HB 196 am S

Chapter No.

105

AN ACT

Relating to establishment of the Alaska State Climate Center and a state weather and climate program.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1, LINE 10

Approved by the Governor: July 26, 1981
Actual Effective Date: October 24, 1981

AN ACT

Relating to establishment of the Alaska State Climate Center and a state weather and climate program.

* Section 1. LEGISLATIVE FINDINGS. The legislature finds that

(1) weather and climate changes affect all human activities and general welfare;

(2) an understanding of weather and climate patterns is essential to food and energy production; construction; natural resource development and management; determinations of land use; community development; improvement of transportation, communications, and use of water resources; and the well-being of the people of Alaska;

(3) programs of basic and applied climatic research are important functions of several University of Alaska institutes and centers, including the Agricultural Experiment Station; the Arctic Environmental Information and Data Center; the Geophysical Institute; the Institutes of Arctic Biology, Marine Science, and Water Resources; and the Alaska Sea Grant Program;

(4) weather and climate information is essential to the programs of several agencies, especially the Departments of Commerce and Economic Development, Environmental Conservation, Fish and Game, Natural Resources, Public Safety, and Transportation and Public Facilities;

(5) the National Climate Program Act, 15 U.S.C. 2901 - 2908, provides for the establishment of a program for federal and state cooperative activities in climate studies and advisory services, and for annual grants

Chapter 105

1 to states for these activities if the state has adopted a state climate
2 program in accordance with the provisions of the National Climate Program
3 Act;

4 (6) the Arctic Environmental Information and Data Center present-
5 ly provides climatological services for the state under agreement between
6 the University of Alaska and the National Oceanic and Atmospheric Adminis-
7 tration; and

8 (7) by virtue of the National Climate Program Act, it would be
9 highly beneficial for the State of Alaska to establish a state weather and
10 climate program to recognize and improve the existing program, and to de-
11 velop additional programs as required.

12 * Sec. 2. AS 14.40 is amended by adding a new section to read;

13 Sec. 14.40.085. ESTABLISHMENT OF ALASKA STATE CLIMATE CENTER.

14 (a) The university shall establish an Alaska State Climate Center
15 within an appropriate unit of the university. The administration and
16 management of the center is under the direction of a university em-
17 ployee designated the "state climatologist."

18 (b) The Alaska State Climate Center shall

19 (1) prepare and update on a biennial basis a plan for the
20 systematic acquisition and dissemination of climate-related informa-
21 tion; the plan must include

22 (A) an assessment of weather and climate information
23 needs in Alaska;

24 (B) a reasonable basis for setting priorities among
25 these needs; and

26 (C) a program for coordinating the activities of all
27 available sources of weather- and climate-related information
28 sources in order to meet the highest priority needs and to carry
29 out the provisions of this section;

(2) establish a state climate planning advisory group composed of at least three members from organizations that provide climate-related information, and at least three members from organizations that use climate-related information on a regular basis or from the general public;

(3) solicit and consider the advice and recommendations of the state climate planning advisory group in preparing and updating the biennial plan for acquisition and dissemination of climate-related information;

(4) operate and maintain a central repository and archive for reports, books, maps and other records, and publications relating to weather and climatological information;

(5) provide for public access to weather and climatological information and technical advisory services; and

(6) enter into cooperative agreements, on behalf of the state and the university, in order to achieve intergovernmental climate program participation by the United States and the state; these agreements must be consistent with the provisions of the National Climate Program Act, 15 U.S.C. 2901 - 2908.

(c) The Alaska State Climate Center may

(1) investigate, describe, and interpret the characteristics of the weather and climate of the state, including their hazards and limitations;

(2) coordinate with state and federal agencies in matters concerning weather data acquisition, collection, integration, and storage;

(3) monitor federal weather-related activities to assure that the interests of the state are being served;

(4) conduct research activities on the availability of

Chapter 105

1 solar, wind, and water resources that assess the impact of climate
2 fluctuations on these resources;

3 (5) publish bulletins, circulars, maps, or reports of the
4 results of all research and investigations undertaken by the climate
5 center, and distribute them to state agencies, government officials,
6 industry, and the public;

7 (6) provide lectures, talks, displays, and exhibits on the
8 climate of the state for the general education of the public; and

9 (7) enter into cooperative arrangements with local, state,
10 and federal government agencies; foundations; universities; businesses,
11 and other organizations engaged in climate-related research and ser-
12 vices.
