

ALASKA LEGISLATURE COMMITTEE FILES 1991-1992 8672
7673 SENATE RESOURCES

January 15, 1992

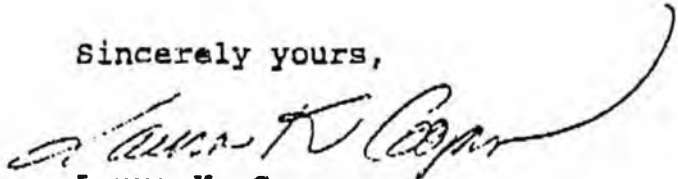

Mr. Rick Lauber, Chairman
North Pacific Fisheries Management Council
P.O. Box 103136
Anchorage, Alaska 99510

Dear Mr. Lauber:

Please find attached a copy of a petition with hundreds of signatures collected in Seldovia, Kake, Wrangell, Nelson Lagoon, Petersburg, Cordova and other Alaskan coastal communities asking the Council to rescind the current IFQ plan in favor of a more conservation oriented and equitable method of fisheries management.

These signatures were collected in less than two weeks over the holidays, and reflect great concern on the part of the coastal communities as to the Council's recent actions.

Sincerely yours,

Laura K. Cooper
North Pacific Fisheries
Protection Association

LKC:gmc

STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on us and our communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We oppose the North Pacific Fisheries Management Council's IFQ plan and demand that they rescind it in favor of a more equitable and conservation-oriented method of fisheries management!

The North Pacific Fisheries Protection Association - 6610 Fremont Avenue N. Seattle, WA 98103
or P.O. Box 202893, Anchorage, AK 99520

In coalition with:

Alaskans for Responsible Resource Management, Kodiak, AK
Committee Opposed to IFQs, Homer, AK
Coastal Families of Alaska, Kodiak, AK
South Central Alaskan Longline Enterprises, Seward, AK
Sitkans Organized Against Longline Genocide, Sitka, AK

STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on us and our communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We oppose the North Pacific Fisheries Management Council's IFQ plan and demand that they rescind it in favor of a more equitable and conservation-oriented method of fisheries management!

STOP IFQS

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on us and our communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We oppose the North Pacific Fisheries Management Council's IFQ plan and demand that they rescind it in favor of a more equitable and conservation-oriented method of fisheries management!

The North Pacific Fisheries Protection Association • 6616 Monticello Avenue N. Seattle, WA 98103
or P.O. Box 202895, Anchorage, AK 99520

In coalition with:

Alaskans for Responsible Resource Management, Kodiak, AK
Committee Opposed to IFQs, Homer, AK
Coastal Families of Alaska, Kodiak, AK
South Central Alaskan Longline Enterprises, Seward, AK
Sitkans Organized Against Longline Genocide, Sitka, AK

STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.
