## HOUSE RESOLUTION NO. 12

Relating to purchase of Alaskan timber for use in public funded projects.

\*\*\*\*\*

### BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS many millions of dollars will be expended by the state government within the next couple of years to meet the extreme lack of housing and public buildings; and

WHEREAS materials, and especially lumber, can be locally supplied if the market presents itself to private industry; and

WHEREAS the key words always spoken when the economy of Alaska is being discussed are "broader based industries"; and

WHEREAS the lumber and other associated building industries would certainly go a long way in providing for this "broader base"; and

WHEREAS the imposition of a requirement that materials as far as possible for the upcoming building undertakings of government groups like ASHA and other agencies be Alaskan materials would generate industrial development in many areas thus far untouched in Alaska;

BE IT RESOLVED that the Alaska House of Representatives respectfully requests the Governor to direct all state agencies, departments and public corporations to institute policies which provide for the purchase of materials and lumber which are manufactured or milled in Alaska.
