is not in conformance with the statute and should be changed in favor of stricter regulation.

The subcommittee's conclusion in favor of strict regulation is based on traditional economic theory of regulation that holds that the public interest is best served by allowing economies of scale to accumulate for capital and operational cost recovery. In exchange for the preferred monopolistic position enjoyed by most utilities, they are regulated in order to prevent public abuse in the form of excessive profits and substandard or discriminatory service. The practice of regulation saves the public from inconstancy that is the by-product of competitive markets. Regulation of utilities is especially applicable in thin markets, like most Alaskan communities, that need reliable service from fundamental utilities.

In addition, the subcommittee is persuaded that regulation of refuse utilities is necessary to protect public health and the environment. The commonplace occurrence of hazardous waste and toxic substances in our communities requires, in the opinion of this subcommittee, a measure of control and planning that can be achieved only by regulation. Issues regarding waste products and disposal methods are of increasing urgency in communities throughout the country. These issues deserve to be scrutinized more rather than less in order to preserve public health and the aesthetic values cherished in most Alaskan communities.

For the aforementioned reasons the subcommittee recommends that a letter of legislative intent be attached to HB 72 (APUC sunset bill) that reaffirms APUC's statutory mandate to regulate refuse utilities until the legislature chooses to change the statute. Suggested language follows:

The legislature finds that the APUC's practice of regulation of refuse utilities as required under A.S. 42.05.720 is inconsistent with that statute. It is the intent of the legislature that APUC should strictly regulate refuse utilities consistent with A.S. 42.05. 720.

Regarding the second question, i. e., should the Committee sponsor legislation requiring regulation of solid waste recovery and/or recycling. The subcommittee is of the opinion that the merits of the proposed legislation, Appendix Two, cannot be satisfactorily determined without public hearings. Consequently, the subcommittee supports introduction of the legislation so that public process will be available to determine its viability.

DATE: March 30, 1989

SUBJ: COMPETITION IN WASTE COLLECTION/DISPOSAL

After consideration of the presentation made by the subcommittee chairman, representatives of the monopoly providers, and meeting with the Chairman of the Alaska Public Utilities Commission (APUC), I find that I do not concur with the recommendation made by a majority of the subcommittee.

There are five principal reasons for this divergence in opinion.

(1) The APUC has reviewed the situation and has come to the conclusion that this is an industry that does not require monopoly to serve the public interest.

AS 42.05.720(4F) notwithstanding, the APUC believes they have the authority to initiate the limited competition they have authorized. I agree.

(2) Allowing citizens the economic freedom to compete does not repeal or restrict health and safety regulations. I am not aware of evidence to support the contention that monopolies have a better compliance record with health and safety regulations than do competing businesses.

(3) The current monopolists largely began as "Mom & Pop" operations collecting refuse. The gate should not be shut for the "Mom & Pops" of the 1990s--those who are willing to accept the challenges of free competition.

(4) The public is better served by having the freedom to choose. With competition, the businesses will have to take the consumers into account in ways a monopolist may be able to ignore.

(5) Remote areas will be better served by competition. Competing firms have an incentive to innovate. A protected monopolist has little incentive to innovate. The presumption should be to allow the competing enterprise an opportunity to provide the service. If some areas remain unserved that the Legislature believes should be served, corrective action could be taken. The right of Alaskans to compete should be honored.

Alaska State Legislature

HOUSE OF REPRESENTATIVES

Official Business

P.O. Box V
State Capitol
Juneau, Alaska 998

CONSIDERATION OF THE MAJORITY REPORT

POINT #1: "The subcommittee has concluded that current statute requires the APUC to regulate refuse utilities (AS 42.05.720(4F)). The fact that the legislature has considered and declined to change the statute affirms the prescribed public policy for the APUC to follow."

REBUTTAL: The APUC is proceeding with a form of deregulation they believe they are authorized to implement. In fact, the failure of the Legislature to pass legislation prohibiting the APUC from pursuing deregulation may actually represent tacit approval of the APUC's actions. Additionally, no legal opinions were presented that substantiated the subcommittee's interpretation of AS 42.05.720(4F).

In fact, the majority report of the subcommittee suggests the need for additional intent language.

POINT #2: "The subcommittee's conclusion in favor of strict regulation is based on traditional economic theory of regulation that holds that the public interest is best served by allowing economies of scale to accumulate for capital and operational cost recovery."

REBUTTAL: The fact that others desire to compete indicates they do not share the monopolists concerns with respect to economies of scale. The situation is that those already largely capitalized and who enjoy monopoly are asking for protection, while those seeking entry into the market without guarantees are not dissuaded by traditional economic theory.

POINT #3: "The subcommittee is persuaded that regulation of refuse utilities is necessary to protect public health and the environment."

REBUTTAL: APUC is responsible for economic and service regulation. APUC deregulation should have no effect on health and safety concerns monitored by other agencies of the state.

I concur with the recommendation of the subcommittee with respect to the second question, i.e., should the Committee sponsor legislation requiring solid waste recovery and/or recycling.

FILE

February 3, 1989

~~Handwritten scribbles~~

The Honorable Dave Donley
Chairman
Labor and Commerce Committee
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

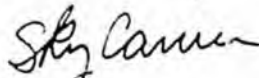

In addition to operating a refuse disposal utility on the Kenai Peninsula, I serve as President of the Alaska Refuse Utilities Association. Our Association is comprised of the state's major refuse utilities with membership in every major Alaska community.

We anticipate that the issue of deregulating refuse may come before your Committee in the near future, particularly if the sunset audit report prepared by the Division of Legislative Audit follows previous recommendations made by the Division's staff. However, until the Division's report is finalized and brought before your Committee--and the Division's recommendations are made public--it is the association's position that it is premature to take any legislative action on the refuse issue. For that reason we have not requested the Committee to address some of the legislative proposals the Association would like to see enacted into law.

We would, however, like to let you know of our interest in discussing several of the Association's legislative proposals

with either the full Committee, or a Subcommittee which has been given the responsibility of reviewing the full spectrum of public policy concerns regarding refuse disposal. We believe there are compelling policy reasons for leaving APUC regulation of refuse in place. However, we also believe there are improvements which can be made to the present statutory framework which will provide continued protection to the ratepaying consumer and to the environment, while at the same time lifting much of the current self-inflicted workload which has developed at the APUC regarding refuse docket. Therefore, we request the opportunity to appear before the Committee to discuss refuse deregulation whenever you believe it would be appropriate. Thank you for your consideration of this request.

Sincerely,

Sky Carver
President

Alaska Refuse utilities Association

P.O. Box 1209
Soldotna, AK 99669

Dear Members:

Attached to this letter is a synopsis of the hearing time expended by the Alaska Public Utility Commission on refuse matters between January 1, 1983 and December 31, 1988. These numbers were calculated using transcript times, estimations of time on matters that this office was involved in and estimating the number of Commissioners at each proceeding. Our few estimates are conservative.

An evaluation of the attached analysis shows that the Commissioners spend a total of 76 hours of hearing time on certification matters and 28 hours of hearing time on rate matters. When computing the actual number of hours spent in total by members of the commission it is necessary to multiple the number of hearing hour times the number of commission participants at the hearing. This results in 142 hearing hours total spent by all Commissioners and the Hearing Officer on certification matters and 37 hearing hours total spent by all Commissioners and the Hearing Officer on rate matters.

Left out of this analysis is the number of hours spent by staff on refuse matters, and Commissioners and Hearing Officers hearing preparation time, travel time and post hearing activity time. It is my belief that the staff has not spent much time with respect to certification matters except for the initial Mat-Su Docket U-83-8 and writing of some recommendations on other dockets. I do not believe they actually participated with counsel in any certification matter except U-83-8. The staff spends considerable time analyzing rate filings. We have not yet found a way to determine the amount of time spent by staff on rate matters. We do know that staff apparently had one person assigned to rate matters for refuse cases but we do not believe that all of his time was or should have been spent on refuse rate matters. Further analysis of this subject may be necessary to complete the picture of the time spent by the Commission on rate matters in refuse proceedings.

CHANNEL CORPORATIONS

CHANNEL SANITATION CORPORATION
CHANNEL EQUIPMENT RENTAL INCORPORATED
CHANNEL LANDFILL, INC.

March 30, 1989

Representative Dave Donley
Chairman House Labor and Commerce Committee
PO Box V
Juneau, AK 99811

Dear Representative Donley:

The APUC is attempting to get through the Legislature a Bill to deregulate the garbage business. As a member of the Alaska Refuse Haulers Association, we are opposed to deregulation for several reasons.

Financially, deregulation would drastically effect the quality of service. Operators would not be able to afford to buy quality equipment nor would they be able to obtain financing for decent equipment without any guarantee of income. There certainly wouldn't be any incentive to make an investment like Channel Sanitation has made.

There would be less incentive to recycle because the market would be so divided there would be no real volumes to make it economically feasible to recycle.

As it stands now, DEC and EPA know who the haulers of all waste material are including hazardous wastes. If there were three to four times the number of haulers, they would have less control of how these wastes were being handled. More seriously, the location of where they were being dumped. Deregulation would cause a lot more illegal dumping and litter as the haulers would be trying to cut all expenses in order to compete. The litter problem would increase because there would be companies hauling in all types of vehicles that wouldn't have the capacity to contain the garbage.

Letter to Rep. Donley
March 30, 1989

PROPOSED COMMITTEE LEGISLATION - HOUSE LABOR AND COMMERCE

HCR _____ - Relating to regulation of solid waste by

the A.P.U.C. (Draft prepared by HB 72
Subcommittee on Solid Waste -
Rep. Spohnholz, Chair)

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS, AS 42.05 requires that the furnishing of services to collect and dispose of garbage, refuse, trash or other waste material be regulated as a public utility for the purpose of accomplishing efficient, timely, safe, healthy, and environmentally sound handling of garbage and assuring that potentially hazardous garbage and waste is handled in a manner that promotes and protects the public health and environment;

WHEREAS the Legislature has not changed the statute regarding regulation of collection and disposal of garbage, waste, trash and other waste materials;

WHEREAS, without legislative authority, the Alaska Public Utility Commission's practice has tended to deregulate the collection and disposal of garbage, refuse, trash or other waste material and the Alaska Public Utilities Commission has decided that it is not in the public interest to regulate the number of providers of such service; and

WHEREAS, there are increasing environmental risks associated with the disposal of garbage, refuse, trash or waste material and there is only beginning to evolve a technology to adequately deal with the risks, and

WHEREAS, the Legislature believes that the Alaska Public Utilities Commission shall follow AS 42.05 with respect to the

regulation of the collection and disposal of garbage, refuse, trash or other waste material such regulation shall be carried out under traditional public utility standards.

BE IT RESOLVED by the Alaska State Legislature that it is in the public interest to continue the regulation of services for collection and disposal of garbage, refuse, trash and other waste materials, that the Alaska Public Utilities Commission shall regulate the collection and disposal of garbage, refuse, trash or other waste material as it regulates other traditional public utility services.

IN THE LEGISLATURE OF THE STATE OF ALASKA

4

SIXTEENTH LEGISLATURE - SECOND SESSION

5

Relating to persons immigrating to and

6

requesting asylum in the United States.

7

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

8

WHEREAS the Eastern Bloc countries of Hungary, Poland, East Germany,

9

the Union of Soviet Socialist Republics, Czechoslovakia, Bulgaria, and

10

Romania are moving away from communism towards democracy; and

11

WHEREAS some individuals from these countries have requested political

12

asylum and freedom in the United States; and

13

WHEREAS the change from communism towards democracy in the Eastern

14

Bloc countries is being considered by the Immigration and Naturalization

15

Service when it evaluates the political asylum applications of persons from

16

the Eastern Bloc countries, and this approach may prevent some persons from

17

receiving asylum in the United States because they may not be considered to

18

need political asylum any more; and

19

WHEREAS elements of the military, police, and leadership in some of

20

the Eastern Bloc countries still remain under the control of communist

21

authorities and, if applications for political asylum from these countries

22

are denied, the applicants fear persecution by the communist-controlled

23

elements after they are deported from the United States; and

Alaska House of Representatives

January 29, 1990

To: Rep. Red Boucher, Chairman
House State Affairs Committee

From: Rep. Terry Martin *T.M.*

Subject: HJR 63 - Immigration and asylum in U.S.

Thank you for scheduling HJR 63 for a committee hearing. I think, given the gravity of the situation in which a number of Polish immigrants find themselves, that time is of the essence in this particular case.

As you may know, as many as 152 Polish and Soviet seamen have in the past two years defected throughout Alaska and requested asylum. These men (and one woman) have been awaiting the granting of asylum, and have in the meantime been processed by the Immigration and Naturalization Service (INS), have obtained work permits and have become assimilated into the Alaskan community. And, because of the pride of these people, all are working, and none has applied for public assistance.

Now, however, because of the apparent changes taking place in Poland and other Eastern European countries, the U.S. State Department has determined that persons seeking asylum from those countries are no longer qualified. And their directive denying asylum is retroactive for the past 18 months. Although INS is not obliged to obey the State Dept. directive, they are following it in this case, and have begun proceedings against approximately 84 of those immigrants living in Alaska, with the intention of deporting them back to Poland and Russia.

I hope the committee will act expeditiously on HJR 63, so that we may positively effect the lives of the immigrants. In light of the Federal administration's recent action to allow the Chinese students to remain in America, I think it only reasonable to allow the Poles and Russians who so desire to stay in Alaska.

Also, in regard to the L&C referral, I would request that the committee remove the first WHEREAS clause occurring on the second page, so that the referral might be waived.

Thank you again for your timely consideration of this issue.

requesting asylum in the United States.

7

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

8

WHEREAS the Eastern Bloc countries of Hungary, Poland, East Germany,

9

the Union of Soviet Socialist Republics, Czechoslovakia, Bulgaria, and

10

Romania are moving away from communism towards democracy; and

11

WHEREAS some individuals from these countries have requested political

12

asylum and freedom in the United States; and

13

WHEREAS the change from communism towards democracy in the Eastern

14

Bloc countries is being considered by the Immigration and Naturalization

15

Service when it evaluates the political asylum applications of persons from

16

the Eastern Bloc countries, and this approach may prevent some persons from

17

receiving asylum in the United States because they may not be considered to

18

need political asylum any more; and

19

WHEREAS elements of the military, police, and leadership in some of

20

the Eastern Bloc countries still remain under the control of communist

21

authorities and, if applications for political asylum from these countries

22

are denied, the applicants fear persecution by the communist-controlled

23

elements after they are deported from the United States; and

24

WHEREAS, although the Alaska State Legislature supports glasnost and

Subject: HJR 63 - Immigration and asylum in U.S.

Thank you for scheduling HJR 63 for a committee hearing. I think, given the gravity of the situation in which a number of Polish immigrants find themselves, that time is of the essence in this particular case.

As you may know, as many as 152 Polish and Soviet seamen have in the past two years defected throughout Alaska and requested asylum. These men (and one woman) have been awaiting the granting of asylum, and have in the meantime been processed by the Immigration and Naturalization Service (INS), have obtained work permits and have become assimilated into the Alaskan community. And, because of the pride of these people, all are working, and none has applied for public assistance.

Now, however, because of the apparent changes taking place in Poland and other Eastern European countries, the U.S. State Department has determined that persons seeking asylum from those countries are no longer qualified. And their directive denying asylum is retroactive for the past 18 months. Although INS is not obliged to obey the State Dept. directive, they are following it in this case, and have begun proceedings against approximately 84 of those immigrants living in Alaska, with the intention of deporting them back to Poland and Russia.

I hope the committee will act expeditiously on HJR 63, so that we may positively effect the lives of the immigrants. In light of the Federal administration's recent action to allow the Chinese students to remain in America, I think it only reasonable to allow the Poles and Russians who so desire to stay in Alaska.

Also, in regard to the L&C referral, I would request that the committee remove the first WHEREAS clause occurring on the second page, so that the referral might be waived.

Thank you again for your timely consideration of this issue.

POMS CONCERNING HJR 63 - IMMIGRATION & ASYLUM

"I think these men would be a great asset to our community. They are all honest and hard-working people. I think they took a big chance in coming to the United States, leaving their families just to get freedom. I feel they should have freedom. I have friends and family in Poland who say things haven't changed there one bit."

- Kathy Cowitz, Box 771435, Eagle River 99577 694-5054

"I feel that the Polish seamen have the right to remain in the United States, as long as they have no criminal record. They are an asset to our community, as they are hard workers. They will work on jobs that Americans will not take. Thus I feel that they are not taking jobs away from anyone. Please remember that at one time all of us were not U.S. citizens, and they have a right to be free too. Please make a fair decision."

- Karen Ayers, 16510 Centerfield Dr, Eagle River 694-7587

"Things are seldom what they seem. Polish immigrants now under threat of deportation are fearful for their families in their lives. Some threaten suicide to stay in this country forever. They wonder why we don't believe them. Please let them stay."

"I would like HJR 63 to pass especially for the Polish people. They have been living here, working, paying taxes and many have been warned by family that things are not as they seem. I think it is unfair to send back working people who pay taxes when there are so many in this country who have immigrated to this country and are now living off the welfare rolls."

- Diana Robbins, 3209 Baxter #3, Anch. 99504 563-6363

"We want the Polish people to stay in Alaska that want to and not be deported."

- Ruth & Joseph Chmielowski, 168 Burton #B, Anch 746-1337

"In regard to the 150 Polish immigrants currently in Anchorage seeking asylum. I believe they should be assisted in every way possible to remain in the United States. These people would be an asset to our society because of their honest, sincere working drive to be true Americans. Thank you."

- Melinda Padgett, 9210 Elgin Circle, Anch 99515 248-7701

"I want the Polish defectors to stay here in Anchorage."

- Marie McEntire, 6400 E 15th Ct #4, Anch 99504 333-7754

"I strongly urge you to allow the refugees that are now in Anchorage from Poland and the Soviet Union to remain."

- Jerry Rutoski, Box 220503, Anch 99522

"Complete passage [of HJR 63] as written by Terry Martin and also the release of Senator Pat Rodey's gun amendment to be enacted. For the gun amendment issue I am the National Director for the No Compromise Majority."

- Mark Chryson, Box 142702, Anch 99514 333-6744

"I am concerned about the Polish fishermen's deportation. I am a citizen, also Polish, and I think they are not abusing hospitality of this government because they are not costing us through any of our programs. They are hard workers and don't ask for welfare. All help they receive comes from Poland. I think it would be to our advantage to let them stay. The main power in Poland is still communist."

- Jan Kluska, 7736 Snowview Dr, Anch 99507 349-5956

"Please allow the Polish seamen who have applied for asylum in 1989 to remain in the United States. We were in Poland in July of 1989, and saw what they are afraid to go back to. Anything you can do on their behalf is greatly appreciated. We are currently housing 3 of the seamen in our home, and would be greatly distressed by their deportation."

- Dennis Draper, 3703 Westminster Way, Anch 99508 338-3486

"I was in the same situation a few years back. Now I am a U.S. citizen and I am proud. I think that if the other Polish fishermen are let in the United States, they will also be a citizen like me. They are hard workers and will build a future for a good Alaska."

- John Rybczynski, 3840 Young St., Anch 99508 563-3192

"Easterners and Mexicans far outnumber the few Polish defectors in this country, so why is Immigration sending 60 of them from Anchorage back to Poland? They are very hard workers, and very nice. Also, most of them are fishermen, and so are not taking jobs away from American men because American men don't care to work so hard for such small wages. Many of these men are still afraid to return to Poland."

- Vera Johnson, 635 W 45th Ave Apt 3, Anch 99503 265-8880

Where Oh Where Has the Labor Gone?

By Marie Duncan

During the Christmas holidays it is not uncommon to see a help wanted sign in a store window. However, what is uncommon, is gazing at help wanted signs from the early summer months through Christmas and even into the new year.

Two years ago the Alaska job market was filled with an abundant supply of labor. Now, with the changes in Alaska's economy, we face a potential lack of labor. State Labor Economists Neal Fried and Holly Stinson, recently surveyed 100 Alaskan business owners. Nearly half reported a shortage of job seekers.

During the recession many Alaskan's left the state. Job seekers between the ages of 18-25 have left due to better opportunities in the Lower 48. Most serious job seekers are looking for fulltime, permanent positions with benefits such as insurance and employee discounts.

Due to a rising cost in training and general business needs, many employers can only afford to hire part-time employees. Most of Alaska is filled with small business owners.

Even the large businesses have felt a crunch in the labor force.

There are many factors in calculating the cost of employee turnover. First, you must begin with the empty seat, more commonly known as time lost by not having the person there. Hiring costs increase when you place an ad in the newspaper or a sign in the window. On an average, the cost of interviewing, hiring and training costs a business anywhere between 30 to 120% of the new hire's annual rate of pay. This raises to higher levels depending in the new hire's skill level.

There are many objectives to solve this problem and will vary with each employer. Higher wages are the first step. Increasing wages entices the new hire to want to work and periodic raises increase the motivation to stay. Also, Christmas bonuses are a great motivation. Benefits such as insurance, and paid vacation time entice the employee to stay. Many large companies offer stock programs. Often times these programs are limited to a certain few who have been with the company three or more years. A few employers are now offering on-site child care.

Once the new employee is hired and training begins, added stress is placed upon the employer and the employee. This stress can be reduced by a pre-planned training program. Most businesses aren't aware of the time that can be saved by planning ahead. By giving the new employee a "New Hire Packet" they have the opportunity to prepare for their first day in a more comfortable setting. The packet can include such things as job description, business hours, a brief overview of the business, and dress code. By creating a positive impression between the employer and the employee, he or she is less likely to quit. Also, by reducing stress in the work force, you increase productivity.

These are just a few of the things that help in molding a loyal employee. The labor force in Alaska has not held the upper hand for the past two years. However, by increasing the motivational skills of the available work force, we can move ahead.

Job satisfaction in the new decade of the 90s will depend on the employers and how they plan on marketing their individual businesses.

ALASKA ECONOMIC

TRENDS

November
1987

The Military and
Alaska's Economy

Federal Government
Occupations in
Alaska

Alaska's
Employment
Scene

Federal Agency Employment in Alaska

case, such as the Public Health Service, the Bureau of Indian Affairs Schools, and the Alaska Railroad, the federal government has relinquished control of these programs to either private nonprofit corporations or the State of Alaska.

It is important to remember that the federal employment numbers, if not carefully examined, can overstate the total employment lost to Alaska's economy. In addition, the military related civilian employment has been increasing over this period so that total federal employment has remained stable.

A good portion of the nonmilitary federal employment lost has been picked up by either private nonprofits or the State of Alaska. Whether it be

through contracting out or paring support staff the overall trend has been clear, there has been steadily less nonmilitary federal employment in Alaska during the last five years with just a few agencies bucking the overall trend.

It seems that those agencies which have cut their staffs do not expect any more drastic staff reductions in the next several years with the possible exception of the Forest Service. On the other hand, those agencies which have been in the growth mode for the last several years are not expecting to increase as rapidly as they have been during the past five years. This points to a stabilization of federal employment at somewhere close to 1986's level with some agencies growing and others shrinking.

Recent economic events and a general unsteadiness in the world economy have put pressure on the Administration to cut the federal deficit to steady the economy. This could mean that all agencies will be asked to reexamine their budgets and try to pare away more employment. In that case the expectations for the next few years could change significantly. In some areas of federal employment though, such as the Federal Aviation Administration, there seems to be growing public sentiment to find money to fund these agencies. In any case while the future of federal government employment in Alaska looks steady at this writing, it could change on a moments notice.

The Military and Alaska's Economy

By Neal Fried and Greg Huff

George Rogers, a noted Alaskan economist, once wrote that "by the 50s and 60s Alaska had become primarily an 'exporter' of military defense" . . . and that the military had become "the major industry in the state." It seems strange that the military would be considered an "industry" or an "exporter of defense," but in essence that is what the military in Alaska does. It exports defense to the rest of the nation. In return, Alaska receives economic benefits from the military in a variety of ways, from the paychecks spent in the local economy to payments to local businesses that supply goods and services to the military and to contractors building and repairing the military's infrastructure.

The economic benefits from the military's presence have been great and indeed the military was "the major industry in Alaska during the 1950s and 1960s." The military's economic might has declined since that time but still provides a solid economic foundation. During the early 1980s the impacts of the military on the Alaskan economy were obscured by the flood of oil dollars that ignited our economy into a period of unprecedented growth but by 1986 the rapid growth came to a screeching halt and the military was again in the limelight.

The military in Alaska has considerably more economic clout than in most states. For example, the number of active duty personnel and the amount of defense expenditures on a per capita basis are far higher in Alaska than in most other states. In this article we will explore the military's influence on Alaska's population and economy.

The Military Population in Alaska 1980-1987

In 1980 the military accounted for 15.7% of Alaska's population. While the military population gradually increased during the early 1980s, the nonmilitary population in Alaska grew so rapidly that by 1985 the military represented only 12.5% of Alaska's population.

The military in Alaska has considerably more economic clout than in most states.

² Figures estimated from data in Impacts of Military Spending on the Economy of Alaska, Fiscal Years 1980 to 1986, from Alaska Air Command and data from Alaska Department of Labor. A ratio of 1.28 dependents for every military civilian was formulated from these sources.

³ Alaska Department of Labor, R&A Demographics, unpublished 1987 data. Aleutian Islands figure estimated because it was not available at time of publication.

⁴ Alaska Department of Labor, ES-202 files.

By 1987, Alaska's recession had prompted people to leave Alaska in search of work. At a time when more people were leaving Alaska than arriving, the military population continued to increase. By 1987 the military accounted for 13.4% of the forecast 537,080 people living in Alaska. This includes 23,000+ active duty personnel plus their 30,000 dependents and 8,000+ civil service personnel (Table 1).

At a time when more people were leaving Alaska than arriving, the military population continued to increase.

The military in Alaska is represented by the Air Force, Army, and Navy and are all organized under the Department of Defense (DOD). The Coast Guard is organized under the Department of Transportation, but provides many defense related services and impacts a local economy in a fashion similar to that of the DOD agencies. Hence, the Coast Guard will be included in the military figures unless specifically noted that the data is not available. The Army's Corps of Engineers and the Army and Air National Guard work force figures are also included in the total military figures

Figure 1
Military Labor Force by Type of Service
1980 and 1986

In 1980 the Air Force was Alaska's largest military service.

presented in this article (full-time active duty and civil service only).

In 1980 the Air Force was Alaska's largest military service, representing over 41% of the military's active duty and civil service personnel. This share increased to over 44% by 1986, due to a 12% increase in its work force and a decline in the number of Army active duty personnel over the period. The six year decline in the number of Army active duty personnel ended with the deployment of the 6th Light Infantry Division in Alaska in 1987. The deployment helped boost the number of Army active duty personnel by nearly 1,000 from year ago levels.

There were shifts in the relative work force figures among Alaska's "smaller" services as well (Figure 1). From 1980 to 1986 the National Guard, Navy, and Army Corps of Engineers increased their proportion of the total military work force as the Coast Guard share declined. This does not reflect a drastic cut back in Coast Guard personnel, but rather significant growth in the Corps of Engineers and National Guard civil service work force and the Navy's active duty work force.

The Corps of Engineers' civilian work force increased by 50% from 1980 to 1986, to over 550 (97% of the Corps work force is civilian). The National Guard full-time work force, both civilian and active duty personnel,

doubled over the period. The number of Navy active duty personnel (including the Marines) has increased by one-third as its presence in the North Pacific intensifies.

Some of the increase in the National Guard's share of the military work force is attributable to the reclassification of certain active duty guardsman to full-time. There is a clear trend of expanding the guard and reserve by the military because it is cost effective. In late 1987 it was announced that the Alaska National Guard work force would increase by several hundred over the next year.

An important trend in the military work force data is the decrease in the ratio of active duty to civilian employees. For example, in 1980 there were 3.4 active duty personnel for each civilian employee. By 1986 this ratio had fallen to 2.8. The number of civilian personnel rose from 6,676 in 1980 to 8,240 in 1986, an increase of 23% (Table 1). Preliminary data for 1987 shows military civilian employment growth continued into 1987 but at a slower pace. The increase in the number of civilians is a trend consistent with the military's increased practice of hiring civilians to do work that in the past was done by active duty personnel.

Military Payrolls

The military exerts its financial influence on the state in a number of

² Retirement payroll was not available until FFY 1985 and was not included in totals

ways. Military personnel spend part of their paychecks locally, they purchase goods and supplies in the local market, and they employ local contractors for many projects. These funds flow into the economy and either directly or indirectly support thousands of jobs in Alaska.

A study by the Institute of Social and Economic Research shows that the military from 1980 to 1983 accounted for 15% to 17% of all jobs in Alaska. It is likely that this contribution was several percentage points higher in 1987, particularly in light of defense expenditure increases during a period when other sectors were reducing expenditures. From Federal Fiscal Year (FFY) 1983 (October 1982 to September 1983) through FFY 1986 total military expenditures increased by over \$200 million dollars to \$1.5 billion (Table 2) and significant increases were expected in FFY 1987.

The largest and most direct economic benefit Alaska receives from the military is through its payroll. During FFY 1986 the payroll totalled \$733 million and the military estimates that 86% of its payroll is spent in Alaska. Although military personnel may spend a high proportion of their paychecks in Alaska the amount that actually reaches the local economy is less given the self-sufficient nature of military operations.

Many goods and services of the active duty personnel and their dependents are either provided for or can be purchased at discount at the military postal exchanges (PX's) and commissaries. Housing, medical care, child care, and a variety of other services are provided by the military. This insulation factor is greater at remote and isolated installations than at urban installations.

In an urban setting the economy receives the benefit of the incidental spending made by the active duty personnel and their dependents. They may not buy the bulk of their groceries at the local grocery store but they do purchase odds and ends, buy gasoline, go to movies, and engage in many other activities that require spending part of their paycheck.

On a per capita basis the military's civilian employees provide more eco-

nomie stimulus to the local economy than the active duty personnel. The civilians working on base are not usually given the many benefits received by active duty personnel and their dependents, hence more of their paycheck is spent in the local economy. In addition their paychecks are greater. In 1986 the average earnings of \$31,000 of a military civilian employee was over \$10,000 more than the average earnings of active duty personnel.

One major benefit received by active duty personnel that offsets the higher earnings of the civilians is off-base housing assistance. This benefit pumps millions of dollars into local housing markets. In Anchorage, for example, it has been estimated that 39% of the active duty personnel lived off base in May of 1987. They

Military from 1980 to 1983 accounted for 15% to 17% of all jobs in Alaska.

received from between \$797 to \$1,417 a month in housing assistance, depending upon rank. In Fairbanks approximately 30% of active duty personnel live off base. In Kodiak the most current figures show that 312 out of the 1,000 active duty Coast Guard live in off base housing.

Military Construction

Military construction projects impact the Alaska economy in a variety of ways depending upon type of construction, but it is estimated by the military that 50% of the total construction budget is spent in Alaska. The amount that actually circulates through the local economy is probably less because the contractors or the suppliers of construction goods usually buy materials from outside sources.

Still, the military's construction projects inject millions of dollars into the economy. The primary input to the Alaskan economy is the utilization of Alaskan workers that spend wages locally. From FFY 1980 to FFY 1986 construction expenditure in Alaska increased twofold, peaking at \$240 million in 1985.

Military expenditures for operations and maintenance at their facilities have a greater impact on the local economy than does construction expenditures. Not only is the budget larger, but a higher proportion of the money is distributed into the local economy. Generally, the purchase of services by the military has a greater impact on the local economy than does the purchase of goods. Services are likely to be provided locally whereas goods are usually produced and/or purchased outside of Alaska. The military estimates that 72% of the operations and maintenance expenditures are spent locally. In FFY 1986 that amounted to over \$350 million.

Geographic Distribution

From Coast Guard stations in Ketchikan to Distant Early Warning (DEW) sites on the North Slope the military has over 50 installations located across the state. Many have no permanent crew, others are remote and isolated, and some are only staffed by a handful to a couple hundred personnel. Only a relative few have larger concentrations of military personnel.

Generally the larger the installation the larger the surrounding community. Of the 14 installations in 1987 having 100 or more personnel, four contain three-quarters of Alaska's active duty personnel (Table 3) and an even greater share of military's civilian workforce and military's dependent population (Figure 2). The two largest of the installations, Elmendorf Air Force Base (AFB) and Fort Richardson, are located in Anchorage, and the third and fourth largest, Eielson AFB and Fort Wainwright, are located in Fairbanks.

Anchorage is home of the Alaskan Air Command which serves as the senior military organization in the state and is headquartered at Elmendorf AFB. In 1987, 6,700 active duty personnel were stationed at Elmendorf—the highest count in the 1980s. The number of soldiers stationed at Fort Richardson totaled 4,860 in 1987, up 360 from 1986. This is the highest recorded level in the 1980s.

The military's civilian workforce also reached new highs in 1987. Over a

Figure 2
Military Population: Active Duty, Civilian and Dependents¹ for Selected Areas of Alaska 1987

seven year period the number of military civilian service jobs increased from 4,290 to 5,119. The most recent military workforce increases in Anchorage were in response to several

events, but most prominent were the activation of 962nd Airborne Warning and Control Squadron (AWACS) in 1984 and the arrival of a new F-15 squadron, and the deployment of the 6th Light Infantry Division in 1987.

The military installations located in Fairbanks support a quarter of Alaska's military population and contain over one-fifth of Fairbanks' population. The deployment of the 6th Light Infantry Division had the largest impact on Fort Wainwright and the Fairbanks area. Though the division was activated in 1986, the impacts on the active duty personnel level at Ft. Wainwright were not realized until 1987 when the ranks increased by 570.

Fort Greely, south of Fairbanks in the Southeast Fairbanks Census Area is the Army's third largest fort in the state. The deployment of the Light Infantry Division has not impacted the personnel levels at Fort Greely. The levels of active duty and military civilian personnel have been stable for the past six years. Overall, the

military accounts for nearly 2,000 people in the area (Table 3), which represents 32% of the area's population.

The Adak Naval Station on remote Adak Island, far out in the Aleutian chain, is Alaska's fifth largest military installation. Since the Navy's recent build-up in the Northern Pacific its work force has increased by over 30% from 1980 to 1987. The big increases occurred when the Navy reactivated a full anti-submarine warfare aircraft squadron and an aircraft intermediate maintenance department in 1985. When the military population on Adak is combined with the military population of Shemya AFB near Attu (8th largest military installation in the state) the military accounts for over 55% of the population in the Aleutian Island Census Area.

Kodiak is home to Alaska's sixth largest military installation and largest U.S. Coast Guard installation in Alaska. In fact, it is the largest Coast Guard station in the nation. In 1987 over 20% of Kodiak's population was directly related to the Coast Guard—1,000 active duty, 230 civilian personnel and 1,400 (active duty) dependents. The number of active duty personnel has fluctuated from a high of 1,097 in 1983 to a low of 921 the following year. The number of civil service employees totaled 230 in 1987, down from nearly 300 in 1980.

Additional areas with a significant amount of Coast Guard personnel are Ketchikan, Juneau and Sitka—the 11th, 12th and 13th largest military installations in Alaska. In 1986 the Juneau Coast Guard station workforce was reduced by nearly 100 active duty personnel when the USCGC Planetree was relocated to Ketchikan. This transfer reduced the Coast Guard workforce by one-third in Juneau and increased Ketchikan's by 80%.

Other military installations with 100 or more personnel are Galena (9th largest) and Clear AFB (13th largest) in Alaska's Yukon-Koyukuk Census Area and at King Salmon (10th largest) in the Aleutian Islands Census Area. These Air Force installations house first line defense Air Force Squadrons. Personnel levels in the Yukon-Koyukuk Census Area peaked in 1982 at 647 and by 1987 had fallen to 430. Elimination of positions at the

various DEW sites located throughout the area have been the primary cause of declines.

Impacts of military installations and related spending on a regional or local economy vary considerably. Overall, the impacts of the military are greatest in the urban areas of the state because the remote bases have a greater self sufficiency factor. The communities that appear to benefit the greatest from the military presence in Alaska are Fairbanks, Kodiak, and Anchorage (Table 4).

³ Change in military expenditures from 1980 to 1986 are mostly due to how Department of Defense Procurement Contract Awards through the Coast Guard were recorded.

⁴ 1986 military expenditures included \$75 million in Procurement contract awards.

(Note: these total expenditures do not match those in table 2 because non-appropriated and most Coast Guard funds are not included).

**Predicting the
Pentagon's next move
in Alaska is virtually an
impossible task.**

in Alaska is virtually an impossible task. Some analysts predict that mounting federal deficits will eventually inhibit the Defense Department's ability to grow. Other analysts believe that Alaska is again becoming a location of growing strategic importance because of the Soviet Union's expanding presence in the Pacific, insuring future defense expansion in the state. Notwithstanding this type of speculation, there are a number of projects the Defense Department already has planned which will impact the state's economy.

The deployment of the 6th Light Infantry Division at Fort Wainwright near Fairbanks is the single largest undertaking. Although the activation of the brigade began this year, the deployment will not be completed until 1992. An additional 3,564 soldiers and 300 civil service jobs will be in place at Fort Wainwright, and an additional 300 uniformed personnel will be deployed at Fort Richardson in Anchorage by 1992.

Construction activity on Fort Wainwright will accompany the deployment of the brigade. The Fairbanks North Star Borough's Community Research Center estimates the construction work force will reach 585 in 1988 and peak at 755 in 1989. The Center has also estimated that deployment of the division will create an additional 1490 direct and indirect nonmilitary jobs in Fairbanks by 1992.

The deployment of the division will reverse the diminishing military role in Fairbanks; bringing the area's total military strength up to levels of the late 1960s and early 1970s. But its relative importance to Fairbanks' economy will not reach historical levels because the local economy has broadened considerably since the discovery of oil in Prudhoe Bay.

Another sizeable military undertaking will be the construction and operation of a \$450 million over-the-horizon backscatter radar system. This radar will give the Air Force the ability to provide long-range surveillance of aircraft and missiles. Construction of the radar will take place in the vicinity of the Interior communities of Tok (the receiver site) and Gulkana (the transmitter site). Road work is planned for 1988 with a peak

construction work force of 350 by 1989-1990. The project is expected to go into operation by 1992. Approximately 60 operations personnel will be stationed in both Gulkana and Tok (30 civilians and 30 military personnel). An additional 315 people will operate the backscatter's operational center at Elmendorf AFB (expected to be mostly military personnel).

New radar systems in Alaska do not end with the backscatter; major work is being performed on two other systems. Alaska's DEW line (Defense Early Warning System) is being modernized. Seven of the 31 DEW line sites are located in Alaska. The total cost of the project, which includes the sites in Canada, is \$1.65 billion. The project is expected to be completed by 1992 with fewer personnel needed to run the sites. Presently the majority of these personnel are private contract workers.

On Amchitka Island, in the Aleutians, the Navy is building an over-the-horizon backscatter radar. Work began on the Amchitka radar in May, and presently the work force on this project has reached 140. The completion date is expected to be the summer of 1988.

In addition to Adak, the number of Navy ships visiting Alaska ports has been on the increase. Over the past two years there have been numerous unsubstantiated rumors in a number of communities that the Navy is planning to establish a new naval station in Alaska. What might lend more credence to these rumors now is the fact that Alaska's Senator Stevens announced that he had invited the Navy to assess any potential new home ports in Alaska for Navy vessels. The Navy toured the state in late October. Ketchikan has also been mentioned for the location of a submarine test facility.

On the down side the Kodiak Coast Guard Station may be experiencing major personnel changes during the next three to six months which will result in some cutbacks in staffing. A contract will be awarded soon to take over the maintenance of the station. Up to now, 220 uniformed and civil service personnel (almost equal in number) performed this work. The affected Coast Guard personnel will be reassigned to new positions in Kodiak

Sources: U.S. Department of Commerce, Bureau of Census, Federal Expenditures by State for Fiscal Year 1986. Statistical Abstract of the United States, 1987.

Note: Active duty military data is based on Federal Fiscal Year 1985.

or to other facilities, and some of the civilians may be hired by the contractor, but they expect there will be a net loss in positions. The savings to the military will be primarily in the form of lower wages and benefits. The impact to the economy is unclear but local spending should increase since the contractor's employees will not receive the benefit of the military commissary and other support.

Projecting military activities is a particular challenge because neither the state's nor the nation's economy dictates future trends as much as national and international politics. Budgets from one year to the next are never assured but given the military's intentions as presented above, its presence in Alaska will undoubtedly grow during the next two to three years. The deployment of the Light Infantry Division in Fairbanks alone guarantees this and other evidence suggests a growing military presence. In some industries such as construction, defense related projects may represent the major impetus for growth. In communities such as Fair-

In 1986 military retirement benefits paid to Alaskans totaled \$58 million.

banks, Tok and Gulkana the military presence may mean the difference between a shrinking or growing economy.

A National Comparison

In defense dollars received by states in FFY 1986, Alaska ranks only 36th but given our population base, the military's presence in Alaska is one of the most prominent in the nation. There is one active duty military person for every 175 people in the nation, compared to a ratio of 26 people for every active duty military person in Alaska. Alaska is second only to Hawaii in the number of soldiers on a per capita basis.

The level of expenditures clearly illustrates how pervasive the military's presence is in Alaska. Defense dollars per capita spent in Alaska are over twice as high as the national average, fourth highest among states. Alaska is fifth highest when ranking the value of procurement contracts on a per capita basis, although Alaska manufactures little or no military hardware. Military procurement in Alaska represents only the amount spent to provide supplies, services and construction.

For wages and salaries paid by the Department of Defense the numbers become more striking. Including uniformed and military civilians, Alaska receives four times the amount in wages and salaries on a per capita basis as the national average—\$525 versus \$127. The proportionately larger military presence explains most of the difference but cost of living adjustments for military civil service workers and the active duty personnel provides an additional boost to Alaska's wages. Federal civil service workers in Alaska receive a tax free 25% cost of living adjustment and the uniformed soldiers receive a cost of living adjustment which varies according to their rank.

Even after the military personnel leave the service, a portion of their retirement and disability dollars continues to be spent in the economy. In 1986 military retirement benefits paid to Alaskans totaled \$58 million, which represents \$108 for every Alaskan. This figure is 49% higher than the national average and puts

Alaska in tenth place among the states.

Between 1980 and 1985 the number of uniformed military in Alaska and the nation has grown a little less than 1%, while the civilian military work force has not been quite as stagnant. Alaska's military civilian work force grew slightly more rapidly than the nation's, 14% versus 12%. Defense expenditures in the nation have grown slightly faster than in Alaska, growing 48% compared to 41% in Alaska. (These figures represent FFY 1981-1986 and are not adjusted for inflation). This trend could be reversed in the near future because of planned defense expenditures in the state.

Conclusion

Since Alaska "exports defense" to the rest of the nation it in turn receives economic benefits from the military through the millions of dollars in wages and other expenditures in the state. Although the military's economic might in the 1980s is not what it was in the 1950s and 1960s, its influence was on the increase by the mid 1980s.

Impacts of military installations on a regional or local economy vary considerably, but overall, the impacts are greatest in the urban areas of the state because the remote bases have a greater self-sufficiency factor, which insulates it from the local economy. Hence, the communities that appear to benefit the greatest from the military in Alaska are Fairbanks, Kodiak and Anchorage, where over three-quarters of the military's population is located.

In 1987, the military accounted for over 13% of Alaska's population. This represented some 62,000 people located in over 50 installations from Ketchikan to Barrow. Of these, 14 installations had 100 or more personnel with the largest located in Anchorage, Fairbanks, Adak, and Kodiak.

While other economic factors were on the decline the military population and expenditures were on the increase. Because of Alaska's strategic location it is likely that the military's economic influence will continue to increase through the decade.

ADAK NAS AIRCRAFT DIRECT REFUELING STATION

Project No: N62474-88-C-4380

BID DATE: February 6, 1990 at 2:00 PM

Location: ADAK NAS, AK

Owner: U S NAVY

Description: Furnish labor, mat'l & equip to install an aviation fuel distribution sys w/welded pressure piping; pumps & control valve sitework; control house; cast-in-place & precast concrete; various metal fabrications; elect'l work such as interior wiring sys, pad mounted transformers & exterior lighting & incidental related work. Scope: Between \$1 & \$5 million

Plans/Specs: NAVAL FACIL ENGRG COMMAND CONTRACTS
OFFICER IN CHARGE NW AREA, PO BOX 2360
3505 NW ANDERSON HILL RD, SILVERDALE, WA 98383-2360
(206) 476-2600
CHARGE UNKNOWN

A.G.C. No: 9001049

Planholders: 90/04

Addendum:

1. Consists of 1 volume & drawings.

2. Verbal Adden. Extended Bid Date to 2/6/90.

SHEMYA AFB ADAL AIRCRAFT SUPPORT EQUIPMENT SHOP

Project No: DACA85-90-B-0008

BID DATE: February 8, 1990 at 1:00 PM

Location: SHEMYA AFB, AK

Owner: U.S. ARMY ENGINEERS

Description: Alter a 2,800 s.f. bldg & const a 6,400 s.f. addition. Addition consists of precast concrete walls & metal roof. Heating, plbg, ventilation, elect'l power & lighting, fire sprinkler sys, asphalt paving, site excav & grading included. Also remove fuel contaminated soils & asbestos. Scope: Between \$1 & \$5 million

AGC OF ALASKA

THE FULL SERVICE CONSTRUCTION ASSOCIATION

AGC of Alaska is a voluntary, non-profit association for contractors which was founded in 1948. Besides the weekly "Alaska Bulletin"; AGC of Alaska offers its members monthly membership luncheons with speakers discussing current construction issues, health insurance at group rates, educational seminars, an open shop pension plan, contract documents, safety instruction, and other services too numerous to mention.

AGC of Alaska provides the construction industry with year-round lobbying and liaison with owners and regulators. AGC also provides education and training services, and scholarships to college students. Most of all AGC of Alaska offers an opportunity for you to get involved in Alaska's construction industry.

There are four classifications of membership in AGC of Alaska: General Contractor, Provisional General Contractor, Subcontractor, and Associate. Dues for General Contractors are a minimum of \$1,000.00 plus assessments based on volume. Provisional General Contractors pay \$1,000.00 in dues with no volume dues assessment. (This category is available for one year only to general contractors who have never been AGC of Alaska members.) Subcontractor and Associate annual Chapter dues are \$375.00, with an optional membership in National AGC for an additional \$100.00.

The AGC of Alaska Bulletin is published weekly by Associated General Contractors of Alaska, 4041 "B" Street, Anchorage, AK 99503. The Bulletin is provided free to all AGC of Alaska members and may not be copied or reused without the written permission of AGC of Alaska.

Please call David Means, Business Manager at 907-225-2118, or write to the Ketchikan Gateway Borough School District, Pouch Z, Ketchikan, Alaska 99901, for a detailed request for proposals.

All requests for proposal must be received by February 21, 1990.

RFP - STATE OF ALASKA DOT&PF KETCHIKAN TERMINAL BLDG #75010

The State of Alaska, Department of Transportation and Public Facilities, Alaska Marine Highway System, intends to negotiate a Professional Services Agreement for the design of a new Terminal Building in Ketchikan, Alaska.

The selected firm will provide architectural and engineering services to prepare a Plans, Specifications and Estimate (P.S. & E.) package suitable for competitive bidding. Existing "standard" terminal building plans and specifications will be updated and adapted to the Ketchikan site.

Request for Proposal (RFP) and Proposal Forms for this project may be obtained by calling (907) 364-4287.

The selection process will involve a committee evaluation of interested firm's submittals consisting of the Department's Project Proposal Form as prepared for this project, and any other materials which may be solicited therein.

Submittals must be received by 2:00 p.m. prevailing time, February 14, 1990 at the office of the Alaska Department of Transportation and Public Facilities.
