Because of recent incidents with anthrax, the horrific and previously unthinkable threat of biological warfare has become a reality and an everyday threat to the public health. As the State of Alaska agencies and departments have mobilized to respond to bioterrorism events, limitations in capacity of the State public health system have been revealed. These limitations in capacity were identified by the Department and addressed in the Back to Basics Initiative that was partially funded by the legislature in the last session. The Department requests additional funding to rebuild essential capacity and expertise since the demands on the public health system have been overwhelming.

Consistently, more Americans are being identified as having been exposed to anthrax as a result of intentional criminal acts. Numerous suspicious circumstances have required investigation and, in many cases, collection of materials for laboratory analysis. As experience has been gained, State health departments and the Centers for Disease Control have been developing information for the public, policy makers, physicians, and first responders. Because there is no past national experience to draw upon to guide efforts, responding has been extremely stressful and time-consuming. Providing accurate daily information has taxed the State surveillance system. Providing appropriate instructions for specimen handling and shipment has been a difficult task. Developing advice for Alaska's medical providers has challenged the State public health medical staff. Developing accurate information to guide the State public health response has revealed limitations due to inadequate capacity.

Our experience has served to educate all State, federal and local responders by showing us where we remain vulnerable and what needs attention to improve our ability to protect Alaska.

We are requesting the following FY03 increment for surveillance, field investigation and training :

We request funding to support one full-time medical epidemiologist and one nurse epidemiologist who would become clinically and epidemiologically expert in both bioterrorism and chemical terrorism. This expertise will be essential to guide response in the event of an attack in the future and will enhance existing disease management and control efforts. We are also requesting \$30.3 for staff travel to get training specific to bioterrorism and then provide training in the field for local health providers, public safety personnel, and others.

These funds will support two positions, an Analyst Programmer IV and a Data Entry Clerk, which will support the Health Alert Network (HAN) system, a system responsible for rapid electronic communications among agencies responsible for responding to disasters and public health emergencies. The request includes personal services funding for four months in FY02 (\$34.9) and 12 months in FY03 (\$105.6).

The Analyst Programmer will: (1) complete, maintain, and troubleshoot the database containing contact information to alert, notify, or query personnel or facilities in the event of a disaster or emergency (e.g., healthcare providers, emergency medical services providers, health and public safety facilities, law enforcement, laboratory staff, military, veterinarians, state and local leadership, etc.); (2) develop a system to collect data on the timeliness and effectiveness of a health alert message; (3) maintain, troubleshoot and upgrade the hardware and software necessary for the HAN system; (4) establish written protocols for when and how to use the HAN system; (5) maintain contacts with the micro-computer technicians that provide technical support for the public health centers to ensure equipment is operational; and (6) provide frequent status updates to the Bioterrorism Interagency Operations Team, a team responsible for overseeing the Division of Public Health's preparedness and response to acts of bioterrorism.

The Data Entry Clerk will maintain contact and facility information for the HAN database, assuring it is accurate, complete, and current.

Travel funds will include the cost of travel of the Analyst Programmer between the Juneau and Anchorage offices to provide program support. Contractual services funds will include the cost of rent for the two positions and necessary support. Supplies funds will be for the purchase of general office consumables. Equipment funds will be for the purchase of computers and installed software.

The Department requests an FY03 increment to fund the remainder of the Back to Basics Initiative for the public health laboratories to ensure the lab has the staff, equipment and contractual funds needed to carry out their infectious disease work.

In FY02 the legislature funded one-third of Governor Knowles' request for the Back to Basics - Infectious Disease Control Initiative. This request funds the remaining two-thirds for the Public Health Laboratories. Two other related increments fund Epidemiology and Public Health Nursing. The Back to Basics Initiative is aimed at reinforcing Alaska's eroding public health system to prevent the spread of infectious disease. Promoting and protecting the public's health is a fundamental function of state government under the Alaska Constitution.

The State of Alaska opened a new Public Health Laboratory in January of 2001. This increased capacity allows the lab to operate more safely, do more tests and do tests of greater complexity. All of these improvements serve Alaskans well. They can get most test results quicker which means treatment can begin earlier. Some tests that could not previously be done are now available to assist physicians in making accurate diagnoses for unusual diseases, and providers can get confirmation tests more readily. But with this increase in service come additional costs. Tuberculosis has re-emerged as a major public health threat in Alaska. As a result of the major outbreaks in the past two years, Centers for Disease Control identified the state during the summer of 2001 as having the highest TB rate in the country. As a result of the increase in this one disease, lab costs have increased substantially. There are more tests being requested, the test kits have increased in cost and the laboratory staff workload has increased. For example, between 1995 and 2000 the cost of the test kits for tuberculosis increased from \$10 to \$50 and the number of tests requested annually increased by several thousand.

There are similar cost increases for many other diseases as well. An example is in the area of sexually transmitted diseases. In 1997 there were approximately 1,984 cases of gonorrhea and chlamydia; in 2000 there was 2,932 or approximately a 50% increase. Additionally, the number of hepatitis tests performed grew from about 7,000 in 1995 to about 22,000 in 2000. These numbers include hepatitis C for which no test was available in 1995. Overall laboratory reagent and labor costs for hepatitis testing alone grew from slightly under \$100,000 in 1995 to several hundred thousand dollars in 2000, with reagent costs making up the majority of the additional cost.

Due to the events of September 11, 2001, and the anthrax bioterrorist events that occurred during October, more and more persons have become cognizant of the role of infectious diseases and the State public health laboratory. This has resulted in a significant increase in the number of tests performed by the laboratory. For example, the number of requests for influenza testing has doubled and the number of requests for testing bacterial agents that cause upper respiratory diseases has increased by 150%. It is surmised that this level of activity will continue indefinitely as the public becomes more aware of the capabilities of our laboratory.

Change Record Detail With Description

----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-------------------------	--	--

surmised that this level of activity will continue indefinitely as the public becomes more aware of the capabilities of our laboratory. These strains have only exacerbated the fiscal shortfall already experienced by the laboratory as stated above. In order to provide the essential services that are expected by the public in an accurate, timely, cost effective and safe manner, the Division of Public Health requests for the Public Health Laboratory funding for:

Personal Services \$67.0

One additional microbiologist in FY03 to ensure there is full coverage when staff is out ill or on leave, to enhance the ability of the lab to do new tests, and to enable more timely testing of all work being submitted to the lab.

Travel \$3.0

For training or other necessary travel and per diem.

Contractual \$140.0

Increased shipping costs and waste disposal related to increased numbers of specimens.

Supplies \$30.0

Additional test kits, reagents and other supplies are needed to do the lab tests. These costs increase regularly due to rising supply costs and increased numbers of tests being done. Additional test kit supply funding is requested in a separate Homeland Security increment.

											PFT	PPT	NP
FY2002-2003 Homeland Security													
Bioterrorism - Public Health Lab													
	Inc	608.0	425.0	15.0	30.0	138.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund	608.0												

This FY03 increment provides for on-going bioterrorism response capacity. Since the events of September 11, 2001, there has been a marked increase in the demand for services that are both directly and indirectly related to bioterrorism. For example, testing for respiratory viruses has doubled because inhalation anthrax needed to be ruled out when patients came forward with upper respiratory illness. All symptoms of bioterrorism agents initially present themselves as nondescript illness that resemble common disease. These common diseases must be confirmed so that appropriate therapy can be initiated. Failure to differentiate common illness from a bioterrorist event will have dire consequences on the population.

The personal services requested for FY03 is to cover the salary costs of existing microbiologist and laboratory technician positions, both for filled and for currently vacant positions. Without this funding, the lab will not be able to have a full staff available to respond to the demand for lab tests. The current funding level requires numerous positions to be held permanently vacant.

In addition, to maintain the existing staff, the Division of Public Health has converted several Microbiologist and Laboratory Technician positions in Anchorage to a temporary exempt salary schedule. The division has historically had chronic difficulties in recruiting and retaining microbiologists, laboratory technicians and the Chief of the Public Health Laboratory in Anchorage because salaries have not been competitive with those available in private industry. Recent recruitment efforts have failed to produce candidates with adequate clinical experience. The Anchorage Lab had a 47% vacancy rate when the temporary exempt salaries were initiated. The public health emergency involving anthrax required the Anchorage Laboratory to be in operation 24 hours per day. In order to provide adequate coverage of the Public Health Lab, additional staff are required and additional staff cannot be hired without adequate salaries.

This increment also includes \$15.0 for travel for training specific to new and emerging tests to develop staff proficiency. Contractual funds are requested to pay the on-going maintenance costs related to new and very expensive and sophisticated testing equipment that has been installed in the last year. The remainder of the increment is to purchase the additional lab supplies needed to conduct the tests related to bioterrorism threats and concerns.

The computer network specialist/program analyst will support the Medical Examiner and Public Health Lab needs involving all issues related to computer hardware/software, network and associated work. This support is essential to ensure adequate communications during a disaster or attack as well as for ongoing public health needs.

This request includes four months personal services for FY02 (\$20.0) and full-year position and support funding in FY03 (\$65.0).

Homeland Security Additional Staff

	Inc	191.3	179.3	0.0	4.0	2.0	6.0	0.0	0.0	0.0	2	0	0
1004 Gen Fund	191.3												

One Microbiologist II, located in Fairbanks, and one Microbiologist II, located in Anchorage, are needed to provide specialized scientific expertise in virology for Anchorage and bacteriology in Fairbanks. Virology is currently done only in Fairbanks and bacteriology only in Anchorage. Having the ability to do some specialized virological testing in Anchorage and some critical bacteriological testing in Fairbanks will ensure uninterrupted essential medical laboratory services in the event air transportation is shut down as it was September 11, 2001, or one of the laboratories is overwhelmed by an influx of specimens from ill persons or environmental specimens due to a terrorist event such as that which occurred due to the October, 2001, anthrax events.

The requested funding is for 2 PFT positions and associated lab testing costs for FY03.

Homeland Security Test Kits

	Inc	300.0	0.0	0.0	0.0	300.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund	300.0												

This increment provides for the costs of buying a wide variety of test kits, chemicals and biological reagents, microbiological media and other consumables. Test kits include kits for use with the Smart Cycler (tm) real-time polymerase chain reaction automated instrument used to detect the genetic molecules from such bioterrorist-associated germs as anthrax, plague, tularemia and others. Chemical and biological reagents include, but are not limited to, antibodies, DNA and RNA primers, tissue culture cells lines, fluorescent probes, acid/base buffers, and quality control strains. Microbiological media may include items such as SBE, XLD, BHI, whole sheep's blood, yeast extract, vitamins, and antibiotics. Other consumables include such things as petri dishes, swabs, specimen collection devices and kits, and IOTA-approved mailers. All these supplies are rapidly used up when there is a sudden influx of test requests as was illustrated by the events following September 11. Current test supplies funding is inadequate. Therefore, these funds are essential to allow for testing related to bioterrorism.

\$100.0 has been identified as the FY02 need and \$200.0 is for FY03 on-going costs.

<p>These funds provide for core all hazards emergency preparedness activities as well as all hazards staff activity for Local Emergency Planning Committees such as planning, exercising, and training for LEPC's statewide. The all hazards funding contributes to local communities' ability to better prepare and respond to terrorist threats.</p> <p>All 20 LEPC's (and any potential new ones) are eligible for these funds. They are awarded on a competitive grant application basis for special projects that are specific for all-hazards activities. Those projects are then scored and ranked, and awarded by the State Emergency Response Commission, Finance Committee. All hazards special projects are broken into the following categories: All Hazards Analysis, All Hazards Capability Assessment, All Hazards Emergency Operations Plan Development, Hazards Analysis Revisions, Capability Assessment Revisions, Emergency Operations Plan Revisions, and other special projects that may be submitted by an LEPC. The LEPC's total needs vary, but in the past they have submitted grant applications in excess of \$1,000,000. This request supports the local communities' emergency planning needs.</p>

<p>In order to foster a positive attitude toward the National Guard in rural areas, DMVA will form a state team to travel to rural communities and promote Guard programs to benefit the community. The DMVA will focus on family safety, drug demand reduction, veteran's affairs, and Military Youth Academy and National Guard opportunities.</p> <p>The goal of the program is to encourage youth in rural communities to join the Guard and to retain those already enlisted. The DMVA needs to maintain its presence in these communities in order to obtain its recruitment and retention goals in the Federal Scout units. Some Federal Scout units presently are assigned security duties at rural airports around the state. Airport security has been a focus for Homeland Security.</p> <p>This program enlists the services of retired Regimental Sergeants Major from rural battalion areas who have previously served in the Alaska Army National Guard. They drill two days a month with the existing units and advise unit commanders locally, or at a specified unit location, on a host of issues ranging from training to cultural issues.</p> <p>The program coordinator is the Commissioner's representative with the communities. The position works with the community to determine services of most interest and appropriate times to visit the community. These initial visits result in a team of people who visit the community to provide a suite of programs. Follow-up visits continue in order to develop these relationships with the Guard.</p>

----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-----	-----	----

After the September 11, 2001 terrorist attacks, the FBI and EPA distributed notice to the more than 10,000 public water agencies through out the nation alerting them to possible threats to public water sources. The Association of Metropolitan Water Agencies representing the 150 largest water providers in the US, the American Water Works Association representing over 50,000 professionals, and the Association of Metropolitan Sewer Agencies were all notified. The Anchorage Water and Waste Water Utility (AWWU) is among those agencies.*

Chugach State Park was established in 1970 in part, to "protect and supply a satisfactory water supply for use of the people" (AS 41.21.121). The people referred to in the statute are the citizens of the Municipality of Anchorage. Over 95% of the water for the Anchorage water supply system operated by AWWU is derived from the watersheds in Chugach State Park. Today, the waters of Eklutna Lake are used to supply the Anchorage water system. Ship Creek water is used as a back up supply source for Anchorage and is also used to supply water to Elmendorf AFB and Fort Richardson. Campbell Creek recharges groundwater supplies which are then pumped by AWWU to obtain the remaining 5% of the water system supply.

Current park ranger staffing levels do not allow for daily patrols of Eklutna Lake, Ship Creek, or the tributaries of Campbell Creek, the areas that produce the Anchorage water supply. Rangers currently working are not solely dedicated to law enforcement or facility security matters, but spend the majority of their time attending to a variety of tasks related to park management, i.e. volunteer supervision, revenue management, facility maintenance, etc. On a year-round basis these resources may only see weekly, or less frequent, patrols. More park rangers working in Chugach would allow park managers to schedule more frequent patrols of these areas and to implement security programs, in cooperation with AWWU and others, that are not possible with available staff.

Two additional Park Rangers, would provide the depth of staff necessary to allow a seven-day a week presence in the Eklutna Lake Area and more frequent patrols of the Ship and Campbell Creek watersheds in Chugach State Park.

Annual Cost per Park Ranger Position:

Park Ranger I (R14) @ 12 months - \$ 47.0

Vehicle operation costs/fuel - \$ 6.0

Training - \$ 2.0

Office/lease space - \$ 2.0

Supplies/materials - \$ 3.0

Law enforcement equipment and tools - \$ 2.0

Total: \$62.0/ranger/yr x 2= \$124.0 year

----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-------------------------	--	--

The problem is that initial attack firefighting capability has been outstripped by population growth. It is critical that initial attack is successful in catching fires in wildland/urban interface areas such as Anchorage, Fairbanks, Mat-Su, and the Kenai. Lives depend upon it. Population from 1990 to 2000 has increased by 15% in the Anchorage, Fairbanks, Mat-Su and Kenai Boroughs while initial attack firefighters have decreased from 72 to 68 statewide. Today there is one firefighter for every 6,637 people. Today we have over three million acres of spruce bark beetle killed timber. Today 84% of state fires are caused by humans. Today many, many homes are in spruce killed forests on roads with only one way of escape. Today the risk to life and valuable property is much higher than just a few years ago.

The fact that the 68 initial attack firefighters have managed to catch 90% of fires at less than ten acres spread is phenomenal. But it is taking its toll on firefighters. We have areas with ten or more wind-driven fires per day occurring across a 40-mile area. The few firefighters cannot be everywhere and they cannot be successful when exhausted. Firefighters must be ready to go at a moment's notice - the fire won't wait for a crew to get there two hours later or more. That is why initial attack firefighters must be in place and ready where they are needed. Resources are stretched too thin for the risks in wildland/urban interface initial attack.

This increment meets several of the anti-terrorism and response guidelines listed in the Governor's draft legislation dated 11/19/01:

- The addition of 20 highly trained and skilled seasonal initial attack firefighters will strengthen an existing program that protects and saves lives;
- These positions will be trained in and skilled in National Interagency Incident Management System (NIIMS), Incident Command System (ICS) and will be capable of safely responding to assist in all emergencies, not just wildland fire;
- The 20 seasonal initial attack firefighters will be highly mobile and can be utilized to protect human made improvements and natural resources across the State;
- The 20 seasonal positions will reinforce first responders, and will be used to augment wildland fire response in populated urban interface areas and will be available to assist with other disasters in locations with inadequate response capabilities.

The State will be safer because the addition of these highly skilled and mobile initial attack firefighters will aid in the suppression of wildland fires in the densely populated urban interface areas of the state.

If these initial attack firefighter positions are not funded the threat of an escaped wildland fire in the critical urban interface areas of the state is higher. If a terrorist attack uses arson over a large forested area and initial attack positions are not funded it could result in large-scale destruction of property and perhaps loss of life.

											PFT	PPT	NP

A successful solution to this problem must provide immediate initial attack capability, mobility of firefighters to different populated areas from Homer to Fairbanks, use of modules (five firefighters) to protect broader areas, and availability during peak fire risk. Twenty initial attack firefighters are needed for four months during fire season. These permanent seasonal forest technician firefighters will be positioned in four modules consisting of five initial attack firefighters around the state to augment the current firefighters. They will be mobile. They will be moved to the population areas of highest danger that exist at any given time. The modules will be assigned as engine crewmembers or helitack crewmembers in the wildland/urban areas. Sixteen of these positions will be forest technician I/II firefighters and four will be forest technician III initial attack incident commander firefighters. These four-month seasonal firefighters are needed during the height of fire season in the populated areas.

Forestry has proposed this solution for several reasons. To be effective, fire response must be safe, rapid and successful. To be prepared, Forestry needs trained firefighters in position close to areas of highest danger. Forestry's 68 existing initial attack firefighters are statically assigned to given Areas because fires occur in those areas throughout the season. Each Area has a peak period of two to three weeks. The areas of highest fire danger shift from south to north as the season progresses. Five person modules of the twenty initial attack firefighters can be readily moved without jeopardizing the basic unit strength response needed for ongoing fires throughout the season in each area.

Alternatives to additional initial attack firefighters have been considered and found less desirable. In addition to the 68 permanent seasonal forest technician firefighters, Forestry hires Emergency Firefighters (EFF) as individuals, Type II crews, and a Type I crew.

EFF Crews are critical and essential to firefighting. There are two levels of EFF crews that are used:

- 1) A basic Type II level unit; and
- 2) A Type I "Hotshot" unit.

There are 73 Type II EFF crews, primarily from Alaskan villages. They train and work together as a unit of 16 firefighters supervised by a local crew boss. A Type II EFF crew receives fire safety and physical training since their work consists mostly of wildland fire suppression using hand tools. Type II EFF crews work for 14-day assignments on project fires that have escaped initial attack and will require extended periods of firefighting.

Type I "Hotshot" crews of 20 firefighters receive extensive training in wildland and urban/interface firefighting and safety. They have trained "sawyers" using chainsaws, must work in a wide variety of fuel types including "big timber" in steep and dangerous terrain not seen in Alaska. They are the elite firefighter crew that deals with the most dangerous and difficult situations anywhere. Type I "Hotshot" crews are a national resource. They can be mobilized and committed outside Alaska for 14 days (or longer). Experience

Department of Natural Resources

Scenario: FY2002-2003 Homeland Security (2323)

Component: Fire Suppression (437)

BRU: Statewide Fire Suppression Program (140)

Scenario/ Change Record Title	Trans Type	Totals	Personal Services	Travel	Contractual	Supplies	Equipment	Land/ Buildings	Grants Claims	Misc.	Positions PFT PPT NP
----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-------------------------

has shown that Type I crews may not be available in Alaska when needed the most. There are four Type I "Hotshot" crews in the state, three are federal and unavailable for this function. The fourth, the Tazlina Hotshots, is an elite crew used both nationally and in-state. When not on actual fires, they have been fully utilized by the Kenai Peninsula Borough and the Municipality of Anchorage, as a crew, to do fuel mitigation.

Disadvantages: EFF crews work as a unit and are not used for initial attack. EFF crews are not trained for or used on engines or helitack. The nature of a crew that has 14-day assignments does not lend itself to four months continuous initial attack. The Type II village crews in particular often depend on assignment rotations that give them opportunities for fish camp and subsistence activities. Neither Type I nor Type II crews can be readily broken into modules, dispersed across the state and still maintain their availability as a crew on two hours notice for fires.

Hiring additional Individual Emergency firefighters (EFF) is a possible alternative. During the past decade, Forestry has been forced to become more reliant on EFF positions to fulfill the initial attack role. The disadvantage of relying on EFF for a continued annual initial attack firefighter need is that such positions do not provide the state with a dependable workforce. EFF positions are dependent on work being available if there are fires. This results in short term jobs that may terminate at any time. Therefore, EFF employees are not provided the opportunity for the same level of training, physical fitness standards or commitment as seasonal firefighter positions. The nature of EFF positions is neither an incentive to retaining individuals nor conducive to training and retaining a dependable mobile initial attack force.

Detailers can be requested from out of state to provide initial attack firefighters. This would supply the firefighters when we need them. The disadvantage is that it would significantly increase costs for their transportation and subsistence from the lower 48, deprive Alaskans of jobs, and depend upon their availability around fire seasons elsewhere.

Conclusion: EFF crews, individual EFF, and detailers each serve a specific function in wildland firefighting; but, their specific functions do not lend themselves to initial attack. The specialized training and experience of seasonal forest technician firefighters in initial attack allows them to be more aggressive fighting fires without compromising safety. Aggressive initial attack is critical to keep fires from escaping.

Two Troopers & Two Civilians for Addl Intelligence Analysis & Field Surveillance

	Inc	630.1	374.1	34.1	183.0	38.9	0.0	0.0	0.0	0.0	4	0	0
1004 Gen Fund	630.1												

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests two new State Troopers and two civilians for additional intelligence analysis and field surveillance. The two additional commissioned troopers will be utilized to increase the current staffing level (one) of the AST Criminal Intelligence Unit in Anchorage. The unit is located within the Anchorage Federal Bureau of Investigation (FBI) office to promote the timely and effective gathering and sharing of intelligence information necessary to protect Alaskans as well as the state's critical infrastructure. The two civilian positions will be necessary to provide support for the commissioned officers and to act as intelligence analysts for the additional data to be gathered and requiring dissemination.

The budget proposal of \$630.1 includes \$242.5 for four months of costs in FY2002 and \$387.6 for twelve months in FY2003. The line item breakout by year is as follows:

FY2002:

\$ 93.5 Personal Services
 \$ 8.5 Travel
 \$113.2 Contractual
 \$ 27.3 Supplies
 \$242.5 Total

FY2003:

\$280.6 Personal Services
 \$ 25.6 Travel
 \$ 69.8 Contractual
 \$ 11.6 Supplies
 \$387.6 Total

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests four new troopers for increased field surveillance and analysis capability. The positions will be located in Fairbanks, Palmer, and two in Anchorage. These Troopers will primarily be responsible for field surveillance and for the collection, analysis and dissemination of criminal intelligence information. These investigators will focus on organized criminal group activities and potential terrorist threats against the state.

The budget proposal of \$660.0 is for twelve months in FY2003.

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety requests seventeen new State Troopers for increased security requirements statewide. These additional trooper personnel will supplement troopers already stationed in each location to allow for AST to more effectively respond to Homeland Security issues. With AST facing additional mission requirements such as response to bio-terrorism and enhanced infrastructure security, these personnel will assist in meeting the new demands as well as helping fulfill our traditional core mission responsibilities. The Division of Alaska State Troopers personnel will be located in Palmer, Haines, Sitka, Soldotna, Girdwood, Homer, Fairbanks, two in Cantwell. The position for Sitka will assist in the training of new law enforcement personnel. The Division of Fish and Wildlife personnel will be located in Ninilchik, St. Marys, Dillingham, Nenana, Talkeetna, Anchorage, Juneau, and Yakutat.

The budget proposal of \$3,861.2 includes \$1,608.8 for four months of costs in FY2002 and \$2,252.4 for twelve months in FY2003. Each trooper who occupies state housing must pay "rent" which will be used to offset housing related costs. The line item breakout by year is as follows:

FY2002:

Two Troopers for Increased Security in the Valdez Area.

	Inc	447.6	235.5	27.7	155.9	28.5	0.0	0.0	0.0	0.0	2	0	0
1004 Gen Fund		447.6											

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests two new State Troopers for increased security in the Valdez area. The addition of two Troopers will allow AST to provide an enhanced level of security for critical infrastructure to include the southern portion of the Alyeska pipeline as well as the Valdez Marine Terminal and the local refinery. Currently AST relies on the Division of Fish and Wildlife Protection to provide a Department of Public Safety presence in the Valdez area as no AST Troopers are stationed there. The two Troopers will also provide more efficient basic police services for area citizens as the nearest AST Troopers are currently located in Glennallen.

The budget proposal of \$447.6 includes \$187.6 for four months of costs in FY2002 and \$260.0 for twelve months in FY2003. The line item breakout by year is as follows:

FY2002:

\$ 58.9 Personal Services

----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-------------------------	--	--

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests six new commissioned Trooper positions and one civilian. These positions will staff a permanent post south of the Yukon River bridge on the Dalton Highway. The Yukon River bridge has been identified as one of the most critical pieces of infrastructure in the state as it is a necessary component in the Highway as well as carries the pipeline. This level of personnel (one Sergeant and five Troopers) will allow for staffing the checkpoint as well as for regular patrols on the Dalton Highway, which now occur on an infrequent basis. Response time and service to the communities and pipeline facilities along the highway will be dramatically improved. The civilian position will provide clerical support/dispatch services to the commissioned members.

The budget proposal of \$1,552.5 includes \$619.8 for four months of costs in FY2002 and \$932.7 for twelve months in FY2003. Each trooper who occupies state housing must pay "rent" which is used to offset housing related costs. The line item breakout by year is as follows:

FY2002:

\$193.9 Personal Services

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests six new State Trooper positions for additional ground patrols along the pipeline corridor. The troopers will be located in Delta Junction (two), Paxson (two) and Glennallen (two). No Troopers are currently assigned to Paxson and consequently office space and housing will be necessary at that location. In addition to an increased presence for infrastructure security concerns, the additional Troopers will provide additional basic police services to areas that currently have minimal Trooper staffing levels and extended emergency response times.

The budget proposal of \$1,435.6 includes \$586.0 for four months of costs in FY2002 and \$849.6 for twelve months in FY2003. Each trooper who occupies state owned housing must pay "rent" which is used to offset housing related costs. The line item breakout by year is as follows:

FY2002:

- \$176.6 Personal Services
- \$ 20.8 Travel
- \$329.0 Contractual (includes \$23.1 for trooper housing & office utility/maintenance costs)
- \$ 59.6 Supplies
- \$586.0 Total

FY2003:

FY2002-2003 Homeland Security

Annual TAPS Defense Drills Training - Joint with FBI & AST

	Inc	129.8	110.8	19.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund	129.8												

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, the Department of Public Safety, Division of Alaska State Troopers (AST) requests funding for annual defense drills training. The Alaska State Troopers Special Emergency Reaction Team (SERT) is comprised of three groups based in Palmer/Anchorage, Fairbanks and Soldotna. Members of the team receive specialized training to prepare them for response to emergency situations requiring a higher level of tactical strength than is regularly available. With the trans-Alaska pipeline, the oilfields and Valdez marine terminal, identified as critical infrastructure and potential terrorist targets, the need to train and familiarize team members for future tactical operations exists. AST SERT exercises will be conducted in cooperation with the Federal Bureau of Investigation (FBI) and private pipeline security personnel. The training will involve all three AST SERT teams and will focus on defense of oilfield facilities, the pipeline and the Valdez Marine Terminal.

The budget proposal of \$129.8 includes \$64.9 for FY2002 training and \$64.9 for training in FY2003. The line item breakout by year is as follows:

FY2002:
 \$55.4 Personal Services
 \$ 9.5 Travel
 \$64.9 Total

FY2003:
 \$55.4 Personal Services
 \$ 9.5 Travel
 \$64.9 Total

----------------------------------	---------------	--------	----------------------	--------	-------------	----------	-----------	--------------------	------------------	-------	-------------------------	--	--

The Department of Public Safety, Division of Alaska State Troopers requests funds for twenty additional Village Public Safety Officers (VPSO) and support costs.

Rural Alaska currently has over 166 villages with a population of more than 40 and without road system access. Since the VPSO program began in 1979, there have been as many as 124 positions funded by the legislature. We have funding for 84.5 VPSO officers in FY2002.

Rural Alaska needs public safety assistance, as they cannot provide it themselves. Most of the rural villages have no local source of funding for village police officers. Some have received Federal grants for village police officers, but these grants only last for a three year period, leaving them with no local first responders when the funding stops.

We currently do not have, and have never had, sufficient State Troopers stationed in areas of rural Alaska to provide consistent "first responder" type public safety to the remote villages.

The Village Public Safety Officer Program was developed to provide qualified and trained first responders in rural villages where trooper response was hampered by distance, time, and weather. The Village Public Safety Officer Program is working in those areas where there is not sufficient trooper support. It is the best public safety model for rural Alaska that we currently have.

Well over 70% of all violent crimes committed in rural Alaska are alcohol related. Rural communities where alcohol has become less abundant have had an improvement in their village lives and are experiencing a much improved quality of life.

Adding funding for 20 new VPSO positions would:

- Provide 20 new first responders to routine public safety concerns and emergencies in 20 rural Alaska villages;
- The 20 VPSOs would team with the Alaska State Troopers and the local residents of the villages to create a community policing team to combat the importation of illegal alcoholic beverages into their communities.
- The 20 VPSOs would team with the Alaska State Troopers and the local residents of the villages to create a community policing team to combat other problems the villages encounter that prohibits a good quality of life in the village.

The budget request of \$1,651.9 is for twelve months in FY2003.

											PFT	PPT	NP

The Department of Public Safety, Division of Alaska State Troopers requests six new Regional Public Safety Officers (RPSO) for year two of the RPSO program. The goal of this program is to have twenty additional RPSO positions over a period of three years. The Legislature funded four positions for FY2002 with the passage of Chapter 97, SLA 2001 "SB145 establishing the RPSO Program". The remaining sixteen positions will be requested in the next three years, six in FY03, six in FY04 and four in FY05.

The Regional Public Safety Officer classification is separate and distinct from a State Trooper classification. However, unlike State Troopers, Regional Public Safety Officers are not subject to transfer. They will be hired into a position in a specific community and may remain in that community for their entire career. Individuals, who are hired, as Regional Public Safety Officers will, as a rule, be familiar with a particular rural area of the state and they will have a desire to remain in, or live in a particular rural area. A hiring preference will be given to Village Public Safety Officers who meet RPSO qualifications. RPSOs will be certified by the Alaska Police Standards Council as police officers, will be armed, and will wear a uniform and badge.

The Department of Public Safety has long advocated that successful law enforcement is dependent upon an effort that includes a traditional and regular law enforcement presence as well as other pro-active programs that address educational, social and community concerns. The Regional Public Safety Officers, through their long-term residency in communities promote that concept. Education on important topics such as alcohol, drug and inhalant abuse, boating safety, search and rescue, and domestic violence help build an efficient and responsive public safety presence, thereby improving service and the relationships with individuals communities.

Placement of Regional Public Safety Officers will be determined based on the location of other law enforcement services. Placement of a Regional Public Safety Officer in some communities will benefit FWP as well as other public safety programs. A Regional Public Safety Officer will augment Trooper patrol activities by conducting independent patrols in their community of residence and other communities as assigned. Additional considerations for placement of Regional Public Safety Officers would be given to support offered by an individual community in the form of office space and adequate housing.

The budget proposal of \$802.4 is for 12 months in FY2003.

1004 Gen Fund	460.4												

The Department of Public Safety requests \$460.4 for homeland security public protection services.

Crime Laboratory Clerk \$36.6 GF - In the past 14 years, the Crime Lab's professional and technical staff has doubled in response to law enforcement's requests for forensic support in serology, DNA, toxicology, controlled substances, crime scene investigation, latent fingerprint analysis, firearms or tool mark analysis, and the breath alcohol testing needed to support DWI prosecution. In spite of that growing forensic case load, clerical staff has not been increased to handle database entries, chain of custody tracking, case file management, laboratory report preparation, and general administrative duties such as procurement, recruitment, financial management, and accreditation requirements. An additional Administrative Clerk is critically needed to address a growing backlog of these support duties which are essential contributions to the continued viability of the Crime Lab's forensic analysis needed to convict suspected criminals.

FWP \$72.7 GF (Risk Management Costs) - Fish & Wildlife Protection is in critical need of funds to cover increased risk management costs.

AST Detachments \$169.0 GF (Recruiting and DOT Costs) - to allow AST to mount a critically needed advertising campaign and fund professional service costs associated with new recruits (\$150.0) and to fund DOT cost increases for radar recertification and yard maintenance (\$19.0).

AST Search and Rescue \$65.0 GF - to fund the increased search and rescue costs due to higher number of rescue missions and rising costs.

APSIN \$117.1 GF - to fund improvements to the Alaska Public Information Network (APSIN) in order to provide comprehensive, up-do-date, automated crime information.

This budget proposal is for twelve months in FY2003

Provide APSIN and NCIC Access to Four Border Crossing Locations													
	Inc	115.2	0.0	0.0	115.2	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund	115.2												

Because of the state of national emergency stemming from the terrorist attacks of September 11, 2001, vigilance at the United States border crossings is of increasing concern.

Public Safety operates the Alaska Public Safety Information Network (APSIN). APSIN provides access to state criminal history records, which can be used to screen individual travelers for entry to Alaska and the United States. APSIN includes driving, vehicle, want/warrants, and other law enforcement records relied upon every day for officer safety and public protection. The APSIN system provides connection to the FBI's National Crime Information Center (NCIC) for law enforcement agencies throughout the state.

There are four U.S. Border crossings on the interconnected Alaska/Canadian road systems. Currently, only the Northway location (ALCAN Border Crossing) has intermittent access to the APSIN/NCIC system. The other locations without access to the APSIN database are the Dalton Cache crossing near Haines, the Skagway Border Crossing, and the Poker Creek crossing near Chicken. These other locations must call a local trooper or police office and ask for information on vehicles or travelers.

Access to APSIN and NCIC (via APSIN) is provided at cost to all approved law enforcement agencies. The cost of access to APSIN is directly related to the cost of providing the required communications technology. In general, the further from a metropolitan area an agency is located, the more costly the technology. Depending on location, the monthly cost just for the data line can be approximately \$700-800 per month. There are additional device fees charged by the Department of Administration for each connection.

The annual cost to maintain the yearly data lines and device fees for the APSIN connection for the four locations is \$57.6.

FY2002:
\$57.6 Contractual

FY2003:

1004 Gen Fund	35.0												
Federal requirements recently put into effect require all employees with access to secure areas at airports must have a criminal history record check. Also, all organizations that hire commercial drivers license operators must ensure their background checks are complete. Safeguards need to be installed to protect against impersonation of DOT&PF maintenance/bridge crews or construction contractors. This will provide those background and criminal checks as DOT&PF positions warranting this additional check have been identified.

FY2002 Rural Airport enforcement to comply with FAA mandatory response

	Inc	794.3	0.0	0.0	794.3	0.0	0.0	0.0	0.0	0.0	0	0	0
1004 Gen Fund	794.3												

The security priority at all airports is public safety and to comply with Federal Aviation Administration security directives and amendments. Airport personnel are now required along with law enforcement agencies to perform more security inspections and to provide a more visible security presence. At most rural airports, local law enforcement agencies are contracted with to provide law enforcement. Many of these agencies are not staffed to provide officers as now required by FAA on an on-going basis.

1005 GF/Prgm	22.0												

14 CFR Parts 107 and 108, as revised 11/14/2001 and amended 12/06/2001, requires each airport operator and aircraft operator to conduct fingerprint-based criminal history record checks for individuals who have unescorted access authority to the Security Identification Display Area (SIDA) of an airport, and badge those with access to the Airport Operations Area (AOA). These funds will be used to fingerprint potential airport, airline and concessionaire employees, to process the fingerprints through the FBI for background checks, to issue badges to approved applicants, and to pay administrative costs associated with the additional screening program. Non-airport employees will be charged a fee for this screening function.

FY2002-2003 Homeland Security

FY2002 Increase presence and visibility of law enforcement officers

	Inc	320.0	320.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1027 Int Airprt		320.0											

The security priority at all airports is public safety and to comply with Federal Aviation Administration security directives and amendments. Airport personnel or law enforcement agencies are now required to perform more security inspections and to provide a more visible security presence. This provides these agencies with funding for overtime and additional staff now required by FAA on an on-going basis.

FY2003 Increase presence and visibility of law enforcement officers

	Inc	553.0	553.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	1	0	0
1027 Int Airprt		553.0											

The security priority at all airports is public safety and to comply with Federal Aviation Administration security directives and amendments. Airport personnel or law enforcement agencies are now required to perform more security inspections and to provide a more visible security presence. This provides these agencies with funding for overtime and additional staff now required by FAA on an on-going basis. This also includes a security badging clerk.

FY2003 K-9 Bomb dog program

	Inc	120.0	0.0	0.0	120.0	0.0	0.0	0.0	0.0	0.0	0	0	0
1027 Int Airprt		120.0											

Vehicle and baggage-transported explosive devices are a potential hazard to ANC. Destroying a terminal would seriously disrupt aviation at that location and regionally. A bomb dog program would allow the airport to identify potential problems. Their presence alone can be used as a deterrent to some terrorism activities.

14 CFR Parts 107 and 108, as revised 11/14/2001 and amended 12/06/2001, requires each airport operator and aircraft operator to conduct fingerprint-based criminal history record checks for individuals having unescorted access authority to the Security Identification Display Area (SIDA) of an airport. These funds will be used to process fingerprints of potential airport, airline and concessionaire employees through the FBI for background checks. Non-airport employees will be charged a fee for this screening function.

<p>The security priority at all airports is public safety and to comply with Federal Aviation Administration security directives and amendments. Airport personnel or law enforcement agencies are now required to perform more security inspections and to provide a more visible security presence. This provides staff now required by FAA on an on-going basis. This includes 2 operations staff to perform airport inspections and record keeping rather than have law enforcement personnel perform these duties.</p>

Airport personnel or law enforcement agencies are now required to perform more security inspections and to provide a more visible security presence. This provides staff now required by FAA on an on-going basis. This includes 2 operations staff to perform airport inspections and record keeping rather than have law enforcement personnel perform these duties.</p> <p>It is necessary for FAI to maintain a 24/7 communications center. There is currently only 1 dispatcher per shift. An airport safety officer relieves them for breaks. These 2 part time dispatcher positions will provide some relief so that the ASOs can concentrate on their specific security related issues.</p>
