# STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

8 ANCHORAGE, ALASKA  
9 AR NO. 91-267 (AS AMENDED)

Submitted by: Assemblymembers Abney  
and Barnett

Prepared by: Assembly Utility Budget  
Analyst

For reading: December 10, 1991

10 A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY URGING THE NORTH  
11 PACIFIC FISHERIES MANAGEMENT COUNCIL AND ALL OTHER AUTHORITIES TO  
12 RESCIND ITS VOTE TO IMPLEMENT THE IFQ PROGRAM TO APPROVE THE  
13 INDIVIDUAL TRANSFERABLE QUOTA SHARE PROGRAM FOR THE SABLEFISH AND  
14 HALIBUT FISHERIES UNTIL AN ECONOMIC IMPACT ANALYSIS OF THE PROGRAM  
15 ON THE MUNICIPALITY OF ANCHORAGE AND OTHER COMMUNITIES OF ALASKA  
16 IS COMPLETED AND SHARED WITH THE AFFECTED COMMUNITIES FOR THEIR  
17 CONSIDERATION AND COMMENT  
18

19  
20 WHEREAS, a number of traditional management proposals have been submitted to the  
21 North Pacific Fisheries Management Council which would potentially eliminate the problems that  
22 an Individual Fishery Quota (IFQ) would address; and  
23

24 WHEREAS, the Council's role and responsibility is to analyze all proposals on a given  
25 issue before implementing major changes to a fishery; and  
26

27 WHEREAS, analysis and implementation of traditional management proposals to address  
28 the problems have not even been reviewed prior to the proposed implementation of an IFQ  
29 System; and

30 WHEREAS, an IFQ System is going to take years to implement while the fisheries need  
31 extensive traditional management changes not short-term improved management; and  
32

33 WHEREAS, the ability to participate in multiple fisheries and adapt to changing economic  
34 and resource conditions are vital characteristics of the Alaska fishing industry; and  
35

36 WHEREAS, IFQ Systems under consideration provide much of the resource to be  
37 allocated to non-resident users, excluding disproportionate numbers of Alaska fishermen, of  
38 which over 500 abide in Anchorage, and preclude participation by the growing Alaska longline  
39 fishing fleet; and  
40

41 WHEREAS, IFQ Systems will deny the opportunity for residents of the Municipality of  
42 Anchorage and other Alaskan communities to fully diversify and maximize their fisheries creating  
43 financial hardships and creating economic impacts; and  
44

45 WHEREAS, IFQ Systems could accommodate offshore processors which will minimize  
46 the raw fish tax to Alaskan communities and the State.

3  
4  
5  
6 NOW, THEREFORE, the Anchorage Assembly resolves:

7  
8 Section 1: That the Alaska State Legislature and the Governor intercede on behalf of  
9 Alaska fishermen to prevent any negative economic impact or hardship on them and affected  
10 Alaska communities as a result of the IFQ System.

11  
12 Section 2: That the North Pacific Fishery Management Council rescind its vote to  
13 implement the IFQ Program, carefully scrutinize this proposal including its impact on Alaska  
14 fishermen and communities, and implement traditional management methods prior to any further  
15 discussion on an IFQ System.

16  
17 Section 3: That copies of this resolution be sent to Governor Walter J. Hickel, the North  
18 Pacific Fishery Management Council, Anchorage area Senators and Representatives, Senators  
19 Stevens and Murkowski, and Representative Young.

20  
21 PASSED AND APPROVED by the Anchorage Assembly this 10th day  
22 of December, 1991.

23  
24

January 9, 1991

Mr. Rick Lauber, Chairman  
North Pacific Fishery Management Council  
P.O. Box 103136  
Anchorage, Alaska 99510

Dear Mr. Lauber,

Please find attached a copy of a resolution passed by the Anchorage Assembly on January 7, 1991 rejecting IFQ, and a copy of a petition from the citizens of Anchorage containing more than 1000 signatures against IFQ. The signatures were collected in just over two weeks of effort during the Christmas and New year Holidays.

These actions are but a small measure of Anchorage Alaska's strong resolve to insure that any action taken by your council does not negatively impact Alaska's Fishing Industry. As you are well aware, Fishing is the second strongest component of Alaska's economy. Anchorage will protect this industry vigorously, and with great purpose, against those who would attempt to alter Alaska's interest in its adjacent waters.

Thank you for your attention.

Sincerely,

Ronald J. Kuczek  
Anchorage Alaska Representative  
for Alaskans Opposed to IFQ

We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

# STOP IFQS

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

# STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

# STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

# STOP IFQs

The North Pacific Fisheries Management Council has recently voted in favor of a system of fisheries management for sablefish and halibut known as Individual Fishing Quotas (IFQs). We, the concerned Citizens of Anchorage, feel that this system will concentrate a common property resource in the hands of a select few, and have a negative economic impact on Anchorage and our Alaskan Coastal Communities. We join the many people and communities who have questioned this scheme and now send this message to our elected state and federal representatives:

We, the concerned Citizens of Anchorage, oppose the Council's IFQ plan and demand that Governor Hickel directly intercede on behalf of the Alaskan Fishing Industry and its Alaskan Coastal Communities, including Anchorage, and direct the Alaskan Delegation of North Pacific Fisheries Management Council to rescind its vote in favor of a more equitable and conservation-oriented method of fisheries.

## Senator Lloyd Jones

Proposed CS for Senate Joint Resolution 40(RES)  
Relating to identified hydroelectric sites and energy transmission and  
surface transportation requirements for Southeast Alaska

### SPONSOR STATEMENT

The purpose of this resolution is to make a legislative statement emphasizing to the federal government that southeast Alaska has certain requirements for its economic future. And that transportation and utility corridors and potential hydroelectric site have a direct impact on economic development. Inexpensive power and efficient multi-modal transportation are vital for a promising economic future for Alaska's southeastern region. In order to accomplish this goal, an efficient and integrated system of distribution of energy and transportation is necessary.

Southeast Alaska now has many of the ingredients necessary for a positive economic future. The Alaska Marine Highway System and numerous hydroelectric facilities already serve to keep the region's economy moving. Yet, there are other opportunities to facilitate more economic prosperity. Among them would be an integration of the ferry system to the continental highway system. Highways linking Juneau, Wrangell and Ketchikan to the Canadian road system would provide additional access to Southeast Alaska via the marine highway. It would also promote more travel between the southern region of Yukon and northern British Columbia.

### TOURISM OPPORTUNITY

Highway links on the islands of Southeast Alaska would free up the ferry system from less profitable routes to serve the higher revenue generating routes. For example, a road link, nearly completed on Annette Island near Ketchikan, could pave the way to allow the smaller M/V Aurora to make travel more frequent trips between Hollis and Ketchikan in the winter months and to Hyder in the summer months. The residents of Metlakatla could travel more frequently and easily via automobile across the island to a ferry terminal at the northern tip of Annette Island and travel via a shuttle ferry to southern Ketchikan.

Early summer travelers who want to drive to Southeast, but who are prevented from traveling via Prince Rupert due to full ferry bookings could travel north to Juneau or Wrangell via the new roads. They then could return south on the ferry system through Ketchikan and Prince Rupert, effectively doubling the revenue the ferry system accrues during the lucrative early summer months. The net effect would bring more opportunity for travel and income from increased tourism.

#### SHARED ENERGY POTENTIAL

Energy transmission would be facilitated through the interconnection of the southeast power grid. At the moment the state-owned hydroelectric generation facility at Tyee Lake which serves Wrangell and Petersburg is operating at excess capacity. The excess energy is literally water spilled over the dam. It is state money going down the drain, so to speak, because the excess power cannot be used by the two small communities. The revenue earned by consumption in the two towns is mainly deposited into the state's general fund. Yet, Ketchikan and Sitka are nearly reaching their peak energy generation capacity. If there was a power grid reaching these two communities, there would be an overall surplus of energy available connecting Wrangell, Petersburg, Sitka and Ketchikan. The state would be earning full income from this project.

The state's Tyee hydro generation facility can easily be connected to Ketchikan in the near future. The right-of-way has been laid out. Yet, the U.S. Forest Service, as a result of the Tongass Timber Reform Act and the Tongass Land Management Revision is considering designating one of the principle energy transmission routes, as Scenic River under the National Wild and Scenic River System. While this does not in itself preclude a transmission line through the area - it makes its implementation much more difficult and expensive. This is what Congress and its agent, the Forest Service, continue to lay in the way of economic development in our region of the state.

#### HYDROELECTRIC POTENTIAL

There are many potential hydroelectric sites in southeast Alaska which will provide for the future growth in the region's economy. There is a concern that the Forest Service may put many of the potential sites in to a more restrictive category. This resolution requests that this not be done. There are sites which are identified that fall within wilderness areas; it is recognized that they would probably not be affected by this resolution.

#### HISTORICAL PERSPECTIVE

In 1987 and 1988 I asked several government agencies and private organizations to meet on a regular basis to draw up a transportation and utility corridor plan for southeast Alaska. The purpose was to develop a
