RE: Board of Directors meeting with Senate Health, Education, and Social Services Committee members

Dear Senator Green,

The Alaska Native Health Board will be holding our quarterly Board of Directors meeting in Juneau February 12-15, 1996, including joint meetings with the Alaska Area Native Health Service, the Alaska Department of Health and Social Services, and the Alaska Department of Environmental Conservation.

We would appreciate the opportunity to present information concerning statewide Alaska Native health priorities to members of the Senate HESS Committee. Thursday February 15 is our preference for a meeting. Please call at the earliest possible opportunity.

Thank you. Please accept our best wishes for a productive legislative session.

Sincerely,

Anne M. Walker
Executive Director

Alaska Native Health Board

February 12, 1996

Dear Legislator:

This publication provides information concerning the statewide legislative priorities identified by the Alaska Native Health Board for the 1996 session of the Alaska State Legislature.

The Alaska Native Health Board appreciates this opportunity to communicate these issues of great importance to the Alaska Native community. As an elected representative in the State legislature, you are in a position to accomplish a great deal for the residents of our state, including Alaska's over 100,000 indigenous people.

This year, rather than offer a wide variety of concerns, we have identified two significant areas as our top health priorities: water and sanitation services for rural communities, and increases in state tobacco taxes. We would like to work with you to further investigate the issues presented here and develop plans for improvements in state policy and services.

For further information on any material included in this publication please contact our Executive Director, Anne M. Walker.

Sincerely,

Lincoln Bean, Sr.
Chairman

VILLAGE WATER AND SANITATION

A. Rural village water and sanitation facilities construction

The Alaska Native Health Board has consistently considered safe drinking water and adequate sanitation to be one its highest working priorities. Sustained commitments from both federal and state sources are necessary to eliminate public health problems resulting from poor sanitation conditions in rural Alaska villages. The Indian Health Service estimates the total cost of constructing piped water and sewer services in all rural Alaska communities at nearly \$1 billion.

The Alaska Native Health Board has worked aggressively with the federal government to increase appropriations for rural Alaska water and sanitation through the Indian Health Service, the Environmental Protection Agency, the Department of Agriculture, and the Department of Housing and Urban Development.

Previous legislatures have demonstrated their commitment to providing state contributions through appropriations for community water and sanitation facility construction: FY1993-\$24 million, FY1994-\$26.5 million, FY1995-\$21.7 million, FY1996-\$21.5 million. The Alaska Native Health Board acknowledges these contributions.

Supplemental information included in this briefing booklet includes the 1996 update of the Indian Health Service Sanitation Deficiency System, which identifies project needs identified for Alaska Native communities statewide. This listing demonstrates the magnitude of the unmet needs for water and sanitation services in rural Alaska.

Over the past year, the Alaska Native Health Board and our Rural Alaska Sanitation Coalition have participated in the deliberations of the Governors Council on Rural Sanitation. *The Council formally recommended that the Governor request \$25 million in capital appropriations through the Village Safe Water program for rural sanitation for FY1997.* The Alaska Native Health Board encourages this legislature to demonstrate this level of commitment in the FY1997 capital appropriation.

B. Rural water and sanitation facility operations and maintenance

Lack of operations and maintenance resources for proper management of sanitation facilities in rural Alaska is a critical issue that must be addressed. Enhancement of operations and maintenance capacity is essential to prevent public health risks due to improper operation and to protect the investment of millions of dollars in facilities construction and rehabilitation. Several successful programs have been implemented to address this need over the past several years, including the establishment of the Remote Maintenance Workers (RMW), Rural Utility Business Advisors (RUBA), and operator training programs.

The Alaska Native Health Board strongly urges the Alaska State Legislature to support the appropriation of \$681,800 in State general funds to the Alaska Department of Environmental Conservation to continue nine Remote Maintenance Worker positions supporting 126 rural communities. We also endorse the ADEC proposals to continue two maintenance mechanic positions (\$160,000), training for utility managers and city administrators (\$15,000), and development of a utility management training manual (\$50,000). The Alaska Native Health Board also urges legislative approval of the Governor's proposal to increase the number of Rural Utility Business Advisors (RUBA) funded through the Department of Community and Regional Affairs to a total of four for FY1997.

This year the State of Alaska has a unique opportunity to develop a successful direct operation and maintenance program. Such a program would provide for operator and utility management financial support, improved preventive maintenance services, and community planning capacity.

The Environmental Protection Agency awarded the Alaska Native Health Board \$500,000 for a FY1996 project to provide operations and maintenance support to between 8-10 rural Alaska communities on a demonstration basis. Over 80 rural communities responded to our preliminary survey of interest in participating in this project, which requires a 50/50 matching contribution by the local community.

The Environmental Protection Agency has already committed \$1,000,000 for continuation of this project into FY1997 *contingent upon a matching contribution by the State of Alaska in the amount of \$250,000*. Such a consolidated approach would provide direct operations and maintenance support to upwards of 25 rural Alaska communities next year. The Governor's Council on Rural Sanitation recommended that the Governor include a \$250,000 appropriation in the proposed FY1997 ADEC budget for direct operations and maintenance support. The Alaska Native Health Board urges the Alaska State Legislature to approve this essential matching contribution .

C. Water and sanitation services for all village health clinics

The Alaska Native Health Board's vision is that by the year 2002 every village health clinic in rural Alaska will have piped water and sewage disposal. The State of Alaska has shared this commitment and, in FY1993 and FY1994, appropriated \$500,000 each year for the hookup of village clinics to community sanitation systems. No funds were appropriated in the FY1995 and FY1996 capital budget.

Since 1992 approximately fifteen (15) clinics have been connected and nine (9) are budgeted or in design/construction status. However, thirty (30) village clinics remain without current or planned sanitation services, requiring community health providers to work in substandard sanitary conditions. The average cost of hookups is approximately \$60,000 per community for a total unmet need statewide of approximately \$1.8 million.

Specific communities identified as requiring sanitation services for their community health clinics are:

Akiachak	Akhiok
Arctic Village	Atmauluak
Beaver	Birch Creek
Brevig Mission	Chefornak
Circle	Eagle Village
Healy Lake	Kipnuk
Kongiganek	Koyukuk
Lime Village	Lower Kalskag
Manley Hot Springs	Manokotak
Napaskiak	Newtok
Nulato	Pitkas Point
Platinum	Port Heiden
Portage Creek	Rampart
Tuluksak	Tuntutuiiak
Upper Kalskag	Venetie

This year the Governor has proposed an appropriation of \$325,000 to the Department of Environmental Conservation to serve approximately 20% of these communities. The Alaska Native Health Board urges the Alaska State Legislature to approve at a minimum this level of appropriations for village clinic water and sanitation services in FY1997.

INDIAN HEALTH SERVICE SANITATION DEFICIENCY SYSTEM ALASKA AREA LISTING OF PROJECTS

***The Indian Health Service annually updates its national Sanitation Deficiency System, which lists by area projects identified as unmet needs by Native communities and the IHS.**

***The following listing of Alaska Area projects is updated as of January 1996; it identifies:**

the type of project

an IHS deficiency scoring indicator

the community name

project phase

(many communities are listed several times, with each project being one in a series of phases which upgrade services incrementally from a very basic level to an adequate level)

the change in deficiency level

(ranging from "5" for most deficient to "1" for adequate)

the number of homes involved in the project

(does not always serve the entire community)

the estimated phase project cost to IHS

(non-inclusive of homeowner or other agency contributions)

***This listing represents a different priority ranking than is used by the State Village Safe Water program, which uses different criteria and includes non-Native communities as well. It offers a picture of the level of water and sanitation needs of rural Alaska Natives.**

***This listing does not include estimates for solid waste projects, landfill closures, or compliance upgrades.**

TOBACCO TAXES SAVE LIVES

The Alaska Native Health Board strongly supports proposals for major tobacco tax increases in Alaska in 1996.

A recent Bulletin published by the Alaska Department of Health and Social Services (January 12, 1996) states that *Alaska has one of the highest smoking prevalence rates in the United States*, and that tobacco kills more Alaskans than AIDS, aircraft crashes, alcohol, falls, fires, firearms, and motor vehicle crashes *combined*. Almost 20% of all deaths in Alaska between 1992 and 1994 were due to smoking.

The Bulletin presents even more sobering statistics for Alaska Natives, whose smoking rates far exceed the rate for all races combined. Alaska Natives account for 23.2% of the smoking-related deaths, even though comprising 16.5% of the state's population.

Of these victims, we know that almost all first became hooked on tobacco in their teens or younger. Because nicotine is as addictive as cocaine or heroin, most of the addicts who try to quit each year fail. The results are tragic: of all the children who join the ranks of smokers each year, we can expect that one in three will eventually die from it. Half of those will die in middle age.

Research shows that a major tobacco tax increase is "the single most effective way to rapidly and significantly reduce the number of children who start smoking and to encourage many adults to quit." (Coalition on Smoking OR Health, 1995). Typically, a 10% increase in the price of tobacco products will produce a 10% decline in consumption by youth. The cigarette tax increase recommended by the Long-Range Financial Planning Commission and others (to \$1.29 per pack) could therefore be expected to reduce youth smoking by almost one-third. This amounts to thousands of lives saved over time, especially if the increase is indexed for inflation.

Finally, a January 1996 poll of 820 adult Alaskans (sponsored by the Robert Wood Johnson Foundation and conducted by Mathematica Policy Research, Inc.) indicates that *73% of Alaskans support a tobacco tax increase of \$1.00 per pack*.

The Alaska Native Health Board urges Alaska State legislators to review in detail the enclosed educational materials developed by the Alaska Tobacco Control Alliance, and to support passage of Senate Bill 234 and House Bill 442 as recommended by the Commission and supported by the Governor.

SAVING LIVES

and raising revenue

**THE CASE FOR MAJOR
TOBACCO TAX INCREASES
IN ALASKA**

Protect kids. Tax tobacco.

Executive Summary

"Cigarette taxes ... are the most effective way to discourage tobacco use among young people. ... Increasing the cigarette tax could be one of the most important public health measures this country has ever taken."

— former Surgeon General C. Everett Koop, appointed by President Ronald Reagan

NOTHING KILLS LIKE TOBACCO. In Alaska, one out of five deaths is caused by tobacco. In the United States, smoking kills almost 420,000 people per year — more than AIDS, alcohol, car accidents, fires, cocaine, heroin, murders, and suicides *combined*. Worldwide, tobacco kills 3 million people per year — someone every 10 seconds.

- **Tobacco use is the leading cause of death in Alaska.** When used as intended, tobacco kills.
- **Adults don't start smoking — kids do.** Almost all tobacco victims become addicted to nicotine as teens or younger. Nicotine is regarded by many authorities to be as addictive as heroin or cocaine. If we can stop kids from getting addicted, we can prevent needless disease and death later in life.
- **Tobacco companies spend over \$6 billion a year — about \$16.5 million each day — on advertising and promotion in the United States.** Tobacco industry advertising is very effective at reaching children. About 91% of 6 year olds recognize the Old Joe Camel cartoon character, about the same percentage that recognize the Disney Channel-Mickey Mouse logo.
- **Education alone does not work.** For many years, education has been the primary strategy to reduce tobacco use among children. Nevertheless, recent surveys show that smoking among youth is increasing.
- **Increasing tobacco taxes is widely recognized as the single most effective way to reduce tobacco consumption among children.** Children are price sensitive consumers. Research shows that a cigarette price increase of 10% can be expected to reduce consumption by an equal or greater amount by children. A \$1 per pack tax increase would reduce youth smoking in Alaska by an estimated 32%.
- **Tobacco taxation is an efficient and appropriate means to offset the enormous costs caused by tobacco.** Alaska's Long Range Financial Planning Commission concluded that a \$1 per pack increase in the state's cigarette tax would raise \$42 million in new revenues in the first year.
- **Alaska's current tobacco tax is below the national average, even though Alaska has one of the highest rates of tobacco-related death in the nation.** Nor have tobacco taxes in Alaska kept pace with inflation. In 1964, the year that the first Surgeon General's report on smoking and health was released, the state tax comprised 24% of the retail price of cigarettes. Today it is only 14%.
- **The public supports tobacco taxes.** A January 1996 statewide survey found that 74% of Alaskans support an increase of \$1 per pack in the state excise tax on cigarettes.

Tobacco Taxes and Kids

"There is widespread agreement ... that few measures exhibit the speed and magnitude of impact achieved by increasing taxation on tobacco products. [I]ncreasing tobacco excise taxes must be considered an essential and primary component of any comprehensive tobacco control program."

— *The Impact of Cigarette Excise Taxes on Smoking Among Children and Adults*
National Cancer Institute (August 1993)

EVERY DAY IN THE UNITED STATES, ABOUT 3,000 CHILDREN JOIN THE RANKS OF CIGARETTE SMOKERS. The average age is 14.5 years old. Of these 3,000 new smokers, we can expect that 30 will be murdered, 60 will die in traffic accidents, and 1,000 will be killed from smoking.

- **Adults don't start smoking — kids do.** Some 89% of adults who smoke began using cigarettes by or at age 18. If children can be dissuaded from smoking they almost always lose interest by the time they reach 19, greatly reducing their chance of premature death.
- **Youth smoking and smokeless tobacco use rates in Alaska are higher than the national average.** In 1989, 23% of high school seniors in Alaska reported that they smoked daily. Eighteen percent of 12th grade boys reported daily use of chewing tobacco.
- **As tobacco taxes are increased, youth consumption will drop.** Research shows that a price increase of 10% in cigarettes can be expected to produce a 10% decrease in consumption by youth. A substantial part of the decline is a result of children who will not initiate smoking at higher prices.
- **Children are more influenced by tobacco prices than adults.** Children who smoke may not yet be addicted, and generally have less disposable income. A significant price increase in tobacco products will discourage kids from starting to smoke, while encouraging current smokers to quit or cut back.
- **Experience in Canada demonstrates that increased tobacco taxes will substantially reduce smoking among kids.** During the 1980s, Canada raised tobacco taxes from rates comparable to current U.S. rates to about \$3 (U.S.) per pack. Between 1981-1991, teen smoking declined by more than 60% in Canada while it remained relatively constant in the U.S. (See Figure 1.)
- **In 1994, the Alaska Department of Health and Social Services recommended a \$2 per pack increase in state cigarette taxes as part of its Cancer Control Plan.** The research team concluded: "Preventing tobacco use by children is the key challenge in tobacco use reduction, and a substantial excise tax increase is our strongest weapon. No other measure can have as great an impact on the public's health and that of our children."

Figure 1: Real cigarette prices and cigarette smoking among Canadians age 15 to 19

Tobacco Taxes and the Economy

"State tobacco tax revenues are up. Monies collected from the tobacco tax are on target... This is good news. Cigarette consumption in Michigan is down, as was expected and predicted by health and treasury officials. ... Reduced consumption is also good news. ... [M]illions of dollars in health care costs for smoking related disease will be saved as a result of reduced consumption."

— Douglas B. Roberts, Michigan State Treasurer (July 1995)
Statement regarding Michigan tobacco tax increase to 75 cents per pack

SMOKING CAUSES MORE THAN \$50 BILLION IN DIRECT HEALTH CARE COSTS EACH YEAR, according to the U.S. Centers for Disease Control and Prevention. Economic productivity losses add another \$50 billion, bringing the total cost of smoking to \$100 billion per year.

- In Alaska, smoking is responsible for 23% of all deaths among Alaskans age 35 and older. Direct health care costs attributed to smoking in 1991 for Alaskans in this age group were \$45.6 million. An additional \$82 million was lost due to indirect costs (lost productivity), bringing the total economic impact to \$127.6 million. For every dollar that's collected in tobacco taxes, the Alaskan economy loses \$7 from the impacts of smoking.
- Smokers use 50% more sick leave and use the health care system 50% more than non-smokers.
- Current and former smokers generate an estimated \$501 billion in excess health care costs over the course of their lives, even though smokers die an average of 12 to 15 years younger than non-smokers.
- Non-smokers pay for 75% of all government expenditures on smoking-related health care through taxes. Of the \$50 billion in U.S. health care expenditures caused directly by smoking in 1993, \$22 billion was paid for by government funds.
- The Alaska Long Range Financial Planning Commission has estimated that a tobacco tax increase of \$1 per pack on cigarettes and a comparable increase in taxes on other tobacco products would raise approximately \$43 million annually. The Commission concluded: "This tax increase will dramatically lower teenage smoking and reduce tobacco use by adults, both of which will reduce the State's future expenditures on health care costs."
- Tobacco tax increases result in increased revenue and reduced consumption. (See Figure 2.) This is because for most of the population a 10% price increase will result in about a 4% sales decline (with higher declines among kids). The net effect of a tobacco tax increase is that more money gets spent on fewer cigarettes, resulting in major health *and* revenue gains.
- Increased tobacco taxes offer a win-win-win opportunity, simultaneously preventing tobacco addiction and death, reducing health care costs, and raising revenue.

Figure 2. Cigarette Sales Versus Tobacco Tax Revenue Canada 1981 - 1992

Why Single Out Tobacco?

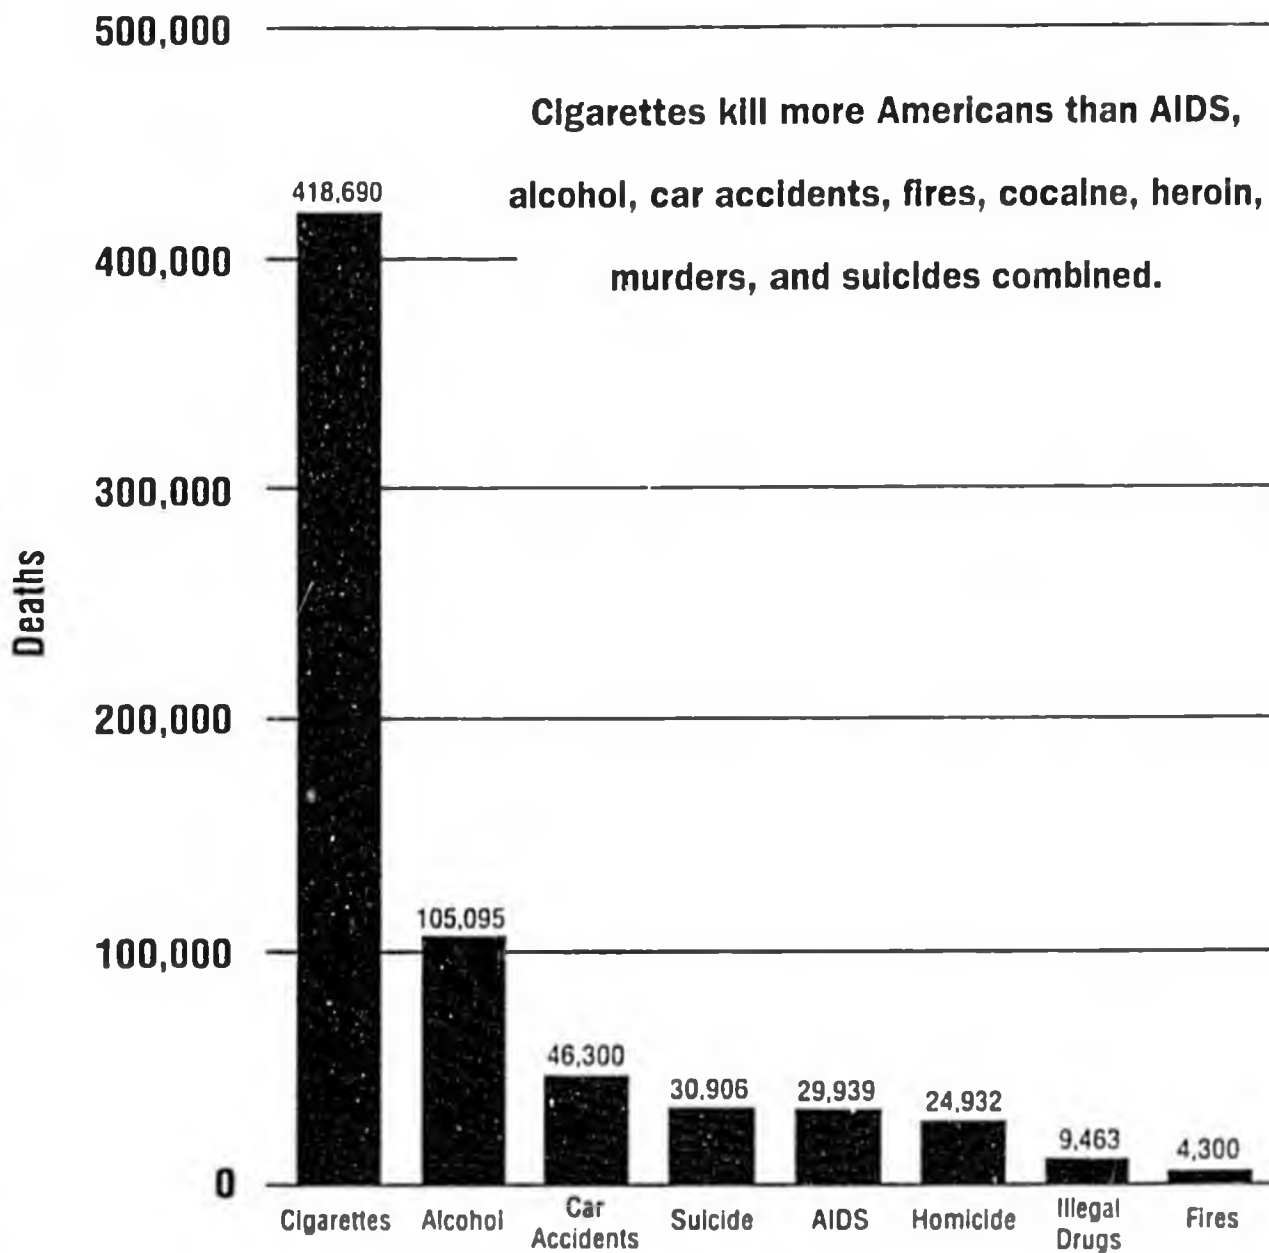

"If, in the United States, five 727s with 200 people crashed every day of every week of every month of every year, sooner or later someone would say, 'We've got to do something about this.'"

— Dr. John Allen (past president)
American Lung Association

TOBACCO IS A UNIQUE PRODUCT BECAUSE OF THE STAGGERING TOLL IT TAKES ON THE LIVES OF MILLIONS. Each year, tobacco kills more Americans than AIDS, alcohol, car accidents, fires, illegal drugs, murders, and suicides *combined*. It is the only legal product that when consumed exactly as the manufacturer intends, causes addiction, disease, and death.

- **Tobacco is unique in the number of Americans it kills.** Each year 419,000 Americans die from smoking. That's 1,100 Americans each day, one every 75 seconds. One of every five deaths in the U.S. — and in Alaska — are caused by tobacco. Tobacco kills more than *one out of three long-term users*, half of whom die in middle age.
- **Virtually all new users of tobacco products are children.** Almost 90% of all smokers started before the age of 19. The average age of initiation is 14.5 years. Adults don't start smoking — kids do. The same is true of smokeless tobacco use.
- **Tobacco is unique because it is harmful to all users at all doses.** There is no safe level of tobacco use. Smoking just two cigarettes a day doubles one's risk of lung cancer and increases the risk of heart disease and stroke.
- **Tobacco use produces no health benefits.** Unlike some food products which provide nutritional benefit but also contribute to the risk of heart disease under certain circumstances, tobacco provides no nutritional benefit and is harmful under all circumstances. Unlike alcohol, tobacco kills even when used in "moderate" amounts.
- **Tobacco smoke kills users and non-users alike.** The American Heart Association estimates that 52,000 deaths a year are caused by exposure to second-hand smoke, making environmental tobacco smoke the third leading cause of death in the nation (behind active smoking and alcohol abuse). Viewed another way, this means that for every eight smokers that the tobacco industry kills, it takes one non-smoker with them.
- **Tobacco is unique because it contains nicotine, a highly addictive drug.** Researchers widely regard nicotine to be as addictive as heroin or cocaine. Withdrawal from nicotine addiction is like withdrawal from other highly addictive substances: difficult and painful. Seventy percent of smokers say they want to quit, and millions try to quit each year, but only 2.5% succeed in any given year.

Nothing Kills Like Tobacco

The Tobacco Industry

"The evidence is unequivocal — the U.S. public has been duped by the tobacco industry. No right-thinking individual can ignore the evidence. We should all be outraged... ."

— Journal of the American Medical Association (July 1995)

NICOTINE ADDICTION IS BIG BUSINESS IN AMERICA. Total net profits of the major tobacco companies in the United States exceed \$12 billion annually. These companies spend over \$6 billion a year on advertising and promotion alone — \$16.5 million per day. Only automobiles are more heavily promoted. The most damning information and insights regarding the tobacco industry come from within the industry itself:

- **On addiction** — In public, the industry denies that tobacco is addictive. In April 1994, in testimony before Congress, the heads of the nation's seven largest tobacco companies argued that nicotine is not addictive. William I. Campbell, who was then president of Philip Morris, stated: "I really don't accept that smoking is addictive." In private, however, the tobacco industry has long acknowledged the obvious:

"We are, then, in the business of selling nicotine, an addictive drug."

So wrote Addison Yeaman, General Counsel to the Brown & Williamson Tobacco Co., in an internal memo more than three decades ago (1963). In recent years, tobacco company documents show that the industry has been using ammonia-based additives to boost the impact of nicotine in cigarettes. "With ammonia, you get a bigger jag with less nicotine because it is absorbed faster..." acknowledged John Kreisher, formerly of the industry-funded Council for Tobacco Research.

- **On marketing to kids** — Tobacco industry executives have known for years that almost all new smokers are kids, and that the tobacco companies must appeal to children to maintain profitability. From *Planning Assumptions and Forecast for the Period 1977-1986 for R.J. Reynolds Tobacco Company* (March 15, 1976):

"Evidence is now available to indicate that the 14-18 year-old group is an increasing segment of the smoking population. RJR-T must soon establish a successful new brand in this market if our position in the industry is to be maintained over the long term."

The document was stamped "secret."

- **On tobacco industry tactics** — Victor Crawford, a former state senator from Maryland who later became a tobacco lobbyist, is now one of the industry's most knowledgeable critics. As a tobacco lobbyist, Crawford was paid up to \$200 per hour to buttonhole old colleagues and get them to back off on tobacco legislation. This all changed when he was diagnosed with throat cancer, a result of heavy smoking. Crawford says:

"[A]nything goes... [the tobacco companies will use] ... any marketing gimmick, any trick, to make you want to smoke."

Crawford speaks out against not only the dangers of tobacco, but also about industry marketing to teenagers. "It's too late for me," Crawford says, "but it's not too late for you. ... Don't let anybody fool you."

Answering 'the Opposition

DOONESBURY copyright 1990 G.B. Trudeau. Reprinted with permission of UNIVERSAL PRESS SYNDICATE. All rights reserved.

THE TOBACCO INDUSTRY ARGUES AGAINST INCREASED TOBACCO TAXES for the very same reason that doctors, nurses, health professionals, and other public interest organizations advocate for them: — increased tobacco taxes reduce smoking and addiction among children.

A variety of arguments have been advanced by the tobacco industry regarding increased tobacco taxes. Presented below are some of those arguments and responses.

1. Argument: "The public doesn't want more taxes."

In fact, there is broad public support for major tobacco tax increases. As stated by former President Ronald Reagan's U.S. Surgeon General, C. Everett Koop: "Polls show that ... Republicans and Democrats, young and old, men and women [all] support a large cigarette tax." In Alaska, a 1996 statewide survey (Mathematica) found that 74% of respondents supported a \$1 per pack tax increase. In 1994, a similar survey found high levels of support for increased tobacco taxes among self-identified conservatives, liberals, and moderates.

Martilla & Kiley (April 1993) found that a majority of American voters in every region of the country of every age, income, and education level favored increasing tobacco taxes by \$2 per pack. Support was strong among both Republicans (63%) and Democrats (66%). Even leading tobacco-producing states such as Georgia, Kentucky, South Carolina and Virginia strongly supported tax increases. A CNN poll (March 1993) found that 83% of the voting public favors increasing tobacco taxes. A *Wall Street Journal*, NBC news poll found that 70% of adults support a \$2 per pack tax increase. Polls in other states confirm the same thing. Michigan residents recently passed a referendum to raise cigarette taxes 50 cents per pack (to 75 cents/pack) and the state legislature subsequently enacted the increase into law.

2. Argument: "The legislature should cut spending, not raise taxes."

The proposal to increase tobacco taxes is fundamentally a matter of health policy. Increased tobacco taxes will prevent addiction among children and save lives. Even if there were no "fiscal gap" in Alaska, a tobacco tax increase is justified to protect and promote the public health.

With state oil revenue declining, it is clear that State spending will be cut. Both the Legislature and the Administration have pledged to cut spending. But even after making extremely deep cuts, some level of taxation will still be needed to support basic services. Because tobacco taxes protect kids and save lives they enjoy broad public support and have been endorsed by all major health organizations, including the American Cancer Society, American Heart Association, and American Lung Association.

(continued on back)

3. Argument: "Tobacco taxes are regressive."

If there is an undue burden being placed upon the poor, it is the disease caused by tobacco — the heart attacks, strokes, and cancer which rob families of their wage earners. The notion that tobacco taxes will hurt lower income individuals is a misleading excuse to keep tobacco taxes low. Since there is evidence that the poor quit smoking in larger numbers in response to price increases, they will benefit to a greater extent than more affluent socio-economic groups. Finally, can it be considered *progressive* to perpetuate addiction, disease and early death?

4. Argument: "Taxes should not be used for social engineering."

All taxes produce changes in social behavior. State legislatures and local governments routinely influence social behavior through tax policy. Property taxes discourage property ownership. Sales taxes discourage retail sales. Capital gains taxes discourage profit taking and reinvestment. Oil taxes reduce resource development. Any tax that is levied produces a social and behavioral response. So long as there is a need for taxes to support basic services, it is reasonable to identify those taxes that will have a positive impact. Tobacco taxes will reduce disease and save lives, recover costs now inappropriately paid for by the public at large, and reduce long-term health care costs. In fact, today's low level of taxation — which does not reflect the huge costs of tobacco use paid for by society as a whole — amounts to "social engineering" by default.

5. Argument: "It doesn't make sense that a government would use tax revenues from an activity it is trying to discourage."

In fact, it is possible to have it both ways, as many governments have proven. From a health standpoint, it would be ideal if a tobacco tax increase could completely eliminate tobacco use. The fact is that even while tobacco taxes effectively reduce tobacco consumption, they also raise substantial new revenue. In Canada and New Zealand, as well as California and Michigan, significant tobacco tax increases have produced consistent results — revenues are up and consumption is down. Simply stated, more money is spent on fewer cigarettes. The Alaska Department of Revenue projects that a \$1 per pack cigarette tax increase in Alaska would yield new revenue of \$42 million in the first year after taking into account reduced tobacco consumption as a result of price increases. In its final report, the Long Range Financial Planning Commission also pointed out another fiscal benefit of tobacco taxation: By reducing tobacco-related health care expenditures, more money is left to pay for other public services.

6. Argument: "Tobacco tax increases will lead to smuggling."

The tobacco industry greatly exaggerates the concern of smuggling. In Alaska, the potential for cross-border smuggling of Canadian cigarettes is non-existent — even with a \$1 per pack increase in taxes, cigarettes would still be cheaper in Alaska than in Canada. Large scale smuggling through other avenues, such as military bases, is also not realistic, as such an operation would be easy to detect.

7. Argument: "Tobacco taxes are unfair."

Tobacco taxes are fundamentally a user fee and tobacco users are currently not paying their own way. In Alaska, for every dollar collected in tobacco tax revenue, the Alaskan economy loses \$7 due to smoking-related health care costs and lost productivity — \$2.26 for every pack of cigarettes sold. Increased tobacco taxes are justified for several reasons: 1) tobacco taxes are the most effective way to prevent young people from becoming addicted to nicotine; 2) smokers cost the general public in the form of added health care costs; and 3) most smokers want to quit, and raising the price of tobacco products provides an added incentive.

SAVING LIVES
and raising revenue

A \$1 per pack increase in the state cigarette tax?

Public Opinion Poll Results

December 14, 1995 - January 20, 1996

- ▶ Alaska's state budget is about five hundred million dollars larger than the revenue it will take in this year. Most of this revenue is from oil and gas taxes. People have different views about how to deal with this fiscal gap. Do you think the fiscal gap can be closed only with spending cuts, or do you think the fiscal gap can be closed only with a mix of spending cuts and new revenue sources?

Spending Cuts	16%
Spending Cuts and Revenue Sources	72%

- ▶ Now, I would like to turn to tobacco taxes. The current Alaska state tax is 29 cents per pack of cigarettes. In general, do you favor or oppose increasing Alaska's tobacco taxes by one dollar per pack to help close the state's fiscal gap?

Strongly Favor	49%
Somewhat Favor	25%
Somewhat Oppose	5%
Strongly Oppose	16%

- ▶ If it was proven that a large cigarette price increase prevents or reduces smoking among children and teenagers, would you favor or oppose raising the state tax by one dollar per pack?

Strongly Favor	71%
Somewhat Favor	15%
Somewhat Oppose	9%
Strongly Oppose	3%

- ▶ Do you generally favor taxing other tobacco products, such as chewing tobacco, snuff, and cigars, at a higher rate than cigarettes, about the same rate as cigarettes, or at a lower rate than cigarettes?

Higher Rate	8%
Same Rate	83%
Lower Rate	5%

- ▶ I want to get your final opinion, even if it is different from the opinions you expressed earlier. All things considered, do you favor or oppose increasing Alaska's tobacco taxes by one dollar per pack?

Strongly Favor	58%
Somewhat Favor	15%
Somewhat Oppose	7%
Strongly Oppose	18%

These data are based on preliminary analysis of the results of the Alaska Smokeless States Survey, a telephone survey of a representative sample of 820 Alaska residents 18 and older conducted from December 14, 1995 through January 20, 1996. The survey was conducted using a single-stage, list-assisted random-digit-dialing stratified sample design. One adult was selected to be interviewed within each household. The survey concerned public attitudes toward the state's budget gap and tobacco policy issues. The margin of sampling error (95% sampling interval) for statewide estimates made for all residents is no more than plus or minus 4.3 percentage points. The survey was conducted by Mathematica Policy Research, Inc. in Princeton, New Jersey, under contract with the Robert Wood Johnson Foundation.

Marla Huss
Boards and Commissions
Office of the Governor
Juneau, Alaska 99801

Dear Marla:

I am interested in serving on the state board of education. I believe that my experience and skills would provide a much needed perspective.

My experience starts with my own children. All four have attended only Alaskan schools. Our two oldest are now in college, one is in the 9th grade, and the youngest is in 6th grade. They've attended a variety of programs in schools in Anchorage, Kotzebue, and Juneau.

We lived in Kotzebue for three years, and I helped start a PTA there. The Kotzebue PTA was not a cookies and fundraising group; a Kotzebue principal said that there was lots more "action" at the PTA meetings than at the advisory school board meetings. While in Kotzebue, I was elected to the state PTA board of managers. This gave me a different look at issues elsewhere in the state and provided a lot of support for what we were doing in Kotzebue.

I served four years as the president of the state PTA, from 1989-93. During that time I became even more familiar with statewide education issues. In 1990 the PTA held our first parent involvement conference, the first of its kind in the country. This was a partnership between Alaska PTA, Alaska Pacific University, the Office of the Governor, and a myriad of Alaskan businesses. We sponsored a second conference the next year and continued to increase awareness of the importance of parent and family involvement with children's education.

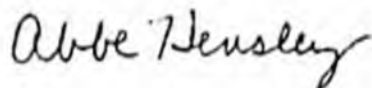

As state president, I developed and maintained working relationships with leaders of other groups interested in education. These relationships remained cordial even when we disagreed on issues. I gave presentations and taught workshops at conferences and meetings around the state and continued building networks. In addition, I participated in many meetings and discussions, both formal and informal.

Because of my position as state president, I was a member of the National PTA board of directors. I have continued serving on the National PTA board, as a region vice president from 1993-94 and, since last June, as

vice president for leadership services. These positions have provided me the opportunity to travel to other states and to stay current with national education issues.

I will be glad to provide a resume. I can be reached by phone at 346-4060 and by both phone and fax at 346-1802. I appreciate your consideration.

Sincerely,

A handwritten signature in cursive script that reads "Abbe Hensley".

BOARDS & COMMISSIONS

JAN 31 1995

January 27, 1995

The Honorable Governor Tony Knowles
c/o Maria Huss, Director
Boards and Commissions
P.O. Box 110001
Juneau, AK. 99811-0001

RE: Recommendation for Abbe Hensley, State Board of Education

Dear Governor Knowles:

As you consider appointments to the State Board of Education, please give serious consideration to Abbe Hensley. Without question, her abilities, training and previous experience make her uniquely qualified for this position. Having served on the State Board of Education for five years myself, I have some understanding about what the board requires and what it takes to serve well. I can think of no one more qualified than Abbe.

First of all, Abbe's highest priority will be the needs of children--Alaska's children. With her experience in both rural and urban Alaska, her ethnically diverse family background, and her sensitivity to cultural issues, she will bring a rare perspective of children's needs to the board. In her service as Alaska PTA President for four years, she demonstrated that her commitment to children goes beyond rhetoric to action. She gave hundreds of volunteer hours to improving the way schools serve students and continuously reminded PTA leaders to put "Children First".

Abbe is not a newcomer to Alaska education issues. She has served on a variety of education reform committees, including the Alaska 2000 Oversight Committee. She understands the issues surrounding school finance, teacher preparation, student assessment, school-to-work transitions and other priority topics. She is concerned about school accountability and engaging parents in the education of their children. In addition, as the current Leadership Vice President for the National PTA, she has access to the best ideas from other states. Few Alaskans have had the preparation Abbe has, enabling them to make wise and well informed decisions regarding education policy.

In my experience, the most important skills required for the State Board of Education are "people skills". Abbe is a gifted consensus builder. She listens to others, thinks clearly, articulates her thoughts with genuine concern for positive problem solving and never

belittles or insults. She has a well developed sense of fairness and a commitment to purpose. With education interest groups being well organized, it's essential to be unafraid of taking unpopular positions if they're the right ones for children. Abbe has a clear sense of her own identity and would deal with controversy well--always with grace.

I cannot emphasize enough the importance of Abbe's experience in parental involvement. Everyone gives lip service to it, but Abbe knows how to make it happen. Research has indicated over and over that parental involvement is the most consistent predictor of student success. To have someone on the board who truly understands what can be done in this area would have powerful positive impact on student achievement.

Alaska needs education leaders who see the "big picture", who understand that children are not served well if expectations are low, who have broad life experiences outside education which give balance to their perspectives. We need people courageous enough to move education forward, using what works from the past and the best ideas of the future. We need people who can work with other people.

Abbe Hensley meets this criteria and goes beyond it. She would be an extraordinary member of the State Board of Education. Appointing Abbe would be a step in the right direction for Alaska's children.

Sincerely,

Sue Hull
President

Sen Lyda Green
 Room 423, State Capitol
 Juneau, AK 99801-1182

Dear Sen Green:

I have been informed that the HESS committee will soon be conducting confirmation hearings on the new Dept. of Education Commissioner and I would like the committee to ask some questions regarding the candidates views on gifted education.

I am a parent of a gifted child, am a member of the DOE Special Education Regulations Review Task Force as an advocate for gifted education, and am active in local and state advocacy groups. In writing this letter, I represent myself and AGATE (Alaskan's for Gifted and Talented Education, June Haas chair).

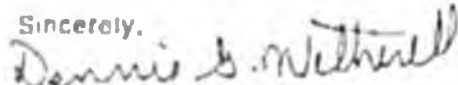

Gifted children are an at risk group of students who are under served and under recognized by the present educational system. Too often, these children are not challenged in school, become bored, frustrated, and depressed. They may become underachievers, develop behavior problems, and drop out of school or society. Some commit suicide and a significant number end up in our criminal institutions. It has been reported that about 14% of the nation's prison population is considered gifted, yet only about 5% of the total population is labeled gifted. One has to wonder why gifted are found 3 times more often in our prisons than in society as a whole.

Over the last four years, support for gifted education at the state level has decreased dramatically. I would like to see this trend reversed and I think selection of a supportive DOE commissioner would be helpful. By promoting challenging educational opportunities for gifted children, I think we will improve the quality of education for all. We will certainly be empowering our more able students to better use their gifts and talents for the benefit of society.

Please consider asking the following questions:

- 1) What role should the state play in developing gifted education in Alaska?
- 2) What do you advocate for meeting the needs of underachieving and/or learning disabled gifted children?
- 3) Do you support flexible enrollment of school placement based on readiness as opposed to age?
- 4) Gifted students have a need to be able to associate with their developmental and intellectual peers. How would you recommend accommodating this need in an inclusionary program?
- 5) If the candidate is supportive of gifted education and some form of ability grouping - How would you respond to accusations that special programs for the gifted are elitist and to recommendations for an egalitarian education system?
- 6) What are your views on acceleration and enrichment? Do you see these alternatives as being mutually exclusive?
- 7) Would you advocate for opportunities for concurrent enrollment in high school and college?
- 8) Are you supportive of advanced placement and honors classes?

Thank you for considering this request. If possible, I would like to obtain a transcript of the hearings

Sincerely,

 Dennis G. Wetherell

 Rep Cynthia Turbay

**Suggested Questions to Candidates for the
State Board of Education**

General:

Do you see any conceivable way that implementing the provisions of Alaska 2000 would make any tangible difference in the classroom?

Do you think what Jerry Covey did shows the kind of moral leadership that you find acceptable in a Commissioner of Education?

NEA Rep: Since nobody else it seems has a guaranteed job for life (except some members of the judiciary), why do we have tenure? Doesn't tenure prevent us from weeding out poor teachers?

For Robert Gottlieb: From your experience with the WISE Project, what would you do differently to see that the products of such an activity are accepted in the classroom and implemented?

Mr. Gottlieb: Have you given any thoughts to how a voucher system could be used to enhance education? How will these students be transported?

On Prince of Wales Island, we maintain 4 separate school districts. Is this the kind of local control we want to promote in this state? (Better check with Sen. Taylor!!!)

The Division of Vocational Rehabilitation:

How does the Division of Vocational Rehabilitation fit into your concept of the mission of the Department of Education?

From what I hear, there seems to be a high level of dissatisfaction by people who use the services of the Division of Vocational Rehabilitation. What can the Board of Education do to see that this situation is changed?

As a member of the Board, how will you measure the cooperation and collaboration between the Division of Vocational Rehabilitation and Special Education to transition students from school to work?

page 2

Special Education:

How much of the school foundation formula goes to Special Education? Would it surprise you to learn that the amount is nearly \$100 million? (I think its actually \$98,340,500) What is the Department's responsibility to see that this money is spent in accordance with the law?

Does it seem reasonable that we have no one in the Department that is specifically accountable to the public as a Director for Special Education?

Do you feel that any changes in the Department's organization are necessary to assure that adequate and cost effective special education is provided in rural areas? (SESA?)

The practice in Special Education is to educate children with disabilities wherever possible with students who do not have disabilities. Classroom experience tells us that this inclusive education works if it is done right. As a member of the State Board of Education, what do you feel is your role in seeing that the state properly carries out this philosophy?

Because funding is based upon the place a student receives services, the present School Foundation Formula deters districts from using the inclusionary education philosophy. What can be done with the foundation formula to encourage or support districts that want to implement inclusionary practices?

Gifted Education:

As part of Alaska 2000, the Department would eliminate Gifted Education from the Department's duties. Should Gifted Education continue to be part of Special Education?

The person in the Department responsible for Gifted Education devotes 5% of his time, only 2 hours each week on this activity. Do you feel this is adequate to ensure students in Gifted Education are properly served in our schools?

RE: Recommendation for Susan Stitham for State Board of Education

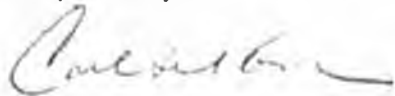

Knowing that you will be considering confirmation of an appointment to the State Board of Education in the near future, I'd like to offer my recommendation for Susan Stitham of Fairbanks.

Ms. Stitham has distinguished herself in many ways throughout her long career as an educator. She is an outstanding example of an effective teacher and has been a strong representative for the teaching profession in her years of association with NEA. We've been acquainted for many years and I've had the pleasure of working with her in a number of situations. In each of those I've been impressed with her ability to examine issues thoroughly, listen carefully to other perspectives, think creatively and help facilitate satisfactory solutions to problems.

She is the kind of person we need on the State Board of Education.

Her credentials alone should recommend her as one of the most capable people who could ever be appointed to this Board. I'm sure you will find a wide range of support for her appointment. The Association of Alaska School Boards would like to add our voice to that support. We would look forward to working with her in this capacity.

Respectfully,

Carl Rose
Executive Director

Board of Education

Susan A. Stitham
P.O. Box 80913

Addendum to Resume
February 19, 1996

TEACHING EXPERIENCE: In the past four years, in addition to my regular English assignment, I have worked in three different inter-disciplinary teams, including

AP GOVERNMENT/ENGLISH LITERATURE (1996) - team teaching with a social studies teacher, combining work with Advanced Placement Government and the primary sources which influenced the Founding Fathers and relevant literary texts, such as HAMLET and MACBETH. Our classroom was selected as one of fifteen in the nation to participate in PBS' "Correspondence with Correspondents" project; our students are working with TIME magazine's political reporter, Michael Kramer.

Awareness

PROBLEMS IN AMERICAN DEMOCRACY (1995) - an interdisciplinary economics and government course, team taught with a math, a science, and a social studies teacher; the team won the 1995 Award for Outstanding Economics Teaching in Alaska

SENIOR SEMINAR (1992, 1993) - "Ethics and Epidemics: A look at the Black Death, Irish Potato Famine, and AIDS from the perspective of math, science, social studies and English" - the four teacher team won the 1993 Interior Aids Association Award for Promoting AIDS

PROFESSIONAL AND PUBLIC ACTIVITIES:

1987-1995: Member of University of Alaska Board of Regents; secretary and chair of Academic and Student Affairs Committee

1991-1994: Worked on a variety of committees involved in Alaska 2000, including the Governor's Blue Ribbon Committee; the Steering and Oversight Committees; the Teacher Standards Committee; the English Language Arts Student Performance Standards Committee-co-chair; the Goals 2000 Panel.

1987-1993: Founding member of the National Board for Professional Teaching Standards; chair, Education Policy and Reform Committee

AWARDS and RECOGNITION:

1996 - Excellence in Teaching Award, selected by Lathrop alumni attending Brigham Young University; five recipients outside of Utah chosen annually.

1995 - Commencement speaker, Lathrop High School, elected by graduates

1994, 1996 - Who's Who in America's Teachers, nominated by Lathrop alumni

1992 - Commencement Speaker, Michigan State University College of Education

1991 - Milken National Educator Award

STATE OF ALASKA
Boards and Commissions

EDUCATION

BOARD: Board of Education

BOARD IDENTIFICATION NUMBER: 029

DEPARTMENT: Department of Education

AUTHORITY: AS 14.07.075; AS 14.35.020, AS 23.15.010

STATUS: Active

REQUIREMENTS: Legislative Confirmation, Financial Disclosure

PROHIBITIONS: No member may be a candidate for partisan political office while serving; no more than 4 shall be of the same political party as the Governor.

TERM: 5 years

DESCRIPTION: 7 members appointed by the Governor: with consideration of recommendations made by recognized educational associations in the state; 1 representing each judicial district; 3 at-large; at least 1 representing regional educational attendance areas. Board designates chair. Members serve at pleasure of the Governor. (Non-voting advisory members include: student representative nominated by the Board of Directors of the Alaska Association of Student Governments and selected by the board; and military representative nominated by the ranking General of the Alaska Command and selected by the board -- see Administrative Code 4AAC03025A1 & B).

FUNCTION: May adopt bylaws for the management of the Department of Education; adopt statewide goals and require each governing body to adopt goals consistent with local needs; appoint the Commissioner of Education with the approval of the Governor; adopt bylaws and budget for management of the Department; administer the program of vocational education and serve as the designated Board of Vocational Rehabilitation. Also serve as the state's Chapter 2 Block Grants Advisory Committee, which is required by federal law.

CHAIR: Board selects.

SPECIAL FACTS: Quorum - 4 members. Serve at the pleasure of the Governor.

COMPENSATION: Standard Travel and Per Diem. No additional compensation.

MEETINGS: At least quarterly in Juneau unless majority of board members changes site; usually 6-8 mtgs/year.

PROFESSIONAL EXPERIENCEFamily Programs Administrator, 17th Coast Guard District, Juneau,
Alaska, December 1991-Present

Developed and implemented policies and programs to ensure compliance with Congressional mandate to address domestic violence, sexual assault, child abuse, suicide prevention, and special needs. Provides consultation on issues relating to family advocacy, as well as other related issues.

As deputy supervisor, responsible for ensuring administrative functions of 9 member Work-Life staff are maintained in the absence of supervisor. Assists supervisor in the development of program policy and special projects as directed. Assists in the development of budget and assisted in the implementation of Work-Life program, including hiring of new civilian staff positions.

Developed, implemented and maintains an active training program for the identification and reporting of domestic violence, sexual assault, suicide awareness and other related areas. Obtained funding for and coordinated District's first Work-Life Conference for approximately 100 Coast Guard members and volunteer family members. Developed and provided training for Pacific Area Coast Guard members on issues relating to domestic violence, sexual assault and crisis resources.

Developed and maintained a positive working relationship with statewide domestic violence/sexual assault programs, Division of Family & Youth Service offices, as well as statewide mental health programs and public health services.

Serve as the primary advisory in all aspects of the Coast Guard Family Violence program to approximately 24 units within Coast

Supervised staff of 10 and an average of 15 volunteers. Assured agency compliance with administrative and personnel policies and procedures and state and federal laws. Recommended policy changes to Board and implemented policy.

Prepared and recommended policy to Board of Directors for the implementation, evaluation and modification of agency programs and activities. Reviewed, monitored and evaluated existing programs. Developed new programming for children's services, village outreach and residential shelter services. Identified, analyzed and documented procedural and policy problems. Recommended and implemented corrective action.

Served as backup counselor, providing direct services to clients as needed. Provided crisis counseling, assessment and assistance in development of safety planning for clients. Made referrals as appropriate. Provided case management and consultation through reviews with counseling staff to monitor implementation of client program and utilization of resources. Provided professional training to other local and statewide agencies.

Served as Treasurer, Alaska Network on Domestic Violence & Sexual Assault from 1988-1990. Served as Chair, Training Committee, Alaska Network on Domestic Violence & Sexual Assault from 1987-1988. Served on Steering committee from 1987-1990.

Research Technician, Bristol Bay Native Association, Dillingham, Alaska, May 1985-November 1985.

Developed survey instrument to collect information on acquired Bristol Bay village capital projects. Worked with Village Councils in developing needs assessment for future projects. Collected and organized data for use in Bristol Bay capital improvement project priorities to State Legislature. Researched funding sources and assisted village councils in locating alternative sources of funding for projects.

Executive Director, Safe & Fear-free Environment, Inc., Dillingham, Alaska, August 1982-September 1984.

Responsible for overall program and fiscal management and supervision of staff.

Developed service program for initial funding. Developed volunteer recruitment, screening and training program. Developed non-residential service programs. Developed and implemented training program for volunteer safe home providers. Developed and implemented needs assessment for further program development. Developed and implemented a village outreach program. Responsible for evaluating overall effectiveness of programs.

Supervised staff of three. Assured that agency followed overall employment objectives and agency personnel policies and procedures. Trained staff in new programs. Designed office procedures, as required.

PROFESSIONAL EXPERIENCE

Family Programs Administrator, 17th Coast Guard District, Juneau,
Alaska, December 1991-Present

Developed and implemented policies and programs to ensure compliance with Congressional mandate to address domestic violence, sexual assault, child abuse, suicide prevention, and special needs. Provides consultation on issues relating to family advocacy, as well as other related issues.

As deputy supervisor, responsible for ensuring administrative functions of 9 member Work-Life staff are maintained in the absence of supervisor. Assists supervisor in the development of program policy and special projects as directed. Assists in the development of budget and assisted in the implementation of Work-Life program, including hiring of new civilian staff positions.

Developed, implemented and maintains an active training program for the identification and reporting of domestic violence, sexual assault, suicide awareness and other related areas. Obtained funding for and coordinated District's first Work-Life Conference for approximately 100 Coast Guard members and volunteer family members. Developed and provided training for Pacific Area Coast Guard members on issues relating to domestic violence, sexual assault and crisis resources.

Developed and maintained a positive working relationship with statewide domestic violence/sexual assault programs, Division of Family & Youth Service offices, as well as statewide mental health programs and public health services.

Serves as the primary advisory in all aspects of the Coast Guard Family Violence program to approximately 24 units within Coast

Guard District 17. Provides supervision to all 24 unit Family Advocacy Representatives and volunteer Ombudsmen on issues relating to family advocacy. Provides crisis intervention, short term counseling, assessment, referral, case management and followup.

Acting Executive Director, Alaska Network on Domestic Violence & Sexual Assault, Juneau, Alaska, May 1991-June 1991

Worked closely with Department of Public Safety, State Legislature, Office of Management and Budget regarding Council on Domestic Violence & Sexual Assault budget. Provided oral and written testimony to legislative committees on bills relating to domestic violence/sexual assault issues. Met with legislative and department staff on issues related to domestic violence and sexual assault. Conducted needs assessment and coordinated statewide conference on sexual assault attended by over 60 direct service staff.

Executive Director, Safe & Fear-free Environment, Inc., Dillingham, Alaska, May 1986-October 1990

Under general direction of Board of Directors, responsible for overall management and day to day operations of agency.

Coordinated with local, state,, federal agencies. Researched, developed, and submitted funding proposals; developed and implemented program evaluation process; monitored progress of grant goals and objectives. Responsible for ensuring program compliance with grantor regulations. Responsible for planning, development and preparation of grant applications.

Developed and managed annual budget of over \$300,000. Monitored revenues and expenditures for compliance with state and other funding source regulations and budget limitations. Prepared quarterly fiscal and activity reports for the Board and funding agencies. Drafted budget revisions as needed for Board action. Supervised contract accountant.

Negotiated cooperative agreements with state agencies and other private agencies in referral and services of clients. Represented agency with state officials, other government and public agencies and the public to discuss and design programming, consultation, training and education activities. Spokesperson for agency at public hearings.

Represented agency on other local and state committees and boards.. Coordinated and maintained cooperative work relationships among public and private sectors. Served as Vice-Chair for Bristol Bay Area Health Corporation Alcohol Advisory Committee. Member of Bristol Bay Area Suicide Prevention Task Force. Member of Bristol Bay Area Interagency Committee on Child Abuse, a coordinated effort at case management for DFYS child abuse cases.

Supervised staff of 10 and an average of 15 volunteers. Assured agency compliance with administrative and personnel policies and procedures and state and federal laws. Recommended policy changes to Board and implemented policy.

Prepared and recommended policy to Board of Directors for the implementation, evaluation and modification of agency programs and activities. Reviewed, monitored and evaluated existing programs. Developed new programming for children's services, village outreach and residential shelter services. Identified, analyzed and documented procedural and policy problems. Recommended and implemented corrective action.

Served as backup counselor, providing direct services to clients as needed. Provided crisis counseling, assessment and assistance in development of safety planning for clients. Made referrals as appropriate. Provided case management and consultation through reviews with counseling staff to monitor implementation of client program and utilization of resources. Provided professional training to other local and statewide agencies.

Served as Treasurer, Alaska Network on Domestic Violence & Sexual Assault from 1988-1990. Served as Chair, Training Committee, Alaska Network on Domestic Violence & Sexual Assault from 1987-1988. Served on Steering committee from 1987-1990.

Research Technician, Bristol Bay Native Association, Dillingham, Alaska, May 1985-November 1985.

Developed survey instrument to collect information on acquired Bristol Bay village capital projects. Worked with Village Councils in developing needs assessment for future projects. Collected and organized data for use in Bristol Bay capital improvement project priorities to State Legislature. Researched funding sources and assisted village councils in locating alternative sources of funding for projects.

Executive Director, Safe & Fear-free Environment, Inc., Dillingham, Alaska, August 1982-September 1984.

Responsible for overall program and fiscal management and supervision of staff.

Developed service program for initial funding. Developed volunteer recruitment, screening and training program. Developed non-residential service programs. Developed and implemented training program for volunteer safe home providers. Developed and implemented needs assessment for further program development. Developed and implemented a village outreach program. Responsible for evaluating overall effectiveness of programs.

Supervised staff of three. Assured that agency followed overall employment objectives and agency personnel policies and procedures. Trained staff in new programs. Designed office procedures, as required.

Coordinated with other local and state agencies in program development. Worked closely with law enforcement, criminal justice system and medical providers in developing cooperative agreements between agencies.

Developed and managed annual budget of over \$150,000. Developed, prepared and submitted proposals to funding authorities. Responsible for negotiating grant agreements with funding sources. Ensured compliance with grant regulations, as well as state and federal regulations. Prepared quarterly fiscal and activity reports to funding sources.

Worked closely with volunteer Board of Directors in developing Fiscal Policies & Procedures and Client Policies & Procedures and implemented same.

Developed and presented local community education presentations and agency professional staff training. Provided training to other statewide shelter programs.

Recruited, trained and supervised staff. Presented recommendations on Personnel Policies & Procedures to Board.

Provided direct client services, case management for counselors, and referrals as appropriate.

Research Analyst Office of State Court Operations, Wisconsin State Supreme Court, Madison, Wisconsin, March 1981-October 1981

Project to determine characteristics of case processing efficiency in Wisconsin State Circuit Courts for possible statewide administrative changes. Researched and developed interview instrument for judges and clerk staff. Coordinated and completed interviews with judges and court staff and held attorney panel discussions. Collated and provided analysis of data. Prepared recommendations and results for final report.

Training Coordinator Wisconsin Division of Corrections, Madison, Wisconsin, February 1980-March 1981

Administrative Rules Training Project. Provided training for all corrections officers throughout the State adult corrections system in the use of revised Administrative Rules-Discipline. Developed training materials with institutional staff. Liaison with legislative committee and legislative consultants. Arranged for and coordinated training schedules with institutions. Monitored training sessions. Evaluated training program. Prepared final report. Arranged for Administrative rules to be printed in both English and Spanish. Observed disciplinary proceedings to determine compliance with new rules. Maintained accounting of grant funds.

Budget Analyst Wisconsin Division of Corrections, Madison, Wisconsin, January 1979-February 1980

Conducted analysis of adult educational programs throughout institutional system. Assessed current program structure. Research on current trends of corrections education. Developed needs assessment instrument. Interviewed each institution education director. Inventoried classes offered under current system. Developed and evaluated program alternatives and fiscal impact. Prepared and submitted final report and recommendations to Division Administrator. Responsible for liaison with budget teams from OMB on project. Prepared Budget Narrative and budget for inclusion in Corrections Biennial Budget.

Developed alternate staffing pattern for inmate release program. Prepared budget narratives and program costs for Biennial Budget.
