LETTER OF INTENT
FOR
FCOS FOR SCS FOR CSHB 920

AQUACULTURE POLICY STUDY INTENT

The Aquaculture Study proposes to clarify statutes authorizing private nonprofit salmon hatcheries so that management authorities such as the Department of Fish and Game and the Board of Fisheries can better understand and implement the intent of the Legislature.

Integration of hatchery harvest management strategies with the existing fishery management program is necessary and will require both regulatory and statutory action.

There is an apparent duplication of effort and a lack of coordination between the Alaska Department of Fish and Game salmon aquaculture program and the private nonprofit aquaculture program. Because both of these programs are at least partially funded by the State, it stands to reason that with a clear definition of policy and a clarification of the proper role and function of each group, that the State could ensure a more efficient use of their professional, financial, biological and environmental resources.

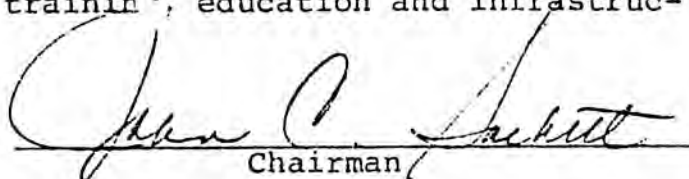

The goal of the policy study should be to develop data, analyze methods, and recommend objectives defined to maximize the economic return to the people of Alaska from investments in a salmon aquaculture program.

The study should be conducted by professional persons with a knowledge of economic, financing and fisheries biology, and its emphasis should be on social and economic goals rather than biological methods.

The division of Legislative Finance will coordinate the study between Representatives Haugen and Gardiner.

BOTTOMFISH INDUSTRY DEVELOPMENT INTENT

The Office of the Governor is to provide the Division of Legislative Finance with detailed quarterly reports for all expenditures made for training, education and infrastructure development.
