SPONSOR STATEMENT

SENATE BILL 219

The concept of Senate Bill 219, relating to birth certificates, is to commemorate the birth of a child while at the same time contributing to the fight against child abuse and neglect.

Under the provisions of this legislation, parents would be able to purchase a specially designed birth certificate to commemorate the birth of their child. This would be in addition to the birth certificate which the Bureau of Vital Statistics presently issues.

These heirloom birth certificates would cost \$25 and would be printed on special paper and would be suitable for framing.

The intent of the legislation is that the revenue generated from the sale of these certificates would be appropriated from the general fund into the Alaska Children's Trust Fund which was established - but not funded - last year to aid in the prevention of child abuse and neglect.

Similar programs have been adopted in Washington, Oregon, and Minnesota.

SB 219 Fiscal Note (Analysis)

Oregon has four years experience with a similar program. Oregon averages approximately 40,000 live births per year. In the first year of the program Oregon issued 1100 displayable certificates. Oregon is currently issuing approximately 600 displayable certificates per year.

Assuming that Alaska (12,000 live births per year) will have experience similar to Oregon we will issue 360 certificates in the first year and then drop off to 180 per year.

Cost of Service Estimate:

Oregon

charge for displayable certificate	\$25.00
cost of service	\$12.00
pass through to child service agencies	\$13.00

Minnesota (new program 6 mo experience)

charge for displayable certificate	\$25.00
cost of service	\$10.00
pass through to children's trust fund	\$15.00

Alaska (estimate)

charge for displayable certificate	\$25.00
cost of service	\$ 9.25
normal certificate processing	\$5.00
calligraphy (contract)	\$1.50
printing, mailing tubes, & postage	\$2.75

Projections:

	volume	revenues (000) (volume x \$25)	costs (000) (volume x \$9.25)
1st year	360	\$9.0	\$3.4
2nd-5th years	180	\$4.5	\$1.7

RESOLUTION 89-02

SUBJECT: Support of SB 222

WHEREAS, the Surgeon General has concluded that:

- (1) involuntary smoking is a cause of disease, including lung cancer, in healthy nonsmokers;
- (2) the children of parents who smoke have an increased frequency of respiratory infections, increased respiratory symptoms, and smaller rates of increase in lung function as the lung matures; and
- (3) the simple separation of smokers and nonsmokers within the same air space may reduce, but does not eliminate, the exposure of nonsmokers to environmental tobacco smoke; and

WHEREAS, tobacco smoke contains about 4,000 chemicals, including 200 known poisons such as DDT, arsenic, formaldehyde and carbon monoxide; and

WHEREAS, the existing smoking in public places law in the State of Alaska does not adequately protect nonsmokers from the known hazards of second hand smoke; therefore

BE IT RESOLVED THAT, the Alaska State Medical Association supports strengthening Alaska's smoking in public places law through the passage of SB 222 or a similar measure, in order to protect the health of Alaskans statewide.

MEMORANDUM

TO: Senator Paul Fischer, Chairman
Senate HESS Committee

FROM: Senator Jan Faiks, Chairman
Senate Judiciary Committee

SUBJECT: SB 222 "An Act relating to smoking in certain
vehicles and indoor places."

Senate Bill 222 has been referred to the Senate HESS Committee for consideration. This bill amends Alaska law relating to smoking in certain public places. It was introduced at the request of the American Lung Association of Alaska, as part of their Tobacco Free Alaska 2000 program.

At the present time, approximately 26% of Americans over the age of 16 smoke cigarettes. Alaskans smoke at a rate 5% greater than the national rate.

According to the Surgeon General, cigarette smoking is the single most important environmental factor contributing to premature mortality in the United States. Each year, smoking causes the deaths of more than 300,000 Americans, principally from heart disease, cancer and chronic obstructive lung disease. In 1985, there were estimated to be 261 smoking attributable deaths in Alaska. This was 14% of the state's mortality that year. The estimated total for medical care due to smoking in Alaska in 1985 was \$52.8 million. This does not take into account lost wages due to illness, or losses to employers because of increased insurance premiums and absenteeism.

The tremendous social harms caused directly or indirectly by cigarette smoking cannot be disputed. In an effort to

encourage people not to smoke, and to protect the health and well being of non-smokers who must breathe secondary smoke, many jurisdictions including Alaska have enacted laws restricting smoking in public places.

At the present time, 42 states and the District of Columbia restrict smoking in some manner in public places. These laws range from simple, limited prohibitions to comprehensive clean indoor air laws that limit or ban smoking in virtually all public places. Alaska's law was enacted in 1984, and was predicated on the following legislative findings:

1. numerous studies have shown second-hand smoke to be a significant health hazard;
2. recent court decisions recognize an emerging right of employees to work in a smoke-free environment; and
3. smoking results in increased costs to employers and the public in the form of more frequent absenteeism by employees who smoke and higher costs for health insurance, fire insurance, life insurance and workers' compensation.

In order to address these findings, current law specifies certain public places and vehicles in which smoking is regulated. In these specified places, smoking and non-smoking areas must be designated. Signs must be posted to accomplish this. Persons who violate the requirement to post signs or who smoke in a designated non-smoking area are subject to civil penalties.

SB 222 revises current law by establishing two categories of public place: those in which smoking is regulated, as with current law, and those in which smoking is absolutely prohibited. The bill takes many of the places currently on the regulated smoking list and moves them to the new smoking prohibited list. It adds several types of places not currently mentioned in the law to the regulated smoking list. It provides that a person in charge of a place on the regulated smoking list may not designate the entire place as a smoking area. Finally, it provides that a person in charge of a place on the regulated smoking list must consider only the health of non-smokers in designating a smoking area, and not the convenience of smokers. A sectional analysis of the bill is attached.

SB 222 will close loopholes in the current law, and more adequately address the findings contained in the 1984 legislation. It protects the health of non-smokers, the prime duty of government in this area. It moves us one step closer to a smoke-free Alaska. I urge the committee to schedule this bill at its earliest convenience. Thank you.

SECTIONAL ANALYSIS

SB 222

Section 1. Makes changes to AS 18.35.300, which lists vehicles and places in which smoking must be regulated by the designation of smoking and non-smoking areas. New places added to this list include the following:

- an interstate aircraft flight;
- a commercial establishment whose premises are open to the general public, including a retail store, a financial institution and a shopping mall; and
- correctional facilities.

A number of places currently on this list are deleted, and moved to new AS 18.35.305, which prohibits any smoking (see section 2).

Section 2. Adds new AS 18.35.305, which lists places in which smoking is absolutely prohibited. These places include the following:

- a place of employment, a building or other structure, or portion of them, owned, leased, or operated by the state or a political subdivision of the state, including an office, library, museum, theater, concert hall, convention hall, gymnasium, swimming pool, or other place of entertainment or recreation. Not included are correctional facilities, a court room, a jury deliberation room, or a Pioneers' Home;
- a public or private school, pre-school, or day care facility. If the school or day care facility is in a private residence, then the prohibition only applies during the hours when the residence is being used as a school or day care facility;
- a room, chamber, or other place under the control of the state or a political subdivision of the state while a public meeting or public assembly is in progress; and
- a public or private laboratory or office associated with dental care, health care, or the healing arts, and a public or private hospital, or other nonresidential health care institution or facility; and
- an elevator.

Sections 4 and 5. Makes a technical change to AS 18.35.310, to provide that smoking on stage as part of a theatrical production is not prohibited by new AS 18.35.305.

Section 5. Amends AS 18.35.320(c). Current law provides that in designating a smoking area, a person shall accommodate the needs of smokers and non-smokers. This section provides that in designating a smoking area, a person shall only consider the health consequences to the non-smokers using the facility.

Further, current law does not specifically prohibit a person in charge of a facility in which smoking is regulated from designating the entire place as a smoking area. This section provides that the entire facility may not be designated as a smoking area, except for tobacco shops.

Sections 6 - 13. These sections make technical changes to the current law to reflect the addition of new AS 18.35.305.

Section 14. Repeals AS 18.35.320(b), which gives the Rules Committees of the Legislature the authority to designate smoking and non-smoking areas in facilities used by the respective houses.

Dear Senator Fischer,

One hundred-fifty Alaskans will die from lung cancer this year. The sad fact is that most of these deaths could have been prevented. Nationally 155,000 new cases of lung cancer are estimated, while we expect 142,000 deaths this year alone.

If the death of the 142,000 were expected to be due to firearms, aircraft, or other device or conveyance we could look forward to considerable legislative outcry for increased safety or restrictions thereon. Most lung cancers are caused by cigarette smoking. Cigarette smoking is also a major risk factor in cancers of the bladder, oral cavity, and the pancreas. Cigarette smoking.

What good comes from cigarette smoking? The only advantages are those that can be said for the growers and distributors of opiates, cocaine or marijuana, an economic shot in the arm devoid of morality or ethics.

The death of the 142,000 could, for the most part, have been prevented by the elimination of cigarette smoking. It would seem to me, therefore, that we have an ethical debt to these 142,000 and the 139,000 that died in 1988, not to mention those of the preceding years. That ethical debt is simply to stop this insane waste of human life.

We can apparently proceed only a small step at a time in this endeavor to do what is morally correct. Two small steps that seem at least minimally necessary are HB 80 and SB 222. I feel that it is very important that we proceed positively on these bills this session. They have my full support and I think that they should have yours.

Sincerely,

AMENDMENT

BY Faiks

* Section 6. AS 18.35.330(a) is amended to read:

Sec. 18.35.330. DISPLAY OF SMOKING AND NO SMOKING SIGNS.
(a) A person in charge of a place or vehicle described in AS 18.35.300 or 18.35.305, except a limousine for hire or taxicab, shall conspicuously display in the place or vehicle a sign that reads "Smoking Prohibited by Law - Maximum Fine \$50" and that includes the international symbol for no smoking.

Renumber subsequent sections accordingly

To provide clarification, we would recommend revision of AS 18.35.300 (7) and AS 18.35.320 (c) as follows:

AS 18.35.300 (7)

(7) any portion of a commercial facility or business whose premises are open to the general public, including a retail store, financial institution, or shopping mall; and

AS 18.35.320 (c)

(c) A person who designates a smoking section under this section shall make reasonable accommodations to protect the health of the [FOR THE NEEDS OF THE SMOKERS AND] nonsmokers who use the place or vehicle by separation, partition or ventilation to ensure that nonsmokers are not subject to the active by-products of second-hand smoke. In instances, where no accommodation is possible, the concerns of the nonsmoker must be given priority.

ok ✓
Page 1, line 20-24 (subsection 3): Do not delete this wording. Let the employer designate smoking and non-smoking areas as provided under AS 18.35.310.

Justification: Small towns may only have one theatre, library, museum, state building, etc. If you ban smoking in that building it would discourage participation of the townspeople who do smoke. Under section 6 (page 4), the person in charge can still designate non-smoking areas, or even ban smoking in the building. By leaving this language as it is, there would still be an option.

Page 2, line 6: Delete "or other", insert "adult day care facility and"
Delete "institution," insert "institution,"

Page 2, line 25 -26 (subsection 2): Change language to read: "a public or private ELEMENTARY OR SECONDARY school, preschool, or CHILDREN'S day care facility; if the school, preschool, or CHILDREN'S day care facility is in a"

Justification: Want to make sure smoking is prohibited in elementary or secondary schools. Universities and/or trade schools are usually attended by adults and, therefore, should not be in this category. Also, we specified the day care facilities to be children's day care facilities

Page 4, line 4-10: Delete: "If accommodation to protect the health of the nonsmoker is not possible with these methods, the person in charge of the area shall accord higher priority to protecting the health of nonsmokers than to accommodating smokers. The person in charge of an indoor place that is open to the general public may not designate the entire place as a smoking area."

Justification: If you leave this language in it would mean that if any non-smoker complained that "the accommodation for non-smokers is not sufficient," then the proprietor must "accord higher priority to protecting the health of nonsmokers," this may mean closing the door to smokers. This should not be a state mandate, it should be mandated by the individual business--let their economics motivate the change. A proprietor already has the right to make the establishment a non-smoking establishment.
